"During the nineteenth century, after the withdrawal of the United States from this branch of trade, it tended to be concentrated for the Occident at the ports of the English Channel and the North Sea and for the Orient at Hongkong and Singapore, and it is significant that in these ports commerce with all nations was most free and least hampered by customs regulations. It can not be claimed, of course, that their commercial prosperity was due solely or even mainly to freedom from this particular handicap. Many conditions must be favorable and many forces must combine for the building up and maintenance of a great foreign commerce. But it is a field of enterprise in which competition appears in its most active form, and experience in the last 50 years clearly shows that the absence of artificial restrictions will frequently suffice to direct the flow of international trade. Thus while Fiume, Trieste, Pasajes in Spain, and even Danzig on the Baltic, did not achieve great commercial expansion by virtue of their free-port privileges, yet the beneficial influence of similar privileges at Hamburg, Copenhagen, and elsewhere has been great and unmistakable.

GROWTH OF THE FREE PORT AT HAMBURG.

"Of modern free ports, their management, character, and successful operation, Hamburg furnishes the best illustration. This city has always been dependent on its commerce, and as long as it was an independent republic it arranged its customs regulations with a view to the least possible interference with trade compatible with fiscal requirements. The formation of the German Empire in 1871, with a tariff system common to all the component States and administered by the Imperial Government, threatened to destroy Hamburg's prosperity and to divert much of her commerce to the rival ports of England and Holland. The city, therefore, long refused to enter the Imperial customs union. In 1882 a compromise was effected, by the terms of which Hamburg was permitted to maintain an area, accessible by both land and water, where goods from all parts of the world might be landed, handled, and reembarked without any interference whatsoever from customs officials. This area was to be a free port, and only when goods passed through its gates into the interior of the country were the duties levied under the German tariff to be collected on them. In addition to the privilege thus accorded, Hamburg received a cash payment of 40,000,000 marks, and the money was used by the municipal authorities to improve the site selected on the river bank and to construct facilities for the most efficient handling of a great commerce. They planned largely, anticipating rapid growth, but development so far outstripped their expectations that several times within a generation both space and equipment had to be greatly increased. Without doubt the growth was due in largest measure to the economic development of the German Empire, for which Hamburg serves as the chief port, and the direct trade between Germany and foreign countries is conducted, of course, under the ordinary customs regulations. But equally without doubt it was the creation of the free port that enabled the city to become an important center for the commerce between other nations and a great consignment market for products from almost all parts of the world. Unfortunately, official statistics make no distinction between German goods and foreign goods shipped from the port, but a careful estimate for the last year before the war puts at $200,000,000 the value of the foreign products exported. These figures illustrate only the importance of the transshipment trade; they give no indication of the advantage to German manufacturers of having at their door a convenient assembling place for the materials which they need nor of the degree to which the markets for German goods were extended through Hamburg's ability to receive and dispose of the products of other countries.

SPREAD OF THE FREE-PORT POLICY IN EUROPE.

"It is of interest to note the spread of the free-zone idea and free-zone practice throughout the world. Hamburg has, of course, been closed in by war conditions. No statistics are available since 1907 of that most important exponent of the policy. There are available from Copenhagen, next in importance, statistical tables of 1910. There the free port was immediately found to be too small for the commerce produced, and there is continuing enlargement.

"Spain in 1914 authorized a free zone at Cadiz. Barcelona secured the same privilege in 1916; Bilbao and Santander in 1918. There has been a temporary setback in improving the zones under the privilege, owing to the fact that the Spanish Government reserved the right to a revocation at any time and did not offer the security of a term grant. It is now expected that the free-zone privilege will be given with such terms as to encourage investment by public and private corporations.

"Sweden, anxious to share in the transit trade of the Baltic, is establishing free zones at Goteborg and Malmo.

"France has long been agitating the question and has during many years received reports and has had bills introduced, which up to the present time have not been enacted into law. The most recent report received through the State Department is to the effect that the matter is still under serious consideration. A consular report from Havre states that it is anticipated that Havre and Marseille, among other

French ports, would be equipped with free-zone privileges, with the probable exclusion of manufacturing.

"Norway is shown by our consular reports to be interested in establishing a free port at Christiania.

"Portugal has authorized the privilege by law, and the latest information was to the effect that establishment was being made at Lisbon.

"Quoting from statements by Mr. H. R. Geddes, the managing director of the Continental Daily Parcels Express & Northern Traffic (Ltd.) and one of the leading commercial experts in Great Britain, made in 1918, we are informed:

"'Sweden proposes to establish free ports at Goteborg and Stockholm, and Norway is discussing the possibilities as to Christiania. Denmark is making preparation on a large scale to retain the increased trade done at Copenhagen and to control the tremendous trade in the Baltic, and, served by the gulfs of Bothnia and Finland, for Scandinavia and Russia. The German ports, however, will make it as uncomfortable as possible for Denmark.

"'Russia, under the old régime, proposed to establish a free port at Novy Port, Petrograd. This scheme is probably now in abeyance.

"'Switzerland is thinking very seriously of inaugurating a free area at Basle and catering for the transit trade of France, Italy, and the German and Austrian Empires. A glance at the map would show the possibilities of this scheme.'

"Great Britain is seriously considering the establishment of free zones throughout the Empire. There have already been great transshipment agencies free from customs interference at Hongkong, Gibraltar and other points, but these differed from the technical free zones established under more rigorous tariff systems.

"Low-tariff countries and countries having few articles on the dutiable list have not needed such installation, as was evidenced in the trade of Belgium, Holland, and the British Isles; but Great Britain, now faced with the need of larger revenue, with the possibility of higher and more inclusive tariffs, feels the need of customs immunity in her transshipment trade and is considering the establishment of free zones as discussed in this report. A parliamentary return dated March, 1918, by a departmental committee appointed by the board of trade, concerning itself with the shipping and shipbuilding industries after the war, states (p. 119, par. 352 of its final report, under the head of 'General recommendations'):

"'Free ports: In this connection reference must be made to the free-port system prevailing in many foreign countries. Should it be decided, whether for revenue or other purposes, to extend widely the range of duties on imported articles the question of creating similar free ports in the United Kingdom would become a matter of pressing importance. It is essential that the position of the United Kingdom as a great transshipment and entrepôt center should not be impaired, and the best means of safeguarding these national interests would undoubtedly be by the establishment of free customs areas on a large scale at the ports principally concerned.'

"In this connection attention is called to the information afforded by Mr. Geddes's speech before the Dover (England) Incorporated Chamber of Commerce, on February 14, 1918, printed in the appendix (p. 74).

ADVANTAGES EXPECTED FROM AN AMERICAN FREE-ZONE SYSTEM.

"Detailed statements of the advantages to be expected from a free-zone system were given by various business interests that would be affected by its establishment in answer to a questionnaire sent out by the commission. The more important of these advantages may be summarized under the following heads:

"(1) In simplifying entry and clearance: Time lost by merchant vessels, whatever be the cause of it, is always costly, and owners in forecasting profit or loss must reckon closely the probability of delays that involve the idleness of ship and crew. It is well known that such delays, varying from several hours to several days, are imposed by customs procedure on vessels entering and clearing at American ports. Officials, and ships' officers of regular lines, it is true, acquire a familiarity with the regulations that enables them under normal conditions to reduce the delay to a few hours; but the typical commerce carrier, the 'tramp steamer,' the chartered vessel that is free to seek business wherever its services are in demand, finds the delay much more serious, and in the event of misunderstanding and a consequent failure to follow the prescribed procedure the owners incur penalties that may change the result of a voyage from profit to a loss. The formalities for making entry must be rigorously discharged, and the regulations for handling and unloading cargo are strict and detailed. All vessels immediately on arrival are boarded by customs inspectors and remain in customs custody, together with their cargoes, until they are unladen and cleared. Vessels designated as common carriers by the Secretary of the Treasury, upon giving bond and paying double compensation for the extra time of weighers and inspectors, may, if they wish, receive or discharge cargoes at night and on Sundays and holidays; but otherwise loading and unloading are permitted only during the usual business hours in open day. The entry of goods is little less technical and time-consuming than the entry of vessels. Even after it has left the ship dutiable merchandise can not be removed from the wharf or place where it is landed until it is weighed, gauged, or measured, or in the case of spirits and sugars until the proof or quantity and quality are ascertained and properly marked. Disputes are inevitable with regard to such matters as valuation, obliterated marks, damaged goods, broken packages, and they necessarily impede the smooth flow of goods away from the piers. This tends to cause congestion, which in turn delays further discharge of cargo and adds to costs and charges. The situation is sometimes made worse by practices that under the present system it is difficult to prevent. A committee of the San Francisco Chamber of Commerce reports:

"'In our experience in San Francisco we found that many times consignees are unfair in a practice of making the customhouse an excuse for keeping cargoes on the wharf longer than they should be kept; and freight congestion is alleged to be due to inadequate wharf arrangements, when, in fact, it is frequently a case of juggling in order to secure free storage on the piers. It is a very serious and costly experiment to a port to have the wharves piled up with goods because real and frequently pretended customhouse requirements compel it.'

"It is too obvious to require discussion that shipping is aided by prompt docking, the uninterrupted discharge of cargo, quick lading, and an early clearance. The time and expense thus saved are a weighty argument for a free zone.

"(2) In equalizing inbound and outbound traffic: Adequate facilities and simplicity of regulations for entry and clearance will do much to stimulate shipping at American ports. But for the stimulation to be effective and to give practical aid to the growth of commerce there must be reasonable certainty that ships will find cargoes both in and out bound. In the lack of this certainty the trade of the United States differs in marked degree from that of other highly developed nations. It is true that the import and export trade of this country, taken as a whole, is very great. But in no direction is there any reasonable balance of the tonnage required for the inbound and that required for the outbound traffic. Thus in the trade with Europe exports require much more shipping than imports. Many ships, therefore, must come from Europe in ballast, or take cargoes under competitive conditions that make inbound freight rates relatively low; and it follows that all or the greater part of the cost of the whole voyage must often be made up by the charges imposed for transporting American merchandise to Europe. In our trade with South America the situation is very different, for the inbound tonnage is markedly greater than that outbound. Consequently, except for the few regular liners engaged in this field, ships bringing South American produce must return in ballast or must ply from port to port seeking a precarious cargo. In preference to either of these alternatives they usually load in the United States for England, Hamburg, or Copenhagen, where they expect to find with reasonable certainty a full cargo back to South America. Similar inequalities exist in our commerce with many other parts of the world. With some countries, indeed, whose produce we buy and where a demand exists for American goods, we have little or no direct communication. Our trade with them is almost entirely conducted through transshipment in foreign countries, an indirect method that both increases its cost and subjects to foreign control its volume and variety.

"(3) In facilitating dealings in foreign products: It is obvious that relief from the inequalities described, the maintenance of regular and inadequate transportation facilities, and the establishment of moderate and stable freight rates can come only through the growth at American ports of traffic that moves both inward and outward on the same course. The free zone will promote this growth by giving greater freedom to the import of goods not for domestic consumption but for transshipment to other countries. We should provide full cargoes for ships wishing to clear for countries to which our exports of domestic merchandise are as yet small and irregular, in order that such exports may find ready and cheap transportation; and we must receive full cargoes from other countries to which we sell in large volume. Preliminary to reshipment, foreign goods thus imported frequently require sorting, cleaning, blending, repacking, and other forms of manipulation to adapt them for the market to which they are to be consigned. For such work, as has been already pointed out, the bonded warehouse and the drawback are inadequate and in a measure inevitably so. And the free zone appears to offer the only sufficient means of permitting it and, at the same time, of protecting the revenue and maintaining such limitations as the Government sees fit to fix for the import of foreign goods for domestic consumption.

"(4) In stimulating certain branches of manufacturing: Less important than the preparation of foreign merchandise for reshipment, but not altogether insignificant, is the opportunity the free zone affords for the manufacture of export goods partly from domestic and partly from foreign raw materials. Many such goods are now made in this country, but owing to the duty on the foreign materials relatively few of them can be exported in competition with foreign producers. It is impossible precisely to specify in advance the branches of manufacturing that would use the opportunity thus offered. In general, aside from industries peculiarly related to the repair and outfitting of ships, its chief attraction would be to those manufacturers in the cost of whose finished products the cost of dutiable foreign materials forms an important part. There readily come to mind under this head such products as cigars, straw hats, certain chemicals, medicinals, and fertilizers, certain kinds of confectionery, brushes made of prepared bristles, preparations of fruit, rice, and other foodstuffs. But it is fairly certain that many such commodities would not be produced in the free zone. For some of them production for export has been fairly stabilized under the bonded warehouse and drawback systems. In the case of others the inducements of the foreign market alone are not enough to justify investments for their production, and their entry into the domestic market would be subject to restrictions identical with those imposed on foreign manufactures. The manufacturer proposing to enter the free zone would have to base his calculations of profit on the prospect of manufacturing solely for export. This is practically a new field for American capital and enterprise, and before entering it a close scrutiny would be necessary of the problems and possibilities peculiar to each separate branch of production. In all likelihood, therefore, its development would be slow and long confined within narrow limits. Even with such a prospect, however, it is not without importance. It should be remembered that the list is lengthening of American manufactures made up in large measure of foreign materials and parts. Not a few manufacturers of such commodities have already found it expedient to establish branch plants abroad, a practice that is strongly marked in the case of sewing machines, typewriters, shoe machinery, and other typically American products. While it is true that the practice is due chiefly to foreign patent legislation, foreign duties on finished manufactures, and some other causes that operate in special cases, it is also true that it is often promoted by the American duties on materials and parts that have to be imported. It is not unreasonable to believe, therefore, that by some manufacturers the free zone would be preferred to a foreign location for branch plants. 'Broadly speaking,' says an experienced American producer, 'my idea is that small parts, requiring extensive labor application in creating the articles, could be made in Europe and the heavier and broader work done here; and instead of the American industry losing the entire article, part of the article would continue as American manufacture, and the profit accruing on the small parts—which would be assembled in this zone and placed in the machine—would also naturally remain as American capital.'

"(5) In stabilizing transshipment trade under varying tariff policies: Of all the advantages to be expected from a free-zone system that which might be looked for with the greatest certainty would arise through freeing the transshipment trade from the unsettling effects of tariff charges. At present American merchants importing foreign goods with a view to reshipment abroad must reckon the costs entailed by the bonding and drawback systems, and these costs necessarily differ with every change in the rate of duty. An impending tariff revision therefore causes wide fluctuations and sometimes a complete interruption of this business, and much time elapses before broken connections can be restored. Any uncertainty connected with the national tariff policy thus becomes a serious handicap to the very branch of commerce which it was never intended that the tariff should affect. For half a century, it is true, this branch of commerce has

been relatively so insignificant in the United States that it has been ignored in the framing of successive tariff acts. Should it, however, attain the development promised by the fulfillment of present tendencies, its security will demand either a very stable tariff policy or the provision of neutral zones for its transaction. In this connection it may be noted that the advocates of a more extended tariff system in England are now incorporating in their policy proposals for a system of free ports.

"(6) Miscellaneous advantages: There are other advantages, incidental but practical, that are expected of a free-zone system by its advocates. Among them is the feasibility of removing the present restriction of the bonding privilege to a period of three years, the provision of adequate space and facilities for exhibiting goods and samples and for demonstrating methods of selecting and packing merchandise so as to meet foreign requirements, a reduction in the costs of drayage and of other processes in handling goods. Again, it is urged that while there are some charges, such as taxes and wages, which will undoubtedly be as high within the zone as without, there are others, such as insurance, rents, and the charges for guarding against violation of the revenue laws which should be lower than under the present system of scattered and more or less antiquated bonded warehouses. There are additional arguments for the free zone based on practices that have proved commercially advantageous in Europe. Mention may be made of the peculiar acceptability at Copenhagen of free-port warehouse certificates as collateral for advances. The thorough police and fire protection provided there, the exemption of goods in storage from all customs claims, and the adequate precautions taken against deterioration render the certificates exceptionally desirable securities. In consequence, according to the testimony of men familiar with conditions at Copenhagen, advances on free-port warehouse certificates may be had on more liberal terms than on the certificates of private warehouse companies.

CONCLUSIONS.

"Such are the advantages, concisely stated, that may accrue from the establishment of a zone-free system. They are necessarily contingent for the reason that they are found in a kind of commerce which for several generations has existed in this country in relatively insignificant amount. It is evident that the success of a free zone and all the claims that are made for it will depend on two things, namely, the volume and character of its commerce and the efficiency of its construction and operation. This explains why the results of European experience have differed in different ports. Some have not succeeded; others have made good returns on the capital invested in them, have reduced the expenses of shipowners and merchants, and have given a widely felt stimulus to business. Obviously, the free zone alone can not create commerce; it can only facilitate the operation of the forces that do create it.

"At the present time the commerce proper to a free zone exists in relatively small volume at the ports of the United States; and since investments for construction and equipment would have to be made with a view to its future growth, they would be in large measure speculative. But many of the conditions formerly limiting American participation in international trade no longer exist, and within the last few years the joint influence of new forces has given to our commerce an expansion that has taxed our port and harbor facilities even beyond their capacity. Active measures for the retention of this commerce after the war will be necessary; at the same time its present importance and the possibility of its further development underlie the confidence of those who advocate a system of free zones. But at any American port at which a free zone is proposed, before capital is put into such an enterprise there would be necessary a careful and detailed study both of the cost of construction and operation and of the likelihood of commercial expansion in the particular field to which free-zone facilities and privileges would be adapted. It is clear that costs and prospects would vary widely from port to port. Some are natural points for the consignment, distribution, and debouchment of goods; others are not. At all of the ports, however, where conferences were conducted by the Tariff Commission—notably at New York, Philadelphia, and San Francisco—merchants, shipowners, and other classes of business men regarded the establishment of a free zone as a wise measure of public policy and an enterprise promising financial profit. Resolutions of organizations in these and other cities, indicating the thoughtful opinion of business men, are included in the appendix of this report. There are also appended sycopated reports of hearings conducted by the Tariff Commission.

"The legislation proposed in the bill, comment on which forms the second part of this report, is merely permissive in character. It leaves the initiative to the locality and puts upon it all risk and responsibility. In the judgment of the Tariff Commission this is as it should be. The Federal Government can give no preference to the ports of one State over those of another. Under the bill as drafted each State or political subdivision thereof is permitted, subject to general requirements that are the same for all, to establish and equip at its own expense a zone wherein foreign merchandise may be entered free of duty.

"After exhaustive study of foreign institutions and careful investigation of American conditions and mercantile opinion, the Tariff Commission recommends the policy of permitting the establishment of free zones in American ports, and indorses, with certain suggested amendments, the bill S. 4153, as shown in the reprint, analysis, and comment which follow."

The Commerce Committee held extensive hearings during the first session of the Sixty-sixth Congress in connection with Senate bill 3170. Mr. Arthur McGuirk, special counsel for the board of commissioners of the port of New Orleans, said:

"A free zone is the necessary complement of a protective-tariff system; the higher the tariff the more essential. Without such facility no high-tariff country can successfully compete in world trade with foreign nations, because the terms are not equal and they are not fair. American merchants in foreign trade carry a handicap. That handicap results from the imposition of the customs system with its consequent expense and necessary delays to trade which does not enter but merely touches or is deposited in the country at different points. By so much as the American merchant pays the customs on goods intended for reexport and not for domestic consumption is he handicapped and discriminated against. As the goods can not enter the country without payment of duty, the situation as to domestic producers and manufacturers will remain unchanged. They remain protected as before. The free zone as to them is extraterritorial; it is foreign country. The customs officers are simply transferred from the ship to the gates of the zone. The same customs duties are collected, only they are collected at a different place; dutiable goods taken from the zone into the country pay the duty just as before. The free zone or area is an inclosed district free of customs restrictions without resident population, equipped with wharves and warehouses where vessels may enter and leave and where goods may be deposited and reexported either in their original state or changed by manufacture. In legal contemplation it is foreign country. It affords a stopping place for goods in transit. Freedom of transportation and manufacture afforded by transshipment or transit zones implies only exemption from charges other than such as are imposed by way of compensation for the use of the property employed or for facilities afforded for its use. Commerce may be carried on in the zone and commodities may be purchased, sold, exchanged, and manufactured therein. Anything may be done with the goods in the zone that could be done outside of it, only they can not be brought from the zone into the United States without paying the same duties or being subjected to the same regulations as in the customs part of the port. There would be no more reason to collect duties upon transit goods than upon goods in a ship stranded upon Cape Hatteras on a voyage from Halifax to Rio Janeiro. In that case the goods unloaded to trim the ship are deposited as the result of an involuntary act; in the zone as the result of a voluntary act, but in neither case would the policy of protection or the receipts of the customs be affected adversely or otherwise.

"The power to regulate commerce with foreign nations 'is the power to prescribe the rules by which it shall be governed; that is, the conditions upon which it shall be conducted; to determine when it shall be free and when subject to duties or other exactions.' Of course, it is within the power of Congress to so regulate foreign trade as practically to exclude it altogether from the borders of this country or to impose a tax so heavy as to amount to the same thing; but that is not the policy of the law. On the contrary, the policy is, by the use of bonded warehouses, bonded manufacturing warehouses, and the drawback, to permit the deposit and manufacture of property in transit and not to tax it with customs duties so long as it does not become blended with the domestic business or commerce of the United States. The goods like the ship are only temporarily here while engaged in lawful foreign trade and commerce. The foreign ships themselves remaining in our ports only long enough to land passengers, mail, and freight, or to dock and repair, are not taxed. So far as respects the ports and harbors of the United States the foreign ships themselves may freely enter and clear exempt from domestic taxation, independently of any control over them except as respects the public health, public safety, and public morals, and the same rule should be extended to the transit freight which they carry.

"Goods in interstate commerce are not taxable by the States through which they pass in transit. The power to tax is the power to destroy. If goods in interstate commerce were subjected to taxation at every point they touched in their transit through the States, interstate commerce would be effectively destroyed. But this power has not been left to be exercised in the discretion of the several States. The Constitution, laws, and jurisprudence of the country wisely inhibit its exercise. If the principle is sound as to interstate commerce, it is equally sound as to foreign commerce. Goods in transit in foreign commerce should enjoy the same exemption and freedom as the ships which carry them. Both ships and freight are property, and there is no sound reason to discriminate between the two classes of property or to lay a burden upon one which is not laid upon the other.

"The policy of this country has not been unfavorable to the freight. It is more favorable, however, to the ships that carry it. Much of the freight belongs to American citizens. Few of the ships did. They were foreign owned. Yet the discrimination has been in favor of foreign-owned ships and against domestic-owned freight. Obviously it has been the intention of this Government to relieve reexport trade from the expense and restrictions incident to the administration of the tariff and customs laws; but that relief has been superficial. It did not reach the source of the complaint. The diagnosis was correct, but the remedy was not a specific. The drawback by which, theoretically, the exporter draws back 99 per cent of the duties paid is very much more costly in practice and the merchant has often been subjected to an expense of from 30 to 50 per cent of the amount of the duties in order to obtain the return of the money advanced in said duties. He has been out of pocket the interest on the money for months at a time because of the incidental delays in the administration of the system, and he has run the risk of heavy fines, consequent upon his unfamiliarity with the routine of the system and his failure or neglect to conform to some of the multiplicity of rules established to protect the revenue and prevent smuggling. The bonded warehouse is good as far as it goes; so is the bonded manufacturing warehouse. A mere glance at the regulations governing the bonded warehouse sufficiently indicates its limited usefulness so far as export trade is concerned. Even more stringent are those applying to the manufacturing bonded warehouse. With few exceptions the output can not be disposed of in the domestic market, even upon payment of duty. In the bonded warehouse handling, sorting, mixing, or repacking of the goods is prohibited. Only where serious damage is threatened can the original package be opened, and then it must be done under customs supervision and by special permission. Once the package is on the floor of a certain place it must remain there undisturbed, in accordance with certain well-defined regulations, and except during business hours the warehouse is closed by a Government lock, and to enter it at any other time requires special permission and payment for the overtime presence of a customs agent. From the time the goods enter port until they are reshipped they are under constant customs control and supervision. No step may be taken without the presence of the officials, and the delay and annoyance caused by necessary certificates, documents, oaths, inspections, and the operation of the system generally have been so great as to discourage and finally deter the average merchant from engaging in the reexport, transit, or foreign trade.

"These conditions can not continue to exist. The sooner they are changed the better. As the change involves no change of principle but merely one of procedure, practice, and system the sooner it is brought about, as it certainly must and will be, the better for all concerned. We must take a leading and not a secondary place in foreign trade. Our necessities demand it. Our merchant marine and changed postwar conditions must inevitably bring it about.

"Considering the question in another aspect:

"Free, or transshipment, zones provide neutral, inclosed, and guarded areas, devoted to foreign trade, without resident population, which are physically within but legally without customs territory. Goods, wares, and merchandise may be deposited therein for reexport either in their original form or as changed by manufacture or manipulation with foreign or domestic materials. Free ports being in effect foreign territory, ships arriving and goods sent therefrom into the customs territory of the United States are subject to the customs system and pay the

same duties as if imported from a foreign country. The economic value of such utilities in the foreign trade and commerce of the United States has not been as yet legislatively perceived. Their powerful stimulus to port development visibly appears in foreign harbors enjoying such benefits. The establishment of free zones in the United States is the logical evolution of the drawback, bonded warehouses, and bonded manufacturing warehouse system. The new forward step proposed and now earnestly advocated is in no sense antagonistic to or exclusive of the old system, which will still continue to thrive and grow in the customs part of the port. That is the sphere of usefulness of the drawback, the bonded warehouse, and the bonded manufacturing warehouse comprising the old system. Both systems will continue to exist independently but complementarily of each other, be mutually helpful, and thrive because of the greater volume of trade created by the free zone.

"The freedom alluded to in connection with free zones does not, of course, imply exemption from charges for services rendered the ship or the goods. The customary tariff of port charges will still be collected by local officials in the zone as elsewhere. The repair, furnishing, and equipment of ships; the manufacture, manipulation, and storage of goods will give steady and remunerative employment to labor and capital, and, what is more, our ocean gateways will be transformed from one to two way ports, busy the year round.

"The United States is a protected zone. The country is covered by a protective tariff system imperfectly balanced by a system of drawbacks, bonded warehouses, and bonded manufacturing warehouses, so as to afford some limited scope to foreign commerce. Without some such device Congress would not have regulated but prohibited and wholly crushed foreign commerce. Commerce is of two kinds—foreign and domestic. The framers of the Constitution contemplated our engaging freely in both under sensible regulations, but example as well as precept in government demands the use of modern and up-to-date facilities in commerce and transportation. The free zone is a well-recognized institution in world commerce. It has passed the experimental stage. It is the necessary adjunct of the protected zone; but it does not exist in the United States. If the tariff is a protective as well as a revenue system, if its object is to protect domestic trade and commerce, so will a free-zone system be a protective system, protecting by encouraging, safeguarding, and promoting foreign trade and commerce. Combined, they will form a harmonious, logical, well-balanced commercial system for the development of both foreign and domestic commerce.

"The prophet has said, 'There is nothing new under the sun,' and yet history teaches us that even the most ambitious, intelligent, and aggressive peoples are often blind to their own real interests. Apotheosizing mediocrity for its own sake or following false prophets, their sea power has been the result of accident rather than of design and has been developed always in the teeth of the most active and determined opposition. This is a truth of almost universal application. The authorities teach us of the growth of the Phoenician, Carthaginian, and Roman sea power and of that of Spain, France, Holland, England, Germany, Italy, and Japan. We know our countrymen are equally at home upon land and sea; that they are as expert and daring navigators and seamen as they are brave, intelligent, and chivalrous soldiers. We are told that Rome's domain was confined to Italy until she copied the Carthaginian trireme. Says Mr. Hughes in his Handbook of Admiralty Law, speaking of the rise of Roman sea power:

"'When maritime skill supplemented military prowess and placed at her command new and easier lines of advance, she overran the world. The mart soon replaced the camp; for it is a teaching of history that in the providence of God the havoc of war but opens new avenues for the arts of peace.'

"And so it is with the United States, at the end of the Great War, with hundreds of ships, manned by youthful, eager, and vigorous mariners, full of the spirit of adventure, and anxious to compete in world trade. 'We have the men, we have the ships, we have the money, too.' It therefore becomes our manifest duty to quickly provide the facilities without which the operation of the ships and the employment of our sailors in foreign commerce will be practically impossible. Under such circumstances it would be a public disgrace to revert to pre-war conditions when 90 per cent of our foreign commerce was carried in foreign bottoms. Our merchant marine must be preserved. Our future safety depends upon it. The control of the transportation of a country means the political control of that country. Neither our land carriers nor our sea carriers should be foreign owned. It is as essential to control our sea lanes as it is to control our public highways. Both are vital to national sovereignty.

"The immense maritime commerce and sea power of England is of modern growth. The Anglo-Saxons were not seafarers; the Northmen were. The Saxons loved the quiet recesses of their forests; the Northmen loved the sea. They harried the British coasts and finally conquered and took possession of the country. Their sea power enabled them to hold what they took thereby. Elizabeth is given credit for having first grasped England's true policy and laid the foundation of her maritime greatness. Upon her death the standpatters played their small part upon the stage and in turn passed away. Partly in consequence of common-law hostility to the Admiralty jurisdiction, English commerce was long retarded. Subservience to Spain and France was a contributing factor. The tendency of the Stuarts to cultivate friendly relations with those nations checked the enterprise of England's merchants and sea captains and stemmed what ultimately proved to be a veritable flood of wealth and commerce. When the barriers were removed, subservience ceased and national self-interest and self-respect were permitted free rein. In this there is food for reflection.

"Lord Coke, in particular, 'the great apostle of the common law,' was the leader in the attack on the Admiralty, issuing prohibitions to its courts, and in every way curtailing its jurisdiction. Great as he may have been, his vision undoubtedly was obscured by the jealousy of a factional contest for power. Be that as it may, these lessons serve 'to point a moral and adorn a tale.'

"By the establishment of free zones we are but again respecting one of the immemorial customs of the sea, founded originally on the comity existing between nations engaged in international trade and commerce. When the stranger was no longer considered an enemy to be enslaved or slaughtered, but a friend to be sent on his way rejoicing, his goods in transit were afforded a safe haven at a reasonable toll. This toll was originally based on a charge approximating the cost of the service rendered or the port facility afforded.

"The customs or laws of the sea have been evolved through the centuries. The law of average will be found in the Rhodian Code. Merchants then, as to-day, were active in bringing about both legislative and judicial recognition of their customs. After the fall of the Western Empire sea traders caused the establishment of consular courts in the principal maritime cities, and those courts 'enforced and applied to merchants the customs of the sea.' Our merchant princes engaged in foreign trade seek nothing new in the establishment of free ports in this country. It is a custom of the sea that places of deposits shall be set aside for transit goods in foreign trade. They simply ask that an existing system be supplemented so as to include particular areas, with properly coordinated, up-to-date facilities dedicated to the public use of merchandise in transit. That such a purpose is public, even as to utilities operated by an agent under a lease for profit, was long since decided and conclusively settled by the Supreme Court of the United States in Louisiana Construction & Improvement Co. *v.* City of New Orleans, reported in One hundred and fortieth United States Reports.

"The customs of the sea, necessarily including deposit of goods in transit, were likewise extended to their manufacture, hence the drawback by which the money advanced in duties, so as to permit manufacture and the employment of home labor and capital, was withdrawn, or drawback from the public fisc upon the reexportation of the goods.

"The Supreme Court of the United States, in Tide-Water Oil Co. *v.* The United States (117 U. S. 210), has said:

"'The object of the drawback was partly, at least, to encourage domestic manufactures.'

"In United States *v.* Whidden, 28 Federal Cases, No. 16670, the court said:

"'Every nation that has a considerable trade has an interest in training up to the labor of the seas a hardy and brave race of men for their naval service. So intimately connected with national prowess and defense is this that all nations inhabiting the seacoast with a share of trade have, in a greater or less degree, encouraged their poorer and more laborious population to engage in the fisheries, by which they are inured to the dangers and anxieties of this element, by relieving that trade of all unnecessary burdens, as well as by direct bounties. Our country early went into the policy of favoring the carrying trade, and the general system of drawbacks on reexportation was carefully digested in the general revenue act of 1799.'

"But that is not enough. No system can long prevail in which pure reason, abstract right, and practical justice are not mingled. The drawback system was wholly inadequate. Good as far as it went, it did not go far enough. Something had to be done for the transit trade.

"Chancellor Kent, in his Commentaries on American Law (p. 547, N.), says:

"'The New York Chamber of Commerce in November, 1842, prepared and sent a memorial to Congress in favor of establishing the warehousing system in the United States, and, in addition to powerful considerations in favor of it, the memorial suggested that the warehouse, or dock warrants, or storage receipts, were in England transferable paper, and the holder was regarded as the owner of the goods. A flexible and desirable security, representing actual property, was thus thrown into commercial circulation.'

"It would be a work of supererogation to present New Orleans banks and bankers with an argument upon the value of public cotton warehouse and grain elevator receipts. The increase in banking deposits and clearing-house transactions since provision was made for their issuance speaks eloquently in their behalf.

"It was not until August, 1846, that the Congress of the United States heeded the behests of the merchants and by the factors' act of that year for the first time established a warehouse system.

"The contest had been waged even longer in England.

"Again quoting Mr. Kent:

"'The English system of warehousing goods was proposed by Sir Robert Walpole in his excise scheme, but not adopted. Its advantages were pointed out by Dean Tucker in 1750. The scheme was revived and recommended by Mr. Pitt, and digested in a practical shape by Mr. Addington. The statutes of 43 George III, chapter 132, laid the foundation of this wise and politic system * * *. The object of the warehousing system is to lodge imported articles in public warehouses of special security at a reasonable rent, without payment of the duties on importation till they are withdrawn for home consumption, and if reexported no duty is ever paid. It secures the duties on goods lawfully imported for use and sale in England and relieves the trader from immediate payment in cash and until the goods are withdrawn for home consumption. It allows the storage even of prohibited goods in British warehouses on specified security for reexportation, and permits the transfer of goods in the warehouse without requiring payment of the duties until they are withdrawn for use. If the goods are destroyed by inevitable accident before they are withdrawn, although the Government does not stand insurer for their safety, the duties are uniformly remitted.'

"When England, because of unique conditions, went upon a free-trade basis the entire island practically became a free zone. Heavy financial burdens imposed by the war necessitate the reestablishment of a high tariff system, in which event we have it upon the authority of Sir Eric Geddes, free zones in England will be established of necessity.

"By the light of history we know that in the forty-ninth year of Edward III (A. D. 1376) the Inquisition of Quinborough was taken 'by 18 expert seaman before William Nevil, admiral of the north; Philip Courtney, admiral of the west; and Lord Latimer, warden of the Cinque ports.' Among the offenses denounced 'against the public good of the Kingdom' was an article concerning 'Of such as turn away merchandise or vituals from the King's ports.' And among the 'offenses against the admiral, the navy, and the discipline of the sea' was the grievous one, numbered '5,' entitled 'Of such as freight strangers' bottoms when ships of the land may be had at reasonable rates.'

"These statutes evince a proper spirit of patriotism and love of country. They are based upon the laws of nature. Those laws, like the laws of physics and of morals, are of universal application.

"We have a duty to perform to ourselves and to our country. In performing that duty and in measuring up to the responsibilities imposed by our existing sea power re-created as a result of the war, now to be employed usefully in the arts of peace, we must be true to ourselves, 'and it must follow, as the night the day,' we can not then be false to others.

"The principle of the free zone has been indorsed by the National Merchants' Marine Association, the National Foreign Trade Council, the Detroit Chamber of Commerce, the New Orleans Association of Commerce, the Philadelphia Bourse, the Exporters and Importers' Association of Philadelphia, the Chamber of Commerce of Philadelphia, the Exporters' Round Table of Boston, the Baltimore Import and Export Board of Trade, the press generally, the Charleston Chamber of Commerce, Galveston Chamber of Commerce, Newport News Chamber of Commerce, the Los Angeles Chamber of Commerce, the Oakland Chamber of Commerce, Chamber of Commerce of the State of New York, the city of San Francisco, the municipality of

New Orleans—these are by resolution—the board of commissioners of the port of New Orleans, the New York and New Jersey Port and Harbor Development Commission, the Massachusetts Chamber of Commerce, a State-wide organization which has indorsed it after a thorough discussion; likewise the Boston Chamber of Commerce, the San Francisco Chamber of Commerce, the Seattle Chamber of Commerce, the Merchants' Association of New York, which I am informed by the secretary and president is composed of about 6,000 members, and from one-third to one-fourth of its members are manufacturers. The matter has been very thoroughly discussed and the discussion has been carried in the official journal of the association, and the association has indorsed the principle of the zone and has taken a very active part in its recognition. In fact, one of the directors of the Merchants' Association of New York is a director of the National Free Zone Association.

"It has also been indorsed by the interstate and foreign trade committee of the Chicago Association of Commerce, the Mississippi Valley Association, the Foreign Trade Club, of Chicago; also by the Associated Industries of Massachusetts.

"The Eastern States, as you know, are not formidable producers of raw materials. They manufacture raw material, both foreign and domestic.

"Mr. I. D. Stone, general manager of the Associated Industries of Massachusetts, writes this letter under date of October 9, 1919:

"'Our association has indorsed the principles embodied in the bill presented by your association, and you are at liberty to place the Associated Industries of Massachusetts on record as favoring the passage of such a measure.'

"Mr. Chairman and gentlemen, I will say a few words in conclusion as to the fear which seems to be entertained by warehousemen and those who at private expense maintain and operate facilities such as warehouses, wharves, and piers.

"In 1899, as the result of fire and flood, wars, pestilence, and reconstruction, New Orleans was humbled in the dust. She had hardly recovered at that time from the effects of those dreadful evils. Our assessed values at that time were about $129,000,000—that is, in the city of New Orleans.

"We had, of course, natural advantages, as Mr. Lockett has said, but it was necessary to make those potential values actual. If I may be permitted to say so, I have had the privilege of being connected for the last 15 years with the development of the port of New Orleans, both in and out of office.

"The question always arose as to what could be done under the law and how advantage could be taken of natural advantages and potential values made actual.

"We have been, as I say, humbled, but "He hath exalted the humble." We took note of the character of the people, their spirit, and their desire to help themselves. We encountered at first bitter and determined opposition in the development of the port, because the people were poor, there was not much commerce, and those who had the facilities did not welcome competition. They feared the competition of publicly owned and operated port facilities. The warehousemen especially feared that competition.

"It was not until 1913 that we were able, as a result of a constitutional amendment passed in 1910, to build and operate the cotton warehouses. The cotton business had almost left New Orleans, and what there was of it was handled, of course, by the cotton-press men, who had in connection with their presses storage facilities. They felt that with the provision of up-to-date, modern warehouses, with mechanical labor-saving devices and a low rate of insurance, their presses would be put out of business. The contrary has proven to be true.

"I stress this because in New York especially Mr. Bush, who has a large and very fine terminal, seems to fear the effect of the free zone upon his particular establishment.

"The result of our efforts has been, Mr. Chairman and gentlemen, not only to restore the cotton business to New Orleans, but to overwhelm all the facilities of the port, both public and private. The same is true of the grain elevators.

"This last winter so much cotton came that the presses were entirely filled. Cotton came from the Imperial Valley of California and from sections which had never shipped cotton to New Orleans before.

"Millions of bushels of grain came from California. Grain has come from the Middle West and the far Western States. Not only has nobody been put out of business by the establishment of our modern and increased facilities, but actually so much business has been brought to New Orleans that it has overwhelmed all facilities, both public and private—so much so as to cotton that this last season all facilities were congested and cotton had to be stored on the bank, covered with tarpaulins, and as there were not enough tarpaulins to go around there were heavy claims for damage to some of that cotton.

"We are actually engaged now in enlarging the cotton warehouses and building other warehouses. We are constructing a navigation canal connecting the Mississippi River with Lake Pontchartrain, with the idea, in a measure, that the free port principle will sooner or later be adopted—we think the sooner the better—and located on the navigation canal on which we are spending, as Mr. Lockett has told you, some fifteen or twenty millions of dollars. The lock itself is costing about $6,000,000. General Goethals is the engineer.

"One reason for the provision of that facility is that we believe sooner or later the free-zone system will be established and we desire to locate the free zone upon the canal.

"Our practical, actual experience has demonstrated that there need be no fear in the minds of those owning existing facilities that they will be put out of business by the creation of other facilities either in the free zone or in the port itself. Business seems to materialize out of the air. It is astonishing. Trade facilities are trade magnets, they are lodestones. They draw business to them. I am confident the fears which have been expressed by Mr. Bush—and maybe other gentlemen—are groundless.

"Senator SHEPPARD. How about the fears of interior points that they might be subjected to a handicap by reason of superior facilities at the ports?

"Mr. MCGUIRK. Well, the example set by New Orleans and Galveston in providing warehousing facilities is being followed, as you know, Senator, all over the cotton district. You will remember there has been an association formed for the purpose of encouraging the establishment of warehouses at the producing centers in order that our cotton people and our farmers or producers may store their cotton and hold it for a rise.

"You know what the experience of the past has been. In the fall, when the crop was made through the toil and sweat of the farmer, the country merchant, connected with the city bank, began to write letters, 'Ship your cotton.' He would write and telegraph and send out the representative of his house to force these people to ship their cotton. Of course, all the cotton then came to market at one time. It depressed the value of the cotton, and allowed the foreign buyers to clean up. You know for years the foreign buyers 'cleaned up' on our cotton. They bought it at the very lowest price, shipped it abroad and warehoused it there, and took advantage of the subsequent rises in the market.

"Now, these facilities that are being afforded and will be afforded by this free zone, because export cotton will be largely held in the free zone——

"Senator SHEPPARD. I was speaking of the interior points that manufacture for foreign trade.

"Mr. MCGUIRK. Oh, that manufacture for foreign trade?

"Senator SHEPPARD. Yes; that is what you had in mind, was it not, Senator LENROOT?

"Senator LENROOT. Yes; interior points that ship raw material in.

"Senator SHEPPARD. Yes; interior points that ship in raw material and mix it with domestic material and ship abroad.

"Mr. MCGUIRK. If this bill is approved by Congress, free zones can be established in these interior points, and the manufacturer can manufacture just as well in the free zones at interior points as he can at the seaboard."

Hon. John H. Rosseter is an experienced shipping man, and he presented the importance of this legislation and its bearing upon the development of our merchant marine, as follows:

"The foreign-trade zones will in effect bring the market places of other lands to our doors, making our ports the trade marts of the world—that is, will afford our manufacturers the advantages of purchasing raw materials, our merchants a convenient and advantageous buying market, and will be of dominating importance to our merchant marine, and will constantly increase the volume of our commerce by providing needed homeward cargo, and, secondly, the operation of transshipment or reexport business.

"I have had the opportunity, based on frequent visits abroad, to see the workings of the so-called free-zone systems, and, more to the point, have experienced its effect in commerce and shipping from the absence of such facilities in our own country.

"My long experience as a ship operator has made me intimately acquainted with our own system.

"The conclusions I have reached from a comparison of the two systems are based on long reflection and study. They are not sudden; they have grown slowly in my mind, which gives me added confidence in my convictions.

"I can not attempt to give an essay on the subject. A number of publications are available that will give the details and description of the practices in foreign countries.

"In international trade and in the merchant marine it must always be remembered that we do business in free competition with the rest of the world. Labor and capital of all descriptions are involved in the manifold operations incident to foreign trade. We must meet labor and capital of Europe and Asia under serious handicaps in many departments. If these handicaps are suffered to continue, we must inevitably fall behind.

"How are we to strengthen our situation as against the intrenched position of other nations, built up over a long period of years in world trade?

"I will attempt to answer that only briefly: Before the war England and Germany, our principal competitors, had decided advantages over us. One marked advantage was the greater facilities for conducting mercantile and shipping operations. This rested largely on the advantage in exchange of commodities adjacent to the ships, due to the absence of close and congested quarters, caused by customs operations, and abroad to the smoother and freer working of an unbonded warehouse system, where customs restrictions are unknown as contrasted with our bonded warehouse and drawback systems.

"Germany, having a high protective tariff, enjoyed this greater facility of port and warehouse operations by the institution of a free port.

"England, being substantially without customs, enjoyed the same facility because of a similar absence of customs restrictions.

"Is there any good reason why the advantages of this system can not be kept in our own country?

"The present bill is an effort in that direction. Free zones for conducting foreign trade in our various ports, as provided by the pending bill, would be nothing but improved large-scale harbors and warehouse facilities. Simply that and nothing more.

"I can not see that they involve the slightest change in our tariff policy or affect it in any way. The more strongly protective our tariff is made the more useful will be the foreign-trade zone as an adjunct to the protective system.

"In free-trade countries the system is unknown, because of the absence of customhouse restrictions. In protectionate countries it tends strongly to build up by facilitation that foreign trade which is so absolutely necessary in order to dispose of the surplus products of factory, farm, and mine. In accomplishing this the tariff conditions are absolutely preserved and in no way affected, inasmuch as that merchandise leaving the foreign zone to enter customs territory must submit to all the rules and regulations as well as the tariff schedules in force at that time.

"I direct particular attention to that with reference to the discussion that we have just informally had.

"I firmly believe that foreign-trade zone system, when in operation in the United States, will be of inestimable benefit to our national welfare as well as of benefit to all interests and an injury to none.

"I have referred to the handicaps we labor under in international competition. We must concentrate our attention on them and see if we can not overcome them one by one. If we can not overcome them at all, let us at least minimize them by legislative means in our power. We must analyze the factors involved, see what improvements are within our reach, and face them with determination.

"Superior efficiency, if attained, will count. Superior machinery, if obtained, will count. Those can be discussed at greater length.

"Economy of operation is absolutely essential to the success of our merchant marine. I do not mean low wages, and I do not mean cheeseparing.

"Economy of operation outside of labor costs presents a field for ingenuity and care. The economy here referred to is strictly relevant to the discussion here before us. It is the essence of the proposed bill. The foreign-trade zone system contributes enormously to effect this economy in both branches mentioned.

"Let us briefly consider the first branch—that covering freighting operations. The proposed system tends strongly to ease, quickness, and cheapness of the complex operations involved in the loading and unloading of cargo, its dispatch inland by trucks or car, for trans-

shipment or reexport in handling by lighter, or manually, in bonded and in unbonded warehouses located near the wharves within the zone.

"This is accomplished by the simple physical device of making and preparing a place especially devoted to foreign trade, roomy enough and adequately equipped. These physical improvements will cost money to install. The biggest improvement of all will not cost any money whatever, even to initiate, but money will be saved in its daily operation to an amount which can not be estimated with exactness, but it will certainly attain huge figures in the course of the year's work, when we consider the number of our ports that may avail themselves of the zone privilege and multiply the economies involved.

"Customs work is necessary. Nobody disputes that. The point simply is, can it be done elsewhere than on the wharves as at present? If it can without loss of duties, and not only without increased expense to the service but less expense, is there any good reason why a suggestion to remove the customs work to a better place should not be entertained?

"That substantially is the single idea involved in the foreign-trade zone system. Simply a reform in customs methods. Moreover, the customs work itself will be cheaper and more secure against smuggling.

"I do not dispute the necessity of customs officials' painstaking labor to collect and assess duties, but I say do these things elsewhere than on the wharves, which, from the nature of the case, make the operation very limited and difficult.

"Terminal costs are one of the major factors of ship expense, and delay to the ship is a very serious item in the cost of operation.

"Stripping the system to its bone, all there is to the zone system so far as the tariff is concerned, sampling, etc., are the same now as they are done elsewhere; the duties are the same, but are collected in a different manner. The quicker turn around of the vessel means just so much saved in the interest of the capital investment, which would be a big sum, considering the cost of modern steamers. Likewise, a considerable saving comes from the quicker turn around of the capital invested in the cargo.

"Through a proper arrangement of warehouse and fire-protection system, a very large saving would be effected in insurance as against present practices.

"By the proposed improvement in warehousing and in freedom of operations therein our transshipment or reexport business would be vastly enlarged.

"Experience abroad has shown free ports or free zones become magnets for international trade; they become points for the assembling and distribution of cargoes for use in other countries than our own. Naturally, such centralizing of operation would tend to secure full cargoes for our ships sailing as regular liners from the free zones to the countries with which we trade, and the tendency would work to supply cargoes both ways.

"Such ports become great market places, to which the foreign raw materials needed by our manufacturers would naturally gravitate, and where they would be handy and permit our manufacturers to make their selections in warehouses provided for that purpose in the zone.

"That covers in general, Mr. Chairman, the points I have in mind as to the importance of this legislation with respect to facilitating and expanding our foreign commerce, and incidentally, and of great importance, sustaining and developing our merchant marine.

"Senator FLETCHER. One of the things to be gained by this, Mr. Rosseter, would be the avoidance of congestion, would it not?

"Mr. ROSSETER. That is a very important point. At present a ship arriving at a wharf with partially transshipment cargo, partially free cargo, and partially bonded cargo, does suffer a very considerable delay, notwithstanding the best cooperation on the part of customs officials, whereas if you could have an enlarged area, where all of the cargo of that ship could be dumped out, so to speak, and sorted at leisure, and the ship proceed about her business, that is very desirable.

"Reference has been made during this testimony to the possibility of a ship discharging only the zone cargo within the zone. In other words, to begin the operation, or possibly to begin and terminate the operation of discharge at a wharf without the zone. At the outset that will undoubtedly be the condition, but the real object, the real important thing to attain, is to accomplish so far as possible a complete discharge of the ship within the zone area.

"Mr. DWYER. And also complete loading at the same place. That would be the ideal.

"Mr. ROSSETER. That would be the ideal. That, however, is subject at the outset to limiting factors. For instance, a ship coming in with foreign products will almost invariably to advantage discharge it within the zone, but when it comes to loading the outward cargo it would often be of convenience for the vessel to proceed to a wharf adjacent to the point of origin of such cargo. For instance, to a flour mill for a flour cargo, or to a smelter for smelter products, or to railroad piers occasionally, or railroad terminals for large lines of domestic production, domestic merchandise. Therefore the feature of shipping away from the free zone for the completion of loading is in no sense a disadvantage. It is simply to be measured from the proposition of whether it suits the ship better to load within the zone or to shift to some factory or terminal to complete the loading.

"Senator FLETCHER. What would be your idea, Mr. Rosseter, about the size of these zones? It would depend, I take it, very largely on the amount of commerce to be handled at the port, but in a general way what would you say as to the character of the zone, what it should include and what it should embrace?

"Mr. ROSSETER. It is highly desirable, so far as it can be attained, to have, first, very ample water frontage to provide sufficient berthing for the ships. That alone involves the question very considerably from the standpoint of each locality. According to the number of piers and according to the variety of the transshipment business a zone should, for any effective purpose whatever, be at least 300 acres and up, possibly to 1,000 acres in extent. In Hamburg I believe the area is something like 2,500 acres, if I recall it. The doctor will correct me on that.

"Doctor MACELWEE. Yes; that is right.

"Mr. ROSSETER. And a minimum for this facility at a port of importance would be, I should say, in the neighborhood of 500 acres of land and water. Mr. Dwyer has given the matter much study from that standpoint, and I would like to know at this time whether he would correct my impression.

"Mr. DWYER. I think that is a fair general statement. Of course the size of the zone will depend on the volume of trade in the particular port. A port like New York would need a much larger one than a smaller port.

"Senator LENROOT. From your statement, Mr. Rosseter, I take it that you are firmly convinced that it would strengthen our merchant marine. In addition to that, do you believe it would very substantially increase the trade and commerce of our domestic merchants with reference to foreign trade?

"Mr. ROSSETER. In stating an affirmative to strengthening our merchant marine I would like to add that I believe it is almost an essential to the successful establishment of our merchant marine. It would not only be an advantage but it is an essential.

"To the second question I think it would be of an untold value to our domestic commerce and to all domestic interests of the United States to have such ports presenting, as they do, the opportunity of a free market, you might say, of oriental and other foreign products, notably raw material and foodstuffs.

"As I said in my opening statement, I believe strongly that it would present the greatest advantages to our manufacturers as well as to our merchants.

"Mr. DUNNIGAN. I would like to suggest, Mr. Rosseter, that you give that illustration you gave to the Ways and Means Committee about providing a return cargo for American ships.

"Mr. ROSSETER. That has to do with the importance of return business in our ships. It is known to all of you gentlemen that we have very little difficulty, due to the wonderful position we occupy in the world's commerce, to load our ships outward. The great problem has been to provide homeward cargoes.

"Great Britain for years has enjoyed the very great advantage of having as its leading item of export coal, which runs to a very large tonnage. This has provided the outward cargo for their ships, their problem being the reverse of our situation, they being a very large importing nation, both in raw materials and foodstuffs. So their problem was to supply the outward business for the ships. Our problem is to supply the homeward business for the ship.

"Great Britain is at the moment facing a very serious problem of having lost an outward cargo through the fact that coal is no longer a factor in their export.

"Pre-war conditions showed a normal export of 77,000,000 tons. It is now at a point where it can be conservatively stated that their export is under 20,000,000 tons.

"Senator FLETCHER. Is that on account of their mining difficulties and on account of the lack of labor?

"Mr. ROSSETER. Due, I understand, to the feverish operation conducted during the war, sometimes described as gophering, due to the fact that mines are already approaching great depths, due to the fact that labor conditions with respect to the miners, always very deplorable, as brought out by this investigation, in the pre-war days, are now changed to where the miner has to be considered as a human being, and thus the cost of labor in the production of coal has gone up by leaps and bounds. To-day such coal as is obtainable in Great Britain for ships, for instance, and the facility of obtaining coal is limited to their own ships at present—the cost of bunker coal is now nominally 120 shillings, or $25 a ton. Under pre-war conditions it was about $7.50 a ton.

"Senator SHEPPARD. Mr. Rosseter, has the substitution of oil as a fuel affected the coal problem?

"Mr. ROSSETER. Only so far as our ships are concerned.

"You might be interested to know that in September of 1918 the Shipping Board decided definitely on a plan of constructing all of their ships as oil burners and proceeded to arrange bunker stations throughout the world, bunker stations with American control, so that our ships on long around-the-world voyages would have, first, steaming radius sufficient and stations favorably located whereby the ship could proceed from one American station to another. On the 29th of September we had the note from the British foreign office that, due to the conditions they were facing with respect to coal, they had to establish an order as follows: No bunker coal will be supplied at any home station—meaning in the British Isles—nor at bunker stations in the Atlantic or Mediterranean or the Black Sea to other than British ships, and we beg to express the hope that this will not seriously influence your merchant-marine interests.

"Fortunately at that time we had stations practically all over the world, thanks to a year's foresight, and it did not seriously affect our merchant-marine interests.

"Senator SHEPPARD. The British order was what date?

"Mr. ROSSETER. September 29, 1919.

"Senator SHEPPARD. And your determination to build the oil-burning vessels was September, 1918?

"Mr. ROSSETER. Approved September, 1918, and after a year was just practically coming into effect. At the time we reasoned it out, having experienced the effect of the British bunker license system on trade, that after-war conditions might easily develop a justification for the British to impose some regulations with respect to their bunker stations to which we could not take serious objections, even in times of peace, and it came sooner even than we suspected, inasmuch as it came in September last.

"Senator FLETCHER. I did not mean to interrupt your illustration. You were going on defining the different problems between Great Britain and ourselves and illustrating the point you wanted to reach.

"Mr. ROSSETER. Our conditions being reversed, Great Britain being a large importer and we a large exporter, Great Britain having a fairly balanced commerce through its coal, has now lost that commerce and finds itself at the same point of disadvantage that we are facing, namely, a one-way business.

"We are exporters and have not sufficient cargo for our import business.

"I would take a leaf out of the book of German experience and by this form of legislation endeavor to stimulate our inward business, bringing cargoes to this market place.

"Mr. DWYER. For transshipment purposes?

"Mr. ROSSETER. For transshipment purposes. Not only the developing of our local trade, but offering domestic buyers the advantages which would come from a market within their own territory, but also the very great improvement would stimulate again the transshipment of outward business, offering a larger variety and a greater scope of activity in export business.

"Rice, for instance, which in the pre-war days was grown in Indo-China and in Siam, was sent in patty form to Germany and there hulled and sorted and cleaned and in turn reexported to the entire world. The German ship carried it from Siam to Hamburg and German ships from Hamburg carried it to Central America, to South America, to the United States, and, in fact, to all parts of the world. Thus through their free-zone system they had the double advantage of increasing their inward business and stimulating their export trade.

"Mr. DUNNIGAN. In that illustration you gave about yourself purchasing rice in Hamburg?

"Mr. ROSSETER. Yes; in our business of dealers throughout Latin-American Republics we found it necessary to buy the rice for our own

stores at Hamburg, and our purchases ran as high as 10,000 to 15,000 a month, and notwithstanding that large volume——

"Mr. DWYER. That was oriental rice, too, was it not?

"Mr. ROSSETER. But notwithstanding that large volume, we found it necessary to go to Hamburg and buy rice grown on the opposite shores of the Pacific and which, according to ordinary commerce, would move across the ocean to our market, instead of which it moved through the artificial route of the Suez Canal to Hamburg and from there was distributed by us into the Latin-American markets.

"I mention the quantity to bring to mind the point this was not a disadvantage of dealing in so small a quantity that special ships and entire cargoes could not be used for the direct trans-Pacific movement, but the cost of rice to us was so much lower in Hamburg that it was absolutely essential we go there to supply our requirements.

"Mr. DWYER. Mr. Rosseter, may I ask you in this connection this general question: In your opinion is the United States geographically so situated, with the Atlantic on one side and the Pacific on the other, that it is a natural place for the transshipment and export, say, between Europe and Latin America and between the Orient and Latin America, and for the transshipment trade generally? Does our geographical position give us a natural advantage?

"Mr. ROSSETER. I am thinking so strongly on that point that my trade map pictures the United States in the center of the world rather than on the old theory of the Greenwich meridian. We have to the west the Orient, the great prize in the commerce of the world of trade, which has built the British Empire up into the third place in finance, and art, and trade, and influence in a period of the last 50 years. That is a matter of exchange between the western shores of the United States by direct water communication and the return of our ships from that distant shore.

"We have through the aid of the Panama Canal a bypath to exchange the products of the Atlantic shore with the Orient and the Orient back to the Atlantic.

"We have, then, immediately on the east the Mediterranean. We have to the north the Baltic. We have, of course, always our old markets of Central Europe.

"In fact, as I see the map of the world, we are sitting in the middle with our hands stretched out on both sides and we have just this natural inward and outward motion.

"Mr. DWYER. Do you think the free-zone system would facilitate the taking advantage of these natural facilities to a considerable extent?

"Mr. ROSSETER. I consider it absolutely necessary to fully realize or avail of the natural advantages we enjoy.

"Senator LENROOT. Are freight rates on imports into this country less than the export rates on the same commodities?

"Mr. ROSSETER. That would be a difficult comparison, Mr. LENROOT, and from the fact we practically import nothing that we export—but I understand your question to mean as to the general measure of rates?

"Senator LENROOT. Yes.

"Mr. ROSSETER. Generally speaking, homeward rates to the United States have been in certain trades at the so-called ballast basis. Ships were coming without full cargoes, and in order to get any revenue at all the policy has been to make lower rates homeward than they had to charge outward, because the operation of the ship contemplates a gross revenue for the outward and homeward voyage. Now, if the homeward voyage is only one-third of what is necessary for successful operation, two-thirds must fall on the outward voyage. Those outward rates are higher generally, and have been, than homeward rates.

"Senator LENROOT. Then if we had a free zone would that fact be an advantage to our own merchants to go into the world's market and purchase goods for sale to other countries like South America and Central America, land it in the free zone, and would that fact help them to compete with Europe in selling to that same market?

"Mr. ROSSETER. That would enable them to compete, if I might say it that way. Latin-American trade in many articles of Orient origin is made up largely of small items, the point being that it does not justify direct operation from any one point in the Orient to their own ports. Thus, no trade lines are in existence practically, and no regular trade lines to Latin America from the Orient. We have found it like that. We have found it to advantage to go and buy in carload or 100-ton or 500-ton lots or ton lots in the London market, in the Rotterdam market, or in the Hamburg market.

"I have often used the illustration, showing what we ourselves have done: Although the consumptive market for more than 50 per cent of the rubber of the world prior to the war and now the consumptive market for more than 70 per cent, our manufacturers found it necessary, in order to supply their requirements in rubber, that they should go to Rotterdam and London to buy this rubber, although the rubber had been produced on the distant shores of the Pacific Ocean. Trade influence, the influence of conference, the influence of regular lines had directed all of that commerce from the Orient to English docks or to Rotterdam. Such items as pepper sold in the market of California largely come from London—come through the Suez Canal to London, are landed there, are exported to New York, and from New York have been distributed over the United States. And while we are familiar with pepper usually in the form of a few grains that we find on the breakfast table, in point of fact it runs to a very large tonnage. After my first introduction to the pepper business, following the closing of the Suez Canal and thus handicapping London's business—my first introduction was in an order for 1,000 tons of pepper, which was a very great surprise to me, and possibly it would be to you gentlemen to think it ran to such volume, and that particular transaction moved for the first time across the Pacific Ocean."

This proposition, in one form or another, has been pending for a great many years. In the third session of the Fifty-third Congress Senate bill 1980 was introduced by Senator Chandler and referred to the Committee on Commerce. The RECORD of February 12, 1895, contains the following:

"Mr. VEST. I am instructed by the Committee on Commerce, to whom was referred the bill (S. 1980) authorizing the establishment of a free port at Fort Pond Bay, New York, to report it back with amendments. I am instructed to state that all the members of the committee do not consider themselves obligated to support the bill, but a majority thought it ought to be reported for the consideration of the Senate. I ask that certain exhibits, which are marked, shall be printed and that the bill go to the Calendar.

"The VICE PRESIDENT. The order will be made in the absence of objection."

The print of the Senate Miscellaneous Document No. 101, Fifty-third Congress, third session, containing those exhibits is practically exhausted and for this reason it is incorporated in full in this report:

[Senate Miscellaneous Document No. 101, Fifty-third Congress, third session.]

Mr. Vest, from the Committee on Commerce, presented the following letters from the Treasury Department and other papers relating to S. 1980, for the establishment of a free port at Fort Pond Bay, or elsewhere in the waters of Long Island, in the State of New York:

TREASURY DEPARTMENT,
OFFICE OF THE SECRETARY,
Washington, D. C., May 14, 1894.

SIR: Referring to your letter of the 9th instant, with which was inclosed for an expression of my views thereon copy of House bill 7009, entitled "A bill authorizing the establishment of a free port at Fort Pond Bay, or elsewhere in the waters of Long Island, in the State of New York," I have the honor to state that without expressing any opinion as to the constitutionality of the proposed bill, in consideration of the provisions of the first paragraph of section 8 and the sixth paragraph of section 9, Article I of the Constitution of the United States, I can see no reason why proper regulations could not be prepared and enforced by this department if said bill should become a law.

Respectfully yours,

S. WIKE, *Acting Secretary.*

Hon. GEORGE D. WISE,
Chairman Committee on Interstate and Foreign Commerce,
House of Representatives.

—

TREASURY DEPARTMENT,
OFFICE OF THE SECRETARY,
Washington, D. C., May 23, 1894.

SIR: I have the honor to acknowledge receipt of a letter, dated the 21st instant, from your committee, with which was inclosed, with the request that I furnish the committee with such suggestions as may be deemed proper, copy of Senate bill 1980, entitled "A bill authorizing the establishment of a free port at Fort Pond Bay, or elsewhere in the waters of Long Island, in the State of New York," and in reply to say that in response to an inquiry from the chairman of the House Committee on Interstate and Foreign Commerce, who requested my views on a bill identical with that now before your committee, I stated that, without expressing any opinion as to the constitutionality of the proposed bill, in consideration of the provisions of the first paragraph of section 8 and the sixth paragraph of section 9, Article I, of the Constitution of the United States, I could see no reason why proper regulations could not be prepared and enforced by this department if said bill should become a law, and no reason is perceived for a change in the views then expressed.

Respectfully yours,

C. S. HAMLIN, *Acting Secretary.*

Hon. M. W. RANSOM,
Chairman Committee on Commerce, United States Senate.

—

A bill authorizing the establishment of a free port at Fort Pond Bay or elsewhere in the waters of Long Island, in the State of New York.

Be it enacted, etc., That Austin Corbin, Charles M. Pratt, Watson B. Dickerman, George L. Edgell, and their associates, either as partnership proprietors or organized as a corporation under the laws of the State of New York, are hereby authorized to establish and maintain, upon the conditions hereinafter imposed, a free port at Fort Pond Bay or elsewhere in the waters of Long Island, in the State of New York, provided the location shall be approved as suitable by the Secretary of the Treasury.

SEC. 2. That the proprietors aforesaid shall proceed to acquire lands bordering upon the waters constituting the free port which may be selected and shall erect piers and warehouses sufficient for the purposes of said port, and shall surround them by walls within which the loading and unloading of vessels may take place, all in accordance with plans and specifications to be first approved by the Secretary of the Treasury and to be completed under his supervision; and when said port, with its piers, warehouses, and all other suitable facilities, shall have been so completed said Secretary shall announce its completion and said port shall then be open for the admission of all vessels in accordance with the general laws of the United States except as modified by the provisions of this act.

SEC. 3. That the free port when established as aforesaid and opened for the admission of vessels shall be subject as a whole or in suitable subdivisions to be treated as a part of the warehouse system of the United States, and suitable bonds for the proper management of said port or said subdivisions thereof shall be given by the proprietors as now required by law in the case of a bonded warehouse.

SEC. 4. That foreign merchandise may be transshipped from one vessel to another in said port, and upon the piers thereof, upon being suitably inspected, without being entered or specially bonded; or the same may be entered for immediate admission into this country, or the same may be warehoused and bonded and afterwards exported or entered for consumption as provided by existing law. Factories may be maintained within the walls of said free port, and machinery, fuel, and materials may be brought and used therein for the manufacture of products for exportation under such regulations as the Secretary of the Treasury may prescribe.

SEC. 5. That all vessels entering and leaving said free port shall be free from tonnage dues and from entrance and clearance fees, and also from any local harbor master's fees, under State laws; but all charges for dockage and for use for merchandise of piers and warehouses and for all the other facilities afforded to commerce by the proprietors of said free port shall be regulated and controlled by the Secretary of the Treasury.

[New sections 6 and 7 proposed by the Senate committee.]

SEC. 6. That the proprietors aforesaid shall incur the whole expense of opening and of suitably maintaining at all times said port, including the construction of breakwaters, the erection of lights, the dredging of the channel, and all other facilities for commerce that may be deemed necessary by said Secretary of the Treasury.

SEC. 7. That the Secretary of the Treasury, upon due application and under similar circumstances and like conditions, shall allow the establishment of additional free ports in any other suitable places within the jurisdiction of the United States, and the proprietors of such ports shall be entitled to all the powers and privileges and be subject to all the responsibilities provided by this act in connection with the free port in this act provided for.

[Senate Miscellaneous Document No. 170, 53d Cong., 2d sess.]

Papers presented to the Senate in connection with Senate bill No. 1980, introduced by Senator Chandler on April 30, 1894, for the establishment of a free port at Fort Pond Bay, or elsewhere in the waters of Long Island, in the State of New York.

(1) A memorandum dated April 16, 1894, concerning the European free-port system, prepared by Mr. A. K. Tingle.

(2) Letter dated April 23, 1894, from E. Rosewater, Esq., editor of the Omaha Bee, advocating the experiment of a free port in the United States.

(3) A description of Fort Pond Bay.

(4) A copy of the proposed bill (Senate bill No. 1980).

—

[Memorandum concerning the European free-port system, prepared by Mr. A. K. Tingle at the request of Senator Chandler.]

THE FREE PORTS OF GERMANY.

The free ports of Germany are part of the warehouse system of that country. There are three kinds of warehouses: The general warehouse, the limited, and the free, the latter being located within the territory of the free ports, which are surrounded by walls, within which the lading and unlading of vessels take place. Goods may remain within these warehouses for five years, at the end of which period they must be either exported or entered for consumption. These warehouses are the property of either the State, corporations, or private individuals, and the charges in all of them are regulated by the Government. Vessels entering these ports are exempt from all tonnage dues and other Government charges, and are treated in all respects, so far as Government tax is concerned, as if they were in foreign territory. The principal free ports of Germany are located at Hamburg and Bremen, and consist of certain inclosed territory, including docks and warehouses into which vessels from foreign ports are admitted, discharged, and laden, free from all duties and Government charges, and without the formalities and expenses incident to the entry of foreign merchandise at places outside of these ports. Vessels are subject to moderate wharfage charges for dockage, and merchandise placed in warehouse to charges for storage. Warehouse receipts are issued to facilitate the transfer or hypothecation of such merchandise.

THE FREE PORTS AND DOCKS OF HAMBURG.

These extend over a large area, and the commerce served by them employs annually 8,000 ocean vessels, 6,000 of them being steamers, and more than 12,000 ships and smaller craft plying upon the Upper Elbe.

The enormous commerce of Hamburg has been developed, without doubt, to a great extent by the free-port system.

The free port of Bremen is not so extensive as that of Hamburg, but is ample for all requirements and is conducted upon the same general plan.

THE COPENHAGEN FREE PORT.

The Copenhagen free port, recently established, is situated on the northern extremity of the present harbor of Copenhagen. Its entrance from the sound is 300 feet in width and is protected by piers and breakwaters. It has more than 50 acres of water area, from 24 to 30 feet deep, surrounded by 12,000 feet of wharves or quays, with warehouses and all modern appliances for loading and unloading vessels. These wharves are also connected with railways for shipment to interior points. There is a large area of land within the inclosure, and all the inclosed space is exempt from taxation. Ground in close proximity to the wharves is available at a moderate rental for the erection of manufactories and other industrial establishments. Building materials for the erection of such establishments and machinery necessary for their equipment may be imported free of duty.

The principal objects aimed at by the establishment of this free port are:

First. To facilitate and develop such transit trade as already exists in Copenhagen by reducing to a minimum all loading and discharging expenses and by removing those trammels to trade inseparably connected with the collection of duties and the interference of customs officers.

Second. To assist such industries as have a chance of thriving there to compete in neutral markets, by allowing the erection of works and the carrying on of manufactures within the limits of the free port, thereby saving all unnecessary trouble and loss of time and expense in first clearing the raw materials liable to duty, advantages likely to surpass those offered by the Danish drawback system, which, even if administered with the utmost fairness, never entirely compensates for the import duty on raw materials, since waste, breakage, etc., during manufacture are not taken into account.

Under the warehousing laws of the United States foreign merchandise imported may be placed in bonded warehouse and remain there for three years, when it must be entered for consumption or exported. If not so entered it is regarded as abandoned by the owner and is sold by the Government to pay duties and charges.

All such merchandise must on arrival be entered at the customhouse and bond be given in double the amount of the duties thereon. It must be examined, appraised, weighed, gauged, or measured by the proper officials, and must be under the constant surveillance of a Government storekeeper, whose compensation is reimbursed by the proprietor of the warehouse, thus adding to the cost of storage. Foreign vessels bringing such merchandise are subject to a duty upon their tonnage capacity of 3 cents per ton if coming from certain foreign ports of America, and of 6 cents per ton if coming from other ports. Such duty, however, can not be collected from any vessel more than five times in any one year at these rates, and if any vessel shall become liable to both rates, not more than 30 cents per ton shall be collected in any one year. This amounts to a tax upon steamers of regular lines of $2,000 to $3,000 per annum. In addition, such vessels must pay regular entrance and clearance fees and port charges.

Our warehousing laws also permit the establishment of manufacturing warehouses, into which foreign goods in bond and domestic spirits subject to internal revenue may be transferred for the purpose of manufacture and export free from duty or tax. This privilege is now limited to materials used in the manufacture of medicines, preparations, compositions, extracts, cordials, and liquors, and crude metals or ores to be refined. The manufactured product can in no case be withdrawn except for export. These warehouses are also under the constant custody and oversight of customs officers, whose compensation is a charge against the proprietor.

A section of the pending tariff bill proposes to extend the privilege of manufacture in bond to all articles made in whole or in part of foreign materials, such materials to be exempt from duty or tax. This would greatly enlarge the system.

Our drawback laws encourage and promote the exportation of manufactured articles by the repayment to the exporter of the duties originally paid upon the foreign materials used in such manufactures, less 1 per cent of such duties. There is, however, involved in this drawback method not only the trouble and expense incident to the original entry of the materials for manufacture and the loss of interest on the duties paid, but the entry for export with benefit of drawback is attended with much detail and expense, so that, taking into account the retention of 1 per cent by the Government and the costs of original entry, interest, and final entry for drawback, the net amount received by the exporter falls considerably short of the duties paid on the imported materials used.

The advantages of the European free-port system over our warehouse and drawback methods may be summed up as follows:

First. The exemption of importing vessels from all fees, tonnage dues, and port charges.

Second. The absolute freedom of exchange of commodities within the limits of the free port by the exemption of all merchandise imported therein from duties or tax of any kind and the saving of brokers' charges, as well as the trouble and annoyance of making entry at the customhouse.

Third. Reduction of expenses for wharfage, storage, and labor by means of improved facilities of loading and unloading vessels and handling merchandise, all such costs being reduced to a minimum.

Fourth. Under the Copenhagen plan the privilege of erecting factories within the limits of the free port upon land granted at a nominal rental, building materials to be admitted free, including equipment machinery, the product of such factories made of materials thus exempt from duty to be exported, or if entered for consumption to pay duty at the rates prescribed for such manufactured articles.

APRIL 16, 1894.

—

[The Omaha Bee, editorial department, E. Rosewater, editor.]

OMAHA, *April 23, 1894.*

MY DEAR SENATOR: Responding to your inquiry about free ports and my views as to the feasibility of establishing such ports at several of our seaboard cities, I herewith submit a summary of my observations abroad and conclusions reached therefrom.

While sojourning a few days at Hamburg during the summer of 1891 my attention was called to the phenomenal growth of that city and the marked increase of traffic since the establishment of its free harbor. Availing myself of the assistance of the United States consul, I made a thorough inspection of the docks, depots, warehouses, and elevators, which constitute what might be called an international clearing house.

As you are doubtless aware, Hamburg had been a free city until 1881, 10 years after its annexation to the German Empire after the Franco-Prussian War. The commerce of Hamburg being for the most part international, any attempt to make it a customs port seriously interfered with the handling and rehandling of commodities and products that were to be reshipped to all parts of the world from Hamburg. To overcome these obstacles to free commercial exchange a tract of land with an area of nearly 4,000 acres adjacent to the River Elbe was set apart for a free harbor. The city of Hamburg expended 80,000,000 marks and the German Government donated 40,000,000 marks for deepening the channel of the Elbe and the construction of the canals that created several artificial islands, upon which international commerce is conducted without customs interference. Within the area surrounded by the river and canals colossal warehouses and elevators have been erected by a syndicate of Hamburg capitalists upon the condition of their reversion to the city of Hamburg at the end of 25 years from their completion in 1888. The magnificent quay, extending over 7 miles, forms the most important part of the harbor. There are, in all, 11 separate harbors in the free-port district, including the petroleum harbor, where the Standard Oil Co., of this country, has extensive warehouses and oil tanks. There are also shipyards, in which sailing vessels and steamships are constructed and fitted out.

The following facts as to the establishment of the Hamburg free harbor suffice to show the benefits derived therefrom: Within five years after its establishment the population of Hamburg had increased over 200,000; during the year ending July 1, 1891, more than 16,000 vessels, including 6,000 steamships, passed in and out of Hamburg. These steamers hailed from every country on the globe. I was informed, for instance, that the bulk of all Brazilian coffee destined for the United States is first shipped to Hamburg and then rehandled in the free harbor. The bulk of all the African colonial products destined for Europe and America is redistributed by the commission houses of Hamburg.

Of course, all commodities and products destined for Germany or the city of Hamburg proper are subject to customs duty the same as if they were unloaded at any other German port.

The merchants engaged in international traffic upon the free harbor assured me that the margin upon which they do business is so small that it would be impossible to maintain this traffic in competition with Great Britain and other countries if they were hampered by customs inspection and even the most trivial customs charge. The charge for storage and commission is very low, but owing to the enormous bulk of business done it has been found to be profitable.

It goes without saying that all persons employed at the free harbor reside in the city of Hamburg proper and therefore are part of its population.

So forcibly was I impressed with this free port that upon my return to America, in the fall of 1891, I brought with me plans of the Hamburg Harbor and the buildings in it. These were presented to Secretary Foster, who expressed himself as decidedly in favor of the establishment of free ports in America.

Incidentally, it would seem to me both practical and desirable to extend the privilege of manufacturing within the domain of the free harbor from raw materials imported into the country and exporting the goods there manufactured to foreign countries. Such a policy would enable us to give employment to our own workmen and compete with the free-trade countries by supplying the markets of the world with articles of American manufacture.

Yours, very respectfully,

E. ROSEWATER.

HON. WM. E. CHANDLER,
United States Senator, Washington, D. C.

FORT POND BAY.

Fort Pond Bay is a deep harbor on the north side of Long Island, about 6 miles from Montauk Point, which is the easterly extremity of the island. It is 125 miles from New York City, and in case it is a free port it will be reached by land by the Long Island Railroad, which now extends to within a short distance from the bay. The bay measures about 1 square mile, and is well sheltered from storms, being open only from the northeast around to the northwest. Its shores are composed of coarse sand and gravel, and the bottom of the bay has about 3 feet of mud overlying hard sand. It can be reached from the ocean by the channel between Montauk Point and Block Island, which is 14 miles wide with a maximum depth of 14 fathoms. It may also be reached by the channel between Block Island and Point Judith, R. I., which is 10 miles in width and has a maximum depth of 22 fathoms.

The surveys of Fort Pond Bay by the United States Government are described in the annual reports of the Chief of Engineers of the Army for 1888, part 1, pages 733–741, and for 1893, part 1, pages 1077–1082, and the account for the latter year is also printed as House Executive Document No. 110, of the Fifty-second Congress, second session.

The merits of Fort Pond Bay have been hitherto put forward in connection with a special project for a line of fast trans-Atlantic steamers from Montauk Point to Milford Haven, England; but the scheme has been opposed by the existing steamship companies, who prefer to deliver all their passengers and freight at New York City. Under these conditions the engineers have not advised the improvement of the harbor at Government expense.

The present plan for a free port at Fort Pond Bay is advocated, not in the interest of any new line of fast steamers but with a view to affording its facilities to all the existing steamship lines and to foreign and domestic vessels of all kinds, and to give to the State of New York and the whole country the great advantages of many kinds to be derived from the establishment of a free port.

"A bill authorizing the establishment of a free port at Fort Pond Bay or elsewhere in the waters of Long Island, in the State of New York.

"*Be it enacted, etc.*, That Austin Corbin, Charles M. Pratt, Watson B. Dickerman, George E. Edgell, and their associates, either as partnership proprietors or organized as a corporation under the laws of the State of New York, are hereby authorized to establish and maintain, upon the conditions hereinafter imposed, a free port at Fort Pond Bay or elsewhere in the waters of Long Island, in the State of New York, provided the location shall be approved as suitable by the Secretary of the Treasury.

"SEC. 2. The proprietors aforesaid shall proceed to acquire lands bordering upon the waters constituting the free port which may be selected, and shall erect piers and warehouses sufficient for the purposes of such port and shall surround them by walls within which the loading and unloading of vessels may take place; all in accordance with plans and specifications to be first approved by the Secretary of the Treasury and to be completed under his supervision; and when said port with its piers, warehouses, and all other suitable facilities shall have been so completed said Secretary shall announce its completion, and said port shall then be open for the admission of all vessels in accordance with the general laws of the United States, except as modified by the provisions of this act.

"SEC. 3. The free port, when established as aforesaid and opened for the admission of vessels, shall be subject as a whole or in suitable subdivisions to be treated as a part of the warehouse system of the United States, and suitable bonds for the proper management of said port or said subdivisions thereof shall be given by the proprietors as now required by law in the case of a bonded warehouse.

"SEC. 4. Foreign merchandise may be transshipped from one vessel to another in said port and upon the piers thereof upon being suitably inspected without being entered or specially bonded; or the same may be entered for immediate admission into this country, or the same may be warehoused and bonded and afterwards exported or entered for consumption, as provided by existing law. Factories may be maintained within the walls of said free port, and machinery, fuel, and materials may be brought and used therein for the manufacture of products for exportation under such regulations as the Secretary of the Treasury may prescribe.

"SEC. 5. All vessels entering and leaving said free port shall be free from tonnage dues and from entrance and clearance fees; and also from any local harbormaster's fees under State laws, but all charges for dockage and for the use for merchandise of piers and warehouses and for all the other facilities afforded to commerce by the proprietors of said free port shall be regulated and controlled by the Secretary of the Treasury."

The Secretary of Commerce, in commenting on this bill, under date of May 25, 1921, says:

"The general purpose of the bill is, of course, admirable and vitally necessary if we are to develop our foreign commerce."

The Secretary of the Treasury, in commenting on this bill, under date of May 18, 1921, says:

"The main purpose of the bill is to encourage foreign trade by providing a simple and ready means for the reexportation of foreign goods brought to the United States and for combining such foreign goods as deemed necessary with domestic products prior to their export from this country. Under the system proposed, articles of merchandise may be imported into the free zone without customs supervision and without the payment of duty, and may be there mixed, blended, repacked, manufactured, and reshipped without the intervention of customs officials.

"The plan proposed will not eliminate either the bonded warehouse or the drawback system, although it will, if adopted, necessarily lead to a considerable reduction in their value, for while the bonded warehouse, the bonded manufacturing warehouse, and the drawback law serve most useful purposes, they are not entirely adequate to meet the needs of a nation having a great foreign commerce."

Section 1 defines the terms used.

Section 2 authorizes the Secretary of Commerce to grant public corporations the privilege of establishing, operating, and maintaining foreign trade zones, ordinarily but one to a port. A public corporation as defined in section 1 is "a State, a legal subdivision thereof, or a municipality, or a lawfully authorized public agency of a State or a municipality."

Section 3 provides for admission of foreign and domestic merchandise to zones duty free and for the manipulation of goods so admitted. Manufacturing in the zone is not authorized. Foreign merchandise must pay the regular duty when brought into the country from the zone.

Section 4 requires the Secretary of the Treasury to assign to zones necessary customs employees to protect the revenue.

Section 5 places vessels entering or leaving the zone under the usual legal restrictions.

Section 6 specifies what shall be stated in applications for the creation of zones with respect to location and qualifications of the area in which it is proposed to establish a zone, the facilities and appurtenances which it is proposed to provide, the time within which construction will be commenced and completed, the proposed method of financing, and such other information as the Secretary of Commerce may require.

Section 7 provides for an appeal to a board consisting of the Secretary of Commerce, the Secretary of the Treasury, and the Secretary of War, where the Secretary of Commerce refuses the grant.

Section 8 requires the Secretary of Commerce to prescribe rules and regulations for carrying out the act.

Section 9 requires the Secretary of Commerce to cooperate with various governmental agencies in the exercising of police, sanitary, and other powers in connection with the free zone.

Section 10 authorizes the President to require other governmental departments to cooperate with the Secretary of State in connection with foreign trade zones, including the temporary detail of officers and employees.

Section 11 authorizes an agreement between the grantee and the department or officer of the United States having control with respect to the title or right of user of any Federal property included in a zone.

Section 12 provides that each grantee shall provide adequate terminal facilities, transportation connections, fueling, light and power facilities, water and sewer mains, quarters, and facilities for governmental employees of any character whose duties require their presence within the zone, inclosures to permit segregations of merchandise and such other facilities as may be required by the Secretaries of Commerce, War, and the Treasury acting jointly.

Section 13 authorizes the erection of structures by private parties in zones with certain restrictions.

Section 14 provides that each zone shall be operated as a public utility, for fair and reasonable rates and charges, and that the grantee shall afford uniform treatment to all applicants for use of the zone.

Section 15 precludes residence within the zone of any person other than governmental employees deemed necessary by the Secretary of Commerce; that rules and regulations concerning the protection of the revenue shall be approved by the Secretary of the Treasury; that certain goods may be excluded, and that no retail trade shall be conducted except under permits, any goods so sold being required to be brought into the zone from customs territory.

Section 16 provides that the form and manner of keeping the accounts of each zone shall be prescribed by the Secretary of Commerce; that annual reports shall be made to him; and that he shall make reports to Congress.

Section 17 prohibits the transference of a grant for a zone.

Section 18 authorizes the revocation of a grant in the event of repeated violations of the act by the grantee, and prescribes the course of conduct in such matters.

Section 19 would impose a fine of not more than $1,000 for each violation of this act or of any regulation made under it by the Secretary of Commerce.

Section 20 contains the usual language with respect to validity.

Section 21 reserves the right to alter, amend, or repeal the act.

The establishment of these foreign trade zones is permissive. No port is required to establish a zone. The United States incurs no obligation and is put to no expense other than what may be necessary in the proper enforcement of the customs laws and in supervising and facilitating the business of the zone when it is established and ready to operate.

The establishment of foreign trade zones—

Will not affect the principle or policy of protection to American industry and labor;

Will aid in better carrying out that policy;

Will encourage the investment of American capital in new industries;

Will employ American labor in work and enterprise now carried on in foreign countries;

Will develop American business in foreign markets and foreign trades;

Will build up centers in the United States for the distribution of merchandise throughout the world;

Will simplify, facilitate, and cheapen the handling of exports and imports;

Will establish great transshipment points in the United States;

Will expedite the loading and unloading of ships;

Will aid in securing return cargoes for American ships; and

Will aid in the development and maintenance of an American merchant marine.

Mr. McCUMBER. I request that the provision just adopted be put on page 286 as section 322.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. KELLOGG. Mr. President, I desire to offer four amendments to this bill, two of them striking out certain sections and two of them inserting the sections stricken out in the free list, and when I am through explaining them, I shall ask that they be voted upon as one amendment.

On page 93 of the bill, lines 3, 4, and 5, I move to strike out paragraph 405, in the following words:

Paving posts, railroad ties, and telephone, trolley, electric-light, and telegraph poles of cedar or other woods, 10 per cent ad valorem.

On lines 10 and 11, I move to strike out paragraph 407 in the following words:

Pickets, palings, hoops, and staves of wood of all kinds, 10 per cent ad valorem.

I am not going to take 15 minutes to explain this amendment to the Senate. I do not know of anybody who wants a duty on these articles. There is undoubtedly greater demand in this country than can be filled at a reasonable price for every one of them, and the use of this small timber is destroying our forests.

I simply want to quote from a Mr. Lane, who stated that he represented 60 to 70 per cent of the producers of these articles. He said:

As I say, my information is that these people who sign this petition actually produce between 60 and 70 per cent of the poles produced in this country. They would be interested in obtaining protection if any were wanted. But the fact is cedar poles are so scarce that the interests want poles primarily. They have a market for everything they can get, whether in this country or in Canada.

With railroad ties going to abnormal prices and fence posts and poles of all kinds doing likewise, I take it for granted the Senate does not wish to destroy our forests by placing a duty on these articles. I ask that my four amendments be voted on together.

The PRESIDENT pro tempore. The Secretary will state the four amendments which the Senator from Minnesota has presented.

The READING CLERK. On page 93, the Senator moves to strike out lines 3, 4, and 5, which read:

PAR. 405. Paving posts, railroad ties, and telephone, trolley, electric-light, and telegraph poles, of cedar or other woods, 10 per cent ad valorem.

And to insert a new paragraph, on page 239 of the bill, as follows:

PAR. 1683b. Paving posts, railroad ties, and telephone, trolley, electric-light, and telegraph poles, of cedar or other woods.

Also, on page 93, to strike out lines 10 and 11, which read:

PAR. 407. Pickets, palings, hoops, and staves, of wood of all kinds, 10 per cent ad valorem.

And, on page 239, after line 23, to insert:

PAR. 1683c. Pickets, palings, hoops, and staves, of wood of all kinds.

The PRESIDENT pro tempore. The Senator from Minnesota asks unanimous consent that these four amendments may be considered and voted upon as one amendment. Is there objection? The Chair hears no objection.

Mr. McCUMBER. Mr. President, I desire to say, in response to the argument of the Senator from Minnesota, that I do not think these duties are required at all from the standpoint of protection. The committee did not so consider. It is, moreover, simply throwing away a revenue of $50,000.

As to whether that revenue is paid in a higher price for these posts and poles, I can not say definitely. I doubt very much if it affects the price at all; but I wanted it to be considered purely as a question of revenue, not as a question of protection.

Mr. JONES of Washington. Mr. President, naturally our State would be considerably interested in this matter, but all I have had in the way of communications from anyone in that State with reference to it has been an objection to the ad valorem rate of 10 per cent. They have sought to have that changed, if there is to be a duty, to a specific rate.

Mr. Lane, to whom the Senator from Minnesota referred, saw me yesterday, and he claims to represent practically all of the people who are interested in this matter in the various Western States. He said to me that those people preferred to have the articles on the free list, even preferring that to a specific duty. So I am not going to oppose the amendments of the Senator from Minnesota. I am inclined to think they are good amendments, unless from the standpoint mentioned by the chairman, that we ought to have the duties for revenue purposes; and if we do have a duty, I believe it ought to be specific rather than ad valorem, because the people interested point out that there are many vexatious questions arising, delays, and all that sort of thing, which would make it much better if we had a specific duty, if we are to have any duty at all.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment of the Senator from Minnesota [Mr. KELLOGG].

The amendment was agreed to.

Mr. KELLOGG. Mr. President, I wish to offer one other amendment, and then I shall be through. I think the Senator from Washington is interested in this, but I am not sure whether he agrees to it or not.

On page 91, I move to strike out all of paragraph 402.

The PRESIDENT pro tempore. The Secretary will state the amendment.

The READING CLERK. On page 91, the Senator from Minnesota moves to strike out paragraph 402, which reads:

Logs of fir, spruce, and western hemlock, $1 per thousand feet board measure.

And to insert on page 239 the following as a separate paragraph:

PAR. 1683d. Logs of fir, spruce, cedar, and western hemlock.

Mr. JONES of Washington. Mr. President, I am opposed to that amendment.

Mr. KELLOGG. I will explain it. The amendment is to strike out all of paragraph 402 of the bill, which imposes a duty of $1 per thousand feet board measure on logs of fir, spruce, cedar, or western hemlock, and another amendment to place logs of fir, spruce, cedar, and western hemlock on the free list. Of course, under the reciprocal agreements—and the Senator from Washington will correct me if I am not correct—there is not now a duty, but a duty could be imposed if Canada should impose one on our products. I may be mistaken as to that.

By a very decisive vote the Senate placed shingles on the free list, and I assume that no manufacturer of shingles wants logs on the dutiable list when shingles are on the free list. As to the other logs, it seems to me that the same argument I have made before applies to them. I can not understand why the raw materials for manufacture, logs, coming from Canada into this country should bear a duty.

I do not believe in the policy of destroying our forests anywhere in the country by imposing a duty against foreign lumber or foreign logs in their natural state, and for that reason I ask to have the amendments adopted.

The PRESIDENT pro tempore. Does the Senator from Minnesota ask that the two amendments be combined?

Mr. KELLOGG. I ask that they be voted on together, because one is striking out the provision and the other is putting the articles on the free list.

The PRESIDENT pro tempore. The Senator asks that the two amendments which he has proposed shall be considered as one amendment and voted upon at the same time. Is there objection? The Chair hears none, and it is so ordered.

Mr. JONES of Washington. Mr. President, I do not think the Senate ought to adopt this amendment. The Finance Committee has thought there should be no further change made in this than has been made. This is a House provision. I want to call attention to the fact that under this provision itself there is no duty on these logs unless certain duties shall be imposed or certain acts shall be taken by Canada.

There was a reason for that provision. There is a custom or practice in British Columbia of dumping the logs of British Columbia on our markets and using the orders in council, and the methods of procedure which British Columbia has to depress our market, allowing logs to come in and be exported free if it suits their purpose, or putting an embargo or an export duty on if that suits their purpose. It was to meet that situation that the language of this bill was made as it is.

These logs can come in free under this proviso:

Provided, That any such logs cut from any particular class of lands shall be exempt from such duty if imported from any country, dependency, province, or other subdivision of government which has at no time during the 12 months immediately preceding their importation into the United States maintained any embargo, prohibition, or other restriction (whether by law, order, regulation, contractual relation or otherwise, directly or indirectly) upon the exportation of such logs from such country, dependency, province, or other subdivision of government, if cut from such class of lands.

I am not going to discuss the question the Senator has just raised. He has expressed his opinion with reference to the advisability of taking the duty off in the interest of conservation. I have an opinion which does not agree with his, but I am not going to take the time to try to impress that opinion upon the Senate. I am probably as strongly of my opinion as the Senator from Minnesota is of his. His opinion may be entitled to greater weight than mine. Nevertheless I have mine. I think this ought to be left as it is.

The Senator referred to the fact that cedar logs ought to be on the free list because shingles are on the free list. I would have no objection to putting cedar logs on the free list because shingles are on the free list, but there are other logs covered in this paragraph besides cedar logs, and shingles are not made out of the other logs—spruce, hemlock, fir, and so forth—and they should be left as they are here.

Therefore on the whole I think this provision should be left as the House passed it, and the Senate Finance Committee has approved it.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment proposed by the Senator from Minnesota [Mr. KELLOGG].

Mr. KELLOGG. I ask for the yeas and nays.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. EDGE (when his name was called). I have a general pair with the senior Senator from Oklahoma [Mr. OWEN]. I transfer that pair to the junior Senator from Vermont [Mr. PAGE] and vote "nay." I will let this announcement stand for the day.

Mr. HALE (when his name was called). I transfer my pair with the senior Senator from Tennessee [Mr. SHIELDS] to the junior Senator from Maryland [Mr. WELLER] and vote "nay."

Mr. McCUMBER (when his name was called). I have a general pair with the junior Senator from Utah [Mr. KING]. I transfer that pair to the junior Senator from Washington [Mr. POINDEXTER]. This notice of transfer may stand on all votes during this calendar day. I vote "nay."

Mr. POMERENE (when his name was called). Again announcing my pair with my colleague [Mr. WILLIS], I transfer that pair to the senior Senator from Nebraska [Mr. HITCHCOCK] and vote "yea." I desire to state that my colleague [Mr. WILLIS] is detained because of serious illness in his family. I make this announcement for the day.

Mr. TRAMMELL (when his name was called). I transfer my pair with the senior Senator from Rhode Island [Mr. COLT] to the senior Senator from Texas [Mr. CULBERSON] and vote "yea."

Mr. WATSON of Georgia (when his name was called). I have a general pair with the Senator from California [Mr. JOHNSON], who, if present, would vote "nay." If free to vote, I would vote "yea."

The roll call was concluded.

Mr. ERNST. I transfer my general pair with the senior Senator from Kentucky [Mr. STANLEY] to the junior Senator from North Dakota [Mr. LADD] and vote "nay."

Mr. JONES of New Mexico. I transfer my general pair with the Senator from Maine [Mr. FERNALD] to the Senator from Nevada [Mr. PITTMAN]. I ask that this notice of transfer may stand for the day. I vote "yea."

Mr. HARRISON. Transferring my pair with the junior Senator from West Virginia [Mr. ELKINS] to the junior Senator from Rhode Island [Mr. GERRY], I vote "yea."

Mr. WALSH of Montana (after having voted in the affirmative). I inquire if the senior Senator from New Jersey [Mr. FRELINGHUYSEN] has voted.

The PRESIDENT pro tempore. That Senator has not voted.

Mr. WALSH of Montana. I am paired with that Senator, who is absent. Being unable to obtain a transfer, I withdraw my vote.

Mr. CURTIS. I wish to announce the following general pairs:

The Senator from Vermont [Mr. DILLINGHAM] with the Senator from Virginia [Mr. GLASS];

The Senator from Minnesota [Mr. NELSON] with the Senator from Massachusetts [Mr. WALSH];

The Senator from Illinois [Mr. McKINLEY] with the Senator from Arkansas [Mr. CARAWAY];

The Senator from Missouri [Mr. SPENCER] with the Senator from Georgia [Mr. HARRIS]; and

The Senator from Indiana [Mr. WATSON] with the Senator from Mississippi [Mr. WILLIAMS].

The result was announced—yeas 28, nays 26, as follows:

YEAS—28.

Ashurst	Jones, N. Mex.	Norbeck	Robinson
Borah	Kellogg	Overman	Sheppard
Capper	Kendrick	Phipps	Simmons
Cummins	McKellar	Pomerene	Smith
Dial	Moses	Rawson	Swanson
Harrison	Myers	Reed, Mo.	Trammell
Heflin	New	Reed, Pa.	Underwood

NAYS—26.

Ball	Ernst	McLean	Smoot
Broussard	Gooding	McNary	Stanfield
Bursum	Hale	Nicholson	Sterling
Calder	Harreld	Oddie	Sutherland
Cameron	Jones, Wash.	Pepper	Wadsworth
Curtis	Lodge	Ransdell	
Edge	McCumber	Shortridge	

NOT VOTING—42.

Brandegee	Gerry	McKinley	Townsend
Caraway	Glass	Nelson	Walsh, Mass.
Colt	Harris	Newberry	Walsh, Mont.
Culberson	Hitchcock	Norris	Warren
Dillingham	Johnson	Owen	Watson, Ga.
du Pont	Keyes	Page	Watson, Ind.
Elkins	King	Pittman	Weller
Fernald	Ladd	Poindexter	Williams
Fletcher	La Follette	Shields	Willis
France	Lenroot	Spencer	
Frelinghuysen	McCormick	Stanley	

So Mr. KELLOGG's amendment was agreed to.

Mr. HARRELD. Mr. President, I desire at this time to offer my amendment.

The PRESIDENT pro tempore. The Secretary will report the amendment proposed by the Senator from Oklahoma.

The READING CLERK. On page 229, line 6, strike out "crude, fuel, or." Page 23, after line 20, insert the following new paragraph:

PAR. 54a. Oils, mineral: Petroleum, crude, 35 cents per barrel of 42 gallons; fuel oil, 25 cents per barrel of 42 gallons.

Mr. HEFLIN. Mr. President, I trust that this amendment will not prevail. It simply means to tax every consumer of illuminating gas and gasoline in the country. It would impose a tax upon every farmer in the South and West and everybody else who uses in the home a gasoline stove. It would tax every grain grower in the West who uses a gasoline engine in threshing his wheat and his oats and for other purposes about the farm. It would impose a tax upon every cotton and grain farmer in the country who uses a tractor plow or auto truck operated by gasoline. It would impose a tax upon every man and woman in the country who uses gasoline in operating an automobile.

Mr. President, this amendment is utterly inexcusable and indefensible. Why should the American consumer be taxed 25 cents a barrel on this oil when our people are now exporting 3,000,000,000 gallons a year and selling it in the Old World markets in competition with the oils of foreign countries? What reason or justification is there, Mr. President, for holding up the already overburdened and hard-pressed masses of the United States and filching from their pockets money with which to increase the profits of the oil magnates of the United States?

Mr. President, I hold in my hand editorials from many of the great dailies of the country opposing this proposed tariff tax. I want to read part of an editorial from the Washington Times, as follows:

> If there is one thing that ought not to have protection, it is the oil that the Lord created and put in the ground millions of years before there were any human beings here.
>
> His divine industry certainly does not need protection. And the little man with his little car, the farmer with his gas engine, certainly do need protection from the oil crowd that tried to build a fence around outside supplies.

Here is another one from the New York Herald:

> CHAIRMAN FORDNEY'S OIL DAM.
>
> The American people know that for several years they have heard warnings from all sides that this country's oil supply is in danger of running dry. They know that the best engineering genius and the biggest statesmanship in the country have been patriotically contending that the welfare of the Nation demands that foreign consumers should not be permitted to drain us of our reserves while refusing to let us have our reasonable share of theirs.
>
> The American people know that the Secretary of Commerce is deeply concerned over this grave national question. They know that the Secretary of State is vigorously insisting with great powers that this Nation have its rights to oil land grants in foreign territories recognized along with those European nations that claim exclusive first mortgages on them. They know that the President of the United States is contesting to the limit this deadly dangerous discrimination against us in foreign fields.
>
> The American people know that every barrel of oil brought into this country is as good as a barrel of oil saved of our own home supply, and for that reason the foreign oil must not be shut out.

That simply means, Mr. President, that every barrel that comes in saves a barrel of our home supply for use at some future time.

Now, Mr. President, this morning I asked the Senator from Oklahoma [Mr. HARRELD], who is himself interested in the oil business and who will himself be benefited financially by the tax that he seeks by his amendment to have imposed upon the American people, if he thought it proper for him to participate in the settlement of this question. I do not believe that any Senator should use his position and power, which are given to him by a sovereign State to safeguard its interests and the welfare of the whole people, to vote money out of the pockets of other people into his own. The Senator from Oklahoma is part owner in a great oil well which is called the Homa-Okla. That well gives out every day 8,000 barrels of oil. The Senator from Oklahoma asks the Congress solemnly to vote a 25-cent tax out of the pockets of the American people on every one of the 8,000 barrels of oil which flow daily from that well. That is what the proposition means. We all know that when taxes are imposed on the imports of oil into this country the price of oil and gasoline will be increased. Who pays that price, if you please? Every consumer of oil and gasoline in the country pays it; nobody else but the consumers pay it. When Senators vote to-day to impose a tax upon these everyday necessities they vote to take that tax directly out of the pockets of the American consumer. There is no way around it, Mr. President.

I recall some time back when there was another tariff bill under consideration in this body, before I became a Member of it, the senior Senator from Wisconsin [Mr. LA FOLLETTE] rose in his place in this Chamber and said to the Senate that he was interested in zinc and some other kind of ore, which were produced by a mine in Wisconsin, and that he would be benefited by the tax which was being sought, and that he felt he ought not in any way to use his position to place that tax on the statute books in order to put money in his pocket. He therefore declined to vote upon that question.

I have raised that question with the Senator from Oklahoma. I do not think the Senator from Oklahoma ought to vote upon this question. Mr. President, the oil question vitally affects practically every home in America. I want Senators to think to-day as we come to pass upon this question of the millions of men and women out yonder who have no voice in this Chamber except as some of us undertake to speak for them. I think that Congress will do well, amidst all the strife and unrest that we see about us on every hand, to go upon record saying to the consumers of oil in various forms, "We do not intend that Senators who are directly interested financially in great oil wells, in great oil products, shall secure the passage by the Senate of the American people of a proposition that increases their profits." This is a serious question, Mr. President.

Mr. HARRELD. Mr. President——

The PRESIDING OFFICER (Mr. McNARY in the chair). Does the Senator from Alabama yield to the Senator from Oklahoma?

Mr. HEFLIN. I yield to the Senator.

Mr. HARRELD. Mr. President, I should like to ask the Senator a question. I presume he was in the Chamber this morning when I began my speech and heard what I had to say about my interest in oil.

Mr. HEFLIN. I did not hear the first part of the Senator's speech.

Mr. HARRELD. I explained at that time my interest in this proposition, and I also explained that the interest was so very small as compared to the general public interest that I did not think I was disqualified.

Now I should like to ask the Senator if, in the last analysis, his contention does not come down to this: That if a Member of the Senate buys gasoline in the open market to run his car he is disqualified from voting? According to the Senator's argument he would be, would he not?

Mr. HEFLIN. Not at all.

Mr. HARRELD. Why would he not? He is interested, certainly. That is the logical conclusion from the Senator's argument.

Mr. HEFLIN. That is a ridiculous, infinitesimal proposition as compared to this.

Mr. HARRELD. So is my interest infinitesimal as compared to the public's interest in this matter.

Mr. HEFLIN. Since the Senator has raised the question, I want to ask him if he has not received one payment of a dividend or some sort of a settlement from one oil concern amounting to $250,000?

Mr. HARRELD. No; I have not.

Mr. HEFLIN. How much did the Senator get out of a settlement he made with an oil concern?

Mr. HARRELD. As I said this morning, I sold my production and sold it for a valuable consideration, but that is a private affair.

Mr. HEFLIN. It was several thousand dollars, was it not?

Mr. HARRELD. I have no production in which I am interested; I have no production at all, except in a company in which I have stock.

Mr. HEFLIN. Is not the Senator a stockholder in the Homa-Okla oil-well concern?

Mr. HARRELD. Certainly; I have said I was.

Mr. HEFLIN. And it gives out 8,000 barrels of oil a day. Does the Senator contend that that is a small matter?

Mr. HARRELD. It has paid one dividend in three years.

Mr. HEFLIN. The Senator is now fixing things so it will pay dividends regularly. If his amendment is adopted it will advance the price of his company's oil to the American consumer $2,000 a day and $730,000 a year, or three-quarters of a million dollars annually.

Mr. HARRELD. I said in my speech this morning that I was interested in oil, but that my interest was so infinitesimally small as compared to the public interest in this matter that it did not, in my judgment, interfere with my prerogative to vote on this question. I should like to ask the Senator does he not know that the Speaker of the House of Representatives ruled long ago, settling the question once and for all, how far the interest of a Member of the House should be considered as interfering with his right to vote, and that the rule then laid down by the Speaker of the House and concurred in by the House was that if a Representative or Senator has an interest, but that interest is infinitesimally small as compared with the public interest, he is not disqualified from voting?

Mr. HEFLIN. Mr. President, each Senator must be governed by his own conscience in this matter. The Senator from Wisconsin [Mr. LA FOLLETTE] was interested in a small way in the output of a zinc mine in his State, and yet so scrupulous was he upon the subject and so conscientious that he declined to use the power vested in him as a Senator in this body to enhance his own private fortune, and he would not vote. Of course, the Senator from Oklahoma must be his own judge in this matter, but I submit to the Senate when the Senator from Oklahoma admits that he cashed in on one of these concerns and took down several thousand dollars it is not a small or infinitesimal matter, and the country will agree that when the Senator undertakes to levy against every American consumer 25 cents a barrel on the oil and gasoline consumed it is not considered an infinitesimal amount or matter. It is a very serious matter.

The Senator must decide for himself whether under the circumstances he will vote on this matter. It is the duty of some of us to let the people at home know when this power has been intrusted to a man how he uses it, when he comes here in the name of his State as a Senator, whether he is using his office to protect the gasoline consumer who runs his little engine for a livelihood or who rides in his car or operates a truck or kindles a blaze in a little stove to keep himself and family warm in the winter, or whether he is voting money into the pockets of those who wish to increase their profits on oil.

The PRESIDING OFFICER. The time of the Senator from Alabama has expired.

Mr. EDGE. Mr. President, I propose to vote against the amendment offered by the Senator from Oklahoma, as, in my judgment, in view of the great quantity of oil imported, the result of the imposition of the duty proposed would mean a higher price for oils and gasoline to the domestic consumer.

I am rising not to discuss so much the subject matter of the amendment as to take very positive exception to the insinuations and imputations and innuendoes which seem of late to be so frequently suggested on the floor of the Senate as to the votes of Senators who may be in some way, directly or indirectly, financially interested in the question before the Senate or, rather, the adoption or defeat of some particular proposal which might affect such interest.

There was a time, Mr. President, when moderate success in business life or great success in business life was looked upon not necessarily as a reason for honor or distinction upon the part of the electors of a constituency in selecting a man to represent them in a place of public responsibility, but certainly it was not looked upon as a bar to such recognition and such public service. I believe legislative bodies should be well balanced, composed of men representing all classes of industry and activity—the farmer, the manufacturer, the private citizen, or the retired business man, or whatever his vocation may be—but when the time arrives when a Senator's vote is to be challenged on the floor of the Senate from the standpoint that he may have some direct or indirect interest, may it be, in a particular schedule, speaking now of the bill before us, or otherwise, then I fear for the future of free America.

So far as I am concerned, in a very modest way I have had some business success. I have some interest in various industrial and other corporations, and if the time should arrive when I felt that I could not vote on the floor of the Senate for what I believed conscientiously to be for the best interests of the majority of the people, I would not pass my vote, as I would look upon that as a direct admission that I was influenced because of private interest; rather I would first resign my seat in the Senate. Things have come to a pretty pass in the development of American life, in my judgment, when it is inferred that a Senator of the United States, voting as he may do at any time, is unwarrantedly influenced by some interest, large or small, which he may personally have.

Is it not wise to stop just for a moment and consider how Senators are sent here? We are selected through the electors of the respective States. It is reasonable to assume that the electors of a State, not so large as to make the condition otherwise, are reasonably well acquainted with the men they elect to the Senate.

They know what their activities have been. Certainly, as a rule, no man can stand for the Senate in these days without any misstep which he may have made, if he has made one, being thoroughly ventilated before the electorate. So that when a sovereign State, by a majority vote, selects a Senator, the electorate of that State must know whether he has been successful or unsuccessful from a business standpoint. They must know his activities and his interests, generally speaking; and with this knowledge they elect him, as the electors of a sovereign State, to represent them in the Senate.

I think the time has arrived when Senators with this great responsibility upon them, with 110,000,000 people throughout the country so dependent upon their broad action and unbiased consideration of these interests, which radiate to every activity of society, should consider a fellow Senator's position as one

that he is conscientiously taking, and should not libel the activities of this powerful deliberative body or its Members by insinuations, innuendoes, and inferences that Senators are false to their oaths, fail in their trust, or are untrue to themselves.

Mr. HARRISON. Mr. President, I did not expect to get into this discussion; but since it has turned on a question of interest of individual Senators when they cast their votes, and since a few days ago I offered a resolution stating that it was the sense of the Senate that where a Senator would be directly benefited from casting a vote on this bill he should refrain from voting and should adhere to the precedent as laid down in Jefferson's Manual and followed by the practice of many Senators and Representatives in the past, I feel that I should at least express myself at this time.

The Senator from New Jersey [Mr. EDGE] is no doubt conscientious in the position that he takes. I sometimes feel that in this body there is a lack of tolerance upon the part of its Members; that they are not willing to concede to each other honesty of convictions and sincerity of purpose.

I think when it comes down to voting upon a proposition where a Senator is interested he should consult his own conscience. It is a matter for his own judgment to lead him in the course that he is to pursue. If a Senator, for instance, is vitally interested in wool, and that is his particular business, if that is what he makes his money out of, and he is called upon to vote here on a proposition that will place money in his pockets—for my part, if I were that Senator, I would refrain from voting on that amendment. If I were interested in and most of my fortune, if I had any, were in the oil business, and the question came up of protecting oil in a way that would benefit me directly or indirectly, I would refrain from voting when the question was put; and all down the line I would make that the test, and that would be the standard by which I would measure my vote and give expression to my views.

I have no fault to find with the distinguished Senator from Oklahoma [Mr. HARRELD]. If his conscience leads him to advocate the adoption of an amendment that will put a protective duty upon oil, and he is interested in it and is to receive benefit therefrom, that is all right; that is a matter for him, his conscience, and his constituents. With reference to wool, the same thing is true. We heard much about that in the earlier stages of this discussion, when the Senator from Idaho [Mr. GOODING] tried so hard to have an investigation, and certain Senators on the Republican side were afraid of it and objected to it. They knew that certain matters might come out that would hurt the dominant party, and they strangled it, smothered it, and refused to cooperate with the Senator from Idaho, who was threatened with stains because of certain allegations that had been made against him.

The Senator from New Jersey [Mr. EDGE] does not agree with the position that has been taken by many distinguished Republican leaders in the past. Does the Senator forget that at one time, when the distinguished Senator from Maine, Mr. Frye, was called upon to vote on a question in which he felt himself interested, he rose in his seat and asked permission to refrain from voting, and when the rule was read to him he said he did not feel that he should vote, under the circumstances, and declined to vote? That is but one instance, but it has been followed in this body and the other body time after time. It was because of that precedent and because of that practice, both in the House and in the Senate, and with the hope that we would not allow the confidence of the people to be destroyed in their estimate of the Senate, that I offered some weeks ago Senate Resolution 331, which said, in simple language, the following:

Whereas paragraph 21 of section 17 of Jefferson's Manual provides: "Where the private interests of a member are concerned in a bill or question, he is to withdraw. And where such an interest has appeared, his voice has been disallowed."

Resolved, That it is the sense of the Senate that the principle enunciated in the rule is proper and wise.

Resolved further, That it is the sense of the Senate that Senators, not only in the consideration of the pending bill (H. R. 7456), but on all other questions that may arise in the Senate, should adhere to the rule.

When I sought at least three times to obtain unanimous consent for the consideration and adoption of that resolution, merely expressing the sentiment and sense of the Senate touching these matters, objections came from the other side of the aisle.

Mr. WADSWORTH. Mr. President, will the Senator yield?

Mr. HARRISON. Yes.

Mr. WADSWORTH. I am prompted to ask this question in order to get the Senator's view: Does the Senator think that Senators should vote on a measure which fixes their own salaries?

Mr. HARRISON. Yes; but I have always voted against increasing my salary. Other Senators have voted to increase theirs. That is a very adroit way for the Senator from New York to put it, and I might say for the other side that if there is anyone in the world who could hatch up an excuse to defeat this resolution expressing the sentiment of the Senate, or to get away from the proposition advanced by the Senator from Alabama [Mr. HEFLIN], the distinguished and astute Senator from New York could do it. So he bases his opposition to this resolution on the ground that in the course of time Senators have increased their own salaries or voted for their own mileage or increased it. Now let me ask the Senator a question. Does the Senator think that if he had all of his resources tied up in wool he should stand here and fight day after day to increase the tariff on wool when he knew or thought or believed that it would indirectly put money into his own pocket?

Mr. WADSWORTH. It would all depend upon the circumstances surrounding the particular case.

Mr. HARRISON. Absolutely. That is what I have contended.

Mr. WADSWORTH. A categorical answer can not be made.

Mr. HARRISON. The Senator and I are together.

Mr. WADSWORTH. The Senator from New York may remind the Senator from Mississippi that the Senator from New York is in the wool business.

Mr. HARRISON. Oh, well, the Senator is in so many different businesses that he——

Mr. WADSWORTH. No; just one.

Mr. HARRISON. Just the wool business?

Mr. WADSWORTH. Just farming.

Mr. HARRISON. Why, the Senator is a big farmer up there.

Mr. WADSWORTH. I said "farming."

Mr. HARRISON. I thought the Senator said "the wool business."

Mr. WADSWORTH. That is farming—the business of farming.

Mr. HARRISON. The Senator has probably a hundred head of sheep in New York?

Mr. WADSWORTH. Never mind about the details.

Mr. HARRISON. Of course, I am not asking the Senator for the details; but he said that he was in the sheep business, as I understand.

Mr. WADSWORTH. I did not say the sheep business; I said the wool business, the farming business. Now, may I ask the Senator if he thinks that the Senators who voted in favor of increasing the congressional salary did wrong?

Mr. HARRISON. I have just told the Senator my view on that point. I never have voted for an increase.

Mr. WADSWORTH. I did not ask how the Senator voted. I said does the Senator believe that the Senators who voted for the increase did something morally wrong?

Mr. HEFLIN. Mr. President——

The PRESIDING OFFICER. Does the Senator from Mississippi yield to the Senator from Alabama?

Mr. HARRISON. One moment. Why, how in the world could the salaries be increased if the Congress did not pass the proposition? The Constitution gives to Congress the exclusive power to fix salaries. Let me say to the Senator, however, that I would not vote for it, and I never have voted for it——

Mr. WADSWORTH. I am not asking what the Sentaor voted for. I want the opinion of the Senator.

Mr. HARRISON. I have given it to the Senator. But I never have voted for an increase of mileage; and I can not see at all the comparison; the analogy is not there. Why, there is every difference between voting for an increase of salary and voting for a high tariff on something here that a Senator's whole business interests are wrapped up in, that he knows from which he is going to obtain benefit. Why, even if a Senator did vote a small increase in his salary the amount would be practically negligible on the American people; but when you vote to increase the rates on wool, if your whole resources are wrapped up in wool, then you tax every consumer, rich and poor alike, in higher clothing, blankets, and everything that is needed to keep one warm and comfortable, and not only thereby increase the burdens upon them but you are receiving the benefits therefrom.

Mr. HEFLIN and Mr. WADSWORTH addressed the Chair.

The PRESIDING OFFICER. Does the Senator from Missippi yield; and if so, to whom?

Mr. HARRISON. I yield to the Senator from Alabama.

Mr. HEFLIN. Mr. President, the increase of a Senator's pay is supposed to give him just compensation for faithful service to the people; and when Congress raised the salaries of

Senators and Members of the House it fixed the increase for the next Congress, so that the people would have their choice of electing the man who had voted to increase the salaries or electing a man outside, who was not a Member of the Congress. That is the difference.

Mr. LODGE. Mr. President, I rise to a question of order.

The PRESIDING OFFICER. The Senator from Massachusetts will state it.

Mr. HARRISON. Mr. President, I have the floor.

Mr. LODGE. I have the right to take the Senator off the floor by raising a question of order, and he knows it.

Mr. HARRISON. But the Senator would not do that until I have answered fully the question of the Senator from New York.

Mr. LODGE. Mr. President——

The PRESIDING OFFICER. The Chair recognizes the Senator from Massachusetts for the purpose of stating a question of order.

Mr. LODGE. This discussion is running on, and I raise the question of order that it is a violation of the unanimous-consent agreement, which provides that debate shall be confined to the question before the Senate or the bill itself. It has wandered far away from that now, and we are consuming the time which is reserved for those who have individual amendments to offer and who ought not to be deprived of their opportunity.

The PRESIDING OFFICER. The Chair is constrained, by virtue of the unanimous-consent agreement, to sustain the point of order raised by the Senator from Massachusetts.

Mr. HARRISON. Mr. President, I want to discuss this amendment. As I understand, an oil amendment is pending here.

The PRESIDING OFFICER. The amendment before the Senate is the amendment proposed by the Senator from Oklahoma [Mr. HARRELD].

Mr. HARRISON. Yes; and I understood the discussion was around the proposition of whether or not a Senator should vote on this amendment if he was personally interested in the matter.

Mr. LODGE. That is entirely irrelevant to an amendment putting a duty on oil, and everyone knows it.

Mr. HARRISON. May I ask the Senator from Massachusetts a question? He heard the speech of the distinguished Senator from New Jersey [Mr. EDGE], did he not?

Mr. LODGE. Yes; and I heard the speech of the distinguished Senator from Alabama [Mr. HEFLIN].

Mr. HARRISON. The Senator did not call the Senator from New Jersey to order, and did not make his point of order then.

Mr. LODGE. I did not call the Senator from Alabama to order, either; but now the debate is running on and going from one thing to another and taking up the time which under the unanimous-consent agreement belongs to other Members of the Senate to offer their individual amendments.

Mr. HARRISON. I ask the Senator if he will not allow me to read this decision when Mr. Frye asked permission to refrain from voting upon a proposition in the House, where he was personally interested.

The PRESIDING OFFICER. The Senator from Massachusetts can not grant permission. That must come by unanimous consent of the Senate.

Mr. HARRISON. I ask unanimous consent that I may be permitted to read that decision.

Mr. LODGE. No unanimous consent is permitted under the agreement.

The PRESIDING OFFICER. The Senator from Mississippi asks unanimous consent to read a certain decision. Is there any objection?

Mr. LODGE. Mr. President, the rule under the unanimous-consent agreement can not be set aside by unanimous consent.

Mr. HARRISON. Then the Senator objects?

Mr. LODGE. I do not object; but, under the unanimous-consent agreement, asking unanimous consent to extend the time has been ruled out of order.

Mr. HARRISON. Does the Senator hold that a unanimous-consent agreement can not be set aside by unanimous consent?

Mr. LODGE. I do.

Mr. HARRISON. Is that the ruling of the Chair?

The PRESIDING OFFICER. The present occupant of the chair thought that unanimous consent at this time was in order provided the Senator from Mississippi was within his limitation of time.

Mr. HARRISON. This is from Hind's Precedents:

On March 2, 1877, the yeas and nays were being taken on a motion to suspend the rules in order to take up the Senate bill (No. 14) to extend the time for the construction and completion of the Northern Pacific Railroad.

During the call of the roll Mr. William P. Frye, of Maine, said that he did not feel at liberty to vote on the bill until the Chair had ruled upon his right to do so, since he was a stockholder in the road.

The Speaker said:

"Rule 29 reads: 'No Member shall vote on any question in the event of which he is immediately or particularly interested.'

"Having read this rule, it is for the gentleman himself to determine whether he shall vote, not for the Chair."

Mr. Frye declined to vote.

Mr. President, I now ask unanimous consent for the present consideration of the resolution to which I have referred, Senate Resolution 331.

Mr. WADSWORTH. I object.

Mr. LODGE. I object. It is a violation of the unanimous-consent agreement.

Mr. HARRISON. Will not the Senator let me have it read?

Mr. WADSWORTH. No; I object to its being read.

The PRESIDING OFFICER. The present occupant of the chair will rule that that is not in order at this time. The question is upon the amendment of the Senator from Oklahoma [Mr. HARRELD].

Mr. HARRELD. Mr. President, I desire to speak to a matter of personal privilege. Since my motives in presenting this amendment and voting for it have been called in question, I feel that I should say something more than I said this morning. I have said already——

Mr. JONES of Washington. Mr. President, I do not like to question a Senator's right to make a statement based on personal privilege, but it does seem to me that it is out of order under the unanimous-consent agreement under which we are proceeding.

Mr. HARRELD. Is it out of order for a Senator to make a statement as a matter of personal privilege?

Mr. JONES of Washington. Yes; the unanimous-consent agreement excludes all matters——

Mr. HARRELD. I do not think I will take over three minutes.

The PRESIDING OFFICER. The Chair thinks the position of the Senator from Washington is correct in the matter, and that the Senator from Oklahoma can not proceed except by unanimous consent.

Mr. HARRISON. I ask unanimous consent that the Senator from Oklahoma may proceed for five minutes.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Mississippi?

Mr. JONES of Washington. I think that would lead to some one else asking unanimous consent to proceed, and I object.

The PRESIDING OFFICER. Objection is made. The question is upon agreeing to the amendment offered by the Senator from Oklahoma.

Mr. HARRELD. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state his inquiry.

Mr. HARRELD. Is it the ruling of the Chair that I can not rise at this time to a question of personal privilege?

The PRESIDING OFFICER. That is the ruling of the present occupant of the chair.

Mr. HARRELD. I appeal from the ruling of the Chair. I want to know now if a Senator can not have an opportunity to make a statement when he is attacked.

Mr. JONES of Washington. I move that the appeal be laid on the table.

The PRESIDING OFFICER. The question is on the motion of the Senator from Washington to lay the appeal from the decision of the Chair on the table.

The motion was agreed to.

Mr. JONES of New Mexico. Mr. President, I listened to the very able speech of the Senator from Oklahoma this morning, and I do not hold any brief for the oil companies to which the Senator from Oklahoma referred this morning, but that subject became a matter of controversy in the hearings upon the subject, and my attention has been called to a letter addressed to the Senator from Oklahoma, written by Mr. Herbert G. Wylie, vice president and general manager of the Pan American Petroleum & Transport Co. and the Mexican Petroleum Co.

That letter deals particularly with the connections of Mr. Edward L. Doheny, and inasmuch as the Senator from Oklahoma this morning intimated, at least, that Mr. Doheny was doing all of the things which he condemned, I think it is nothing but fair that this letter, which was addressed to the Senator from Oklahoma, be printed in the RECORD in connection with this discussion. It may be that that letter has been put into the RECORD at some time by the Senator from Oklahoma.

Mr. HARRELD. I think it has been put in the RECORD, and I have no objection to its being put in again. But I would like

to ask if Mr. Doheny denies now that he was interested in the Teapot Dome lease in Wyoming?

Mr. JONES of New Mexico. I know nothing about that whatever. I have not had the slightest information regarding that one way or the other. I have not seen Mr. Doheny, perhaps, for a year; I know him in rather a casual way, but inasmuch as this became the subject of controversy before the committee, I thought it advisable that that letter, which was printed in the hearings of the committee on this subject, ought to be inserted in the RECORD at this point.

Mr. HARRELD. I may say that one or two other Senators have asked me if I objected to having the letter of Mr. Doheny introduced into the RECORD, and I told them I had no objection—and I have none now.

Mr. JONES of New Mexico. I ask that this letter, which appears upon pages 4460 and 4461 of the hearings, written by Mr. Herbert G. Wylie, addressed to the Senator from Oklahoma, may be printed in the RECORD without reading.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

AUGUST 27, 1921.

Hon. JOHN W. HARRELD,
United States Senate, Washington, D. C.

MY DEAR SIR: I have to-day received and read a copy of your speech on the international aspects of production of oil by Americans, which speech was delivered before the Senate on August 23.

I find in this statement such serious errors in essential facts as to lead me to believe that you have been imposed upon by some individual or individuals who have some ulterior motive in misinforming you.

It is my belief that you would be the first to desire to know of these errors, and that, knowing of them, you will welcome the opportunity to make such correction thereof as may be necessary in order to avoid grave misapprehensions which otherwise would exist as to Mr. E. L. Doheny and as to the attitude of the companies controlled by him, of which I am vice president and general manager.

I ask your attention to the following facts:

1. From page 5529 of the RECORD I quote:

"This is the same Doheny who is one of the largest producers in California."

Mr. Doheny is a very small producer in California, having sold out his earlier interests in that State over 20 years ago.

2. "The General Petroleum Corporation—that is, the Doheny Co."

Mr. Donheny is not now and never has been connected with or interested in any way with the General Petroleum Corporation.

3. "Perhaps it is because the largest producers in California—Mr. Doheny and others," and so forth.

The total production of oil by Mr. Doheny and by all of his companies in which Mr. Doheny is interested in California at the present time is less than 2 per cent of the total production. He is not and has not been for years a large producer in the State of California.

4. "This is the same Doheny who recently opened an office in London, England, thus anglicizing his company.

"The same man who has a monopoly in the production in California and in Mexico has now anglicized his company.

"Why does Mr. Doheny * * * demand that this country give to a company that is organized in England the American market for its products?" (P. 5530. Other similar references are found in other parts of the speech.)

None of the companies producing petroleum in Mexico in which Mr. Doheny is interested are English companies. All but one are American companies, and that one is a Mexican subsidiary. Mr. Doheny and his family have for years personally controlled and still control more than a majority of the stock of these companies. Neither he nor any member of his family have sold any of this stock to any person or corporation in England at any time. None of his companies has ever been anglicized. Less than 1 per cent of the stock of these companies is held by Englishmen.

The British Mexican Petroleum Co., to which you refer, is a selling company, organized in England by the Pan American Petroleum & Transport Co. and certain Englishmen associated for the purpose of opening a wider market in Europe for a part of the petroleum produced in Mexico by these American companies. This British Mexican Petroleum Co. not only does not control or take over any of the assets of the American companies above alluded to but does not even own any stock in any of these companies, all of which remain, as above stated, in the sole control of the Doheny family; nor do any of the Doheny companies own the British company entirely, the ownership being divided, 50 per cent belonging to the Pan American Petroleum & Transport Co. (the parent Doheny company here) and the balance belonging to the group of English stockholders.

The entire basis upon which the British company was organized was as an instrument for the sale of petroleum produced in Mexico by American companies to England and other parts of Europe.

You are evidently under the impression that there is something improper, or at any rate unusual, in the organization of a company in England under the British laws for the purposes hereinbefore alluded to.

You will, however, find upon investigation that it is not only desirable from a commercial standpoint but in certain other aspects distinctly advantageous for American concerns desiring to do business in foreign countries to organize local distributing agencies under the laws of these respective countries. This is precisely what was done in this case and by many other American companies operating under similar conditions in foreign lands.

In this connection may I observe that the organization and operation of this British distributing subsidiary would seem to be clearly in line with what you desire to accomplish, inasmuch as it furnishes a means of selling in England and in Europe oil which otherwise might come to American ports.

5. "This is the same Doheny * * * it is reported from good authority sold to the English Government a large interest in its holdings in Mexico."

Neither Mr. Doheny nor any of his companies have ever sold to the British Government any interest whatsoever in any holdings in Mexico or elsewhere, or stockholdings in any of these companies.

6. "This is the same Doheny whose integrated companies produce more than 80 per cent of the crude produced in California."

As above shown, the California production in which Mr. Doheny is interested, either personally or as a corporate stockholder, is less than 2 per cent of the total production of the State.

7. You also allude, on page 5531, to the supposed result of the "oil business of this country gradually passing into the hands of these few mighty companies."

So far as Mr. Doheny and his companies are concerned, they have never operated in the mid-West, or, as above shown, been interested (except to a small extent) in California, and have not endeavored and are not endeavoring to acquire any oil business developed by the small or independent producers to whom you have referred in your speech.

8. I note that you allude to Mr. Doheny and others as "rapacious individuals" referred to in President Obregon's alleged statement.

The statement to which you refer (which was not written by President Obregon, but by an American journalist) is full of misstatements, which can be easily shown if time permitted. For the moment, I shall content myself by asking that you defer judgment as to the "rapacity" of Mr. Doheny until you have taken up, with some one familiar with the affairs of the Doheny companies, the amounts of their investments, the burdens which they have sustained and are sustaining, and the proportion of profits derived therefrom. You will then find that there is no foundation in fact for any such charge.

If you desire any further information upon any of the points above alluded to, or upon any other matters to which your speech refers, it would give me pleasure to assist you to the best of my ability.

In conclusion, may I express my hope and belief that in the light of the foregoing facts you will agree with me that it is just to Mr. Doheny, not only as a man but because of his patriotic services to this country, to put this letter upon the pages of the CONGRESSIONAL RECORD and to give it the same publicity as that which your speech will receive.

This letter is written by me during Mr. Doheny's absence in Mexico.

I am faithfully yours,

HERBERT G. WYLIE,
Vice President and General Manager,
Pan American Petroleum & Transport Co., Mexican Petroleum Co.

Mr. JONES of New Mexico. The Senator from Oklahoma also this morning referred to the manipulation of stocks, especially of the Mexican Petroleum Co. I have had my attention called to the fact that the managers of the New York Stock Exchange, after going into that matter, gave out this statement:

The result of our investigations into Mexican Petroleum has not disclosed any condition which would lead us to believe that the recent advance in the stock has been due to any other factor than a preponderance of buyers optimistic over the future of the company.

I know nothing about these facts at all, but I think even these people who are engaged in the oil business ought to be treated fairly in the matter. I have no personal knowledge of any of their affairs and I do not represent any of them one way or the other, but I mention these matters just so that it may be understood that there are two sides to the question, and that all of the innuendoes which might be suggested from the statement of the Senator from Oklahoma are perhaps worthy of more serious consideration before reaching a conclusion upon the subject.

Mr. HARRELD. Mr. President, I desire to say that I am not inveighing against Mr. Doheny personally, or against any other man personally. I have tried to marshal the facts as they are, and if the name of Mr. Doheny is brought in incidentally it is not a personal matter. I have no objection to having inserted in the RECORD anything he wants to have inserted.

Mr. JONES of New Mexico. I disclaim having any personal knowledge regarding the facts at all. I merely present these matters, which seems to me to be relevant to the discussion, for the consideration of those who are interested in the subject.

Mr. HARRELD. I do not know that I have much to say in addition to what I said this morning, except that I want to say this—that I have insisted upon this tariff on crude petroleum because I think that by every rule of the game it is entitled to the protection we are asking for. That duty should be imposed because of the revenue it produces. It should be imposed because it protects the labor in that industry, hundreds of thousands strong. The duty should be imposed because it will protect the public, in my judgment, against a thing which is absolutely breaking up the market in this country and demoralizing the market in refined products to such an extent that the public generally is suffering because of it in the way of high prices.

Referring to the statement that I was personally interested in this matter, I want to say that the bulk of what I own of this world's goods is not in the oil business at this time at all. In fact, not over 5 per cent of what I own to-day is invested in the oil industry. That is a very infinitesimal part of my personal interests. I repeat what I said this morning that, in my judgment, the public interest is so much bigger, the public is so much more concerned in this than I am, regardless of what certain fellows who are very prudent or prudish, whichever way you wish to put it, have to say, that I am going to vote for this amendment when it comes to a vote, and I will take the consequences.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Oklahoma [Mr. HARRELD].

Mr. HARRELD. I ask for the yeas and nays on this amendment.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. HALE (when his name was called). I have a general pair with the senior Senator from Tennessee [Mr. SHIELDS]. I am informed that if he were present he would vote as I do and I therefore feel at liberty to vote. I vote "nay."

Mr. STERLING (when his name was called). I have a general pair with the Senator from South Carolina [Mr. SMITH]. I understand that that Senator, if present, would vote the same way I intend to vote, and therefore I feel at liberty to vote. I vote "nay."

Mr. TRAMMELL (when his name was called). Making the same transfer of my pair as on the last ballot, I vote "nay."

Mr. WALSH of Montana (when his name was called). I transfer my general pair with the senior Senator from New Jersey [Mr. FRELINGHUYSEN] to the senior Senator from Tennessee [Mr. SHIELDS], and vote "nay."

Mr. WATSON of Indiana (when his name was called). Making the same announcement as before, I vote "nay."

The roll call was concluded.

Mr. OVERMAN. I transfer the general pair which I have with the senior Senator from Wyoming [Mr. WARREN] to the senior Senator from South Carolina [Mr. SMITH], and vote "nay."

Mr. POMERENE. Announcing my pair with my colleague [Mr. WILLIS] as heretofore, I transfer that pair to the senior Senator from Nebraska [Mr. HITCHCOCK], and vote "nay."

Mr. HARRISON. Making the same announcement as before, I vote "nay."

Mr. McCUMBER (after having voted in the negative). I desire to announce that my general pair, the junior Senator from Utah [Mr. KING], would vote as I have voted on this amendment.

Mr. EDGE. Making the same announcement as before, I vote "nay."

Mr. ERNST (after having voted in the negative). I have a general pair with the senior Senator from Kentucky [Mr. STANLEY]. That Senator would have voted as I have voted, and therefore I allow my vote to stand.

The result was announced—yeas 9, nays 45, as follows:

YEAS—9.

Broussard	Curtis	McNary	Nicholson
Bursum	Harreld	New	Stanfield
Capper			

NAYS—45.

Ashurst	Harrison	Moses	Simmons
Ball	Heflin	Newberry	Sterling
Borah	Jones, N. Mex.	Oddie	Sutherland
Brandegee	Jones, Wash.	Overman	Swanson
Calder	Kellogg	Pepper	Trammell
Cameron	Kendricks	Phipps	Underwood
Dial	Keyes	Pomerene	Wadsworth
Edge	Lenroot	Rawson	Walsh, Mont.
Ernst	Lodge	Reed, Mo.	Watson, Ind.
Fletcher	McCormick	Reed, Pa.	
France	McCumber	Robinson	
Hale	McKellar	Sheppard	

NOT VOTING—42.

Caraway	Gooding	Norbeck	Spencer
Colt	Harris	Norris	Stanley
Culberson	Hitchcock	Owen	Townsend
Cummins	Johnson	Page	Walsh, Mass.
Dillingham	King	Pittman	Warren
du Pont	Ladd	Poindexter	Watson, Ga.
Elkins	La Follette	Ransdell	Weller
Fernald	McKinley	Shields	Williams
Frelinghuysen	McLean	Shortridge	Willis
Gerry	Myers	Smith	
Glass	Nelson	Smoot	

So Mr. HARRELD's amendment was rejected.

Mr. LODGE. Mr. President, I desire to offer an amendment in paragraph 348, page 70. I desire to make an addition, and I hope the committee will be willing to accept it, to the snap fasteners and clasps there enumerated. I desire to add a new classification of an article made in large quantities which is a fastener, but which would not be covered by the language here. It is known as the "sewed-on fastener." It is not put on with rivets, but is sewed on. It is made in large quantities. I should like to have it added to the paragraph by adding after the words "ad valorem" the words "sew-on fasteners, 20 cents per gross."

Mr. FLETCHER. Mr. President, can the Senator tell us what the equivalent ad valorem would be?

Mr. LODGE. We give now on tape 60 per cent ad valorem.

Mr. FLETCHER. My inquiry is what the ad valorem equivalent would be for the rate which the Senator asks for 20 cents per gross.

Mr. LODGE. It would be a heavy duty.

Mr. ROBINSON. Mr. President, we can not hear the statement of the Senator from Massachusetts, not that he is not speaking distinctly, but because there is a great deal of noise in the Chamber.

The PRESIDENT pro tempore. The Senate will please be in order. Conversation on the floor must cease.

Mr. ROBINSON. Is the article on the dutiable list now?

Mr. LODGE. No; not by name.

Mr. ROBINSON. Within what class would it come?

Mr. LODGE. It comes under paragraph 348, snap fasteners of a different kind from the others enumerated.

Mr. SIMMONS. Mr. President, what is the article? I could not understand the statement of the Senator from Massachusetts.

Mr. LODGE. It is called a sew-on fastener, in the nature of a snap fastener, sewed on instead of being riveted.

Mr. McCUMBER. I wish to ask the Senator from Massachusetts, where we say in the paragraph "mounted on tape," if it would not mean whether it was fastened on by rivets or whether it was sewed on or in any other way, provided it was fastened on?

Mr. LODGE. This is a different type of fastener. If the Senator thinks it would be well to word it "mounted on tape, including sew-on fasteners," that would be very satisfactory.

Mr. McCUMBER. If we say "mounted or sewed on tape," I think that would cover it. I simply want to be certain that it does not cover buttons or clasps that are sewed on dresses.

Mr. LODGE. It is called a sew-on fastener. That means that it is sewed on. I will withdraw the suggestion I made if the Senator will allow it to be put in as he suggested.

Mr. McCUMBER. If the Senator would say "mounted or sewed," then it would read "mounted or sewed on tape."

Mr. LODGE. But they do not sew them on tape; they sew them on dresses. I want them in that title, "mounted on tape, including sew-on fasteners." It would give them the same rate.

Mr. McCUMBER. I shall not object to it. We can fix it up in conference.

Mr. LODGE. I will change it to the form, "mounted on tape, including sew-on fasteners."

The PRESIDING OFFICER (Mr. ODDIE in the chair). The question is on agreeing to the amendment offered by the Senator from Massachusetts.

Mr. FLETCHER. Let the amendment be stated.

The READING CLERK. In paragraph 348, on page 70, line 10, after the word "tape" insert "including sew-on fasteners" so as to read, "mounted on tape, including sew-on fasteners, 60 per cent ad valorem."

The amendment was agreed to.

Mr. LODGE. I have another amendment to offer. On page 134, paragraph 1007, "hose, suitable for conducting liquids or gases, composed wholly or in chief value of vegetable fiber, 17 cents per pound and 20 per cent ad valorem." The duty has been cut to 10 per cent. I do not know whether it will be necessary for me to go through the form of reserving it, or whether it can be amended at this time.

Mr. McCUMBER. I will simply state that the 17 cents per pound is the compensatory duty.

Mr. LODGE. Yes; I know that.

Mr. McCUMBER. And the 10 per cent was changed from 20 per cent, as being sufficient probably for protection.

Mr. LODGE. I was going to suggest restoring the House rate of 26 per cent ad valorem, which had been cut by the Senate to 10 per cent, but inasmuch as that was an amendment made in the Senate in Committee of the Whole, I suppose strictly it is not in order, except to reserve the amendment. I can not offer it, I am afraid, as an amendment now if anyone chooses to make the point.

Mr. McCUMBER. I do not know that I understand entirely the argument of the Senator from Massachusetts, but if he will scan the paragraph closely he will find that the House gave only 26 per cent ad valorem and gave no specific duty at all.

Mr. LODGE. The Senator is correct. They did not give a compensatory duty.

Mr. McCUMBER. We changed that to 17 cents per pound as a compensatory duty and 10 per cent ad valorem.

Mr. LODGE. The Senate raised very largely the rates on yarn, which makes it very much more expensive than it is here.

Mr. McCUMBER. But that is covered by the 17 cents a pound.

Mr. LODGE. I hope it is. If the Senator makes the point of order I shall have to reserve it for a vote in the Senate.

Mr. McCUMBER. I hope the Senator will do that.

Mr. LODGE. Very well; I reserve it for a vote in the Senate.

Mr. ROBINSON. Mr. President, if I correctly understand the parliamentary status, no amendment is now proposed by the Senator from Massachusetts to paragraph 1007?

Mr. LODGE. My amendment was to change the Senate committee amendment, but under the rule it can not be done. I have withdrawn it and will reserve it for a vote in the Senate.

Mr. ROBINSON. While the matter is being discussed, I should like to ask if the Senator from Massachusetts or the Senator from North Dakota can state whether the Senate amendment is a reduction or an increase over the House rate?

Mr. WADSWORTH. Mr. President, a point of order.

The PRESIDING OFFICER. The Senator will state the point of order.

Mr. WADSWORTH. No discussion is permitted on anything except what is pending before the Senate in the way of amendment.

Mr. LODGE. That is what the Senator from Arkansas is talking about.

Mr. WADSWORTH. There is no amendment pending on this question. If we are going back to discuss old amendments, we will never get through.

The PRESIDING OFFICER. The Chair sustains the point of order made by the Senator from New York.

Mr. ROBINSON. I merely wish to say that discussion had proceeded at some length——

Mr. WADSWORTH. The Senator from Massachusetts withdrew his amendment. So it is not pending.

Mr. ROBINSON. I was about to say that technically the point of order made by the Senator from New York is correct. The Senator from New York, however, has himself, in presenting the point of order, made an argument in violation of the rules of the Senate and the unanimous-consent agreement. The Senator from New York will therefore take a lecture back from the Senator from Massachusetts and the Senator from Arkansas as his compensation for his contribution to the debate.

Mr. LODGE. Mr. President, I have one other matter which I think can be disposed of, on page 104—barley. I should like to add, after the words "pearl barley," the words "patent barley." That is the way it is now classified and the duty is assessed. We have raised the duty, but the duty is now assessed, according to a letter which I have from the Secretary of the Treasury, under the provisions of paragraph 190 of the tariff act of October 3, 1913, which paragraph provides for that rate of duty upon barley—pearl, patent, or hulled. I simply want to put in the words "patent barley," so as to cover the situation.

The PRESIDING OFFICER. The amendment will be stated.

The READING CLERK. On page 104, line 8, after the words "pearl barley," insert a comma and the words "patent barley."

Mr. LODGE. That is following the Treasury classification.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Massachusetts.

The amendment was agreed to.

Mr. ASHURST. Mr. President, I offer the amendment which I send to the desk and ask the Secretary to report the same.

The PRESIDING OFFICER. The Secretary will report the amendment.

The READING CLERK. On page 236, after line 24, insert the following new paragraph:

PAR. 1671a. Tomatoes in their natural state, exported to the United States during the months of December, January, February, March, and the first 15 days of the month of April.

Mr. ASHURST. Mr. President, this amendment proposes that tomatoes imported into the United States during the months of December, January, February, and March shall be on the free list.

The reason for this amendment is as follows: Tomatoes from the west coast of Mexico reach American markets in the winter and do not come into competition with home-grown tomatoes. The Mexican crop does not enter into competition with the crop from Florida, California, or Texas.

I now ask to insert in the RECORD at this point a copy of the report of the American consul at Mazatlan, dated July 13, 1921. I also ask to include in the RECORD a copy of the statement of Mr. Frank J. Barry, of Nogales, Ariz., who represented the Nogales Chamber of Commerce before the Committee on Finance.

The PRESIDING OFFICER. Without objection, it is so ordered.

The matter referred to is as follows:

TOMATO CROP IN THE STATE OF SINALOA, MEXICO.

[Consul W. E. Chapman, Mazatlan, July 13, 1921.]

Tomato growers in the State of Sinaloa, Mexico, exported 923 carloads of tomatoes to the United States during the harvest season which began early in January and ended the latter part of May. There was an average of about 825 crates per carload, the crates averaging about 28 pounds each. There was, therefore, an average of about 23,300 pounds of tomatoes per carload, or a total of 21,455,900 pounds of tomatoes exported to the United States during the tomato season just closed.

The average gross price paid per crate in United States markets was $2.62. The costs of production, freight, etc., totaled about $1.83 per crate, giving a net profit per crate of $0.79 to the growers.

Taking these figures, which have been carefully obtained from the best sources of information available on the subject, it is apparent that the total net profits realized by the tomato growers on tomatoes exported to the United States during the season was $601,565.

COMPETITION WITH UNITED STATES TOMATO CROPS.

Nearly all of the tomatoes exported from the State of Sinaloa are marketed west of the Mississippi River, and for that reason, as well as the fact that the harvest begins during the first days of January, this crop is not a serious competitor of the Florida product, which is sold in the East, but it is quite impossible for Sinaloa producers to export at a profit 10 days after the California and Texas crops begin to flow to the markets. When the harvest of these crops begins the Sinaloa producers are forced to cease operations, no matter what quantity and quality of tomatoes they have on hand, as the freight and customs charges are so high and the selling price so low that they could only operate at a loss. The 94 cars of Sinaloa tomatoes were marketed in Texas before the crop in that State matured.

TOMATOES.

[Paragraph 770.]

STATEMENT OF FRANK J. BARRY, REPRESENTING NOGALES (ARIZ.) CHAMBER OF COMMERCE.

Mr. BARRY. Mr. Chairman and gentlemen, I am appearing as the representative of the Nogales (Ariz.) Chamber of Commerce. The reason that the Nogales Chamber of Commerce is interested in the matter I am representing them on is that we are located on the Mexican border.

Senator DILLINGHAM. What paragraph do you speak on?

Mr. BARRY. I speak on paragraph 770. We are located on the Mexico-Arizona border, at the town of Nogales, and through that point is imported all of the tomatoes grown on the west coast of Mexico. The growers of Mexican tomatoes are in the majority Americans, and a great many of them live in Nogales. Besides, those brokers who handle the products for the Mexican growers live in Nogales, and hence the interest of the Nogales Chamber of Commerce in the tomato business on the west coast of Mexico.

The American consul at Mazatlan has in the consular report of August 3, 1921, made a report on the Mexican tomato, and I would ask permission to file this in connection with my brief as a portion of it.

Senator MCCUMBER. That will be done.

Mr. BARRY. I am approaching this subject not as a free trader but as a protectionist; but I think that the circumstances of this particular situation, so far as the west coast of Mexico tomatoes are concerned, warrant some different duties than that provided in this tariff bill.

Senator SMOOT. Are you objecting to the 1 cent per pound?

Mr. BARRY. Yes, Senator.

Senator SMOOT. What do you want?

Mr. BARRY. We want it to remain as it is at present or better.

Senator MCCUMBER. What is it at present?

Mr. BARRY. At present it is 15 per cent ad valorem at the point of origin, which is about three-eighths cent per pound. It is valued by the customs authorities at Nogales at 2½ cents per pound, and 15 per cent of that is three-eighths cent per pound.

Senator MCCUMBER. You want to lower it?

Mr. BARRY. We want to have it lowered from 1 cent to the present rate; and if the committee would feel inclined to make it lower still, for the reasons I will show——

Senator SMOOT (interposing). Is that your brief?

Mr. BARRY. If I am permitted, I will read from the brief because I have it concisely stated there.

Senator SMOOT. There is no need of taking the time of the committee to read a brief, because they will have to go over that brief, and that is what they will find your figures from.

Senator MCCUMBER. Just give the basis for your position.

Mr. BARRY. As I stated, the present duty on tomatoes is 15 per cent ad valorem on the price of tomatoes at the point of origin, and that price is fixed by the customs authorities at 2½ cents per pound, and therefore the present duty is three-eighths cent per pound, coming into the United States.

The proposed bill raises this to 1 cent per pound, or an increase of five-eighths cent per pound, which is two and two-thirds times the present rate of duty.

As I stated, the records of our chamber of commerce at Nogales show that 77 per cent of the growers of tomatoes on the west coast of Mexico are Americans. I merely mention that for the purpose of showing that the industry affected is really an industry carried on by American citizens, many of whom reside in Nogales.

Tomatoes on the west coast of Mexico reach the United States during the months of December, January, February, March, April, and May.

There are no tomatoes grown in the United States, except possibly those that are grown in hothouses—and they do not amount to anything—during the months of December, January, February, or March. In April Florida produces tomatoes; next comes the Imperial Valley of California, and after that comes Texas.

Senator SMOOT. Does Arizona raise any tomatoes?

Mr. BARRY. Not to speak of, not for any outside consumption I know of. It does probably in the summer season, but not during those months I have mentioned. These winter tomatoes have been growing in Mexico now for some few years, probably 10 years.

Senator WATSON. You are an importer?

Mr. BARRY. No, sir; I am a director of the Nogales Chamber of Commerce, and I am sent here by them.

Senator WATSON. And they want to get tomatoes in from Mexico, do they?

Mr. BARRY. Yes, sir. It is to the interest of the community there, because the money received from those tomatoes is spent mostly there.

Senator MCLEAN. Do you make them into paste?

Mr. BARRY. No; they are imported only in the natural state.

Senator SMOOT. You say you are a resident of Nogales?

Mr. BARRY. I am a resident of Nogales.

Senator MCLEAN. Are those tomatoes sent East?

Mr. BARRY. They are sent to the Middle States; they do not come East. The cost of transportation is so high and the distance so far for a perishable commodity of this kind that it is inadvisable to send them East.

Senator MCLEAN. They come into this country in the months when there is no competition?

Mr. BARRY. That is the claim, and that is when they do come in; when competition might exist from Florida they never get into the Florida market, Florida being confined to the Atlantic Coast States, and only 4 per cent of the Mexico product last year reached the Atlantic Coast States; and, as I will afterwards show, the cost of production is so high that they can not compete with the Florida tomatoes.

Senator MCCUMBER. Are those tomatoes used for canning after coming into the United States?

Mr. BARRY. No; they are used for immediate consumption, for winter use only.

Senator MCLEAN. What is the retail cost?

Mr. BARRY. About 25 cents per pound retail.

Senator SMOOT. How many tomatoes do you want to bring over?

Mr. BARRY. Our people—probably a carload would be sufficient for a whole year locally.

Senator SMOOT. There are other sections of the country probably not fixed like you are, because you do not raise any, and they are raised right across the line. But there are people raising tomatoes in American and in competition with that foreign product.

Mr. BARRY. I beg your pardon; they do not raise them during the months that I speak of.

Senator SMOOT. It does not make any difference when they come over when they are sold or canned for future use.

Mr. BARRY. I know they do not can in Nogales. I am speaking of the whole consumption. They do not can any of these tomatoes. They are sold on the market, distributed in the natural state, and sold to the retailer in the natural state. It would be impossible to can tomatoes at a cost so great as these tomatoes bring on the market.

Senator MCCUMBER. But do you meet any competition that would result if we put them on the free list from other sections of the country——

Senator SMOOT (interposing). This does not apply to winter tomatoes. This applies to tomatoes of every kind.

Mr. BARRY. I know it does, and I distinguish in this argument that will follow between them and your summer tomatoes. We do not say the "summer tomato"; we propose that provision be put in section 770.

Senator SMOOT. You have not stated that.

Senator MCCUMBER. That is, that in certain months they shall not bear the same duty as those imported in other months; is that your claim?

Mr. BARRY. That is it, Senator.

Senator MCLEAN. You are in about the same fix as the potato men?

Mr. BARRY. I do not know anything about those potato men, Senator. Then, as I said, the Mexican crop does not enter into competition with Florida, California, or Texas. As a matter of fact, I have a number of letters from dealers in tomatoes in California, in Texas, and in the Northwest, urging that no increased tariff be put on Mexican tomatoes, and I think several Senators have been sent telegrams by their constituents and letters from those States along the same line.

As I stated before, only 4 per cent of this crop reaches the Atlantic Coast States, which is the market for the Florida tomato, and I may say that the Florida crop is not sufficient to supply the demand of the Atlantic coast. There is no competition whatever, therefore, between these tomatoes and the tomatoes that are raised in the United States during that period.

Moreover, the cost of producing and marketing these tomatoes is so high that they never can compete with the American-grown tomato. This is due mainly to the fact that it being a perishable product will not reach the market in a condition to be salable if it is not packed right. These tomatoes have to be packed in a certain condition in order that they may reach the market. Therefore, there are quite a number—probably one-half of the crop—that has to be laid aside at the time of picking, because it will not pack and ship, and they have no canning facilities in Mexico. Therefore, this is a great loss to the grower, and his cost is, therefore, much increased.

Senator MCCUMBER. What is the particular kind of tomato raised there?

Mr. BARRY. They raise several kinds. It is the same sort of American tomatoes.

Senator MCCUMBER. Will you give us the names of the different kinds raised?

Mr. BARRY. I could not, but I think they have the popular kinds used in the United States. I have heard them talk about Yellow Globe and a few of those other kinds.

Senator MCLEAN. You say they retail at 30 or 40 cents?

Mr. BARRY. I understand they retail for about 25 cents.

Senator DILLINGHAM. Where, in the North or South?

Mr. BARRY. In the Mississippi States, many of them going to Chicago.

Senator MCCUMBER. Is that a very large tomato that is raised there?

Mr. BARRY. No; it is not a large tomato. It is a medium-sized tomato, and hard. I can not say what they pay for them wholesale, understand.

Senator DILLINGHAM. At what price do they come into this country?

Mr. BARRY. In Chicago?

Senator DILLINGHAM. I mean where they are imported.

Mr. BARRY. There is no market there for them.

Senator DILLINGHAM. They have to be bought there, do they not, by somebody?

Mr. BARRY. When they buy them there they probably pay 15 cents a pound.

Senator DILLINGHAM. Are they shipped directly from Mexico to the Northern States?

Mr. BARRY. Yes, sir; they are shipped from the point of origin.

Senator DILLINGHAM. What is the wholesale price when they are shipped?

Mr. BARRY. When they are shipped it is about 8 or 9 cents a pound, at the market, in carload lots.

Senator MCLEAN. And the wholesaler gets about 15 or 20 cents in Chicago?

Mr. BARRY. I suppose so; I do not know. I am informed that it costs about 25 cents a pound to the final consumer. In addition to these packing costs they have high transportation charges, of course, coming from all the way down in Mexico. They have about 800 or 900 miles haul below the border, coming up from to Chicago, going up to the Northwest and to Washington State, and coming to Kansas City and to those other points where the consumption takes place.

Therefore, as a protective measure there is no necessity whatever for a tariff on Mexican-grown tomatoes that do not come in competition with our native product; and the cost of production is so high that the native product can drive them off the market.

The only other reason, therefore, for increasing the tariff on these tomatoes would be to increase our revenue, and that, of course, is an important matter to be considered.

During the last Mexican tomato season there were imported into the United States 24,272,000 pounds of tomatoes. That is the record that the Nogales Chamber of Commerce has, and the consul at Mazatlan states that the amount imported was 21,455,000. So we are practically agreed. Possibly some of these tomatoes came from Sonora and not from Mazatlan, where this consul is. There is only a difference of less than 1,000,000 pounds in their reports.

On that importation the Government of the United States received under the present rate of duty $91,020 in duties.

I am going to give you the costs of production of the La Louisiana farm owned by Americans, which is the only figures I could get. This is owned and run by Americans, and very economically and scientifically conducted, and here are the figures they give as to the cost of production of tomatoes.

Senator DILLINGHAM. That is located where?

Mr. BARRY. In the State of Sinaloa, Mexico, the second State below the border.

Senator MCCUMBER. That will be in your brief. Can you not give us your conclusion without going into it separately?

Mr. BARRY. The net profit to the grower, after paying all of the costs of growing, shipping, duties, and commissions is 0.4 cent per pound and a fraction; less than a half cent a pound they make in profit on them.

Senator MCLEAN. How many pounds are there to the bushel?

Mr. BARRY. They do not import in bushels.

Senator MCLEAN. I did not know but that you might know so that we could get that.

Mr. BARRY. They import in small crates of about 32 pounds to the crate, but they are not imported in bushels.

Senator MCLEAN. That crate holds a half bushel?

Mr. BARRY. If a bushel is 65 pounds it would be about half of it—32 pounds to the crate.

As I say, the profit to the grower on these tomatoes is less than a half cent a pound; and this does not take into consideration the interest on the grower's investment, nor does it take into consideration the bad seasons. Last season was a good one; the year before was a bad season. It was due to the fact that they had a Mexican strike on the railroads. Many cars of tomatoes were lost and rains came along at that time and not only destroyed the crop but also washed out railroad bridges, so that there were a number of cars destroyed, and consequently the cost of production was immeasurably increased.

If you deduct from this half cent per pound five-eighths of a cent duty you are going to absorb their entire profit and leave them a net loss of about one-fifth cent per pound.

Senator WATSON. Do we understand these tomatoes grow only in the wintertime?

Mr. BARRY. That is so.

Senator WATSON. And that they do not come in competition directly with the tomatoes grown anywhere else?

Mr. BARRY. No, sir; they do not.

Senator WATSON. And that you can not buy these tomatoes in the Salt River or Imperial Valleys or any other place in that part of the country?

Mr. BARRY. Not in any other place in that section.

Senator WATSON. Because they do not grow there in the wintertime?

Mr. BARRY. And the proof of that, Senator, is that the trade in California requests us—have written Senators urging that the duty be not increased on these Mexican-grown tomatoes.

Senator MCCUMBER. Your time is up, Mr. Barry, if you can bring it to a close now.

Mr. BARRY. I will, in just a minute. It may be asked, Can this price be passed on to the consumer? Of course, experience teaches that when you add five-eighths cent a pound to the cost of the tomatoes by duties, that by the time they reach the consumer that amounts up to several cents, and where the consumer is buying tomatoes at 25 cents a pound now he would then pay probably 30 cents a pound. Naturally that would reduce the consumption considerably. It is my opinion and it is the opinion of those familiar with this situation that it would reduce the consumption to about 25 per cent of its present quantity, which would be cutting off three-fourths of the present importations.

If you cut off three-fourths of the importation what do you do with your revenue? Assuming that you put it even at 1 cent a pound, you reduce your revenue at least $30,000 by the increase in tariff. There is no question about it but that three-fourths of the people down there would go out of business and that you would get $30,000 less on the importation of tomatoes by the increased duty.

Now, I have suggested that you put a proviso to your bill as follows: *"Provided,* That tomatoes imported in their natural state between the 15th day of December and the 15th day of May annually shall be admitted at three-eighths cent a pound duty," which is the present rate, or cheaper, if you can.

And I respectfully submit that to the committee.

BRIEF OF FRANK J. BARRY, REPRESENTING NOGALES (ARIZ.) CHAMBER OF COMMERCE.

The present duty on west coast of Mexico tomatoes of 15 per cent on a 2½ cents per pound valuation at point of origin is three-eighths cent per pound. The proposed bill raises this to 1 cent per pound, making an increase of five-eighths cent per pound or two and two-thirds times the present duty.

MEXICAN TOMATOES PRODUCED PRINCIPALLY BY AMERICANS.

The records of the Nogales (Ariz.) Chamber of Commerce show that 77 per cent of the tomatoes exported from the west coast of Mexico to the United States are raised by Americans. This being the fact, the plea of protecting American industry loses much of its force in the present case.

NO PROTECTIVE TARIFF NEEDED AGAINST MEXICAN TOMATOES.

Tomatoes from the west coast of Mexico reach American markets during the months of December, January, February, March, April, and May. No American-grown tomatoes are available for market during December, January, February, or March. Florida is the earliest State to produce tomatoes, but the Florida crop does not mature before April. The Imperial Valley in California follows Florida. Next comes Texas. No American State produces winter tomatoes, and the only winter tomatoes raised on the Western Continent are those produced on the west coast of Mexico.

Winter tomatoes have reached such a stage of popularity and are so wholesome a food as to be now properly classed as a necessity of our people. The Mexican crop does not enter into competition with the crop from Florida, California, or Texas. Florida's crop finds an ample market in the Atlantic Coast States, and by the time the California and Texas crops arrive the Mexican season is ended. Less than 4 per cent of the Mexican crop reaches the Atlantic coast markets. There is no competition in the market, therefore, between Mexican-grown tomatoes and those grown in the United States.

Moreover, the cost of producing and marketing Mexican tomatoes is so high that they can never successfully compete with the American product. This is due mainly to losses in the picking, packing, and shipping, because of the perishable nature of the commodity, high transportation costs, and import duties.

The imposition of an increased tariff on Mexican-grown tomatoes is unwarranted therefore as a protective measure from whatever angle the subject is viewed.

INCREASE OF TARIFF ON MEXICAN TOMATOES WILL REDUCE RATHER THAN INCREASE REVENUE.

The only other reason for increasing the tariff on Mexican tomatoes would be to increase the revenue. During the last Mexican tomato season there were imported to the United States from Mexico 24,272,000 pounds of tomatoes, on which the United States collected $91,020 in duties. One of the largest and most economically operated tomato farms in Mexico is "La Louisiana," at Los Mochis, Sinaloa, owned by Americans, and comprising 610 acres. The following is a table of the production and marketing costs for said farm for the last season:

	Per pound.
Cost of growing, including rent, interest, seed, labor, etc	$0.03550
Cost of packing materials and labor of packing	.01361
Cost of transportation, duties, and commissions	.03622
Total cost	.08533
Gross selling price	.08984
Net profit to grower	.00451

It will be seen that the grower's profit is less than one-half a cent per pound without taking into the calculation interest on his investment or bad seasons.

Now, if we add to the already high cost an additional five-eighths of a cent per pound, as is proposed, we find this entire net profit converted into a net loss of $0.00174, or nearly one-fifth of a cent per pound. The inevitable result will be the abandonment of the industry on the west coast of Mexico and the total loss to American consumers of a wholesome vegetable which has come to be a necessity of the winter table, as well as the loss to the United States of over $90,000 revenue.

It needs no further argument to show that as a revenue measure the proposed tariff would fail.

Can the selling price of tomatoes be increased so that the increased tariff may be passed along to the consumer? Possibly; but in such case the consumption would be greatly reduced, perhaps to less than one-fourth the present consumption. Experience teaches that when duties are passed on to the consumer they are many times multiplied on the way. Winter tomatoes at present cost the housewife about 25 cents per pound. Add five-eighths cent per pound to the present production cost and it is safe to say that the consumer will pay more than 30 cents per pound. Such a large increase in price may not kill the entire consumption but would be certain to kill three-fourths of it. What is the result? A net loss to the Government of over $30,000 per annum.

The importation of winter tomatoes should be encouraged rather than discouraged. Measures should be taken to reduce the price rather than increase it as long as no native industry suffers. The Government could well forego its tariff on such a desirable and necessary article of food during the winter season when fresh vegetables are unavailable. Certainly the importation should not be curtailed nor the price increased by an increase of duty. It is respectfully recommended, therefore, that winter tomatoes be placed on the free list or that the duty thereon be not to exceed three-eighths cent per pound.

The following proviso might be added to paragraph 770:

"*Provided*, That tomatoes imported in their natural state between the 15th day of December and the 15th day of May, annually, shall be admitted free of duty."

Mr. ASHURST. How much time have I consumed of my 15 minutes, Mr. President?

The PRESIDING OFFICER. The Senator from Arizona has consumed three minutes of his time.

Mr. ASHURST. Then, I have 12 minutes yet remaining?

Mr. SMOOT. The Senator has not that much time remaining if he yields the floor.

Mr. FRANCE. Mr. President, I desire to offer an amendment.

Mr. ASHURST. May a vote now be taken upon the amendment?

Mr. FLETCHER. Mr. President——

The PRESIDING OFFICER. The Senator from Arizona [Mr. ASHURST] has the floor. Does he yield?

Mr. ASHURST. I yield, with the understanding that I have 12 minutes yet remaining.

Mr. SMOOT. Let us have an understanding in regard to the unanimous-consent agreement. I understand that a Senator can speak only once and not more than 15 minutes upon any amendment, and 30 minutes upon the bill itself. I desire a ruling of the Chair on the question at this time.

Mr. JONES of Washington. I desire to suggest that the President pro tempore ruled that a Senator's 15 minutes might be divided into two speeches on amendments.

Mr. SMOOT. If the matter has been ruled upon, then I have not any more to say; but I wish it definitely understood at this time.

Mr. ASHURST. Then, I am perfectly composed, because I understand I still have 12 minutes remaining which I may consume at a later time if I do not do so now.

Mr. FLETCHER. Mr. President, with reference to the amendment of the Senator from Arizona [Mr. ASHURST], I desire to say that, of course, it merely means putting Florida-grown tomatoes on the free list, which would benefit Mexico and the West India Islands and perhaps Cuba; but tomatoes grown in all the other States would still bear a duty of 1 cent per pound. It may be California, possibly the extreme southern portions of Texas and Louisiana, produce tomatoes marketable in February or March. Florida tomatoes are ready for market in January, and the months of February and March are the months when prices are best. The industry can not survive if the winter markets are taken away by importations from tropical countries south of us. After the spring and summer come on Florida does not ship. The States north of us come in and transportation shuts us out. Hence, I say the amendment in effect provides that tomatoes shall be admitted free of duty as against Florida producers, but as to producers in all the other States they shall bear a duty of 1 cent a pound, or about 60 cents a crate. There could not be a more glaring case of rank discrimination.

I am not a protectionist; I do not advocate any duty merely for the sake of protection; but I desire to call attention to the fact that Florida can produce all the tomatoes that the whole country may need in the wintertime; that Florida is actually shipping to the Pacific coast in the winter months tomatoes, beans, peppers, eggplants, and vegetables of similar character. Florida is shipping during the winter months—she did so last season and does so every season in increasing quantities—clear to the Pacific coast, early vegetables. One of the best markets Florida has for winter vegetables is California, strange as it may seem. So that the section of the country of the Senator from Arizona may be supplied with tomatoes which are grown in his own country without the slightest difficulty and at very reasonable prices.

I do not see any particular reason for putting tomatoes on the free list, except, as I have said, that it would help Mexico, it may be. Of course, that is not the Senator's object; his object is to supply his own people with these early vegetables. However, the fact is that these vegetables are produced in this country, and in the winter months, and may be had without calling on Mexico or the West India Islands for them.

Mexico ought to be able to compete with Florida in Arizona and pay the duty provided in the bill.

Mr. ASHURST. I will read from the report of Consul W. E. Chapman, the American consul at Mazatlan, Mexico, dated July 13, 1921, a paragraph relating to tomatoes. I will read it for the hearing of my distinguished and learned friends, the two Senators from Florida, both of whom are here:

Nearly all of the tomatoes exported from the State of Sinaloa are marketed west of the Mississippi River, and for that reason, as well as the fact that the harvest begins during the first days of January, this crop is not a serious competitor of the Florida product which is sold in the East, but it is quite impossible for Sinaloa producers to export at a profit 10 days after the California and Texas crops begin to flow to the markets. When the harvest of these crops begins the Sinaloa producers are forced to cease operations, no matter what quantity and quality of tomatoes they have on hand, as the freight and customs charges are so high and the selling price so low that they could only operate at a loss. The 94 cars of Sinaloa tomatoes were marketed in Texas before the crop in that State matured.

The point I am endeavoring to make, Mr. President, is that during the time when Florida and other parts of our country are not furnishing tomatoes the Southwest is able to get winter-grown tomatoes from Mexico during the months specified in the amendment, and that if the duty of a cent a pound is not imposed thereby the people of the Southwest may have both summer tomatoes and winter tomatoes.

I need not take up the time of the Senate at this hour expatiating on the value of the tomato. It is within the common knowledge of many if not most persons that tomatoes are nutritious and wholesome; that they have laxative and anti-scorbutic properties.

Mr. McCUMBER. Mr. President, I think the Senator from Arizona is correct. Both Senators from that State have presented the matter to me. I do not believe that the tomatoes that come in from Mexico to supply the southwestern portion of the United States during the winter months seriously com-

pete with the product raised anywhere else in the United States, especially in December, January, February, and March. Possibly to some extent in April some tomatoes might go from Florida to southern California; but, as the Senator from Florida has suggested, I do not think it is a serious matter, as the Florida producers are dependent almost entirely upon the sale of their product in the eastern section of the United States. So I desire to say that I have no objection to the amendment proposed by the Senator from Arizona.

Mr. FLETCHER. Mr. President, I want it understood that Florida produces tomatoes beginning in December and continuing through January, February, March, April, and May. We can produce tomatoes in sufficient quantities to supply the whole country, so far as that is concerned. We have some patches down there of 1,200 acres and 2,000 acres, respectively, and a great many other smaller fields; indeed, some 4,000,000 acres in Florida are adapted to the growing of tomatoes, for that matter, in the winter, before they can be produced elsewhere in this country commercially and successfully. We are to-day actually shipping tomatoes and some of the early winter vegetables to the Pacific coast, as far, I think, as the State of Washington.

They are shipped to all portions of the country. They must move at a time when the other States are not ready for market. The amendment proposes to allow tomatoes grown in the islands south of us and in Mexico to come into our markets free of duty only at the time the Florida-grown tomatoes must be shipped. When our season is over and tomatoes grown elsewhere in the United States are ready for market, the foreign product will face a duty of 1 cent a pound. I submit no proposal could be more unjust, unfair, and discriminatory.

Mr. ROBINSON. Mr. President——

Mr. FLETCHER. I yield to the Senator from Arkansas.

Mr. ROBINSON. The Senator from Arizona [Mr. ASHURST] just read a statement, which was in evidence before the committee, to the effect that there is a period in the early part of the season when the Florida crop is not ready for market, when tomatoes imported from Mexico may be used in the Southwest. I am interested to know whether he concedes the accuracy of that testimony or whether he disputes it.

Mr. FLETCHER. I think what the letter read by the Senator said was that the Florida crop did not move west of the Mississippi during that time, not that it was not actually on the market or being produced, but that it did not move west of the Mississippi. If it said Florida tomatoes were not being marketed in the months of January, February, and March, he is mistaken. Shipments begin in January and the months named yield returns which make the industry possible. As to that, I will say that recently one of the large vegetable growers of Florida, who was here asking me to interest myself in securing through rates and service from Florida to California and the Pacific coast, said, "One of the best markets we are having for our early vegetables is in that region of the country." That statement surprised me very much, because I thought California produced those vegetables and supplied the market out there. I know we are shipping celery in the winter to Los Angeles and other points in California; we shipped carloads of it last winter, and we are shipping beans, and egg plants, and tomatoes to the same region. It is a mistaken notion that the Florida market is confined entirely to the north Atlantic section and the territory east of the Mississippi, because the Florida producers are now extending their market clear to the Pacific coast, and find there a great demand for their early vegetables during those particular months. I do not think there will be any difficulty about supplying the people there with tomatoes.

The amendment ought to be defeated because the effect is to discriminate grossly against one State. It says there should be free imports of a commodity as to one State alone, but dutiable as to all the other States. It means there shall be a tariff on an article as to all the States except one and as to that one there shall be no duty. Furthermore, in effect, it provides there shall be free trade for three months and protection for seven months of the year. It is indefensible in principle and unsound in policy. It can not be justified on any ground. I hope it will be defeated.

Mr. ASHURST. Mr. President, if the Senator from Florida will yield to me, for my time is exhausted——

The PRESIDING OFFICER. The Senator from Arizona has spoken twice.

Mr. ASHURST. I have spoken twice, Mr. President.

Mr. TRAMMELL. Mr. President, I see no reason why the law should be changed or modified so as to bring our domestic tomatoes in competition with the foreign product. If there are certain sections of this country which are entitled to protection in the interest of the tomato growers, there is no reason why a similar sense of justice should not actuate the Senate in dealing with the Florida product.

Unquestionably, if you remove the duty during the months of December, January, February, and March, you will allow tomatoes to come in free of duty at least for a part of the time that they are produced and marketed from the State of Florida, probably some of the far Southwestern States, and probably part of Louisiana. I very much hope the amendment will not be agreed to.

We know that the freight problem has a great deal to do with the question of distribution of the vegetable crops and fruit crops. I do not know at just what rate they would be able to transport tomatoes across the continent, but, as a matter of fact, in dealing with citrus fruits California is able to put its citrus fruits into the eastern market at practically the same rate of freight at which we are able to put the fruits from Florida into the eastern market. There is very little difference in the freight; probably a difference of only 12 to 15 or 16 cents per box. Of course, that seems like a great discrimination against Florida or in favor of California, or not a proper equalization of the rates, but, nevertheless, that condition exists. If you have a similar condition existing here, it will not be a question merely of supplying this little section of the country out West that is asking to have the law modified so that it can get in free tomatoes during a certain season, but it will enable this product to be brought all the way across the continent and into the eastern market and the middle western markets that are to-day largely supplied from the far South—from my State and other States.

Mr. ASHURST. Mr. President, will the Senator yield to me at that point?

Mr. TRAMMELL. Certainly, for a question.

Mr. ASHURST. I shall have to make a brief statement first to lead up to the question.

The tomatoes grown in Florida and shipped to California, as Senators will remember, bear the rate from terminal to terminal. In other words, if the Florida producer desires to ship a carload of tomatoes—and I think that would be 825 crates—to the terminal at Los Angeles, the freight would be considerably lower than it would if they were shipped 600 miles nearer, because we are mercilessly injured, in fact exploited, by the long-and-short-haul discrimination. So if the Senator's argument should prevail it would mean that if we got the tomatoes from Florida we would have to pay the freight from Florida to California and back to Arizona. This amendment, in addition to giving us winter tomatoes, would relieve us from the extortion of the long-and-short-haul discrimination.

I thank the Senator.

Mr. TRAMMELL. It is not only a question of the competition with the Florida product that might result from removing this duty so as to bring in tomatoes from Mexico, but lying to the south of Florida in Cuba. I do not know to what extent tomatoes are being produced there at the present time, but if a condition is brought about in this country that will permit the extensive engaging in the production of tomatoes in Cuba it will be a question of only a very short time until the Florida producer will have Cuba as a competitor. When Cuba becomes a competitor in any of these products she will be able to market them, of course, at a much less cost of production and at a freight rate as far as the eastern market is concerned less than that from Florida to many of the eastern markets on account of having water transportation from Habana to New York and Philadelphia and all of the large eastern cities.

Take the question of the pineapple industry: On account of cheaper freight rates the Cuban competition has almost destroyed the pineapple industry in my State, and I think it would be very unfortunate and very unjust to the people of Florida who are producing these early tomatoes to have the tariff removed for some two or three months and at a time when the Florida products are being marketed quite extensively.

I hope the amendment will not be adopted.

Mr. CAMERON. Mr. President, I have tried to be very consistent here in my votes, and this is the first time I have ever advocated placing any American-grown article on the free list; nor would I do it now if I did not think it would be beneficial in every way to the American people.

I have listened to the Senator from Florida [Mr. FLETCHER] and to my colleague from Arizona [Mr. ASHURST], and I have here a brief statement that I should like to present that, I think, will put this thing up to the Senate in an intelligent way. I do not mean that the remarks of the other Senators have not been intelligent, but this is concise and is gotten up

by the Chamber of Commerce of Nogales, and I should like to read it:

The records of the Nogales (Ariz.) Chamber of Commerce show that 77 per cent of the tomatoes exported from the west coast of Mexico to the United States are raised by Americans. This being the fact, the plea of protecting American industry loses much of its force in the present case.

Tomatoes from the west coast of Mexico reach American markets during the months of December, January, February, March, April, and May. No American-grown tomatoes are available for market during December, January, February, or March. Florida is the earliest State to produce tomatoes, but the Florida crop does not mature before April. The Imperial Valley, in California, follows Florida. Next comes Texas. No American State produces winter tomatoes, and the only winter tomatoes raised on the Western Continent are those produced on the west coast of Mexico.

Winter tomatoes have reached such a stage of popularity and are so wholesome as a food as to be now properly classed as a necessity of our people. The Mexican crop does not enter into competition with the crop from Florida, California, or Texas. Florida's crop finds an ample market in the Atlantic Coast States, and by the time the California and Texas crops arrive the Mexican season is ended. Less than 4 per cent of the Mexican crop reaches the Atlantic coast markets. There is no competition in the market, therefore, between Mexican-grown tomatoes and those grown in the United States.

Moreover, the cost of producing and marketing Mexican tomatoes is so high that they can never successfully compete with the American product. This is due mainly to losses in the picking, packing, and shipping, because of the perishable nature of the commodity, high transportation costs, and import duty.

I might state that these tomatoes are raised on the west coast of Mexico, something like five to seven hundred miles south of the international line—

The imposition of an increased tariff on Mexican-grown tomatoes is unwarranted, therefore, as a protective measure, from whatever angle the subject is viewed.

Mr. President, I take the stand that as these tomatoes grown on the west coast of Mexico do not in any way interfere with any of our products grown in the United States, either in Florida, in Texas, or in California, it is only just and right that the Senate should adopt the amendment offered by the senior Senator from Arizona and put tomatoes on the free list. I hope this will be done.

Mr. TRAMMELL. Mr. President, according to that telegram, it would seem that if you are going to remove the duty at all you should remove it for the entire year, because the information there furnished would indicate that there is no competition with the crop produced in any particular section of the country. I insist that if you are going to remove it for these particular months it should be removed for the entire year. I should like to have the question submitted in that way. If we are going to remove it, let us remove it entirely. Let us not select two or three months when the Mexican product comes into competition with the Florida product and admit tomatoes free into this country for that period only, and build up a tariff wall around the remainder of the year, so as to protect production in other sections of the country. There can not be any more highly discriminatory and unjust action on the part of Congress than to select the three months in which Florida produces tomatoes and say: "We will admit them free at this time, but we will have a tariff wall built around the other months of the year to protect other States."

If you remove the duty, you open up the question of importation not merely from Mexico but from Cuba, the West Indies, probably Nassau, and South American countries; and the first thing you know, if the protection is worth anything, you will have destroyed the industry in the State of Florida and in other extremely far Southern States where they produce tomatoes at a very early season. Those are the only months, as suggested by my colleague [Mr. FLETCHER], in which they make any money upon the production of tomatoes, because after the season is on in full force and the very large bulk of the crop is being marketed tomatoes are sold for such ridiculously low prices that they produce but little more than the cost of transportation and harvesting, and in a great many instances they do not even bring prices equivalent to that. That is the profitable season of the year, when they get into the early markets.

Mr. CAMERON. Mr. President, will the Senator yield?

Mr. TRAMMELL. I am sorry that I must decline to yield, because I have but a limited amount of time.

Mr. CAMERON. Just a moment.

Mr. TRAMMELL. I dislike to decline to yield, but I do not want to lose my time, and I have only 15 minutes.

Mr. CAMERON. I just wanted to say that I am rather surprised that the Senator from Florida should be asking for any protection whatever.

Mr. TRAMMELL. The Senator is often surprised. There is nothing surprising about his surprises. I am surprised that he is asking for free trade for three months in the interest of Arizona at the expense of the State of Florida. I have no objection to his seeking free trade, but I hope he will not try to place the entire burden upon the State of Florida. Distribute it equally throughout the United States. Remove the duty entirely, if you are going to remove it, or else do not discriminate against the Florida season. Those particular months are the only three months when the duty really is of any benefit to the State of Florida.

Mr. President, I submit that this amendment should not be adopted and this highly discriminatory action taken against the State of Florida in the interest of Arizona and a few other States that want to bring in tomatoes from Mexico. I hope therefore that the Senate will vote down the amendment.

The PRESIDENT pro tempore. The question is upon the amendment proposed by the Senator from Arizona [Mr. ASHURST].

Mr. TRAMMELL. I call for the yeas and nays.

The yeas and nays were ordered, and the Assistant Secretary proceeded to call the roll.

Mr. HARRISON (when his name was called). I have a general pair with the junior Senator from West Virginia [Mr. ELKINS]. Being unable to obtain a transfer, I withhold my vote.

Mr. OVERMAN (when his name was called). I have a general pair with the senior Senator from Wyoming [Mr. WARREN]. Not being able to obtain a transfer, I withhold my vote.

Mr. POMERENE (when his name was called). Announcing my pair with my colleague [Mr. WILLIS] as heretofore I transfer that pair to the senior Senator from Nebraska [Mr. HITCHCOCK] and vote "yea."

Mr. STERLING (when his name was called). I transfer my pair with the Senator from South Carolina [Mr. SMITH] to the Senator from Delaware [Mr. DU PONT] and vote "nay."

Mr. TRAMMELL (when his name was called). Making the same announcement as on the previous ballot in regard to my pair and its transfer, I vote "nay."

Mr. WALSH of Montana (when his name was called). Transferring my pair with the Senator from New Jersey [Mr. FRELINGHUYSEN] to the Senator from Rhode Island [Mr. GERRY], I vote "nay."

Mr. WATSON of Indiana (when his name was called). Making the same transfer as before, I vote "yea."

The roll call was concluded.

Mr. HALE. Making the same announcement as before, I vote "nay."

Mr. ERNST. Making the same announcement as that made on the last vote concerning my pair and its transfer, I vote "nay."

Mr. McKELLAR. I have a pair with the Senator from Indiana [Mr. NEW], and in his absence I withhold my vote.

Mr. EDGE. Making the same announcement as on the previous vote, I vote "nay."

Mr. CURTIS. I desire to announce the following general pairs:

The Senator from Missouri [Mr. SPENCER] with the Senator from Georgia [Mr. HARRIS];

The Senator from Minnesota [Mr. NELSON] with the Senator from Massachusetts [Mr. WALSH];

The Senator from California [Mr. JOHNSON] with the Senator from Georgia [Mr. WATSON];

The Senator from Illinois [Mr. McKINLEY] with the Senator from Arkansas [Mr. CARAWAY]; and

The Senator from Vermont [Mr. DILLINGHAM] with the Senator from Virginia [Mr. GLASS].

The result was announced—yeas 25, nays 24, as follows:

YEAS—25.

Ashurst	Harreld	Moses	Reed, Mo.
Bursum	Jones, Wash.	Myers	Simmons
Cameron	Kellogg	Nicholson	Sutherland
Capper	Kendrick	Norbeck	Watson, Ind.
Cummins	Keyes	Oddie	
Curtis	McCumber	Phipps	
France	McNary	Pomerene	

NAYS—24.

Ball	Fletcher	Lodge	Shortridge
Brandegee	Gooding	Pepper	Sterling
Culberson	Hale	Ransdell	Trammell
Dial	Heflin	Reed, Pa.	Underwood
Edge	Jones, N. Mex.	Robinson	Wadsworth
Ernst	Lenroot	Sheppard	Walsh, Mont.

NOT VOTING—47.

Borah	Harris	New	Spencer
Broussard	Harrison	Newberry	Stanfield
Calder	Hitchcock	Norris	Stanley
Caraway	Johnson	Overman	Swanson
Colt	King	Owen	Townsend
Dillingham	Ladd	Page	Walsh, Mass.
du Pont	La Follette	Pittman	Warren
Elkins	McCormick	Poindexter	Watson, Ga.
Fernald	McKellar	Rawson	Weller
Frelinghuysen	McKinley	Shields	Williams
Gerry	McLean	Smith	Willis
Glass	Nelson	Smoot	

So Mr. ASHURST's amendment was agreed to.

Mr. TRAMMELL. I desire to have reserved the right to have a separate vote upon the amendment just adopted when the bill gets into the Senate.

Mr. FRANCE. I offer an amendment which I send to the desk.

The PRESIDENT pro tempore. The Secretary will state the amendment.

The ASSISTANT SECRETARY. On page 3, line 7, to strike out the word "paracetaldehyde" and to insert in lieu thereof the words "and paracetaldehyde, 20 per cent ad valorem."

Mr. FRANCE. This merely slightly reduces the duty on some chemicals not manufactured in this country. I believe the chairman of the committee has no objection to the amendment, and I hope it may be adopted.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment.

The amendment was agreed to.

Mr. ASHURST. Mr. President, on page 113, line 16, after the words "natural state," I move to insert the words "not specially provided for."

The amendment was agreed to.

Mr. WADSWORTH. Mr. President, I offer the amendment which I send to the desk.

The PRESIDENT pro tempore. The Secretary will state the amendment.

The ASSISTANT SECRETARY. On page 105, line 9, the Senator from New York moves to strike out the words "and other," and on line 10, after the word "cereals" and the comma, to insert the words "malt sprouts and brewers' grains."

Mr. WADSWORTH. Mr. President, just a word of explanation. It will be noted that paragraph 731, on page 105, carries duties on the by-products of the milling of wheat and other cereals, dried beet pulp, malt sprouts, and brewers' grains. It will be noticed also that bran, shorts, and other by-product feeds obtained in milling waste or other cereals carry a duty of 10 per cent ad valorem, whereas malt sprouts, brewers' grains, and dried beet pulp carry a duty of $5 per ton.

The amendment which I offer has this effect: It withdraws the malt sprouts and brewers' grains from the $5 per ton duty, and includes those articles, along with bran, shorts, and other by-product feeds, at the 10 per cent ad valorem rate.

Here is the situation: Since the advent of national prohibition, no brewers' grains are made in this country. Prior to the advent of national prohibition, of course, it is well known that brewers' grains were an exceedingly valuable and popular cattle feed.

Mr. McCUMBER. Mr. President——

The PRESIDENT pro tempore. Does the Senator from New York yield to the Senator from North Dakota?

Mr. WADSWORTH. I yield for a question.

Mr. McCUMBER. Can the Senator give us any information as to the quantity of the importations of comparable articles?

Mr. WADSWORTH. I can not give the quantities of the importations. I know they are now being imported. They come, I think, almost entirely from Canada. They are not produced in this country. My criticism of the paragraph as written is that they bear a duty twice as high as bran, shorts, and middlings, and yet they are a stock feed which is needed by the live-stock feeders of the country just as much as are other feeds. Dried brewers' grains, of course, do not come into competition with any like product in this country, because we no longer make them.

Mr. SMOOT. As I understood the Senator's amendment, it was to strike out the words "or other."

Mr. WADSWORTH. "And other," simply to make it proper language. The paragraph would read as follows if my amendment were adopted:

Bran, shorts, by-product feeds obtained in milling wheat or other cereals, malt sprouts and brewers' grains, 10 per cent ad valorem.

Then a further corrective amendment, if mine were adopted, would have to be made in line 13 by striking out "malt sprouts and brewers' grains." My amendment as printed does not cover that.

Mr. SMOOT. As I caught the amendment when read at the desk, I understood it was to strike out "or other" in line 10, but the Senator says it is to strike out "and other" in line 9.

Mr. WADSWORTH. Yes.

Mr. SMOOT. That is all right.

Mr. McCUMBER. I would ask the Senator if he has made any computation as to what difference it would make in the equivalent ad valorem duty.

Mr. WADSWORTH. Yes. Brewers' grains are now quoted to American importers at $19 and some cents per ton.

Mr. McCUMBER. Is not the Senator mistaken about that being the dried price?

Mr. WADSWORTH. No.

Mr. McCUMBER. My information is that that is the price on the wet, but that the dried, which is covered by the Senator's amendment, comes in at about $50 per ton.

Mr. WADSWORTH. No; the Senator is mistaken. I hold in my hand a letter in which that quotation is made. I have seen correspondence between the importer and the Canadian producer in which the quotation was made at $19 and some cents per ton. A duty of $5 a ton is 25 per cent ad valorem. I can see no excuse for assessing a duty of 25 per cent ad valorem on cattle feed highly prized by American live-stock men while bran and other cattle feeds, which have not the same protein content or the same feeding value, bear a duty of only 10 per cent ad valorem. My proposal is to let them all carry a duty of 10 per cent ad valorem. I think it will be for the benefit of the live-stock industry and certainly it will hurt no one.

The PRESIDENT pro tempore. If there be no objection, the two amendments offered by the Senator from New York will be considered as a single amendment. The Chair hears no objection.

Mr. McCUMBER. Mr. President, I have the figures here. Here is what the Summary of Tariff Information says: Dried grains and malt sprouts, quantity, 217 tons in 1918, at a value of $13,394. Certainly that would be more than $50 a ton. In 1919 the amount was 1,960 tons valued at $125,886. Of course, that is a high price. Taking the nine months of 1921 we imported 90 tons at $4,852. That would certainly be more than $50 a ton. Ten per cent ad valorem would be about $5, and that is the same as it is now at $5 per ton.

Mr. WADSWORTH. I have not implicit confidence in my own calculation. I only know that I have seen the correspondence between the Canadian producers of the brewers' grains and the people of the United States who have been importing it, and they want to continue to import it. Under this duty it is shut out. Notice is served that it can no longer be done. If that is the purpose of the committee it is accomplished by rejecting the amendment.

Mr. SMOOT. That is true as to the wet malt sprouts and brewers' grains, but, of course, if it is $5 a ton it would come in dry, and the dry is worth $52 a ton. The way the committee framed the provision it is true that no wet malt sprouts or wet brewers' grains could come in at the price of $19, but the dry is worth $50, and the committee sought to have a 10 per cent ad valorem duty upon it the same as the other.

Mr. WADSWORTH. I am surprised that there is such a spread between the wet and the dry brewers' grains.

Mr. SMOOT. There is almost 50 per cent difference in the wet and dry.

Mr. WADSWORTH. In valuation?

Mr. SMOOT. No; in weight. Of course, the weight makes the same spread in price and a little more, because they have to dry it. I can see what the Senator's correspondents want. No doubt they ship theirs from Canada in the wet form and it is used immediately.

Mr. WADSWORTH. Yes. Let me quote from one paragraph of a letter. This is not the only one I have. I am sorry I have not the others with me. This correspondent says:

The proposed rate of $5 per ton will, if finally adopted, prohibit the importation of dried grains from Canada.

The other correspondence which I have from other people involved tells exactly the same story.

Mr. SMOOT. We do know that the valuation of those coming into this country in 1921 was $52 a ton for dried malt sprouts and dried brewers' grains. That is the value of those which came in in 1921.

Mr. WADSWORTH. My proposal is to assess an ad valorem duty of 10 per cent. Whatever the value is they would pay accordingly. I want them on the same basis as other feeds. What harm can be done in assessing a duty of 10 per cent ad valorem? That is the purpose of my amendment.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment offered by the Senator from New York.

The amendment was agreed to.

Mr. WADSWORTH. That amendment having been made, it will be necessary to strike out of line 13 the words "malt sprouts, brewers' grains, and," so that it would read "dried beet pulp."

Mr. McCUMBER. It will be necessary to reconsider the vote by which the amendment was adopted.

The PRESIDENT pro tempore. Is there objection to reconsidering the vote by which the amendment in line 13, page 105, was adopted? The Chair hears none. The question now is upon the motion of the Senator from New York to strike out the word "and" in that amendment.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The ASSISTANT SECRETARY. The Senator from New York now proposes to strike from the House text the words "malt sprouts, brewers' grains" and the comma.

The amendment was agreed to.

Mr. STERLING. Mr. President, I offer the following amendment:

The PRESIDENT pro tempore. The Secretary will report the amendment offered by the Senator from South Dakota.

The ASSISTANT SECRETARY. On page 77, at the end of line 14, paragraph 360, add the following additional proviso:

Provided further, That all such articles imported for educational institutions and to be used solely for educational purposes shall be admitted free of duty.

Mr. STERLING. The proposed amendment follows the paragraph which provides for a duty upon philosophical, scientific, and laboratory instruments, apparatus, and so forth, and a very high tariff, too, I think. The tariff on these instruments has been increased about 120 per cent over what it has been heretofore—that is, upon these instruments generally. The proposition involved in the amendment is to exempt from a tariff duty the philosophical and scientific instruments, apparatus, and so forth, which are imported for educational institutions and used solely for educational purposes, and to put them on the free list. This has been done, as I understand it, for a great many years. Indeed, I do not recall when scientific instruments, used solely for educational purposes by educational institutions, had to pay a duty. I think whatever we may do in regard to other articles, whether they be articles of food, clothing, shelter, ornament, or what not, these articles, which are the very direct means and instrumentalities of education in educational institutions, should not have to bear the burden of a tariff duty.

I hope that the amendment will prevail. It is in accord with our practice heretofore to put these instruments and appliances on the free list.

Mr. President, in connection with my remarks I send to the desk a resolution adopted by the American Association for the Advancement of Science. I ask that it may be read.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and the Secretary will read as requested.

The Assistant Secretary read as follows:

THE AMERICAN ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE—DUTY ON SCIENTIFIC APPARATUS FOR EDUCATIONAL INSTITUTIONS.

The following resolutions regarding duty-free importation of scientific materials and scientific books in the English language into the United States by educational institutions have been passed by the American Association for the Advancement of Science:

"Whereas the scientific education of the youth of the United States is among the most fundamental and important functions of the Republic, education being the only means by which the advantages of present civilization may be surely transmitted to coming generations of citizens and by which the future progress of the Republic may be assured; and

"Whereas the prosecution of the said scientific education of the youth requires unrestricted employment of the apparatus and materials of science in educational institutions, this being increasingly true for more advanced education; and

"Whereas the scientific materials and apparatus to be used in educational institutions ought to be selected as far as possible without consideration of their place of origin, since science is world-wide in its scope; and

"Whereas any increase in the cost of scientific equipment for education is to be greatly deplored, since the funds available for its purchase by educational institutions are invariably inadequate in comparison with the great needs and possibilities of education; and

"Whereas institutions for higher education must still be relied on for the most fundamental and far-reaching steps in the advancement of knowledge through the scientific researches of their faculties and students; and

"Whereas both financial and patriotic considerations clearly require that the Republic should aid fundamental scientific research in every possible way, especially avoiding the erection of artificial barriers across the path of the advance of true knowledge; and, finally,

"Whereas, in consideration of the foregoing clauses, the American Association for the Advancement of Science, with its 12,000 members, almost all of whom are citizens of the United States—representing the fundamental scientific interests of the country from the standpoint of scientific research as well as from that of instruction, and representing especially the institutions for higher education and their staffs—views with very serious concern the proposal to repeal section 573 of the tariff act of October 3, 1913, which allows the duty-free importation of scientific materials by educational institutions: Therefore be it

"*Resolved,* That the American Association for the Advancement of Science respectfully calls the attention of the Congress of the United States to the very great hindrance and burden that would be imposed upon the scientific education and research in the Republic if its educational institutions were to be deprived of the privilege of duty-free importation of scientific apparatus and materials, which they have enjoyed for many years; and be it further

"*Resolved,* That the American association also respectfully urges the restoration of the corresponding privilege of duty-free importation of single copies of scientific books in the English language by recognized educational institutions and the faculties, such books constituting an important item of both institutional and personal equipment for advanced instruction and research, especially since it is undesirable that scientific publications in languages other than English should be artificially favored in the United States; and be it finally

"*Resolved,* That these resolutions be forwarded to the proper committees of the Congress of the United States, to the National Academy of Sciences, to the National Research Council, and to the secretaries of the scientific societies affiliated with the American association, that they be published in Science, official organ of the association, and also that they be sent to each member of the association."

The PRESIDENT pro tempore. The question is on agreeing to the amendment of the Senator from South Dakota.

Mr. SMOOT. Mr. President, it is true that in two preceding tariff bills these items have been put upon the free list. This industry was developed during the World War. The committee in the House of Representatives in considering the question of giving to educational institutions the privilege of importing these articles into the United States free of duty, after a thorough examination, decided it was wise to place them on the dutiable list. Your committee gave the question a great deal of consideration, and it developed beyond doubt that this privilege had been outrageously abused at times by the officials of a number of educational institutions in the United States.

I can not see why an educational institution desiring an instrument such as is covered by paragraph 360 should not pay the same rate of duty that is paid by others, if it is desired to maintain the industry in this country.

It is claimed by the manufacturers that the rates of duty which have been agreed upon are not sufficient, but the committee thought that, taking all things into consideration, they were sufficient. If we now open the door, however, to every professor and all of his relatives and friends, because of the fact that he is a member of the faculty of an educational institution, and give them the privilege of importing these goods into the United States free of duty, we might just as well put them on the free list.

I do not know that it is necessary to say anything more. The committee feel that if this amendment should be agreed to, the action of the committee of the Senate would be virtually annulled. Therefore I hope the amendment will not prevail.

Mr. UNDERWOOD. Mr. President, I can very easily visualize the position of the Senator from Utah and understand why he so earnestly opposes this amendment. Of course, the Senator from Utah looks at the pending bill primarily as a measure to throw its sheltering arms over all the industries of this country and, without check or balance, allow those industries to extract dollars from the American people. I am not surprised that surgical instruments, which are necessary in the hospitals of the country to take care of the sick and the needy, should be taxed. The Senate has already agreed to tax the bread which goes into the mouths of the poor; it has agreed to tax the doll in the baby's cradle, in order to grant a monopoly to an American industry. It is nothing but in keeping with that line of action and with that line of thought that the Senate should now reach into the hospitals and take from the surgeon's or the scientist's hand the instrument which is used to preserve and to safeguard the lives of the American people. It is in entire accord with what the Senate has heretofore voted to do. Notwithstanding that, Mr. President, I am opposed to the amendment.

I regard the levying of taxes at the customhouse as primarily being for the purpose of raising revenue to operate this great Government of ours, and any benefit that may accrue to industry from the levying of those taxes as an incident, but in levying taxes and in raising revenue to maintain the great Government of the United States, even if it is desired to go into the domain of protection, I think there should be some discretion used; that we should not say that everything shall be blanketed with prohibitive taxes.

Mr. President, the Senator from Utah has indicted the honesty and the integrity of the faculties and staffs of the great hospitals of America. They have been allowed to import into this country without taxation the instruments which are necessary for use in time of sickness.

Mr. SMOOT. The Senator from Utah only repeated the testimony that was given before the Committee on Finance, I will say to the Senator from Alabama.

Mr. UNDERWOOD. Then he repeated an indictment which I do not believe will stand. Some partisan witness may have appeared before the Finance Committee to indict the men who have heretofore enjoyed this privilege by saying that they have abused it—that is very easy to say—but the law provides that these instruments, which are intended to save the sick of America, may only be imported free of duty when they are to be used for medical and scientific purposes.

Mr. SMOOT. Mr. President, there is not a surgical or dental instrument which is embraced in paragraph 360. Those instruments are provided for in another part of the bill. This paragraph refers only to instruments which are used for philosophical, scientific, and laboratory purposes. This paragraph

does not embrace in any way whatever instruments which are to be used by the surgeon, the dentist, or the physician.

Mr. UNDERWOOD. Mr. President, it is all the same thing. The present law provides both for the instrument which is used for scientific purposes and the knife of the surgeon. What is the difference whether we shall tax the knife or shall tax the X-ray instrument which is used to ascertain when the surgeon shall use the knife? What is the difference whether we tax the instrument which is used to cut or we tax the instrument which is intended to ascertain whether or not the surgeon should cut or whether the patient has a fever or what is necessary in order to cure him? It is all the same thing. These are all necessary for the life and health of the people of this country.

What I contend, however, is that the Senator from Utah, in order to make his case good, has indicted on the floor of the Senate—that is, he has passed on the indictment of some prejudiced witness who has appeared before the Finance Committee—a class of men whose character stands among the highest in America. There are many professors and scientific men in the great colleges and hospitals of America who are giving their lives, at small salaries, in order to fight the battle to safeguard and save the lives of the people of America. One does not find any millionaires among them; one does not find a class of men who, as the object of their lives, are fighting in order to make dollars. They are a class of men who are sacrificing their lives and giving their time and their opportunity to aid the people of America. Now, the Senator from Utah comes here with an indictment and says that this privilege should be taken away from these men because they violate the law. When these men import instruments for scientific purposes they are required to make affidavit at the customhouse that those instruments are brought in for such purposes. When the Senator from Utah makes the statement which he has made he indicts as perjurers the faculties of great colleges and the staffs of the hospitals of America.

Mr. President, I do not believe that indictment can be sustained; I do not believe that it is true. In some particular instance a guilty man may be found; unfortunately throughout human life, among the very best classes, there is found one occasionally who has fallen by the wayside; but I say that the indictment is unjust; I say that it is unjustifiable.

So far as the revenue to the Government which is to be derived from this tax is concerned, it will be infinitesimal in the gathering of the great revenues of the country, but to the poor scientist, who lives on a meager salary, and who has accumulated none of the dollars of the rich, a tax of $30 or $40 may mean the difference as to whether or not he may go on and pursue the research to which he is giving his life for the benefit of the American people. To retain this clause in the bill would be only to make one more indictment against the bill and not against the scientific men of America.

Mr. POMERENE. Mr. President, I hope the amendment of the Senator from South Dakota [Mr. STERLING] will prevail. I am quite certain that every Senator knows that the colleges and universities of the land have been almost impoverished in the last three or four years. Many of them had endowment funds which were sufficient under conditions as they existed seven or eight years ago, but they are not sufficient now. The college professors are the poorest-paid men in the country. What is their work? They are trying to prepare the young men and young women upon whose shoulders will rest the responsibility of the future; and under these circumstances there are a few men who come in here and insist that these facilities which are to be used in the preparation of the young men and the young women of the country shall be further taxed for their financial benefit. I protest against it. The Senator from Utah says that the physicians and the dentists are cared for in another section. Perhaps that is so in part; but everyone knows that the laboratory is necessary in the life of every physician and surgeon when it comes to the diagnosis and treatment of diseases.

Mr. President, this is one of the propositions on which in my mind there is only one side. If we believe in the intellectual development of the coming generation, let us not obstruct it by making it harder for the young men and the young women of the country to get their education. Then we have a lot of splendid men who are looking for objects of charity and are willing to give endowments to these various colleges and universities. Why should they be compelled to pay, out of their beneficence, higher prices for these instruments and scientific works which are so much needed?

I hope the amendment will prevail.

The PRESIDENT pro tempore. The question is upon the amendment of the Senator from South Dakota [Mr. STERLING].

Mr. UNDERWOOD. I ask for the yeas and nays.

The yeas and nays were ordered, and the Assistant Secretary proceeded to call the roll.

Mr. DILLINGHAM (when his name was called). I have a general pair with the junior Senator from Virginia [Mr. GLASS]. In his absence, not knowing how he would vote, I withhold my vote.

Mr. HALE (when his name was called). Making the same announcement as before, I vote "nay."

Mr. POMERENE (when his name was called). Again announcing my pair with my colleague [Mr. WILLIS], I am advised that if he were present he would vote as I intend to vote. I therefore feel at liberty to vote, and vote "yea."

Mr. TRAMMELL (when his name was called). Making the same announcement as before of the transfer of my pair, I vote "yea."

Mr. WALSH of Montana (when his name was called). I transfer my pair with the Senator from New Jersey [Mr. FRELINGHUYSEN] to the Senator from Rhode Island [Mr. GERRY], and will vote. I vote "yea."

Mr. WATSON of Indiana (when his name was called). Transferring my general pair with the senior Senator from Mississippi [Mr. WILLIAMS] to the junior Senator from Delaware [Mr. DU PONT], I vote "nay."

The roll call was concluded.

Mr. EDGE. Making the same announcement as before as to the transfer of my pair, I vote "nay."

Mr. ERNST (after having voted in the affirmative). Making the same announcement as before as to the transfer of my pair, I will let my vote stand.

Mr. CURTIS. I desire to announce that the Senator from Pennsylvania [Mr. PEPPER] is detained on official business.

I also desire to announce the following general pairs:

The Senator from Michigan [Mr. TOWNSEND] with the Senator from Wisconsin [Mr. LA FOLLETTE];

The Senator from California [Mr. JOHNSON] with the Senator from Georgia [Mr. WATSON];

The Senator from Illinois [Mr. MCKINLEY] with the Senator from Arkansas [Mr. CARAWAY];

The Senator from Minnesota [Mr. NELSON] with the Senator from Massachusetts [Mr. WALSH]; and

The Senator from Missouri [Mr. SPENCER] with the Senator from Georgia [Mr. HARRIS].

The result was announced—yeas 30, nays 26, as follows:

YEAS—30.

Ashurst	Heflin	Norbeck	Smith
Cameron	Jones, N. Mex.	Overman	Sterling
Capper	Kellogg	Pomerene	Swanson
Cummins	Kendrick	Ransdell	Trammell
Dial	Lodge	Reed, Mo.	Underwood
Ernst	McKellar	Robinson	Walsh, Mont.
Fletcher	Moses	Sheppard	
Harreld	Myers	Simmons	

NAYS—26.

Brandegee	Hale	New	Smoot
Broussard	Jones, Wash.	Newberry	Sutherland
Bursum	Keyes	Nicholson	Wadsworth
Calder	Lenroot	Oddie	Warren
Curtis	McCumber	Phipps	Watson, Ind.
Edge	McLean	Reed, Pa.	
Gooding	McNary	Shortridge	

NOT VOTING—40.

Ball	Frelinghuysen	McCormick	Shields
Borah	Gerry	McKinley	Spencer
Caraway	Glass	Nelson	Stanfield
Colt	Harris	Norris	Stanley
Culberson	Harrison	Owen	Townsend
Dillingham	Hitchcock	Page	Walsh, Mass.
du Pont	Johnson	Pepper	Watson, Ga.
Elkins	King	Pittman	Weller
Fernald	Ladd	Poindexter	Williams
France	La Follette	Rawson	Willis

So Mr. STERLING's amendment was agreed to.

Mr. SMOOT. Mr. President, in paragraph 304, on page 53, line 1, I move to strike out "25" and insert "20."

The PRESIDENT pro tempore. It will be necessary to reconsider the vote by which the committee amendment at that point was agreed to.

Mr. SMOOT. Yes; I ask unanimous consent to reconsider the vote by which it was agreed to.

The PRESIDENT pro tempore. Is there objection to the reconsideration? The Chair hears none, and it is reconsidered. The question now is upon the amendment offered by the Senator from Utah to the amendment of the committee, which will be stated.

The ASSISTANT SECRETARY. On page 53, line 1, it is proposed to strike out "25" and in lieu thereof to insert "20."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

Mr. SMOOT. On the same page, line 12, in paragraph 305, I ask that the vote by which the amendment was agreed to be

reconsidered, and in place of "10 per cent" I move to insert "8 per cent."

The PRESIDENT pro tempore. Is there objection to the reconsideration of the vote by which this amendment was agreed to? The Chair hears none, and it is reconsidered. The amendment to the amendment will be stated.

The ASSISTANT SECRETARY. On page 53, line 12, it is proposed to strike out "10" and in lieu thereof to insert "8."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

Mr. SMOOT. On page 165, in paragraph 1215, an amendment was agreed to yesterday striking out "10 cents per pound" and inserting "10 per cent ad valorem"; but inadvertently I did not ask to strike out the following words, "but not less than 15 per cent ad valorem." I now ask that the words "but not less than 15 per cent ad valorem" be stricken out.

The PRESIDENT pro tempore. Is there objection to the reconsideration of the vote by which the committee amendment was agreed to? The Chair hears none, and it is reconsidered. The amendment to the amendment will be stated.

The ASSISTANT SECRETARY. In the second line of the inserted amendment it is proposed to strike out the words "but not less than 15 per cent ad valorem."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

Mr. CALDER. Mr. President, on page 35, in paragraph 209, I submit the following amendment: In lines 7 and 8, strike out the words "one-half of 1 cent per pound" and insert in lieu thereof "25 per cent ad valorem."

The PRESIDENT pro tempore. The amendment of the Senator from New York will be stated.

The ASSISTANT SECRETARY. On page 35, lines 7 and 8, in paragraph 209, it is proposed to strike out in the House text the words "one-half of 1 cent per pound" and in lieu thereof to insert the words "25 per cent ad valorem."

Mr. ROBINSON. Mr. President, I inquire of the Senator from New York if he can state the ad valorem equivalent of the rate now in the bill, one-half of 1 cent per pound?

Mr. CALDER. The rates now in the bill run from about 30 per cent to 110 per cent, depending, of course, upon the value of the imports. Talc comes in from different countries, of course, at different prices, different grades of talc. It comes in at $9, $10, $13, $22, $24, $26, and $32 a ton, with a specific rate that would make the equivalent ad valorem from 30 to 110 per cent.

Mr. ROBINSON. The amendment proposed by the Senator from New York is a substantial reduction in the rate in the House provision?

Mr. CALDER. It is.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment offered by the Senator from New York.

Mr. POMERENE. Let the amendment be stated.

The ASSISTANT SECRETARY. On page 35, lines 7 and 8, in the House text, strike out the words "one-half of 1 cent per pound" and in lieu insert "25 per cent ad valorem," so that if amended it will read:

PAR. 209. Talc, steatite or soapstone, and French chalk, crude and unground, one-fourth of 1 cent per pound; ground, washed, powdered, or pulverized (except toilet preparations), 25 per cent ad valorem.

The amendment was agreed to.

Mr. SMITH. Mr. President, on page 6, line 14, paragraph 15, I propose to amend, where it provides 1 cent a pound on calcium carbide, so that it shall be $5 a ton. With the proposed rate of duty the tariff will be $20 per short ton.

Calcium carbide, as all Senators know, is used for the production of artificial lights in about 340,000 homes in this country. It is also used in oxy-acetylene welding for the purpose of welding iron.

The statistics as to the domestic production are not available, for the reason that great quantities of this material are used in what is known as cyanamide. That is a form of calcium cyanide used in the production of fertilizer, but the history of the Union Carbide & Carbon Corporation is very interesting, because of its incorporation, about 22 years ago, with a capitalization at that time of something like $14,000,000, it has absorbed, and owns directly or indirectly, the Union Carbide Co., the National Carbon Co., the Linde Air Products Co., the Prest-O-Lite Co., the Electro-Metallurgical Co., and the Oxweld Acetylene Co. It also controls the Michigan Northern Power Co., the Union Carbide Co. of Canada, the Electric Furnace Products Co., the Oxweld Railroad Service Co., the Haynes Stellite Co., and the Dominion Oxygen Co. (Ltd.).

It is also interesting to note that their dividends for the last 11 years have amounted to $37,924,211.75. As I understand, and as the figures which have been furnished me indicate, it owns about 83 per cent of all the carbide production in this country. According to the report of the Tariff Commission, there were exported to Cuba, South America, Mexico, and Canada about 30,000,000 pounds, making about 15,000 short tons. As I understand, the Union Carbide Co. owns the plant just across the Niagara River in Canada. That company has been able to increase its capital and absorb other and competing companies until to-day it is estimated that its capital stock is about $257,133,300.

There is no competition to speak of, because during all the period of its life the carbide has been upon the free list, and the company has increased its capital from something like $14,000,000 to something like $257,000,000 and has paid out in the form of dividends $37,924,211.

In view of the fact that the country homes, those the owners of which are unable to put in any form of electric lighting, Delco, or other similar systems, are dependent upon this cheap form of lighting——

Mr. WADSWORTH. Does the Senator say that the Delco is dependent upon this?

Mr. SMITH. No; I said that the homes which could not afford a Delco plant would use acetylene light, because they can get a drum of this calcium carbide and buy a generator, which is inexpensive. It is quickly soluble, or absorbs water, and gives off, in the chemical reaction from the presence of water, the acetylene gas which gives a light similar to the electric light and in many instances is preferred by individuals. It is a prime necessity in every welding and repair shop in the country, because nothing has been found to equal the acetylene flame in the welding of delicate metals, and coarser ones as well.

Mr. ROBINSON. Under the House provision in the bill the rate is 1 cent per pound, which is $20 a ton. The Senator proposes to reduce that to $5 a ton. Can the Senator state the approximate ad valorem equivalent of the rate in the bill?

Mr. SMITH. It would be very small, because, as I understand, this product sells at from $80 to $90 a ton. It would depend upon what calcium comes in. It would produce a very slight revenue. I will state to the Senator that there has been some imported from time to time from abroad, but the principal source from which the imports have come was Canada, and it is notorious that the calcium carbide which comes from these foreign countries, Canada excepted, is a very inferior form of calcium carbide and is not sold in this country to any extent because of the unsatisfactory nature of it. The people prefer the domestic article.

The only reason I proposed the 5 per cent was because there was a certain amount which would come in where those who import it would use it, perhaps, for other purposes than light producing, and it would bring in some degree of revenue. I think the country would be served absolutely adequately if we put a very slight revenue duty on it. According to the testimony of those who have investigated the matter, they think that it would produce some revenue. Therefore I propose this, for the simple reason that I do not believe we are justified in putting a duty of $20 a ton on an article which we ourselves possess 83 per cent of, underselling every competitor who comes in. Right now I understand that company is in the courts, being sued by some one for an infraction of the Sherman antitrust law.

If we proposed to help those who desire to use carbide in the 340,000 homes of this country, in the automobile shops, and in the railroad shops, I think this amendment ought to prevail. I think a mere statement of the facts should be sufficient to persuade the Senate to reduce this duty.

I would have incorporated in the RECORD the statement by the Tariff Commission, but I have given the salient facts. Here are the facts set forth indisputably, that the Union Carbide Co. have absorbed practically every company in this country producing calcium carbide. They also own the only company which could compete, which is a Canadian company, across the border.

I might state that it does take quite an amount of electric energy to produce the combination between the calcium and the carbon, and therefore it is essential for the factory to be located where they can get an abundance of hydroelectric power. They have monopolized all the companies engaged in this business, capitalized, as I understand, at $257,133,000, and consequently they have the country at their mercy.

Therefore I propose the amendment I have indicated.

Mr. McCUMBER. Mr. President, a great deal of consideration was given by the committee to this paragraph. There are two very important companies producing calcium carbide, one on the American side of the Niagara River and the other employing American capital but conducting its business on the Canadian side. The American capital went over to the Canadian side because, under the present law, the product is free,

and the cost per horsepower is enormously less on the Canadian side than on the American side of the Falls. That was carefully taken into consideration, and the committee arrived at the conclusion that it cost more than 1 cent per pound more to produce the article on the American side than on the Canadian side.

This is no small business. The amount of importations is enormous. I will read but one paragraph of the Tariff Commission report, in which they say:

> Import statistics are shown in combination with those for other articles.

Therefore, from the American reports we could obtain nothing of what the importations were. But further they say:

> Official Canadian export statistics show that for the fiscal years (ended March 31) 1916 to 1921 between 90,000,000 and 130,000,000 pounds of Canadian carbide were exported annually to this country, except in 1920, when only 63,000,000 pounds were shipped out.

One of the purposes of the bill, which Senators seem to forget entirely in discussing it, is to raise revenue. Here is one of the instances in which we can raise revenue and certainly not bring the product up to more than a fair competing basis with the American product. If we import 90,000,000 pounds at 1 cent per pound, it would be $900,000; if 130,000,000 pounds, we would receive $1,300,000. Now, it seems that we ought to take these things a little into consideration when we are considering a bill to raise revenue to meet the expenses of the Government. From the standpoint of revenue alone we ought not to reduce this from 1 cent to one-fourth of 1 cent per pound, as is proposed by the present amendment.

Mr. President, I have another report from the companies showing that in 1914 in nine months we imported only $53,000 worth. In 1915 it grew to $1,208,000; in 1916, $3,206,000; in 1917, $3,808,000; in 1918, $3,422,000; and in 1921 there was $3,440,000 worth of the material imported into the United States. In the United States we produce about 180,000,000 pounds annually, I should judge, and we import, it is said, from 90,000,000 to 130,000,000 pounds. That is pretty good competition. The cost of production being very much more upon the American side, if we are going to apply the principle of protection and a fair opportunity for the American to hold his own market, I see no reason in the world why we ought not to levy the duty as the committee have levied it and as the House have levied it, at 1 cent per pound.

Mr. SMITH. Mr. President, I did not understand the ruling of the Chair on this point. I suppose each Senator has 15 minutes on every amendment. Did the Chair hold that if one yields the floor, not having consumed the 15 minutes, he can not take the floor again on the same amendment?

The PRESIDENT pro tempore. The Chair has ruled that a Senator is limited to 15 minutes. He may use it at two different times on the same day.

Mr. SMITH. I did not use my 15 minutes.

The PRESIDENT pro tempore. The Senator from South Carolina has not consumed the time allotted to him. The Chair is advised that the Senator has five minutes remaining.

Mr. SMITH. Mr. President, I want to call the attention of the Senate to the fact that the main patents on the process of making calcium carbide have expired. Of course, under the use of the patents they were enabled largely to get a monopoly. Now that the patents have expired there is room for some competition in the country, and surely with their monopoly of it it would be to their advantage, if we put the duty on, to keep competition from coming in, because with their monopoly they could largely discourage any home competition. I think it is manifestly in the interest of the American public, who are so largely dependent upon this as a general utility, that we reduce the duty to as low a point as possible.

Mr. WADSWORTH. The mere fact that the patent expired, which happened, I think, in 1912, does not seem to guarantee competition in this commodity. The patent expired in 1912 and at that time the people who were manufacturing the product in the United States urged, while the preparation of the Underwood tariff law was under way, that in view of the expiration of the patent a protective duty be placed upon it, otherwise the manufacture of carbide, which must be used in the United States, would be largely transplanted to Canada. A protective duty was denied and promptly the manufacture of a very large portion of the carbide used in the United States was transplanted to Canada, and to-day one-third of the carbide used in the United States is manufactured in Canada.

As the Senator from North Dakota has stated, there is something more than the difference of 1 cent per pound in the cost of manufacture in the United States as compared with the cost in Canada. Power is cheaper in Canada. Incidentally it is not one company that makes it, because there are five or six others, and any company can make it now that the patents have expired. There is nothing to stop them as long as they can bring their manufacturing costs within the circle with which they have to compete. The very company to which the Senator referred, when the patent expired, when the Underwood law went into effect, was compelled, in order to retain a substantial portion of its business, to build factories abroad. They built one in Norway. Why? Because it could be made cheaper there. In doing so they displaced just so many working people in the United States and there was no particular substantial reduction in price to the consumer.

Mr. SMITH. But the Senator from New York must admit that since the expiration of the patent and during the life of it, being on the free list, they have wonderfully prospered, extended their business, monopolized it in America, and have now a capital of something like $257,000,000, controlling 83 per cent of the business, with a net profit declared of something over $37,000,000.

Mr. WADSWORTH. Of course, when the Senator speaks of profit he is talking also of business other than carbide. He is talking about all the business.

Mr. SMITH. I am talking about the Union Carbide Co.

Mr. WADSWORTH. We are considering carbide alone. The Senator must remember that, whereas the business has increased and the sales of the particular company, which is not the only one, have increased, the manufacture in this country has not increased to the same extent. They are selling Canadian-made carbide in the United States.

Mr. SMITH. But the Canadian carbide is produced, of course, by the American company.

Mr. WADSWORTH. And it is included in the figures quoted by the Senator.

Mr. SMITH. Precisely. That is what I am doing. A duty of $20 a ton given them on their Canadian product, as a matter of course, would be reflected upon every pound they produce in this country, for if they pay $20 a ton to import it, having a monopoly in the country, they would transfer $20 to all the other product, because they are not going to allow their Canadian plant to compete with their United States plant to the extent of whatever they import into the United States.

Mr. WADSWORTH. Of course, the Senator's statement is based upon an assumption, and that is that there is a monopoly. There can not be a monopoly. There is no patent to protect it. Anyone who can locate water power can make carbide. It is being made in Keokuk, on the Mississippi River, by an entirely different company, and the prospects for power there are just as good, both as to quantity and price, as they are at Niagara. The question is, How much carbide can the American public consume? That is all. There is room for just so much consumption, and if it can be made cheaper in Canada than it can be made here, the American public, with no protective tariff, of course will consume the Canadian-made carbide, and that is the only issue here.

Mr. SMITH. Mr. President, I must conclude. Of course, the statement of the Senator from New York confirms what I have said, that in spite of there being a monopoly 10 years after the life of the patent expired, no independents to speak of are in the field, the domestic people control 83 per cent of the carbide produced in the country, together with other products incidental to the production of it, and they control the entire market to-day.

Mr. McCUMBER. Mr. President, the Senator said there is practically no competition. I do not know just to what extent one company competes with another, but I know there are a sufficient number of manufacturers in the United States to create a very lively competition if they so desire. I know, now that the patent has expired, that one section of the country where they can get the water power at the same rate will have about as good an opportunity to operate a plant as at Niagara or any other place in New York.

I find, according to the report in the hearings, that there are the Union Carbide Co.; the National Carbide Co.; the American Carbolite Co., of Duluth, Minn.; the Gas Tank Recharging Co., of Keokuk, Iowa, which makes the sunlight carbide; the National Lead Co., also of Keokuk, Iowa; and the Standard Carbide Co., located at Plattsburg, N. Y. There is also another company located in Seattle or Portland—I do not remember at which place. I think that shows that we have a sufficient number of competitors, and we have already shown the necessity for the protection as well as the necessity for the three-quarters of a million dollars which will come in as revenue.

The PRESIDING OFFICER (Mr. Oddie in the chair). The question is on the amendment of the Senator from South Carolina, which will be stated.

The ASSISTANT SECRETARY. On page 6, line 14, strike out "1 cent per pound" and insert "$5 per ton," so as to read: "Calcium carbide, $5 per ton."

Mr. SMITH. I ask for the yeas and nays. It is a matter of such importance that I think we had better get a record vote.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. POMERENE (when his name was called). Again announcing my pair with my colleague the junior Senator from Ohio [Mr. WILLIS], I transfer that pair to the senior Senator from Nebraska [Mr. HITCHCOCK] and vote "yea."

Mr. TRAMMELL (when his name was called). Making the same announcement in regard to the transfer of my pair as on the previous vote, I vote "yea."

Mr. UNDERWOOD (when his name was called). I wish to announce that my general pair with the Senator from Massachusetts [Mr. LODGE] does not apply to this vote. I vote "yea."

Mr. WATSON of Indiana (when his name was called). Making the same announcement as before in reference to my pair and its transfer, I vote "nay."

The roll call was concluded.

Mr. HALE. Making the same announcement with reference to my pair and its transfer as on the previous vote, I vote "nay."

Mr. DILLINGHAM. I transfer my general pair with the junior Senator from Virginia [Mr. GLASS] to the senior Senator from Pennsylvania [Mr. PEPPER] and vote "nay."

Mr. ERNST. Making the same announcement as heretofore concerning my pair and its transfer, I vote "nay."

Mr. JONES of Washington (after having voted in the negative). I understand the senior Senator from Virginia [Mr. SWANSON] has not voted. I am paired with him while he is absent, but I find I can transfer that pair to the junior Senator from Oklahoma [Mr. HARRELD]. I do so, and allow my vote to stand.

Mr. CURTIS. I wish to announce the following general pairs:

The Senator from Michigan [Mr. TOWNSEND] with the Senator from Wisconsin [Mr. LA FOLLETTE];

The Senator from California [Mr. JOHNSON] with the Senator from Georgia [Mr. WATSON];

The Senator from Illinois [Mr. MCKINLEY] with the Senator from Arkansas [Mr. CARAWAY];

The Senator from Minnesota [Mr. NELSON] with the Senator from Massachusetts [Mr. WALSH]; and

The Senator from Missouri [Mr. SPENCER] with the Senator from Georgia [Mr. HARRIS].

The result was announced—yeas 17, nays 40, as follows:

YEAS—17.

Ashurst	Lenroot	Reed, Mo.	Trammell
Dial	McKellar	Robinson	Underwood
Fletcher	Myers	Sheppard	
Heflin	Overman	Simmons	
Jones, N. Mex.	Pomerene	Smith	

NAYS—40.

Ball	Edge	McCumber	Ransdell
Brandegee	Ernst	McLean	Reed, Pa.
Broussard	France	McNary	Shortridge
Bursum	Gooding	Moses	Smoot
Calder	Hale	New	Stanfield
Cameron	Jones, Wash.	Newberry	Sterling
Capper	Kellogg	Nicholson	Sutherland
Cummins	Kendrick	Norbeck	Wadsworth
Curtis	Keyes	Oddie	Warren
Dillingham	McCormick	Phipps	Watson, Ind.

NOT VOTING—39.

Borah	Harreld	Nelson	Stanley
Caraway	Harris	Norris	Swanson
Colt	Harrison	Owen	Townsend
Culberson	Hitchcock	Page	Walsh, Mass.
du Pont	Johnson	Pepper	Walsh, Mont.
Elkins	King	Pittman	Watson, Ga.
Fernald	Ladd	Poindexter	Weller
Frelinghuysen	La Follette	Rawson	Williams
Gerry	Lodge	Shields	Willis
Glass	McKinley	Spencer	

So Mr. SMITH's amendment was rejected.

Mr. DIAL. I offer the amendment which I send to the desk.

The PRESIDING OFFICER. The amendment proposed by the Senator from South Carolina will be stated.

The ASSISTANT SECRETARY. On page 84, line 18, after the word "form," where the language reads "in crude form," it is proposed to strike out "5 cents per pound" and to insert "shall be free of duty," and line 20 to strike out "9 cents per pound" and to insert the words "shall also be free of duty."

The PRESIDING OFFICER. The question is on the amendment proposed by the Senator from South Carolina.

Mr. DIAL. Mr. President, it seems to me as we have in this country a great abundance of the ingredients out of which aluminum is made and the industry engaged in making it has grown rapidly and has gotten beyond the stage of being an infant, aluminum should be placed upon the free list. I notice from the information we are furnished that this country is able to compete with the world in the production of this article and that we now produce much more than is consumed in the country; that, in fact, we produce about half the quantity which is produced in the world. I believe only one concern in the United States is engaged in the manufacture of aluminum. Aluminum is in universal use; it is found in every kitchen in the country. The articles which are manufactured of aluminum are used by the poor. As a manufacturing enterprise it has prospered most wonderfully. It does seem to me, therefore, that the article ought to be put upon the free list. It is an article which is being used in many lines of industry, and I think is one of the articles in the manufacture of which there is an absolute monopoly. I sincerely hope, therefore, that the amendment which I have presented may be agreed to.

Mr. REED of Missouri. Mr. President, will the Senator from South Carolina yield for a question?

Mr. DIAL. Yes.

Mr. REED of Missouri. What is the name of the American monopoly?

Mr. DIAL. It is the Aluminum Co. of America.

Mr. REED of Missouri. Can the Senator from South Carolina state who is interested in that company?

Mr. DIAL. The Senator from New Mexico [Mr. JONES] is better informed as to that than am I, and I shall be glad to yield to him to answer the question of the Senator from Missouri, as I was just going to yield the floor.

Mr. SIMMONS. I think the man who is in greatest authority in connection with the company is Mr. Davis. I do not know his initials.

Mr. REED of Missouri. Are some of the officials of the Government interested in the company?

Mr. SIMMONS. The Senator from Missouri knows as well as I do the connection with that company of one of the Secretaries.

Mr. REED of Missouri. The Secretary of the Treasury?

Mr. SIMMONS. Yes; the Secretary of the Treasury.

Mr. REED of Missouri. The very man who is the father of the bill now under consideration. As everybody knows, this bill was very largely prepared in the Treasury Department.

Mr. JONES of New Mexico. Mr. President, on yesterday I made a motion to reduce from 60 per cent to 30 per cent the duty on kitchen utensils which are made of aluminum. The motion carried for the time being. The Senator from Wisconsin [Mr. LENROOT], however, asked to reconsider the vote by which the amendment was agreed to, for the purpose of making some observations on the subject. Among other things, he referred to the fact that there should be a compensatory duty on the article because of the duty on the raw material. The duty on the raw material as provided for in the bill is 5 per cent.

Mr. LENROOT. Will the Senator from New Mexico yield to me?

Mr. JONES of New Mexico. I yield.

Mr. LENROOT. I wish to say that in the rush of things I had understood that the Senator's amendment which prevailed had cut out the compensatory duty, and that was the reason I made the observation.

Mr. JONES of New Mexico. I think the Senator from Wisconsin misconceived the situation as it existed. There is provided a duty of 5 cents on aluminum in the crude form, and in coils, plates, sheets, bars, and so forth, of 9 cents per pound.

Mr. SMOOT. Mr. President, will the Senator from New Mexico yield to me?

Mr. JONES of New Mexico. I yield.

Mr. SMOOT. Merely for the RECORD, I desire to say that, of course, the raw material of aluminum is bauxite, on which a duty of $1 a ton is imposed. Bauxite is the raw material for aluminum, and aluminum is the raw material for utensils, but it is the manufactured product from bauxite.

Mr. JONES of New Mexico. I am quite aware of that, Mr. President, but the duty on bauxite is only $1 a ton. I forget just the percentage of aluminum which is obtained from the bauxite, but it is quite large; it is around 50 per cent, I think, or perhaps more; perhaps it is 60 or 65 per cent. However, I do not care to be exact about that, because the $1 a ton duty is really inconsiderable. It certainly would not justify a duty of 5 cents per pound upon aluminum metal and then the 9 cents per pound upon aluminum metal as it appears in the shape of sheets and bars. As a consequence of this duty, we find a compensatory duty of 15 cents per pound on the manufactured utensils. Then, in addition to that, there is provided as a protection to this industry a duty of 60 per cent.

I desire now to give notice that when the bill gets into the Senate I shall ask that another vote be taken upon the duty upon aluminum kitchen utensils as well as upon the other articles in paragraph 339, which was discussed somewhat on yesterday.

As stated by the Senator from South Carolina, this is not only a monopoly but there is only one concern in North America which produces it, both in Canada and in the United States, and it produces one-half of the aluminum of the world. I want to read just an excerpt or two from the report of the Tariff Commission on this subject:

The production is a matter of companies rather than of nations. The North American output comes from one American company, which developed its process of manufacture, introduced the metal on the market, and has built up an enormous business. Three large financial groups, involving French, British, and German capital, control some 14 producing companies in Europe. There is also a small independent company in Italy and another in Norway. Prior to the war the European producers were well organized and controlled production and prices on the Continent.

Then we have some data here regarding the wonderful growth of this industry. I do not care to put in the figures; but suffice it to say that from 1890 to 1920 its output grew from 60,000 pounds—the value is not given; it gives the early production in pounds without any value—to 7,000,000, then 40,000,000, 90,000,000, 110,000,000, and 130,000,000 pounds, of a value in 1920 of $40,000,000; and that concern grew from a very modest capital. It has been piling up a surplus here surpassing that of perhaps any other concern in the United States or in the world. If there has been one extreme monopoly which, as I said yesterday, has a lead-pipe cinch monopoly, it is this Aluminum Co. of America. It is the only concern doing the business on this continent. It has built up this large business and has an absolute control not only of the bauxite of the country, the crude material of the country, but of the manufactures of the country. It has built this up, as I said, from a rather modest beginning; and what do we find in the illustration here about some of the kitchen-utensil ware? Take the Reynolds report, and you will find that the American prices of that ware to-day are two, three, and four times what they were prior to the war.

Mr. DIAL. Mr. President——

The PRESIDING OFFICER. Does the Senator from New Mexico yield to the Senator from South Carolina?

Mr. JONES of New Mexico. I do.

Mr. DIAL. I should like to call the attention of the Senator to the fact that in the transmission of electricity aluminum wire is interchangeable with copper wire.

Mr. JONES of New Mexico. It has many essential uses, and, as the Senator has said, it goes into practically every industry in this country. Its use is expanding enormously every day, and it is something that is in every household in the land, and is used in practically every industry in the land. It is an absolute necessity. The process is simply one of taking the crude product from mother earth and putting it into a form in which it may be used, and one concern is doing it, the one concern controlling not only the United States but Canada and the whole of North America; and prior to the war it had an absolute agreement with the concerns in Europe producing these articles that it should have the exclusive control of this market.

It is true that you will find some imports here. They are imports from Canada. They come in in bond, and after going through an additional process they are exported with a drawback of the duty which has been paid; so there is no appreciable revenue derived from them. They are sending out these wares to the various countries of the world. This is a concern which can compete with the manufacturers of these products anywhere on earth; and I submit that this duty on the crude material should be taken off, and that we then should revise the duties upon the manufactured product.

Mr. REED of Missouri. Mr. President, this case has been very well stated. I desire to insert in the RECORD as a part of my remarks the names of the officers and chief owners of this American monopoly.

I rise to inquire whether there is any limit to the cold and deliberate employment of legislative power for the purpose of robbing the American people. Here is an institution which is a complete monopoly in America, as has been said. The value of its product has grown in 20 years from $2,000,000 to $40,000,000. Its total production in 1890, only 32 years ago, was 60,000 pounds. Its production in 1920 was 130,000,000 pounds.

I read two or three lines of the report published by the Finance Committee:

This exceptionally rapid increase in production placed the United States far in the lead of all the aluminum-producing countries. Fully one-half of the world's output is produced in this country.

And the author should have added, "by one institution."

The argument has been made here that aluminum is made from bauxite, and that there is an import duty upon that. The same document from which I have read recites:

The American company has all these essentials—

That is, plant and dependable supply of raw materials. Let me read it:

The successful production of aluminum involves heavy expenditure for plant and requires dependable supplies of raw materials—especially bauxite—adequate transportation facilities, and cheap electric power. The American company has all these essentials, but is at some disadvantage compared with the foreign companies in the cost of assembling its bauxite and coal at East St. Louis for purification and the subsequent transportation of the purified material to the various eastern reduction works, where it is made into metal.

Mr. President, that is thrown in there; but a moment's consideration will teach anybody that those disadvantages are offset by other advantages—for instance, the shipment by foreign countries across 3,000 miles of ocean—and the most of these disadvantages are avoidable, as can be easily seen.

The same authority from which I have been reading and which is reported here with the approval of the majority members of the Finance Committee recites:

In addition to its large holdings of bauxite deposits in Arkansas, the Aluminum Co. of America owns extensive deposits in Guiana. Utilization of these South American ores, which may be refined at Baltimore, should reduce the disadvantage of the domestic producer as regards the supply of raw material.

Mr. President, here is a concern using a raw material which God Almighty made and put in the bosom of the earth; and I do not suppose we have yet gone to the extent of protecting the Lord against Himself, protecting Him on things that He created in America against things that He created across the ocean. Anyway, there is nothing to indicate that this bill has been in any manner inspired by High Heaven or any similar source.

We have, then, the case of an institution that has an abundant supply of raw material in the United States, and in addition to that has gone outside of the United States and acquired a great supply of raw material in South America; that has the advantages of railroad and river transportation and the great market of the United States; that is a complete monopoly; that has been prospering beyond any other institution in the United States and, I believe, in the world; and that institution, for which officers of this Government are asking protection in order to continue its monopolistic ability to extract money from the American people, comes here with a bill that is tainted by the self-interest of high officers of the Federal Government.

Mr. DIAL. Mr. President——

The PRESIDING OFFICER. Does the Senator from Missouri yield to the Senator from South Carolina?

Mr. REED of Missouri. I yield to the Senator.

Mr. DIAL. I merely want to suggest to the Senator that this material is manufactured by power that is donated by the Almighty, also. It is manufactured by hydroelectric power.

Mr. REED of Missouri. Yes. There can be but one reason for this tax, and that is to protect this monopoly against any possible competition from abroad, and enable it to raise its price to the American consumer. It has been and is making enormous profits. It holds this market for itself; but, of course, if a sufficiently high tariff wall is constructed around the country, it can stand back of that wall and increase its profits by exacting additional tribute from the people of the United States. If the wall is not there, and the industry raises its prices too high, some materials may come in from foreign countries which will compel it to cut its profits to a decent figure.

Upon whom are we levying this tax? There is nothing of more universal use to-day, I apprehend, than aluminum, with the possible exception of steel. It enters into the cooking utensil of the home, and a tax upon it is a tax upon the workingman, the working woman, the farmer, the mechanic, every class of our people. It reaches into the pockets of all of them. It filches the pennies from the pocket of the poor man, and it likewise filches dollars from the pockets of the rich man who buys an automobile the body of which or the parts of which are made of aluminum.

The Federal officer who would help to prepare a bill to put millions of dollars into the coffers of a corporation in which he holds a controlling interest ought to be impeached, and with a more healthful condition of public sentiment and of sentiment in this body that is exactly what would happen to a man engaged in that kind of practice.

No theory was ever advanced publicly for a tariff with which this particular tariff duty can be reconciled. It is not a tariff for revenue, because it is prohibitive. It is not a tariff to protect an infant industry, for this concern is no longer an infant

industry. It is not a tariff to make up the difference in the cost of production here and the cost abroad, for this institution can now ship its goods over the round world, and sell them in competition with every country and with every people. It is therefore reconcilable with but one theory, and that is the theory of robbery under the form of law.

Do I use too harsh an expression there? One of the greatest justices who ever sat upon the Supreme Court of the United States said that for a government to lay its hands upon the property of one man and transfer it to another under the form of a tax was none the less robbery because perpetrated under the form of a statute. That is not the exact language he used, but it is substantially the language.

This bill is full of many enormities. It is replete with iniquities. It smells to high heaven. But this particular item illustrates the fact that without limit and without stint it is proposed to exercise the powers of legislative bodies for the purpose of plundering the masses of the people and to transfer their savings into the coffers of one of the most unconscionable monopolies infesting this country to-day.

The PRESIDENT pro tempore. Does the Senator from South Carolina offer his two amendments as one, or does he desire a separate vote on each?

Mr. DIAL. I prefer to have them voted on at the same time.

The PRESIDENT pro tempore. The Senator from South Carolina asks that the two amendments which he has offered be treated as one. Is there objection? The Chair hears none.

Mr. McCUMBER. Mr. President, the Senator from Missouri has been long absent from the Senate on a matter which perfectly justified his absence, but he comes back and immediately informs us of some things which the committee, which has been working diligently during all those days, have never yet discovered. It may possibly be that some person high in the official circles of the Government had something to do with the drafting of the bill in the House. I simply do not believe it. I think the Senator is mistaken when he assumes that. I am absolutely certain that anything put into the bill in the Senate was not drafted by anyone but the members of the Senate Finance Committee themselves.

I do not think that every person who has stock in a company of any character becomes necessarily dishonest or that he becomes less a good American. I know that in this country American capital, in its investment and in the long struggle it has had, has reduced the price of aluminum from $8 a pound to 22 to 25 cents a pound. I think that is a pretty good accomplishment in a very few years, and it is because of the efforts of these great companies, in attempting to advertise this new material, to introduce its use in the manufacture of utensils, and so forth, that it has become a blessing to the American people.

Mr. President, the Senator is mistaken when he says this is a question simply of enriching some company which has made enormous profits. I have not the time to go into the statement of the profits and losses of the companies which have been engaged in the great business of producing aluminum, but I have a letter here showing where the profits which they did make went, and showing that the highest dividend they have declared has been only 4¼ per cent upon the investment, and that anything that was made above that has gone into the business itself to expand it; that where 20,000 people were employed some time ago only about 8,000 are employed now; that an enormous stock has accumulated, which is being held because it can not be sold except at a loss in competition with that which is coming into the country at the present time.

The evidence before the committee shows that the cost of production of aluminum in this country is about 25 to 26 cents per pound. It is being offered, and is actually being imported in vast quantities now, at about 19 or 20 cents per pound. The cost of producing alone, without taking into consideration the matter of interest upon the investment, is about 26 cents per pound. We have therefore given a duty of 5 cents per pound, which measures the difference between what the article is sold for on the markets in this country and what it can be produced for in this country.

If we want to protect the industry I think we should give it that duty. If, having developed a great industry in the United States, we want to turn it over to foreign countries, we can do so; and there are only two producers in the foreign countries who control almost the entire output. I do not think it advisable, however, to now destroy the American industry, and I do not care whether it is one company or a dozen companies. It is at least producing in this country. It has at least reduced the cost in this country from about $8 per pound, when we first began to produce it a number of years ago, to about from 20 to 25 cents per pound, the price it is sold for to-day.

Mr. REED of Missouri. Mr. President——

The PRESIDENT pro tempore. Does the Senator from North Dakota yield to the Senator from Missouri?

Mr. McCUMBER. I yield for a question.

Mr. REED of Missouri. I call the Senator's attention to the table printed in the Summary of Tariff Information, sent here by the Tariff Commission, where it is shown that there were imported into this country 26,014,687 pounds in the nine months of 1921. That is aluminum in crude form, scrap, and alloys of any kind, and is not the regular aluminum. Of aluminum bars there were imported only 265,036 pounds, and of aluminum plates and sheets, 1,632,425 pounds. Those were the imports, while the exports were——

Mr. McCUMBER. The Senator utilized his entire 15 minutes and I have 15 minutes to reply.

Mr. REED of Missouri. I am practically through with my question.

Mr. McCUMBER. I yield for a question, but I do not yield for the Senator to take up all my time.

Mr. REED of Missouri. I shall not impose on the Senator's good nature.

Mr. McCUMBER. I do not want to yield to have the Senator go into a table. I wanted to produce the table myself, and I am afraid if the Senator takes my time in producing it, I shall not have any time left.

Mr. REED of Missouri. I will be through in a moment. Of aluminum ingot metal and alloys there were exported 1,024,346 pounds in the nine months of 1921, and of aluminum plates and sheets 927,873 pounds. Does the Senator say, in view of those figures, that this country is being flooded with aluminum from abroad?

Mr. McCUMBER. Mr. President, the imports for the entire year 1921 were 30,157,000 pounds. The exports in the nine months were 1,024,000 pounds as against an importation of 30,000,000 pounds.

Mr. REED of Missouri. Mr. President, if the Senator will pardon me, I am sure he wants to get his figures correct.

Mr. McCUMBER. I do not know how much time I have left, but we are proceeding under a time limitation, and I wish the Senator would allow me to finish.

The PRESIDENT pro tempore. The Senator has six minutes remaining.

Mr. McCUMBER. I will need the six minutes.

Mr. REED of Missouri. Very well.

Mr. McCUMBER. I have the importations of ingots and sheets. I will take 1911, when we imported 6,240,826 pounds of ingots, valued at $945,000, and 213,122 pounds of sheets and bar, valued at $149,000. That grew right along until 1913, when our imports increased, giving only the round numbers, from 6,000,000 to 26,000,000 pounds. Then, of course, during the war they decreased. In 1919 they increased again to 13,324,000 pounds; in 1920 to 35,917,000 pounds; and in the first six months of 1921, 22,538,891 pounds. The importations in 1921 have thus been at the rate of 45,000,000 pounds per annum, or approximately one-half of the total consumption of the United States under present conditions. With improved conditions and an inadequate tariff the volume of imports would be enormous and completely destructive of the American industry.

Mr. President, I desire to have printed in the RECORD as a part of my remarks a letter, of date June 13, 1922, from Mr. Arthur V. Davis, who is president of the Aluminum Co. of America, which letter deals with the subject discussed by the Senator from Missouri.

The PRESIDENT pro tempore. Without objection, leave is granted.

The letter is as follows:

ALUMINUM CO. OF AMERICA,
Washington, D. C., June 13, 1922.

The Hon. P. J. McCUMBER,
Chairman Finance Committee,
United States Senate, Washington, D. C.

DEAR SENATOR McCUMBER: The argument that the profits of the Aluminum Co. of America have been abnormal has, in the first place, in our opinion, nothing to do with the present question, which is whether the industry will be ruined to-day, which ruin will involve all the past profits because these profits have been put back into the business. Viewing the question of our past profits, however, for what importance that side of the question may have, the company has been in business 33 years and in the early years of its existence put into the business about $1,500,000. It has earned on an average 16¾ per cent per annum on capital invested, paid in dividends 2½ per cent, and put back into the business 14¼ per cent. It is a simple mathematical calculation, therefore, to show that starting with this amount of money, that putting back each year 14¼ per cent would give a net worth of $110,000,000 at the end of 1921. During the war the company enlarged its plant to provide the necessary materials for airplane and other war purposes (which facilities are now idle), and borrowed therefor $30,000,000, so that the total capital invested is about $140,000,000 net capital. The net capital of $110,000,000 which arose out of earnings of 16¾ per cent per annum, which we contend were moder-

ate for a company which created the business, has given to the world a new and useful commodity, reducing the price thereof from $16 per pound to 20 cents per pound.

Another statement frequently made about us is that we are a trust, a statement which we very much resent, because starting with but very little we have constructed our own plants ourselves, and with one trivial exception (when we bought a two-thirds interest in a $600,000 rolling-mill plant at Cleveland), we have neither merged with nor bought plants or companies, and hence are not a trust in the ordinary acceptance of that word. Since our patents expired 15 years ago the field has been open to all.

Very truly yours, ARTHUR V. DAVIS, *President.*

Mr. McCUMBER. We have shown, beyond any possible question, that we can not produce in the United States and are not producing to-day at a cost at which we can compete with the German manufacturer, and the whole question is whether or not we should now yield to the demand for a reduction that will destroy the American industry and put us at the mercy of two companies which are working in harmony. Though they are all big companies, I think in the end it will pay the American people to keep the American company in operation.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment of the Senator from South Carolina [Mr. DIAL].

The amendment was rejected.

Mr. DIAL. Mr. President, on page 84, line 18, I move to strike out "5" and insert "3." I would like to dispose of both amendments at the same time, so I will propose my other amendment. On the same page, in line 20, I move to strike out "9" and insert "5."

Under the present law these rates are, respectively, 2 and 3½. This enterprise has grown from an infant into a stalwart individual. It seems to me the proposed rates ought to be satisfactory to the other side.

The PRESIDENT pro tempore. Does the Senator ask that the two amendments be treated as one and voted upon at the same time?

Mr. DIAL. I should be glad to have them treated as one.

The PRESIDENT pro tempore. Is there objection? The Chair hears none. The Secretary will report the amendment.

The READING CLERK. On page 84, line 18, strike out "5" and insert "3"; and in line 20 strike out "9" and insert "5," so as to read:

PAR. 374. Aluminum, aluminum scrap, and alloys of any kind in which aluminum is the component material of chief value, in crude form, 3 cents per pound; in coils, plates, sheets, bars, rods, circles, disks, blanks, strips, rectangles, and squares, 5 cents per pound.

Mr. REED of Missouri. Mr. President, on the amendment I desire to say a few words in elucidation of figures which I gave a few minutes ago, and also in elucidation of figures given by the Senator from North Dakota [Mr. McCUMBER].

The table which is furnished by the committee recites that in the nine months of 1921 there were imported 26,014,687 pounds, but, as I said when I read the figures before, that is aluminum in crude form, scrap and alloys of any kind. It embraces everything and is really raw material. It is not a product manufactured for the market. It therefore has no place in the consideration of this question. But when the Senator gave us the imports for the whole year of 1921 he included those figures, a very deceptive process.

The fact is that manufactured aluminum received in the first nine months of 1921 aggregated 1,897,561 pounds while the exports of manufactured aluminum for the year 1921 aggregated 1,952,219 pounds. So that we exported of manufactured aluminum during the whole of the year 1921 considerably more than we imported during the first nine months. Figures for the last three months of 1921 on imports are not given, but the figures make it perfectly plain that the Senator's statement that this country is being flooded with aluminum is inaccurate, that he is mistaken about it, that his own figures in the book which he reported to the Senate contradict and destroy the force of his statement.

Now let me give a moment's attention to the wonderful thing that was done in reducing the price of aluminum from $8 a pound to 22 cents a pound. Why, Mr. President, aluminum was discovered only a little over 30 years ago. Of course, when they started to make the metal, the first of it that was produced was produced at an enormous cost. The Senator might have gone back a little further. I suppose the first ounce of aluminum that was produced might have cost $10,000. It is easy enough to conceive that. Some metallurgist may have spent a lifetime experimenting before he found the secret to the production of this new metal, or alloy, or whatever it is called. But when aluminum began to be manufactured for commercial purposes it had to be manufactured, of course, to compete with other metals. Aluminum at $8 a pound could not be used at all. When the Senator talks about this factory having produced cheapness in the material it is all moonshine. He might as well say that John D. Rockefeller should be enshrined in the hall of fame because the first gallon of oil that was produced probably cost somebody hundreds of dollars if he charged in the experimental work. That is no reason why Mr. Rockefeller should charge us a dollar a gallon for gasoline to-day. That is no justification for a tariff, because if we levy a tariff upon that theory, then we levy a tariff upon every advance that may be made in science or that may come as a result of experimentation.

Suppose we should apply that principle to the railroads and say that the first railroad engine that ever was built cost an enormous amount of money and, therefore, we ought to levy a tariff upon the modern locomotive, based upon the idea that the original inventor of the locomotive had spent a great deal of money in producing it. There is no use of pursuing an argument of that kind, because such an argument is so baseless in logic and in reason that it would not deceive anybody. It would not deceive even the Senator from North Dakota or anybody else.

Now, the Senator stated that men should not be debarred from taking part in these matters because of an interest. I do not agree with him. He said the Treasury Department, so far as he knows, has nothing to do with the bill. The Senator knows that the experts from the Treasury Department have been present at every hearing. The Senator knows that experts from the Treasury Department sit beside him to-day. I do not criticize the experts for sitting here. They have some useful information, and it is all right for them to be here. The Senator knows that in the last analysis revenue measures are prepared after consultation with the Treasury Department.

I deny the right of any man who is a member of the Federal Government to employ the influence of his position or the vote he may be authorized to cast for the purpose of feathering his own nest. Whenever that situation arises—that a Senator has a direct interest of a financial character in any matter—it is his business to do what the upright judge does when a case is presented to him in which he has an interest—to step aside and let the matter be decided by those who do not have a direct financial interest. If that proposition is denied, then we ought to fill Congress with men who have come here to look after their own financial concerns, who come here admittedly to tax the American people for their own profit and their own benefit. Then those buccaneers ought to get together and agree that each will help the other perpetrate his particular robbery in consideration of a return vote. Put that to the American people and see what they will say about it.

Mr. President, I do not desire to delay the Senate. I am looking for the information regarding this particular company, and when I get it I shall put it in the RECORD.

Mr. McCUMBER. Mr. President, of course, I do not know what the real purpose of the Senator is in offering one amendment and then another, unless it is to have the matter reargued here several times. I have presented what I thought were the important facts in this case. The Senator from Missouri seems to think that there is a great deal of wickedness on the part of anyone who desires to have this tariff rate represent the difference between the price for which the foreigner puts his article down in the port of New York and what it costs the American producer to manufacture that article. All his statements in reference to the figures which I gave being deceptive have not changed the facts at all. The figures are only deceptive to those who wish to be deceived. They are not deceptive to anyone who wishes to understand exactly what they mean. I stated the figures as to imports into the United States under the head of "Aluminum in crude form, scrap, and alloys of any kind, and so forth," from which the Senator took his figures. There were 26,014,687 pounds imported in nine months of 1921, but investigation, bringing the figures up to date, shows that there were, in round numbers, 30,152,000 pounds imported during the entire year. Those were the imports—something over 30,000,000 pounds.

Now I turn to see what the exports are of the same commodity, and on the next page we have the export figures for the calendar years from 1918 to 1921. For nine months of 1921 there were exported 1,024,346 pounds of exactly the same commodity—not the manufactured article any more than the other figures related to the manufactured article. They were in the shape of ingots, which is the principal form in which the commodity is imported into the United States. The quantity of the crude is negligible; it comes in usually in pigs or ingots; a portion comes in the form of bars, strips, and rods, and also as plates and sheets; but I have compared the identical articles, and the imports are 30,000,000 pounds as compared with ex-

ports of 1,000,000 pounds, or, taking nine months of 1921, the imports were 26,000,000 pounds as compared with 1,000,000 pounds.

Mr. President, again the Senator from Missouri charges the Treasury Department with interference in the framing of this legislation, and he says in substance that the Senate knows that the experts of the Treasury Department were the experts from whom we obtained the evidence to frame this bill.

I desire to say that not a single expert from the Treasury Department gave us any evidence whatever relative to this matter. The experts whom we have to assist and guide us in the matter of determining rates and ascertaining what the imports are, and so forth, are the experts of the Tariff Commission. The Tariff Commission is not a part of the Treasury Department; it is absolutely an independent commission, having no connection with the Treasury Department. There being a difference of 5 cents a pound in the foreign selling price in the port of New York and the American production price, I think we should provide a rate to cover that difference, if such rate is needed to continue the American production. In any event, if there is any objection to it, the objection certainly ought not to be based upon a charge against any official who is high in the administration.

Mr. REED of Missouri. Mr. President, I think I have a moment or two of time left. I now call attention to the digest description of the Aluminum Co. of America as it appears in Moody's Manual, Industrials, 1919, which I shall ask to have reproduced in the RECORD. I call attention to the fact that that company has as its officers Arthur E. Davis, president, and certain others, which I shall put into the RECORD without now pausing to read, including A. W. Mellon and R. B. Mellon. A number of companies are controlled by this company. One of them is the St. Lawrence River Power Co., which is controlled by stock ownership. Among the directors in that company I find the names of A. W. Mellon and R. B. Mellon. It also controls through stock ownership the Hannawa Falls Water Power Co. It also controls the St. Lawrence Transmission Co.; it also controls the Tallassee Power Co. I should like to have the part of Moody's Manual containing this information inserted in the RECORD.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and it is so ordered.

The matter referred to is as follows:

Aluminum Co. of America: Incorporated in 1888 in Pennsylvania as the Pittsburgh Reduction Co.; name changed to present title January 1, 1907. Owns extensive bauxite deposits in Saline County, Ark., from which it secures most of its aluminum ore. The mining plant in Arkansas has in operation crushing and drying apparatus and a short connecting railroad between the plant and the Rock Island and Iron Mountain Railroads. The bauxite mined in Arkansas is shipped to a refining plant at East St. Louis, Ill., where the impurities are removed. Company has reduction works where aluminum is made at Niagara Falls and Massena, N. Y.; Maryville, Tenn.; and Badin, N. C.; also a wire and cabling mill at Massena, a general fabricating plant at New Kensington, Pa., a plant for the manufacture of aluminum bronze powder and aluminum foil at New Kensington, Pa., and rolling mills at Niagara Falls, N. Y., and Edgewater, N. J. Annual capacity is 155,000,000 pounds of aluminum in the United States and 20,000,000 pounds in Canada, a total of 175,000,000 pounds.

The company also owns the Northern Aluminum Co., a Canadian corporation, which has a reduction plant and wire mill located at Shawinigan Falls, Quebec, and a fabricating plant at Toronto, Ontario; also the Demerara Bauxite Co. and the United States Aluminum Co.

In 1906 the company formed the St. Lawrence Securities Co., a New York corporation, and through this company purchased the St. Lawrence River Power Co. (see appended statement of last-named company), which has a power plant at Massena, N. Y., from which the company secures all of its power for its extensive plant at that point. Along with the St. Lawrence River Power Co. the company acquired control of several small companies with headquarters at Massena, N. Y., namely, the St. Lawrence Water Co. (capital $100,000), the Massena Electric Light & Power Co. (capital $50,000), and the St. Lawrence Transmission Co. (issued capital $10,000).

Acquisition of Southern Aluminum Co. plants, etc.: On November 1, 1915, the company took over the unfinished hydroelectric and aluminum manufacturing plants of the Southern Aluminum Co. (see Manual for 1915, Industrial and Public Utility Volume, p. 3310), at Badin, N. C., formerly controlled by French interests, which ceased operations at the outbreak of the European war in 1914. These plants were to have cost several million dollars. The Aluminum Co. of America plans to complete these plants and has organized the Tallassee Power Co., with $1,000,000 authorized capital, to take over and complete the hydroelectric development. The partially constructed aluminum reduction plant will be completed by the Aluminum Co. of America. Work on the dam for the power house was resumed and was completed in 1917. The Southern Aluminum Co. has been liquidated.

Capital stock: Authorized, $20,000,000; outstanding, $19,000,000; par, $100. Dividends in recent years have been paid as follows: 1906, 3½ per cent; 1907, 11 per cent; 1908, 1 per cent; 1909, 2 per cent; 1910–1913, 4 per cent yearly; 1914, 6 per cent; 1915, 6½ per cent; 1916 and 1917, 8 per cent each; 1918, 10 per cent; payments quarterly, February 1, May 1, August 1, and November 1. In addition, an extra dividend of 2 per cent was paid December 20, 1916.

Notes: Twelve million dollars, 6 per cent serial gold notes; dated March 1, 1919; due, $4,000,000 annually, March 1, 1921, to 1923, inclusive; interest March 1 and September 1, at Union Trust Co. of Pittsburgh, trustee, or at Guaranty Trust Co. of New York. Coupon, $1,000. Authorized, $12,000,000. The notes are not subject to redemption prior to their respective maturity dates. The indenture securing the notes provides that so long as any of the notes are outstanding the company will not create any new secured indebtedness against its properties or those of its subsidiaries, and that quick assets of company and its subsidiaries shall at all times be at least equal to the aggregate amount of their indebtedness, including the amount of these notes then outstanding. First publicly offered ($12,000,000) in February, 1919, at the following prices: Two-year notes, at par and interest, to yield 6 per cent; three-year notes, at 99¼ and interest, to yield over 6 per cent; and four-year notes, at 99¾ and interest, to yield over 6 per cent.

Sales: The company did a gross business of $25,940,427 in 1916 from the sale of 86,589,744 pounds of aluminum at an average price of 29.96 cents per pound. In addition, the company supplied to its subsidiary, the United States Aluminum Co., 24,821,061 pounds of aluminum, which was fabricated by the latter company.

Officers: Arthur V. Davis, president; G. R. Gibbons, vice president, secretary, and assistant treasurer; R. E. Withers, treasurer and assistant secretary.

Pittsburgh directors: George H. Clapp, Arthur V. Davis, D. L. Gillespie, Roy A. Hunt, Alvah K. Lawrie, A. W. Mellon, and R. B. Mellon.

Annual meeting, third Thursday in February.

General office, Oliver Building, Pittsburgh, Pa. New York office, 120 Broadway.

COMPANIES CONTROLLED BY ALUMINUM CO. OF AMERICA.

St. Lawrence River Power Co. (controlled by stock ownership): Incorporated July 19, 1902, in New York; successor to the St. Lawrence Power Co., sold under foreclosure. Owns 1,800 acres of land and valuable water rights at Massena, N. Y., with canal 3½ miles long and 200 feet wide from the St. Lawrence River to its power plant (85,000 horsepower capacity) at Massena, N. Y. The industries served by the plant are the extensive works of the Aluminum Co. of America, the Massena Electric Light & Power Co., the Massena Sash & Door Manufacturing Co., the Massena Machine Works, the Simpson McIntyre Co., etc. Owns all the $300,000 stock of Hannawa Falls Water Power Co. (see appended statement.)

Capital stock: Authorized, $3,500,000 common and $3,500,000 6 per cent noncumulative preferred; outstanding, $3,500,000 common and $3,000,000 preferred; par, $100. No funded debt. The St. Lawrence Securities Co. owns all the outstanding stock.

Officers: A. V. Davis, president; G. R. Gibbons, vice president, secretary, and assistant treasurer; R. E. Withers, treasurer and assistant secretary.

Directors: A. V. Davis, Roy A. Hunt, R. B. Mellon, A. W. Mellon, G. H. Clapp, D. L. Gillespie, and A. K. Lawrie.

Annual meeting in February.

Main office, Massena, N. Y.; New York office, 120 Broadway.

Hannawa Falls Water Power Co. (controlled by St. Lawrence River Power Co.): Incorporated March 30, 1899, to generate electricity. Controls through stock ownership the Potsdam Electric Light & Power Co.

Capital stock: Authorized and outstanding, $300,000; par, $100. All owned by St. Lawrence River Co.

Funded debt: $787,000 first and refunding collateral trust gold 5's dated July 1, 1913; due July 1, 1943; int. J. & J. 1, at Union Trust Co., Pittsburgh, trustee. Coupon $1,000. Authorized, $1,200,000. Subject to call at 102 and interest on any interest date upon four weeks' notice. A first lien on all property of company now owned or hereafter acquired. Mortgage contains tax-free covenant.

Officers: F. A. Stoughton, president, Potsdam, N. Y.; G. R. Gibbons, vice president, Pittsburgh, Pa.; P. B. Murphy, secretary and treasurer, Potsdam, N. Y.

Annual meeting, third Thursday in February.

General office, Potsdam, N. Y.

St. Lawrence Transmission Co. (controlled by stock ownership): Incorporated April 15, 1916, in New York, to sell, generate, and distribute electric light, heat, and power; a consolidation of Northern Power Co. and St. Lawrence Transmission Co. Property consists of transmission lines and equipment.

Capital stock: Authorized, $525,000; outstanding, $326,000; par, $100. No funded debt.

Officers: F. A. Stoughton, president, Potsdam, N. Y.; G. R. Gibbons, vice president, Pittsburgh, Pa.; P. B. Murphy, secretary and treasurer, Potsdam, N. Y.

Annual meeting, Monday following third Thursday in February.

General office, Potsdam, N. Y.

Tallassee Power Co. (controlled by stock ownership): Incorporated in North Carolina, to develop water power. Owns riparian rights and lands on the Little Tennessee River and riparian rights on the Yadkin River near Salisbury, N. C. The latter development is being pushed to completion, but the development on the Little Tennessee is at present not being pushed.

Capital stock: Authorized, $1,000,000; outstanding, $100,000; par, $100. No funded debt.

Officers: A. V. Davis, president; G. R. Gibbons, vice president; R. E. Withers, treasurer; G. R. Gibbons, secretary; J. S. Murray, purchasing agent, Pittsburgh, Pa.

Annual meeting in February, at Badin, N. C.

General office, Oliver Building, Pittsburgh, Pa.

The PRESIDENT pro tempore. The question is on agreeing to the amendment of the Senator from South Carolina [Mr. DIAL].

Mr. DIAL. I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. McCUMBER. Mr. President, before the roll is called I wish to have printed in the RECORD a brief statement of the organization and development of the company of which the Senator has spoken. I ask that it may be printed in answer to the last statement made by the Senator from Missouri. It covers merely one page of pamphlet which I hold in my hand.

Mr. JONES of New Mexico. May I inquire what the pamphlet is?

Mr. McCUMBER. The pamphlet is entitled "Statement of Aluminum Co. of America."

The PRESIDENT pro tempore. Without objection, the matter referred to by the Senator from North Dakota will be printed in the RECORD.

The matter referred to is as follows:

Aluminum Co. of America not a monopoly: The Aluminum Co. of America is not a combination or merger. It has created the aluminum industry, beginning in 1889, when aluminum was selling at $8 a pound and the world consumption was only a few pounds per year, none of which was made in the United States.

During its 33 years of existence the Aluminum Co. of America has never bought an aluminum plant or merged with an aluminum plant. It has built all its plants with its own money, most of it earned in the business. With the exception of the first 17 years, when the Aluminum Co. had the protection of patents, the field of aluminum manufacture has always been open to anybody.

Profits: While the above is the average result of the company's history in 1920 and 1921, the profits of the company have either been small or a loss has been made.

Its growth has been due to the fact that it has put its earnings back into the business. It has been in business for 33 years, 1889 to 1921, inclusive. The first 3 years were used in getting started, and no profits were made. For the remaining 30 years, 1892 to 1921, inclusive, the company has made on the average 15¼ per cent per annum on the capital invested, paid in dividends 2¼ per cent, and put back into the business 13 per cent. The only unusual thing about the profits of the company has been that so small a percentage has been used as dividends and so large a percentage put back into the business.

Furthermore, its profits have largely come from fabricated goods, which have thus reached the consumer with but a single profit, and a relatively small profit at that, instead of the number of profits that usually burden a commodity before it reaches the consumer.

The PRESIDENT pro tempore. The question is on the amendment offered by the Senator from South Carolina, on which the yeas and nays have been ordered. The Secretary will call the roll.

The reading clerk proceeded to call the roll.

Mr. DILLINGHAM (when his name was called). Making the same announcement as before with reference to my pair and its transfer, I vote "nay."

Mr. HALE (when his name was called). Making the same announcement as before with regard to my pair and its transfer, I vote "nay."

Mr. POMERENE (when his name was called). I transfer my pair with my colleague [Mr. WILLIS] as heretofore announced to the senior Senator from Nebraska [Mr. HITCHCOCK] and vote "yea."

Mr. WATSON of Indiana (when his name was called). Making the same announcement as before with reference to my pair and its transfer, I vote "nay."

The roll call was concluded.

Mr. ERNST. Making the same announcement as heretofore with regard to the transfer of my pair, I vote "nay."

Mr. WALSH of Massachusetts. On this vote I am paired with the Senator from Minnesota [Mr. NELSON]. I transfer that pair to the Senator from Rhode Island [Mr. GERRY] and vote "yea."

Mr. WARREN (after having voted in the negative). I transfer my pair with the Senator from North Carolina [Mr. OVERMAN] to the Senator from Vermont [Mr. PAGE] and let my vote stand.

Mr. CURTIS. I wish to announce the following general pairs:

The Senator from Michigan [Mr. TOWNSEND] with the Senator from Wisconsin [Mr. LA FOLLETTE];

The Senator from California [Mr. JOHNSON] with the Senator from Georgia [Mr. WATSON];

The Senator from Illinois [Mr. MCKINLEY] with the Senator from Arkansas [Mr. CARAWAY];

The Senator from Minnesota [Mr. NELSON] with the Senator from Massachusetts [Mr. WALSH];

The Senator from Missouri [Mr. SPENCER] with the Senator from Georgia [Mr. HARRIS]; and

The Senator from New Jersey [Mr. EDGE] with the Senator from Oklahoma [Mr. OWEN].

The result was announced—yeas 19, nays 35, as follows:

YEAS—19.

Ashurst	Heflin	Ransdell	Smith
Borah	Jones, N. Mex.	Reed, Mo.	Swanson
Capper	Kellogg	Robinson	Underwood
Dial	McKellar	Sheppard	Walsh, Mass.
Fletcher	Pomerene	Simmons	

NAYS—35.

Ball	Ernst	McCumber	Phipps
Brandegee	France	McLean	Shortridge
Broussard	Gooding	McNary	Smoot
Bursum	Hale	Moses	Sterling
Calder	Jones, Wash.	New	Sutherland
Cameron	Keyes	Newberry	Wadsworth
Cummins	Lenroot	Nicholson	Warren
Curtis	Lodge	Norbeck	Watson, Ind.
Dillingham	McCormick	Oddie	

NOT VOTING—42.

Caraway	Harris	Norris	Stanfield
Colt	Harrison	Overman	Stanley
Culberson	Hitchcock	Owen	Townsend
du Pont	Johnson	Page	Trammell
Edge	Kendrick	Pepper	Walsh, Mont.
Elkins	King	Pittman	Watson, Ga.
Fernald	Ladd	Poindexter	Weller
Frelinghuysen	La Follette	Rawson	Williams
Gerry	McKinley	Reed, Pa.	Willis
Glass	Myers	Shields	
Harreld	Nelson	Spencer	

So Mr. DIAL's amendment was rejected.

Mr. MCCUMBER. Mr. President, I am about to ask unanimous consent for a recess until a certain hour to-morrow. I desire to ask the Senator from North Carolina, who has charge of the bill for his side of the Chamber, and who undoubtedly knows about what amendments there will be presented from that side, to indicate to what hour he would like the recess to be taken?

Mr. SIMMONS. I think it would be better to recess to 10 o'clock instead of 11 o'clock.

Mr. MCCUMBER. I ask unanimous consent, then, that when the Senate closes its session on this calendar day it recess until to-morrow at 10 o'clock.

The PRESIDENT pro tempore. Is there objection?

Mr. LENROOT. Mr. President, before that request is put I should like to ask the Senator from North Carolina about how many individual amendments there will be from his side?

Mr. SIMMONS. I will say frankly to the Senator that I do not think there will be very many from this side; but there may be one or two of them that will take considerable time in discussion.

Mr. LENROOT. It was the understanding that we would have two night sessions—one to-night and one to-morrow night.

Mr. SMOOT. Does the Senator want one?

Mr. LENROOT. I have a number of amendments, and I do not feel——

Mr. SMOOT. We shall have 12 hours to-morrow.

Mr. LENROOT. I understand that the Senator from North Carolina does not think there will be many amendments from his side.

Mr. SIMMONS. I do not think there will be very many from this side of the Chamber, and I think we shall be able to get through with the amendments at a reasonable time to-morrow afternoon. In other words, I mean to say that I think we will have reasonable time for discussion of all amendments that probably will be offered to-morrow.

Mr. LODGE. I think so.

Mr. LENROOT. Mr. President, I shall not object, then; but I have several amendments here, and I had supposed that we would have this evening in which to consider them. While I shall consent to this recess, I do not think it is quite fair that we should be cut off from a proper consideration of those amendments.

Mr. SIMMONS. If the Senator desires to sit longer this afternoon, I have no objection to going on; but I thought ample time would be afforded by meeting an hour earlier to-morrow, in view of the fact that debate will not be foreclosed until 10 o'clock to-morrow night, as I understand.

Mr. LENROOT. May we have this understanding from the Senator from North Carolina, then, since he has agreed to this arrangement? Will he not be willing that early in the day to-morrow this side shall be recognized for the consideration of some of their amendments?

Mr. SIMMONS. I want to say to the Senator that I think his side of the Chamber to-day has had very much larger recognition than this side.

Mr. LENROOT. That may be; but the Senator now has made an arrangement whereby we are not to have a night session.

Mr. SIMMONS. Mr. President, I would rather withdraw the consent than to be trammeled about the division of time to-morrow.

Mr. ROBINSON. If the Senator from Wisconsin desires to have a night session let us have it.

The PRESIDENT pro tempore. Is there objection to the request of the Senator from North Dakota? The Chair hears none, and it is so ordered.

Mr. NICHOLSON submitted sundry amendments intended to be proposed by him to the pending bill, which were ordered to lie on the table and to be printed.

Mr. STERLING and Mr. NEWBERRY each submitted an amendment intended to be proposed to the pending bill, which were ordered to lie on the table and to be printed.

ENROLLED BILL PRESENTED.

Mr. SUTHERLAND, from the Committee on Enrolled Bills, reported that on August 16, 1922, they presented to the President of the United States the enrolled bill (S. 848) to amend section 22 of the interstate commerce act, as amended.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. SHORTRIDGE:

A bill (S. 3913) to provide for the erection of a public building at Marysville, Yuba County, Calif.; to the Committee on Public Buildings and Grounds.

By Mr. SHORTRIDGE (for Mr. NORRIS):

A bill (S. 3914) granting a pension to Emma Titus; to the Committee on Pensions.

By Mr. BURSUM:

A bill (S. 3915) granting a pension to Anna M. Wright; to the Committee on Pensions.

DEATH OF REPRESENTATIVE PADGETT.

Mr. McKELLAR. Mr. President, I ask the Chair to lay before the Senate the resolutions of the House of Representatives on the death of Representative PADGETT, of Tennessee.

The PRESIDENT pro tempore laid before the Senate the resolutions of the House of Representatives, which were read, as follows:

IN THE HOUSE OF REPRESENTATIVES,
August 15, 1922.

Resolved, That the House has heard with profound sorrow of the death of Hon. LEMUEL PHILLIPS PADGETT, a Representative from the State of Tennessee.

Resolved, That the Clerk communicate this resolution to the Senate and transmit a copy thereof to the family of the deceased.

Mr. McKELLAR. Mr. President, on August 2 the Hon. LEMUEL PHILLIPS PADGETT, a distinguished Member of the House from the seventh congressional district of Tennessee, died. Mr. PADGETT had been a Member of the House for nearly 22 continuous years. For many of those years he was chairman of the Committee on Naval Affairs and made a great record as such.

He occupied this position during the World War and made good in the highest degree. He was held in the highest esteem by the people of Tennessee.

At a later day memorial services will be held in his honor, and therefore I shall not say more at this time, but content myself with offering the resolutions which I send to the desk and ask to have adopted.

The resolutions (S. Res. 338) were read, considered by unanimous consent, and unanimously agreed to, as follows:

Resolved, That the Senate has heard with profound sorrow the announcement of the death of Hon. LEMUEL P. PADGETT, late a Representative from the State of Tennessee.

Resolved, That the Secretary communicate these resolutions to the House of Representatives and transmit a copy thereof to the family of the deceased.

Mr. McKELLAR. Mr. President, as a further mark of respect to the memory of the deceased, I move that the Senate do now take a recess until 10 o'clock to-morrow morning.

The motion was unanimously agreed to; and (at 5 o'clock and 37 minutes p. m.) the Senate took a recess until to-morrow, Thursday, August 17, 1922, at 10 o'clock a. m.

HOUSE OF REPRESENTATIVES.

WEDNESDAY, *August 16, 1922.*

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Blessed Lord God, again Thou hast awakened our devout appreciation of Thy providence and we would pause to make humble acknowledgment of Thy mercy, which never faileth. Thou dost make complete the circuit of our days, and with gladness may we know the riches of our Father's love. Make strong human weakness, broaden human understanding, and inspire human courage that wise solution may be given to our country's problems. O may the barriers of selfishness, false standards, and the errors of opinion be swept away and let Thy wisdom move us to great and lasting service. Temper all utterance with all the alleviations that justice and charity can give. Take our time, our talent, and opportunity. Direct them for the extension of peace, cooperation, and fraternal understanding among all our fellow citizens, and honor and glory be ascribed unto Thee forever. Amen.

The Journal of the proceedings of yesterday was read and approved.

SENATE BILLS AND JOINT RESOLUTIONS REFERRED.

Under clause 2 of Rule XXIV, Senate bills and joint resolutions of the following titles were taken from the Speaker's table and referred to their appropriate committees, as indicated below:

S. 3793. An act to authorize the Gary Tube Co. to construct a bridge across the Grand Calumet River in the State of Indiana; to the Committee on Interstate and Foreign Commerce.

S. 3834. An act to authorize the Chicago, Lake Shore & Eastren Railway Co. to construct a bridge across the Grand Calumet River in the State of Indiana; to the Committee on Interstate and Foreign Commerce.

S. J. Res. 216. Joint resolution providing for the consent of the Congress of the United States of America to a compact and agreement between the State of Kansas and the State of Missouri respecting the erection, maintenance, and operation of the waterworks plants of the cities of Kansas City, Kan., and Kansas City, Mo.; the taxation thereof, and exercise of eminent domain in connection therewith by each State; to the Committee on the Judiciary.

S. 3733. An act granting the consent of Congress to the city of Warren, in the State of Ohio, its successors and assigns, to construct, maintain, and operate a dam across the Mahoning River in the State of Ohio; to the Committee on Interstate and Foreign Commerce.

S. 3840. An act to amend section 5147 of the Revised Statutes; to the Committee on Banking and Currency.

S. 2984. An act for the relief of Thurston W. True; to the Committee on War Claims.

S. 3103. An act to amend section 2294, United States Revised Statutes, relating to homesteads; to the Committee on the Public Lands.

S. 3531. An act to amend section 9 of the Federal reserve act; to the Committee on Banking and Currency.

S. 3721. An act providing for the erection of additional suitable and necessary buildings for the National Leper Home; to the Committee on Public Buildings and Grounds.

S. 3757. An act authorizing the Department of Commerce to collect and publish additional cotton statistics and information; to the Committee on the Census.

S. 3808. An act authorizing the Secretary of the Interior to investigate and report to Congress upon the Columbia Basin irrigation project; to the Committee on Irrigation of Arid Lands.

S. J. Res. 223. Joint resolution authorizing the Federal Reserve Bank of Kansas City to enter into contracts for the erection of a building for its branch office at Denver, Colo.; to the Committee on Banking and Currency.

S. J. Res. 229. Joint resolution authorizing the Federal Reserve Bank of Chicago to enter into contracts for the erection of a building for its branch office in Detroit, Mich.; to the Committee on Banking and Currency.

S. J. Res. 234. Joint resolution authorizing the Federal Reserve Bank of Atlanta to enter into contracts for the erection of a building for its branch office in Jacksonville, Fla.; to the Committee on Banking and Currency.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted as follows:

To Mr. PARKER of New York, indefinitely, on account of serious illness in his family.

To Mr. LITTLE, indefinitely, on account of illness in family.

To Mr. ELLIOTT, indefinitely, on account of illness.

EXTENSION OF REMARKS.

Mr. WINGO. Mr. Speaker, I ask unanimous consent that the gentleman from Maryland [Mr. GOLDSBOROUGH], who is unavoidably detained this morning, may have leave to extend his remarks in the RECORD on stabilizing the purchasing power of our money.

The SPEAKER. The gentleman from Arkansas asks unanimous consent that the gentleman from Maryland [Mr. GOLDSBOROUGH] may have permission to extend his remarks in the RECORD on the subject indicated. Is there objection?

There was no objection.

Mr. GOLDSBOROUGH. Mr. Speaker, since May 23 last, when I addressed the House on stabilizing the purchasing power of money, in which address I attempted to emphasize the incalculable value of stabilization to the farmer, the salaried man, and the wage earner, as well as to every other class in our complex and highly organized civilization, and on which date I introduced a bill for which the hope was expressed that it would serve as a basis for constructive legislation in the matter of this all-important subject, this body will be inter-

ested to know that the effort has been approved by farmers' organizations, labor organizations, and professional men, and also by the very highest authorities on national and world-wide finance, economics, and legislation. Without burdening the RECORD with the great mass of material which I have accumulated, I feel that this House will be glad to have inserted as a part of my remarks a letter from ex-Vice President of the United States Thomas R. Marshall; a letter from the Hon. CLAUDE KITCHIN, for long years a great national figure, chairman of the Ways and Means Committee of the House of Representatives during the Wilson administration, now the minority leader of this House, highly esteemed and much loved as he is by Democrats and Republicans alike; a letter from Roger W. Babson, president of Babson's Statistical Organization, Wellesley Hills, Mass., whose statistical work in the field of economics and whose analyses of business cycles are so well known and so important as to be found in most of the great business houses, banks, trust companies, and financial organizations throughout the country and also in the smaller ones which can afford them; a letter from the American Chamber of Commerce in Berlin, Germany; and a letter from William T. Foster, director of the Pollak Foundation for Economic Research, who sends with his letter his carefully worked-out views on the subject, which I will incorporate in these remarks immediately following his letter. The communications mentioned follow in their order:

FRANKFORT, IND., *August 9, 1922.*

Hon. T. ALAN GOLDSBOROUGH,
Washington, D. C.

MY DEAR MR. GOLDSBOROUGH: I am so glad that you have introduced a bill to stabilize the purchasing power of money. I wish I could be present at the hearing, but it will be impossible for me to do so. Don't let this matter drop or stop with a perfunctory hearing, because this is a thing that is going to come to pass, and you will be a very proud man to know that you had the honor of taking the initial step in the House of Representatives.

Cordially yours,
THOS. R. MARSHALL.

OFFICES OF MINORITY LEADER,
HOUSE OF REPRESENTATIVES,
Washington, D. C., August 4, 1922.

MY DEAR GOLDSBOROUGH: I thank you for sending me your excellent speech which I read with unusual interest. It was admirably conceived and logically and clearly put. I congratulate you. I made no mistake when I championed your candidacy for membership on the Banking and Currency Committee and am glad I withdrew in your favor our North Carolina candidate. I want you to be as watchful and diligent as possible on that committee. On every measure from the committee I suggest that you make a speech, however short, explaining and analyzing the bill. When the Democrats get control of the House we will have much important legislation before that committee. I want you to go right to the front with respect to the bills before it. Your power of analysis and clearness of expression, together with your practical experience, will justify your taking a leading part and becoming a most valuable and useful member.

Trust you have had a most restful and pleasant vacation and that no opposition in the primaries has or will arise. Your splendid record in Congress, together with the esteem and confidence of the membership of the House in you, should certainly prevent any such opposition.

With warm esteem,
Your friend,
CLAUDE KITCHIN.

P. S.: Am thankful to say that I will soon be back to my "old self" in good shape.

C. K.

REPORTS ON FUNDAMENTAL BUSINESS CONDITIONS FOR MERCHANTS, BANKERS, AND INVESTORS.

WELLESLEY HILLS, MASS., *August 4, 1922.*

Hon. T. ALAN GOLDSBOROUGH,
House Office Building, Washington, D. C.

MY DEAR MR. GOLDSBOROUGH: I understand from our correspondence that a hearing is to be held on your bill for stabilizing the dollar toward the end of August. I hope to be present and to make a statement in person, but whether I shall be able or not I want to tell you how glad I am that you have brought forward this proposal. If you can convince Congress of the grave need of this legislation at this time you will have accomplished one of the greatest tasks ever set before statesmen. If you do not succeed in your first attempt, I hope you will keep everlastingly at it. Depend upon it, some day the dollar will be stabilized.

It is the growing consciousness of the need of stabilization which has led not only to Professor Fisher's plan, which your bill embodies, but to the less worked-out plans of Edison, Ford, Senator LADD, etc.

Business men and bankers have expressed alarm over some of these proposals on the ground that they may produce inflation. Any proposal the effect of which would be inflationistic ought to be nipped in the bud. What we want is something to prevent both, and that is the object and effect of the bill which you have introduced. The common idea that we must on principle oppose any plan to change our currency system is simply sitting on the safety valve. If something is not done to give us a scientific and stable currency, some unscientific and unstable currency will be enacted. The only way to head off instability is to make greater stability. The conservative man who is afraid of a change ought to support your bill, because our present system changes our monetary standard every year. This constant change in the purchasing power of our dollar is the greatest foe of conservative business. It makes a speculation of everything. For years I have been studying the business cycle and trying to help the business man by foresight to struggle through the cycle. But I have repeatedly said in my speeches and writings on this subject that until we had the Fisher plan or some equivalent for stabilizing the dollar the business man would always be suffering from the business cycle. The trolley companies, which were at one time so prosperous, were literally ruined by the depreciation of our dollar. I have made a special investigation of this. I could give instance after instance of the evils which come from a changing yardstick in commerce.

As ex-Vice President Marshall has said, next to the peace problem the problem of stabilizing the dollar is of the greatest importance.

I have studied Professor Fisher's plan from time to time with great care and the objections which have been alleged against it. As I have often said, only those who do not understand it oppose it.

Let me add that my audiences of business men all over the country when they have had the idea explained to them like it immensely.

The Congress which stabilizes the dollar will deserve and receive the everlasting gratitude of the business world.

With the most earnest wishes for your success, I am,
Very sincerely yours,
ROGER W. BABSON.

AMERICAN CHAMBER OF COMMERCE IN GERMANY,
Berlin, July 19, 1922.

To the Hon. T. ALAN GOLDSBOROUGH,
House of Representatives, Washington, D. C.

DEAR SIR: I thank you for sending me a copy of your speech on the stabilizing of the purchasing power of money. I read it through with great interest and found many ideas in it that were entirely novel and I find many of my friends appreciate them as keenly as I.

Under separate cover I have taken the liberty to send you our publication. If at any time we can be of service to you will you please feel at liberty to call on us.

Thanking you again, I remain
Very truly yours,
THE AMERICAN CHAMBER OF COMMERCE IN GERMANY.
ARTHUR E. DUNNING, *Executive Secretary.*

NEWTON 58, MASS., *July 31, 1922.*

Hon. T. ALAN GOLDSBOROUGH,
Member of Congress, Washington, D. C.

MY DEAR SIR: I have been greatly interested in your speech of May 23 on the problem of stable money. I am glad to note that there is to be a hearing on your bill. At the request of Prof. Irving Fisher I send you the inclosed statement of my views on this problem.

With best wishes.
Faithfully,
WILLIAM T. FOSTER,
Director, Pollak Foundation for Economic Research.

THE DOMINANT NEED OF BUSINESS: A STANDARD OF VALUE.

(By William T. Foster, director of the Pollak Foundation for Economic Research.)

Before the World War, a carpenter in Vienna loaned 3,000 Austrian gold crowns, the savings of a lifetime, the equivalent of a full year's wages. After the war the debtor returned to the carpenter in full legal settlement 3,000 depreciated paper crowns, the wages of three days' labor. Still further to illustrate the mockery of money as "a standard of value," Joseph Szebenyei tells of a traveler in a second-class restaurant in Vienna who offered the waiter a $20 gold piece in payment for a dinner bill of 300 kronen. The bewildered waiter, after examining the treasure with curiosity and delight, went to the proprietor and said:

"Here is a gentleman, sir, who wants to pay with a $20 gold piece. How much am I to give for it?"

Having received instructions from the landlord concerning current rates of exchange, the waiter returned to the guest and said, seriously, "I am to give you as much change, sir, as you desire."

This story illustrates how far short money can come of being a standard of value or a standard of deferred payments. No matter how much value the monetary "standard" may measure at any one time, it may soon measure no value at all. On the other hand, we have not heard of a customer, even in Austria, asking how many yards of silk he could buy for a gold coin and receiving the answer, "I am to give you, sir, as many yards as you desire." The yardstick is a standard—that is to say, a virtually invariable unit—money is not. So zealously is the yardstick guarded against fluctuation in length that the visitor in Washington who wishes to observe the standard yard of alloy in the glass case in which it is kept at uniform temperature must view it through a telescope lest the heat of his body might change the length of the bar one ten-thousandth part of an inch. How ridiculous it would seem to substitute for this standard yard the waist measurement of the President of the United States. How the unit would have shrunk, as Professor Fisher remarks, upon the inauguration of Mr. Wilson. Yet at one time the "yard" actually did vary with the girths of the chieftains, and the monetary "standards" of the world still do vary far beyond the physiological ranges even of the fat lady and the living skeleton at the circus. That is why, since 1914, the use of index numbers of prices to measure the shifting values of monetary units has spread rapidly, though nobody has needed an index number to keep track of the length of the yardstick. It is a true standard; money is not.

For one purpose only is money a standard. As long as the gold basis is adequate the power of money to purchase gold does not change; and this is an advantage to dentists and goldsmiths. They know precisely what weight and fineness of gold their dollars will buy year in and year out. The rest of us are equally protected; we have reason to feel complete confidence that our "good United States dollars" in any form will continue to be a standard of purchasing power in terms of gold, but not in terms of anything else. Unfortunately for us, it is almost always something else that we want to purchase.

It is often said that the chief difference between a money economy and a barter economy is due to the introduction of something whose value varies but little. "Money," says Prof. Alfred Marshall, "tends to steady the market." With the statement that money introduces into the processes of exchange a commodity whose value might be made virtually constant, many would agree; others would not agree. The fact is, however, that monetary units never have measured purchasing power with a constancy approaching that of our units for measuring space or temperature or force. Since the World War began money "standards" have been chaotic rather than constant. Whatever money might have done, if otherwise administered, it has in fact frequently unsteadied the markets of the world. The folly of thinking of money as a standard should be widely proclaimed until we succeed in making it a standard.

Paper money, when it is not actually and freely convertible into something which is regarded as valuable, is ridiculously far from

being a standard of value. The history of every country teaches this lesson with painful iteration. During the war of the American colonies for independence the irredeemable continental issues fell off in purchasing power until the phrase "not worth a continental" passed current as the money would not. Early in the nineteenth century Spain issued paper pesetos until they had depreciated 96 per cent, although the Government still declared them to be legal tender. During the same period Austria printed so many florins that eight of them would not buy a single silver florin. In the Argentine, in 1840, fiat money was issued in such quantities that it took thirty-two times as many paper pesos as formerly to buy an ounce of silver. During the Civil War in the United States irredeemable "greenbacks" were issued until, in 1865, according to the index number of wholesale prices, it took $219 to buy what $100 would buy in 1860. In Uruguay, in 1875, paper money increased in volume until the premium on gold ran as high as 875 per cent. Following the Satsuma insurrection, Japan issued inconvertible Government notes until the total circulation was more than 100,000,000 yen and the premium on silver was 79 per cent. In spite of these lessons of history, many European countries, during the World War and after, plunged into veritable debauches of irredeemable paper money.

In England money fell to about one-third of its pre-war purchasing power. In France, it fell further; in Italy, still further; while in Germany the mark fell below one-seventieth of its pre-war exchange value. In Austria, where paper money poured forth from the printing presses until it cost more to print a krone than a krone would buy, the thrifty proprietor of "Kronen Bier" used paper money for labels in order to reduce his printing bill. It remained for Russia to say the last word concerning irredeemable paper money as a standard of value. Lenin and Trotski pursued the policy of fiat money to its logical conclusion. As a result, a Russian 1-ruble note which was worth about 33 cents on the pre-war gold basis is not worth a peasant's notice on no basis at all. It takes more of these notes than his pockets will hold to buy a copper cent's worth of bread.

Ridiculous as it is to call money a standard which is based on nothing but the fiat of a government, it is equally ridiculous to call money a standard merely because it is based on land or public credit. A ship is not held in place when it is made fast to another ship, which is itself drifting. If land or public credit were the basis of money, the value of the basis in terms of dollars would itself increase with the depreciation of the dollar and thus provide eventually for issues of paper money as boundless as Russian rubles. Equally futile is the attempt to stabilize the purchasing power of monetary units by having them "represent" energy units, or labor hours, or production capacity, or merely anticipated output of wheat, or fertilizers, or anything else. Unless by "represent" we mean actual and free convertibility into a commodity having the characteristics of gold, representative money is inevitably unstable money.

All this now appears obvious to most people. Not so obvious is the fact that money is not necessarily a standard even when it is convertible into gold. Yet the recent experience of the United States, to cite none of the other numerous examples, proves that the "gold standard" itself is not a standard; that paper money may be on a genuine gold basis—that is to say, actually and freely convertible into gold at a fixed parity up to the limits of the demand for conversion—and yet be unstable in purchasing power. So far does the gold basis fail to make money a standard of value or a standard for deferred payments that the United States dollar of 1920 was worth not more than 38 per cent of the dollar of 1913. In other words, the wholesale price level increased during those years about 165 per cent. Even in time of peace the fact that paper money is convertible into gold does not make it a standard. Before the war various commodities were freer than dollars from fluctuation in exchange value. A depositor who wished to protect his savings against any variation whatever in exchange value could have achieved this purpose most nearly, it appears, by taking his dollars out of the savings bank and investing them in carpets. Carpets came nearer than dollars to being a standard for measuring purchasing power in the sense in which the yardstick is a standard for measuring carpets. From 1873 to 1896 money appreciated in gold-standard countries about one-quarter; from 1896 to 1914, on the other hand, money depreciated about one-third. In short, whether in time of war or in time of peace, the so-called gold dollar has proved unreliable in exactly the same way, though not to the same extent, as the inconvertible paper dollar.

A gold basis evidently does not necessarily stabilize the purchasing power of the superstructure of paper certificates and bank credit. But is not gold itself stable in value? Would it not be possible, therefore, to have a stable dollar if all money were either actual gold coins or paper certificates backed by 100 per cent of gold reserves? Far from it, for gold itself is unstable. In point of fact, as Jevons long ago demonstrated by means of index numbers of prices, the value of gold has varied greatly from time to time. During the 20 years preceding 1809 gold prices doubled, which is the same as saying that the value of gold was reduced 50 per cent. During the next 40 years the situation was reversed; the value of gold doubled and prices were cut in two. Then followed a period of rising prices up to 1873, during which the purchasing power of gold was reduced one-third. Since 1873 these up-and-down movements have continued.

Nevertheless in gold-standard countries at the present time gold is often regarded as the standard of value. The generally accepted idea is that the value of gold determines the purchasing power of the paper money that is based on gold reserves. On the contrary, the purchasing power of the gold is determined by the value of the paper money and all the other money, of which the gold is a small part. If it were not for the use in the United States of paper money and bank credit based on gold reserve, the gold dollar might now be 5,000 per cent higher in purchasing power. In that case $1 would buy a bicycle, but it would take a laborer more than two weeks to earn the dollar. In short, although the value of gold has always varied widely, its value in gold-standard countries has not fluctuated as widely during the past few decades as it would have fluctuated had gold been the only medium of exchange. Some of our present-day critics of the Federal Reserve System and of the bank credit and paper money that it supports quite overlook the fact that our dollar comes very much nearer to stability than would have been possible had every dollar been made of a fixed quantity of gold.

The value of gold, like that of any other commodity, is affected by changes in supply and demand. The supply of gold may be increased suddenly by the discovery of new mines or new processes; it may be increased a thousand fold by the invention of methods of making gold out of baser metals or extracting it from the sea—achievements that are no more chimerical than the phonograph. The demand for gold, on the other hand, even if gold were the only medium of exchange, might be changed at any time by changes in the amount hoarded, in population, in fashions, in the use of substitutes for gold in the arts, and above all by changes in the volume of commercial transactions. In short, even if gold were the only medium of exchange, neither the demand for gold nor the supply of gold would naturally fluctuate in any known or predictable relation to fluctuations in the work which money is called upon to perform. Therefore gold itself would fluctuate in purchasing power.

We must conclude that everyday thinking concerning economics would be relieved of one of its many confusions if our unstable monetary units were not again referred to as standards of value. In connection with our personal affairs—investments, insurance, family budgets, and daily purchases—even those who regard these remarks as commonplace do not consistently take into account shifting price levels. In business enterprises as well, men who are perfectly aware that prices are changing nevertheless frequently fall into economic error because they disregard the full effects of changing prices. Looking upon their book profits as though dollars were standards of value and prices were stable, they joyously expand their operations, and they commit themselves to future payments in money, merely to find to their dismay that their profits are only in depreciated goods, while their debts are legally payable only in appreciated dollars. Optimistically relying on money as a standard measure of foreign trade, a leading financial journal assured us early in 1921 that "exports from the United States to Germany in the fiscal year which ends with June, 1921, will be of greater value, measured in good American dollars, than in any year in the history of our trade relations." "Good American dollars" are good for what? When we answer that question correctly we find that exports to Germany in the year in question were really less than they had been for 20 years. The false conception of money as a standard of value has obscured its actual effects on the economic order.

INFLATION AND DEFLATION.

Much current controversy is due not to conflicting ideas but to conflicting uses of the same word. This is true of the monetary term inflation. When a nation has too much money it is said to have inflation. That is about as near as we can come to an accepted definition of the term. As to what constitutes having too much money there is no agreement. Most commonly, however, inflation is defined as a quantity of currency or bank credit, or both, in excess of "the legitimate requirements of business." So far so good, but what are the legitimate requirements of business? The answers to this question are many and varied; they agree for the most part only in being hazy. Such phrases as "the requirements of commerce," "trade needs," "the financial demands of industry," and "enough money to do business with," while appearing to be quantitatively exact, are in reality far from it. As they are used in everyday discussions of monetary problems these phrases merely add confusion to subjects that are already confusing. Prices and volume of money are definite factors, subject to approximately exact measurement; but what is the measure of "trade needs"? No definite measure whatever is used in connection with most of our current discussions of money. Yet it is possible to define inflation and the financial needs of business with quantitative precision.

If we are right in the contention that the chief monetary need of business is a stable price level, our interest in the volume of money centers around its effect on the price level. After all, most people care nothing about fluctuations in the supply of money until something startling happens to prices. If the world had experienced extraordinary expansions of currency only in connection with equally extraordinary trade revivals, accompanied by no extraordinary rise in prices, it is safe to say that monetary discussions would have found no use for the term inflation. It seems best, therefore, to define inflation with reference to changing price levels.

If we use the term inflation to denote any condition of money that permits a rise in the general price level, we confine ourselves to a definite and logical use of the term and one which directs attention at once to the practical problem with which business is chiefly concerned. Similarly, we may well define deflation as any condition of money which permits a fall in the general price level. Fruitless controversies are thus avoided over the question what is normal and the question whether, with a given volume of money at a given time, we have inflation or deflation, or neither. We do not now speak of normal and abnormal degrees of fever. Any rise at all in the temperature of the human body above 98½° is fever. On this point we do not argue or even ask the opinions of doctors; we read the thermometer. If we adopted an equally definite use of the term inflation, we should not consult economic doctors concerning the condition of money; we should read the index numbers of prices. If we found that the price level was rising—in other words, that the value of the monetary unit was falling—we should know that the currency had been inflated.

THE VICIOUS SPIRAL OF INFLATION.

Inflation leads naturally to further inflation. Once the upward movement of prices has started, there are at present no forces in the ordinary operations of business and finance sufficient to correct the fault. If the volume of money is freely "responsive to the needs of business," it is responsive to the needs of inflation. When prices are rising, no matter what the causes may be, prices tend to rise still higher. Higher prices lead to higher wages; higher wages lead to still higher prices. Higher dollar valuations of products are used as bases for larger bank loans; larger bank loans put more money into circulation and thus provide buyers with the means of further bidding up prices. In Germany, for example, following the World War, the danger of continued inflation decreased the value of the mark in foreign trade; this increased the real burden of the reparation payments; this, in turn, led the Government to call upon the Reichsbank for new loans, which caused still further depreciation of the mark. All this stimulated further speculation, which decreased the amount of money available for other uses, and thus led to new demands for new issues of currency, which led to higher prices, which incited the people to demand larger doles, which increased the Government budgets and forced upon those in power the recurrent alternative of printing more marks or being thrown out of office. Thus, wherever the volume of money is not regulated in the interests of a stable price level, the vicious spiral of inflation carries a nation on to a crisis.

Furthermore, inflation of the currency thrusts the financial burdens of a nation most disastrously upon people who are least able to bear them, on those with fixed incomes—clerks, teachers, some groups of wage earners, and all people with small salaries, and on widows and orphans dependent on pensions or insurance annuities or savings-bank accounts. Meantime, some holders of goods and some speculators in

the exchanges make vast fortunes out of the sufferings of others. In a remarkably sound and penetrating series of papers published in 1791, Pelatiah Webster describes the results of the contemporary inflation: "If it saved the State," he says, "it also polluted the equity of our laws; turned them into engines of oppression and wrong; corrupted the justice of our public administration; destroyed the fortunes of thousands who had most confidence in it; enervated the trade, husbandry, and manufactures of the country; and went far to destroy the morality of our people." In short, governments, by means of excessive issues of paper money or forced loans from the banks, destroy the standards which they themselves have set up, and thus deliberately repudiate large parts of their own debts. Inflation of the currency is, in fact, national, official repudiation of fundamental principles of justice.

DISASTROUS EFFECTS OF UNSTABLE MONEY.

Shifting price levels are disastrous morally, socially, economically.

Unstable monetary units are morally injurious because they are unjust. As a matter of justice, the dollars returned in payment for a loan should be the same as the dollars borrowed—the same in the only quality that matters, their purchasing power. Dollars are not standards of deferred payments unless their command over the general range of commodities remains virtually the same, year in and year out. When their purchasing power changes, either the debtor or the creditor loses more than justice demands. Our Austrian carpenter loaned his full year's wages and received in full payment the wages of three days. Thus does unstable money make a mockery of thrift. In gold-standard countries the injustice differs in degree, but not in kind.

Because shifting price levels provide these opportunities to get something for nothing, inflation does the moral damage of encouraging extravagance and wild speculation while it discourages thrift and honest labor. In describing the degenerating influences of one period of inflation, Andrew D. White says: "In city centers came a quick growth of stock jobbers and speculators, and these set a debasing fashion in business which spread to the remotest parts of the country. Then, too, as values became more and more uncertain there was no longer any more motive for care or economy, but every motive for immediate expenditure and present enjoyment. So came upon the Nation the obliteration of the idea of thrift. Luxury, senseless and extravagant, set in, and this, too, spread as a fashion. To feed it, there came cheating in the Nation at large and corruption among officials and persons holding trusts; and while the men set such fashions in business, private and official, women set fashions of extravagance in dress and living that added to the incentives to corruption. Faith in moral considerations, or even in good impulses, yielded to general distrust. National honor was thought a fiction cherished only by enthusiasts. Patriotism was eaten out by cynicism." It is impossible to tell, merely from reading this account, whether it was written to describe the condition of France during the "Mississippi bubble" orgy of speculation in the early eighteenth century, or the similar troubles of Austria in the early nineteenth century, or the reckless expansion of the continental currency in the United States during the Revolution, or conditions in central Europe in 1922, or—what the passage was written to describe—the experience of France during the revolution with the infamous paper assignats.

Travelers on the Continent now find business men, professional men, and even laboring men "exchange mad"; gambling seems to be their main occupation. This moral breakdown is only in small part, if at all, the necessary aftermath of war; it is, however, the inevitable result of vast inflation. It is sure to come, to some extent, with any degree of inflation. On the other hand, the alternative of financing a nation by depreciating the currency is the rigorous moral exercise of abstinence, economy, and hard work. There have been many futile attempts to make people moral by government regulation, but no government has had the courage to make full use of the most effective methods at its disposal. Nothing within the power of the State would do so much for public morality as stable money.

INFLATION AND SOCIAL UNREST.

Inflation leads to social unrest, for whatever is morally wrong is socially intolerable. Whenever certain groups, through no virtue of their own, are prospering, while other groups, through no fault of their own, are suffering, there is cause for protest against the established economic order. The protests are directed anywhere except in the right directions, for few people understand where their troubles begin. Meantime their troubles are real and their resentment is righteous.

Following inflation, profits inevitably rise faster than wages, and rising profits inevitably incite a rising spirit of revolt. Workers everywhere are more likely to be content with low wages when business is bad than with high wages when business is good. No wages whatever, no matter how far above the amount carefully figured by labor leaders or by economists as required "to keep a typical family of five in health and comfort," will be satisfactory as long as workers believe that the conditions of the business warrants higher wages. As the profits of war industries increased in England laborers demanded "a fair share of the increase." They had no means of knowing what a fair share would be, nor did they much care. It seemed to them that employers were making all they could make; there seemed nothing to do but follow the example. And as money profits were really piling up, employers put up wages rather than run any risk of strikes. The increased pay roll was promptly provided by the increased prices of the products. The consumers of these products paid the bill. Wherever the employers had war contracts on a cost plus commission basis they had no objection to higher wages; the higher the wages the higher the profits. In such cases the consumers were all the people, and all the people paid in taxes, direct and indirect, both the wages and the profits. Thus inflation led to the high cost of living and to widespread discontent. Says the French proverb, "After the printing press, the guillotine."

As wages rose in the United States during the war, wage earners went into the markets with the expectation of buying more goods than they had been accustomed to buy with their old wages, for they were still more or less attached to the idea of money as a standard of value. They thought that, with more dollars than they had ever dreamed of getting, they ought somehow to be better off than ever before; yet they felt that they were not as well off. And they were not. They said that the level of the river does not and can not change; it seems useless to seek their aid in the adoption of flood-prevention measures. Meantime, their refusal to face the facts and their failure to devise safe and practicable remedial measures make it easy for Mr. Ford and Mr. Edison, and innumerable other equally misguided though less distinguished reformers, to arouse popular enthusiasm for measures that would merely lead us from monetary confusion to monetary chaos.

INFLATION IS ECONOMICALLY DISASTROUS.

In the stress of a nation's need, inflation deceives the people generally, and often the Government itself, by making it seem easier than it really is to obtain the sinews of war—or the after-war sinews of bonus payments. On a boundless expanse of paper currency any loan whatever can be floated to-day and a larger one to-morrow. It is "easy money." The trouble does not begin until the Government tries to exchange the money for something useful—and the trouble does not end until the easy money is offset by hard work. If the process of raising a war loan doubles prices, the Government finds when it spends the money that it can obtain only half the needed cannons and shells. The dollars themselves do not go to the front. Meantime, no pressure has been brought to bear upon the people to produce more and to consume less. On the contrary, as we have already seen, inflation promotes extravagance in consumption, and, as we shall now see, it also promotes inefficiency in production.

Inflation, it is true, increases profits, and profits stimulate industry; but the stimulus fails like the gentle rain from heaven on the just and the unjust—the producers who hinder as well as those who aid the winning of the war and the winning of the peace that follows. Furthermore, the stimulus is only temporary. Although rising profits at first increase production, they also increase a kind of social unrest that soon interferes with production. The object of Government financing during the war was necessarily to obtain more goods, and more goods were obtained as long as increased bank credit enabled employers to put idle people and idle machinery to work. The country soon reached the point, however, where it was employing virtually every man and every woman who was able and willing to work. After that, employers could add to their own staffs only by taking laborers away from other employers. At this point competition among employers for workers inevitably resulted in higher wages and, consequently, in new demands on the banks for increased working capital. But bank credit created for the purpose of enabling somebody to take workers or orders away from somebody else did not increase production. There was no gain in the efficiency of the workers; on the contrary, the workers, already incensed over "war profiteering," had less incentive to efficiency than ever, since they knew that if they lost one job they had only to go across the street to find another job. Moreover, the unusually high profits led to careless business methods; and excess-profits taxes led to further extravagance, prompted by the thought that a large part of what might be saved would be taken by the Government in taxes. The net results of inflation—of thus placing new purchasing power on the markets without a corresponding increase in production—were a further rise in prices, followed by further inflation, followed by further economic inefficiency.

Morally, socially, and economically the dominant monetary need is a unit of exchange that is a true standard of value.

In the face of all these facts, obvious as they seem, we find leaders in the world of commerce and finance still insisting that the American gold dollar is a satisfactory standard, stable in purchasing power. In the editorial columns of the Commercial and Financial Chronicle appears this eulogy: "To-day, this dollar, in the confusion of finances, the disorder of so-called 'exchanges,' the debasement of foreign currencies, stands alone, unchanged, and unchanging. Because it exemplifies the gold standard, in itself, it is stable. Why or how has its 'purchasing power' diminished? This is a supreme fallacy—it has not. It stands out above the carping critics who would make it a shifting thing. Around it whirled a fateful war, and it stood fast. But only because back of the American dollar is the gold dollar, and back of the gold dollar is the gold standard—and that though 'tried' is not found wanting." In another editorial, we read that "the gold standard as a standard does not change at all," and the American dollar is the "sole and chief representative of stability in the monetary world of to-day." Thus is expressed that unreasoned faith in the stability of the gold standard which has become a cardinal point in the creed of many business men, and which prompts them hastily to reject, without due consideration, all proposals for stabilizing price levels—the worthy along with the unworthy. Such men obstruct economic progress. If people who are being carried away by a flood still insist again and again that they should be glad to return to their pre-war wages and pre-war prices. They believed that somehow they were being fooled. They condemned employers, shareholders, "profiteers," "Wall Street," the Federal reserve system; in short, they condemned everybody who seemed to be profiting by the war while they themselves seemed to be losing.

As wages were put up in "essential" war industries, they had to go up eventually in virtually all other industries. The substantial increases in the pay of munition makers in England, like the increases in the pay of metal workers, shipbuilders, and railroad men in the United States, unsettled the economic order. Ordinary and accepted relations between the wages of various groups of workers were upset. Unrest followed. As soon as the increased wages of munition workers were charged up to other workers in higher prices and higher taxes, the other workers demanded the wherewithal to pay the higher bills. But before they received their new wages the bills were higher still. So they demanded further increases. These increases promptly went into costs, and prices continued to rise. For wages, as a whole, it was an uphill struggle to overtake prices which had started up the hill first and seemed to keep the lead without even a struggle. Thus the vicious spiral of inflation is always a vicious cause of injustice, and so of industrial unrest.

Mr. HILL. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by printing the correspondence between Prohibition Commissioner Haynes and myself on the interpretation of the Volstead Act.

The SPEAKER. The gentleman from Maryland asks unanimouse consent to extend his remarks in the RECORD on the subject indicated. Is there objection?

There was no objection.

UNDER THE VOLSTEAD ACT IS 2.75 PER CENT CIDER PERMITTED? IF SO, WHY NOT 2.75 PER CENT BEER?

Mr. HILL. Mr. Speaker, the housewives of Maryland are universally desirous of knowing what section 29 of the Volstead Act means in order that they may guide themselves in the preparation of home-made beverages for winter use. The farmers desire to know when they can and when they can not legally drink cider. The residents of the city are equally anxious to

know what kind of dandelion wine and home-made beer is legal. They are entitled to know.

Since April 26, 1922, I have been trying to find out from the Prohibition Commissioner. The following correspondence forces me to conclude that the Volstead Act is so worded that the Prohibition Commissioner can not interpret it. I therefore submit the whole correspondence to the House of Representatives for its consideration. There are eight letters following with their respective inclosures:

HOUSE OF REPRESENTATIVES,
COMMITTEE ON MILITARY AFFAIRS,
Washington, D. C., April 26, 1922.

Maj. R. A. HAYNES,
Prohibition Commissioner,
Bureau of Internal Revenue, Washington, D. C.

DEAR SIR: Inclosed herewith copy of H. R. 11410, providing for the creation of Federal local option districts coordinate with existing congressional districts, and a vote next November in each of such districts on the question of the liberalization of the national prohibition act as to 2.75 per cent beer and 2.75 per cent cider (including dandelion wine and other such fruit and vegetable beverages).

It was recently stated on the floor of the Maryland House of Representatives that the rules of your office permitted the possession and consumption in the home of cider with an alcoholic content of from 6 to 8 per cent. This statement was denied, and other conflicting statements in reference to this matter were made.

Therefore I desire to ask officially your reply to be used by me before the Ways and Means Committee in asking a hearing on the above entitled bill, the following questions:

1. Under the national prohibition act, what is the percentage of alcohol permitted by your office for use in the home as "nonintoxicating." I desire also to ask specifically whether cider containing 2.75 per cent of alcohol by volume is permissible for use in the home; and
2. Whether the same can be transported; and
3. Whether the same can be sold.

I shall be greatly obliged if I may promptly receive this information, together with any and all regulations of your office relating to the use of cider containing an alcoholic content of one-half of 1 per cent or over.

The information furnished by you I desire to be in such form as to be available for use by me either before the House of Representatives itself or before any of its committees.

Yours very truly,

JOHN PHILIP HILL,
Member of Congress.

—

A bill (H. R. 11410) to create Federal local option districts, to provide money to pay the expected deficit in the Treasury, to amend the revenue act of 1921, and for other purposes.

Be it enacted, etc., That the revenue act of 1921, Title VI, "Tax on beverages and constituent parts thereof," is hereby amended by the addition of the following section:

"SEC. 604. (a) That from and after the passage of this act each of the congressional districts from which a Member of the House of Representatives is chosen shall constitute a Federal local option district.

"(b) That in the election to be held for choosing such Members of the House of Representatives in November, 1922, the electors of each such Federal local option districts shall decide by vote whether there shall be manufactured, sold, or transported in such district beer or cider as hereinafter defined.

"(c) That the word 'beer' means any beverage obtained by the alcoholic fermentation of an infusion or decoction of barley, malt, and hops in drinkable water containing not more than 2.75 per cent of alcohol by volume. That the word 'cider' means any beverage obtained by the natural fermentation of apple, or other fruit, vegetable, or herb juices containing not more than 2.75 per cent of alcohol by volume.

"(d) That if in any such Federal local option district the majority of the said electors shall vote 'for beer' or 'for cider,' thereafter in such Federal local option district such beer or cider is hereby defined not to be an intoxicating liquor, the manufacture, sale, or transportation of which in said district is prohibited by the eighteenth amendment of the Constitution of the United States, but that thereafter said beer or cider may be manufactured, sold, or transported for sale in original packages for consumption in homes and places other than the place of sale.

"(e) That there shall be levied, assessed, and collected on all beer or cider so manufactured a tax of 20 cents per gallon, all moneys so collected to be used for the general purposes of the Treasury.

"(f) That all legislation inconsistent herewith is hereby repealed."

—

TREASURY DEPARTMENT,
BUREAU OF INTERNAL REVENUE,
OFFICE OF FEDERAL PROHIBITION COMMISSIONER,
Washington, May 2, 1922.

Hon. JOHN PHILIP HILL,
House of Representatives.

MY DEAR MR. HILL: Receipt is acknowledged of your letter of April 26, 1922, inclosing copy of a bill, H. R. 11410, introduced by you on April 24, 1922, for the amendment of the revenue act of 1921, by the addition of a new section, No. 604, to title 6 thereof, imposing taxes on beverages and constituents thereof. The bill would establish Federal local option districts and defines beer and cider for referendum purposes as nonintoxicating when containing not more than 2.75 per cent of alcohol by volume, and provides for a tax thereon.

The questions submitted by you are answered in the order in which stated, as follows:

1. Under the provisions of section 29 of title 2 of the national prohibition act this office has ruled that cider and other nonintoxicating fruit juices, manufactured exclusively for use in the home of the maker, are not necessarily limited to less than one-half of 1 per cent of alcohol by volume but must be intoxicating, in fact, to be in violation of the national prohibition act. No specific alcoholic limit has been publicly fixed. As at present advised, this office is not disposed to take action against the manufacture for use in the home of the maker of cider or other fruit juices containing not more than 2.75 per cent of alcohol by volume.

2. Cider or other fruit juices, nonintoxicating in fact, made exclusively for use in the home of the maker may be moved under permit from one residence of the producer to another. However, if cider or fruit juice for use in the home of the maker is manufactured otherwise than in the home it must be removed to the home before the alcoholic content reaches one-half of 1 per cent.

3. Under the provisions of section 29 of title 2 of the national prohibition act, nonintoxicating cider and other fruit juices made exclusively for use in the home may be sold only to vinegar makers who hold permits and pursuant to permits to purchase. The sale for beverage purposes, in the home or elsewhere, of cider or other fruit juices containing one-half of 1 per cent or more of alcohol by volume, or for such purposes after such alcoholic content has developed, is not permissible.

As requested by you, there are inclosed herewith one copy each of regulations 60, Treasury Decisions 3033 and 3077 (Pro. Mims. 84, 127, and 135), and a statement to the press dated September 20, 1921. The Pro. Mims. and the press statement relate more particularly to the manufacture of cider and other nonintoxicating fruit juices for use in the home exclusively. Particular attention is also called to sections 1, 3, 4, 6, 12, 17, 18, 19, and 29 of title 2 of the national prohibition act, the text of which will be found in the appendix to regulation 60. Attention is also invited to articles 2, 3, 5, and 8 of the regulations. Treasury Decision 3033 relates in part to penal sums of bonds for cider makers. Treasury Decision 3077 places the burden of proof on the manufacturer of cider and other similar alcoholic beverages or liquids to show that the alcoholic content was less than one-half of 1 per cent at the time of removal from the place of manufacture, in case such liquid is found on the market containing one-half of 1 per cent or more of alcohol by volume.

Sincerely yours,

R. A. HAYNES,
Prohibition Commissioner.

—

HOUSE OF REPRESENTATIVES,
COMMITTEE ON MILITARY AFFAIRS,
Washington, D. C., June 12, 1922.

Mr. ROY A. HAYNES,
Prohibition Commissioner, Bureau of Internal Revenue,
Treasury Department, Washington, D. C.

DEAR SIR: On May 2, answering my inquiry of April 26, you advised me officially that your office had ruled that cider and other alcoholic fruit juices manufactured exclusively for use in the home "are not necessarily limited to less than one-half of 1 per cent of alcohol by volume, but must be intoxicating in fact to be in violation of the national prohibition act." You then continued with the following official statement:

"No specific alcoholic limit has been publicly fixed. As at present advised, this office is not disposed to take action against the manufacture for use in the home of the maker of cider or other fruit juices containing not more than 2.75 per cent of alcohol by volume."

I have read with great interest your memorandum for Commissioner Blair, of June 7, 1922, released for publication in the papers of this morning, in which you attach a summary of the activities of the prohibition unit during the first year of your incumbency. I note with especial interest your remarks concerning the reorganization of your Washington office and the prohibition forces in the United States, and especially your statement prepared for publication, in which you say to Commissioner Blair, "And finally, Mr. Commissioner, I am gratified to inform you that, in spite of the tremendous volume of business now being transacted by this unit, the work is practically current, not only in the Washington office but also in the various offices scattered throughout the United States, a few exceptions being noteworthy."

Your office having been reorganized and your work being up to date, I am writing to ask you whether your statement of May 2 remains in force, that "no specific alcoholic limit has been publicly fixed" for cider and other alcoholic fruit juices.

At this season of the year, I am informed, the women of my district are making home-made grape wines, and they will soon be making blackberry cordials and other home-made beverages; also at this season of the year my farmer friends in Maryland are preparing to make their cider. I therefore ask you for an official definition of what is a "nonintoxicating fruit juice." You have already advised me that your office is not disposed to take action against the manufacture for use in the home of the maker of cider and other fruit juices containing not more than 2.75 per cent of alcohol by volume. Will you be good enough to advise me whether your office has yet changed its ruling that "no specific alcoholic limit has been publicly fixed"? I think the time has come when you should fix a specific alcoholic limit for cider and other nonintoxicating fruit juices for the information of the housewives and farmers of Maryland and other States. I should be obliged for a prompt and specific reply.

Yours very truly,

JOHN PHILIP HILL,
Member of Congress.

—

HOUSE OF REPRESENTATIVES,
COMMITTEE ON MILITARY AFFAIRS,
Washington, D. C., June 22, 1922.

Mr. ROY A. HAYNES,
Prohibition Commissioner,
Treasury Department, Washington, D. C.

SIR: In reference to my recent letter to you concerning the alcoholic content of cider, I inclose herewith a sheet from the Baltimore American of Tuesday, June 20, 1922, containing an open letter from A. J. Williamson, assistant superintendent Maryland Anti-Saloon League, in which he makes the following statement:

"The present regulations made in pursuance of the Volstead Act permit the farmer to make cider and let it ferment and become intoxicating, allows him to drink it in his home, or give it to his friends when they drop in—in fact, laying only one prohibition upon him, which is that he must not sell the same as a beverage after it becomes hard."

In view of this statement by the Anti-Saloon League, I again request that you advise me whether you have yet fixed a standard for the alcoholic content of cider and fruit juices made and to be consumed in the home.

Yours very truly,

JOHN PHILIP HILL,
Member of Congress.

[From the Baltimore American.]

WELL, IF THE FARMER IS ALLOWED TO MAKE AND KEEP INTOXICATING LIQUORS, WHY IN THE NAME OF THE CONSTITUTION SHOULD THE NONFARMER BE DISCRIMINATED AGAINST?

To the EDITOR OF THE AMERICAN:

So much has been published in the newspapers, especially in Baltimore, on the subject of the Volstead law, and so much of it is not only unfair but untruthful, that I am impelled, though reluctantly, to offer you the following:

You assume the position in your editorials that the saloon is gone, that you are glad of it, and that you believe the attempt to repeal the eighteenth amendment is useless and unwise. The amendment provides for the abolishment not only of the saloon specifically but of the manufacture, sale, etc., of intoxicating liquors as a beverage. There also rests upon the Congress and the several States the specific duty of enacting laws sufficiently strong and prohibitive for the accomplishment of the plain intent of the amendment.

The Volstead Act was very carefully scrutinized in the committees of both Houses of Congress, and is based on the experience gained in enforcing prohibition of the liquor traffic in 36 whole States, in cities, villages, and towns, and also represented the opinion of those representing various interests which would be affected by the new order. For instance, when it came to the question of the use of intoxicating liquors in the observance of religious rites, Jewish rabbis, Catholic priests, Lutheran and Protestant Episcopal ministers, whose custom it is to use wine in religious services, were invited to confer with the committee, to the end that these matters might be regulated so that the object sought might be obtained with the least trouble and inconvenience. It is a fact which has not been given any publicity to speak of that the head of every Jewish household may under the Volstead Act in exercising the rites of religion in the family use 10 gallons of wine a year. Notwithstanding that, a large number of the more intelligent rabbis in the country maintain that fermented wine is not necessary to the observance of their religious ceremonies.

The same care was taken regarding the manufacture and use of alcohol in the arts and sciences. The present regulations made in pursuance of the Volstead Act permit the farmer to make cider and let it ferment and become intoxicating, allows him to drink it in his home or give it to his friends when they drop in—in fact, laying only one prohibition upon him, which is that he must not sell the same as a beverage after it becomes hard. But before an officer can enter his home or make him trouble in any way he must have a warrant obtained from the proper officer upon legal proof, and is menaced with a high fine and imprisonment if he undertakes to perform his duties in any other way than is strictly provided for in the search and seizure provisions of the law.

Much has been said as to the injunction provisions of the act, and one would think from what he reads in the daily press that trial by jury is incidental and not characteristic of the law. The contrary is the truth. So far as I can learn, only one injunction has been issued by Federal Judge Rose in his court. All other cases have been tried by jury.

A great deal of nonsense has been uttered from time to time about the sacred right of a citizen to be tried by a jury of his peers. In days when kings were absolute, judges were not elected but appointed by the ruler. The courts were often subservient to the appointing power, and there was great danger that rapacity or desire for revenge by rulers should create monstrous injustice. But in these days in nine cases out of ten, a judge or a bench of judges elected by the people can and will pass upon cases with more certainty as to the law and to facts than a jury of 12 men, some of whom, at least, are likely to be ignorant if not prejudiced. Jurors often forget their oath on account of their sympathy for the offender and refuse to turn in a verdict of guilty when the case clearly shows the guilt of the accused.

If the amendment is to stay, then some law must be passed by Congress and some law should be passed by Maryland that will provide for an honest and fair enforcement of the amendment. Congressman HILL and his friends opposed to prohibition are asking for a law that would require any Congressman or Senator voting for the bill to violate his oath of office, in which he is solemnly pledged to uphold the Constitution of the United States. Is wine containing from 6 to 14 per cent alcohol intoxicating? Is beer an intoxicating liquor? It is impossible for a man to take off his shoe and put it on in the same action. So it is impossible to enact the eighteenth amendment prohibiting the manufacture and sale of intoxicating beverages and then enact a law which in effect says that the Constitution does not mean what it declares.

A. J. WILLIAMSON,
Assistant Superintendent Maryland Anti-Saloon League.

BALTIMORE, JUNE 17.

TREASURY DEPARTMENT,
BUREAU OF INTERNAL REVENUE,
OFFICE OF FEDERAL PROHIBITION COMMISSIONER,
Washington, June 20, 1922.

Hon. JOHN PHILIP HILL,
House of Representatives.

MY DEAR MR. HILL: Receipt is acknowledged of your letter of June 12, 1922, in which you make inquiry as to whether or not this office has fixed a specific alcoholic limit for nonintoxicating cider and fruit juices under the exempting provision of section 29 of Title II of the national prohibition act.

You urge that such limitation be now fixed by this office.

In regard thereto, you are informed that this office does not deem it expedient to fix such limitation, in view of the fact that Congress has not done so and the courts have not as yet definitely settled the question.

Sincerely yours,

R. A. HAYNES,
Prohibition Commissioner.

(Copy attached.)

HOUSE OF REPRESENTATIVES,
COMMITTEE ON MILITARY AFFAIRS,
Washington, D. C., June 27, 1922.

THE FEDERAL PROHIBITION COMMISSIONER,
Bureau of Internal Revenue, Treasury Department,
Washington, D. C.

DEAR SIR: I have your letter of June 20, in which you state that your office has not fixed a specific alcoholic limitation for so-called nonintoxicating cider and fruit juices under the exempting provision of section 29 of Title II of the national prohibition act. I note the position taken in your letter to the effect that your office "does not deem it expedient to fix such limitation, in view of the fact that Congress has not done so and the courts have not as yet definitely settled the question."

On June 5 I received a letter from the Secretary of the Treasury concerning charges I had filed against you in your official capacity, in which he stated that these charges had been referred to the Commissioner of Internal Revenue for investigation. On the same day I wrote to the Commissioner of Internal Revenue, in part, as follows:

"I take this occasion to add an additional specification to the previous charge against Prohibition Commissioner Haynes. I charge that he has flagrantly failed to enforce the provisions of the Volstead Act in reference to the manufacture of homemade cider.

"In an official letter to me of May 2, 1922, in answer to a question propounded by me and stated by me to be asked for the purpose of using in the House of Representatives or before some committee of Congress, the prohibition commissioner stated:

"'Under the provisions of section 29 of Title II of the national prohibition act, this office has ruled that cider and other nonintoxicating fruit juices, manufactured exclusively for use in the home of the maker, are not necessarily limited to less than one-half of 1 per cent of alcohol by volume, but must be intoxicating in fact to be in violation of the national prohibition act. No specific alcoholic limit has been publicly fixed. As at present advised, this office is not disposed to take action against the manufacture for use in the home of the maker of cider or other fruit juices containing not more than 2.75 per cent of alcohol by volume.'"

I presume that your letter to me of June 20 contains an answer to the above charge against you when you say that your "office does not deem it expedient to fix such limitation in view of the fact that Congress has not done so."

In order to meet this statement, I at once introduced H. R. 12141, a bill to amend the national prohibition act by putting cider and beer on precisely the same basis.

Under your ruling, as stated in your letter to me of May 2, your "office is not disposed to take action against the manufacture for use in the home of the maker of cider or other fruit juices containing not more than 2.75 per cent of alcohol by volume." You justify this ruling by the provisions of section 29 of Title II of the national prohibition act, which at present provides that "the penalties provided in this act against the manufacture of liquor without a permit shall not apply to a person for manufacturing nonintoxicating cider and fruit juices exclusively for use in the home."

H. R. 12141 inserts the word "beer" after the word "cider," and should this amendment to the national prohibition act be adopted, would bring beer under your ruling and would permit the manufacture for use in the home of the maker of beer as well as cider and other fruit juices containing not more than 2.75 per cent of alcohol by volume.

Since you have made no effort to have legislation passed by Congress to change the above ruling in reference to cider, I assume that you are in favor of putting beer on the same equality. I, therefore, request that you give to me for presentation to the Judiciary Committee of the House of Representatives an official communication as to whether or not you favor the extension of your liberal ruling on cider to beer, giving the reasons why you favor or oppose putting beer and cider on precisely the same basis.

I shall be obliged for a prompt response on this matter, since I desire to take up the matter with the Judiciary Committee prior to the proposed recess on Saturday, July 1.

Very truly yours,

JOHN PHILIP HILL,
Member of Congress.

A bill (H. R. 12141) to amend the national prohibition act.

Be it enacted, etc., That the act entitled "An act to prohibit intoxicating beverages, and to regulate the manufacture, production, use, and sale of high-proof spirits for other than beverage purposes, and to insure an ample supply of alcohol and promote its use in scientific research and in the development of fuel, dye, and other lawful industries," which became a law October 28, 1919, otherwise designated by its short title as the national prohibition act, be, and the same is hereby, amended in title 2, section 1, by inserting the word "cider" between the words "beer" and "ale" wherever such words occur, and in title 2, section 29, by inserting the word "beer" after the word "cider" wherever the same occurs.

TREASURY DEPARTMENT,
BUREAU OF INTERNAL REVENUE,
OFFICE OF FEDERAL PROHIBITION COMMISSIONER,
Washington, July 3, 1922.

Hon. JOHN PHILIP HILL,
House of Representatives.

MY DEAR MR. HILL: Receipt is acknowledged of your letter of June 27, 1922, inclosing copies of the proposed bill, designated as H. R. 12141, which apparently is designed to amend the national prohibition act and authorize the manufacture, sale, and use of malt liquors containing 2.75 per cent of alcohol by volume for beverage purposes.

Reference is also made in your letter to the communication addressed you by this office on May 2, 1922, which contains the statement that "as at present advised, this office is not disposed to take action against the manufacture for use in the home of the maker of cider or other fruit juices containing not more than 2.75 per cent of alcohol by volume."

In a letter addressed you on June 20, 1922, the statement was made that this office does not deem it expedient to fix a limit or percentage of alcohol by volume which will render nonintoxicating fruit juices manufactured exclusively for use in the home as provided by section 29 of title 2 of the national prohibition act intoxicating in fact. This office adheres to the ruling contained in the letter of June 20, 1922.

Relative to the declaration in letter of May 2, 1922, that this office would not proceed against persons manufacturing cider or other fruit juices containing as much as 2.75 per cent of alcohol by volume, this statement was embodied by the draftsman under a misapprehension of the position of this office, as such is not its view, and no instructions to that effect have been promulgated.

Relative to the indorsement or approval of proposed H. R. 12141 you are informed that this office is not disposed to approve the inser-

tion of the word "cider" between the words "beer and ale" wherever such words occur in section 1 of title 2 of the national prohibition act, or to insert the word "beer" after the word "cider" wherever same occurs in section 29 of said act.

The reasons for declining to approve your proposed measure are as follows:

The provisions for manufacturing nonintoxicating cider and fruit juices exclusively for use in the home differ very materially from the manufacture of malt liquors such as beer, ale, and porter exclusively for use in the home or elsewhere.

It has been the practice from time immemorial for farmers and other householders in rural communities to manufacture cider for conversion into vinegar, which is a condiment for family use, and also to manufacture grape and other fruit juices, which are frequently sterilized and preserved in sealed glass containers for family use. The manufacture of malt liquor such as beer, ale, and porter in the home by the housewife for family use has seldom, if ever, been practiced until the advent of local or national prohibition. They have always been used as beverages and have practically no use for conversion into condiments such as vinegar. Furthermore, it is entirely impracticable to make a satisfactory and wholesome malt liquor in the home, and the course suggested by you would necessarily mean the manufacture of the malt liquors in breweries and further amendments to laws to provide for their distribution, sale, and use with or without tax payment.

This office has not recommended liberalization or amendment of the national prohibition act on its own initiative, since such course is wholly at variance with the departmental rules and practice.

Sincerely yours,

R. A. HAYNES,
Prohibition Commissioner.

(Copy attached.)

—

HOUSE OF REPRESENTATIVES,
COMMITTEE ON MILITARY AFFAIRS,
Washington, D. C., August 15, 1922.

Mr. ROY A. HAYNES,
Prohibition Commissioner,
Treasury Department, Washington, D. C.

SIR: The House of Representatives reconvening to-day, I have made a careful check of my mail to find whether, further answering my letter of June 27, your office has yet promulgated for the information of the American housewives any interpretation of section 29 of title 2 of the Volstead Act, relating to cider and other nonintoxicating fruit juices.

During the recess of the House of Representatives I have been in touch with housewives all over Maryland and in Baltimore city and find that they are universally desirous of knowing what section 29 of the Volstead Act means in order that they may guide themselves in the preparation of homemade beverages for winter use.

I therefore repeat to you the question contained in my letter of April 26, 1922, you having in your letter of July 3 disclaimed the information on this subject given to me in your official letter of May 2.

In my letter of April 26, 1922, I said: "I desire to ask officially, your reply to be used by me before the Ways and Means Committee, the following question: 'Under the national prohibition act, what is the percentage of alcohol permitted by your office for use in the home as nonintoxicating?'"

In your letter to me of July 3 you stated:

"Reference is also made in your letter to the communication addressed you by this office on May 2, 1922, which contains the statement that 'as at present advised this office is not disposed to take action against the manufacture for use in the home of the maker of cider or other fruit juices containing not more than 2.75 per cent of alcohol by volume.'"

You then retracted the above statement made by your office in the following language:

"Relative to the declaration in letter of May 2, 1922, that this office would not proceed against persons manufacturing cider or other fruit juices containing as much as 2.75 per cent of alcohol by volume, this statement was embodied by the draftsman under a misapprehension of the position of this office, as such is not its view, and no instructions to that effect have been promulgated."

Will you kindly give me a corrected answer to my question propounded on April 26, "What are the regulations of your office in reference to section 29 of title 2 of the Volstead Act?" Also, under the national prohibition act, What is the percentage of alcohol permitted by your office for use in home brews as "nonintoxicating"?

Yours very truly,

JOHN PHILIP HILL,
Member of Congress.

On May 2, 1922, the prohibition commissioner thought 2.75 per cent cider legal. Now, he does not know.

On June 20, 1922, he stated that Congress had not fixed the alcoholic limit for cider.

I feel confident, my colleagues, that after considering the above correspondence you will agree with me that the Volstead Act must be repealed.

Mr. GARRETT of Tennessee. Mr. Speaker, I make the point that no quorum is present.

Mr. MONDELL. Mr. Speaker, I move that the House do now adjourn.

Mr. GARRETT of Tennessee. And on that, Mr. Speaker, I ask for the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 128, nays 64, not voting 235, as follows:

YEAS—128.

So the motion to adjourn was agreed to.

The following pairs were announced:

Mr. Burton (for) with Mr. Oldfield (against).
Mr. Wood of Indiana (for) with Mr. Sisson (against).
Mr. Thompson (for) with Mr. Tague (against).
Mr. Dowell (for) with Mr. Aswell (against).
Mr. Schall (for) with Mr. Jacoway (against).
Mr. Beck (for) with Mr. Sabath (against).
Mr. Lineberger (for) with Mr. Sanders of Texas (against).
Mr. Crowther (for) with Mr. Kitchin (against).

Mr. Keller (for) with Mr. Black (against).
Mr. Wyant (for) with Mr. Collier (against).
Mr. Osborne (for) with Mr. Ten Eyck (against).
Mr. Radcliffe (for) with Mr. Bell (against).
Mr. Scott of Tennessee (for) with Mr. Deal (against).
Mr. Knutson (for) with Mr. Woods of Virginia (against).
Mr. Madden (for) with Mr. Cockran (against).
Mr. Leatherwood (for) with Mr. Dupré (against).
Mr. Christopherson (for) with Mr. Overstreet (against).
Mr. A. P. Nelson (for) with Mr. Riordan (against).
Mr. Brooks of Illinois (for) with Mr. Hayden (against).
Mr. French (for) with Mr. Wise (against).
Mr. Kiess (for) with Mr. Bankhead (against).
Mr. Reber (for) with Mr. Swank (against).
Mr. Knight (for) with Mr. Tyson (against).
Mr. Mills (for) with Mr. Cullen (against).
Mr. McKenzie (for) with Mr. O'Brien (against).
Mr. Connelly of Pennsylvania (for) with Mr. Montague (against).
Mr. Funk (for) with Mr. Steagall (against).
Mr. Taylor of New Jersey (for) with Mr. Johnson of Kentucky (against).
Mr. McLaughlin of Pennsylvania (for) with Mr. Barkley (against).
Mr. Codd (for) with Mr. Logan (against).
Mr. Reed of New York (for) with Mr. Dominick (against).
Mr. Newton of Minnesota (for) with Mr. Pou (against).
Mr. Stiness (for) with Mr. Raker (against).
Mr. Patterson of Missouri (for) with Mr. Goldsborough (against).
Mr. Webster (for) with Mr. Thomas (against).
Mr. Kline of Pennsylvania (for) with Mr. Crisp (against).
Mr. Gahn (for) with Mr. Mead (against).
Mr. Cramton (for) with Mr. Connally of Texas (against).
Mr. Atkeson (for) with Mr. Mansfield (against).
Mr. Henry (for) with Mr. Quin (against).
Mr. Ackerman (for) with Mr. Hawes (against).
Mr. Haugan (for) with Mr. Rainey of Illinois (against).
Mr. Colton (for) with Mr. Fisher (against).
Mr. McArthur (for) with Mr. Carew (against).
Mr. Jones of Pennsylvania (for) with Mr. Kindred (against).
Mr. Kennedy (for) with Mr. Lea of California (against).
Miss Robertson (for) with Mr. Briggs (against).
Mr. Kendall (for) with Mr. Park of Georgia (against).
Mr. Olpp (for) with Mr. Fields (against).
Mr. Frothingham (for) with Mr. Rucker (against).
Mr. Lawrence (for) with Mr. Hammer (against).
Mr. Arentz (for) with Mr. McDuffie (against).
Mr. Goodykoontz (for) with Mr. Lea of Georgia (against).
Mr. Larson of Minnesota (for) with Mr. Carter (against).
Mr. Begg (for) with Mr. Blanton (against).
Mr. Kahn (for) with Mr. Stoll (against).
Mr. Hukriede (for) with Mr. Taylor of Arkansas (against).
Mr. Anthony (for) with Mr. Collins (against).
Mr. Luce (for) with Mr. Harrison (against).
Mr. Frear (for) with Mr. Fulmer (against).
Mr. Burtness (for) with Mr. London (against).
Mr. Dickinson (for) with Mr. Linthicum (against).
Mr. Ellis (for) with Mr. Kunz (against).
Mr. Nolan (for) with Mr. Sullivan (against).
Mr. Shaw (for) with Mr. Stedman (against).
Mr. Perkins (for) with Mr. Sears (against).
Mr. Yates (for) with Mr. Johnson of Mississippi (against).
Mr. White of Kansas (for) with Mr. Rainey of Alabama (against).

The result of the vote was announced as above recorded.

ADJOURNMENT.

Accordingly (at 12 o'clock and 32 minutes p. m.) the House adjourned until to-morrow, Thursday, August 17, 1922, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

667. A letter from the Secretary of Commerce transmitting a draft of a bill to abolish the inspection districts of Apalachicola, Fla., and Burlington, Vt., and the office of one supervising inspector, Steamboat-Inspection Service; to the Committee on the Merchant Marine and Fisheries.

668. A letter from the Secretary of War transmitting, with a letter from the Chief of Engineers, reports on preliminary examination and survey of Absecon Inlet, N. J. (H. Doc. No. 375); to the Committee on Rivers and Harbors and ordered to be printed.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. SWING: A bill (H. R. 12317) authorizing the Secretary of War to set apart as a national cemetery certain lands of the United States military reservation of Fort Rosecrans, Calif.; to the Committee on Military Affairs.

By Mr. DAVIS of Tennessee: A bill (H. R. 12318) to amend an act to authorize the Secretary of War and the Secretary of the Navy to make certain disposition of condemned ordnance, guns, projectiles, and other condemned material in their respective departments; to the Committee on Military Affairs.

By Mr. GALLIVAN: Resolution (H. Res. 404) directing the United States Shipping Board to report concerning the purchase and sale of liquor on its ocean-going ships; to the Committee on the Merchant Marine and Fisheries.

By Mr. BRENNAN: Resolution (H. Res. 405) directing the United States Shipping Board to report concerning the purchase and sale of liquor on its ocean-going ships; to the Committee on the Merchant Marine and Fisheries.

By Mr. GARRETT of Tennessee: Resolution (H. Res. 406) authorizing the Clerk of the House to pay out of the contingent funds of the House to Frances C. Padgett and Ida L. Padgett one month's salary as clerks to the late Hon. Lemuel P. Padgett; to the Committee on Accounts.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ANSORGE: A bill (H. R. 12319) for the relief of Dorothy Joseph; to the Committee on Claims.

By Mr. BACHARACH: A bill (H. R. 12320) for the relief of Frederick W. Peter; to the Committee on Claims.

By Mr. CANTRILL: A bill (H. R. 12321) granting an increase of pension to Pollock T. Harbold; to the Committee on Pensions.

Also, a bill (H. R. 12322) granting an increase of pension to Anna R. McAdams; to the Committee on Invalid Pensions.

By Mr. CHALMERS: A bill (H. R. 12323) granting a pension to Frank A. Eley; to the Committee on Pensions.

By Mr. CLOUSE: A bill (H. R. 12324) for the relief of J. J. Jones; to the Committee on Claims.

By Mr. FAUST: A bill (H. R. 12325) granting a pension to Cora M. Zencker; to the Committee on Pensions.

By Mr. FITZGERALD: A bill (H. R. 12326) granting a pension to Eliza Ann Salomon; to the Committee on Invalid Pensions.

Also, a bill (H. R. 12327) granting a pension to Lina J. Harcourt; to the Committee on Invalid Pensions.

By Mr. FULLER: A bill (H. R. 12328) granting an increase of pension to Cynthia M. Bowles; to the Committee on Invalid Pensions.

By Mr. HERSEY: A bill (H. R. 12329) for the relief of William McIlroy; to the Committee on Claims.

By Mr. KRAUS: A bill (H. R. 12330) granting a pension to Leroy Mitchell; to the Committee on Invalid Pensions.

By Mr. LINEBERGER: A bill (H. R. 12331) granting a pension to Phoebe J. Sweeney; to the Committee on Pensions.

Also, a bill (H. R. 12332) granting a pension to Mary J. Tosh; to the Committee on Invalid Pensions.

Also, a bill (H. R. 12333) granting an increase of pension to Louisa Gilmore Smith; to the Committee on Invalid Pensions.

By Mr. MERRITT: A bill (H. R. 12334) granting a pension to Robert S. Kelley; to the Committee on Pensions.

Also, a bill (H. R. 12335) granting an increase of pension to Kate M. Henry; to the Committee on Invalid Pensions.

By Mr. SHAW: A bill (H. R. 12336) granting an increase of pension to Alice Darr; to the Committee on Invalid Pensions.

Also, a bill (H. R. 12337) granting a pension to Mary E. Berry; to the Committee on Invalid Pensions.

Also, a bill (H. R. 12338) granting a pension to Sophronia O. Hubble; to the Committee on Invalid Pensions.

By Mr. SMITH of Michigan: A bill (H. R. 12339) granting a pension to Catherine Foster; to the Committee on Invalid Pensions.

By Mr. SWING: A bill (H. R. 12340) for the relief of Gordon G. MacDonald; to the Committee on Naval Affairs.

By Mr. TAYLOR of New Jersey: A bill (H. R. 12341) to remove the charge of desertion from the military record of Washington E. Hall, alias John Duffy; to the Committee on Military Affairs.

By Mr. TEMPLE: A bill (H. R. 12342) granting a pension to Kate Clear; to the Committee on Invalid Pensions.

By Mr. VAILE: A bill (H. R. 12343) granting a pension to Thomas Campbell; to the Committee on Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

6166. By Mr. BARBOUR: Petition of residents of Fresno and Madera Counties, Calif., in opposition to House bills 9753 and 4388 and Senate bill 1948, known as the Sunday bills; to the Committee on the District of Columbia.

6167. Also, petition of residents of California in opposition to House bills 4388 and 9753 and Senate bill 1948, known as the Sunday bills; to the Committee on the District of Columbia.

6168. By Mr. CHALMERS: Petition protesting against the passage of compulsory Sunday observance bill now pending before Congress; to the Committee on the District of Columbia.

6169. By Mr. CURRY: Petition of 18 residents of Lodi, Calif., protesting against passage of House bills 4388 and 9753, providing for Sunday observance in the District of Columbia; to the Committee on the District of Columbia.

6170. By Mr. DEMPSEY: Resolution of the board of directors of the Chamber of Commerce of the Tonawandas, Tonawanda, N. Y., favoring the removal of existing restrictions on immigration which tends to prevent an adequate supply of labor entering the United States; to the Committee on Immigration and Naturalization.

6171. By Mr. FULLER: Memorial of the City Council of Rockford, Ill., favoring the taking over and operating the coal mines by the Government for the benefit of the public, and paying the miners adequate compensation for their labor; to the Committee on Interstate and Foreign Commerce.

6172. Also, petition of the Rockford (Ill.) Chamber of Commerce, the Rockford Bolt Co., C. R. Wise, H. F. Norris, and the Fyrac Manufacturing Co., all of Rockford, Ill., protesting against the locating of a Federal reformatory at Camp Grant; to the Committee on the Judiciary.

6173. By Mr. KISSEL: Petition of the International Cork Co., Brooklyn, N. Y.; Lehn & Fink, Bernhard Ulmann Co. (Inc.), Ignaz Strauss & Co., Campbell, Metzger & Jacobson, all of New York, and board of commissioners of the port of New Orleans, regarding the flood control on the Mississippi; to the Committee on Flood Control.

6174. By Mr. LINEBERGER: Petition of 372 members of the Long Beach City Teachers' Club, requesting that the Towner-Sterling bill be brought out of committee and speedily passed by Congress; to the Committee on Education.

6175. By Mr. PATTERSON of New Jersey: Petition of residents of Camden County, N. J., opposing the passage of H. R. 9753, to secure Sunday as a day of rest in the District of Columbia; to the Committee on the District of Columbia.

6176. By Mr. ROSSDALE: Petition of Veterans of Foreign Wars, Department of New York, indorsing the ship subsidy bill; to the Committee on Interstate and Foreign Commerce.

6177. Also, resolution adopted by the Soldiers and Sailors' Club of New York, to reduce the present hours for vocational schools; to the Committee on Interstate and Foreign Commerce.

6178. Also, resolution adopted by the American Legion, Department of New York, demanding enactment and enforcement of suitable legislation giving to subdistrict offices the right and authority to rate claims of ex-service men examined in such subdistrict offices; to the Committee on Interstate and Foreign Commerce.

6179. By Mr. VARE: Memorial of the Philadelphia Board of Trade, asking defeat of H. R. 10598; to the Committee on the Post Office and Post Roads.

SENATE.

THURSDAY, *August 17, 1922.*

(Legislative day of Thursday, August 3, 1922.)

The Senate met at 10 o'clock a. m., on the expiration of the recess.

THE TARIFF.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes.

Mr. McCUMBER. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The Secretary will call the roll.

The Assistant Secretary called the roll, and the following Senators answered to their names:

Ball	Gooding	Myers	Sheppard
Bursum	Hale	Newberry	Shortridge
Cameron	Harrison	Nicholson	Smith
Capper	Heflin	Norbeck	Smoot
Colt	Jones, Wash.	Oddie	Sterling
Cummins	Kendrick	Overman	Sutherland
Curtis	Keyes	Pepper	Trammell
Dial	McCumber	Ransdell	Underwood
Dillingham	McLean	Rawson	Walsh, Mass.
Edge	McNary	Reed, Pa.	Walsh, Mont.
Ernst	Moses	Robinson	Watson, Ind.

The PRESIDENT pro tempore. Forty-four Senators have answered to their names. There is not a quorum present. The Secretary will call the roll of absent Members.

The Assistant Secretary called the names of the absent Senators, and the following Senators answered to their names when called:

Calder	Pomerene	Watson, Ga.

Mr. POMERENE. I desire to announce the absence of my colleague [Mr. WILLIS] because of serious illness in his family. I will let this announcement stand for the day.

The following Senators entered the Chamber and answered to their names:

Lodge	New	Phipps	Wadsworth
McKellar			

The PRESIDENT pro tempore. Fifty-two Senators have answered to their names. There is a quorum present.

Mr. SUTHERLAND. Mr. President, I desire to offer two amendments. I ask that they be printed and lie on the table, and I shall ask for a vote upon both amendments when the bill reaches the Senate.

The PRESIDENT pro tempore. The amendments will be printed and lie on the table.

Mr. NEWBERRY. Mr. President, I desire to offer the amendment which I send to the desk.

The PRESIDENT pro tempore. The amendment will be reported.

The ASSISTANT SECRETARY. The Senator from Michigan offers the following amendment: On page 37, line 10, paragraph 213a, graphite or plumbago, in the committee amendment already agreed to——

The PRESIDENT pro tempore. The Chair suggests to the Senator from Michigan that it will be necessary to reconsider the vote by which the paragraph was agreed to.

Mr. McCUMBER. Mr. President, we have gone over this subject, I think, a number of times. It would seem to me that it would be better to reserve the amendment until the bill reaches the Senate, and then we can bring up the subject as the Senator may desire.

The PRESIDENT pro tempore. Is there objection to the request for unanimous consent?

Mr. McCUMBER. I shall not object.

The PRESIDENT pro tempore. If there be no objection, the vote by which paragraph 213a was agreed to is reconsidered. The amendment offered by the Senator from Michigan to the amendment will be stated.

The ASSISTANT SECRETARY. In paragraph 213a, page 37, line 10, the Senator from Michigan proposes to strike out the words "amorphous, 10 per cent ad valorem."

Mr. NEWBERRY. Mr. President, the effect of the amendment would be to put amorphous graphite on the free list. The Senate has already considered the subject, so I shall not enter upon a consideration of the two principal forms of graphite, which are the flake or crystalline and the amorphous graphite. I may say, however, that flake or crystalline graphite is used chiefly for making crucibles, while amorphous graphite is used in the production of such products as paints, stove polish, foundry facings, lubricants, motor and generator brushes, pencils, powder glazing, paint making, and so forth.

There is produced in the United States no amorphous graphite which can be substituted for the imported article, and graphite of all kinds has been on the free list for more than 50 years.

There is in Michigan a manufacturer of graphite products who for more than 30 years has used exclusively in the preparation of the products above enumerated amorphous graphite taken from mines owned and operated by himself in Mexico for the very simple reason that, notwithstanding continuous and tireless research, he has never been able to obtain in the United States amorphous graphite which could be successfully substituted for the Mexican product. The diligence of this search for suitable raw material of domestic origin can be easily understood, for the average price of domestic amorphous graphite, according to the reports of the United States Geological Survey, is less than one-half of the cost of transportation alone from the Mexican mine to the Michigan factory. This fact is significant and speaks for itself. The desire to secure the domestic article is further evidenced by the fact

that a few years ago the same company took an option on the graphite mines in Gunnison County, State of Colorado, which mines produce probably the best amorphous graphite found in the United States, at a price of less than 5 per cent of the amount invested in their Mexican mines. They had shipped to their Michigan plant a number of carloads of the domestic ore, which they tried to use in the preparation of their products, but with unsatisfactory results, the graphite lacking certain necessary physical characteristics which are possessed by the imported amorphous graphite, and which render the latter superior for use in the important graphite products, such as pencils, motor and generator brushes, lubricants, paints, and so forth.

While it may be somewhat difficult for a layman clearly to understood just what is meant by "physical characteristics," their importance is only too well understood by persons experienced in the manufacture and sale of graphite products, and particularly those who, having engaged in the business over a long period of years, have endeavored to find a source of supply here in the United States.

It will help, however, to an understanding of the term "physical characteristics" to explain that for commercial purposes the purity of graphite is usually determined by placing a given weight, generally one-half gram, in a platinum crucible, suspending it over a flame and burning off the carbon contents. Then the ash, consisting of silica and other substances which will not burn, is weighed, and the remainder, carbon, is called graphite. Thus, if, say, 15 per cent of the weight placed in the crucible will not burn, then the remainder, or 85 per cent, is called "graphite."

The point is this: There are a number of forms of carbon. For example, coke, coal, diamonds, and graphite are each different forms of carbon.

If, then, the amorphous graphite mined in the State of Colorado, for instance, when tested in the above manner assays about the same as Mexican graphite, namely, 80 to 85 per cent carbon content, it might seem to a layman to possess an equal manufacturing value; whereas, as a matter of fact, it can not be successfully substituted for Mexican graphite in that it does not possess the necessary physical characteristic, that is to say, while having about the same carbon content, from 80 to 85 per cent, it physically resembles coal or coke more than graphite. It is not, for example, as slippery as Mexican graphite, and consequently little more satisfactory as a lubricant than coal would be. Neither does it afford a bright luster or polish when rubbed onto a surface, and, therefore, is not suitable for stove polish or powder glazing, and it is about as suitable for pencil leads as would be coal or coke.

The purpose of these statements of fact is to make clear to the Senate the position in which a tariff on amorphous graphite would place a long-established industry, and particularly this one Michigan concern.

The same company have also investigated all graphite deposits known in the United States, and, after exhaustive tests extending over the past 30 years, have satisfied themselves that the amorphous graphite mined in this country can not be satisfactorily used in the manufacture of their products. This is entirely due to the inferior quality of American amorphous graphite, which, as already stated, is freely offered at prices much below the cost of transportation alone of the Mexican graphite to Michigan.

It is obvious that the Michigan company would have taken up its option had the graphite from the Colorado mine proved satisfactory.

According to the latest available statistics of the United States Department of the Interior, which are embodied in a table which I shall later ask to have printed in the RECORD, there was imported into the United States during the nine years, from 1913 to 1921, a total of 64,301 tons of amorphous graphite, of which 42,326 tons, or more than 65 per cent, was for the account of the Michigan company, and of this tonnage 37,430 tons was taken from a Mexican mine owned and operated by Americans with American money and shipped to the Michigan factory over American-owned railroads to be turned into manufactured products by American labor.

Mr. President, at this point I ask unanimous consent to insert in the RECORD the table to which I have referred.

The figures are taken from the reports of the Bureau of Foreign and Domestic Commerce and are as printed in the booklet "Graphite," published by the Department of the Interior, United States Geological Survey.

There being no objection, the table was ordered printed in the RECORD as follows:

Statistics concerning amorphous graphite.

	Domestic.	Total value.	Value per ton.	Imported Mexican.	Total value.	Value per ton.	Imported Korean.	Total value.	Value per ton.
	Tons.			*Tons.*			*Tons.*		
1913	2,243	$39,428	$17.58	4,435	$198,000	$44.64	4,170	$58,199	$13.95
1914	1,725	38,750	22.46	4,259	190,075	44.63	6,327	96,433	15.24
1915	1,181	12,358	10.45	1,680	75,000	44.64	2,373	35,292	14.89
1916	2,622	20,723	7.90	5,331	238,000	44.64	5,375	103,619	19.25
1917	8,301	73,841	8.85	7,570	285,568	37.72	2,462	83,135	33.77
1918	6,560	69,455	10.59	5,600	134,183	23.95	568	24,455	43.05
1919	3,379	47,716	14.12	5,506	135,464	24.60	126	3,948	31.33
1920	4,694	49,758	10.60	3,659	131,832	36.03	810	29,936	36.96
1921	1,842	20,860	11.43	3,404	120,153	.....	646	15,145	23.44
Total	32,547	372,889	.....	41,444	1,508,275	.....	22,857	450,162	.....

Average cost per ton over 9 years: Domestic, $11.45; Mexican, $36.39; Korean, $20.

Mr. NEWBERRY. Mr. President, very briefly I desire to discuss the reasons why domestic amorphous graphite can not be substituted for imported graphite. In the case of lead pencils domestic graphite lacks smoothness, also tensile strength, causing points to break easily. In the manufacture of lubricants domestic graphite lacks the necessary "slippery" quality. For motor and generator brushes domestic graphite lacks electrical conductivity and lubricating value. For foundry facings domestic graphite lacks heat resistance; and in the case of paints domestic graphite lacks durability, and paints made with it have less covering power than when made with imported graphite.

Domestic amorphous graphite can be used in only a few low-grade products the consumption of which is not likely to increase noticeably. The products just referred to consume about 90 per cent of the total production of amorphous graphite.

No matter what tariff may be imposed, this company will have to continue importing its raw material; consequently a tariff would not benefit the domestic producer, and it would therefore be a tariff for revenue only. As a source of revenue it would defeat its own purpose, because at this time it seems impossible to increase prices to cover a tariff; consequently profits would be reduced.

I may say in passing that in 1921 the Michigan company lost $70,000 in their operations.

A tariff would, in fact, act to penalize the business of manufacturing graphite products, because we do not sell in the form of crude ore but wholly in manufactured graphite products.

Since the transportation cost alone of ore from the Mexican mine to Michigan exceeds the price freely quoted for the best domestic amorphous ore, this cost should afford ample protection, unless it is desired to give domestic producers an opportunity to secure undue profits.

The average selling value of domestic ore during the past nine years, according to statistics of the United States Geological Survey, has been much less than one-half the average value of imported amorphous graphite ore, which is conclusive proof that domestic amorphous graphite is inferior in quality, and also proof that domestic producers do not suffer by price competition.

The Colorado producers, who appear to be the only ones praying for a tariff on amorphous graphite, incorporated under the laws of Delaware in April, 1920, under the title of the Graphite Corporation, with offices at Milwaukee, Wis. In a statement their president, Mr. Eugene F. Yahr, said:

> These claims consist of graphite deposits, and the corporation proposes to develop and commence mining operations as soon as the pending tariff regulations before Congress have been definitely determined.

He further stated:

> The present market prices of graphite are not sufficiently high to make it profitable to mine their product, and their future operations are altogether dependent on the attitude which Congress takes toward the tariff on graphite.

In short, Mr. President, it is proposed to protect an industry which does not at present exist, as admitted in the preceding statements, at the expense of a well-established and reputable industry, established for more than 30 years, and whose personnel is composed entirely of Americans, with American capital, manufacturing all of its products in the United States.

Mr. NICHOLSON. Mr. President, I desire to offer a substitute for the amendment presented by the Senator from Michigan as to graphite. I should like to have my amendment, in the nature of a substitute, read.

Mr. SIMMONS. Mr. President, I understand that there is an amendment now pending, namely, the amendment offered by the Senator from Michigan. Is it in order to offer another

amendment or to discuss any other amendment until the pending amendment shall have been disposed of?

Mr. NICHOLSON. Mr. President, if the Senator from North Carolina will permit me to state, it was agreed between the Senator from Michigan and myself that if there was no objection when he offered his amendment to place graphite upon the free list I would follow up with my substitute, so that the matter might be disposed of with two roll calls. I offer my amendment as a substitute.

Mr. SIMMONS. But we can not consider two amendments at the same time unless there be a motion made that the two amendments may be consolidated and voted upon at the same time.

Mr. NICHOLSON. May not they be offered at the same time but voted upon separately?

Mr. SIMMONS. Mr. President, I make the point of order that the two amendments can not be acted upon at the same time.

The PRESIDENT pro tempore. The Chair is of the opinion that, pending the amendment offered by the Senator from Michigan, the amendment presented by the Senator from Colorado is not in order, because it is an amendment in the third degree.

Mr. MOSES. Mr. President, a parliamentary inquiry.

The PRESIDENT pro tempore. The Senator from New Hampshire will state his parliamentary inquiry.

Mr. MOSES. Mr. President, may not the amendment offered by the Senator from Colorado be presented as a substitute for the amendment offered by the Senator from Michigan?

The PRESIDENT pro tempore. In the opinion of the Chair, it can not be; that is, that part of the amendment which the Senator from Colorado has offered which affects the amendment offered by the Senator from Michigan.

Mr. NICHOLSON. Mr. President, before voting upon the amendment offered by the Senator from Michigan, I desire to say a few words. As I was about to remark, this question has been before the Senate and has been discussed at great length. There have been some statements made by the Senator from Michigan, however, which are not in accord with the information in my possession.

The graphite manufacturing concern which is located at Saginaw, Mich., has a large graphite mine in Mexico, and that concern has for nearly 30 years been importing graphite from Mexico to Saginaw, Mich., free of duty.

This graphite is mined by peon labor in Mexico. During all of that time the manufacturers have had protection on the articles which they manufacture from graphite. That is, when the Republicans were in control they had a protective tariff; when the Democrats were in control they had a tariff for revenue imposed upon all articles produced from graphite imported from Mexico; and it seems to me that it is unfair for the Senator from Michigan to come in here and ask for free graphite when he has already voted to impose high duties upon articles manufactured from graphite and upon these products of manufacturing enterprises located in his own State.

When we last had this question up before the Senate it was argued that it would increase the price of lead pencils to the school children of this Nation if we imposed a duty upon graphite. Now, let us see what took place. A duty of 45 per cent ad valorem was imposed upon all pencils, including those used by school children, for which the Senator from Michigan voted. I voted to reduce that duty to 25 per cent ad valorem for the reason that we were denied adequate protection upon graphite sufficient to protect the American producer, and that the duty imposed upon graphite was not in keeping with the duties placed upon the manufactured articles of which graphite is a component part. What followed beyond that? A duty of 45 per cent ad valorem has been placed upon various other articles made from graphite, which graphite is imported into this country free of duty.

I contend that there is no better graphite to be found anywhere than the American graphite. It is the equal of any graphite produced anywhere, and yet we are told that it is an inferior article. Why is it an "inferior article"? Because it can be purchased cheaper abroad than at home. That is why it is an "inferior article." They want to make use of cheap labor in mining the graphite, but when they get it into our country then they want all the articles into the production of which graphite enters highly protected. It seems to me that it is very unfair for the people who want the manufactured article protected to ask to have the raw material come in free.

Mr. SIMMONS. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Colorado yield to the Senator from North Carolina?

Mr. NICHOLSON. I yield to the Senator.

Mr. SIMMONS. I wish to ask the Senator some questions for information. I could not understand much that the Senator from Michigan said, but I understood him to say that amorphous graphite was not produced in this country. Am I correct about that?

Mr. NICHOLSON. The Senator may have made that statement, but I wish to quote for the information of the Senator from North Carolina from a letter written by the manufacturers of graphite products in Michigan to the producers of graphite ore in Colorado relating to the production of amorphous graphite:

> We have now entirely consumed all of the ore which you have thus far shipped us, and would like to inquire how soon we may expect shipment of the ore now past due for shipment under contract?

This was entirely amorphous graphite, over 800 tons; but that was during the war, Mr. President. As soon as the war was over, and they could get cars to transport their ore from Mexico, they resorted again to their Mexican production.

Mr. SIMMONS. Whether the amorphous quality of graphite is produced in this country or not, may I ask the Senator whether this amorphous graphite comes in competition with graphite of other types produced in this country?

Mr. NICHOLSON. It does.

Mr. SIMMONS. Then I suppose the Senator would argue that whether it is produced in this country or not, it comes in competition with the type of graphite which is produced in this country, and ought to be in the same category as that, so far as a tariff is concerned. I am rather disposed to agree with the Senator in that proposition. Now the Senator, as I understand, is making the argument that a duty has been placed upon the finished products of graphite, and that in addition to imposing that duty a compensatory duty has been added, in effect, because graphite has been put upon the dutiable list; and therefore, if graphite is put upon the free list, the finished product will have a protection to which it is not entitled?

Mr. NICHOLSON. That is my contention. The 10 per cent ad valorem duty now in the bill placed on amorphous graphite is much too low to warrant the duty of 45 per cent ad valorem which has been placed on the articles manufactured from this graphite, and we are justified from every viewpoint to ask for an increase over the 10 per cent rate now in the bill.

Mr. SIMMONS. And a part of that is intended to compensate for the duty on the raw material?

Mr. NICHOLSON. It may be, but it does not do it, because the protection of the raw material is practically nil. It is practically on the free list.

Mr. SIMMONS. I want to suggest to the Senator that if we shall now put amorphous graphite upon the free list, of course we would expect the Finance Committee at once to reduce proportionately the duty upon the finished product, and that is a result which I very much desire.

Mr. NICHOLSON. Mr. President, amorphous graphite is produced in this country in large quantities, and I desire to read from a letter from the Tariff Commission which is in the possession of the Finance Committee:

> Hon. SAMUEL D. NICHOLSON,
> *United States Senate, Washington, D. C.*
>
> MY DEAR SENATOR: At the request of Mr. Sharpe, of Alabama, I am sending you a carbon copy of a memorandum prepared for the chairman of the Senate Finance Committee covering some recent information secured by the Tariff Commission concerning graphite.
>
> The schedule pertaining to graphite adopted by the Senate reads as follows:
>
> "PAR. 213a. Graphite or plumbago, crude or refined: Amorphous, 10 per cent ad valorem; crystalline lump, chip, or dust, 20 per cent ad valorem; crystalline flake, 2 cents per pound."
>
> These rates are held by the Graphite Producers' Association of Alabama to be insufficient to afford protection to the domestic industry. According to this association, the minimum of protection requires the following rates:
>
> One cent per pound on amorphous graphite, 3 cents per pound on crystalline lump, chip, and dust, and 5 cents per pound on crystalline flake.
>
> These rates are practically double or more than double those contained in the paragraph above.

But, Mr. President, let me read to you the conclusions of the Tariff Commission on this question:

> On the basis of current prices, the tariff rates urged by the Alabama producers, while high, are not excessive when considered from the standpoint of the need of safeguarding the domestic industry.

That is the conclusion of the Tariff Commission on this question. Instead of asking in my amendment for the duties which the Alabama Graphite Producers' Association ask for I have asked for the following duties: Half a cent per pound on amorphous graphite, 2 cents per pound on crystalline lump, chip, or dust, and 3½ cents per pound on crystalline flake.

If the rates asked for by the Alabama Graphite Producers' Association are considered by the Tariff Commission as being

justified, I can see no good reason why the lower rates asked for in my amendment should not be accepted, nor can I understand how the Senator from Michigan [Mr. NEWBERRY] can come here and ask that this ore be placed upon the free list. When this question was before the Senate heretofore I discussed this matter at great length, and I do hope that the Senators who voted for the ad valorem duties upon all articles produced from graphite will be consistent enough to-day to vote for the duty which I am asking for on the raw material.

Mr. WALSH of Montana. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Colorado yield to the Senator from Montana?

Mr. NICHOLSON. I do.

Mr. WALSH of Montana. In the enumeration of articles into the manufacture of which graphite enters I trust the Senator will not overlook the fact that it is a very important item in the construction of crucibles used in the manufacture of steel, and that steel products pretty generally have a high protective duty under this bill.

Mr. President, unfortunately I was not in the Senate when the distinguished Senator from Michigan [Mr. NEWBERRY] made his argument in favor of putting graphite on the free list. My recollection is, however, that he has consistently voted for every duty——

The PRESIDENT pro tempore. The time of the Senator from Colorado has expired. The Chair recognizes the Senator from Montana.

Mr. NICHOLSON. I quite agree with the Senator from Montana; but, my time having expired, I can not say more.

Mr. WALSH of Montana. If the Senator from Michigan has ever heretofore voted for the reduction of a rate proposed by the committee or anyone else, or to put any item on the free list, it has escaped my notice. I merely rise to inquire upon what principle the Senator from Michigan now asks that graphite be placed upon the free list—simply because it is used in his State?

Mr. NEWBERRY. I did not understand the Senator's question.

Mr. WALSH of Montana. Upon what principle does the Senator from Michigan, in view of the record he has made here, ask that graphite be placed upon the free list?

Mr. NEWBERRY. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Montana yield to the Senator from Michigan?

Mr. WALSH of Montana. I yield.

Mr. NEWBERRY. In view of the Senator's ignorance of that record, I do not feel called upon to say more than that the Senator's statement as to my votes on this bill is incorrect. I voted, and shall continue to vote, for such reductions in these various schedules as I think desirable. If the Senator will kindly be well informed before he proceeds to determine what my attitude has been or will be, I shall be very glad. I should like to answer as civilly as possible the Senator's question as to why I suggest that this material be placed on the free list.

Mr. WALSH of Montana. I understand that. I asked, Upon what principle does the Senator make that request?

Mr. NEWBERRY. Because the proposed rate is not a protective rate, and is a very unimportant revenue rate.

Mr. WALSH of Montana. I agree with the Senator; but then why does he not vote to amend it by increasing the rate?

Mr. NEWBERRY. Because the rate can not be increased to a point where the American product will be profitably produced, in my judgment, for the reason that the imported Mexican ore sells for nearly three times or over twice as much as the American ore sells for in the market. Therefore they would have to put on, I should imagine, a protective tariff of approximately 100 per cent, which has already been voted on once by the Senate, I believe, and the Senate rejected it.

Mr. WALSH of Montana. The Senator has repeatedly voted for rates as high as that.

Mr. NEWBERRY. On what?

Mr. WALSH of Montana. On a number of articles.

Mr. NEWBERRY. Certainly, because I thought that the American producers ought to be encouraged to produce those articles. This is a natural product, and no matter what the duty is, you can not create any more amorphous graphite.

Mr. WALSH of Montana. Why does the Senator think that the American producers ought not to be encouraged to produce graphite?

Mr. NEWBERRY. Because they have not the product to produce.

Mr. NICHOLSON. Will the Senator yield for one question?

The PRESIDENT pro tempore. The Senate must proceed in order.

Mr. WALSH of Montana. I yield to the Senator from Colorado.

Mr. NICHOLSON. Does the Senator from Michigan believe that the information he has on this subject is better than the information which the Tariff Commission has?

Mr. NEWBERRY. I had no reason to doubt the correctness of the information I gave the Senate, or I certainly would not have given it.

Mr. WALSH of Montana. Mr. President, when this matter was before the Senate on a former occasion I called attention to the fact that my State could supply all the graphite the United States needs, and I made that statement on the information given us by the Tariff Commission, which I now repeat:

> There is, however, one deposit in Montana which has lately been producing crystalline graphite that is of the same physical character as the Ceylon material. The quantity ultimately available has not been proved, but is believed by the operators to be sufficient to supply domestic demands for many years to come.

Mr. GOODING. Mr. President, I can not accept the theory that we can not produce amorphous graphite in America, or at least that it is not here for development. The reason it has not been developed is that graphite has always been on the free list. The great forces of nature which made Mexico created all of North America, and no doubt deposited in many places the same materials and the same rich soils we have here. They have the same in Mexico, of course. There is a difference in climatic conditions to some extent, but not such a great difference even in climatic conditions.

I think one of the unfortunate things developing in America is for American capital to go abroad and develop industries with the underpaid labor in other countries. We have been able to accept that in the past, because the great question of finding employment for our own people never confronted America as it does to-day. That is the one big question of all, and if we are going on and develop foreign industries, and not give our own industries a chance to grow and develop, then we have reached the peak of greatness as far as this country is concerned.

In the great West we can furnish all the minerals of every kind and description that we need for the manufacture of every commodity of every kind. There are hundreds of square miles out there where a white man's foot has never trod. But with the cost of labor in this country and with the cost of transportation, unless we are given a rate which will measure the difference between the cost here and the cost abroad, of course we can not develop graphite mines, or any other industry, as far as that is concerned.

Mr. WATSON of Georgia. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Idaho yield to the Senator from Georgia?

Mr. GOODING. I yield.

Mr. WATSON of Georgia. Searching for information, I ask the Senator from Idaho if Germany built up her new industries without our money?

Mr. GOODING. She built them up under protection, under a protective policy, until she became the greatest commercial country in the world, second only to England in her exports, and through a protective policy.

Mr. WATSON of Georgia. What protective policy?

Mr. GOODING. Protection to her industries.

Mr. WATSON of Georgia. What law? Name the date.

Mr. GOODING. I have not time to discuss that with the Senator. My time is limited. But we do know that Germany's great development came about under a protective policy. If the laboring men of this country are willing to mine graphite as cheaply as they do in Mexico, we do not need any protection. But they are not willing to do it, and I am not willing to see them do it; and what holds good as to graphite holds good as to other industries in this country.

The protective policy of America has developed an American standard of wages, an American standard of living, and an American standard of citizenship, the best in all the world. If you break down that policy, you break down those standards, both as to wages, living, and citizenship, for the home is always better when the wolf is kept away from the door.

I think the graphite industry ought to be given a protection which will afford it an opportunity to grow and develop. It did develop when the war gave it protection. There was no question about using the graphite we produced in this country. I have censured the selfish interests of this country for going abroad and developing foreign industries, but, after all, the American Congress is more to blame than the selfish interests that want to exploit the underpaid labor of Europe and bring the product of that labor back into this country for a market, and it is nothing less than a crime to permit it to be done. It can have but one result, and that is to bring about a condition in this country in which we will have to commence to pass laws

for the benefit of the unemployed, granting old-age pensions, and other things which the Old World has been driven to.

The most serious thing which can confront any country is unemployment. It fills the penitentiaries, the asylums, and the graves, and if we are going to keep our standard of citizenship up to the standard of to-day, then we must protect it from those who have cheaper labor and cheaper freight rates into our own great markets than we have here in America.

There should not be any question about a protective duty on graphite.

Mr. McCUMBER. Mr. President, I do not know that it will be possible for me, in anything I may say, to allay this tempest in a teapot, but I think we can show very easily that there is no occasion for an extra breeze on the subject. I am perfectly willing to take the proposition suggested by the Senator from Michigan. He says we can not use the American graphite in the production of pencils. I will assume that to be true for the purpose of this argument. Those who represent the pencil industry in Michigan declare that they will have to get the Mexican graphite no matter what the tariff duty is. I will assume also that that is true.

We levy a duty of 10 per cent ad valorem upon Mexican graphite, which amounts to three-tenths of 1 cent a pound. We give a good protective duty upon lead pencils. How many lead pencils will a pound of graphite make? I do not know, but I can guess that it would make about half a carload of pencils, figuring the amount of graphite that is in each pencil, and this duty would make a difference of about a cent and a half or two cents on a carload of lead pencils.

We give a duty of 45 per cent on lead pencils, and if that 45 per cent duty will not take care of three-tenths of 1 cent upon a whole pound of graphite, I think we had better go out of the business.

That is all there is to this, Mr. President, except the revenue feature. I do not agree with those Senators who claim that the American graphite can be used just exactly as well as Mexican graphite in the production of lead pencils. I think the Mexican graphite will come in anyway, whether we put this duty upon it, or a duty three times as great. But we need the money, and the small amount represented by the duty can be absorbed without increasing the cost of the child's lead pencil.

We imported both flake and amorphous graphite under the one designation of "graphite." I do not know what amount of each was imported. If it was all amorphous graphite, we would receive about $45,000 from the importations. If it was all flake, we would receive about $80,000. It is probably safe to say that we would receive between $60,000 and $70,000 by the imposition of this 10 per cent duty upon the amorphous graphite and the 20 per cent duty upon the flake graphite. I do not know of any industry which would be injured in the slightest degree by this little extra duty. If we had failed to give the Michigan producers a compensatory duty, there might have been something in the argument of the Senator from Michigan; but having given them a sufficiently high protective duty, certainly, to take care of this three-tenths of 1 cent upon a pound of graphite, I see no occasion on earth for putting that particular kind of graphite on the free list.

Mr. WALSH of Massachusetts. Mr. President, graphite ought to remain on the free list, where it has been for 50 years. The manufacturers of graphite products have relied upon the importations of foreign graphite without the payment of a duty, and many of them are very large users of graphite. One concern in my own State uses each year flake graphite valued at $50,000. Another uses 14,000 pounds of graphite monthly. Probably there have been as many protests from manufacturers provoked on account of the proposed duty on this product as on account of any other duty.

On May 24 last, when the committee amendment levying duties on various kinds of graphite was before the Senate, this subject was very thoroughly gone into, and the fact was pretty thoroughly demonstrated that the manufacturers of graphite products are unable to use the domestic graphite; that it does not give the satisfactory result that the foreign graphite produces. Not only do the manufacturers of graphite products contend that the quality of the domestic graphite is not satisfactory but the prices of domestic graphite and the foreign graphite indicate that they are not competitive, for the price of the foreign graphite is in excess of the price of the domestic graphite. Our manufacturers are not imbeciles, and they would not buy foreign graphite at a higher price than the domestic graphite if they could use the domestic graphite satisfactorily.

I am not going to take up the time of the Senate to discuss the issue at length, but here are two facts which can not be seriously disputed: First, the domestic graphite is cheaper than foreign graphite, and, secondly, that the manufacturers of graphite products demand and require the imported graphite.

Mr. NICHOLSON. Mr. President, will the Senator from Massachusetts yield for a question?

Mr. WALSH of Massachusetts. I yield.

Mr. NICHOLSON. The Senator is now arguing for free graphite. Is he willing that all articles into the manufacture of which graphite shall enter may be placed upon the free list?

Mr. WALSH of Massachusetts. I am willing that every article——

Mr. NICHOLSON. Into which graphite enters shall be placed on the free list?

Mr. WALSH of Massachusetts. Into which graphite enters may be placed upon the free list, unless——

Mr. NICHOLSON. Oh, yes; "unless"!

Mr. WALSH of Massachusetts. Unless it can be proven that the conversion cost in the United States is greater than the conversion cost abroad. I think the Senator will admit that is a fair exception.

Mr. GOODING. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Massachusetts yield to the Senator from Idaho?

Mr. WALSH of Massachusetts. I yield.

Mr. GOODING. The junior Senator from Montana, I am quite sure, read into the RECORD the report of the Tariff Commission showing that in Montana they have exactly the same class of graphite that they have in Michigan. Of course, that region has not been developed. I desire merely to call that to the attention of the Senator from Massachusetts. It may be true that the Mexican graphite is selling for a higher price, but that is not because we do not have the quality here in America. It is because it has not been developed in Michigan and we have not had an opportunity to develop it. I am sure the Senator from Massachusetts wants to be correct in his statement in that regard.

Mr. WALSH of Massachusetts. I am aware of the information presented to the Senate by the Senator from Montana, but I understand that the mines in Montana have not been fully developed; it has been asserted that the graphite there is capable of taking care of the domestic supply and is of a very high quality. However, the fact still remains that the domestic graphite is selling for $11.45 per ton, while the average price of Mexican graphite is $36.39 and the Korean graphite $20 per ton; that they do not compete with each other; that the foreign graphite is essential and necessary for the making of certain graphite products; and that the commodity ought to remain where it has been all these years, upon the free list. It does not seem to me that any good reason has been advanced for placing a duty upon graphite that was not heretofore considered in the drafting of previous tariff laws.

The Senator from North Dakota [Mr. McCUMBER] has referred to the slight amount of the duty, yet it amounts to a very large sum when the volume of graphite that is used by the manufacturers of graphite products is appreciated, and it bears very heavily upon many of our industries, especially our smaller foundries and other manufacturers of graphite products.

I do not think it is of any importance to ask a Senator if he is in favor of all graphite products being put upon the free list simply because he asks that the graphite itself be put upon the free list. Each of these products must be taken upon its own merits and upon information which can be obtained in reference to the protection, if any, each may need. It is quite a different question as to whether we shall have a duty upon graphite itself or whether we shall have a duty, and what duty it should be, upon graphite products.

Mr. GOODING. I should like to call the Senator's attention to the fact that the concern in Michigan now here asking to have graphite put upon the free list own their own mines in Mexico, so that it is not surprising at all that they would like to have it on the free list.

Mr. WALSH of Massachusetts. I understand that the concern in Michigan did import graphite from Mexico, and I remember when the matter was under discussion previously that question was gone into in detail. But the Michigan concern pays more money for the graphite it gets from Mexico than for the graphite it could buy in America, and it pays more money because it needs the foreign graphite, because it makes better pencils, and because it is absolutely necessary for the proper development of its industry. The investigation which I made for the minority at the time this subject was under discussion before led me to the conclusion that the domestic graphite did not meet the demands of the American manufacturers of graphite products.

Mr. President, graphite should remain on the free list if we desire to lessen the burdens and costs of production of many of our industries.

Mr. NEWBERRY. Mr. President, in order to complete the statement of the Senator from Idaho in regard to the mines owned in Mexico by the Michigan company, I will say that those mines are operated with American machinery, under American supervision, and as far as possible with American labor.

Mr. HEFLIN. Mr. President, foreign graphite has taken charge of the American market. It has practically killed the graphite industry in the United States. I am unable to conceive just how the high protectionists, who proclaim their devotion to American industry and American labor, can pursue a policy which means the destruction of an American industry.

The graphite in the United States is of a superior quality, a great deal of it. The graphite produced in my own State is of the flake variety, and a very fine grade of graphite it is. So is that produced in the State of the Senator from Montana [Mr. WALSH]. Senators on the other side seek to put graphite on the free list and continue in unemployment the labor that used to work in the graphite mines here, and in a measure enjoyed prosperity during the war, and to have those mines continue closed as they are to-day. How can Senators stand here and say that they are friends to American labor and friends to American industry when they follow such a course as that?

Mr. President, I supported the Underwood tariff law. That law brings to the Government to-day $300,000,000 of revenue annually. It compels duties to be paid upon that much of products that come into the United States. That is all right. That is in keeping with the Democratic position upon the question. Why should I not now vote to put a revenue duty upon graphite in order that the Government, struggling under the great debts of the war, may have this amount contributed to the sum with which to discharge those debts? Why should the foreign graphite concerns be permitted to come in and take charge of the American market, and drive from those concerns American labor and close those industries? There is no good to be accomplished for the Government itself by that course, and the home industry would be destroyed by such a process.

Where is the logic or reason for such a position as that? I do not believe that Senators on the other side of the Chamber who believe in protection will vote for the amendment of the Senator from Michigan. I do not believe that Senators on this side of the Chamber who believe in a tariff for revenue can support the amendments of the Senator from Michigan. Let us derive some revenue from this source, and if incidentally some benefit is derived by this infant struggling American industry, I do not object. Why should any Senator object?

The PRESIDENT pro tempore. The question is upon agreeing to the amendment offered by the Senator from Michigan [Mr. NEWBERRY] to the amendment of the committee.

Mr. NEWBERRY. On that I ask for the yeas and nays.

The yeas and nays were ordered, and the Assistant Secretary proceeded to call the roll.

Mr. DILLINGHAM (when his name was called). I have a general pair with the junior Senator from Virginia [Mr. GLASS]. In his absence, being unable to obtain a transfer, I withhold my vote.

Mr. EDGE (when his name was called). I have a general pair with the senior Senator from Oklahoma [Mr. OWEN]. I transfer that pair to the junior Senator from Vermont [Mr. PAGE] and vote "yea."

Mr. HALE (when his name was called). I transfer my pair with the senior Senator from Tennessee [Mr. SHIELDS] to the junior Senator from Maryland [Mr. WELLER] and vote "nay."

Mr. HARRISON (when his name was called). On this vote I am paired with the junior Senator from West Virginia [Mr. ELKINS]. I am unable to obtain a transfer and, therefore, withhold my vote.

Mr. JONES of New Mexico (when his name was called). I transfer my general pair with the Senator from Maine [Mr. FERNALD] to the Senator from Nevada [Mr. PITTMAN]. I ask that the announcement of this transfer of my pair may stand for the day. I vote "nay."

Mr. OVERMAN (when his name was called). I have a general pair with the senior Senator from Wyoming [Mr. WARREN]. He not being present, and I not being able to obtain a transfer of the pair, I withhold my vote.

Mr. POMERENE (when his name was called). Announcing my pair as heretofore with my colleague, the junior Senator from Ohio [Mr. WILLIS], I transfer that pair to the senior Senator from Nebraska [Mr. HITCHCOCK] and will vote. I vote "yea."

Mr. WALSH of Montana (when his name was called). I have a general pair with the Senator from New Jersey [Mr. FRELINGHUYSEN]. That Senator is absent, but I am advised that if he were present he would vote as I intend to vote. I accordingly feel at liberty to vote and vote "nay."

Mr. WATSON of Indiana (when his name was called). I have a general pair with the senior Senator from Mississippi [Mr. WILLIAMS] which I transfer to the junior Senator from North Dakota [Mr. LADD] and vote "nay."

The roll call was concluded.

Mr. ERNST. I transfer my general pair with the senior Senator from Kentucky [Mr. STANLEY] to the junior Senator from Maryland [Mr. WELLER] and vote "nay."

Mr. DILLINGHAM. I find that I can transfer my pair with the junior Senator from Virginia [Mr. GLASS] to the senior Senator from Minnesota [Mr. NELSON]. I do so and vote "nay."

Mr. McCUMBER (after having voted in the negative). On this vote I transfer my general pair with the junior Senator from Utah [Mr. KING] to the junior Senator from Washington [Mr. POINDEXTER] and allow my vote to stand.

Mr. LODGE (after having voted in the negative). I understand the Senator from Alabama [Mr. UNDERWOOD], with whom I have a general pair, has not voted. I transfer that pair to the junior Senator from Oklahoma [Mr. HARRELD] and allow my vote to stand.

Mr. KENDRICK (after having voted in the negative). I desire to inquire whether the Senator from Illinois [Mr. McCORMICK] has voted?

The PRESIDENT pro tempore. The Senator from Illinois has not voted.

Mr. KENDRICK. I have a general pair with that Senator. I am unable to obtain a transfer, and so I withdraw my vote.

Mr. CURTIS. I wish to announce the necessary absence of the Senator from Minnesota [Mr. NELSON] on account of a recent death in his family.

I also wish to announce that the Senator from Ohio [Mr. WILLIS] is necessarily absent because of illness in his family.

I further announce the following general pairs:

The Senator from California [Mr. JOHNSON] with the Senator from Georgia [Mr. WATSON];

The Senator from Illinois [Mr. McKINLEY] with the Senator from Arkansas [Mr. CARAWAY];

The Senator from West Virginia [Mr. ELKINS] with the Senator from Mississippi [Mr. HARRISON]; and

The Senator from Missouri [Mr. SPENCER] with the Senator from Georgia [Mr. HARRIS].

The result was announced—yeas 14, nays 44, as follows:

YEAS—14.

Dial	Norbeck	Reed, Pa.	Swanson
Edge	Pepper	Robinson	Walsh, Mass.
Kellogg	Pomerene	Simmons	
Newberry	Reed, Mo.	Smith	

NAYS—44.

Ashurst	Curtis	Lenroot	Rawson
Ball	Dillingham	Lodge	Sheppard
Borah	du Pont	McCumber	Shortridge
Brandegee	Ernst	McLean	Smoot
Bursum	Fletcher	McNary	Stanfield
Calder	Gooding	Moses	Sterling
Cameron	Hale	New	Sutherland
Capper	Heflin	Nicholson	Trammell
Colt	Jones, N. Mex.	Oddie	Wadsworth
Culberson	Jones, Wash.	Phipps	Walsh, Mont.
Cummins	Keyes	Ransdell	Watson, Ind.

NOT VOTING—38.

Broussard	Harrison	Myers	Stanley
Caraway	Hitchcock	Nelson	Townsend
Elkins	Johnson	Norris	Underwood
Fernald	Kendrick	Overman	Warren
France	King	Owen	Watson, Ga.
Frelinghuysen	Ladd	Page	Weller
Gerry	La Follette	Pittman	Williams
Glass	McCormick	Poindexter	Willis
Harreld	McKellar	Shields	
Harris	McKinley	Spencer	

So Mr. NEWBERRY's amendment to the amendment was rejected.

Mr. NICHOLSON. I offer the amendment which I have heretofore sent to the desk and ask to have it read, and on the amendment I ask for the yeas and nays.

The PRESIDENT pro tempore. The Chair desires to say to the Senator from Colorado that the first amendment which he has presented was voted upon in the exact terms on the 24th day of May last upon the motion of the Senator from Alabama. It is, therefore, the opinion of the Chair that the amendment is not now in order.

Mr. NICHOLSON. When will the amendment be in order, Mr. President?

The PRESIDENT pro tempore. The amendment will be in order when the bill reaches the Senate. The Senator from Colo-

rado, however, has two other amendments on the desk. Does he desire to offer them at this time?

Mr. NICHOLSON. May I offer the amendments which I now have at the desk when the bill gets into the Senate?

The PRESIDENT pro tempore. There will be an opportunity for the Senator to offer the amendments when the bill reaches the Senate.

Mr. NICHOLSON. Very well.

The PRESIDENT pro tempore. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

Mr. LENROOT obtained the floor.

Mr. HARRELD. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Wisconsin yield to the Senator from Oklahoma?

Mr. LENROOT. I yield to the Senator.

Mr. HARRELD. I ask unanimous consent to have printed in the RECORD a telegram correcting one or two statements which I made in my speech on yesterday, and which corrections, I think, should be made.

The PRESIDENT pro tempore. Without objection, it is so ordered.

The telegram is as follows:

TULSA, OKLA., *August 17, 1922.*

Hon. United States Senator HARRELD,
Washington, D. C.:

Received advance copy of your speech, and it is great. There are, however, one or two corrections that should be made. It was the Standard and not Dutch Shell that took over Producers & Refiners' Corporation; at least Bill Kunkle, who put the deal over, has always been the purchasing agent for Prairie Oil & Gas Co. in buying oil properties in Oklahoma. He is now on board of directors of Producers & Refiners and is known as a Standard man everywhere. The Standard have also through Atlantic Refining acquired Barnsdall Oil Corporation, which was done to get control of the Ramege process of refining, and now Standard is allowing Barnsdall to go ahead and take leases in the Galician field in Europe. But I want to correct your statement regarding Marland. He has sold a half interest in four leases in Osage to Dutch Shell and also has interests with them in the Tonkawa field; but Marland is absolutely on the level, and has just thrown a bomb into the camp of the Standard by offering to store oil for independent producers on same terms that oil is stored by pipe lines in Pennsylvania. Royal Dutch has no interest in Marland Oil Co., and you will note that the Standard crowd is selling Marland stock short to punish him for having made the storage offer. There was a lot of loose talk during the campaign about Marland being backed by Dutch Shell while Owen was backed by Standard. Marland's offer to store oil is considered by oil men here as having put a stop absolutely to any danger of another cut in oil. The rest of your speech is great.

W. H. PECK,
Oil Editor Tulsa World.

Mr. LENROOT. I offer the amendment which I send to the desk.

The PRESIDENT pro tempore. The amendment proposed by the Senator from Wisconsin will be stated.

The ASSISTANT SECRETARY. On page 73 the Committee on Finance offered a complete substitute for paragraph 355, which substitute was agreed to. It is now proposed to insert at the end of the paragraph which was agreed to as an amendment the following additional proviso:

Provided further, That none of the articles specified in this paragraph shall pay a greater rate of duty than 60 per cent ad valorem.

The paragraph proposed to be amended is relative to table, butchers', carving, cooks', hunting, kitchen, bread, cake, pie, slicing, canning, and other knives.

The PRESIDENT pro tempore. May the Chair say to the Senator from Wisconsin [Mr. LENROOT] that, in the opinion of the Chair, the vote whereby the committee amendment was heretofore adopted must be reconsidered.

Mr. LENROOT. I think the Chair is correct.

The PRESIDENT pro tempore. Is there objection to the reconsideration of the vote by which paragraph 355 was agreed to?

Mr. McLEAN rose.

The PRESIDENT pro tempore. Does the Senator from Connecticut object?

Mr. McLEAN. The Senate must realize that when amendments of this kind are presented to the Senate without giving any notice the Senators who are deeply interested in the articles affected may be somewhat embarrassed. When no opportunity has been afforded to investigate the amendment which is thus offered the Senator having objection must object to the reconsideration of the vote whereby the amendment to which the amendment may be offered was previously agreed to.

The Senator from Wisconsin should have given Senators who are interested in this subject notice if he intended to offer an amendment the effect of which would be to reduce rates previously agreed to.

Mr. LENROOT. Mr. President, if the Senator from Connecticut wishes a contest as to whether or not the Senate is going to reconsider a rate previously agreed to, I will make the motion that it be reconsidered, and I propose to debate the motion now.

The Senator from Connecticut says that he should have had notice of my intention. We have not had a reprint of this bill from the very beginning. I am frank to say that I did not know that a complete substitute had been adopted for this paragraph. It is impossible for Senators to be familiar with the 2,087 amendments which are carried in the bill and to know whether or not there has been a complete substitute offered for any part of the bill. My purpose in offering the amendment was to amend the House text as well as the Senate amendment. I had supposed that this was the time when Senators would have a right to offer individual amendments.

I had no opportunity as the bill was originally reported to offer an amendment covering the articles in the paragraph, because, as the bill was reported from the Committee on Finance, only specific amendments were made. If there be a fault, it was the fault of the committee in reporting a bill here which Members have a right to rely upon as the action of the committee and then themselves, without notice, bringing in a complete substitute for a paragraph, which substitute is adopted, and of which we have not had a reprint.

If the Senator from Connecticut wishes to insist upon his objection to a reconsideration of the vote whereby the amendment was agreed to, I am going to ask for a roll call as to whether or not we may have such reconsideration, and also upon one or two other paragraphs where the duties proposed to be imposed are perfectly outrageous, as I think I shall be able to demonstrate.

Mr. McLEAN. Mr. President——

Mr. ROBINSON. Will the Senator from Wisconsin yield for a question?

Mr. LENROOT. I will.

Mr. ROBINSON. What are the maximum rates which will be levied under the committee substitute as adopted if the amendment which the Senator from Wisconsin now contemplates proposing be not adopted?

Mr. LENROOT. Because the imports are not segregated I have not the specific information as to them. The imports are all grouped together, but the average price is about $1 a dozen; and here are rates as originally fixed and reported—and I do not imagine that the substitute has changed them very materially—the equivalent ad valorem of which, in my judgment, will run as high as 200 per cent. I shall be able to show as to other paragraphs what the ad valorem rate is, but, unfortunately, I am not able to show that upon this paragraph. My amendment, however, proposes a maximum ad valorem of 60 per cent, which is double the present rate, with the importations less than one-half of our exportations.

Mr. McLEAN. Do I understand that it is the Senator's purpose to offer other amendments to the cutlery schedule?

Mr. LENROOT. Yes, sir; it is my purpose to offer two other amendments to that schedule.

Mr. McLEAN. Will the Senator from Wisconsin now inform the Senate what those amendments are?

Mr. LENROOT. One of the two will propose a maximum ad valorem rate of 100 per cent upon knives and the other will be upon scissors and shears.

Mr. McLEAN. Mr. President, I do not want to object to a reconsideration in order that the Senator may have an opportunity to offer his amendment, and I will not do so.

Mr. LENROOT. I want to say to the Senator right here that I did not know there was a complete substitute, or I should have taken advantage of the opportunity afforded then.

Mr. McLEAN. The Senator must realize that not having any notice, and these rates being very important, it would be very difficult at this stage of the proceedings to present these schedules to the Senate as they were presented when they were considered and when the Senate indorsed the recommendations of the committee.

Mr. LENROOT. Does the Senator object, then?

Mr. McLEAN. I withdraw my objection.

Mr. LENROOT. The amendment then being in order, Mr. President——

Mr. ROBINSON. Mr. President, I rise to a point of order. The Senator from Connecticut did not object to a reconsideration of the vote by which the committee amendment was agreed to.

The PRESIDENT pro tempore. The Chair understood the Senator to object to the unanimous consent asked for to reconsider the vote.

Mr. McLEAN. Mr. President, I have withdrawn my objection.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and the vote by which the amendment was

adopted is reconsidered. The question now is upon the amendment proposed by the Senator from Wisconsin.

Mr. LENROOT. Mr. President, it is understood that my time heretofore occupied was upon the motion for reconsideration, and my 15 minutes now begins to run.

The PRESIDENT pro tempore. The Chair so understands.

Mr. LENROOT. Now, I should like to ask the Senator from Connecticut a preliminary question about his construction of the language of this paragraph, as to whether the 55 per cent ad valorem is in addition to all the specific duties named in the paragraph?

Mr. McLEAN. I should have to read the paragraph through in order to give the Senator an intelligent answer. It would appear so. He probably knows.

Mr. LENROOT. Mr. President, we have here the commonest table knives with duties ranging from 36 cents a dozen to $2.40 a dozen, plus 55 per cent ad valorem. We are exporting these knives, this table cutlery, to every part of the world. Our imports are practically negligible. The present rate of duty is 25 per cent and 30 per cent. My amendment doubles the duty under the Underwood law with 60 per cent; and unless we desire to create an embargo upon practically all of the articles named in this paragraph, it seems to me clear that the amendment I have proposed must be adopted.

Mr. BRANDEGEE. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Wisconsin yield to the senior Senator from Connecticut?

Mr. LENROOT. I do.

Mr. BRANDEGEE. My colleague [Mr. McLEAN] stated, in answer to the question of the Senator, that he had not read the whole paragraph, and therefore he was unable to answer the Senator as to whether the 55 per cent ad valorem provided for in lines 4 and 5 applied to all the other articles mentioned in the paragraph. It seems to me that it does not unless they exceed 4 inches in length.

Mr. LENROOT. No; it says:

In addition thereto, on all of the foregoing, 55 per cent ad valorem.

Mr. BRANDEGEE. Let me read the whole of it. The latter part of line 2 says:

If 4 inches in length or over, exclusive of handle, 10 cents each; and in addition thereto, on all of the foregoing—

That means, of course, if 4 inches in length or over.

Mr. LENROOT. Oh, no; the Senator is clearly mistaken, because then we would not have said "on all of the foregoing."

Mr. BRANDEGEE. Yes; we would; because——

Mr. LENROOT. We would have said, then, "upon the foregoing"; but when we say "upon all of the foregoing," it includes every article that has been enumerated in the paragraph.

Mr. BRANDEGEE. If the Senator will permit me to say so, I do not agree with him.

Mr. LENROOT. I want to say to the Senator that the substitute that the Senator from Connecticut says has been adopted may have corrected that, but it is very clear to me that that is what it means.

Mr. BRANDEGEE. I know it is, and it is very clear to me the other way. I will not take the time of the Senator to read paragraph 355, on the previous page. It contains 12 or 13 lines of different kinds of knives; and the part that I called attention to, referring to those more than 4 inches in length, imposes a duty of 55 per cent ad valorem additional, but it is additional upon "all of the foregoing," every kind of knife mentioned.

Mr. LENROOT. Oh, yes, Mr. President; and that includes every article named in the paragraph.

Mr. BRANDEGEE. That is what I think; but I disagree entirely with the Senator in his construction that the 55 per cent additional applies to them unless they are over 4 inches in length.

Mr. LENROOT. If we enumerate a number of articles upon which a specific rate of duty is given, and then say "in addition thereto, upon all of the foregoing, 55 per cent ad valorem," that means, of course, 55 per cent upon every article named in the paragraph preceding.

Mr. BRANDEGEE. If it says "upon all the foregoing if they are over 4 inches in length," it applies only to those that are over 4 inches in length.

Mr. LENROOT. It says "on all of the foregoing," and that means whether they are 4 inches in length or less than 4 inches in length.

Mr. BRANDEGEE. Mr. President, I am simply reading this hastily. I do not know what the intention of the committee was, and I am only saying what I thought the language meant. I may be wrong.

Mr. McCUMBER. Mr. President——

Mr. LENROOT. The chairman of the committee may be able to straighten it out.

Mr. McCUMBER. The Senator from Wisconsin is right except upon the rate. The rate was 45 per cent in the amendment, but it covers everything that precedes the 45 per cent.

Mr. BRANDEGEE. I hope it does.

Mr. LENROOT. Mr. President, what have we now? A specific rate of duty of $2.40 a dozen, of $1.20 a dozen, of 36 cents a dozen, of $1.20 a dozen, and in addition thereto 45 per cent ad valorem upon each one of them, while the imports in 1921, according to the statistics that I have before me, all together averaged only $1 a dozen, or about 8 cents apiece. So, without the ad valorem rate of 45 per cent at all we will have over 100 per cent duty, and in any case where the specific rate would afford 100 per cent duty, with 45 per cent additional, it will be 145 per cent duty.

Now what about the imports of table, kitchen, and carving knives, and so forth? During the nine months of 1921 the imports were valued at $173,000; of table and carving knives without handles, $18,000; of butcher knives, and so forth, $87,000, with handles; without handles, $2,000; making a total importation for those nine months of about $300,000, where we exported during the same period $1,072,000.

Mr. McLEAN. Mr. President, what year was that?

Mr. LENROOT. The first nine months of 1921. Our exports were three times our imports. The imports were very small under a 30 per cent duty and yet it is proposed to raise the duty so that it may run as high as 200 per cent, and the American manufacturers have been getting along very well on a rate of 30 per cent.

Mr. SMITH. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Wisconsin yield to the Senator from South Carolina?

Mr. LENROOT. I do.

Mr. SMITH. May I ask the Senator whether there is a specific duty under the existing law?

Mr. LENROOT. No; the duty is 25 per cent without handles, and 30 per cent with handles, as I recollect—a straight ad valorem duty.

Here we have a compound duty where the specific alone in innumerable instances will amount to 100 per cent, and then, with the substitute adopted, we add 45 per cent ad valorem besides.

Mr. McLEAN. May I ask the Senator from what report he got the valuations?

Mr. LENROOT. I have it here. It is the imports entered for consumption, Department of Commerce, 1921, showing 238,000 dozen with handles and 16,000 dozen without handles, the importation with handles being valued at $229,000, or a little less than a dollar a dozen.

Mr. McLEAN. That is an average.

Mr. LENROOT. I understand that it is an average. I said it was an average. I said they are all grouped. Of course, that means, though, that there are a good many of them worth a great deal less than a dollar a dozen, as well as others that are worth more than a dollar a dozen, whereas the very lowest rate here is 3 cents apiece, or 36 cents a dozen, plus 45 per cent ad valorem.

Mr. President, as I said a moment ago, while I appreciate the necessity for an increase in this cutlery schedule, it seems to me, in view of our imports and exports, that if we increase this rate 100 per cent, as is proposed by the amendment that is now pending, we will have done all that the Senate ought to consider. I want to say, further, that upon articles of common use, used in every home in the land, if we have to pay more than 100 per cent additional for the American products we had better import them for a while.

Mr. SMITH. Mr. President, the Senator from Wisconsin said a moment ago that he was unable to speak definitely as to the substitute that had been offered by the committee. Do I understand now that the only change in it is the change from 55 to 45 per cent?

Mr. LENROOT. That is what I understood from the chairman of the committee. I may be wrong about that.

So, Mr. President, I think this is a fair maximum. I want to say frankly that when this cutlery schedule was up before the committee were able to point out some specific cases where a very high duty, comparatively speaking, was necessary; but in the case of this paragraph—and that is true of other paragraphs as well as this one—the present duty is practically prohibitive. It has occurred to me, therefore, that we can properly reach the entire subject by a maximum ad valorem, the same as we did upon cotton cloth, the same as we did upon cotton gloves; and I want the Senate to bear in mind, in voting upon

this amendment, that it increases by 100 per cent the present rate, under which our exports are nearly three times our imports.

Mr. SIMMONS. Mr. President, I wish just to supplement what has been said by the Senator from Wisconsin, and said by him so ably and so pertinently. There is a fundamental vice in the manner in which these various articles are grouped in one paragraph. Take the paragraph to which the Senator's amendment applies, paragraph 355. I have not counted them, but I should say that there are probably 50 separate and distinct articles of cutlery embraced in that paragraph. All of the articles in that paragraph, without any reference to the difference in the cost of production, without any reference to the difference in the selling prices, without any reference whatever to the intrinsic value of the different articles, are catalogued together, and the same duty is placed upon each and all.

I have here a number of articles, some of them embraced in this paragraph and some of them not embraced in the paragraph, but embraced in other paragraphs where they are grouped with other articles, just as the articles mentioned here are grouped together, showing the ad valorem equivalents of the rates to be imposed upon these items if they were dealt with separately.

I have in my hand a kitchen knife. [Exhibiting.] I find that the duty imposed upon that will equal 218 per cent ad valorem.

I have here another knife, a smaller knife. [Exhibiting.] I find that the ad valorem equivalent of the duty imposed upon that would be 170 per cent.

I have here another knife. [Exhibiting.] I find that the ad valorem equivalent duty upon that would be 174 per cent.

I have another, and I find that the ad valorem equivalent duty upon that would be 180 per cent.

I have a number of additional articles, knives and other things, on which the duties would exceed 100 per cent, some of them going as high as 118 per cent. Yet those items are all grouped together and specific and ad valorem rates are fixed upon them, without any reference to the difference in the ad valorem equivalent of the specific rates applied to the different articles.

Nothing could be more vicious in tariff making than that. One article may have twice as much duty imposed upon it as, under the principle applied, it is entitled to; another may have less than it is entitled to under that principle.

We have gone over this. Of course, we can not cure that vice at this late hour; it is impossible; but the amendment of the Senator from Wisconsin corrects it to some extent. The Lenroot amendment not only brings all of these items more nearly upon a basis of parity, so far as the tax is concerned, but it makes it certain that whatever the ad valorem equivalent of the rate imposed in the paragraph may be upon a specific item—218 per cent in one case, 180 in another, 174 per cent in another—the ad valorem equivalent upon each and every one of these items shall never exceed 60 per cent. That is a maximum entirely too high. I wish the Senator had made it a bit lower. Forty-five per cent would have been a good maximum. But I doubt whether we could pass through the Senate a maximum as low as that, and there is some hope, I think, of passing the amendment offered by the Senator fixing a 60 per cent maximum. While I think that is entirely too high, while I wish we might get it down, it is such an improvement upon the paragraph as reported by the committee and as heretofore adopted by the Senate that I shall take pleasure in giving it my support.

Mr. SMITH. Before the Senator takes his seat I wish to say that while I have not investigated this particular paragraph, as I understood the Senator from Wisconsin, the present rate of duty is 25 and 30.

Mr. SIMMONS. In this particular paragraph.

Mr. SMITH. With a rate of 25 and 30, our exports are about three times our imports. As I understood the Senator, he read the imports and exports up to the present time. That means that under present conditions the 25 and 30 per cent ad valorem is practically prohibitive now.

Mr. SIMMONS. I say to the Senator that I do not think there is any real necessity for increasing the present rate, so far as this particular paragraph is concerned. I wish we might get it down, but I am talking about the practical side of it, what may be accomplished at this stage in the Senate.

Mr. SMITH. The point I was getting at was that if the present rates, the maximum of which is 30 per cent, are practically prohibitive, why we should even double, under the Senator's amendment, the present rate of duty as a compromise between that and what he has shown to be a monstrous proposition.

Mr. SIMMONS. The Senator probably does not understand that unless some limitation like this is placed upon the rate of duty which may be exacted these items will have to pay above 100 per cent.

Mr. SMITH. I understand that.

Mr. SIMMONS. And this provides that whatever the rate might be, applying the rates fixed in the paragraph, it shall not exceed 60 per cent. Suppose it should be 150 per cent. Then it must be cut down by the customhouse officials to 60 per cent. That is, of course, very much better than the high rates now prescribed in the bill.

Mr. SMITH. I understood that thoroughly, that in no event, whether it was a compound of the specific and the ad valorem or not, if it should reach 218, under the Senator's amendment it should not exceed 60 per cent.

Mr. SIMMONS. That is all that could be collected.

Mr. SMITH. The rates in the present law are practically prohibitive, if our statistics are reliable at all. I wanted to know if the Senator from Wisconsin could not, in place of offering a 60 per cent rate, get a rate which would be more in parity with what he has already discovered to be a satisfactory rate.

Mr. SIMMONS. I have expressed my wish in the same direction; but my understanding is that the Senator from Wisconsin will offer similar amendments to certain other paragraphs relating to cutlery, and he probably has concluded that the 60 per cent maximum is the best that we can hope to get adopted here.

Mr. LENROOT. I shall offer similar amendments to the pocketknife paragraph and to the scissors and shears paragraph.

Mr. SIMMONS. Fixing a maximum?

Mr. LENROOT. Fixing a maximum.

Mr. SIMMONS. So that, although the duty may far exceed that, the customhouse officials will not be permitted to collect more of the duty than 60 per cent, or a hundred per cent, as the case may be. That is a restraining amendment.

Mr. LENROOT. Exactly as has been done in the case of cotton gloves and cotton cloth.

Mr. JONES of New Mexico. Mr. President, I want to say just a word. Senators will recall that when this paragraph was originally before the Senate I discussed it at some length. I presented a great deal of information to the Senate, and at that time the fears which were expressed by some of those who favored these very high rates I could not believe were justified. That was relatively early in the discussion of the bill. Since that time even the Finance Committee has, I think with great pleasure, brought in many reductions to subsequent items in the bill. They have realized that conditions were changing, and I know of no rate which has been changed to a greater extent than with respect to the items in this paragraph.

I do not care to even review or restate the different factors entering into the rates in this paragraph, but conditions have changed to a very great extent since we acted upon the paragraph and it is quite as apparent to me, in view of all the facts involved in this industry at the present time, as when we considered it before, that this limitation should be made.

As has been stated, under the present law there are no importations threatening this industry in the United States, and the amendment of the Senator from Wisconsin is simply to limit the new rates to an advance of 100 per cent of the present rates. His limitation is 60 per cent of the value of the foreign commodity.

We must bear in mind the effect of such a blanket clause. Table cutlery involves many different items. I realize that we can not pick out specifically the vast number of items and put a separate duty upon each, and the operation of what we call a blanket provision is so unequal and unjust in many ways that I do not see how you can make such a paragraph reasonable except by adopting some such provision as that proposed by the Senator from Wisconsin.

The Senator from North Carolina has presented various articles to the Senate on which the duty will be far higher than anyone would be willing to vote definitely with respect to the individual items, and that is the vice, if I may call it such, of general legislation of this kind. As I said, I do not see how we can get away from it entirely, but we can mitigate its bad features by some such provision as that which is now offered. My judgment is that the limitation which the Senator from Wisconsin has offered is too high, but it is decidedly an advance in the right direction.

Mr. GOODING. Mr. President, I can understand how, if this bill provided for the American valuation, a Republican and a protectionist might think that some of the duties in the bill

were too high. I can understand that if normal conditions existed in all the countries of the world, a Republican and a protectionist might feel that some of the duties in this bill were entirely too high. But I can not understand how a Republican, standing on the Republican platform that is pledged to give a rate measuring the difference in the cost of production between this and foreign countries, can vote to reduce any of the protective duties in this bill. There is not an exception to the rule where this country comes in competition with Germany, with Austria, or any of the Old World countries, where the depreciated currency is worth practically nothing at all. I want to say that as far as the bill is concerned there is no protection at all to those industries in this country which must meet that competition in our own market.

I have before me the record of a knife that was exhibited here, sold in this country for $5. It would require 659 per cent to protect the manufacturer in this country as against the difference in the selling price of that knife in this country and what it costs in Germany. A great many articles were exhibited here which showed that as high as 2,000 per cent must be given in order to give a proper protection. The Senator from Utah admitted upon the floor of the Senate that it would take from 500 to 1,000 per cent on many articles to protect the American manufacturer. His excuse for not giving it was that the American people would not stand for it. Again, I want to say that the American people would stand for any duty that is necessary to protect an industry established in America, to continue it, and to give employment to American labor.

With all the countries on earth reducing their armies and scrapping their navies, I want to say again that the great question that confronts every country on earth to-day, new countries as well as the old, is that of finding employment for their own people. To my mind—I have said this several times, but I want to say it again, because I am seriously concerned over it—we are facing a crisis in America, and unless we give the manufacturers proper protection and all other American industries we shall not find employment for the army of unemployed that numbers more than 3,500,000 to-day.

This is what is going to happen. Germany and all the great manufacturing countries of the world will find every weak spot they can in the bill, and then are going to develop the particular industry to take advantage of it. They are forced to do it in order to find employment for their own people. That is the condition with which we are confronted. Germany has been busy during the two or three years since the war manufacturing for her own people. For four years she waged the greatest war of destruction civilization has ever known. During that time all her manufacturing institutions were employed in the manufacture of weapons of destruction, not articles of general use for the people. Now the Germans are turning their attention to the manufacture of the necessities of life. We learn from every source that the Germans are bending their backs and their manufacturing institutions are running full time. They have found it necessary, as I have said, to increase their own protective duty sixty-five times as against their own depreciated currency. My God, we are the only country in the world that is not willing to take the bankrupt condition of foreign countries into consideration. Austria has increased her protective duties two hundred times, and France, Belgium, and all the other countries have put in coefficients or multipliers to protect their own manufacturers, and in most cases have placed a direct embargo on those things which they manufacture, and yet here we are going along with a foreign valuation that does not mean anything at all, throwing our gates wide open to all the world.

Mr. SIMMONS. Mr. President, may I ask the Senator a question?

Mr. GOODING. Yes; the Senator may ask me a question.

Mr. SIMMONS. The Senator has spoken with reference to the high protective rates which obtain in Germany. The Senator has said they have gradually increased their rates.

Mr. GOODING. I make the statement that they have not only increased them but it is necessary to get a license to ship into Germany now, and that is never dependable at all. With reference to some things they do not permit even that—that is, as to those things they manufacture for themselves, it is impossible to get a license to ship them into Germany under any duty or any cost.

Mr. SIMMONS. I am not now concerned about the license. I am asking the Senator with reference to the high protective rates which he said now obtain in Germany. He said also that we are not able to compete with Germany. I want to ask the Senator, in view of those high protective rates which he declares now exist in Germany—prohibitive rates, I assume he means—how it is that America succeeded last year in selling to Germany nearly $400,000,000 worth of products produced in this country?

Mr. GOODING. I will say to the Senator that Germany is selling to this country to-day a greater volume, if it could be measured by the value of the mark before the war, than she ever sold.

Mr. SIMMONS. I want to say to the Senator, if he will permit me, that he is greatly mistaken in that, because while Germany sold us last year, measured in our own dollars, only about $85,000,000 worth of her products, we sold Germany, measured in our own dollars, nearly $400,000,000 worth.

Mr. GOODING. I beg to differ with the Senator. Germany sold us $87,000,000 worth of German products measured on the basis of the German mark—not in gold, but on the basis of the depreciated German mark.

Mr. McLEAN. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Idaho yield to the Senator from Connecticut?

Mr. GOODING. I yield.

Mr. McLEAN. I want to call the attention of the Senator from North Carolina to the fact that the exports of Germany are very largely confined to food products and raw materials. The German industrial religion is that they buy nothing and use nothing except what they can not produce or raise in Germany. It is only the raw materials and the foods that they import into Germany.

Mr. SIMMONS. Has the Senator taken the trouble to ascertain what proportion of the $400,000,000 worth which we export to Germany are manufactured articles?

Mr. McLEAN. A very large proportion.

Mr. SIMMONS. I will say to the Senator that a considerable part were manufactured articles and the Senator admits that Germany has no high tariff against our agricultural products.

Mr. GOODING. I wish to say to the Senator—and it appears in the RECORD over and over again—that it is impossible to get a license to ship manufactured articles into Germany that they can manufacture for themselves. That information is furnished by the Department of Commerce, and it has been placed in the RECORD over and over again.

Mr. SIMMONS. I would be very glad to have the Senator place in the RECORD as a part of his remarks the exact proportion of the $400,000,000 worth of exports to Germany that was of manufactured products.

Mr. GOODING. I have not the time to do that, and I think it has been done already. I can understand how a free trader or a tariff-for-revenue-only advocate can stand here and ask for a reduction of these protective rates which I insist, Mr. President, are not protective at all, owing to the fact that they are based on foreign valuation. With such a Senator I have no quarrel at all, but I can not understand how a Senator can stand on the floor of the Senate, on the Republican platform which has declared for the difference in the cost of production between this country and abroad, and not be willing to take into consideration the depreciated currency of the foreign country. There has been placed in the RECORD by the senior Senator from Utah [Mr. SMOOT] a contract between the employer and the employee in the textile districts of Germany showing that they are working there for one-tenth the price they are working for in this country, and I myself offered a letter along the same line.

Mr. LENROOT. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Idaho yield to the Senator from Wisconsin?

Mr. GOODING. I yield.

Mr. LENROOT. How does the Senator explain the fact that our exports are three times our imports under a 30 per cent duty—one-half of that now proposed?

Mr. GOODING. I want to say to the Senator that the world is not in a normal condition at all. Germany, of course, has had to buy a lot of raw materials that she destroyed during the war. She occupies a different position now.

Mr. President, I am just pleading for an opportunity to start the wheels of industry in America. I have no other thought in my discussion of the tariff question. I know that can not be done unless we are going in some way or other to take into consideration the depreciated currency in foreign countries. I do not believe the duties we have now will even start to relieve the situation at all. I hope the Senate will not make the mistake of granting any further reduction. If it is necessary to make a reduction, the President would be able to do it. If it is necessary to make an increase, he would be able to do it. But even in that event he can not go far enough. Should we not resolve any question of doubt in favor of our own industries in America and leave something for him to do under the administrative feature? I believe the Senator from Wisconsin was very active in getting that administrative feature into the bill and in amending it. Should we not leave something for the President to do, for some one who will be

able to get after the facts better than the Senate is and resolve all this question of doubt in the interest of the American laborer and the American home?

Mr. McLEAN. Mr. President, the Senator from Wisconsin [Mr. LENROOT] has announced that he proposes to introduce in addition to the amendment now under consideration two other amendments to the penknife and the scissors schedule. I am rather surprised that the Senator did not include razors, because the rate recommended by the committee with reference to razors is much higher than on any other schedule. But I am glad that he realized that the rates in the razor schedule are justified.

I want to say that if the Senator from Wisconsin understood the condition of the industry and the competitive conditions which now obtain in this industry he would not vote for the pending amendment, in my opinion, and he would not vote for either one of the other two amendments which he proposes to introduce. It is true, so far as the schedule is concerned, so far as it relates to table knives and butcher knives, that competition is not to-day as destructive as it is against the penknives and the scissors. But, Mr. President, even to-day our export trade has been reduced to nothing owing to competition from Germany. If the Senator would read the paragraph and consider it as I think he ought to, he would see that it is absolutely necessary to retain the compound duties. I think the committee made a mistake when they revised the ad valorem duty to 45 per cent.

I call the attention of Senators to just what the paragraph provides and I appeal to the intelligence of Senators and to their spirit of justice with regard to the rates as compared with other rates, many of them running much above the rate provided for in this paragraph. The section includes a great many varieties of knives—table, butcher, carving, cooks', hunting, kitchen, bread, cake, pie, slicing, cigar, butter, vegetable, fruit, cheese, canning, fish, carpenters', bench, curriers', drawing, farriers', fleshing, hay, sugar beet, beet topping, and so forth. It would seem to be unjust to impose a duty of 20 cents and 60 per cent ad valorem on those knives. However, when one reads the section through he finds that these are knives with handles of mother-of-pearl, or shell, or ivory, or deer, or other animal horn, or silver-nickel, or silver, or other metal than iron or steel.

Mr. President, the committee recommended a rate of 20 cents each on these knives and 60 per cent ad valorem, because these knives are all luxuries. Everyone who is familiar with the cutlery industry knows that there are certain knives that are made in Germany and England which rich people will have no matter what they pay for them.

Mr. LENROOT. Will the Senator from Connecticut yield for a question?

Mr. McLEAN. Yes.

Mr. LENROOT. Why did the Committee on Finance include in the same paragraph luxuries and the most common necessities?

Mr. McLEAN. If the knives have handles of mother-of-pearl or silver or nickel, they take the 20-cent duty; otherwise they do not.

Mr. LENROOT. They all take the 45 per cent ad valorem duty, do they not?

Mr. McLEAN. Forty-five per cent ad valorem is not an unreasonable rate for the common knife when a duty of 129 per cent has been placed on low grades of wool.

Now, let me call attention to the price of some of these knives. The Senator from Wisconsin struck an average, but, of course, everybody knows that is not a safe basis upon which to estimate the rate upon any one of these articles. It is entirely indefensible.

Included in this paragraph are butchers' knives which are brought into this country from Germany for 72 cents a dozen. Of course, when one strikes an average, these cheaper knives constitute a large proportion of the importations, but the small duty of 3 cents on these cheap knives amounts to practically nothing. If a knife comes in here for 6 cents, and one pays 3 cents duty on it, that makes the price of the knife 9 cents instead of 6 cents. Now, consider some of the knives the duty on which the Senator from Wisconsin would reduce. The foreign selling price of some of those knives is $40 a dozen and the American selling price is $107 a dozen. As another illustration take carving sets, the foreign price of which is $27.90 a dozen, and the American selling price when it reaches this country is $86.70 a dozen; another set, of which the foreign selling price is also $27.90 a dozen, is also selling in this country for $86.70.

I wish to say with regard to this particular schedule—and the same remark applies to the other schedule which the Senator from Wisconsin wishes to attack—that this industry has been torpedoed by Germany with the same ruthlessness that the *Lusitania* was torpedoed. The business now is really down and out; these manufacturers are simply keeping their organizations together in the hope that Congress will throw them a life line before they go down for the third time. I know the Senator from Wisconsin would like to please the importers who have been hanging around the Halls of Congress, and reduce this rate and the rates which are carried in the other two schedules, but I wish to say with emphasis that the importers will be the only individuals who will be benefited by this reduction. They will be the only ones who will be benefited, because the large importers, who have been so persistent in their efforts to cut these rates, are also the owners of large manufacturing establishments in Germany. There is no question about that. Consequently, they absolutely control the invoice value of these articles, and unless we put on a compound rate—a specific and an ad valorem rate—they will invoice these goods at any price which they see fit, and it will be impossible to impeach that invoice.

Then what will happen? Just what is happening now. They will bring these articles into the country and sell them for 200 and 300 per cent profit when they shall have driven the American manufacturer out of business.

It must be remembered that the American manufacturer does not retail; he is at the mercy of the jobbers; and the jobbers will buy nothing of the American manufacturer so long as they can get these goods for one-quarter of the price from the importer. The American manufacturer is put in a pocket where it is impossible for him to live.

The Senator from Wisconsin wishes the rate to be high enough in order to prevent competition from any other European country than Germany. The result of that will be absolutely to confine competition in this article to Germany, which, as I have said, is controlled by the importers in this country. When the American industry shall have been driven out of the market, the people in this country will pay "all that the trade will bear," and we have had evidence already introduced into the Senate that that price includes from 200 to 2,000 per cent profit. Will it benefit the German laborer? He will continue to work for the same starvation wages for which he is now working. Will it benefit the American consumers? They will pay three times the price that they now do.

I have in my hand a report which has just been made by a member of the Ways and Means Committee of the House of Representatives, Mr. TILSON. He has been in Europe during the vacation of the House investigating this subject, and he has made a report to Mr. FORDNEY, the chairman of the Ways and Means Committee of the House. That report is a complete answer to the assertion here that the conditions in Europe are changing and that prices are rising. On the contrary, Mr. President, the wages in Europe are lower than they were when the Reynolds report was presented to the Committee on Finance. I have a statement of the prices of razors, knives, and scissors which were purchased by Representative TILSON in Germany, which shows that the prices there are now even cheaper than they were when the experts secured information for the Finance Committee. I ask unanimous consent that the statement may be printed in the RECORD at this point.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

RAZORS.	Marks.
No. 56. 59 marks, per dozen	700
No. 50. 41.65 marks, per dozen	500
No. 163. 75 marks, per dozen	900
No. 60. 86.65 marks, per dozen	1,040
No. 14. 90 marks, per dozen	1,080
No. 59. 102.50 marks, per dozen	1,230
No. 137. 51.65 marks, per dozen	620
No. 10. 68.35 marks, per dozen	820
No. 90. 100 marks, per dozen	1,200
No. 64. 104.15 marks, per dozen	1,250
No. 44. 87.50 marks, per dozen	1,000
No. 88. 104.15 marks, per dozen	1,250
KNIVES.	
No. 4501. 800 marks, per dozen	9,600
No. 4307. 600 marks, per dozen	7,200
No. 4163. 750 marks, per dozen	9,000
No. 4422. 640 marks, per dozen	7,680
No. 4306. 180 marks, per dozen	2,160
No. 4431. 210 marks, per dozen	2,520
No. 4026. 150 marks, per dozen	1,800
No. 4001. 150 marks, per dozen	1,800
No. 4046. 100 marks, per dozen	1,200
No. 4089. 200 marks, per dozen	2,400
No. 4481. 160 marks, per dozen	1,980
No. 4163½. 200 marks, per dozen	2,400

SCISSORS.	Marks.
No. 724/7. 60 marks, per dozen	720
No. 725/6. 40 marks, per dozen	480
No. 701½/4½. 20 marks, per dozen	240
No. 703/4. 20 marks, per dozen	240
No. 705/5½. 35 marks, per dozen	420
No. 703 gold/5½. 50 marks, per dozen	600

Mr. McLEAN. Mr. President, as I said before, I did not anticipate this attack upon these schedules and I have not at hand all the information which I should like to submit to the Senate. As we know, these schedules were thoroughly discussed and were bitterly attacked on the other side of the Chamber when they were under discussion weeks ago. It will be remembered that the Senator from New Mexico [Mr. JONES] who had charge of these schedules for the other side of the Chamber introduced in the Senate a knife made, I think, by an importer by the name of Boker, or imported by him, and the Senator from New Mexico undertook to convince the Senate, upon the report made by this man, that the value of that knife had doubled since the Reynolds report was framed. I showed to the Senate a duplicate of that knife, bought in the open market for less than half what this importer represented to the Senator from New Mexico was the present price of the article, and I stated to the Senator from New Mexico that I thought this gentleman owed him an explanation.

The Senator from New Mexico agreed with me. It simply shows that the prices of these articles are absolutely in the control of the Germans. They can fix the invoice at any price they choose, and unless we put upon these articles a compound duty, adequate protection to the American industry will not be afforded. The duty recommended by the Senate committee on butcher knives is not anywhere near what the Senator from Wisconsin claims, based upon the average, and when we come to the cheaper knives——

The PRESIDENT pro tempore. The time of the Senator from Connecticut has expired.

Mr. OVERMAN. Mr. President, I desire to give notice, if it has not already been given, that I shall ask for a separate vote in the Senate on paragraphs 315, 316, and 317.

The PRESIDENT pro tempore. The Chair will take this opportunity of saying that the proper time for reserving amendments which have been agreed to as in Committee of the Whole is after the bill passes into the Senate. The Chair will ask the Secretary to prepare a list, so far as he is able to do so, of the notices which have been given from time to time in regard to reservations for separate votes. That list will be read to the Senate immediately after the bill passes into the Senate, and then if it is not complete Senators may supply whatever omissions are found in it.

Mr. UNDERWOOD. Mr. President, as I understand, the President pro tempore holds that after the bill goes into the Senate proper and before amendments are voted on en bloc any Senator will have the privilege of reserving such amendments as he desires for a separate vote?

The PRESIDENT pro tempore. The Chair is of the opinion that is the proper time to make reservations for separate votes, but the Chair will treat the notices which have already been given as such reservations, and will say again that the Secretary will read before the time has passed the notices which have been given.

Mr. OVERMAN. I think the Chair is entirely correct in his ruling, although the statute has been a little different heretofore.

The PRESIDENT pro tempore. The Chair understands that.

Mr. McCUMBER. Mr. President, the Senator from Wisconsin in giving his notice of the several amendments which he proposes to offer undoubtedly is governed by what he considers to be a proper rule of demarcation between what duty ought to be given to preserve the American industry and what duty ought not be given in order to protect the American industry. The Committee on Finance have operated under a rule which does not entirely harmonize with that idea. The committee have attempted to determine whether an industry was worth preserving in the United States, and when they determined that, after making allowance for what it would cost the American people to preserve such industry, they then fixed a duty which, in their opinion, would accomplish that result.

If the Senator's view is right, whenever an article in this schedule is not protected under a 60 per cent ad valorem duty we should turn the business over to the German, the French, or the British manufacturer. If the Senate desire to follow that view, they can, of course, vote in favor of the duty proposed by the Senator from Wisconsin; and that is true in a number of other industries.

I am not one of those who believe that if we place a lower duty upon these articles they are going to be sold for a lower price by the German importer. The whole history of our commerce in the last few years shows that this will not happen. A condition may come about in which competition will compel the German importer to lower his price; but I will take just a few of these articles and see what profit the German importer is making. He is selling just enough lower than the American selling price to get into this country and to sell his products. We will take the overhead, profit, and landed cost, including duty. In the one article from England there is a profit of 52 per cent. In the next one, from Austria, there is $2.39, or 239 per cent profit.

Now, I will take these pocketknives from Germany, taking the cost of purchasing them and selling them. Here are pocketknives where the profit is $2.60, or 260 per cent; more of them, 229 per cent; and so they run from 200 to 300 per cent profit that is being made by the importer.

Now, I want to take a few of the articles that the Senator wants to reduce to 60 per cent. I will take a carving set. This is from Germany. The cost is $27.90 per dozen. The landing cost is $2.79. The profit and overhead charges are $9.30. That brings the price landed, with all the profits and allowing them good profits of 33⅓ per cent, up to $39.99. Sixty per cent upon that basis would be $24, making a cost of $64. The American selling price is $91.20. Therefore, the 60 per cent basis would lack $27.20 per dozen of bringing it up to the selling price of the American article. The duty required to equalize the difference upon those particular sets would be 183 per cent. We have not given that duty.

Now, let us take German butcher knives. The German price is $3.77 a dozen. The landing cost is 38 cents. The profit is $1.25. That would bring the cost to $5.30. Sixty per cent duty would be $2.26, which would bring the price up to $7.56. The American selling prices are $8.25, $9.50, and $8; so there would be an insufficiency of duty ranging from 44 cents to $1.94 per dozen, and the duty required on the average would be about 100 per cent, ranging from 72 per cent to 112 per cent.

Now, let us take some of the cook knives. The cost in Germany is $6.98; the landing cost, 70 cents; the profit and overhead, $2.33, making a total of $10.01. Sixty per cent duty on the foreign cost would be $4.20, which would bring the cost up to $14.21. The American selling price is $15, so the duty would be 79 cents too low. In this instance the duty required to equalize, allowing the foreign producer 33⅓ per cent profit, would be 71⅓ per cent, while the limit of duty provided in the Senator's amendment would be 60 per cent.

I will take just one more, Mr. President—cook knives from Germany: Cost, $6.93; landing cost, $1.04; profits, $2.31; making a total of $10.28. Add 60 per cent duty to that and you will have $6.18, or a total of $16.46 selling price in the United States. The selling prices in the United States, however, are $17.50 to $17.75. The duty that would be required to equalize the difference would run from 104 per cent to 108 per cent.

So we come right back to this question: Do we want to continue the production of those articles in the United States, or do we want to surrender to our competitors every product where 60 per cent will not measure up to the required duty upon the protective basis? If we wish to do that, of course we should vote for the Senator's amendment. If we wish to say that we will allow the American producer to continue to produce, to continue to supply the American market, even though the duty be more than 60 per cent, we should vote against this amendment.

Mr. JONES of New Mexico. Mr. President, I want to call attention to some specific instances which will put an entirely different view upon the situation than that presented by the Senator from North Dakota and the Senator from Connecticut.

It must be borne in mind that the prices which the Senator from North Dakota referred to, mentioned in the Reynolds report—and largely the same thing may be said with regard to the figures which the Senator from Connecticut presented—are figures of a year past; and the change during this time, as everyone knows, has been very marked indeed. The truth of it is that the German competition should no longer be considered an important factor in the cutlery business. The prices of all steel products in Germany have advanced so greatly that no proper comparison can be made now with respect to what occurred a year ago.

Mr. McLEAN. Mr. President——

The PRESIDENT pro tempore. Does the Senator from New Mexico yield to the Senator from Connecticut?

Mr. JONES of New Mexico. I do.

Mr. McLEAN. I have just put in the RECORD—I did not have time to read it—a report made by Congressman TILSON, who is a member of the Ways and Means Committee of the House. He has been in Germany investigating the cutlery business, and he has purchased these goods there for much less than they could have been purchased in August, when the Reynolds report was made.

Mr. JONES of New Mexico. Mr. President, I presume that statement may be true, because of the very recent additional decline in the price of the German mark. The German mark to-day is selling for about a tenth of a cent.

Mr. McLEAN. Is the reason important, if the fact must be admitted, that these products are being made and sold in Germany to-day for less money than they were in August?

Mr. JONES of New Mexico. But, Mr. President, the Senator knows that that condition there is only temporary; and he knows, further, that this country is not being flooded with these goods from Germany.

Mr. McLEAN. If the importations in March continued through the year, they would exceed 100,000,000 dozen of pocketknives. There is more than a year's supply now in this country that has been imported from Germany within the last year.

Mr. JONES of New Mexico. Mr. President, I am sorry that I can not yield further, but my time is limited. I make the statement that in the case of this table cutlery, in 1920—the production in 1919, by the way, according to the United States census, was nearly $5,000,000 worth—we exported nearly three and a half million dollars' worth; in 1921 we exported $2,300,000 worth; and in 1921 we imported less than a quarter of a million dollars' worth.

Mr. McLEAN rose.

Mr. JONES of New Mexico. I beg the Senator's pardon, but I can not yield further.

Now I want to call attention to a few things.

Here is the bread knife which the Senator from North Dakota [Mr. McCUMBER] presented here. He did not state what this percentage of duty was based upon; but there is a bread knife in common use in perhaps the great majority of the homes of the land. It sells all over the world at 6½ cents each. That is the manufacturer's price for general sale throughout the world. Under this bill, the duty on it is 10 cents, plus 45 per cent. That is the American selling price, not the foreign cost; that is what the American product is sold for in the markets of the world, 6½ cents each, and a specific duty of 10 cents is proposed, and to that is to be added a duty of 45 per cent ad valorem.

Here is another knife, made in America, which sells all over the world for 7.3 cents each [exhibiting]. The specific duty is 10 cents, and the ad valorem duty 45 per cent. The specific duty is more than the selling price of the American article. I have here another little carving knife, of American manufacture, sold by the American manufacturer all over the world for 2.7 cents apiece [exhibiting]. The duty on that is 3 cents plus the 45 per cent ad valorem.

Here is a common butcher knife, used in perhaps all the homes of America [exhibiting]. The American selling price of this knife, which is sold all over the world, is only 8¼ cents, and the duty on it is about 12½ cents under this proposal. How can those rates be justified?

Here is a common table knife, used perhaps in most of the restaurants of the country. [Exhibiting.] That knife is an American product, and is sold by the American manufacturer at 8.3 cents each, and the duty on it under this bill would be about 7 cents. It is made in competition with the manufacturers of the world. Germany can not make it. It is made by a machine which stamps out two at a time, and it can be manufactured in this country as cheaply as anywhere on earth. Yet you are piling up these duties upon these common articles of cutlery, which are needed in every home, and you are imposing a duty amounting, in the main, to more than a hundred per cent upon the American selling price.

I would like to know how that can be justified. There is no question here of exchange. There is no question of competition. But these are duties of more than 100 per cent upon the prices for which the American manufactures are selling throughout the world, and these are articles which are in common use, which are purchased by those who have to measure the value of the cent, the nickel, and the dime. The Senator from Connecticut minimizes the importance of these amounts, but I want to say to him again that there are people in the United States, by the thousands and hundreds of thousands, who do measure the value of the small sums of money. The Senator from Connecticut, raised in his environment, may not appreciate these things, but there are people in his own State, I venture to say, who do count the value of the dimes, the nickels, and even the pennies.

Mr. President, these rates are unjustified. We are exporting perhaps 40 per cent of the American production throughout the world, in competition with Germany and every other nation. We are selling the products at home and abroad for less than the amount of the duty. I ask how these rates can be justified. The Senator from Connecticut undertakes to justify them by saying that in this paragraph there are some luxuries. The Senator from Wisconsin asked a question which should be answered, to wit, if that be so, and if that be the excuse, why did not the committee separate these articles, so we might know what are luxuries and what are not?

This is another instance and example of the way this bill has been made up in many cases. They have thrown into some blanket paragraph some articles on which a duty will be justified, and used that as an excuse for putting exorbitant duties upon necessities of life, things which must be had by the people of moderate means, but people who want to live under God's sunshine, just as much as the Senator from Connecticut does.

Mr. McLEAN. Will the Senator permit me just to correct him? I know he does not want to make a mistake.

The PRESIDENT pro tempore. The time of the Senator from New Mexico has expired.

Mr. LENROOT obtained the floor.

Mr. McLEAN. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Wisconsin yield to the Senator from Connecticut?

Mr. LENROOT. I yield.

Mr. McLEAN. The Senator from New Mexico said we did not differentiate. Of course we did. On the cheaper knives—that is, knives with rubber or bone handles—we fixed a duty of 10 cents, and I have stated that our export trade was practically cut off. I know that business is dead at the present time, and I am informed that Germany has captured the entire foreign market.

Mr. LENROOT. Mr. President, I want to say, for the information of the Senator from Connecticut, that I have before me the Monthly Summary of Commerce, showing the imports and exports for the month of May last, and our exports in the month of May of this year of these articles were larger than our imports in the month of May last year.

Mr. McLEAN. What particular articles?

Mr. LENROOT. The whole schedule, which covers everything. I will read it to the Senator; our imports "of all other cutlery," other than pen and pocket knives, razors and parts of, scissors and shears, which leaves tableware, under paragraph 355, paragraph 356, and paragraph 359, all together. Our imports are less than our exports of tableware alone.

Mr. McLEAN. Will the Senator give the figures?

Mr. LENROOT. Our imports of all other cutlery, which includes everything in this paragraph and everything in two other paragraphs, for the month of May amounted to $44,744.

Mr. McLEAN. What were the exports?

Mr. LENROOT. The exports of tableware alone for that same month were $35,000, and of other cutlery, $53,000, or a total of $90,000, as against imports of $44,000.

Mr. McLEAN. And in 1921 our exports were over $3,000,000, which shows that that applies to a few specialties.

Mr. LENROOT. Our imports of articles under this paragraph, which includes paragraph 355, and the other paragraphs I have mentioned amounted in value for the 11 months ending May of this year to nearly $100,000 less than during the same period ending in May, 1921, showing that our imports of these articles, instead of increasing, are actually decreasing. I want to be entirely fair, and to say that our manufactures were decreasing also. But we are not being flooded with these imports, as some Senators would have us believe.

The Senator from North Dakota exhibited a fine carving knife, upon which there may be a great deal of handwork.

The PRESIDENT pro tempore. The time of the Senator from Wisconsin has expired.

Mr. LENROOT. Have I spoken 15 minutes?

The PRESIDENT pro tempore. The Senator has heretofore consumed 12 minutes of his time.

Mr. LENROOT. The Senator from New Mexico offered an amendment.

Mr. JONES of New Mexico. I moved an amendment to the amendment.

Mr. LENROOT. I thought there was another amendment pending.

Mr. JONES of New Mexico. I moved to amend the amendment proposed by the Senator from Wisconsin by striking out the numeral "60" and inserting in lieu thereof the numeral "55."

Mr. McCUMBER. Mr. President, I rise to a point of order.

The PRESIDENT pro tempore. The Senator will state his point of order.

Mr. McCUMBER. I think that is an amendment in the third degree. I understand the Senator from Wisconsin offered an amendment to a committee amendment, and now the Senator from New Mexico offers an amendment to that amendment.

Mr. LENROOT. Was not the original committee amendment a substitute, to be treated as an original question, in which case an amendment to the amendment might be offered?

The PRESIDENT pro tempore. Has the Senator from New Mexico sent his amendment to the desk?

Mr. JONES of New Mexico. The motion is simply to strike out the numeral "60" and insert in lieu thereof "55."

Mr. LENROOT. If I understood the chairman correctly, the original committee amendment was an amendment in the form of a substitute for the entire paragraph. Am I correct in that?

Mr. McCUMBER. That is correct, Mr. President.

Mr. LENROOT. If that be true, then, as I recollect the rule, that must be treated as an original question, to which an amendment may be offered, and an amendment to an amendment, without being in the third degree.

The PRESIDENT pro tempore. The Chair is inclined to think that that view is correct, and that the amendment of the Senator from New Mexico is in order. The question is upon agreeing to the amendment proposed by the Senator from New Mexico to the amendment offered by the Senator from Wisconsin.

Mr. LENROOT. Mr. President, I wish to be recognized on this amendment. I was saying that the chairman of the Finance Committee exhibited a carving set, which he stated was a luxury. The committee is evidently picking out a few articles on which a high rate of duty is justified and under that argument trying to get through the bulk of the articles enumerated in this paragraph under duties which are absolutely prohibitive. They do not defend the rates upon these other articles. The committee does not defend the rates they have proposed upon ordinary kitchen knives, upon bread knives, and similar things, because if they do they must admit that the rates imposed in this bill in some cases are as high, not only as the manufacturer's entire price, but as high as the retail price in a 5 and 10 cent store.

Mr. McCUMBER. Mr. President, I hope the Senator from Wisconsin will correct his statement that the chairman of the committee suggested that these articles to which he referred are luxuries. The chairman did not use the word "luxuries" in any respect in his argument.

Mr. LENROOT. Perhaps it was the Senator from Connecticut who used the term. I beg the chairman's pardon, because on reflection I remember it was the Senator from Connecticut who referred to these as being luxuries.

It seems to me that where the exports of these articles of common use are three times the amount of our imports it is little short of scandal if these rates are permitted to remain in this bill.

I shall not favor the amendment of the Senator from New Mexico. I am a protectionist and I want to resolve every doubt in favor of protective duties. But I must say that if there be one article in this paragraph which might require a higher rate than 60 per cent, and all of the rest of them do not justify even as high a rate as 60 per cent, the committee are not in a position where they can insist that the entire paragraph be adopted. It was within the power of the committee to separate those articles which did require a higher duty from the others, and the fault will not be that of the Senate if there be some one particular item which may not be fully protected, because the committee had the opportunity to protect it, and it neglected that opportunity if it were not high enough. The committee, under the guise of protecting some article, clearly is putting prohibitive rates upon the great mass of articles of common use that are exported to-day in competition with the world.

Mr. McLEAN. Mr. President, it is true that the imports of the articles covered by the paragraph do not compare with the imports of penknives and scissors. It is also true that our exports of these articles, which in former times have been very large, sometimes exceeding $3,000,000 and $4,000,000 worth a year, have been cut to nothing. The reason is that the manufacturers of the penknives and the scissors and the razors in Germany have taken up the manufacture of the cheap kitchen knives, and the potential competition is there. Unless we give the industry a reasonable protection—and the rates are not nearly as high as they are on the penknives—the same result will follow with regard to table knives that has already happened as to the penknives and the scissors.

I desire to read the imports of the penknives, indicating how disastrous the competition is. In 1918 we imported 85,000 dozen of penknives and pocketknives, and so forth, finished; in 1919, 97,000 dozen; in 1920, 314,000 dozen; in 1921, 427,000 dozen. I understand that the recent importations indicate that in the spring a year's supply was imported into this country.

With regard to imports of penknives and pocketknives valued at more than $1 a dozen, the imports in 1918 were 14,000 dozen; in 1919, 28,000 dozen; in 1920, 165,000 dozen; and in 1921, 170,000 dozen. Of clasp knives and pruning knives the imports were, in 1918, 70,000 dozen; in 1919, 68,000 dozen; in 1920, 149,000 dozen; and in 1921, 241,000 dozen.

Mr. President, I do not care to continue the discussion any longer. The chairman of the committee has stated that it is simply a question of whether we want to maintain the industry in America or not. It is my belief that it is the American producer who pays taxes and cuts prices. If we destroy American competition and put the American consumer at the mercy of the importers who have their factories in Germany the American people will realize when it is too late that they have made a mistake if they want to get these articles at reasonable prices.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment proposed by the Senator from New Mexico to the amendment of the Senator from Wisconsin.

The amendment to the amendment was rejected.

The PRESIDENT pro tempore. The question is now upon agreeing to the amendment proposed by the Senator from Wisconsin to the amendment of the committee.

Mr. LENROOT. On that I demand the yeas and nays.

The yeas and nays were ordered, and the Assistant Secretary proceeded to call the roll.

Mr. McCUMBER (when his name was called). I have a general pair with the junior Senator from Utah [Mr. KING], which I transfer to the junior Senator from Washington [Mr. POINDEXTER] and vote "nay."

Mr. POMERENE (when his name was called). Again announcing my pair with my colleague [Mr. WILLIS], I transfer that pair to the senior Senator from Nebraska [Mr. HITCHCOCK] and vote "yea."

Mr. WATSON of Georgia (when his name was called). Transferring my general pair with the Senator from California [Mr. JOHNSON] to the junior Senator from Rhode Island [Mr. GERRY], I vote "yea."

Mr. WATSON of Indiana (when his name was called). Making the same announcement as before, I vote "nay."

The roll call was concluded.

Mr. HARRISON. I transfer my pair with the junior Senator from West Virginia [Mr. ELKINS] to the senior Senator from Texas [Mr. CULBERSON] and vote "yea."

Mr. EDGE. Making the same announcement as before, I vote "nay."

Mr. HALE. Making the same announcement as before, I vote "nay."

Mr. FRANCE. On this vote only I have a pair with the senior Senator from Minnesota [Mr. NELSON]. So I withhold my vote.

Mr. CURTIS. I wish to announce the following general pairs:

The Senator from Missouri [Mr. SPENCER] with the Senator from Georgia [Mr. HARRIS];

The Senator from Michigan [Mr. TOWNSEND] with the Senator from Wisconsin [Mr. LA FOLLETTE];

The Senator from Illinois [Mr. McKINLEY] with the Senator from Arkansas [Mr. CARAWAY]; and

The Senator from Vermont [Mr. DILLINGHAM] with the Senator from Virginia [Mr. GLASS].

The result was announced—yeas 28, nays 36, as follows:

YEAS—28.

Borah	Jones, N. Mex.	Overman	Smith
Capper	Kellogg	Pomerene	Sterling
Cummins	Kendrick	Ransdell	Swanson
Dial	Lenroot	Reed, Mo.	Trammell
Fletcher	McKellar	Robinson	Underwood
Harrison	Myers	Sheppard	Walsh, Mass.
Heflin	Norbeck	Simmons	Watson, Ga.

NAYS—36.

Ball	Edge	McLean	Rawson
Brandegee	Gooding	McNary	Reed, Pa.
Broussard	Hale	Moses	Shortridge
Bursum	Harreld	New	Smoot
Calder	Jones, Wash.	Newberry	Stanfield
Cameron	Keyes	Nicholson	Sutherland
Colt	Lodge	Oddie	Wadsworth
Curtis	McCormick	Pepper	Warren
du Pont	McCumber	Phipps	Watson, Ind

NOT VOTING—32.

Ashurst	Elkins	Frelinghuysen	Hitchcock
Caraway	Ernst	Gerry	Johnson
Culberson	Fernald	Glass	King
Dillingham	France	Harris	Ladd

La Follette	Owen	Shields	Walsh, Mont.
McKinley	Page	Spencer	Weller
Nelson	Pittman	Stanley	Williams
Norris	Poindexter	Townsend	Willis

So Mr. LENROOT's amendment to the amendment of the committee was rejected.

The PRESIDENT pro tempore. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

Mr. LENROOT. Mr. President, I offer the amendment which I send to the desk.

The PRESIDING OFFICER (Mr. STERLING in the chair). The amendment will be stated.

The ASSISTANT SECRETARY. On page 74, paragraph 357, planing-machine knives, and so forth, the Senator from Wisconsin proposes to insert at the end of the paragraph, on line 14, page 75, a colon and the following:

Provided further, That none of the articles specified in this paragraph shall pay a greater rate of duty than 100 per cent ad valorem.

Mr. LENROOT. Mr. President, inasmuch as the amendment which has just been voted on has been defeated, which to my mind was such a clear case, I have no hope whatever of the amendment which I have now proposed nor the following amendment which I shall offer being adopted. But I am going to ask for a roll call upon the proposition, so that the American people may know just where Senators stand upon the rates which are being proposed.

Mr. GOODING. Mr. President——

The PRESIDING OFFICER. Does the Senator from Wisconsin yield to the Senator from Idaho?

Mr. LENROOT. I yield.

Mr. GOODING. I wish to ask the Senator from Wisconsin whether or not he knows that 100 per cent is a protective rate and will protect the American industry? I am willing to go on record; but let the Senator answer that question, and if he knows that it is protective let him give his information.

Mr. LENROOT. I know the Senator from Idaho is willing to vote for a thousand per cent rate. The rate of duty is entirely immaterial to the Senator from Idaho.

Mr. GOODING. Mr. President——

The PRESIDING OFFICER. Does the Senator from Wisconsin yield further to the Senator from Idaho?

Mr. LENROOT. I do.

Mr. GOODING. The Senator must add, "if the industry needs 1,000 per cent protection." I have made that very clear.

Mr. LENROOT. Well, we might raise tea in North Carolina if we imposed a rate of duty of 5,000 per cent on that article; and under the policy enunciated by the Senator from Idaho he would vote for a 5,000 per cent rate of duty upon tea.

Mr. GOODING. No; the Senator from Wisconsin is entirely mistaken.

Mr. LENROOT. I do not know where the Senator from Idaho draws the line.

Mr. GOODING. I never have in my life been accused of being foolish or of desiring to hothouse any industry in America. I know what we can do on the soil of our country; that has been my life's work. I know we can not grow tea; I know we can not grow rubber; I know we can not grow coffee; and I am not in favor of a protective duty on tea or on rubber or on coffee. The Senator from Wisconsin must not put me in a foolish light here.

Mr. LENROOT. But the Senntor from Idaho said that he was willing to vote for any rate of duty that was necessary in order to protect any American industry.

Mr. GOODING. Yes; an American industry.

Mr. LENROOT. And he has shown by his vote time and time again that he is entirely indifferent as to how much the American people may be taxed, or how much the rate of duty may cost the American people. For instance, the Senator from Idaho has voted for and has advocated a duty upon barites, which is a crude ore, which, in order to compete with foreign barites, a duty of more than 100 per cent is required upon material upon which the hand of man has not rendered one dollar's worth of labor except the mining; and yet the Senator from Idaho is perfectly willing to tax the American people 100 per cent more than they would otherwise be called upon to pay. That is not my idea of protecting the American people.

Mr. GOODING. I understand——

Mr. LENROOT. The Senator from Idaho is perfectly willing, in order that some product which the farmer must buy may be manufactured in this country, that the farmer shall pay 200 per cent more for it than he would have to pay if it were manufactured abroad.

Mr. GOODING. Mr. President——

The PRESIDING OFFICER. Does the Senator from Wisconsin further yield?

Mr. LENROOT. I do.

Mr. GOODING. If the Senator from Wisconsin will show me that 100 per cent is a protective rate I shall vote for it; but I shall not vote for his amendment merely because he thinks a rate is too high because it is 100 per cent, when he does not give any information to the Senate as to the rate of duty which the industry needs. The difference between the Senator from Wisconsin and myself is that he would draw a deadline beyond which he would not permit the farmers and the miners of the West to go East with their products. That is the difference between the Senator from Wisconsin and me.

Mr. LENROOT. I wish to ask the Senator from Idaho this question: If upon this amendment it were shown that a rate of duty of 1,000 per cent were necessary in order to manufacture these shears in the United States, would the Senator vote for it?

Mr. GOODING. I have made my position very clear, and I do not care——

Mr. LENROOT. Will the Senator answer that simple question?

Mr. GOODING. Yes; and the Senator will know I have answered it, too, when I get through. [Laughter.] I have stated time and time again that if an industry in this country which is established and which is employing American labor needs 1,000 per cent protection at the present time, when the world is in a chaotic condition and will not return to normal for several years, then I will vote for the 1,000 per cent duty. It would be a crime to destroy such an American industry and thereby give employment to Germans, or anyone else, though I have no prejudice on earth against German citizens.

Mr. LENROOT. The Senator's statement answers the question.

Mr. GOODING. Does that answer the question?

Mr. LENROOT. That answers the question very fully.

Mr. GOODING. I should not care to fill up soup houses in this country.

Mr. LENROOT. What the Senator from Idaho has stated answers the question very completely and very satisfactorily. The Senator from Idaho is willing to compel the farmers of America to pay 1,000 per cent more for an article, if necessary, in order to have it manufactured in this country than to have it imported from abroad. I am not, Mr. President. That is the fundamental difference between the Senator from Idaho and myself. There is a limit beyond which I am not willing to tax the American people in order to have an article produced in the United States; and there is a limit, Mr. President, beyond which we can not, as protectionists and as Republicans, say that we are justified in taxing the American people in order to maintain an industry in the United States if it requires a protective duty of 200 or 300 or 1,000 per cent. I had supposed that that was accepted Republican doctrine; that there was some limit somewhere beyond which, as protectionists, we could not go; that there was some limit where we would, as a matter of industrial prosperity for the United States, much as we wish to manufacture everything that we can in this country——

Mr. GOODING. Will the Senator yield to me?

Mr. LENROOT. I will not say to the American manufacturer, if he can not get along without taxing the American people twice as much for an article as it may be imported for, "While we are sorry for you, the price is too great to continue your industry." That is very simple, Mr. President.

I am willing to go to the extent of imposing a duty of 100 per cent. In the case of cotton gloves I proposed an amendment, which was adopted by the Senate, fixing the limit at 75 per cent. It is in the bill to-day. The majority of the Senate took the position, and I believe correctly took the position, that if we could not produce the cheap cotton gloves which are used in every home in America, under a 75 per cent rate of duty, we had better import some of them, because, again, Mr. President, the Senator from Idaho does not seem to realize the fact—whether he does or not—that the farmer can not find a market for his wheat, the farmer can not find a market for his corn, the cotton grower can find no market for his cotton, if we are going to put up a tariff wall so high here that nothing shall come in.

The Senator from Idaho is perfectly justified, in view of his position that he is willing to favor a 1,000 per cent rate of duty, as he says he is, in voting against this amendment of mine. This is not quite so bad a case, for the highest ad valorem in this paragraph as proposed by the committee is only 345 per cent; it is not 1,000 per cent, but it is only 345 per cent ad valorem upon certain articles as the paragraph now stands.

I will read the figures, as I happen to have the equivalent ad valorem rates. The compound duties reduced to ad valorem will run 155 per cent, 141 per cent, 445 per cent—I ask the

pardon of the Senate; I said 345 per cent, but we are coming up pretty close to where the Senator from Idaho said he is willing to go—445 per cent ad valorem upon an article, in order to continue production, some say, but probably in order to build a tariff wall as high as the Senator from Idaho wants to build it, so that nothing can come in, and the foreign producer will have nothing with which to pay for our wheat, our corn, our cotton, and other commodities which we have to export.

Mr. McLEAN. Mr. President——

The PRESIDING OFFICER. Does the Senator from Wisconsin yield to the Senator from Connecticut?

Mr. LENROOT. I yield.

Mr. McLEAN. I understand the Senator from Wisconsin has no objection to the section which puts higher rates upon razors.

Mr. LENROOT. I will say very frankly that the safety razor is such an article that people can get along without the German razors; they do not have to buy the old-fashioned razor.

Mr. McLEAN. It is the same way with the 5-cent and 8-cent knives.

Mr. LENROOT. But I want to say that I have not proposed an amendment, for I realize its futility in that instance, to fix a maximum rate. I would so vote, but I have not thought it devolved upon me to do so.

But, Mr. President, I was giving the equivalent ad valorem rate of the duties that are now in this paragraph. The last rate I gave was 445 per cent. The other rates are 345 per cent, 285 per cent, 205 per cent, 165 per cent, 141 per cent, 125 per cent, 105 per cent. Those are the rates which have already been adopted by the Senate in Committee of the Whole upon various articles enumerated in this paragraph.

Mr. STANFIELD. Mr. President, will the Senator yield?

Mr. LENROOT. Yes.

Mr. STANFIELD. Are those duties in excess of the difference in the cost of manufacture here and in foreign countries with which we come in competition?

Mr. LENROOT. I do not know whether they are or not, but I want to say very frankly to the Senator that I am not willing to vote for any duty that requires 400 per cent to equalize the difference in the cost of production. I am not for it.

Mr. STANFIELD. Not even if the employment of American labor is dependent upon such a rate of duty?

Mr. LENROOT. I am not if it requires a duty of 400 per cent. Is the Senator willing to vote for a straight ad valorem duty of 400 per cent?

Mr. STANFIELD. Yes; or 4,000 per cent, if it takes such a rate to equalize the difference in the cost of manufacture in this country and the foreign country which produces the article competing with the American product.

Mr. GOODING. Mr. President, will the Senator yield?

Mr. LENROOT. No; I do not yield just now. There is a fundamental difference between the Senator from Idaho, the Senator from Oregon, and myself upon this proposition.

Mr. STANFIELD. If the continuation of the American industry and the employment of American labor are dependent upon a tariff rate it would not make any difference to me what the ad valorem is if such a rate is required to equalize the difference in the cost.

Mr. LENROOT. The question, then, resolves itself into this—that the Senator from Idaho and the Senator from Oregon, if it costs the American people four times as much to buy an American article as it does to buy a foreign article, are willing to tax the American people that 400 per cent. That is a perfectly consistent position——

Mr. GOODING. Mr. President, will the Senator yield?

Mr. LENROOT. No; I do not now yield. It is a very consistent position for both Senators to take, if they want to do so before the American people, that they are willing to vote in a tariff bill rates which, if put into full effect, would increase the price of an article to the American people 400 per cent, but I want to say deliberately to both Senators that that kind of tariff making does not spell prosperity for the United States of America.

Mr. STANFIELD. Mr. President, does the Senator from Wisconsin want to see American labor put out of employment and American industries closed because he objects to imposing a rate which he thinks would startle the American people and prejudice them against the principles of the Republican Party?

Mr. LENROOT. Does not the Senator think that a rate can be fixed so high that it is better for America to have the labor doing something else?

Mr. STANFIELD. Not if that rate is necessary to equalize the difference in the cost of production of the foreign article which comes in competition in the American market with the American product.

Mr. LENROOT. Then I do not know where the Senator would stop. The Senator from Idaho [Mr. GOODING] says he would stop at tea, but, if it requires 1,000 per cent to equalize the difference in the cost of production, I take it the Senator from Oregon agrees with the Senator from Idaho, and that they are both willing to tax the American people 1,000 per cent for the privilege of having an article manufactured in the United States. I am not; that is all.

Mr. STANFIELD. May I answer the Senator's question as to where I would stop?

Mr. LENROOT. Yes.

Mr. STANFIELD. I would stop when the rate is so high that it is not necessary to equalize the difference in the cost of production in this country and abroad, including labor and the other elements of cost.

Mr. LENROOT. So if it requires 5,000 per cent the Senator would vote for it.

Mr. STANFIELD. It would make no difference, because it would pay the American people to be kept employed. If American labor is out of employment the price makes no difference, because they have no purchasing power.

Mr. LENROOT. I understand the Senator's position, Mr. President. He is willing to vote for 1,000 per cent in order to make certain the production of an article in the United States.

The PRESIDING OFFICER. The time of the Senator from Wisconsin has expired.

Mr. McCUMBER. Mr. President, the Senator from Wisconsin continually insists that whatever duty is placed upon these articles adds just so much to the cost to the American public. If any of the records of our commercial relations with other countries justified any such assertion, there might be some basis for his argument; but you may run over the importations and the selling prices of the imported American article for any number of years you see fit, and you will find that as a rule the foreign price is right up very close to the American price; and if the cost of production of the foreign article is not more than one-fifth of what it is in the United States, then the foreigner will make four-fifths, or 400 per cent. It pays him to do that better than to cut the price, even though in many instances he can do it, and in many instances he will do it if the conditions of trade demand it. He is not doing it to-day in the sale of scissors because he is making enormous profits.

I want to point out to the Senator just a few of these articles that come under metal manufactures.

I find here that taking scissors the foreign value is $1.41 a dozen. The same article is sold for $3.50 a dozen. That gives $1.60 profit after paying all costs of importation, and every penny of insurance and freight and duty. That gives the importer over 120 per cent profit.

Let us take the next item, scissors, steel forging. The foreign cost is $5.42 a dozen. The landing cost is 54 cents. The article is sold in this country by the importer for $15 a dozen. He makes clear, after paying all expenses, $7.42 on an article that cost him $5.42, and the Senator from Wisconsin wants to give him all that profit without charging him anything for coming into the American market.

Let us take another. Here is $2.91 for scissors of crucible steel, steel forging. That article cost $2.91. It was sold in this country for $16.66. The importer made clear $12.72 on an article which cost him $2.91. We say in this bill: "If you can manufacture scissors at that price and bring them over to the United States and sell them at a price that will give you 1,000 per cent profit, you can pay 183 per cent out of that 1,000 per cent if it becomes necessary."

So I could take most of these articles, long lists of them, and show from the importations the enormous profit that is made by the importer. The importers are not going to cut down the prices as long as they can get that profit. They are going to sell the articles very closely up to the American selling price of the comparable articles. Of course, the American is at their mercy whenever they want to take the market away from him entirely, but I do not think they have any intention of doing that. I want, however, to protect the American sufficiently so that he can take care of himself if they attempt to do so.

Mr. President, one would think from the argument of the Senator from Wisconsin that most of this bill was made up of rates that would result in extortionate duties and prices to the American people. I have asked the expert of the committee to go over all these schedules and to give us the number of items in each one of the schedules where the rate would be above 90 per cent. In the scissors schedule I will admit that

nearly all of them go above that, and in the cutlery schedule very many of them go above that.

Mr. LENROOT. Mr. President——

Mr. McCUMBER. I yield to the Senator.

Mr. LENROOT. I am sure the Senator does not wish to misquote me.

Mr. McCUMBER. I certainly do not.

Mr. LENROOT. I have never said that I thought most of the rates in this bill were extortionate.

Mr. McCUMBER. No; I did not say the Senator so stated. I stated that taking the trend of his argument, taking all of his statements together, they would rather indicate that he thought this bill imposed rates that were excessively high. On the contrary, as I have said again and again, the ad valorem rates in this bill are less than those in any Republican tariff bill that has ever been passed in the United States.

Now I want to take up the statement I have as to the number of items in each schedule above 90 per cent.

In Schedule 1, chemicals, there are nine items that run above 90 per cent ad valorem.

In the earthenware schedule there is just one item that runs above that.

In the metal schedule, in cutlery, there are quite a few items that go above that. I have not the number; maybe half of them.

Mr. JONES of Washington. Mr. President, it would be interesting in that connection, if the Senator has the information, if he would state how many items there are in each schedule.

Mr. McCUMBER. In the cutlery schedule I do not know, but I am giving the number of items. I stated that in earthenware, china, and so forth, there is just one item.

Mr. JONES of Washington. I mean it would be interesting if the Senator would contrast that one with the total number of items in the schedule, if the Senator has the total number of items.

Mr. McCUMBER. I can not do that now without going over it.

In the wood schedule there is not a single item that goes above 90 per cent.

In the sugar schedule there is one item, and that is blackstrap molasses.

In the tobacco schedule there are six items—cigars, snuff, and four other items.

In the agricultural schedule there is one item.

In the spirits schedule there are a number of wines and liquors. I do not know just how many there are, but they are wines and liquors only.

In the cotton schedule there are none.

In the fiber schedule there are none.

In the woolen schedule there are five items—three on raw wool, one on flannel, and one on roving.

In the silk schedule there are none.

In the paper and book schedule there is one item, which is playing cards.

In 14 sundries there is just one item, and whenever I get an opportunity I think I will move to reduce that, because it is slate pencils.

Mr. President, let me call attention now to some of the items under the paragraph to which the Senator's amendment relates. He says that on none of those items shall we have more than 100 per cent duty. He had complained heretofore that in some of these items we have taken only the luxuries. I have taken everything under scissors. Now, I will take these from Germany:

Cast-iron scissors, 7 inches in length: Cost, 91 cents a dozen; landing cost, 9 cents; profit, 31 cents—a profit of 33⅓ per cent. The total is $1.31. The American price, with a reasonable profit, is $3.16 a dozen. The duty required in that instance would be 203 per cent. The Senator would give 100 per cent. He might as well give none, unless he gives enough to protect.

Now we will take the cast-iron 5-inch scissors again: Cost, 62 cents a dozen; landing cost, 6 cents; profit, 21 cents; total, 89 cents. American selling price of comparable article, $2.75 a dozen, or about 25 cents per pair. The duty required would be 300 per cent. We can not manufacture them and sell them if we are to have a duty of 100 per cent, or only one-third of what is necessary for protection.

I will take the next: Bessemer steel 4-inch scissors: Cost, $1.43; landing cost, 7 cents; profits, 48 cents; total, $1.98. The American selling price of a comparable article is $6.20, and it would require 300 per cent to equalize those.

The next, crucible steel forging scissors, would cost in Germany $1.55 a dozen; landing cost, 8 cents; profits, 52 cents; total, $2.15. They sold in this country practically up to the American selling price, which is $6.90 a dozen, and it would require 307 per cent to equalize.

Now, let us take a high quality of steel scissors. The cost in Germany is $2.97; landing cost, 28 cents; profits, 99 cents; total, $4.24. The American selling price is $7.95, and on that we would require a duty of only 88 per cent. So we might continue to manufacture that particular one article of scissors, but on all the others we must either give the rate that is necessary to say that we will not allow the rate to be above a certain sum, in this instance 100 per cent, notwithstanding the fact that the importer is making from 120 to 1,000 per cent upon the products which he imports.

Mr. GOODING obtained the floor.

Mr. McLEAN. Mr. President——

The PRESIDING OFFICER (Mr. EDGE in the chair). Does the Senator from Idaho yield to the Senator from Connecticut?

Mr. GOODING. I yield.

Mr. McLEAN. I should like to ask the Senator from Wisconsin upon what article he figures the 400 per cent duty?

Mr. LENROOT. This is figured from a table prepared for me with a foreign valuation of 60 cents a dozen, with a specific rate of 20 cents each and with an ad valorem rate of 45 per cent.

Mr. McLEAN. There is no such bracket in the bill.

Mr. LENROOT. I have not compared the table with the bill.

Mr. McLEAN. That is the trouble with attacking a schedule of this bill upon information furnished by importers.

Mr. LENROOT. This was a manufacturer, as well as an importer.

Mr. McLEAN. He has made a grave mistake. There is no such item in the bill. We begin at $1.25, but not more than $3 per dozen, a 20-cent specific. The Senator would say that would be about 100 per cent.

Mr. LENROOT. What does the Senator say is the highest ad valorem in this bill?

Mr. McLEAN. The first item is on knives valued at not more than 40 cents a dozen, which means that anything which costs a cent a dozen would bear a specific duty of 2 cents each, and, of course, that will run just as high as you want to put the value under 40 cents a dozen. But when you treat the subject intelligently and realize that the rate on these cheap knives is only 2 cents each and 60 per cent ad valorem, there is nothing that should give anyone any concern. I repeat that the sale of these cheap knives, as well as the cheap razors and the cheap scissors, is an imposition on the public. They are a fraud, and there ought to be an embargo against their importation into the country. They simply displace American articles which might be of some use to the purchaser.

Mr. LENROOT. The Senator says this is not in the bill. I refer him to line 23, where it says, "valued at more than 50 cents per dozen, 20 cents each and 45 per cent ad valorem," which makes exactly what I said.

Mr. McLEAN. That is on a corn knife.

Mr. LENROOT. The Senator said it was not in the bill. It is in the bill.

Mr. McLEAN. It is there, provided you take the lower rates; but the Senator knows——

Mr. LENROOT. But the Senator just accused me of using figures which were not in the bill. The figures are in the bill, exactly as I stated them.

Mr. McLEAN. I supposed the Senator was referring to penknives. Those are corn knives.

Mr. LENROOT. I am talking about scissors.

Mr. GOODING. Mr. President, it must be remembered that in the discussion between the Senator from Wisconsin and myself we have not been considering infant industries which need protection for their development. My statement has been that I was willing to give any American industry that is a going concern, employing American labor, any rate of duty necessary to keep the wheels of that industry moving.

The Senator from Wisconsin has lately made the most remarkable statement ever made by any man who claims to be a Republican and a protectionist. He says he would not give any industry 400 per cent, if it was necessary to save the life of an American industry, which may have been established for more than a hundred years. I want to say again to the Senate and to the Senator from Wisconsin that the greatest question which confronts the American people is that of finding employment for our own people. Is the Senator willing to permit Germany, employing labor over there at practically nothing at all, one-tenth or one-twentieth of what we must pay in America, and with a freight rate lower than that for which we can ship here in America over an American railroad for a distance of 200 miles, to lay their goods down in our great markets, such

as New York and other great cities which can be reached by water transportation? If so, he is not going to permit American institutions to continue. If he takes into consideration the deplorable conditions which exist in the world at this time and is not willing to give any amount of protection that is necessary in order that we may keep our factories going, he lacks a lot of being a protectionist or believing in the great principle of protection, which has made this country the mightiest nation in all the world. How can the Senator bring in at this time, or make demand, if you please, for a provision to limit the duty to 100 per cent and not be prepared to back it up with any information showing that is all the protection the industry needs? I am unable to understand how the Senator would be willing to destroy an industry.

Mr. STANFIELD. Mr. President, would the Senator from Idaho be in favor of a duty which provided protection for a manufacturing concern to the point of becoming a monopoly, where they were taking unto themselves large and unconscionable profits; or is his idea only that they should be protected to the extent of the difference in the cost of production?

Mr. GOODING. Only to the extent of the difference in the cost of production, plus a reasonable profit. I never advocated anything else. It would be a crime for any Senator to advocate a rate higher than that necessary to equal the difference in the cost of production in this and foreign countries and a reasonable profit, and I want to say to the Senator that whenever you destroy American industries—as history for a hundred years has shown—when they have been broken down by a free-trade policy in this country, the American people have always paid higher prices for the article that institution produced, and I do not care what the article is. Over and over again history has repeated itself; when industry has been destroyed, the American people have paid for it dearly.

I am standing here advocating protection to the American manufacturer, the same as I have advocated protection to the American farmer, and if we will start in with proper protection to the American farmer, and develop those lines of industry in America which are not developed up to our own needs, we will not be forced to go to Europe with any wheat for a market. Within 10 years we will have a balanced condition on the farms, will be feeding our own people, and will be ready, if war comes, to furnish the needs of the American people in all the necessities of life.

Unless we follow a policy of that kind, this country will go backward. Unless you let us in the West develop our industries, so that we can make a market for the manufacturers, manufacturing industries can not develop in America, and the end is coming to our great development, and it is in sight, if you are going to permit American capital to go abroad and develop industries, which they are doing to-day.

I have said a lot of unkind things about the American who does that, and it is un-American, it seems to me, if you only stop and look at the needs of America to-day, and the importance of finding employment for our own people. But the man who does that is not to be damned half as much as the American Congress which permits the policy to be followed and continued in this country. We are all to blame if that is followed and continued, and not the selfish interests which are always destroying civilization if they are not curbed.

Mr. McLEAN. Mr. President, I want to apologize to the Senator from Wisconsin. I supposed he was discussing the rates under the penknife paragraph, when he stated that they exceeded 400 per cent. They do not. The rates in that paragraph are much less than the rates in the scissors paragraph, and I want to call attention to the fact that in the penknife paragraph the Payne-Aldrich rates were as high as 120 to 150 per cent.

With regard to the scissors, the Senator from Wisconsin can figure that out under this language, "Valued at more than 50 cents a dozen, 20 cents each and 60 per cent ad valorem."

Mr. LENROOT. That has been changed to 45 cents.

Mr. McLEAN. Valued at more than 45 cents a dozen. Of course, under this designation, good razors will come in. A razor lasts a man a lifetime.

Mr. LENROOT. This is not razors.

Mr. McLEAN. I beg the Senator's pardon. I mean scissors. Under this article a good quality of goods will come in. That was assumed by the committee, and I think it is a warranted assumption. The purchaser of an imported razor in this country will have to pay a duty of 20 cents each and 50 per cent ad valorem. The chairman of the committee has called attention to the enormous profits made by the importers of this article, and all I want to say, in answer to the Senator from Wisconsin, is that if I thought that his proposition would benefit the consumer, I would vote for it, but I have made a careful study of this trade and its conditions, and it has been brought to my attention by testimony that can not be disputed that large American importers of these goods are also large manufacturers abroad. When the Senator from Wisconsin says that a rate of 100 per cent is enough on any article, I disagree with him. I think it depends entirely on the nature of the competition and the control of that article. I think we agree that is true with regard to the dye industry. We know what Germany has done and will do if we do not protect ourselves against German competition in dyes, and that is because it is controlled by a German monopoly. The instant they drive the American producer out of the market, they will charge extortionate prices, and practically the same situation exists with regard to the cutlery industry. If you impose a rate of 100 per cent, you shut out competition from any other European country, you give the entire market over to the Germans, and it can not be disputed that those men who are here asking for a limitation of 100 per cent will be benefited by it. These importers are not afraid of this 100 per cent duty. If it is not protective, it is merely a sales tax, and they will still make large profits.

Mr. LENROOT. I want to say that no importer has suggested to me a rate of 100 per cent. That is not what the importers asked for.

Mr. McLEAN. I think they will be greatly pleased, because under the prices quoted, I am afraid these rates will not interfere very seriously with their importations. Of course, if they control the market, and drive the American producer out of the market, they will do precisely what they have done, charge anywhere from 200 to 1,000 and 2,000 per cent profit.

My request for reasonable protection for this industry is simply based upon the fact that I believe it will be for the benefit of the American users of scissors and razors in the long run to conserve domestic competition in those articles. I voted against the 75 per cent maximum on gloves. I believed that industry should have reasonable protection. If the 75 per cent is not sufficient, all you have done is to impose a sales tax upon the consumers of this country.

You turn the industry over to the French or the German competitor, and if there is no competition here, he will charge all the trade will bear, and it seems to me that every Member of the Senate ought to realize that.

It depends entirely upon the character of the industry and the nature of its control whether 100 per cent or more than 100 per cent is justified or not, and you have a confessed monopoly in this article which is not only selling the goods here, but manufacturing them in Germany, which, as I have said, has destroyed the domestic industry which is trying to keep its organizations together with the hope that the Congress will give it a chance to live, and if we do not do it the thousands of men engaged in this industry must walk the streets, we will turn the industry over to Germany, and the consumer will be at the mercy of the German monopolists, and you can imagine what will happen under those circumstances.

Mr. JONES of New Mexico. Mr. President, the paragraph which we are now considering includes a great variety of articles such as steel-laid scissors and shears and blades for the same, finished or unfinished, 10 cents each, and 55 per cent ad valorem; nail, barbers', and animal clippers, pruning and sheep shears, and all other scissors and shears, and blades for the same, finished or unfinished, valued at not more than 50 cents per dozen, 4 cents each, and 60 per cent ad valorem; valued at more than 50 cents per dozen, 20 cents each, and 50 per cent ad valorem.

It will be realized at once what a great variety of articles are comprehended in the paragraph. If any Senator believes as the Senator from Connecticut [Mr. McLEAN] and as the Senator from Idaho [Mr. GOODING] of course he can not vote for any limitation upon the duty. The Senator from Connecticut rather indicated his unwillingness to be put into the same class with the Senator from Idaho, but I submit that the argument which he has just made puts him in that very class. He tells us that it does not make any difference how much the duty should be except that it shall be sufficient for the protection of some American enterprise.

Mr. McLEAN. Mr. President——

Mr. JONES of New Mexico. I yield to the Senator from Connecticut.

Mr. McLEAN. Certainly I stated my position clearly and I think the Senator understood me. I said I would vote for a higher rate if it was to prevent extortion by the foreign monopoly.

Mr. JONES of New Mexico. Yes, with that limitation; but I do not see that that is what is being done. I do not know of any foreign monopoly in the scissors, shears, and other articles comprehended in the paragraph. There is no evidence of it.

On the other hand, the evidence is that the articles are manufactured in this country and that the duties proposed to be put upon them are more than 100 per cent of the American price.

I have here some samples. Perhaps the ladies are all acquainted with the little kindergarten shears with blunt ends used by little children to cut articles of paper or something of that sort. These little shears, manufactured in the United States, prior to the war were sold for 2.25 cents each, or $3.25 a gross, and were exported to the rest of the world. Since the war the American price is 5.4 cents each, or $7.80 a gross. The duty proposed to be put upon these is 4 cents each and 45 per cent ad valorem, which, on the basis of the present selling price, amounts to 134 per cent, and if we take it upon the basis of the pre-war price it amounts to 204 per cent. These shears are being manufactured in this country and shipped all over the world, and that is being done now. So how can anyone ask a specific duty of 4 cents each and 45 per cent ad valorem?

Here [exhibiting] is another pair of scissors. These scissors sell at 7.5 cents each wholesale. The duty is 20 cents each and 50 per cent ad valorem. These scissors are made in the United States by machinery. There is no concern on earth that can make them any cheaper than they are made in the United States, and yet it is proposed to put a duty upon them of 316 per cent. If that is not for the purpose of making the American consumer pay more for them, what is the purpose? If it is not the purpose to raise the price, why is it proposed to levy these extortionate duties? If it does not have that effect, then the duty is not wanted. If it does have that effect the duty is not wanted unless it is believed, as is believed by the Senator from Idaho, that wherever we can make anything in this country at any price we ought to raise the duty so high that the foreign article can not enter the American market.

I submit that this is the time when we should weed out these hothouse plants. We must find a market abroad for some of the surplus products of the country. We can produce in the United States in competition with the world thousands and thousands of articles. We produce a surplus which must find a market abroad. If there are any hothouse plants, if there are ever produced in this country those things not essential to our existence and not essential to our comfort, for God's sake let us buy something from abroad and get that something in exchange for the things that we must send abroad. Our surplus agricultural products, our surplus manufactured products, must go abroad if we are to continue our prosperity or if we are to continue to increase the business interests of the country. How are the manufacturers in need where our capacity has so grown that they must find a market abroad for their surplus?

It seems to me that the manufacturers of the country who are engaged in producing things which must be exported should rise and condemn the bill, and I want to say that they are doing it. The farmers of the country realize that the factories of the United States, which must furnish employment to wage earners and consumers of agricultural products, are going to be shut down. Their business is going to be curtailed at least. They must stop producing a surplus of field products and other products which must find a market abroad.

Mr. FLETCHER. Mr. President——

Mr. JONES of New Mexico. I yield to the Senator from Florida.

Mr. FLETCHER. The manufacturers of the articles about which the Senator has been speaking are old established industries, are they not? They are not infant industries, not newly developed and needing help in order to get on their feet?

Mr. JONES of New Mexico. They have been producing these articles for years and years.

Here [exhibiting] is another pair of shears that sells for 12 cents a pair. We are putting a duty on these of 20 cents each and 45 per cent ad valorem. Mr. President, that can not be justified.

There have been included in this paragraph sheep shears, which have heretofore been upon the free list as agricultural implements. They are included in the paragraph. When I was condemning the recommendation of the Finance Committee the Senator from Connecticut [Mr. McLEAN] retorted with the statement that they were putting a tariff upon wool, and that the woolgrower ought to give something to the American manufacturer of shears. That is what they are doing. They are selling to the farmers of the country these gold bricks. They are simply building up a tariff upon agricultural products, and in the same bill turning around and taking from him any advantage which the farmer might otherwise have by raising the rates to an enormous extent upon everything which the farmer must buy, and they do it, as the Senator from Connecticut said, because he thought inasmuch as the farmers were getting something they ought to give some of it to the manufacturers.

Mr. McLEAN. Mr. President——

The PRESIDING OFFICER. Does the Senator from New Mexico yield to the Senator from Connecticut?

Mr. JONES of New Mexico. I yield.

Mr. McLEAN. The Senator from New Mexico voted for a 120 per cent ad valorem duty on coarse wool, which goes into the clothing that the poor man wears. I should like to have him comment upon that. Clothing is something everybody must have. Razors last a long time and so do scissors; so do penknives. Clothes wear out rapidly. I wonder how the Senator can justify the rate on coarse wool, about as high as the rate on the articles under consideration, in which the labor cost runs from 80 to 90 per cent.

Mr. JONES of New Mexico. Mr. President, I do not care to be diverted from the topic which we have under discussion.

Mr. McLEAN. No; I am not surprised that the Senator does not care to answer.

Mr. JONES of New Mexico. But just a word in response to what the Senator said. The Senator knows that we produce in this country but little of the wool on which that rate would be imposed. The Senator knows also that the specific duty which is levied upon anything operates in the way that he has said. Upon scissors, the specific duty of 20 cents on scissors that sell for 60 cents a dozen is 400 per cent. That is the mere fault of levying a specific duty.

Mr. McLEAN. But the duty on wool is a specific duty.

Mr. JONES of New Mexico. I understand that it is, and notwithstanding that I say that any specific duty, where there is variation in price, is unequal. It is bound to operate in that way.

Mr. McLEAN. And the Senator voted for a tariff on an article that is used by every human being in the country.

Mr. JONES of New Mexico. It does not make any difference what the article is, that is the effect of a specific duty. The Finance Committee in the pending bill have undertaken, wherever they could, to impose specific duties for the purpose, in my judgment, of increasing the percentage of duty without showing it in exact figures.

The PRESIDING OFFICER. The time of the Senator from New Mexico has expired.

Mr. McLEAN. The Senator from Wisconsin offered an amendment limiting the rate on wool to 60 per cent ad valorem, thus avoiding the trouble about which the Senator is complaining involving a specific duty, and the Senator from New Mexico voted against that amendment.

The PRESIDING OFFICER. The question is upon the amendment offered by the Senator from Wisconsin [Mr. LENROOT], which is an amendment to a committee amendment heretofore agreed to. Without objection, the vote by which the committee amendment was agreed to is reconsidered, and the question is upon the amendment offered by the Senator from Wisconsin to the amendment of the committee.

Mr. LENROOT. On that I demand the yeas and nays.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

The PRESIDING OFFICER (when the name of Mr. EDGE was called). The present occupant of the chair desires to make the same announcement which he heretofore made in reference to his pair and its transfer, and he votes "nay."

Mr. HARRISON (when his name was called). Transferring my pair with the Senator from West Virginia [Mr. ELKINS] to the senior Senator from Texas [Mr. CULBERSON], I vote "yea."

Mr. McCUMBER (when his name was called). Transferring my pair as on the original vote, I vote "nay."

Mr. POMERENE (when his name was called). Again announcing my pair with my colleague, the junior Senator from Ohio [Mr. WILLIS], I transfer that pair to the senior Senator from Nebraska [Mr. HITCHCOCK] and vote "yea."

Mr. WATSON of Indiana (when his name was called). Making the same announcement as before with reference to my pair and its transfer, I vote "nay."

The roll call was concluded.

Mr. DILLINGHAM. I transfer my pair with the junior Senator from Virginia [Mr. GLASS] to the junior Senator from Arizona [Mr. CAMERON] and vote "nay."

Mr. HALE. Making the same announcement as before in relation to my pair and its transfer, I vote "nay."

Mr. WALSH of Montana. I transfer my pair with the Senator from New Jersey [Mr. FRELINGHUYSEN] to the Senator from Rhode Island [Mr. GERRY] and vote "yea."

Mr. CURTIS. I desire to announce the following pairs:

The Senator from California [Mr. JOHNSON] with the Senator from Georgia [Mr. WATSON];

The Senator from Illinois [Mr. MCKINLEY] with the Senator from Arkansas [Mr. CARAWAY];

The Senator from Missouri [Mr. SPENCER] with the Senator from Georgia [Mr. HARRIS]; and

The Senator from Michigan [Mr. TOWNSEND] with the senior Senator from Wisconsin [Mr. LA FOLLETTE].

The reading clerk recapitulated the vote.

Mr. UNDERWOOD (after having voted in the affirmative). I notice from the recapitulation of the vote that the senior Senator from Massachusetts [Mr. LODGE] has not voted. I have a general pair with him, which I transfer to the senior Senator from Arizona [Mr. ASHURST] and let my vote stand.

The result was announced—yeas 29, nays 33, as follows:

YEAS—29.

Borah	Kellogg	Reed, Mo.	Trammell
Capper	Kendrick	Robinson	Underwood
Cummins	Lenroot	Sheppard	Wadsworth
Dial	McCormick	Simmons	Walsh, Mass.
Fletcher	McKellar	Smith	Walsh, Mont.
Harrison	Overman	Stanley	
Heflin	Pomerene	Sterling	
Jones, N. Mex.	Ransdell	Swanson	

NAYS—33.

Ball	Edge	McNary	Reed, Pa.
Brandegee	Ernst	Moses	Shortridge
Broussard	France	New	Stanfield
Bursum	Gooding	Newberry	Sutherland
Calder	Hale	Nicholson	Warren
Colt	Jones, Wash.	Oddie	Watson, Ind.
Curtis	Keyes	Pepper	
Dillingham	McCumber	Phipps	
du Pont	McLean	Rawson	

NOT VOTING—34.

Ashurst	Harreld	Myers	Smoot
Cameron	Harris	Nelson	Spencer
Caraway	Hitchcock	Norbeck	Townsend
Culberson	Johnson	Norris	Watson, Ga.
Elkins	King	Owen	Weller
Fernald	Ladd	Page	Williams
Frelinghuysen	La Follette	Pittman	Willis
Gerry	Lodge	Poindexter	
Glass	McKinley	Shields	

So Mr. LENROOT's amendment to the committee amendment was rejected.

The PRESIDENT pro tempore. The question now is upon agreeing to the amendment of the Committee on Finance.

The amendment was agreed to.

Mr. LENROOT. Mr. President, I have one more amendment, which I now send to the desk.

The PRESIDENT pro tempore. The amendment proposed by the Senator from Wisconsin will be stated.

The READING CLERK. On page 73, at the end of paragraph 354, it is proposed to insert the following:

Provided further, That none of the articles specified in this paragraph shall pay a greater rate of duty than 100 per cent ad valorem.

Mr. LENROOT. Mr. President, I am not going to take the time of the Senate in debating this proposition, for it is certain to meet the same fate as that met by the two previous amendments. I merely wish to state that under the rates as they now stand in the paragraph to which the amendment is proposed the equivalent ad valorems run from 108 per cent to 300 per cent, while my amendment, if agreed to, will limit the rate to a maximum ad valorem of 100 per cent. I ask for the yeas and nays on the amendment.

Mr. UNDERWOOD. Mr. President, I wish to say a word before the vote is taken on the amendment. I have listened with much interest to the debate this morning and have watched with deep interest the result of the votes. It is clear to my mind that the developments this morning have clearly demonstrated the real purpose of this bill. Of course, there are a few low rates in the bill; there are a few competitive rates in it, especially on some basic products that the manufacturer wishes to use as a raw material; but the bill is not a revenue bill; it is not a protective-tariff bill in the sense that protection is explained by the platforms of the Republican Party, that is, to equalize the difference in the cost of production at home and abroad. It is a bill that has essentially been written and which will be enacted for the purpose of the protection of profits—not ordinary profits, but exorbitant profits.

The sentiment in favor of protecting profits is nothing new in this country. I think it has followed every war in which the country has ever engaged. The real origin of a protective tariff as a protective tariff came after the War of 1812, during which the manufacturers of iron and steel and some other commodities—but especially the manufacturers of iron and steel—had been enabled to make enormous profits. Of course, the industry at that time was small, but the profits were great. Due to the fact that the War of 1812 was largely a war on the seas and that the privateers of both nations had driven shipping from the seas and there were no importations from abroad, the American manufacturer sat behind the embargo which had been created by war and made enormous profits. When the war was over, his selfishness induced him to desire the right to have a law enacted that would guarantee the continuation of the collecting of those profits from the American people. So one may trace the history of every war during which our foreign commerce was affected, and he will find that immediately afterwards the manufacturers of this country, who had made enormous profits, who had in many cases increased their capitalization not on their actual assets but on the capacity of their companies to pay dividends, capitalizing the dividends and the inordinate profits of war conditions, desired to have those profits guaranteed by enactment of Congress. The votes which have been cast here this morning clearly demonstrate that that is the purpose of the pending bill.

The Senator from Wisconsin [Mr. LENROOT] proposed a very reasonable reduction in the rates of duty on household cutlery. I say it was a reasonable downward cut; it would still have left the rates so high that, as an initial proposition, I would not have voted for it; but as a reduction from the very high rates which have been fixed in the bill I was glad to accept it rather than to force on the people of the United States the rates that have been put in the bill in order to protect war profits. It was pointed out in debate that in many instances the tax exceeded the cost of the article on which the tax was levied. It was pointed out here that in the case of an ordinary kitchen knife that is used in the ordinary kitchen of America the wholesale cost of the knife was only about 6½ cents in the wholesale trade, and that is the basis on which the tax is levied, and yet the committee levied a tax of 10 cents on the knife and an additional tax of 45 per cent ad valorem, making the tax on the knife that was valued at 6 cents, and sold in the wholesale trade at 6 cents, over 13 cents per knife. That was only one instance. There were innumerable instances of the same kind in the particular schedule that is now under consideration, and the same thing applies to almost all of the finished products in this bill.

Mr. STANFIELD. Mr. President, will the Senator yield?

Mr. UNDERWOOD. Certainly.

Mr. STANFIELD. Do these rates more than equalize the difference in price at home and abroad, according to the principle that has been enunciated as the proper basis of a protective tariff?

Mr. UNDERWOOD. Any man who has enough gray matter to find his way around this Capitol must know that when the cost of a knife is only 6 cents, and the protection is 13 cents, it must exceed the difference in cost of production.

Mr. STANFIELD. Did I understand the Senator to say that the knife cost only 6 cents to produce here?

Mr. UNDERWOOD. That was the selling price of the knife. It was not the cost. I made a mistake in that respect. The selling price of the knife in the wholesale and foreign trade, where it went into competition in the world market, was 6 cents.

Mr. STANFIELD. Was that the American manufacturer's price?

Mr. UNDERWOOD. The American price of this knife that went into the foreign markets and competed in the world's markets was 6 cents.

Mr. STANFIELD. May not that have been the surplus production of factories for which they could not find a market at home?

Mr. UNDERWOOD. No; this was the general wholesale price. It was not a dumping proposition. It was the market price as given by the schedules of these companies, not only for the retail market at home but the wholesale price in foreign consumption; and yet the committee sees fit to put on that knife a tax that equals more than 13 cents. When a knife is being sold at that price in the wholesale trade in the markets of the world, of course with the manufacturer's profit added, I can not see how any man who does not want to blind his eyes and say he will not see can contend for one minute that when you put a tax of 13 cents and 45 per cent ad valorem on a similar knife coming into the United States it does not far exceed the difference in cost at home and abroad.

Mr. STANFIELD. Will the Senator help me to get this clear in my mind by answering another question?

Mr. UNDERWOOD. I do not want the Senator to take up too much of my time, because I am limited, and I am only starting.

Mr. STANFIELD. No; but the Senator is always reasonable, and I am asking for information.

Mr. UNDERWOOD. I shall be glad to answer the question if the Senator will make it brief.

Mr. STANFIELD. It is this: Is it the Senator's statement that 6 cents is the wholesale price with a profit to the American manufacturer, and then that the committee places a duty of 13 cents on the knife on which he was making a profit even in selling it at 6 cents? Is that the statement?

Mr. UNDERWOOD. He sold the knife in the foreign market in competition with the world's trade at 6 cents and made a profit.

Mr. STANFIELD. Was that yielding him a profit?

Mr. UNDERWOOD. Yes; that was yielding him his profit. I assume that he was not giving away his product, and that he was making his profit out of that.

Mr. LENROOT. He sold it in the domestic market at that price?

Mr. UNDERWOOD. Yes; he sold it in the domestic market, too. That was his wholesale price.

Mr. STANFIELD. That is not conclusive evidence that it was yielding him a profit. Oftentimes I have seen things sell for only a small percentage of their cost.

Mr. UNDERWOOD. But the testimony here was that this was the general trade price. A manufacturer may dump his product sometimes, but in this case there was no contest about the fact that the general trade price was 6 cents; and the Senator knows that when people manufacture goods and sell them in the general run of their business they are not selling them at a loss.

Mr. STANFIELD. I beg to differ with the Senator there. I have seen many industries in the past year, under this free trade that we have experienced, selling their product at a fraction of what it cost them to produce. I know that from personal experience, for I have done it myself. I have sold my produce for 15 and 20 per cent of what it cost me.

Mr. UNDERWOOD. Of course, if the Senator wants to theorize about some broken person, some broken company that is going out of business, he can do so; but that was not the condition that confronted this article, and nobody here challenged the proposition that the price given was the ordinary, general, wholesale price of the article, both in the domestic market and in foreign trade; and yet, on an article that was selling for 6 cents, this bill places a tax of over 13 cents.

Mr. STANFIELD. Mr. President——

The PRESIDENT pro tempore. Does the Senator yield further?

Mr. UNDERWOOD. I want to finish what I have to say, Mr. President.

That is not the only proposition. It is unreasonable to assume as to any manufactured product that the difference in the cost of that product here and abroad is more than 100 per cent. You might pick out some curiosity and prove that point, but every man who knows a thing about business conditions knows that in the ordinary run of trade 100 per cent is more complete protection than the difference in the cost of production at home and abroad. That is the Republican theory of protection, as they announce it in their platforms and on the stump through their speakers. The Senator from Wisconsin has just offered an amendment to limit these rates to 100 per cent, which is an exorbitant rate in itself, and yet those in favor of this bill have defeated that amendment.

Mr. President, with these votes in view and this demonstration here to-day, can any man in the country be fooled about what the purpose of this bill is—that it is not a bill that originated in a desire to protect the difference in cost at home and abroad, but that it is a bill to protect profits, to continue the war profits of certain manufacturers in the United States into the time of peace, and make the consuming masses of the American people pay the price?

One of the leaders on the other side of the Chamber this morning, an official representative of a large number of the majority party in this Chamber because he has been selected as the chairman to represent a certain bloc of votes in this Chamber, and everybody knows that he stayed with the Finance Committee through its deliberations in preparing this bill, although not a member of the committee, and has continually taken an active part in the preparation of this bill——

Mr. GOODING. Mr. President——

Mr. UNDERWOOD. Just one minute—that Senator announced this morning that if it was necessary in order to keep out of the American market foreign goods competing with these factories he would favor a tariff that would be as high as 1,000 per cent, and then, before taking his seat, he said yes, he would vote for a tariff under these conditions of 2,000 per cent.

The PRESIDENT pro tempore. The time of the Senator from Alabama has expired.

Mr. McCUMBER. Mr. President, I believe that under our rules we are required, if acting in good faith, to speak to the amendment, under the unanimous-consent agreement. The Senator who has just spoken has abandoned that practice, it seems to me, to some extent; but I will hang close to the subject, and I will show to the satisfaction of the Senator from Alabama that he himself stands for a policy that will protect enormous profits, and I will show it so conclusively that every Senator will understand that my statement is based upon mathematical calculations that no one can deny.

The Senator says, in substance, that it is impossible that an article should cost 100 per cent more in this country than it costs abroad. Let me take one article. Suppose here is a pair of scissors the material of which costs in Germany 50 cents in American money. The labor costs 50 cents. That is a dollar. The American labor averages eight times the German labor, but I will take six times. Six times 50 cents is $3. Therefore, if the raw material costs exactly the same, you will find that the labor alone will increase the cost 300 per cent; and that is true of almost everything in the knife and the cutlery and the scissors schedule. It does cost enormously more here. The material costs probably about the same. The labor costs from five to ten times as much, and if we should cut the cost of American labor in two we still could not compete with them.

Now let me see whether my first statement is true, that the Senator desires to uphold enormous profits. Let us look at the importers' profits for a minute. I do not know whether the American manufacturer, as a rule, is making good profits or not. I do not believe he is when his output is cut from one-half to one-third of the original output, because if he were making these big profits that the importers are making, why on earth does he not keep his mills and factories in full operation? The very fact that he does not is evidence that it is not profitable to do so.

I will take just a few of these. The first is a pocketknife from Germany, which cost $5.23 a dozen. The landing charge is 52 cents. The present duty is 55 per cent. Calculating 55 per cent on $5.23, you have $2.87. The profit is $7.38 on an article that cost $5.23, or about 150 per cent. The Senator from Alabama says let the importer maintain those profits. Do not raise the duty and compel him to share a little of those profits with the Government, which is maintaining a higher standard of living.

Let us take the next, which cost $4.48 a dozen. The duty is 55 per cent, or $2.46. The importer sells the article in this country for $13.75, and he makes a clear profit, above duty and everything, of $6.37 on an article which cost him $4.48, or about 150 per cent.

I do not know what the retail prices are. I got only the wholesale prices. They probably sell at retail for two to four times as much.

The next one is a pocketknife with a stag handle, costing $5.02 a dozen. They pay 55 per cent duty, or $2.76, and the importer sells them for $15.72 a dozen, making a clear net profit of $7.44 on an original investment of $5.02.

Take another pocketknife, costing $2.30 a dozen. The importer sells those for $7.50 a dozen, and after paying the tariff and everything, he makes a clear profit of $3.71 a dozen.

Here is one that costs a little more, $9.28 a dozen. The importer pays a duty of 55 per cent, which would be $5.10, and then he sells them for $26.75 a dozen and makes $11.45 a dozen clear.

We say that he can pay a little part of this additional profit between 55 per cent and 103 per cent, say, and still be making 75 to 80 or 90 per cent profit. The Senator's proposition is to maintain the mighty profits for the importers, but he is against the American producer having anything like a decent profit. Let us take another one.

Mr. McLEAN. Mr. President——

The PRESIDENT pro tempore. Does the Senator from North Dakota yield to the Senator from Connecticut?

Mr. McCUMBER. I yield.

Mr. McLEAN. I would like to insert figures showing just what the American manufacturers of pocketknives have made in the last few years. The Senator from Alabama has insisted that they are selling these knives at a profit in competition with foreign manufacturers.

There are 25 factories in this country, located in New York, Connecticut, Pennsylvania, Ohio, and New Jersey. Those 25 factories have a total investment of about $7,000,000 or $8,000,000, and they reported in 1921 an aggregate operating loss for the year of $664,000. The sales dropped from $11,200,000 in 1920 to $3,800,000 in 1921.

Mr. McCUMBER. Mr. President, I do not want to tire the Senate with a long list of figures, so I will take just one more illustration, and that, again, is pocketknives. Here are some [exhibiting] which are purchased for $4.14 a dozen. The duty is 55 per cent under the present law. That makes $2.28 duty. After paying all costs and duties, those knives are sold for $12 per dozen, with a net profit of $5.40 on an article which costs $4.14 a dozen, or about 150 per cent.

You can take all these articles—pocketknives, penknives, scissors, and articles of that character—and you will find the enormous profits which are being reaped to-day by the importer; and yet the Senator from Alabama says that is all right; let him have the profits, even though he takes away half of the business of the American producer.

I say no; if he holds his prices so close to the American prices that he can afford to double and treble his money on every dozen knives he imports, then for heaven's sake let him pay a little for the maintenance of a government which maintains a standard of living so immeasurably higher than the standards of living in the foreign countries. That is fair, and that is what, to a certain extent, we are trying to do by this bill.

Mr. GOODING. Mr. President, I merely want to answer the remark of the senior Senator from Alabama about my helping to frame the tariff bill we are now discussing. I wish to say to the Senator that I had nothing to do with the framing of this bill. I appeared before the committee, as did every other Senator who cared to appear before the committee, and advocated certain rates, but not until representatives of national agricultural organizations appeared before the committee first and presented their case. I followed them up, whenever I could, with additional evidence, of course, but I had nothing to do with framing the bill.

Mr. UNDERWOOD. Of course, I knew the Senator was not a member of the committee and did not participate in the actual framing of the bill. I may have been mistaken, but I have been advised, and so understood, that the Senator was constantly with the committee, advising with them as to what the rates of duty should be.

Mr. GOODING. That is a mistake; it is not true.

Mr. UNDERWOOD. The Senator has not advised with them except when he testified before the committee?

Mr. GOODING. There have been a great many things said about the bill. It has been charged that it was framed behind closed doors, conceived in corruption, and a great many other things which are not true.

I know the doors were never closed when I went to the committee. I know there were experts there who represented very largely the Democratic Party, and experts who represented the Republican Party, because you can find them of all characters and shades, as far as protection and free trade are concerned, in the employment of the Tariff Commission to-day. If there was ever a meeting held by the committee in framing the bill when experts were not there I never heard of it. If the doors were ever locked or closed once, if there were any side meetings, I never heard of it. I do not believe there were.

I doubt whether a bill was ever framed and discussed with more seriousness and consideration than the pending bill. I never saw men work harder in my life, and I have been a worker and a doer and a builder all my life. I believe the men who framed this bill were conscientious and honest in everything they did, and that they are trying to act in that way now. There is not any doubt about that in my mind.

It ill becomes the great Senator from Alabama to cast any reflection upon them, because I say they followed exactly the same procedure that the Senator from Alabama followed himself as chairman of the Ways and Means Committee over in the House, that much and nothing more.

Mr. UNDERWOOD. Oh, no; the Senator must not put me in a wrong light.

Mr. GOODING. I would not do that.

Mr. UNDERWOOD. I am sure the Senator says that because he does not know the facts. When the present law was written in the Ways and Means Committee, all the hearings were open, and it was not until the hearings were closed for everybody that the bill was written. Hearings were not open for anybody in the Ways and Means Committee after they were closed.

Mr. SMOOT. We had open hearings on this bill, and we followed just exactly that course.

Mr. UNDERWOOD. Except that I think after you closed your open hearings you had hearings where only a part of the committee was present. When I refer to having had open hearings when the present law was written, I mean that the Republican members of the committee sat at all the hearings when evidence was taken until the evidence was all in, and then there were no more hearings.

Mr. SMOOT. That was the case with this bill. All the evidence is printed here.

Mr. UNDERWOOD. I know it was all printed, but I will ask the Senator if the Republican members of the committee did not allow experts and other witnesses to come before them and explain the bill and their desires, after the Democratic end of the committee were excluded?

Mr. SMOOT. Just the same as has always been the practice in the past in the Senate.

Mr. UNDERWOOD. That may have been the practice in the Senate, but I wanted the Senator from Idaho to know that that was not the practice with the committee I presided over at the other end of the Capitol.

Mr. SMOOT. It has been the practice in the Senate ever since I have been here, and I have been here in the making of three tariff bills. Not only that, but I want to say to the Senator that whenever a Representative or a Senator asked to be heard, he was heard by the committee. It is true we had the experts from the Tariff Commission there all the time whenever any particular schedule was under consideration.

Mr. GOODING. Mr. President, of course I would not do the great Senator from Alabama an injustice. I am one of the new Senators. But according to my understanding it has always been the custom for Senators to appear and take witnesses before the committee, even after the general hearings are over. I may be mistaken about that. That has been done in this case.

Mr. UNDERWOOD. I did not say what the practice of the Senate was. The Senator referred to my action in the House. I say that did not occur when I was chairman of the Ways and Means Committee, and it was not the practice in the House. My Republican predecessors did not pursue that course.

Mr. GOODING. Of course I will have to accept that. But I do know that the meetings of the Finance Committee were always open, that these experts were there, and I have reason to believe that some of the Democrats on the other side were generally advised of what took place all the time. There was nothing wrong about that. The public was advised almost daily of everything that transpired before the committee.

I want to say to the Senator from Alabama that the rates you gave to the manufacturers in the Underwood-Simmons bill, based on foreign valuation before the Great War and when the mark was worth 23 and a fraction cents in gold, were immensely higher than the rates in this bill, when the mark is worth only one-seventh of 1 cent. A dollar's worth of gold buys of German labor ten times as much to-day as it did when the Underwood-Simmons bill was passed. The American manufacturer, in my judgment, had rates of anywhere from 200 to 500 per cent on some of the imports from Germany, where you gave them as high a duty as 60 per cent, and a great many duties ran from 35 to 40.

I wish Senators could take into consideration the condition of the world as a result of the Great War and how dangerous a bankrupt country or a bankrupt institution of any kind is as a competitor in business. Show me a bankrupt store in a town which sells out and I will show you how it demoralizes conditions. Some of the European countries are nearly bankrupt to-day, and that is why I am standing here pleading for a duty which will protect the American manufacturer.

Again I want to say, and I hope Senators on the other side will not put me in the wrong light, that if we had the American valuation and the duties as high as they are now, I would say they were too high, but I want to be understood as saying that with the foreign valuation they are not high enough, and Senators will see it and understand it before the winter is over.

Mr. UNDERWOOD. Mr. President, after listening to the remarks of the chairman of the committee I wish to offer an amendment. I move to strike out "100 per cent" in the amendment proposed by the Senator from Wisconsin and insert "55 per cent," and on that I wish to say just a few words.

I have listened to the reply of the Senator from North Dakota, the chairman of the committee, reacting on the proposition that 100 per cent was not high enough to protect American industry and contending that I favored a higher percentage because certain importers, he contended, were receiving more than 100 per cent profit on the goods they imported. Of course, I had nothing to do with fixing the price on the importers' goods and had no knowledge of their profits until I heard the assertion by the Senator from North Dakota.

But, Mr. President, I am satisfied in my own mind that the Senator from North Dakota was as far wrong about that asser-

tion as to their profits as he was about the profits of the retail stores in New York when he exhibited his cuckoo clock here some months ago, which was shown to be entirely an error on his part, because it was shown that the cost of selling had not been accounted for. I am satisfied, although I have not any information, that if we examined the figures which the Senator from North Dakota gave us as to the profits of the importer in this case, it would be found that he had not included in those figures the amount that it cost the importer to advertise, sell, and distribute his goods in the United States; that he had only counted the difference in the import price with the tariff added; and that the cost of selling and distribution is not included.

But that is not the thing which amazes me in the statement of the Senator. He said that I advocate the keeping up of the importers' prices by lowering the tariff. Why, Mr. President, the Senator from North Dakota seems to have lost sight entirely of the fundamental proposition in which we are engaged. We are engaged in the consideration of a bill to raise revenue for the Government of the United States, but that is lost sight of entirely in the effort of the committee to fix prices, high prices, excessive prices, for the American manufacturer and producer. We have nothing to do with the importers' profits. We are not passing a law to fix their profits. If they made a high profit out of selling their goods here they made it because the American producer was maintaining high prices in the American market and did not drive the prices down to the point where the high profits would be avoided.

I say that advisedly. I know the Senator may respond, "Oh, but the American producer could not have reduced the price more, because the cost of production prevented him from reducing the price more, and he could not meet this competition." But that is not reasonable. You can not ask a reasonable man to believe that in the face of the fact that the importer has not taken entire possession of the American market. Suppose you and I, Mr. President, were engaged in a business and were importers and found we had a profit of four dollars and some cents a case on a certain class of cutlery; that there was a clean, unobstructed profit of $4 for us if we brought them into the great American market that consumed them; that the original cost was not much greater than that; that on that profit the Senator asserts we are making over 100 per cent, assuming that we were the importers. Does anybody doubt for a minute that the importer would have taken absolute possession of the American market?

That is not the true situation. The imports were not excessive in these lines until within the last few months. Within the last year the Republican Party have been proclaiming to the world, both in the House and in the Senate, that they proposed to enact a tariff law that would carry practically prohibitive rates on cutlery. The bill passed the House a year ago, if I recollect right, and it has been staring the world in the face that these high rates were going to be enacted into law. The Senate has continued advertising to the world that the rates were going to be raised and the door closed against importations. Of course, they invited every man who wanted to sell goods in the American market to get his goods in before the door was closed by the high rates, and after inviting, by the delays in the legislation, these excessive importations then the Senator proposes to turn around and ask us to take his own manufactured proof, manufactured by reason of his high tariff taxes which he told the world he was going to levy, and his delay in enacting the bill into law, which brought about these importations and invited them.

I really have a high authority for that statement, because it is only a few weeks ago that I heard the Senator himself, when some one called to the attention of the Senate the large amount of imports that were coming in and the revenue being obtained under the present law, react on the statement by saying that the importers were rushing the goods in to get them here before the bill was enacted into law, and that accounted for the increased revenue. So I have the Senator from North Dakota himself as my authority for the statement that the condition produced increased imports.

But I object to the Senator placing before the Senate as an exhibit the evidence which is a result of the fact that he has delayed the bill. I am not charging the Senator from North Dakota particularly, but his party has delayed the enactment of the bill into a law since the 4th day of March a year ago, and at the same time has held out to the world that the high rates were going to be enacted into law. I am perfectly satisfied that under normal conditions excessive importations would not come in now from Germany any more than they came in before.

I am tired of listening to ad captandum statements of the cost of labor in Germany measured in the German mark. We know that conditions are temporarily chaotic in Germany. We know that labor must receive a living wage. We know that questions of that kind adjust themselves. We know that the cost of production has increased in Germany, although wages may have decreased relatively but not actually to some extent, that raw material has been more difficult to get and taxes and other costs of production have been pyramiding ever since the war.

Mr. President, when an industry which has lived and existed under a 55 per cent tariff duty comes to the Congress and then refuses to say that it is willing to accept a limitation on the tax of 100 per cent, it is a self-evident fact that the only purpose of levying the tax is to protect inordinate profits. Although the Senator from North Dakota may not ever acknowledge it—of necessity he must deny it—I say to him that he can never convince the people, who will have to pay the increased prices for their clothes, their cutlery, their food, and all that goes to make up the cost of living in America, that he and his party are not responsible for the increased costs which will follow the enactment of the bill into law.

Mr. NEW. Mr. President, like the Senator from Alabama, I have listened with very great interest to the debate of this morning, particularly that part of it which has taken place with reference to the item now under consideration. I am particularly impressed by the significance of the figures that were given by the Senator from Connecticut [Mr. McLEAN] and which, while they have once appeared in the RECORD, I think should again appear in connection with this discussion for the better understanding of Senators who are about to vote on this amendment.

I would like at this time to call attention specifically to this one statement:

> The industry—cutlery—as a whole during the year 1921 operated on a basis of not more than one-third of production capacity. Of the 27 factories above enumerated, all but two had been engaged in the manufacture of pocketknives for a considerable period prior to the outbreak of the war. These 25 factories have a total investment of $7,560,000 and report an aggregate operating loss for the year of $664,338. Sales dropped from $11,200,000 in 1920 to $3,800,000 in 1921. No factory in the industry reported a profit for the year.

Mr. President, I think that statement is full of meat and furnishes food for much thought in voting on the particular item now under consideration.

I also in this connection ask to have reprinted as a part of my remarks a portion of the debate—only two paragraphs long—found on page 9167 of the RECORD of June 8, 1922, in which the Senator from Connecticut has given additional figures.

The PRESIDENT pro tempore. Without objection, it is so ordered.

The matter referred to is as follows:

> The importations of pocketknives during the month of March, 1922, were 100,256 dozen, an increase of imports over March, 1921, of 56,000 dozen. For the nine months ending March 31, 1922, the importations of pocketknives were 644,000 dozen, an increase over the corresponding period of the year before of 326,937 dozen, or 103 per cent.
>
> * * * * * * *
>
> I will give the value. I call the attention of the Senator from New Mexico to this, that, figured at the March rate of importations, the annual imports would total 1,203,000 dozen, or more than twice the total sales of American pocketknives during the year 1921. When we come to the more recent importations, we find that in April of this year there were imported 123,000 dozen, an increase of 25 per cent over the March imports.

Mr. NEW. Mr. President, this whole debate has recalled to my mind a debate which I heard years ago, the points involved in which were exactly similar to those involved in this instance. That debate was in reference to the manufacture of tin plate, an industry which we in Indiana were then struggling to institute. If I should take the CONGRESSIONAL RECORD of that date and compare the arguments then made with reference to tin plate with those which have been made to-day against the increase of the duty on cutlery, it would be found that they followed exactly the same line; the comparison would be extremely close.

I could bring into this Chamber the files of the Indianapolis Sentinel, a Democratic paper which was published in Indiana at that time, which printed column after column of both news and editorials in reference to the result of the so-called investigations which were set on foot to inquire into the facts concerning the manufacture of tin plate and its possibilities in Indiana, and which denounced such manufacture as being an utter impossibility.

Mr. President, there was at that time one very small frame building at Anderson, Ind., which could have been placed in half the area of this Chamber, which was manufacturing tin

plate and doing it at a loss. It housed all there then was of the tin-plate industry in Indiana. I recall that the Sentinel printed a picture of that building and laughed the Republican Party and the tin-plate industry to scorn. That paper then said, in connection with the printing of the picture: "This is all there is to the tin-plate manufacture in the State of Indiana; we can not do anything with the manufacture of tin plate here." That paper ridiculed the idea without limit. By reason of the low duty which was then imposed upon tin plate, that little factory, of course, failed and went into the hands of a receiver. That fact was blazoned to the world with great acclaim and a wonderful degree of satisfaction.

However, Mr. President, as a result of the agitation for a protective duty on the manufacture of plate which was then set on foot in that Congress and in the Congress that succeeded it, the duties on tin plate were increased by just 100 per cent over what they had been, and the manufacture of tin plate began to thrive in Indiana. That action was responsible for the establishment of the city of Elwood, which is located in the same county as is Anderson, at which was located this poor, pitiful little wooden factory to which I have just made reference.

I went with William McKinley to the opening of those tin-plate mills in Elwood. To-day that town, according to the census of 1920, has a population of about 11,000, and nearly every one of them is either an employee of the tin-plate mills or depends upon its employees for his business. That factory, however, is small compared to the one which is located in the northern part of the State, at Gary.

What has been the history of the prices of tin plate? I am speaking of this now, Mr. President, in direct connection with the pending amendment, because I think the history of the one will follow closely the history of the other; that the analogy between these two items is complete. Tin plates which in 1880, before that duty was put on, sold for $6.75 sold in 1915 for $3.10. Not only that, Mr. President, but we are exporting tin plate from this country. Prior to the inauguration of this policy we did not make a pound of tin plate and imported from Wales all that we consumed.

Mr. President, I think the question involved in considering the rate of duty in this instance is whether the cutlery industry can exist in this country at all, whether it shall be perpetuated or whether it shall be permitted to continue to decline, as is indicated by the statements and the figures which have been furnished by the Senator from Connecticut. A figure which will insure the perpetuity of the industry is temporarily justifiable, for if we are to judge by past experiences, the ultimate result will be a lowering of prices.

Mr. McCUMBER. Mr. President, the Senator from Alabama [Mr. UNDERWOOD] has stated that it is not reasonable that the foreign importer should be making the profits which I have quoted from actual reports, because, if he were making such profits, of course he would take the entire American market. There is little in the argument that a thing is not reasonable and can not be so when it is so; there is little in the argument that a thing can not be done when it is being done. All of these reports are based upon actual importations and actual sales in this market of imports and comparable American articles.

I do not know what are the advertising costs of the man who wants to go over and buy foreign penknives, and I do not think the Senator from Alabama knows. I do not know that he pays anything; he brings them over and probably sells them upon the American market to the wholesaler. The wholesaler may do his own advertising. I have included in the figures I have given everything that went into the cost, the purchase price, transportation, insurance, duty, landing cost, and the expense of putting the articles upon the American market. On the other hand, I have given what the American selling price is. If the American selling price of an article of this kind, pocketknives, is $13 a dozen, and the American manufacturing concern is compelled to discharge two-thirds of its employees, I must conclude it is not able to continue to produce a sufficient quantity to supply this market at that price in conjunction with the quantity being imported into the American market. So the contention is reasonable.

Another thing that makes it reasonable, Mr. President, is this: I have admitted that the power is now in the hands of the foreigner so to reduce the price that he can drive the American manufacturer out of business. It is not to his interest to do so. When he can produce for one-quarter to one-third of what the American selling price is and can find a market for all he produces, he had better stick to the highest price he can get, and that is exactly what he is doing now—just selling up to the American selling price, in some instances a little more and in some instances a little less.

The Senator from Alabama says he is tired of listening to all of the talk about German wages. I am not only tired of listening to it, Mr. President, but I am also tired of realizing that the facts set forth are true, and I have no doubt that every American manufacturer is tired of reading of German costs and German wages. When, however, the Senator says that we are considering German wages only in their mark value he is making an error, for in every instance we have converted the mark into American gold, and in every table we have given we have given the wages in gold, in American dollars, and that is the basis of the calculation.

Mr. President, the Senator says we have forgotten that the purpose of this bill is to secure revenue. It is the Senator who is forgetting it. If the German can make an article for $1 and under the present law there is a duty of 55 cents upon that article, making $1.55, and he is selling that article in the American market for from $5 to $6, and we increase that duty by 50 cents, he can take care of that additional 50 cents and still have from 150 to 200 per cent profit. He will continue to send his products into the United States and we will derive the additional revenue.

Mr. UNDERWOOD. Mr. President, may I ask the Senator a question?

Mr. McCUMBER. I yield.

Mr. UNDERWOOD. Does the Senator expect under this bill that the importations will be as great as under the present rate?

Mr. McCUMBER. There may be some decrease, but I expect a sufficient quantity of them to come into the United States to give us a greater revenue than we are deriving now from foreign importations.

Mr. UNDERWOOD. The Senator is dealing now only in the realm of fancy.

Mr. McCUMBER. I am dealing in the realm of calculations which have been made by experienced experts.

Mr. UNDERWOOD. Then, according to the Senator's statement, although we levy this excessive rate, the foreign goods will occupy substantially the same position in the American market as they do to-day?

Mr. McCUMBER. No; I do not say that they will. I hope that they will not.

Mr. UNDERWOOD. Then the revenue will not be derived if they are not allowed to come in.

Mr. McCUMBER. Whenever we double the rate, although there may be a decrease in importations of one-third, we still are ahead so far as revenue is concerned. I expect there will be some decrease in the proportionate amount of importations as compared with the American production, but that a very considerable increase in revenue will be derived.

Mr. JONES of New Mexico. Mr. President, I realize that the Senator from North Dakota [Mr. McCUMBER], the chairman of the committee, necessarily has a great many things to think about; and I therefore am not surprised that he should have overlooked the discussion which took place some time ago regarding this paragraph and the evidence which was presented at that time to refute the inferences which he draws from a statement which he referred to in his discussion this afternoon.

The Senator from North Dakota has referred to the prices in the Reynolds report of more than a year ago. When this paragraph was under discussion I presented statements from the very importers to whose prices he referred, and the statements, which were inserted in the RECORD at that time, present a very different showing from that which the Senator from North Dakota would have us believe to exist now. It was explained in this way—that the importer must give his orders some months in advance of delivery. When the importer gives his order for the product, he buys foreign exchange at the then prevailing price. The German mark was worth 2 or 3 cents at that time; but when you come to get the importer's price for the purpose of fixing the duty upon it, you must put the valuation upon that foreign currency at the rate prevailing at the time of exportation; and that explains in great measure what appears to be a very high importer's profit.

Moreover, Mr. President, the statement was put into the RECORD at that time that the prices which existed at the time we had this paragraph originally under discussion were 25 per cent above the pre-war price, measured in gold, in Germany. It seemed to me that that specter should have been put back into the dark closet some time ago; and I can only attribute it to the fact that the Senator from North Dakota failed to remember the discussion which took place at that time and which appears in the RECORD.

Moreover, I wish to refer again to the fact that the production in Germany to-day is not more than 60 per cent of what it was prior to the war; that Germany is exporting to-day, and has been for the last year, less than 40 per cent of what she was exporting prior to the war. I wish further to say that of all Germany's exports only 7.1 per cent reach the shores of the United States. If what has been said here can be relied upon and shall be the measure of the conditions which exist in this country, I ask why there is a single factory in the United States to-day manufacturing pocketknives? I have personally talked with the representatives of two of them, however.

They tell me that their factories are running at full capacity; and since the war, in 1919, in the State of the Senator from Connecticut, a pocket-knife industry has been started. The Remington Arms Co. commenced making pocket knives, pocket cutlery, and that concern in the Senator's own State is running at full capacity to-day, and just a few days ago was advertising for more help.

In the face of such statements as that, I should like to ask how the Senator with a straight face can rise in this Chamber and say that the cutlery industry of the United States is being ruined by imports from Germany. The Remington Arms Co. started in the business after the war and is now running at full capacity and advertising for additional help, making pocket knives.

Just to illustrate what these duties mean, Mr. President, here is a knife which, I think, was made in the State of the Senator from Connecticut. It sells at wholesale at 6½ cents. The duty on it under this bill is 12 cents, plus 45 per cent ad valorem.

Mr. McLEAN. Mr. President, where was it made?

Mr. JONES of New Mexico. It was made in Connecticut.

Mr. McLEAN. Who made it?

Mr. JONES of New Mexico. I have not the name of the maker here.

Mr. McLEAN. The name is not on the knife? Is it one of those gold knives?

Mr. JONES of New Mexico. No; it is a nickel knife.

Mr. McLEAN. There is no name on it?

Mr. JONES of New Mexico. I have not examined it to see. I do not believe there is.

Mr. McLEAN. No; I do not think there is, and I do not think it was made in Connecticut.

Mr. JONES of New Mexico. Well, it was made in the United States.

Mr. McLEAN. I doubt that.

Mr. JONES of New Mexico. It may not have been made in Connecticut. I agree that not everything is made in the State of Connecticut.

Mr. McLEAN. I very much doubt if it was made in the United States. Germany is alive to what we are doing here, and I have seen several knives advertised as made in the State of Connecticut, and I could not trace one of them, and I have communicated with all the knife manufacturers. I think that knife was made in Germany.

Mr. JONES of New Mexico. Mr. President, the Senator can not deny, though, that they are making knives in the State of Connecticut, and they are doing it now, under the present duty, notwithstanding this alleged competition from Germany.

Mr. McLEAN. We are making a few. They are running at about 20 per cent of capacity, and they are selling what they make at a loss.

Mr. JONES of New Mexico. Mr. President, when the Senator adds the latter clause, "at a loss," I can understand how there may be overhead charges and all that sort of thing on a limited amount of production, as a result of which it may be said that they are running at a loss; but the Senator does not deny that the Remington Arms Co., in his own State, started up since the war making pocketknives, employs 900 men, is running at full capacity, and has been advertising for more help.

Mr. McLEAN. Mr. President, will the Senator pardon me?

Mr. JONES of New Mexico. I am glad to yield.

Mr. McLEAN. I am glad of that, if that is so. They are a new concern and they are experimenting, probably. I should like to know how much money they are making. I will say to the Senator, however, that my sole purpose in advocating these rates is to preserve American competition, because I have no doubt that if we do some inventive genius will discover a labor-saving device by which, in the long run, we can reduce the price of these articles to the American consumer. Perhaps the Remington Arms Co. has discovered some such process. I hope so.

Mr. JONES of New Mexico. I am sorry I can not yield further; but the pocketknife industry is not in an experimental stage in the United States. The Remington Arms Co. is not an infant industry. It is one of the best-known manufacturing institutions in the United States. It would not go into the production of pocketknives since the war under these duties, employing over 900 men, unless it knew what it was doing. I am sure that in the State of the Senator from Connecticut there is certainly enough intelligence among the business men who have been successful in the past not to engage in an experiment upon that scale in this chaotic condition of the world's business.

Mr. McLEAN. The Senator knows that the Remington Co. manufacture arms. They may have started the manufacture of knives as a side issue.

Mr. JONES of New Mexico. I am sorry that I can not yield further. I always enjoy listening to the Senator from Connecticut, but I can not yield much more of my time.

Again, Mr. President, this is not an infant industry. The total imports of this country from Germany amount only to about $80,000,000 a year, and we are selling to Germany nearly $400,000,000 of products a year; and if Germany could do the thing that the Senator from North Dakota and the Senator from Connecticut would have us believe, in the name of Heaven why does not all Germany go to work making pocketknives for the American market? Yet she is not doing it; and it does seem to me, Mr. President, that when Senators bring in here a few items, bought under peculiar circumstances, and attempt to levy taxes based upon such evidence, they are trifling with the intelligence of the American people.

Mr. BURSUM. Mr. President, I understand that we are working under a 15-minute rule.

The PRESIDENT pro tempore. The Senator is correct.

Mr. BURSUM. I am convinced that that rule has not been adhered to. There has been much more time taken up. There are many amendments besides this one pending, and we should like to have a chance to have them considered.

The PRESIDENT pro tempore. The Chair desires to advise the Senator from New Mexico that the rule has been adhered to so far as the Chair knows. The Senator who has just taken his seat had three minutes yet in which to address the Senate had he cared to consume the time.

Several SENATORS. Vote!

The PRESIDENT pro tempore. The question is upon the amendment proposed by the Senator from Alabama [Mr. UNDERWOOD] to the amendment of the Senator from Wisconsin [Mr. LENROOT].

The amendment to the amendment was rejected.

The PRESIDENT pro tempore. The question now is upon the amendment proposed by the Senator from Wisconsin [Mr. LENROOT], upon which that Senator has asked for the yeas and nays.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. DILLINGHAM (when his name was called). Making the same announcement as on the last vote, I vote "nay."

Mr. HARRISON (when his name was called). Making the same announcement as before, I vote "yea."

Mr. McCUMBER (when his name was called). Making the same transfer of my pair as on the previous vote, I vote "nay."

Mr. POMERENE (when his name was called). Again announcing my pair with my colleague [Mr. WILLIS], I transfer that pair to the senior Senator from Nebraska [Mr. HITCHCOCK] and vote "yea."

Mr. WATSON of Indiana (when his name was called). Making the same announcement as before, I vote "nay."

The roll call was concluded.

Mr. CURTIS. I desire to announce the following general pairs:

The Senator from California [Mr. JOHNSON] with the Senator from Georgia [Mr. WATSON];

The Senator from Illinois [Mr. McKINLEY] with the Senator from Arkansas [Mr. CARAWAY];

The Senator from Missouri [Mr. SPENCER] with the Senator from Georgia [Mr. HARRIS]; and

The Senator from Michigan [Mr. TOWNSEND] with the Senator from Wisconsin [Mr. LA FOLLETTE].

Mr. NEW (after having voted in the negative). I have a pair with the junior Senator from Tennessee [Mr. McKELLAR], which I transfer to the junior Senator from Oklahoma [Mr. HARRELD] and allow my vote to stand.

Mr. HALE. Making the same announcement as before, I vote "nay."

Mr. McCORMICK. If my colleague [Mr. McKINLEY] were present, he would vote "nay."

Mr. WALSH of Montana. I transfer my pair with the Senator from New Jersey [Mr. FRELINGHUYSEN] to the Senator from Rhode Island [Mr. GERRY] and vote "yea."

The result was announced—yeas 26, nays 33, as follows:

YEAS—26.

Ashurst	Heflin	Reed, Mo.	Swanson
Borah	Jones, N. Mex.	Robinson	Trammell
Capper	Kellogg	Sheppard	Underwood
Cummins	McCormick	Simmons	Walsh, Mass.
Dial	Norbeck	Smith	Walsh, Mont.
Fletcher	Overman	Stanley	
Harrison	Pomerene	Sterling	

NAYS—33.

Ball	Edge	McLean	Shortridge
Brandegee	Ernst	McNary	Stanfield
Broussard	France	Moses	Sutherland
Bursum	Gooding	New	Wadsworth
Calder	Hale	Newberry	Warren
Colt	Jones, Wash.	Nicholson	Watson, Ind.
Curtis	Keyes	Oddie	
Dillingham	Lodge	Phipps	
du Pont	McCumber	Reed, Pa.	

NOT VOTING—37.

Cameron	Hitchcock	Nelson	Smoot
Caraway	Johnson	Norris	Spencer
Culberson	Kendrick	Owen	Townsend
Elkins	King	Page	Watson, Ga.
Fernald	Ladd	Pepper	Weller
Frelinghuysen	La Follette	Pittman	Williams
Gerry	Lenroot	Poindexter	Willis
Glass	McKellar	Ransdell	
Harreld	McKinley	Rawson	
Harris	Myers	Shields	

So Mr. LENROOT's amendment to the amendment of the committee was rejected.

Mr. ODDIE. Mr. President, I send to the desk two amendments, which I will ask to have substituted for paragraphs 1610 and 1659, and as these amendments were offered several days ago and are now on the table I wish to state that the one to be substituted for paragraph 1659 contains, after the words "newsprint paper," the words "including rotogravure paper." I will eliminate those words from the amendment and introduce them later, providing this amendment carries, because they relate to rather a different matter, and I want to have it acted on separately.

On August 3 the Senate in Committee of the Whole restored the language of this paragraph as passed by the House.

The proposed amendment modifies the language adopted by the House by striking out the imposition of a 10 per cent ad valorem duty, which might be imposed in case a foreign country forbids or restricts exportation.

The manufacturers in the United States are able to obtain their wood from the freehold lands of Canada only, but are prevented from obtaining any wood from the so-called Crown lands, which are comparable to our public lands, for the reason that Canada has adopted a very strict policy with regard to the cutting of timber from the Crown lands in three of her Provinces, just as the United States has adopted policies restricting the exploitation of its timber, mineral, and oil lands.

The imposition, therefore, of a 10 per cent ad valorem duty on items which have been made the subject of regulation by law or otherwise by the Canadian Government would, it is feared, unnecessarily antagonize Canada without in the slightest affecting the situation, which would result in the imposition of a flat duty of 10 per cent ad valorem on all newsprint paper, mechanically ground wood pulp, and chemical wood pulp.

The effect of these amendments is to remove the 10 per cent penalty which, if allowed to remain, will positively nullify the action of the Senate in placing newsprint paper and its component elements on the free list. However, it leaves a retaliatory clause which protects the American producer and consumer against any export duty or other export charge which might be imposed.

I will state, Mr. President, that when Congress placed these items on the free list, in the face of conditions existing to-day, it showed its intention to keep them on the free list, and this rider in the form of a retaliatory clause, which, ipso facto, has the effect of taking them off the free list, should be eliminated, and my amendments eliminate it.

The purpose of giving free entry to the United States of newsprint paper and wood pulp from Canada is to protect the American consumers of these commodities against the deficiency in the domestic production. To impose the prescribed retaliatory duty would be inconsistent with this object and only result in aggravating the shortage and in increasing the cost to American consumers of newsprint and pulp, both domestic and imported.

The Canadian regulations to which these clauses appear to be aimed are based upon economic necessities of the Dominion of Canada and are not the result in any degree of commercial antagonism to the United States.

If therefore the United States has a substantial basis on which to seek the abrogation of the embargo it would be better to proceed by negotiation rather than by coercive measures, since there is nothing in the history of Canadian trade policy to lend support to the suggestion that Canada will yield under duress what it will not yield voluntarily.

It is quite obvious that the retaliatory clauses would become mandatory in their operation whenever any action on the part of the President should be evoked, and as such are tantamount to fixing a flat duty of 10 per cent ad valorem upon newsprint paper and mechanical and chemical wood pulp, thereby nullifying the intent of the Senate that these commodities are entitled to a free entry on their merits.

There is no question but that something has been overlooked in this matter. Congress wants to play fair, and I know that when individual Senators and the members of the committee study this matter carefully, they will see that a mistake has evidently been made. If this bill is allowed to go through as it reads now, an injustice will be worked, and something will be done which Congress does not intend doing. I hope these two amendments will be carried, and I ask that they both be voted on together.

The PRESIDENT pro tempore. The Senator from Nevada asks that the two amendments which he has sent to the desk shall be considered as one amendment and voted upon at the same time. Is there objection?

Mr. ROBINSON. I have no objection to the Senate voting on both amendments at once. I want to be heard on the amendments before the vote is taken.

Mr. JONES of Washington. I think they should be read.

Mr. ROBINSON. Let them be read.

The PRESIDENT pro tempore. The Secretary will read the two amendments.

The READING CLERK. On page 225, after line 16, strike out paragraph 1610 and insert:

PAR. 1610. Mechanically ground wood pulp, chemical wood pulp, unbleached or bleached: *Provided*, That whenever the President shall ascertain as a fact that any country, dependency, Province, or other subdivision of government imposes any export duty, export-license fee, or other export charge of any kind whatever upon printing paper, mechanically ground wood pulp, or wood for use in the manufacture of wood pulp, he may, by proclamation, declare such ascertainment, setting forth the facts; whereupon, and until said proclamation shall be revoked, there shall be levied, collected, and paid upon mechanically ground wood pulp and chemical wood pulp, unbleached or bleached, when imported either directly or indirectly from such country, dependency, Province, or other subdivision of government, an amount equal to the highest export duty or other export charge imposed by such country, dependency, Province, or other subdivision of government.

And, on page 233, after line 14, strike out paragraph 1659 and insert in lieu thereof:

PAR. 1659. Standard newsprint paper: *Provided*, That whenever the President shall ascertain as a fact that any country, dependency, Province, or other subdivision of government imposes any export duty, export-license fee, or other export charge of any kind whatever upon printing paper, wood pulp, or wood for use in the manufacture of wood pulp, he may by proclamation declare such ascertainment, setting forth the facts; whereupon, and until such proclamation shall be revoked, there shall be levied, collected, and paid upon standard newsprint paper, when imported either directly or indirectly from such country, dependency, Province, or other subdivision of government, an amount equal to the highest export duty or other export charge imposed by such country, dependency, Province, or other subdivision of government.

Mr. ROBINSON. Mr. President, I inquire of the Senator from Nevada whether his amendments are not identical with provisions which the Senate has heretofore voted on in the bill?

Mr. ODDIE. No; there is a difference. Certain things have been eliminated, and I will explain in a few words what that means. As I have stated, Canada has for 10 years had an embargo on the exportation of woods and pulp from certain of her lands—the Crown lands—in only three of her Provinces. The provision of the bill as it is now provides that whenever the President shall ascertain as a fact that any country, dependency, Province, or other subdivision of government forbids or restricts in any way, whether by law, order, regulation, contractual relation, or otherwise, directly or indirectly, the exportation of or imposes any export duty, export license fee, or other export charge of any kind whatever, and so forth, upon these products, he may by proclamation declare such ascertainment, setting forth the facts, and so forth, whereupon there shall be levied and collected upon these products an amount equal to the highest export duty or other charge imposed by such country, dependency, province, or other subdivision of government.

The embargo is embodied in the wording on line 22. It is included in the words "forbids or restricts in any way." The intent of the Congress is to place wood pulp and newsprint paper on the free list. It has so voted. They should be on the free list. If anybody should raise this point with the President, he would be compelled to declare a 10 per cent duty on these items, which is contrary to the intent of the Congress. I

think the Senator will see, if he looks at both of these amendments, that the wording is very similar.

Throughout the country there are many small newspapers which are struggling to-day. The depression in the country is reflected very largely in their financial condition. When conditions are bad their subscription lists decrease, and they have difficulty in collecting their subscriptions. I am speaking particularly for the small newspapers who need this help. The large newspapers also come under this provision. I want to see success come to any deserving enterprise, I do not care how large it is. When a man or an organization will embark in an enterprise, and put into it ability, energy, and capital, I want to see it succeed, if it is properly and honestly conducted. The small papers particularly need this help.

Mr. REED of Missouri. Mr. President, I want to get the Senator's view on how this will help the small or large newspapers. For instance, if Canada has an export duty on print paper of a cent a pound, it follows that our paper consumer has to pay that 1 cent. If our Government then proceeds to levy an additional tax of 1 cent a pound, how is that going to reduce the price of paper to the consumer?

Mr. ODDIE. Mr. President, Canada has no export duty now, but there are provisions remaining in each of these sections of the bill for levying and collecting an amount equal to the highest export duty or other export charge imposed by such country, dependency, province, or other subdivision of government.

Mr. REED of Missouri. I am not arguing the illustration. I am using the illustration to cover the general principle of the bill, which is that if an export tax is levied by a country shipping its paper here, that tax necessarily is added to the price of the paper when it is brought here. The Senator agrees with me on that, does he not?

Mr. ODDIE. I am not prepared to agree to that altogether, because——

Mr. REED of Missouri. Then if we levy an additional tax and add our import tax upon the other country's export tax, who has to pay those two taxes if it is not the gentleman who buys the paper?

Mr. ODDIE. I do not see how that comes into the question now, because Canada has no export tax, and if she does place an export tax we can meet it. The bill provides that the President can——

Mr. REED of Missouri. Let us leave Canada out of it. We have a bill here that proposes that if any country levies an export tax the President is then authorized to levy an import tax. If the foreign country should levy an export tax of, let us say, 1 cent per pound, that would increase the price of paper to the American consumer, would it not?

Mr. ODDIE. That is altogether up to those who sell the paper.

Mr. REED of Missouri. Then if we add another cent to it by way of import tax, that would also increase the price of the paper, would it not?

Mr. ODDIE. I am not prepared to agree with the Senator altogeher upon that.

Mr. REED of Missouri. Does the Senator think it would reduce it? Does he think that the adding of one tax to another tax would have a tendency to reduce the price to the American consumer?

Mr. ODDIE. I do not see that that necessarily comes into the matter, because there are certain items on which there is a duty, and it has been shown time and again that those items have been sold to the American consumer at a lower price than was originally contemplated when the duty was placed on them. So I do not see how that question comes in. I believe in climbing a hill when we get to it. Just now Canada has placed no export tax on these products, but in case she does the machinery is provided in the bill for taking care of that situation.

Mr. HALE. Mr. President——

The PRESIDENT pro tempore. The time of the Senator from Nevada has expired.

Mr. REED of Missouri obtained the floor.

Mr. HALE. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Missouri yield to the Senator from Maine?

Mr. REED of Missouri. I yield to the Senator to ask me a question.

Mr. HALE. I would like to ask the Senator from Nevada a question.

The PRESIDENT pro tempore. The Chair has recognized the Senator from Missouri.

Mr. REED of Missouri. How much time have I?

The PRESIDENT pro tempore. The Senator has not spoken on this question at all?

Mr. REED of Missouri. No; I have not.

The PRESIDENT pro tempore. The Senator has 15 minutes.

Mr. REED of Missouri. If I may do so without violating the rule, I will yield to the Senator from Maine, who, I understand, wants to ask the Senator from Nevada a question in my time.

Mr. HALE. No; I desire to do it in my own time.

Mr. REED of Missouri. The Senator wants the floor. I yield the floor to the Senator from Maine.

Mr. HALE. Mr. President, I desire to ask the Senator from Nevada what would happen, under his amendment, if the Canadian Government should put on some restriction but did not put on an export tax? The Senator's amendment takes away the 10 per cent ad valorem duty that was in the House bill.

Mr. ODDIE. The language that is left in the bill provides for that.

Mr. HALE. How?

Mr. ODDIE. The President—

may by proclamation declare such ascertainment setting forth the facts; whereupon, and until said proclamation shall be revoked, there shall be levied, collected, and paid upon mechanically ground wood pulp and newsprint paper, when imported either directly or indirectly from such country, dependency, province, or other subdivision of government, an amount equal to the highest export duty or other export charge imposed by such country, dependency, province, or other subdivision of government.

Mr. HALE. I am asking the Senator what would happen if they did not put on any tax but if they simply put on a restriction of some sort.

Mr. ODDIE. I do not see that that would make much difference unless it came under the head of an embargo.

Mr. HALE. That was the very purpose of putting on the 10 per cent ad valorem tax in addition to the other.

Mr. ODDIE. The effect of it now is——

Mr. SIMMONS. Mr. President, I desire to interrupt the Senator who has the floor.

The PRESIDENT pro tempore. The Senator from Maine has the floor.

Mr. SIMMONS. I want to get this matter straight if I can, and I want to understand it. My understanding is that heretofore we have stricken out the proviso in paragraph 1610 and left Canadian wood pulp on the free list. That is what we have done heretofore.

Mr. HALE. But we have not stricken out the retaliatory clause.

Mr. SIMMONS. We have put it upon the free list, and we have, therefore, as I understand, eliminated that language from the paragraph.

Mr. HALE. No; not at all. We put it back the way it was before, the way the House left it.

Mr. SIMMONS. That is not my understanding of it. My understanding of it is that as it now stands there is no provision in the bill placing a duty upon wood pulp. There was a proviso in the paragraph to the effect that if any other Government or subdivision of government imposed any export duty upon wood pulp imported into this country, an import duty similar to that so imposed would be imposed by us, and also an additional amount equal to the export duty of the exporting country. Now, the Senator from Nevada proposes to provide, not that the 10 per cent duty imposed in the paragraph shall be imposed, but that a duty equal to the export duty imposed by the exporting country shall be imposed by the bill. In other words, we eliminate the proviso which carried the 10 per cent provision. Now the Senator proposes to restore that paragraph, leaving out the 10 per cent duty, and to impose a duty to the amount of the export duty imposed by the exporting country.

Mr. ODDIE. I will state that that provision is still in the bill. The Senate has voted on that proposition.

Mr. WADSWORTH. It is still in the bill. It was not stricken out.

Mr. SIMMONS. But the Senator from Utah just advised me that the proviso had been entirely eliminated.

Mr. SMOOT. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Maine yield; and if so, to whom?

Mr. HALE. I would like to have a little of my own time.

The PRESIDENT pro tempore. The Senator must protect himself in that respect.

Mr. HALE. The purpose of the amendment is apparently to make it easier for Canada to put on an export tax.

Mr. ODDIE. I do not think that condition enters into it, because the bill still has certain provisions relating to possible restriction on exportation by the country shipping the product in. The condition in my mind is very plain. The Senate placed these items on the free list. There is an embargo on these products from certain small sections of Canada, which,

if read with the wording of the bill as it is to-day, would mean a 10 per cent duty, and it was the intention of the Senate and the House to eliminate that duty.

Mr. HALE. It seems to me that by taking off the 10 per cent duty the Senator would make it easier for Canada to put on an export tax by just that amount.

Mr. ODDIE. We are not inviting Canada to do that. I think the retaliatory clause would have a bad effect on Canada. It might compel or induce Canada to do something of the kind and we want to avoid that.

Mr. HALE. Newsprint and chemical pulp have been put on the free list, as the Senator says. I was in favor of having a duty put on chemical pulp, but the Senate did not see fit to put on such a duty. Now, the Senator is going to the other extreme of encouraging a foreign country to put on an export tax.

The PRESIDENT pro tempore. The Chair must admonish Senators that the time of the Senator from Nevada can not be enlarged in this indirect manner.

Mr. SIMMONS. Mr. President, I want to say just a word. We have failed to do in this instance what heretofore has been done, I think, with reference to bills of this character. As we neared the time for the final vote and reached the stage where amendments were offered from the floor, we have had a reprint of the bill so as to show all the amendments that have been made by the committee. We have now adopted some 2,000 amendments, and we ought to have a reprint of the bill so that we might in offering new amendments and discussing them have before us the result of the action of the Committee of the Whole on the amendments offered by the Committee on Finance. The confusion about the pending measure grows out of the fact that that has not been done, but I think I now understand the situation. Understanding it, I want to take a little time to see if I am correct.

The proviso as it is now contained in the bill carries a duty of 10 per cent upon mechanically made pulp, plus any export duty that may be imposed by the importing country. Now, the Senator from Nevada has offered an amendment and that amendment is substantially the provision which is now in the bill, except that he has eliminated the 10 per cent duty, leaving only the duty to the extent of the export duty charged by the country of exportation. Am I correct about that?

Mr. ODDIE. I did not fully understand the latter part of the Senator's statement.

Mr. SIMMONS. I said that as I understand it now, the Senator from Nevada has offered as a substitute, in effect, for the provision that is now in paragraph 1610 a provision which strikes out the 10 per cent duty imposed in that paragraph, but retains the duty which is to be equal to the export duty imposed by the country of exportation. Is that correct?

Mr. ODDIE. That is, in case any country of exportation imposes an export duty.

Mr. SIMMONS. Yes; that is what I said.

Mr. ODDIE. That provision of the bill remains.

Mr. SIMMONS. The only change the Senator proposes is to strike out the 10 per cent duty?

Mr. ODDIE. Yes; in addition to what I have already stated.

Mr. WALSH of Montana. Mr. President——

The PRESIDENT pro tempore. The Senator from Montana.

Mr. WALSH of Montana. I rise, Mr. President, to endeavor to make clear the status of the question that is now presented to the Senate. The Senate in considering the amendment tendered by the committee declined to accede to the amendment which put chemical wood pulp on the dutiable list and which contained a proviso to the effect that, if any export duty or any restriction were imposed upon the export of wood pulp or print paper, a duty of 10 per cent should be imposed, and, in addition to that, an amount equal to the export duty or equivalent to the restrictive measure, whatever it might be. The Senate declined to agree to that amendment; so chemical wood pulp was left on the free list.

Mr. President, the free list contains two provisions to which the amendments of the Senator from Nevada are addressed. The item relating to mechanical wood pulp, now amended so as to include chemical wood pulp also, and the item referring to newsprint paper, have been both put on the free list by the action of the Senate, but with a proviso to the effect that if any export duty is imposed or if any restriction is imposed upon the exportation of either of those products, then there shall be levied a duty of 10 per cent, and, in addition to that, an amount equivalent to the export duty.

The Senator from Nevada leaves in the bill the provisos, the retaliatory provisions, but proposes to amend them in some particulars. I shall try to make clear what the difference is. The proviso as found in paragraph 1610——

Mr. McCUMBER. I should like to say that there seems to be some confusion in regard to the matter, and I think it may be cleared up by a very few words. The provision of the House text not only includes any export tax but it includes any of the other matters which are set forth, such as license fees or duties or any other charge of any kind whatsoever——

Mr. WALSH of Montana. I was about to say so.

Mr. McCUMBER. Whereas the amendment now offered limits it only to export duties, and covers nothing else.

Mr. WALSH of Montana. The amendment proposed by the Senator applies to the provision which "forbids or restricts in any way (whether by law, order, regulation, contractual relation, or otherwise, directly or indirectly) exportations," and then goes on, "or imposes any export duty, export license fee, or other charge of any kind whatever." The amendment of the Senator from Nevada proposes to take out the language "forbids or restricts in any way (whether by law, order, regulation, contractual relation, or otherwise, directly or indirectly) the exportation of," and leaves in the words "or imposes any export duty." So if a Canadian Province forbids the exportation of wood pulp altogether the retaliatory duty does not come into play; but if it imposes a duty upon the exportation of this commodity, then it does. The Senate provision continues:

or other export charge of any kind whatever, either directly or indirectly (whether in the form of additional charge or license fee, or otherwise).

The Senator from Nevada proposes to take that out. Then, continuing on down, it is provided as stated that there is levied a duty of 10 per cent ad valorem. That is taken out by the Senator from Nevada, leaving the equivalent retaliatory duty.

Finally the provision as it now stands concludes:

upon either an equal amount of mechanically ground wood pulp or an amount of wood necessary to manufacture such wood pulp, or an amount of printing paper ordinarily manufactured from such wood pulp.

That is taken out by the Senator from Nevada; that is to say, under the provision as it stands there would be an equivalent duty upon the newsprint paper if a duty were imposed upon wood pulp.

The amendment offered by the Senator from Nevada makes the provision more liberal than as it now stands, permitting greater freedom of importation of newsprint in the one case and of wood pulp in the other. I believe that the amendment offered by the Senator from Nevada is in accordance with the spirit manifested by the Senate in placing, as they supposed they placed, wood pulp on the free list; and it does seem to me that the same reason which actuated the Senate in that action ought now to actuate the Senate in supporting the amendment of the Senator from Nevada.

However, Mr. President, that does not really help the situation very much, because the truth about the matter is that Canada or the Provinces do not impose a duty, as I understand the matter, but absolutely prevent the exportation of the wood pulp.

Mr. HALE. From certain lands.

Mr. LODGE. From the Crown lands.

Mr. WALSH of Montana. So that the retaliatory provision, to my mind, ought to be stricken out altogether; and I think that course ought to be pursued by the Senate; but I shall support the amendment offered by the Senator from Nevada.

Mr. LODGE. This applies only to the Crown lands, as I understand.

Mr. WALSH of Montana. As I understand, the existing regulation applies only to Crown lands.

Mr. LODGE. That is what I meant.

Mr. WALSH of Montana. But if any Canadian Province or the Dominion should extend the restriction to anything else, then the provision would become operative. As I understand, now they do not extend the embargo upon exportation to any pulp wood except such as comes from the Crown lands.

Mr. LODGE. That is what I understand.

Mr. WALSH of Montana. But this contemplates that we may extend it to all wood pulp.

Mr. LODGE. If the Senator will allow me, I had supposed the intent of the Senate——

Mr. ODDIE. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Montana yield to the Senator from Nevada?

Mr. WALSH of Montana. I yield first to the Senator from Massachusetts.

Mr. LODGE. Mr. President, I had supposed the general purpose which the majority of the Senate had in mind was to make sure that newsprint and wood pulp should be secured, so far as possible, at the lowest prices for the users of those commodities. It seems to me now that we are removing the very assurance that they might obtain the commodities cheaply. I do not suppose there is any particular desire to pay an additional duty, resulting in an increase of the price of wood pulp.

Mr. WALSH of Montana. I take it that that provision was put in there with a view to force the Canadian Provinces to the abandonment of their policy of imposing an embargo upon the exportation of wood pulp from Crown lands. That is the only purpose that I can see in it.

Mr. LODGE. I thought it was aimed at their imposing an export duty.

Mr. WALSH of Montana. Exactly.

Mr. LODGE. If we take the action now proposed, what is to protect us from the imposition of export duties? I do not suppose we want to make the users of newsprint pay an export duty to Canada.

Mr. WALSH of Montana. The purpose of the Senator from Nevada is to retain the retaliatory provision, so far as the export duty is concerned. He does not propose to change it as to that. He changes it only in regard to the prohibition of exports. The two are covered by the provision as it stands.

Mr. LODGE. It is proposed to permit the prohibition of exports. What I am trying to make clear is that I do not see how the proposed action is going to benefit the users of newsprint.

Mr. WALSH of Montana. Of course, if the Canadian Government does impose these restrictions, then we put a duty on equivalent to the exportation burden and 10 per cent additional, which the American manufacturer of paper will, of course, be obliged to pay.

Mr. LODGE. Yes.

Mr. ROBINSON. Mr. President, in line with the suggestion of the Senator from Massachusetts, the remedy is to strike out the proviso and not incorporate any retaliatory provision.

Mr. LODGE. Then they could put an export duty on at once which we should have to pay.

Mr. KELLOGG. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Montana yield; and if so, to whom?

Mr. WALSH of Montana. I yield the floor.

The PRESIDENT pro tempore. The Senator from Montana yields the floor.

Mr. KELLOGG. Mr. President——

The PRESIDENT pro tempore. The Senator from Minnesota.

Mr. KELLOGG. Mr. President, it seems to me——

Mr. McCUMBER. Mr. President, I should like to say just a word on the subject.

Mr. KELLOGG. I think I was recognized.

The PRESIDENT pro tempore. The Chair recognized the Senator from Minnesota.

Mr. McCUMBER. Very well; I did not know that the Senator from Minnesota had been recognized.

Mr. KELLOGG. Mr. President, it seems to me there is some misunderstanding about this matter. Paragraph 1659 of the bill as it now stands provides that if any country or any Province in Canada, for instance, forbids or restricts by regulation or otherwise the exportation of newsprint paper or imposes any export duty thereon, thereupon the President shall ascertain the facts and there shall be imposed on all paper coming from that Province 10 per cent, and, in addition thereto, a duty equal to the export duty which Canada levies. In other words, if one of the Provinces of Canada simply restricts the exportation of pulp wood or newsprint paper from Crown lands alone, there is automatically placed upon pulp wood or newsprint paper from Canada 10 per cent, and, in addition thereto, a duty equal to that which Canada imposes. That is the effect; so that to-day, there being in existence in Canada a restriction upon the exportation, say, of pulp wood from Crown lands alone, the President would be obliged immediately after this bill shall have been passed to impose a 10 per cent duty on all pulp wood, and if there should be an additional duty levied by Canada, he would be obliged to impose an additional duty equal to such duty.

The amendment of the Senator from Nevada simply provides that if Canada shall levy an export duty or charge the President is authorized to impose one equal to which Canada imposes. It seems to me that is all there is to the amendment.

I think it is rather unreasonable to impose a duty of 10 per cent merely because the Canadian Government wishes, perhaps, to conserve some of its Crown lands, while from all the rest of Canada the commodities may be exported. I think the amendment is liberal and should be supported; in fact, I would be willing to strike out any restriction whatsoever, so far as I am concerned.

Mr. McCUMBER. Mr. President, the Senator's last statement voiced my own sentiment, and that is, to strike out the entire provision.

Mr. KELLOGG. That will suit me.

Mr. McCUMBER. The whole matter then will go to conference, and I hope the Senator from Nevada will agree to that. Instead of making these changes, let us strike out all of the proviso. That will simply let the matter go to conference, and then we can thrash out any question that may arise under the provision of the House bill as it now stands.

Let me say to the Senators that the language used in the House bill is substantially the same as the language used in the present law. The present law provides:

> That if any country, dependency, province, or other subdivision of government shall impose any export duty, export license fee, or other charge of any kind whatsoever (whether in the form of additional charge or license fee or otherwise) upon printing paper, wood pulp, or wood for use in the manufacture of wood pulp, there shall be imposed upon printing paper, valued above 2½ cents per pound—

Here they say "valued above 2½ cents." I think it is all valued at more than that, so that it would come in now under that provision—

> when imported either directly or indirectly from such country, dependency, Province, or other subdivision of government, an additional duty equal to the amount of the highest export duty or other export charge imposed by such country, dependency, Province, or other subdivision of government, upon either printing paper, or upon an amount of wood pulp, or wood for use in the manufacture of wood pulp necessary to manufacture such printing paper.

Mr. President, we have stricken out in some instances and inserted in others these reciprocal or retaliatory provisions. We have done so with the idea of bringing them all into conference. I am perfectly willing to say, as I have said before, that I really do not think this is the proper way to build up a tariff law. I think, as a rule, where we follow whatever course we think is best for the protection of our own industries and our own commerce, without regard to what any other country does, we ought to accord to other countries exactly the same right, without imposing restrictive or retaliatory or reciprocal arrangements upon them. It seems to me, however, that as we have them in some of these instances it ought to be left finally to see what we can work out as to whether they shall all be applied or none of them applied. As the Senator from Nevada [Mr. ODDIE] by his motion desires simply to narrow this down to just the export or some other special provisions, I am willing to narrow it down still further and cut it out entirely; but if the Senator does not wish to do that, I will say that I am willing to accept his proposal.

Mr. ROBINSON obtained the floor.

Mr. WALSH of Montana. Mr. President——

Mr. ROBINSON. I yield to the Senator from Montana.

Mr. WALSH of Montana. I desire to inquire of the Chair if it would be in order to move, as a substitute for the amendment offered by the Senator from Nevada, to strike out the proviso in paragraph 1610 and the proviso in paragraph 1659?

Mr. ROBINSON. Mr. President, I suggest to the Senator from Montana that his object will be accomplished by simply striking out the proviso in the amendment of the Senator from Nevada——

Mr. WALSH of Montana. There is no doubt about that.

Mr. ROBINSON. And then agreeing to the amendment of the Senator from Nevada, which would place newsprint and wood pulp on the free list; and that, I will say, is the course that I am in favor of taking.

Mr. WALSH of Montana. Let me say to the Senator that that would be altogether agreeable; but if the amendment of the Senator from Nevada is thus amended it will then be just exactly as the text is, and there will be no occasion then for adopting it.

Mr. McCUMBER. It is already on the free list, with this proviso.

Mr. WALSH of Montana. Exactly.

Mr. McCUMBER. We do not need to go clear back and reenact what we have already enacted. I agree entirely with the Senator from Montana that we will accomplish everything by striking out the proviso in the bill.

Mr. ROBINSON. That is undoubtedly true, and I am utterly indifferent as to which way the Senate may proceed; but the motion of the Senator from Nevada is to strike out the whole paragraph in each instance and to insert in lieu thereof:

> Standard newsprint paper, including rotogravure paper—

And then the proviso.

Mr. ODDIE. I will state that rotogravure paper was eliminated from the motion, because I want to bring that up afterwards as a separate amendment.

Mr. ROBINSON. Very well; but, in any event, the Senator's motion is to strike out the entire paragraph and substitute a provision placing newsprint paper on the free list, with a new proviso. Now, the Senate can accomplish its purpose by substituting for the amendment of the Senator from Nevada the proposal of the Senator from Montana to strike out the proviso in the original text, and if that be agreed to we will leave newsprint on the free list. If we strike out the proviso in the amendment of the Senator from Nevada, which strikes out the entire paragraph and rewrites a part of it, we will have accomplished the same purpose; but the simpler method is that proposed by the Senator from Montana—simply to strike out the proviso in the bill—and since the Senate has gone on record in favor of placing these commodities—newsprint paper and wood pulp—on the free list, I think in the conference we ought to have that issue squarely presented to the conferees. If we adopt the amendment of the Senator from Nevada as it is now proposed, while it is an improvement over the present text from the standpoint of those who favor free newsprint paper and wood pulp, it will still narrow the subject matter in conference. The conferees might agree upon any proviso within the purpose of the House provision and the Senate provision; but under the rules governing conferences, now applied in both Houses, they might be embarrassed in striking out any proviso.

The simplest method is that proposed by the Senator from Montana—to substitute for the amendment of the Senator from Nevada an amendment striking out the proviso. That will leave both commodities on the free list absolutely.

This is purely a retaliatory provision. Of course, what the consumers of these products want, as was suggested a moment ago by the Senator from Massachusetts, or at least as I understood him to suggest, is to get these articles without paying a tax to any Government.

Mr. LODGE. Precisely.

Mr. ROBINSON. They would just as soon, and, in fact, would rather, pay an import duty to the United States than to pay an equivalent export duty to the Canadian Government. The presumption is that they would rather our Government would get the benefit of a tax than the Canadian Government; and the object of the provision, of course, is to prevent, if possible, the Canadian Government from levying a duty by the imposition of an equivalent import duty; but the users of newsprint paper and wood pulp would not be benefited, if the Canadian Government should see fit to impose an export duty, by having to pay, in addition to that export duty, an import duty to the Government of the United States.

Mr. LODGE. Mr. President—

The PRESIDENT pro tempore. Does the Senator from Arkansas yield to the Senator from Massachusetts?

Mr. ROBINSON. I yield to the Senator.

Mr. LODGE. The Senator has stated my proposition as I put it. I understand that the object of the Senate in making newsprint free—it certainly was the purpose for which I voted for it—was to give to the users of newsprint their paper at the lowest possible price. The same thing is true in regard to wood pulp. That was the purpose, undoubtedly, the only purpose. The only way I know of in which we can prevent an export duty being laid on newsprint in Canada is to put in the retaliatory clause. If we do not put that in, Canada then is at liberty to put any export duty she chooses on all the paper and wood pulp that comes here. If the users of this paper and pulp prefer paying a Canadian duty to paying no duty, they are very strange in their desires. I do not think they do, and I think they are making a mistake in advocating the taking off of the clause which is the only thing that protects them from additional duties in Canada. It is no gain for them to take off the American duty and have it immediately replaced by an export duty in Canada.

Mr. ROBINSON. Mr. President, in reply to that suggestion, I call the attention of my friend the Senator from Massachusetts to the fact that Canada is not now levying an export duty.

Mr. LODGE. I will admit that, but it proves nothing.

Mr. ROBINSON. It certainly does not prove that the failure to enact a retaliatory clause by the Congress would be an invitation to Canada to impose an export duty when no such export duty is imposed under present conditions.

Mr. LODGE. A retaliatory clause exists now, does it not?

Mr. ROBINSON. I am not sure about that.

Mr. WALSH of Montana. There is now in the law a provision retaliatory in character, but there has been no occasion for its operation. It might just as well not be there.

Mr. ROBINSON. What is the present retaliatory provision?

Mr. WALSH of Montana. It is practically the same as that found in the pending bill.

Mr. LODGE. I think I am correct in saying that the Senator from Alabama [Mr. UNDERWOOD], who is not here at this moment, when he introduced the joint resolution in regard to this matter with a view of getting free newsprint paper, provided in it for a retaliatory clause, which I think is what assures our getting newsprint at the lowest possible price from Canada, and which is what I supposed we wished to attain. It is true that Canada has not a duty now. That may be owing to the existence of a retaliatory clause.

Mr. ROBINSON. Yes; if a retaliatory clause is in force now——

Mr. LODGE. It may be that their people desire to sell us newsprint at the lowest possible price, and that they would not put on an export duty, but I do not feel perfect confidence that they will not seek to get revenue wherever they can.

Mr. ROBINSON. In any event, Mr. President, the amendment proposed by the Senator from Nevada, from the standpoint of those who favor free newsprint and wood pulp, is an improvement over the present provision.

Mr. LODGE. It takes out the additional duty, but I think in taking off the retaliatory clause we run a serious risk, because, while I suppose it may be considered a very reactionary remark, if a duty is to be paid on newsprint, I think it might as well be paid here as to Canada. I want to see newsprint and wood pulp, as we put them, on the free list, without any duty either in Canada or here, so that our users of those products will get them at the lowest possible price.

Mr. ROBINSON. So do I. At the same time it would not tend to decrease the price of newsprint paper or wood pulp to add an import duty to an export duty.

Mr. LODGE. I do not think that is necessary.

Mr. ROBINSON. That is what the retaliatory clause provides.

Mr. LODGE. It retains that.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment proposed by the Senator from Nevada.

Mr. WALSH of Montana. I move as a substitute for the amendment offered by the Senator that the proviso in paragraph 1610 be stricken out, and for the other amendment that the proviso in paragraph 1659 be stricken out. I ask unanimous consent that both these amendments may be voted on as one.

The PRESIDENT pro tempore. Is there objection. The Chair hears none, and the amendments to the proposed amendment will be voted upon as a single amendment.

Mr. ODDIE. What is the vote now to be taken on?

The PRESIDENT pro tempore. The Senator from Montana has offered two amendments to the original text of the bill as it passed the House, and those are the amendments now pending, which the Secretary will state.

The ASSISTANT SECRETARY. It is proposed to strike out the provisos in paragraphs 1610 and 1659.

Mr. McCUMBER. Mr. President, I think we can well accept that.

The PRESIDENT pro tempore. The question is upon the amendment.

The amendment was agreed to.

The PRESIDENT pro tempore. The question now is upon the amendments proposed by the Senator from Nevada.

Mr. McCUMBER. That would not be applicable now, and I assume the Senator from Nevada would withdraw it.

Mr. ODDIE. Now that those two provisos have been stricken out, I withdraw my amendments. This applies to both sections, as I understand it.

Now I offer an amendment to paragraph 1659. In line 15, page 233, after the word "paper," I move to add the words "including rotogravure paper."

The PRESIDENT pro tempore. The Secretary will state the amendment.

The ASSISTANT SECRETARY. In paragraph 1659, page 233, all that is left of that paragraph are the words "standard newsprint paper." After the word "paper" it is proposed to insert a comma and the words "including rotogravure paper."

Mr. SMOOT. Does the Senator want to speak on the amendment?

Mr. ODDIE. I will state on the amendment that the total newsprint paper production in the United States, as I understand it, is less than 70 per cent of the amount required for domestic consumption and that Canada supplies about 95 per cent of what we import. This rotogravure paper, as is well

known, is used in all Sunday editions of the newspapers throughout the country, and I think it can be very easily included in the term "standard newsprint paper."

Mr. SMOOT. Mr. President, I do not think the amendment ought to be agreed to. Rotogravure paper is one of the high standards of paper. Why should we take that out of the paper schedule and put it over here? The only reason the Senator assigns is that it is because the newspapers use it for their Sunday issues. We might just as well take all of the other paper out of the paper schedule as to take out this high standard paper.

I think the Senator makes a mistake in offering an amendment to put that particular kind of paper on the free list. There is no comparison between the cost of making it and the cost of making newsprint paper. The making of that paper might be compared with the making of some of the highest priced paper found in the paper schedule. In fact, it is more costly than some of the lower grade writing papers.

The rates in the paper schedule of the bill are almost the same as the rates in the existing law. This is one of the schedules where the rates are very low. In fact, in one or two cases the rates are lower than those in existing law. I hope the amendment will not be agreed to.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment offered by the Senator from Nevada [Mr. ODDIE].

The amendment was rejected.

Mr. PHIPPS. Mr. President, I send to the desk an amendment, which I offer, and ask that it be reported.

The PRESIDENT pro tempore. The Secretary will read the amendment.

The ASSISTANT SECRETARY. On page 84, line 21, the Senator from Colorado moves to strike out the whole of paragraph 375 as heretofore amended and to insert in lieu thereof the following:

PAR. 375. Metallic magnesium: Crude, ingots, magnesium alloys and scrap, 10 cents per pound; in coils, plates, sheets, bars, rods, circles, disks, blanks, strips, rectangles, squares, and other unfinished forms, 20 cents per pound on the metallic magnesium content; ribbons, tubing, wire, powder, and all other finished articles, 40 cents per pound on the metallic magnesium content and 25 per cent ad valorem.

Mr. PHIPPS. Mr. President, I wish to say, briefly, that metallic magnesium is a substance lighter than aluminum and has greater strength. It has been found very useful in automobile and airplane construction. Its uses have been developed during the last few years and particularly during and since the late war.

The paragraph as it stands in the bill, having been amended as in Committee of the Whole, does not, to my mind, give a proper differential as between the crude, the semifinished, and the finished forms of this material. For that reason I have proposed this amendment.

The material is made by an electrical process. It may be made by two or three different processes, two of which I believe are patented. The material is one which can be generally introduced in the United States. It is now very largely used in Germany, where it is most largely produced, and, to a great extent, it supplements the uses of aluminum. As I have stated, it has greater strength and is of less specific gravity, being only about two-thirds the weight of aluminum.

The Senate has, on the advice of the Senate Committee on Finance, made reductions in the rates originally adopted by the House, which rates really would have amounted to an embargo.

The suggestion of this amendment is that the crude material shall come in at the rate of 10 cents per pound instead of 40 cents; that the semifinished forms take a rate of 20 cents, and that the highly finished forms pay a duty of 40 cents per pound and 25 per cent ad valorem.

Inasmuch as the Senate is already in disagreement with the House over this schedule, I suggest that at the same time, by simply adopting this amendment, the matter would be brought to the attention of the conferees, who could agree upon a rate in conference. I ask for a vote.

Mr. SMOOT. Mr. President, metallic magnesium is a new product. It has not been made in this country very long, and it is true that it is a very light metallic substance, even lighter than aluminum. It is very much stronger than aluminum, and there is a great opening for the use of it in the future. In fact, the manufacture of it has begun in this country already.

The House placed a duty upon the scrap and metallic magnesium of $1 a pound. The committee cut that rate to 50 cents a pound, and on further consideration, after a report made by a member of the Tariff Commission, it cut it to 40 cents a pound. It also cut the manufactures of magnesium, not provided for, from $1 a pound to 50 cents a pound, with a 20 per cent ad valorem.

The amendment of the Senator from Colorado means this: That the metallic magnesium shall be cut from 40 cents a pound to 10 cents a pound, and that in coils, plates, sheets, rods, bars, squares, disks, blanks, and strips it shall bear a rate of duty of 20 cents a pound, and on the ribbons, tubings, wire, and all finished articles 40 cents a pound and 25 per cent ad valorem.

That means that on the finished article the rate is increased a little in the Senator's amendment, but the rate on metallic magnesium itself has been decreased from 40 cents a pound to 10 cents a pound.

Mr. KELLOGG. Mr. President, does the Senator say that the rate is increased on the manufactured product?

Mr. SMOOT. Yes; it is 40 cents a pound and 25 per cent ad valorem. The Senate has agreed to 40 cents a pound and 20 per cent ad valorem on the manufactured article.

Mr. PHIPPS. Mr. President, I want to state that the amendment as I have submitted it was prepared under the advice of those who are supposed to be well informed, and their recommendation was accepted on the assurance that that was the scientific adjustment of this schedule, unless it were proposed to prevent the importation of the crude material, so that it might be manufactured here to advantage.

Mr. SMOOT. All I can say is that the members of the Tariff Commission who have this in charge were very much interested in this newly discovered product, and it was upon their recommendation first that the rate of $1 a pound was cut to 50 cents a pound, and then after further investigation they recommended that that be cut to 40 cents a pound. They gave the quotations not only in this country but in Germany and the cost of delivering it in this country; and if the information given to the Senate committee was correct, then they were entitled to the 40 cents a pound. But now it is proposed to reduce the rate of 40 cents a pound to 10 cents a pound, and the rate on the finished article is to be increased.

Mr. KELLOGG. Mr. President, will the Senator yield?

Mr. SMOOT. I yield.

Mr. KELLOGG. Did I understand the Senator to say that the increase on the finished article in the item was from 20 to 25 per cent ad valorem?

Mr. SMOOT. The way the Senate finally agreed to the item of manufactures of magnesium not specially provided for was 40 cents a pound and 20 per cent ad valorem.

Mr. KELLOGG. I ask the Senator from Colorado if he would accept an amendment making that 20 per cent instead of 25?

Mr. PHIPPS. I am quite willing to accept an amendment reducing the ad valorem rate back to 20 per cent.

Mr. KELLOGG. I move that "25" be stricken out in the seventh line of the Senator's amendment and "20" inserted.

Mr. PHIPPS. I accept that so far as I have the right to do so. I believe I have the right to modify my amendment, and I do so to that extent.

Mr. McCUMBER. Mr. President, I would like really to understand the amendment. It looks upon the face of it as though somebody wants to get the crude material in here—I mean by the crude material not the ore but the product of magnesium—at a much lower rate, and then manufacture it here, so that the parties interested would seem to be only those interested in the manufacture and not interested in the production. Am I right?

Mr. PHIPPS. I do not think entirely so. I think if the Senator and I were to consider engaging in business to-morrow we would want to know first whether there was a demand and a market for the finished product before we went to the extent of erecting a finishing plant, which would involve the expenditure of a large amount of money. The people who are interested and desirous of entering into the manufacture in this country of all the different finished forms wish to demonstrate first that there is a market and a demand for those finished forms. If that proves to be the fact, their intention is to manufacture the crude material themselves.

It appeals to me as being the best method of bringing about a general use of this very high grade product in the United States by enabling those who are willing to manufacture and distribute it to have the crude material upon which to work, instead of being compelled to start in at the first and install expensive plants, particularly without knowing that there is a sufficient demand for the finished product to justify the expenditure.

I suggest, the matter being already in disagreement, that the committee could well accept this amendment and determine upon the rate in conference.

Mr. McCUMBER. The Senator thinks 40 per cent is too high a rate on the metallic magnesium and he wishes to reduce it to 10 cents per pound?

Mr. PHIPPS. Yes; in the crudest form and 20 cents in that form in which it has reached the second stage and has had labor expended upon it.

Mr. McCUMBER. I have no objection. It can go into conference in that way.

The PRESIDING OFFICER (Mr. McNARY in the chair). Has the Senator from Colorado accepted any modification to his amendment?

Mr. PHIPPS. I have accepted a modification changing 25 to 20 per cent ad valorem in the last clause.

Mr. SIMMONS. Mr. President, I do not wish to discuss the paragraph, but I am entirely satisfied from information which has come to me that the rates are altogether too high. I have here a small brief, consisting of three and one-half pages in large type, which I am going to ask that the Secretary may read in my time.

The PRESIDING OFFICER. Without objection, the Secretary will read as requested.

The Assistant Secretary read as follows:

BRIEF SUBMITTED IN OPPOSITION TO RATE PROPOSED ON METALLIC MAGNESIUM AND ITS ALLOYS.

(Schedule 3—Paragraph 375.)

By committee amendment the Senate on June 24 fixed a rate of 40 cents per pound on metallic magnesium, or on the magnesium content of its alloys. This rate was adopted subject to further consideration, and it should be reduced because—

1. It constitutes an embargo on a metal necessary to American industry.

2. It is a subsidy which will perpetuate a monopoly in the light-metal field.

THE RATE IS AN EMBARGO.

A clerk to the Ways and Means Committee in the House stated to the writer that an embargo was intended and that all foreign metal was to be excluded.

Mr. Tyler, of the Tariff Commission (whose investigations are shown in the Reynolds report), stated to a Senator in the writer's presence that the 50-cent rate originally recommended by the Senate committee would effect an embargo, and the same expert stated in reply to a direct question that he would not deny that a 25-cent rate would effect an embargo.

Even in respect of dyes and chemicals, the Senate has declared that it will not grant any embargo despite the argument that the war preparations of the Government required it.

Certainly an embargo which will work for the benefit of the Aluminum Co. of America will not receive Senate approval.

THE SENATE RATE IS WHOLLY UNSCIENTIFIC.

A specific duty is imposed on crude and finished forms without distinction. This is wrong in principle.

It is obvious that the crude ingots and semifinished metal should come in at a nominal duty, since their import will supply work for American labor.

There is no justification for taxing finished and crude material at the same rate.

THE PRESENT RATE IS FOUR TIMES THE PROTECTION ASKED BY AN AMERICAN MANUFACTURER.

In the hearings before the House (Part I, Tariff Hearings, p. 22), Dow Chemical Co. asks only 10 cents per pound and 15 per cent ad valorem.

It naturally is satisfied with a duty which is four times what it asked for. But what excuse can there be for a tariff rate of 40 cents when a manufacturer says that only 10 cents is needed?

Unless this rate has been suggested by the Aluminum Co. of America, through the American Magnesium Corporation, which it controls, and figures are furnished which are not a matter of public record, there is no support for the present rate.

THE METAL COMPETES WITH ALUMINUM.

Metallic magnesium weighs only two-thirds of aluminum, one-fifth of copper, and one-fourth of steel. Its strength and machining advantages are extraordinary. In strength, weight, and texture it is superior to aluminum and will largely displace aluminum in the aircraft and motor field. Proof can be supplied that it is being sold and has been sold in Germany in competition with aluminum.

The Aluminum Co. of America wants to maintain its monopoly in the light metal field and so, through its controlled company, the American Magnesium Corporation, it is trying to get the Senate to approve an embargo on this foreign metal.

THE COST OF THE METAL.

In Germany the metal costs less than aluminum. In 1921 over 2 tons were imported by steamship *Oregonian* and cleared through the New York customhouse on October 5. The metal was partly crude and partly semifinished and the foreign cost was less than 38 cents per pound.

By reason of improvements in manufacture large lots can now be purchased at less than 15 cents a pound.

Under date May 25, 1922, by steamship *Hansa*, of United American Lines, a shipment was made at Hamburg for New York, arriving in June. The total shipment was about 300 pounds and consisted of ingots, rods, sheets, and tubes. The actual foreign cost for ingots was less than 15 cents and for semifinished and ingots together the average cost was less than 20 cents.

Yet it is proposed to tax a metal which can be produced at these figures more than twice the cost of production as a specific duty and to add an ad valorem besides.

THE RATE IS A SUBSIDY TO A MONOPOLY.

As shown above, the metal in price and use competes with aluminum. The American Magnesium Corporation (controlled by the Aluminum Co. of America) wants an embargo and has secured it in the 40-cent rate. This embargo will give the Aluminum Co. of America a further monopoly in the light-metal field, adding to its already huge profits at the expense of American industry. Worse than that, it will exclude from American industry a very valuable metal.

SUGGESTED RATES.	Cents.
Crude blocks and casting ingots	5
Semifinished castings, rods, sheets, and tubes	7
Finished products	10

No American producer offers for sale any crude blocks or casting ingots; no semifinished material such as rods, sheets, and tubes; and no finished products except pistons in small quantities.

No American industry can be affected therefore by a low duty on crude and semifinished forms of the metal.

The suggested specific duty on finished forms is exactly the rate requested by the piston manufacturer.

JAMES A. DELEHANTY.

The PRESIDING OFFICER. The question is upon agreeing to the amendment of the Senator from Colorado as modified.

The amendment as modified was agreed to.

Mr. DIAL. Mr. President, I desire to offer the amendment which I send to the desk.

The PRESIDING OFFICER. The amendment will be reported.

The READING CLERK. On page 131, after line 20, insert the following:

That the second subdivision of section 5 of the United States cotton futures act, approved August 11, 1916, as amended, is amended to read as follows:

"Second. (a) Specify as the class of the contract one of the following classes:

"Class A, which shall include only middling fair, strict good middling, good middling, and strict middling grades;

"Class B, which shall include only strict middling, middling, strict low middling, and good middling yellow tinged grades;

"Class C, which shall include only strict low middling, low middling, strict middling yellow tinged, and good middling yellow stained grades.

"(b) Specify the basis grade for the cotton involved in the contract, which shall be one of the grades for which standards are established by the Secretary of Agriculture, and which shall be one of the grades included within a class in paragraph (a) of this subdivision; the price per pound at which the cotton of such basis grade is contracted to be bought or sold; the date when the purchase or sale was made; and the month or months in which the contract is to be fulfilled or settled.

"(c) If no other class is specified in the contract, or in the memorandum evidencing the same, the contract shall be deemed a class B contract.

"(d) If no other basis grade be specified in the contract, or in the memorandum evidencing the same, good middling shall be deemed the basis grade incorporated into a class A contract, middling shall be deemed the basis grade incorporated into a class B contract, and low middling shall be deemed the basis grade incorporated into a class C contract."

SEC. 2. That the third subdivision of section 5 of such act is amended to read as follows:

"Third. Provide that the cotton dealt with therein or delivered thereunder shall be of or within the grades for which standards are established by the Secretary of Agriculture, and of or within the grades included within the class so specified or incorporated as the class of the contract, and that cotton of any other grade or grades shall not be dealt with therein nor delivered thereunder."

SEC. 3. That the fifth subdivision of section 5 of such act, as amended, is amended to read as follows:

"Fifth. Provide that cotton that, because of the presence of extraneous matter of any character, or irregularities or defects, is reduced in value below that of strict middling in the case of a class A contract, strict low middling in the case of a class B contract, or low middling in the case of a class C contract, the grades mentioned being of the official cotton standards of the United States, or cotton that is less than seven-eighths of an inch in length of staple, or cotton of perished staple or of immature staple, or cotton that is 'gin cut' or reginned, or cotton that is 'repacked' or 'false packed' or 'mixed packed' or 'water packed,' shall not be delivered on, under, or in settlement of such contract."

SEC. 4. That the second paragraph of the seventh subdivision of section 5 of such act, as amended, is amended to read as follows:

"The provisions of the third, fourth, fifth, sixth, and seventh subdivisions of this section shall be deemed fully incorporated into any such contract if there be written or printed thereon, or on the memorandum evidencing the same, at or prior to the time the same is signed, the phrase 'subject to United States cotton futures act, section 5, class A,' if the contract is a class A contract, or the phrase 'subject to United States cotton futures act, section 5, class B,' if the contract is a class B contract, or the phrase 'subject to United States cotton futures act, section 5, class C,' if the contract is a class C contract."

SEC. 5. That the provisions of this act shall be effective on and after the thirtieth day after its passage, but such provisions shall not be construed as applicable to nor as affecting any right, power, privilege, or immunity under any contract entered into prior to such day.

Mr. DIAL. Mr. President, it will be seen that this amendment does not interfere with the pending bill at all. It merely seeks to add certain provisions to the bill without interfering with any of the rates which are proposed to be imposed by the bill. I should have preferred to have brought this measure before the Senate in the form of a separate bill, but on account of the session drawing to a close, and because the present crop of cotton is being put on the market. I desire, if possible, to obtain some legislation at this session. That is the reason why I now offer the amendment to the pending bill.

Moreover, it is appropriate that I should offer the amendment to this bill, because this is a revenue bill, and the cotton future contract law is a revenue law. For a long time it was doubted whether or not Congress had jurisdiction over the subject matter involved in that law, but eventually it was decided that Congress could take jurisdiction over it under the interstate

commerce clause or under the post office clause or under the taxing power of the Constitution. The taxing power is the power under which Congress assumed jurisdiction over the subject, and the existing law was passed on that basis. This amendment is proposed really as an amendment to that law, under which revenue is raised.

Mr. President, it is not necessary for Senators to follow the details of the amendment. I shall undertake briefly to point out the ills of the present future cotton contract law. My contention is that the prices of the "future" market control the prices of the "spot" market for cotton. Therefore it is essential that the "future" contracts be honest, equal, equitable, and mutual contracts, which now they are not. It took Congress 30 years to pass the present law. I say that, too, to the shame of Congress. The people of the section of the country where cotton is raised have been deprived of a large proportion of its value from the time the exchanges were inaugurated down until the present moment.

In 1884 bills were introduced in Congress, and they were pressed from that time down to 1914 before the present law was passed. The present law is a considerable improvement over the former practice. Under that practice all cotton contracts were sold, as they are now sold, on the basis of what is called "middling"—that is, cotton of a middling grade—and under that former practice the seller of the contract had a right to deliver any one of 32 grades of cotton embraced in the contract. The present law has annulled that practice, and so changed it that the number of grades of cotton, any one of which is tenderable on a "future contract," has been reduced to 10. But, Mr. President, right there is where the trouble comes. The seller of the contract sells it on the basis of "middling" cotton. There are 10 grades only which are allowed to be dealt in by law. All the grades have some differences, as Senators know. One sells a contract on the basis of "middling," but when the delivery date comes the seller has a right to deliver all of the quantity in one, any, or all of the 10 grades as he sees proper. It is the same as selling by sample and being allowed to deliver some other quality at an adjusted price. There is no similar practice followed elsewhere in the world; there is no such law in any other country in the world. The fault is not so much, however, with contracts as the working and the effect the contracts have upon the price of "spot" cotton. When the delivery date of the contract arrives, the purchaser, not knowing what he may get, almost universally sells out his contract. The cotton market is, therefore, made top-heavy. There will be continuous sales.

It will be said that there can not be a sale without a purchaser. That is true, but the purchaser will not give value for the commodity represented in the contract when he knows that he has no option of selection; that the seller of the contract has 10 options to his none.

It is true, Mr. President, that all these 10 grades of cotton are good, strong, sound, spinnable cotton; but they are not suitable for the different mills making different kinds of thread and different kinds of cloth. The mills which have fine machinery and make a fine cloth want a fine grade of cotton, while the mills making coarse goods desire a coarse grade of cotton. That is where the trouble comes in. No man will buy that contract at value.

Mr. President, the great difficulty that arises in my section of the country is that the manipulation of the contract fixes the price of the "spot" cotton. Not in 1 per cent of the cotton that is grown does the owner deal in contracts. He knows nothing about them, but when the quotation comes out on the contract that quotation fixes the price of his "spot" cotton, and he has to sell it accordingly.

As I have already said, no such custom prevails anywhere in the world with respect to any other commodity, nor is there any law in any other country in the world under which a basic commodity may be hawked around in any such fashion. The Congress of the United States is arrayed on the side of the bears—not intentionally so, of course, but the effect is just the same, so far as the producer of the cotton is concerned, as if every Member of Congress tried to depress the price of cotton.

I have been here for the last three months listening to speeches on the tariff bill; I have heard word pictures drawn of the plight of the poor people of the world; I have heard Senators explain how they are trying to take care of the laboring people of this country. Some time ago I introduced in the RECORD a report from the joint committee of Congress which showed that the growers of cotton in an average year, with an average crop, securing a price of 18 cents a pound, which is way above the average, only earn 10 cents a day. That is not my calculation; that is the calculation of a joint committee of Congress which I had placed in the RECORD, as I have said some time ago.

I wish to say to my friends in the Senate that this amendment has no politics in it. It simply represents an effort to take care of about 25,000,000 working people in this country, to bring the commodity which they produce up to a reasonable price, a price under which they can make a living. With all due respect to everybody, the present law on the subject has always been wrong.

The principle of allowing the seller of the contract to select all of the quantity in any of the 10 grades is totally wrong. It may be said that I brought no witnesses before the Agricultural Committee, and that is true, but I did not need any witnesses before the Agricultural Committee. I am speaking of a principle. If 10 shirts were to be put in a box and a man went into a store and asked to buy one shirt and the seller should tell him that he, the seller, had a right to deliver any kind of shirt out of the 10 that he wanted, the purchaser would not pay as much for the shirt as he would if he knew what kind of a shirt he was going to get.

It is preposterous that the Government should allow people to sell cotton which they have not, to sell more cotton than there is in existence, to sell more cotton even than there will be in existence for five years, and then when maturity day comes, if the purchaser of that contract stands up and says, "Give me my cotton," for the law then to step in and say to the seller, "You have a right to deliver to him any one of the 10 grades you see proper or mix them as you please." Apply that principle to shirts, apply it to shoes, apply it to automobiles, to mules, or to furniture or anything else, and it will be realized how it will depreciate the price of the commodity.

It is enough to bankrupt any country, and, Mr. President, if God had not blessed our section with a climate and a soil and a rainfall and the best people on earth that He had we would all have been in the poorhouse before now.

Now we have come to the parting of the ways. It is absolutely a physical impossibility for us to continue to grow cotton with any such law on the statute books. I appeal to every Member of the Senate to think of the principle and to give us relief. I do not ask Senators for any favors for the farmer. I am no hot-air artist; I am not here hollering their poverty with a view of getting any sympathy; I do not ask for sympathy, but I do ask and I demand that Congress pass a just, honest, fair, equal, and mutual law. No one should deny the growers this; we ask nothing more.

In 1920 on the New York and New Orleans exchanges alone there were sold over 128,000,000 bales of cotton, although in that year we produced in the United States only 13,342,000 bales, so that something like nine times more cotton was sold than there was raised during that whole year, and there were delivered on contract about 400,000 bales only.

Mr. President, we are taught that overproduction decreases the price of a commodity. It does not take any Solomon to understand that. Take the supply of eggs in a little town, or the supply of chickens or of watermelons or of anything else, if more of those commodities are raised than can be consumed, more than there is a demand for, then the price will be depreciated. When people are allowed to sell on the exchanges the unheard-of quantity of cotton which I have mentioned it is presumed that they have the cotton behind the contracts, and, of course, it depresses the price. The same results follow as in overproduction. The only wonder is that the price is not pushed clear out of existence. I talked with an officer of the Agricultural Department a year or two ago and he admitted that the present law does not function properly, and if anybody will stop a minute to consider he will see that is true.

It may be said that the question is a complicated one. Yes; but so were our A B C's complicated until we learned them. However, it is not really complicated at all; it is simply a question of allowing a man to make a contract giving him an option to deliver 10 qualities under that contract and let him select the quality. Under such circumstances no one will pay for the contract what the commodity is worth. The quotations on the exchanges are taken and the actual cotton is acquired on those spurious quotations. Those contracts can not be converted into any particular one of the ten grades of the selection of the purchaser, hence they are not worth what they claim to be. I mean to say a contract for a commodity ought to be converted into that identical commodity—a particular kind; definite kind. The quality to be delivered being uncertain, the contract will only be purchased at a discount, and the quotation fixes the price of spot cotton. The price of the spot cotton is too low by reason of this method of dealing.

The exchanges, I think, perhaps serve a very good purpose, since we export about half the cotton we make. I have no fault to find with them, but my complaint is with Congress, not, of course, that Congress has intended to do wrong, but I complain of the indifference of Congress. It is inexcusable. The proposal which I have presented is worth more to the people of my section than all the other laws we could pass put together. It would increase the price of cotton, stabilize it, prevent wild fluctuations, and so forth.

I should like to inquire why a system is permitted to continue under which the price of cotton is allowed to fluctuate so rapidly, going up one day and down the next. I am told that yesterday and to-day the price of cotton has fluctuated about $8.50 a bale in those two days alone. We can not stabilize the manufacturing of cotton; the banks do not know what to do; the producers do not know what to borrow in order to make their crops under any such system as now exists. The producers do not know when to sell.

Briefly, I desire to quote what a member of the New York Cotton Exchange, Mr. Harris, said some time ago:

> Now, I have been in the cotton business about 23 years, 17 years of which time I have been in the business for my own account. Prior to the passage of the Smith-Lever bill, of course, you might say there were no regulations as to the grades or classification or anything else. The New York market was almost constantly used by two or three of the big houses for manipulation purposes, and they were really slaughtering the lambs, both the exporters and the local merchants and everybody.

That is what a member of the exchange said at that time, and they have done no better since.

Mr. President, all I seek to do by my amendment is to classify the different grades of cotton constituting class A, the high-grade cotton, and to provide that under each contract one-third of the contract must be filled in that basic grade and the other two-thirds must be filled either in that basic grade or in the other grades mentioned of that class. Likewise with middle-grade cotton and low-grade cotton. If that can be done, the contract will be made definite; it will be made definite enough to be practical, and it will be made elastic enough to be traded in. We will not run honest people out of the business either on the exchanges or elsewhere, but we do need some legislation in order to protect and preserve the agricultural interests of my section of the country, which are deprived of hundreds of millions of dollars every year because of the present system. The time will soon come when the mills will have to shut down for want of production of cotton, and I hope our people will not plant another seed until Congress changes the law.

Mr. SIMMONS obtained the floor.

Mr. McCUMBER. Mr. President——

The PRESIDENT pro tempore. Does the Senator from North Carolina yield to the Senator from North Dakota?

Mr. SIMMONS. I yield to the Senator from North Dakota. I was only going to occupy a minute, however.

Mr. McCUMBER. I was simply going to make a very brief statement upon the proposition of putting into this bill the bill offered by the Senator from South Carolina.

Mr. SIMMONS. That was the purpose for which I rose, but I yield to the Senator.

Mr. McCUMBER. Mr. President, I want to say just a word, if the Senator will allow me, on behalf of the committee.

While I am in sympathy with the good purposes of the amendment offered by the Senator from South Carolina—which, I understand, is aimed at gambling in futures on cotton—I appreciate the fact that I know very little about the subject myself, and perhaps my sentiment is governed by my prejudice against gambling. I know so little about the matter that it seems to me at first glance that it ought not to be attached to a tariff bill, but if I were certain that all of the Senators from the cotton-growing States were agreeable to it and that the Senator from South Carolina [Mr. DIAL] and the Senator from Louisiana [Mr. RANSDELL] were in exact accord in the matter I do not know that I would offer any serious objection to having it placed upon the bill and go to conference. I do not, however, want to put it upon the bill if there is any serious conflict on the other side of the Chamber concerning its merits.

Mr. UNDERWOOD. Mr. President, I rise to say that I am in favor——

Mr. SIMMONS. Mr. President, I had the floor.

Mr. UNDERWOOD. I beg the Senator's pardon; I did not know that. I yield to the Senator if he desires to speak first.

Mr. SIMMONS. No; I yield to the Senator from Alabama. I am in no hurry, and I hope this matter may be cleared up before I have to say anything.

Mr. UNDERWOOD. I do not want to take the Senator's time.

Mr. SIMMONS. Go ahead; I yield to the Senator.

Mr. RANSDELL. Mr. President, will the Senator permit me, as the Senator designated by the Agricultural Committee to make an adverse report on this very bill, to say just this much: This identical measure——

Mr. UNDERWOOD. I do not want this to come out of my time.

Mr. RANSDELL. All right.

Mr. UNDERWOOD. I will yield to the Senator.

The PRESIDENT pro tempore. The Senator from Alabama has the floor.

Mr. UNDERWOOD. I yield the floor.

Mr. SIMMONS. Mr. President, I had the floor, and yielded to the Senator from Alabama.

The PRESIDENT pro tempore. Does the Senator from North Carolina yield the floor?

Mr. SIMMONS. I yield to both Senators.

Mr. RANSDELL. Will the Senator from North Carolina yield to me to make a statement before he makes his?

Mr. SIMMONS. Yes; I yield.

The PRESIDENT pro tempore. The Senator from Louisiana has the floor.

Mr. RANSDELL. Mr. President and Senators, I want only one moment to say that the identical amendment offered by the Senator from South Carolina was submitted to the Senate Committee on Agriculture and Forestry, was examined by a subcommittee of that body, a great deal of testimony was taken, not a single witness testified in favor of this proposition except the Senator from South Carolina himself, and a unanimous adverse report was made on the bill, which I hold in my hand.

The matter is one of the greatest importance. We discussed this measure very fully several years ago, when we passed what was known as the Smith-Lever cotton futures act. We made several amendments to the cotton futures act at that time. It is going to require prolonged debate to make another change in this act, and it certainly has no place in this tariff measure when we can not discuss it adequately.

There are several Senators from the Southern States on the Agricultural Committee, and the adverse report on this identical measure introduced by the Senator from South Carolina was a unanimous one.

Mr. DIAL. Mr. President, will the Senator let me ask him a question?

Mr. RANSDELL. I shall be delighted to have the Senator do so.

Mr. DIAL. How long did the Agricultural Committee pigeonhole that amendment?

Mr. RANSDELL. It never pigeonholed it at all.

Mr. DIAL. How long did the committee have it?

Mr. RANSDELL. The Senator introduced the bill some time last year, and he introduced another bill, if I recall correctly, in February of this year, and the Agricultural Committee had a number of hearings on it. We did not work with a great deal of expedition but we did about as fast work as we do usually in the Senate, I will say.

Mr. DIAL. Not very much.

Mr. RANSDELL. Perhaps not.

Mr. DIAL. The committee kept the bill for over a year, and then did they not report it out at my request?

Mr. RANSDELL. I will state, in reply to the Senator, that the committee were opposed to the legislation. We did not want to report it out at all. We did not care to turn down the Senator so hard; but he insisted upon having some kind of a report, and then we did make a unanimous adverse report against the bill, after very considerable hearings.

That is all I have to say.

Mr. SIMMONS. Mr. President, I do not desire to discuss the amendment. I was aware of the fact that there was great diversity of opinion on this side of the Chamber, where almost all of the Senators representing cotton States are, with reference to the wisdom of this legislation. I knew that the colleague of the Senator from South Carolina [Mr. SMITH] probably entertained views adverse to those of the junior Senator from that State; and I rose simply to suggest to the junior Senator from South Carolina that this amendment probably will lead to considerable debate, and we have quite a number of other amendments to be considered, and at 10 o'clock all debate will be closed. I wish the Senator might find it consistent with his views as to his duty in the premises to withdraw his amendment and let us take up this matter in the Senate as a substantive proposition instead of as an amendment to this tariff bill.

Mr. SMITH. Mr. President——

The PRESIDENT pro tempore. Does the Senator from North Carolina yield to the Senator from South Carolina?

Mr. SIMMONS. I do.

Mr. SMITH. If the Senator from North Carolina will allow me, I want to join with him in the request that my colleague allow this matter to come up on its own merits. I will use every power I possess to join with him for the purpose of having it brought up on its own merits and discussed. It has an adverse report; but, as the Senator insists that it shall be discussed, I certainly do not feel that I could do the subject justice in the limited time that is at our disposal now, and discuss adequately so far-reaching and important a subject as legislation looking toward the control of the cotton market.

I want to say in this connection, if the Senator will allow me, that I was a member of the subcommittee, and there was no disposition on my part and I do not know that there was any disposition on the part of any of the members of the committee to pigeonhole or unduly delay the consideration of this matter. The previous bill, the one that this seeks to amend, took from three to four years to be finally put into proper shape to meet the purpose for which we originally introduced the measure.

I thank the Senator for allowing me to make this statement in his time. Perhaps I may say something in my own time later on.

Mr. SIMMONS. Mr. President, I am quite certain that this is a subject which can not be properly discussed under the 15-minute rule, under which we are operating now. It requires considerable explanation in order that the Senate may understand it, and in order that Senators representing the cotton States may understand it sufficiently to have an individual judgment with regard to the matter. I have not heard it discussed. I am not on the Agricultural Committee. I have been busy about other matters, as have been many other Senators from the South, and I have not had time to look into it; and I am certain, from my knowledge of the very great complexity of the question, that it will be impossible for Senators opposing this amendment to present the case in such a way that we may be able to form an intelligent judgment about it in connection with this tariff bill.

I trust very much that the Senator from South Carolina will not press the matter now, first, for the reason that we have not the time to consider a matter of this magnitude in connection with amendments to this bill, and, secondly, because under the 15-minute rule it is utterly impossible for the Senate to get the light upon it that it ought to have in legislating about a serious matter. A mistake about this matter would be disastrous to the cotton-growing States.

The Senator may be entirely right about it, or he may be entirely wrong about it, as his colleague [Mr. SMITH] seems to think; and I should not like to see legislation here under such circumstances of doubt and uncertainty with reference to a question that is vital to a large section of this country.

Mr. DIAL. Mr. President, the bill was before the Agricultural Committee since May of last year, and I insisted on trying to get out some report, and at last I asked that they make an adverse report if they would not make any other. I am answering the Senator from North Carolina, if I am allowed to do so.

Mr. JONES of Washington. Mr. President——

Mr. McCORMICK. Mr. President——

The PRESIDENT pro tempore. The time of the Senator from South Carolina has expired.

Mr. JONES of Washington. Mr. President, in view of the statements on the other side of the Chamber, and because I would not want to vote on the merits of this proposition now, because I know nothing about it, I move to lay the amendment on the table.

Mr. UNDERWOOD. Mr. President, I hope the Senator will not engage in a performance of that kind, because if he does I will guarantee that there will not be much business done in the Senate until 10 o'clock to-night.

Mr. JONES of Washington. Of course, if the Senator from Alabama desires to discuss the amendment, I do not desire to cut off anybody at all.

Mr. UNDERWOOD. I want to make my statement about this matter. I do not agree with my colleagues here. We disagree. They may be right and I may be wrong, but I merely want the time to discuss the amendment briefly.

Mr. JONES of Washington. I do not desire to cut off the Senator at all and I withdraw the motion, Mr. President, although a good many of us have amendments that we would like to have considered that are in order on the bill.

Mr. UNDERWOOD. I do not want to delay it. If the Senator from South Carolina desires to withdraw his amendment, I have not anything further to say; but if it is before the Senate I want to make a statement about it, and, as I understand the Senator, it is before the Senate.

Mr. DIAL. I should like the Senator to make his statement; yes.

Mr. UNDERWOOD. Mr. President, the reason why I support this proposition is because I think action in regard to this question has been too long delayed. There is ample precedent for handling the matter in this way.

When the present law came before the Senate, the then senior Senator from Arkansas, Mr. Clarke, proposed an amendment on this very subject to the tariff bill that was then pending. It was agreed to by the Senate. When the tariff bill went back to the House, the House thought it was of so much importance, although they did not agree to his amendment, that they adopted a substitute. Unfortunately, in the tie-up in Congress the two bodies could not agree, and the matter had to go out; but substantially what was in the substitute was afterwards adopted as what is known as the Smith-Lever bill—I do not say actually, but the same lines of procedure.

Congress has already legislated in reference to wheat, to require that the man who sells the product shall deliver what he sells, and that is the principle involved here. As to the technical details, I may not be as well informed as others, but the difficulty in the cotton situation has been that under the exchanges a man may sell 1,000 bales of a certain grade of cotton and then, under the rules of the exchange, when he comes to deliver it, propose to deliver something else, with an arbitrary difference in price, originally fixed by the exchange, and now fixed by the Agricultural Department.

I have no objection to an exchange. I think it is useful in its way, but if a man proposes to sell a commodity on an exchange, he should be made to deliver what he proposes to sell, as far as it is possible to do so.

I understand that in the cotton business the grades of cotton run so close together that it may be difficult always to deliver the exact grade of cotton which the seller sold. Therefore the Smith-Lever bill limited the amount of deliveries to certain classes or grades of cotton, narrowing the basis of delivery. But even that has worked most disadvantageously to the producers of this commodity, because when the seller sold his 1,000 bales he could still offer to the buyer something he did not want, and it made the exchange an artificial market and not a real and honest market for what was sold. Until you make the exchanges deliver to a spinner, when he buys a contract, what can substantially fill his contract, and be spun in his mill, your exchanges are gambling affairs and are not an honest market.

The reason why I favor the proposal of the junior Senator from South Carolina is that this is an effort to make the man who sells cotton on the exchanges deliver, within a radius of grades, cotton which the buyer orders, if he is an honest spinner, and buys it not for gambling purposes but for use in his mill.

I recognize the fact that it might be better not to consider this question within the limited time at our command, as an amendment to this bill, but I recognize that if it is not considered now it probably will not be considered during this session, and there will be no other opportunity for its consideration. There may be gentlemen on the floor who are wiser than I am as to how the amendment should be drafted. They now have an opportunity to propose their amendments, and if this is not satisfactory, to make it satisfactory. When it goes to conference there will be an opportunity to make it satisfactory if this plan proposed is not satisfactory.

But that does not establish the principle involved, which is that when you sell a bale of cotton on the exchanges of this country it should be an honest sale, with the intention of delivering the goods sold, so that an honest buyer, intending real consumption, can go to the exchange and buy his goods. When you insure that you erect a barrier against the gambler, who sells cotton to reduce prices and not for honest sale, from manipulating the cotton crop. You have done this for wheat; it is nothing new. You have done it for the entire northern section of the country, and there is no reason why you should not do it for a great staple commodity of this country.

I think it is no answer to the proposition pending before the Senate that you do not agree with the technical details. It has been before the Senate so long that men in the Senate know what should be done, and if the proposal of the Senator from South Carolina does not meet the evil—and that is what I am talking about—then let those who have a better plan propose it. But I say that this is no time to withdraw the amendment. This is no time to avoid action, because if you

avoid action now the opportunity will not come at another time this session, and if nobody can propose a better solution of the problem than has the junior Senator from South Carolina, I say that his proposal is entitled to our support and our favorable consideration. That is the reason I propose to vote for the amendment offered by the Senator from South Carolina.

Mr. SMITH. Mr. President, as a matter of course, the time is too limited to discuss this proposition in its fullest details. The Senator from Alabama, of course, has a general knowledge of the manner in which cotton is handled and sold. I think the Senate will agree with me that I have devoted some considerable part of my time since I have been a Member of the Senate to trying to bring about a favorable condition for those who produce cotton.

The Senator has called attention to the fact that grain which is sold is delivered according to the thing that is sold. That is exactly what we have attempted to do in the case of cotton. I had an amendment adopted to an Agricultural appropriation bill appropriating something like $50,000 for the testing of the real intrinsic value of the different grades of cotton, from what is known as good ordinary, the lowest grade, to middling fair, the highest grade. The result of that test, made by the Agricultural Department, is in my possession now. We found that from, say, strict low middling, or from low middling upward, including some of the stains and tinges, there was no difference in the yarn-making, bleaching, and cloth-making qualities of the grades, but the trade have made an arbitrary difference that was detrimental to the producer.

We have been trying to demonstrate that there is not the difference. The present law restricts the number of grades deliverable under the terms of the law to those that would go in even-running lots. That is now the law. So that a man hedging or buying a contract on the New York Cotton Exchange can demand specific fulfillment of his contract and receive grades of cotton which would be assimilable in even-running lots, staple and color being taken into consideration.

The objection I have to my colleague's proposed amendment is principally this, that if you divide the 10 grades we now have into the 3 groups of 3 each and say that you can contract for group A, group B, and group C, it is tantamount to recognizing by legislation that there is a difference in value, and the result would be to counteract the very thing that I have attempted to do and am still working upon—to convince the public and the trade that for yarn making and cloth making in intrinsic value of grades there is practically no difference at all.

Besides that, if a farmer desires to sell his crop on the future market there is not a farmer producing cotton who can come within any one of these specific grades, because the weather and the other conditions which surround the gathering of it will determine what grade of cotton he will get. Therefore, so far as any farmer is concerned, he is not able to sell his cotton on the exchange, where he must specify within three grades the kind of cotton he makes. Under the present law he can tell within a very small percentage and deliver the cotton that he makes.

Mr. DIAL. Mr. President, can the Senator state about what proportion of the crop the farmer sells?

Mr. SMITH. I do not think the amount he sells is considerable. I do not think the amount the cotton mills buy on the exchange is considerable. I think the exchange is used for the purpose of hedging and reflecting the price of the cotton that is bought and sold.

Under the present law the trouble, in my opinion, is not the manner in which we deliver grades, but the law allows unlimited short selling. There is no limit. A man or any combination can go on the exchange and sell any amount of cotton that it sees fit to sell, whether it owns it or not. A man can sell twice the amount of cotton that is made. If we propose to amend this law, it ought to be worked out to restrict short selling and not to attempt to classify the grades which are now deliverable.

The fundamental trouble with the cotton market, as it has been with the grain market, is the privilege of any outsider selling millions and millions of dollars' worth of stuff he does not own, he does not propose to own, and intends to sell on margin, and if, by the weight of his sales, he can depress the market, he is the beneficiary to the extent of that depression.

The thing for us to do is to pass such legislation as will limit the unlimited power of short selling in our grain and cotton exchanges. As to the grades which are deliverable on the contracts as now embodied in the law, any mill can take them; any buyer who wants spot cotton can take them and never lose a penny, for the law provides that when the exchange delivers him the cotton and there is a difference in price or in grades that does not suit the purchaser the Agricultural Department is empowered and directed by law to ascertain what that grade of cotton is worth on the spot market on the day that cotton was delivered.

So there is no possibility of any mill or any individual being delivered cotton he does not want at a price that is not profitable to him, because he would only receive it at the price the trade was giving.

Mr. DIAL. Does not the Senator think that by reason of this method of selling future contracts the spot cotton on that spot market was less than it would have been if it had not been for this method, this mode, this scheme of exchange? That is what I am after, exactly. We are not far apart.

Mr. SMITH. I think that if you had but one grade of cotton and if the country made but one, but you allowed speculators and gamblers outside to sell, and sell without limit, a commodity they did not own and did not pretend to own and did not propose to own, they could depress the market regardless of whether the thing was tenderable or not. So in restricting the number of grades or grouping the number of grades, if any amendment to this bill is to be offered at all it must be worked out to restrict the unlimited short selling in the hands of those who have millions.

I do not feel that it is my duty as a representative of the men who make the cotton, myself a cotton grower, to allow a discrimination in the grades which are now tenderable that is not warranted by the tests made by the Agricultural Department. It is practically recognizing a difference which does not exist, and it makes it possible for them to take one-third of my crop at a minimum and the other two-thirds at such a discount that the average is far below the intrinsic value of all of it together.

It was for that reason that I thought perhaps my colleague's amendment was not just the proper thing, because all the grades that are tenderable now can be spun on any mill—every grade that is tenderable. Therefore why discriminate and make groups when the real facts are that they are all equal? If you want to cure the disease that is ruining the farmer, we should check the inordinate and unlimited short selling by those who do not own either an option, the actual cotton, or the ground that produces the cotton that they propose to sell. There is before the subcommittee now a bill looking toward that very object, and it is that to which we should address ourselves rather than trying to fix arbitrarily certain groups and thereby intimate that they have a difference in value when no difference of value exists.

Mr. ROBINSON. Mr. President, will the Senator yield for a question?

Mr. SMITH. I yield.

Mr. ROBINSON. In the opinion of the senior Senator from South Carolina, would the adoption of the amendment proposed by the junior Senator from South Carolina prevent unlimited contracting in futures where neither party to the contract contemplates actual delivery?

Mr. SMITH. Not a particle. I could sell No. 1, No. 2, or No. 3 ad libitum. There would be no limitation whatever; there would be no more than there is now. So far as delivery is concerned, there is no mill, there is no buyer, so far as I have been advised, who has gone and demanded specific fulfillment under the law as now amended restricting the grades to 10, who has protested against the kind of grades and the price delivered.

Mr. DIAL. Mr. President, will my colleague yield?

Mr. SMITH. Certainly.

Mr. DIAL. Does the Senator think that a man would sell with as much rapidity and to such an extent where he was liable to be called upon to deliver one of three or four grades as he would where he is allowed to deliver any one of 10 grades?

Mr. SMITH. I answer that yes, for this reason: I thought when we restricted the number of grades deliverable from 32 to 10 that it would have a tendency to curtail short selling, because the 10 grades now deliverable can all be used in the mill in an even-running lot.

Mr. DIAL. Does the Senator mean that one mill, with one kind of machinery, making one kind of cloth, can use all 10 grades?

Mr. SMITH. Any mill making any kind of cloth can take the ordinary white cotton, from low middling to strict good middling, and make the same kind of cloth, according to the tests of the Agricultural Department at Danville, Va., and at Clemson College, S. C.

Mr. DIAL. There is much more waste in the off grades.

Mr. SMITH. But we eliminated the off grades.

Mr. SIMMONS. Mr. President, I want to ask the Senator a question if he will allow me.

Mr. SMITH. Certainly.

Mr. SIMMONS. We make very many grades of cotton. I ask him, if he limits the grades, what is going to be the effect upon the grades not tenderable?

Mr. SMITH. It would be the same effect that was produced when the Government issued an order that nothing below middling should be used for governmental purposes. The result was that all the grades below middling were outlawed, while the balance of the cotton did not go up very appreciably. I maintain that those grades of cotton which show an excess of foreign matter in the process of conversion are eliminated from the present tenderable grades. They now eliminate good ordinary, strict good ordinary, the blue, the blues and sandies. They can not be tendered on a contract. Only 10 grades can be tendered, 6 of the white cotton and 4 of the stains and tinges, which every cotton grower knows is just as good, because it is simply where the frost has thrown down the tannin in the boll and has not affected the fiber at all.

It was for that reason I say we should work out and ultimately we must work out some manner of checking this unlimited short selling. It is not a question of the grades which can be delivered. It is the unlimited power to take money and go on the market and sell thousands and thousands of bales that the seller does not own and has no option for and no land to produce.

The PRESIDENT pro tempore. The time of the Senator from South Carolina has expired. The question is on agreeing to the amendment offered by the junior Senator from South Carolina [Mr. DIAL].

Mr. HEFLIN. Mr. President, I have been giving a great deal of thought and study to the cotton question ever since I came to Congress. I helped to work out some regulatory legislation in the House that cut down the grades from 28 to 9 standard grades of cotton. That was beneficial. I helped to pass the present Smith-Lever Act. We sought in that bill to safeguard and felt that we had safeguarded the very thing that is being discussed here this afternoon. I suggested this provision myself, in subdivision 7 of the Smith-Lever Act:

> Seventh. Provide that, in case a dispute arises between the person making the tender and the person receiving the same, as to the classification of any cotton tendered under the contract, either party may refer the question of the true classification of said cotton to the Secretary of Agriculture for determination, and that such dispute shall be referred and determined, and the costs thereof fixed, assessed, collected, and paid in such manner and in accordance with such rules and regulations as may be prescribed by the Secretary of Agriculture.
>
> * * * * * * *
>
> The Secretary of Agriculture is authorized to prescribe rules and regulations for carrying out the purposes of the seventh subdivision of this section, and his findings, upon any dispute referred to him under said seventh subdivision, made after the parties in interest have had an opportunity to be heard by him or such officer, officers, agent, or agents of the Department of Agriculture as he may designate, shall be accepted in the courts of the United States in all suits between such parties, or their privies, as prima facie evidence of the true classification of the cotton involved.
>
> * * * * * * *
>
> SEC. 6a. That no tax shall be levied under this act on any contract of sale mentioned in section 3 hereof if the contract provide that, in case cotton of grade or grades other than the basis grade specified in the contract shall be tendered in performance of the contract, the parties to such contract may agree, at the time of the tender, as to the price of the grade or grades so tendered, and that if they shall not then agree as to such price, then, and in that event, *the buyer of said contract shall have the right to demand the specific fulfillment of such contract by the actual delivery of cotton of the basis grade named therein and at the price specified for such basis grade in said contract*, and if the contract also comply with all the terms and conditions of section 5 hereof not inconsistent with this section: *Provided*, That nothing in this section shall be so construed as to relieve from the tax levied by section 3 of this act any contract in which, or in the settlement of or in respect to which, any device or arrangement whatever is resorted to, or any agreement is made, for the determination or adjustment of the price of the grade or grades tendered other than the basis grade specified in the contract by any "fixed difference" system, or by arbitration, or by any other method not provided for by this act.

Now, Mr. President, we sought to fix it so that the buyer of cotton on the exchange could compel the seller to comply with the contract. I suggested the provision which I have read, that in case of dispute between the buyer and the seller as to cotton tendered on the contract, an appeal would lie by either one of them to the Secretary of Agriculture, where his experts could be called in to see whether or not the cotton tendered was what it was represented to be or in keeping with the contract made. If this is not being done, it ought to be done. If it is not being done, it is the duty of the Secretary of Agriculture to see that it is done.

I am in favor of doing with the law whatever may be necessary to compel the exchanges to deliver to the spinner or other buyer exactly the character of cotton that he buys. I want to make the exchanges helpful agencies in the distribution of the crop. I think that a spinner ought to be able, when he goes upon the exchange and buys cotton for his mill, to have spinnable cotton delivered to him and to have his contract complied with. We thought we had that provision in the law, and I still think we have it; but if the law is not being complied with, I want to do whatever is necessary to compel compliance with its provisions.

I confess that, as I understand it, I am afraid of the amendment of the junior Senator from South Carolina [Mr. DIAL]. I am afraid when the farmer goes into the market place with his cotton, consisting possibly of 5 or 6 or 7 grades of the 10 that we have recognized in the law, that a buyer may come out representing one mill or a set of mills and say, "I will give you, say, 25 cents a pound for this grade and that, but I do not want the other at all." Now, what effect would that have upon the market generally? It would, I fear, outlaw the other or lower grades. It would have the effect of lowering the price on those grades. What occurs now in the open markets of the country? The buyer goes out and says, "You have five or six or seven or eight grades. I will give you so much for this grade, so much for that and the other grade; in other words, I will give you an average price of so much for the whole lot of cotton," and all of it is taken and all of it is consumed. Do we want to put it in the power of any buyer to come into the market place and, after taking off the cream, say, "We do not want the skimmed milk"? That situation would enable the buyer to get the remainder of that lot of cotton at a low price, to the injury of the producer. We sell all of the cotton now that we produce, and it is all being consumed.

I was interested in the test of the tensile strength of cotton that my good friend the senior Senator from South Carolina [Mr. SMITH] had made a few years ago. We all know, and the whole South knows, that the South has never had an abler or better friend of the cotton industry in this Chamber or in the other than he, and none who knows the cotton subject better than he. He had the test made of the difference in the tensile strength of the different grades, and it was shown that the difference between the high and low grades was infinitesimal. What occurred? You could take the cotton of the lower grades and the fiber was practically as good and strong. Possibly it had a little stain on it because of rain, but they have a renovating process and dyeing process that disposes of that. I submit to the Senate to-day that I could take one of those lower grades and dye it red, as they do, or brown or green or black, and weave it into cloth, and no one but an expert could tell the difference between that and cloth made of the higher grade.

If the amendment of the junior Senator from South Carolina prevails I fear that the agent of the spinners who comes out and looks over the farmer's lot of cotton would say, "You have 10 bales; I will buy these three, but I do not want the other seven at any price." That plan could be adopted very easily and it would outlaw three-fourths of the cotton crop. I want the spinners to have a fair deal, and it is our business to protect the man who is toiling to produce that which must clothe the world and who is being fleeced by the exchanges and by some of the spinners through combinations operating on the exchanges.

Mr. DIAL. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Alabama yield to the Senator from South Carolina?

Mr. HEFLIN. I yield to the Senator.

Mr. DIAL. What would be the objection to making the exchanges specify the identical grades in which they are going to trade? What is the objcetion to that?

Mr. HEFLIN. I contend that it is now in the law.

Mr. DIAL. In section 10, but not in section 5.

Mr. HEFLIN. I contend that those provisions are in the law. If they are not in it, let us put them in it. The junior Senator from Arkansas [Mr. CARAWAY] has an amendment pending which proposes some changes to the law that might meet every objection that has been raised.

Mr. DIAL. How does my proposed amendment change the method of buying cotton at the present time? What is there in the law now to make a man buy cotton that he does not want? Is there any difference in it? It does not change that at all.

Mr. HEFLIN. Why does the Senator want his amendment accepted, then?

Mr. DIAL. I want my amendment accepted so that we will make a good contract, a contract that will be worth 100 cents on the dollar, representing the actual cotton. The price of the actual cotton would be raised because it would be brought up to the value of the contract. We are buying under a spurious contract now.

Mr. HEFLIN. Mr. President, I want to say just this in conclusion: I want to do everything that I can to safeguard these contracts and to have the law complied with. I want a fair law. I want it fair to the spinner. I want it fair to the producer. But I am not willing to tie onto the tariff bill this afternoon an amendment that might work ruin to the cotton producers. Here we have two Senators from a Southern State, one of them a large cotton farmer, his interests consisting largely in the cotton-producing business; the other a cotton spinner, one who is largely interested in the cotton-spinning industry. Both sides of the industry are thus represented, and properly so. Both sides of the industry ought to be treated fairly; but I do not want to lug something doubtful into the plan that we have tried to provide for the safe handling of the cotton crop of the United States. I think we ought to have some day set apart when we may discuss this question separate and apart from these other matters.

We Senators from the South ought to want to do, and I think we all do want to do, what is best for the cotton producer. Let us have a time when we may work the matter out. If the amendment of the Senator from South Carolina [Mr. DIAL] is found to be the proper one, let it be adopted; but if it is not the proper one, let us amend the law which we now have and see that the spinner and the producer of cotton both have a fair deal. That is my position upon the matter.

Mr. McCUMBER. Mr. President, I have stated that if all Senators on the other side of the Chamber were absolutely in accord and felt that this was a good amendment I should have no objection to attaching it to the pending tariff bill, even though I consider that it is not pertinent to a bill of this character; but I find that there has been a unanimous report against it by the Committee on Agriculture and Forestry, which is one of the principal committees of the Senate, and that report was made even without a division. Now, to ask the conferees to take the matter up and fight it out in conference, with two or three Senators on this side and two or three Senators from the other side, and then bring in the conference report and have the matter all fought over, seems to me would be a rank injustice. That being the case, Mr. President, I am going to ask a ruling of the Chair on a point of order I shall make. The unanimous-consent agreement, which is still in operation, reads:

It is agreed by unanimous consent that the bill (H. R. 7456) "An act to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes," shall be kept before the Senate until the final vote is reached to the exclusion of all other matters, and the debate shall be confined to the question before the Senate or the bill itself, and no other business or irrelevant question or motion shall be entertained by the Chair unless, after a statement of the question, the unanimous consent of the Senate is given therefor.

I make the point of order that this amendment presents an "irrelevant question," and therefore is excluded from the consideration of the Senate by the unanimous-consent agreement.

Mr. DIAL. Mr. President, if the Senator from North Dakota will allow me, I will say that I think that the matter is germane to the bill, but, as I stated in the beginning, I should prefer to have presented it in a separate measure.

Mr. McCUMBER. Mr. President, my point of order must be decided without debate.

Mr. DIAL. I should like the Senator, if he will agree to it, to allow me to have a day fixed at the next session of Congress when this bill may be made the unfinished business, and I will then withdraw the amendment from the pending bill.

Mr. McCUMBER. Of course I can not agree to fix a day,

Mr. DIAL. I wish to make that request.

Mr. McCUMBER. Does the Senator withdraw the amendment now?

The PRESIDENT pro tempore. Does the Chair understand that the Senator from South Carolina withdraws his amendment?

Mr. DIAL. Yes, Mr. President; in order to expedite matters; but I should like to make a few remarks, covering not over two minutes. I ask unanimous consent to do that.

Mr. McCUMBER. That would not be proper.

The PRESIDENT pro tempore. The Chair is advised that the Senator from South Carolina has one minute of his time remaining.

Mr. DIAL. Mr. President, may I be allowed to speak for one minute?

The PRESIDENT pro tempore. The Senator will be permitted to speak for one minute.

Mr. DIAL. Mr. President, my friend from Alabama [Mr. HEFLIN] talks a great deal about things he does not know anything about. When he tries to put me in the attitude of sinning against the interest of the farmer, he can not do so. He is reckoning without his host.

Mr. HEFLIN. I never said that.

Mr. DIAL. It is not dignified to speak of one's property or of one's wealth; but, Mr. President, I own hundreds of acres of land, and I am as much interested in agriculture as is the Senator from Alabama or any other Senator; and I repudiate any such accusations being made here against me. I also own a modest amount of stock in cotton mills, and I am not ashamed of it.

Mr. HEFLIN. I did not say that.

Mr. DIAL. When the Senator from Alabama gets up here he can do his own talking, but he can not put my position in the RECORD in any way he wishes. The bill which I urge here, even if we did not pass any other bills but appropriation bills, would be worth more to the South than all other legislation put together. Congress could not take up its time better than to pass this bill.

However, I withdraw the amendment now, and I ask that we fix the fifth day after the convening of the next session when the bill which I have proposed as an amendment to the pending bill be made the unfinished business of the Senate.

The PRESIDENT pro tempore. The amendment of the Senator from South Carolina is withdrawn.

Mr. McCORMICK. I offer the amendment which I send to the desk.

Mr. DIAL. I should like to ask that my request be acted upon at this time. I ask unanimous consent.

Mr. McCUMBER. No other matter may come before the Senate at this time.

The PRESIDENT pro tempore. The amendment of the Senator from South Carolina is withdrawn, and there will, therefore, be no ruling on the point of order made by the Senator from North Dakota.

Mr. SIMMONS. Mr. President, I wish to inquire, Does the Chair mean to rule that it is out of order for the Senator from South Carolina to ask unanimous consent that his bill be made the unfinished business at a time in the future?

The PRESIDENT pro tempore. The Chair does not hear the inquiry of the Senator from North Carolina.

Mr. McCUMBER. It would not be in order for the Senator from South Carolina to prefer his request unless by unanimous consent.

Mr. SIMMONS. But the Senator has asked unanimous consent that he may do so.

The PRESIDENT pro tempore. Let the Senate be in order so that the Chair may hear the statements of Senators.

Mr. SIMMONS. I have asked, Is it out of order for the Senator from South Carolina to ask unanimous consent that the bill which he has offered as an amendment to the pending bill shall be made the unfinished business of the Senate on the fifth day after the Senate assembles in regular session in December next?

The PRESIDENT pro tempore. The Chair is of the opinion that it is out of order now to ask that any measure may be made the unfinished business of the Senate.

Mr. DIAL. I never before heard that to ask unanimous consent was out of order.

The PRESIDENT pro tempore. The bill referred to by the Senator from South Carolina may only become the unfinished business through the order of the Senate. The Senator from Illinois [Mr. McCORMICK] offers an amendment which will be stated.

The ASSISTANT SECRETARY. On page 21, paragraph 48, at the end of line 6, it is proposed to strike out the period and insert in lieu thereof a colon and the following proviso:

Provided, That there shall be imposed and paid upon all importations of camphor, natural and synthetic, a duty of 25 per cent ad valorem when it is made to appear to the satisfaction of the President of the United States that manufacturers in the United States are producing 2,000,000 pounds of synthetic camphor per year. The President shall make known this fact by proclamation, and thereafter said rate of duty shall go into effect.

Mr. McCORMICK. Mr. President, the purpose of this amendment is to afford adequate protection to an industry the establishment of which was begun during the World War, but which languishes now by reason of the competition of the Japanese camphor monopoly. Senators know that until recently the Japanese monopoly has been complete and absolute, with the result that the Japanese exporter has control of the market and fixes the price everywhere. In 1910 the price was 45 cents, while 10 years later it was nearly seven times as much.

It was only two or three years ago that the manufacture of synthetic camphor was successfully begun in Germany, where great factories are now engaged in its production. A factory for the same purpose was partially completed in the United States, but the termination of the war promised the destruction of the American industry by reason of the competition of

the Formosan camphor. The industry is important not only to the localities in which the factories are or may be established but to all the turpentine-producing States.

The amendment differs from the run of amendments in that it provides that the ad valorem duty shall not be applied until production in this country has reached considerable proportions. I have called the matter to the attention of the Senator from Utah [Mr. SMOOT], in charge of the chemical schedule, who, I believe, now agrees that the amendment ought to be adopted.

The PRESIDENT pro tempore. The question is on agreeing to the amendment offered by the Senator from Illinois.

Mr. SMOOT. Mr. President, before the war there was not an ounce of synthetic camphor made in the United States, but during the war there was one enterprising gentleman living in St. Louis, the president of the Monsanto Chemical Co., who spent about $500,000 in the erection of a plant for the manufacture of synthetic camphor. As every one knows, Japan controls the camphor market of the world. She fixes the price; she imposes export duties of whatever amount she desires, and, in fact, she can say whether one country shall have camphor and another shall not. That control is gradually being broken down by the manufacture of synthetic camphor.

Germany was the first country to manufacture synthetic camphor, and it was followed by the United States. The plant in this country, however, has been entirely closed, and this amendment is simply to provide that a 25 per cent duty upon camphor shall be imposed when it is demonstrated that there can be manufactured in the United States 2,000,000 pounds of camphor a year, and in the meanwhile the 6-cent rate provided in the bill will go into effect. I see no reason why the amendment should not be adopted and go to conference for consideration.

The PRESIDENT pro tempore. The question is on agreeing to the amendment proposed by the Senator from Illinois.

The amendment was agreed to.

Mr. FRANCE. Mr. President, I desire to offer an amendment which merely makes one of the schedules more specific.

The PRESIDENT pro tempore. The amendment will be stated.

The ASSISTANT SECRETARY. On page 184, in paragraph 1414, on line 13, after the word "thereof," it is proposed to insert:

Garlands, festooning, and Christmas-tree decorations, made wholly or in chief value of tinsel wire, lame or lahn, bullions or metal threads.

Mr. FRANCE. Mr. President, this merely describes more specifically certain articles which should be included in this schedule. The chairman of the committee, I believe, is willing to accept the amendment.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment.

The amendment was agreed to.

Mr. BURSUM. Mr. President, I offer the amendment which I send to the desk.

The PRESIDENT pro tempore. The amendment will be stated.

The ASSISTANT SECRETARY. It is proposed to amend paragraph 25, coal-tar products, lines 17 and 18, on page 10, by striking out the words "50 per cent ad valorem and 7 cents per pound" and inserting in lieu thereof the following:

Seventy-five per cent ad valorem based upon American selling price (as defined in division (f) of section 402, Title IV) of any similar competitive article manufactured or produced in the United States, and 10½ cents per pound. If there be no similar competitive article manufactured or produced in the United States, then the ad valorem rate shall be based upon the foreign value or the export value, whichever is the higher, as defined in pargraphs (a), (b), and (c) of section 402, Title IV. For the purposes of this paragraph any coal-tar products provided for in this act shall be considered similar to or competitive with any imported coal-tar product which accomplishes results substantially equal to those accomplished by the domestic product when used in substantially the same manner: *Provided*, That no duty imposed under this paragraph shall be increased under the provisions of section 315.

Then follow other amendments for other pages.

Mr. BURSUM. The other amendments are to harmonize the other parts of the bill with this one.

The ASSISTANT SECRETARY. It is proposed to amend paragraph 26, on page 11, line 21, by inserting after the figures "1546" the words "all synthetic organic medicinals and chemicals not specially provided for."

Also, amend paragraph 26, line 6, page 12, by striking out, in line 6, the words "60 per centum ad valorem and 7 cents per pound" and substituting in lieu thereof the following:

Ninety per cent ad valorem based upon American selling price (as defined in division (f) of section 402, Title IV) of any similar competitive article manufactured or produced in the United States and 10½ cents per pound. If there be no similar competitive article manufactured or produced in the United States, then the ad valorem rate shall be based upon the foreign value or the export value, whichever is the higher, as defined in paragraphs (a), (b), and (c) of section 402, Title IV.

Also, amend lines 7, 14, and 17, on page 12, by striking out the figure "7" and inserting in lieu thereof the figures "10½."

Also, on page 15, line 16, after the word "impress," add the following:

For the purposes of this paragraph, any coal-tar product provided for, and all synthetic organic medicinals and chemicals not specially provided for, in this act shall be considered similar to or competitive with any imported coal-tar product or any synthetic organic medicinal or chemical not specially provided for, which accomplishes results substantially equal to those accomplished by the domestic product when used in substantially the same manner: *Provided*, That no duty imposed under this paragraph shall be increased under the provisions of section 315.

The PRESIDENT pro tempore. The Chair is of the opinion that certain votes in Committee of the Whole must be reconsidered before the amendment proposed by the Senator from New Mexico can be considered.

Mr. WADSWORTH. I ask unanimous consent that the votes be reconsidered.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and the several votes connected with the amendment proposed by the Senator from New Mexico will be reconsidered.

Mr. JONES of Washington. Mr. President, I should like to make a parliamentary inquiry. Is it understood that this is to be considered as one amendment?

Mr. BURSUM. One amendment; yes.

Mr. JONES of Washington. I just wanted that to be understood.

The PRESIDENT pro tempore. By unanimous consent, the several amendments offered by the Senator from New Mexico will be treated as one amendment and voted upon at the same time.

Mr. SIMMONS. Mr. President, may I ask the Senator whether the general effect of his amendment is to increase the duties on these dyestuffs and to change the present basis of valuation to the American valuation?

Mr. BURSUM. It is.

Mr. SIMMONS. That is the general purpose?

Mr. BURSUM. It is.

Mr. GOODING. Mr. President, will the Senator yield for just a moment?

Mr. BURSUM. Yes.

Mr. GOODING. I send to the desk three amendments, and ask that they may lie on the table. I give notice that I will call them up and ask for separate votes on them when the bill is reported to the Senate.

The PRESIDENT pro tempore. The amendments will be received and lie on the table.

Mr. BURSUM. Mr. President, the serious question confronting the country at this time, which prompted the introduction of this amendment, is whether the dye industry of this country shall be permitted to live, whether it shall be preserved, or whether we will permit it to go on the rocks, and depend upon Germany, as we did prior to the war, for our supply of dyes.

The duties which are provided for under the bill are wholly inadequate. It would be impossible, upon the basis of the cost of production in this country, for the dye industry to continue business with those duties.

I have taken the first four dyes on a list of about 100, comparing the reparation prices of the German dyes with the cost in this country, and I find as follows:

Auramines: German cost, 50 cents. The duty accorded in the present bill is 60 per cent plus 7 cents, which would amount to 37 cents. Total landed cost of German dyes laid down in this country, 87 cents. American price, $1.50.

Naphthol yellow S: German cost, including duty, 32.7 cents; American cost, $1.75.

Chrysophenine G: German cost, together with duty, 29.4 cents; American cost, 90 cents.

Metanil yellow: Laid-down German cost, 44.8 cents; American cost, 90 cents.

Sulphur yellows, sulphur greens, and sulphur violets: Laid-down German cost, together with duty, 18⅜ cents; American cost, $1.50.

Alizarin 20 per cent paste: Laid-down German cost, 9.44 cents; American cost, 55 cents.

Indigo 20 per cent paste: Laid-down German cost, 16.6 cents; American price, 25 cents.

Sulphur blacks: Laid-down German cost, 18.2 cents, as compared with 30 cents.

Chrome blacks and diamond blacks: Laid-down German cost, 31 cents as compared with 80 cents.

It is obvious that under the rates which have been adopted here, for the dye industry to continue will be simply impossible. That fact is recognized by the Senate. It was for that reason, I take it, that the special provision was made authorizing the President, under section 315, to increase or decrease duties to the extent of 50 per cent and adopt the American valuation upon coal-tar products.

The amendment which I have introduced does specifically what the Senate authorized the President to do in the way of increase. The reason for this is manifest. It would be impossible for the Tariff Commission to investigate and report a schedule of duties upon the dyestuffs of this country within a shorter period than six months or possibly a year. The subject is a very intricate one. There are thousands of these dyes. To ascertain the costs abroad and at home is no small affair. It involves a great deal of work, and work by experts; and in the meantime the dye industry would be dependent upon the inadequate duties which have been provided for under the pending bill. For that reason it is eminently necessary that protection of some kind which will carry the industry over until the rates can be made shall be provided for.

Mr. President, we have had an embargo since 1918. It seems to me that it is entirely fair and reasonable that this industry, which has invested in this country something over $200,000,000, be given a reasonable time until adequate rates which will preserve it can be put in force. The country has not suffered greatly by reason of this embargo. Either the industry has been extremely fair and just with the country, or else we have considerable competition within the United States among the concerns engaged in the dye industry.

For instance, I have here a comparison of prices. Here is a dye the price of which in 1917 was $1.50; in 1921, $1.80; to-day it is 95 cents.

Here is another dye. The price in 1917 was $1.22; in 1921, 78 cents; in 1922, 70 cents.

Here is another dye. The price in 1917 was $2.24; in 1921, $1.20; to-day, 68 cents.

The average price for all dyes produced in 1917 was $1.26 per pound; for 1918 it was $1.07 per pound; for 1919 it was $1.07 per pound; for 1920 it was $1.08 per pound; and for 1921 is was 83 cents per pound. That shows that by reason of the protection which has been afforded to the country in keeping out ruinous competition from abroad the industry has so developed as to gradually give to the country a lower price, which has kept pace with the development, and it is not too much to expect that if due protection is given against ruinous competition, such as Germany threatens the world with to-day, we can expect in a very few years to have a dye industry which will furnish the dyes as cheaply as they can be bought in any country in the world; but it can not be done otherwise. England has pursued the policy of protecting her dye industry. England has found herself obliged to protect her people as against the ruinous competition of Germany. The same may be said of Japan.

Outside of protecting the industry, there is the question of national defense and the question of national progress. No country can progress in these times as a first-class nation of the world either from the point of national defense or from the point of national economic growth and prosperity unless her chemistry is in the forefront and up to date with the most modern progress.

I submit, Mr. President, that that standard of chemistry can not be maintained if we permit this dye industry to perish. It is idle to say that a knowledge of chemistry which would be of substantial and practical benefit to the country can be disseminated through the colleges or the universities, or that the Government can conduct an institution for the dissemination of chemical knowledge. It can not be done. There is only one way to preserve to the country the benefits of modern chemistry, which is the spirit of the age.

Chemistry is what is governing the world to-day, both in war and in peace, and progress in chemistry can not be maintained unless you preserve an actually going concern.

I submit that this amendment ought to be adopted. Personally, I believe an embargo would be perhaps better; but this amendment is the next best thing, and this can probably be passed if those in favor of the embargo will vote for it. I submit that we can well trust the President of the United States and the Tariff Commission, under the authority provided under section 315, to reduce these rates to what they ought to be, if they need reducing, and do it scientifically.

It has been asked why we should not leave the bill as it is and let the President raise the rate; that it can be done in 60 days. I do not believe it can be done in 60 days; but if it could be done in 60 days, the answer is that it takes no longer to reduce the rate than it does to raise the rate; and why should we have this great industry, with $200,000,000 invested in it in this country, this great industry, which is the key to the prosperity of the country, put to that burden? We ought not to have an industry which we have fostered, which was created in 1918, I believe, while the Democrats were in power, put to this burden. Really, it is the one baby which the Democrats created that is worth while, and I can not see how they can face their consciences and throw that baby out on the porch to perish.

I submit that no harm can come to the country from this. The consumer is protected. The consumer is always protected, no matter what kind of a tariff you would put on dyes. Even under an embargo he would be protected. He is protected by the competition of the manufacturer of the by-product which comes from abroad; and if anything should happen in this country to interfere with the possibility of successful manufacture in textiles, right then the market would cease for the producer of dyes.

The PRESIDENT pro tempore. The time of the Senator has expired.

Mr. McLEAN. I would like to ask the Senator a question in my time. Do I understand that if this amendment is adopted the Senator from New Mexico will still favor the embargo, if it can be secured?

Mr. BURSUM. Yes; I favor the embargo. I do not think there is a chance for it, however.

Mr. McLEAN. I understand a vote on that amendment has been reserved in the Senate, and I should seriously consider the wisdom of adopting the amendment of the Senator from New Mexico as long as there is a possibility of securing the embargo.

Mr. BURSUM. I will say to the Senator from Connecticut that we had the embargo question up, voted on it, and the embargo was defeated. I notice that usually in the Senate, when once a majority of the Senate take a position and a matter is passed upon, there is hardly ever any change.

Mr. McLEAN. I merely asked the Senator's position. I understand he still would prefer the embargo?

Mr. BURSUM. Yes; I am still for it.

Mr. STERLING. Mr. President, I feel considerable interest in this question. If the question were one of embargo instead of the amendment of the Senator from New Mexico, I should vote for an embargo, as I voted for it when that question was before the Senate, for I am impressed with the belief that an embargo, or the next thing to an embargo, as near as we can have it, is necessary for the preservation of this great industry in the United States.

Mr. FLETCHER. Mr. President, I did not quite hear the Senator. Is it his position that unless these amendments are adopted he would vote for the embargo, or, if these amendments are adopted he would not feel that an embargo was necessary?

Mr. STERLING. If the embargo amendment comes before the Senate, I am not saying but that I shall support the embargo. I occupy a good deal the same position occupied by the Senator from New Mexico in that regard.

Mr. FLETCHER. This would be really an embargo in effect.

Mr. STERLING. But, thinking that the embargo may not carry in the Senate, I am in favor of the amendment of the Senator from New Mexico.

I want to call attention just briefly to two or three facts and then cite some authorities which I think ought to have a controlling influence in this discussion.

It has been charged, of course, that there was great danger of a combination; that there was an actual combination between the dye-industry people. I have the honor of being a member of the subcommittee of the Judiciary Committee which investigated the dye industry. I was unable to hear all the testimony; very much of it I could not hear because of other pressing duties, but that which I did hear convinced me that there was no combination whatsoever among the various dye industries in this country. Indeed, the witness most relied upon by those who were asserting that there was a combination or monopoly admitted that there was the sharpest competition between the various companies engaged in the production of chemicals and dyes. That witness was Mr. Metz.

Briefly, I want to call attention to a little history. Interested in this question because I was a member of that subcommittee, I looked in my Encyclopedia Britannica, the edition of 1911, and I read that fascinating history found there in regard to dyeing and the growth of the dye industry. I thought perhaps there might be something later, and I turned to the sup-

plement, which is about up to date, and which I have lately received, and I found some references there which I think are of great importance. It is stated there—

Previous to the war the United States had a small dyestuff industry, distributed among about five plants. The manufacturing operations, however, were limited chiefly to the assembling of the coal-tar intermediates imported from Germany for the production of the finished dyes, so that the new industry had to be built from the ground up. To the great credit of the American chemist and chemical manufacturer it may be said that in a very short time the more important dyes were successfully made in the United States in such quantity that practically no dye-consuming industry was forced to shut down by reason of a lack of dyes.

Now comes a very important suggestion. We are protecting a great body of American laborers when we protect the dye industry. I read further:

These employed about 2,600 chemists and nearly 20,000 workmen, and the total value of the finished products amounted to over $112,000,000. There were 236 different intermediates manufactured and 360 different dyes. The total production of dyes amounted to over 88,000,000 pounds, as against a pre-war importation of about 70,000,000 pounds.

A little further on we have this:

The great production of dyes in the United States during the period 1917–1921 led to the building up of a considerable export trade, particularly to South America and the Orient. The total dyestuffs exported from the United States in 1920 amounted in value to nearly $30,000,000, of which $22,450,000 was for coal-tar dyes. This export trade, however, showed a rapid falling off from the beginning of 1921, due both to the general business depression throughout the world and to the fact that the German dyestuff manufacturers were again active in foreign trade.

Already, then, we have the tangible evidence that the German manufacturers are taking away the American dyestuffs trade and see the signs of what will follow unless we protect our own to the extent provided in this amendment. Then the writer of this article refers to what has been done by the other principal nations of the world in putting an embargo on dyes. He says:

In the meantime Congress was petitioned for an embargo on importation of dyes from foreign sources except under adequate license regulations which would restrict the imports to dyes not manufactured in the United States—

We all recall that provision of the emergency tariff act—

This was in line with similar action by Great Britain, France, Italy, and Japan, all these countries deeming it highly expedient to foster and build up a self-contained dyestuff and coal-tar chemical industry as a measure of national defense.

Mr. President, they did not mean this as a national defense in time of war alone, but they meant it as a national industrial defense as well. Let me quote very briefly from what is said in a remarkable letter addressed by Mr. James Morton, chairman of the Scottish Dyes (Ltd.), governor-director Morton Sundour Fabrics (Ltd.), addressed to the free-trade members of Parliament upon this question. It is alike applicable to free-trade members elsewhere. He states as follows:

But I want to refer to national defense in time of peace.

We are not in war now and we are pleading for national defense, national industrial defense, Mr. President, in shutting out to a large extent the introduction of these German cheaply manufactured dyes—dyes that will be most cheaply sold, for a time at least. He says further:

Before the war, by means quite other than her war lord or her gigantic army, Germany was silently amassing the wealth and power of the world. We reckon our textile trade and our coal and steel trades very big factors in world industry, but do we realize that before the war Germany's exports of dyes and chemicals were estimated at £97,500,000 per annum, a sum equal to about double our exports of coal at the same period, about as much as our coal and steel exports put together, and practically as much as our total exports of cotton goods to all countries.

Mr. President, do we not need to protect ourselves in industrial defense against an industrial attack such as is menacing and such as is, in fact, foretold by the statement here?

Here is a danger portrayed so clearly and vividly by Mr. Morton in this letter. He said:

But should we then, you will ask, be able really to compete with the German makers? I see no reason, when the exchange is normal and we are given bulk production, why we should not be able within reasonable time to make as cheaply and as well as the Germans; but that does not say that we could sell as cheaply as the Germans are willing to offer goods at the present time in this country. It is no use beating about the bush. The Germans would sell at any price today in this country to regain this market for their dyes and to extinguish our dye industry here.

In this respect he corroborates the statement of every chemist of standing and responsibility in the country who knows anything about the dye industry as to what Germany will do in the matter of selling her dye wares to the people of the United States.

As already said, they look upon organic chemistry and all its developments as their own private territory and would do anything to prevent our encroaching upon it. Instances have been given in Parliament and elsewhere to show how much less the Germans are now willing to charge for certain dyes as compared with prices here. I have no doubt about it. I go much further and will venture to say that the Germans would be willing to give us for the next year or two all our dyes free of any charge whatever, if our law would allow them. This is the real situation we have to face, and it is for us to decide whether we are willing to give ear to such overtures.

Then he relates the instance in regard to alizarin, called Turkey red dye, and how Germany, after she had broken down the English business, increased the price of that dye just six times.

One other authority, and it is one we ought to take into careful consideration, because he is a reputed free trader, is Mr. Taussig, formerly a member of the Tariff Commission. In his little booklet called Tariff Problems, I find this statement:

There are other reasons—to digress for a moment—why the dyestuffs industry stands by itself. Not so much that it is a "key" industry; the extent to which dyestuffs dominate the textile and other manufactures is often exaggerated. But the complete control in the industry which the Germans aimed at before the war and largely succeeded in securing, threatened consequences which the most convinced free trader must regard with apprehension. Combinations in the nature of gentlemen's agreements were in effect even then between the different concerns. Now, as all advices indicate, there is a firm kartell or tight combination. Here is a foreign monopoly—a real monopoly, and not merely (what is often styled a monopoly) localization in a foreign country—of an industry within which there are many competing concerns. A solid German kartell in the coal-tar industry is pretty sure to be a strenuous competitor. It will try to crush competition in foreign countries by selling at cost or below cost and then recoup by advanced prices when the competitors are destroyed. Possibilities of this sort are often paraded as a bugaboo by extreme protectionists, when the facts give little occasion for concern. But here is a case where there may be veritable need for industrial self-defense.

That is from Mr. Taussig, and we ought to regard it, it seems to me, under all the circumstances, as the highest kind of testimony.

Mr. President, I think I have not much more to add. I feel that interest in this very great and important industry. It has done so much within the short time it has been in existence since the beginning of the war, produced so much of wealth for the United States, given employment to so many thousand workmen, skilled and unskilled, in the United States, it seems to me that as American citizens, with pride in our industrial development, we should maintain and encourage it in the highest possible degree.

Mr. RANSDELL. Mr. President, I favor strongly the amendment of the Senator from Arizona. It seems to me, sir, that it has in it more possibilities for good to America and the world than any other feature of the bill. In considering this amendment we must bear in mind how necessary it is to establish and maintain a strong chemical industry in America, how essential this industry is for our welfare, our national defense, and, in a more important way, our public health.

The Germans, through their investigation of coal-tar products, have developed some marvelous remedies as an incident to the dye industry. They discovered and placed on the market salvarsan, which cures one of the most loathsome and terrible diseases that ever afflicted the human race. They discovered novocaine, one of the greatest deadeners of pain known to science, wonderful in that it is a nonhabit-forming drug, a most beneficial thing. Many other very helpful drugs have been developed by the efforts of the German chemists in connection with coal tar.

I can not believe, sir, that the wise men of Germany have even scratched the surface of the possibilities of the coal-tar industry. Coal, sir, was made by the great Chemist of nature, how many years ago none of us know, and in its manufacture everything that grows out of the ground, I imagine, was used, the most exquisite flowers, the sweetest balsams, the most healing plants and herbs of every kind and sort, and vast forests of giant trees. Coal furnishes more commodities for the use and health and comfort of mankind than anything I know of. The wonderful violet and rose perfumes which our ladies use are manufactured from coal. Saccharine, which is five hundred times as sweet as sugar, is manufactured from coal. All the beautiful dyes we admire so much are manufactured from coal. I could tell about many wonderful things, but have not time or opportunity to do so.

It seems, sir, that we should encourage in America in every possible way this enterprise which the Germans have set on foot and from which so much benefit has come to mankind. Does anyone believe that Germans have all the wisdom of the world? Does any American doubt that our composite American population is as wise and contains as smart people as Germany? Does anyone doubt that under proper encouragement American chemists will develop just as many valuable things from coal tar as have the Germans? As the German chemists have discovered novocaine and aspirin and salvarsan, why can not American chemists discover remedies for cancer and leprosy and that most fatal of all diseases—tuberculosis? Great efforts to that end have already been made by American chemists.

Let us encourage them in every possible way. American doctors have in the last 25 years demonstrated that they can do wonders in treating diseases. American doctors discovered the cause of hookworm and pellagra and treated them successfully. They found out that the Stegomyia mosquito was the cause of yellow fever and have practically eradicated that dread disease throughout the world. All we need to do, sir, is to give proper encouragement to American chemists and they will, in my judgment, prove by their medicinal discoveries just as beneficial to America and to the world as ever the Germans have been, and as helpful to suffering humanity as their brethren in the medical profession, for I can not believe that all the secrets in the interest of health hidden by the Architect of the Universe when He created coal have yet been unearthed. There are many secrets still hidden. Let us discover them, or at least let us try to discover them. This is only one phase of the case.

Many people say, and I agree with them, that the next war, if war must come—and unfortunately it has always come to the world—will be a chemical war. America must be ready for it at home. She must develop her own chemical resources and not depend upon other countries. She must create a great chemical industry, and make all known combustibles in order to be prepared for a possible war.

This matter of national defense is only one of many important things which can come from the development of the coal-tar industry. I sincerely hope, sir, that the amendment will be agreed to.

I now yield to the Senator from New Hampshire, if he still wishes to ask me a question?

Mr. MOSES. I merely wished to ask the Senator from Louisiana if he desired the chemical industry of this country to develop to the extent where saccharine would replace sugar?

Mr. RANSDELL. I do not think it is probable that it will at all interfere with the sugar industry of my State, I will say to the Senator, but if it can be made cheaper, and the good people of America can get the sweetening which they need from saccharine, I say, "Well and good, my friends; I want you to have just as cheap sweets as you can get," and, as one of the Senators from Louisiana, I will take my chances on saccharine as a competitor with cane sugar.

Mr. President, in conclusion, I ask permission to publish at the end of my remarks, without reading, a very interesting letting from Prof. Charles E. Coates, dean of the department of chemistry in the Louisiana State University at Baton Rouge.

The PRESIDING OFFICER (Mr. BRANDEGEE in the chair). Without objection, it is so ordered.

The letter referred to is as follows:

LOUISIANA STATE UNIVERSITY,
DEPARTMENT OF CHEMISTRY, AUDUBON SUGAR SCHOOL,
Baton Rouge, La., August 9, 1922.

Senator J. E. RANSDELL,
United States Senate, Washington, D. C.

MY DEAR SENATOR RANSDELL: A few days ago my attention was called to the fact that the question of the embargo on German dyes was coming up soon for final action and that the bill was in danger. The matter seemed to me so important that I went to New Orleans last Saturday and called a meeting of the executive committee of the American Chemical Society to discuss the question. I was in consequence requested to write you and Senator BROUSSARD in my capacity as national counselor for the American Chemical Society, but I have decided that it would be best for my letter to be personal, inasmuch as official statements are frequently discounted in advance.

I would not presume even to attempt to argue a matter of this sort, to which you have doubtless given very serious thought, but as it is so highly technical and at the same time so important, in ways which are both direct and indirect, I shall venture to call to your attention the views and convictions of every chemist with whom I have ever discussed the subject.

The American Chemical Society, as you probably know, is possibly the strongest scientific society in the world and is not in the least interested in dyes, per se, only a few of its members having anything to do with dyes professionally. But inasmuch as chemistry is a growing science which changes from day to day, all chemists of any consequence must keep abreast of chemical progress, and for this reason the status of the dyestuff industry has been well known to us for the last 20 years or more. During that time we have seen the development of the German industry and the crushing of its competitors in France, England, and America. As long as we considered this merely a matter of business we regretted our failure and thought little more of it, but when the first few months of the war showed us that it was to be a chemical war we realized suddenly what we should have known all the time, and that is that the dyestuff laboratories were the only schools in which a sufficient number of men would get that training in advanced organic chemistry which was necessary for the manufacture of ammunition and for the making of synthetic drugs. We believe to-day that the existence of this industry is an essential part of our national defense, and we look upon it therefore as a subject which should not be made a party matter but should be considered purely from a patriotic standpoint.

There is in addition the business end of the matter and this, too, chemists have been compelled to study, and they have discovered with astonishment the methods used by the German Dye Trust, which came within an ace of complete success. We are, therefore, on the lookout for German propaganda which would naturally try to make this subject a party matter if it could, just as it will naturally try to induce the President to proceed against the Chemical Foundation if it can. As I said, the whole question is so very technical that it would require years of study to master it, and for this reason it is the more significant that every chemist of my acquaintance, none of whom have one dollar's interest in dyes, are unanimously of the opinion that if Germany is allowed to send its excess dyestuffs to this country during the next three or four years it can sell them at a figure which will absolutely destroy the dyestuff industry in this country, a figure which, in fact, might well be much below the cost of production even in Germany.

It takes at least 8 or 10 years to train a man in chemistry to the point where he will be an efficient chemist in a dye works. Moreover, if 100 men should start out to take this training the nature of the training is such that not more than 5 would prove able, intellectually, to master the subject and to do efficient work. Of these five, in the course of six or eight years more, perhaps one man would have proved his ability to do creative work and this one man would then be a national asset of enormous value in time of peace as well as in time of war. The process is so slow that if the industry is once destroyed it could not be built up again in less than 10 years, and probably would not be built up at all, because no one would put capital into a losing venture. All the chemists of my acquaintance know this and know that Germany knows it. For the last eight years we have been building up the dyestuff industry in this country. It has made remarkable progress, but it is not yet able to stand alone. How much longer it would take is a matter of opinion; certainly three or four years, at the end of which time the return of normal conditions abroad will have prevented the accumulation of an excess stock of dyestuffs, and a moderate tariff would suffice for the protection of our industry. At present, however, the excess stock of foreign dyes has absolutely no value unless it can be used, for which reason the German dye trust could well afford to give these dyes away or even to offer a bonus for taking them, if by so doing they could not only crush out immediate competition but at the same time obliterate the American dyestuff industry. With the loss of this industry would come the loss to our country of the trained organic chemists whom we sorely need; but it is evident, in addition, that once our industry is destroyed, the German dye trust can advance prices and recoup itself with no fear of successful competition.

Chemists, therefore, are of the unprejudiced belief that there should be an embargo placed on foreign dyes which should not be removed for any particular dye until the possibility of the process known as dumping could no longer exist. We believe this to be a question which is national in nature and should not be made a party question. We particularly call attention to the fact that as a class we are competent to judge in this matter, that we are without financial interest of any sort, and that we are activated in taking our position only by what we consider to be the best interests of our country, not only at the present time but particularly in the future.

Very truly yours,

CHARLES E. COATES,
Counselor Louisiana Section, American Chemical Society.

Mr. MOSES. Mr. President, if the amendment offered by the Senator from New Mexico [Mr. BURSUM] singled out from paragraphs 25 and 26 of the bill those articles which require extreme protection I should not object to it. The vice of the amendment, however, is that it includes every article upon the list, not only those which are delicately and with difficulty procured from the coal-tar distillates but those which are produced in tonnage proportions. It includes those which are sold at 5 cents a pound, if such there be, and those that are sold at $5 a pound, and there are many of those. That, Mr. President, is the vice of the amendment. I think, also, that so far as those particular products which require extreme protection are concerned it will be found that they are adequately protected in the amendment which was adopted here the other night applying, in the wisdom of the President, the American valuation to these products. I think that any Member of this body with a piece of chalk and a barn door can prove it impossible to land in this country any product covered by the paragraphs below the American selling price.

Mr. WADSWORTH. Mr. President, as a part of my remarks, I ask that a letter written by the Secretary of War to the chairman of the Committee on Finance, the Senator from North Dakota [Mr. MCCUMBER], may be read by the Secretary.

The PRESIDING OFFICER. Without objection, the Secretary will read as requested.

The reading clerk read as follows:

WAR DEPARTMENT,
Washington, August 15, 1922.

CHAIRMAN UNITED STATES SENATE FINANCE COMMITTEE,
Senate Office Building, Washington, D. C.

MY DEAR SENATOR MCCUMBER: On July 26, 1921, I wrote your committee, calling attention to the fact that the Fordney tariff bill would not protect the American organic chemical industry from destruction by German competition. Allow me to reiterate the importance of the preservation of this industry to the country from the standpoint of national defense.

The dye industry is the backbone of the organic chemical industry, on which all Governments are dependent for their high explosives, their medicines, and other materials. Inasmuch as the coal-tar industry, which is the basis of all dyes, is also the basis of all high explosives and of synthetic medicines, it is of vital importance to preparedness that the dye industry be developed to the fullest possible extent in this country. The use of explosives will be far greater in any future struggle than in the World War.

Notwithstanding that from 1914 to 1917 our great steel industries and our rapidly developing chemical industries had been working feverishly to increase their facilities to supply ammunition, guns, and rifles to the Allies, it was more than a year after we entered the war before those industries were able to supply ammunition, guns, rifles, etc., to meet the American needs. Even then our chemical industry was so undeveloped in 1917 that it was necessary for the Government to build large high-explosive plants and powder factories.

Germany realizes the importance of predominance in organic chemical industries as a most valuable means of preparedness and has formed of them one great trust. The German trust can produce

dyes and similar material so much cheaper than the Americans produce them that no ordinary tariff can prevent the destruction of the American industry, which will thereby cripple the whole organic chemical industry.

It is, therefore, urged that the dye-control provisions of the emergency tariff act of 1921 be extended another year to give the industry a chance to stabilize and to enable conditions in the dye industry to be carefully observed and the products determined which should be protected in order to firmly establish that industry in the United States.

Very truly yours, JOHN W. WEEKS,
Secretary of War.

Mr. WADSWORTH. Mr. President, it is apparent, of course, that the concluding paragraph of the letter of the Secretary of War is not applicable to the amendment which is now pending, because in that paragraph the Secretary urges the continuation of the selective embargo at present in force. I thought, however, it would not be amiss that the letter of the Secretary in which he discusses from the standpoint of the national defense the value of the organic chemical industry be placed in the RECORD at this time. I think that not even the most suspicious-minded man will accuse the Hon. John W. Weeks of being impelled by unworthy motives when he urges upon Congress the consideration of the chemical industry in connection with the defense of the Republic.

It is quite possible, Mr. President, that a good many Senators do not feel as deeply upon this subject as do I. Perhaps I feel too deeply upon it; I do not know; but, such as my feelings are, I intend to express them upon this occasion as briefly as possible.

From what I have been able to learn of the history of organic chemistry in this country, especially in the dye industry, prior to our entrance into the World War, during our participation in the war, and since the war, I am convinced that long before the United States actually declared a state of war the German Government and the cartel were in effect, although slyly, waging war against the peace and the safety of the people of the United States. We did not wake up to that situation until we ourselves got into the fight. The letter of the Secretary of War points out very briefly—all too briefly, according to my view—but sufficiently for the purposes of this discussion the predicament in which this Republic of ours found itself when we were called upon to engage in our own defense.

Manipulations of the German cartel in the matter of patents, the immense influence, politically and otherwise, which they maintained in this country before the European war must now be known to every sensible man. Their effort was deliberate; it was skillful, and it was successful up to a certain point. That effort was directed toward making and keeping the American people as helpless as possible in the event of any great crisis overtaking them in which the German Government might be a party.

We went into the war and we learned the lesson at the cost of billions of dollars and many thousands of lives. We participated in the great victory and at the conclusion of the contest we asked for no territory; we asked no reparations; we asked for nothing of value to be taken from the vanquished and we received nothing. The only thing which has come to the people of the United States of material value as a result of their efforts and sacrifices in the Great War is peace and security in the future and the guaranty of self-maintained public health; not one other thing or opportunity of a material character has come to this great people of ours out of that war.

We have the opportunity, as the result of the contest, an opportunity seized upon legally to maintain our public health with our own resources and without depending upon any foreign Government or any foreign cartel, corporation, or trust. We have secured the opportunity—and have secured it legally and properly as a result of our sacrifice and our efforts in the war—to maintain our national defense without depending upon any other nation, government, trust, or cartel of any kind whatsoever. That is the prospect which confronts the American people to-day.

Mr. President, I am not surprised that far-reaching efforts have been exerted in this country for the last two years once more to reduce us to that condition of comparative helplessness in which we dreamed and dreamed and dreamed in 1916. I am well aware of the influences which have been brought to bear here in Washington; I am well aware of the source of those influences; I know perfectly well that if this cartel can once more establish its domination over the organic chemical industry of the United States, such as it enjoyed prior to our entrance into the war, the enemies of America, actual and potential, will rejoice.

I question not the motives of Senators who do not see this question as I see it; without doubt they are sincere; but it passes my comprehension how they can fail to read the signs of the times. If there ever was a deliberate attempt to break down, to undermine, to weaken the power of American self-defense, it has been made in connection with the American organic chemical industry.

It does not do, Mr. President, in discussing this matter, to drag the names of American citizens into the discussion and accuse them of dishonest motives because, forsooth, they take an interest in the perpetuation of this chemical industry here in America. It does not do, Mr. President, to bring inferences and insinuations against Francis P. Garvan; not by any means. I care not what his politics are; I understand he is a Democrat; I have known him since 1895 and known him well. He is an honest man, and he has no thought in his mind or motive in his heart except the safety of this country. It does not do to bring unfair inferences and insinuations against men like Otto Bannard, of New York, who is one of the trustees of the Chemical Foundation, for he is an honest man, with no thought except the safety of his country.

I shall not discuss upon this occasion the wisdom or the unwisdom of the policy adopted by the last administration in the handling of the patents covering the dyes through the Chemical Foundation as trustee; that is not a part of this discussion; but I know full well, if I know anything about the psychology of this situation, that the attack upon the Chemical Foundation had a most material influence upon the votes cast on the question of the tariff on dyestuffs. It is for that reason that I deplored it at the time, although not publicly, for I had no opportunity to do so, but I deplore it now. It is not the question at issue.

Mr. President, as I said in my opening sentence, I feel deeply on this question. I believe that there is involved in it one great issue: America safe against attack from without and safe in the matter of public health, or America dependent upon some outside power and influence in the matter of its self-defense and in the matter of its public health.

This organic chemical industry lies at the bottom of nearly everything we use. I firmly believe that the progress of the race from now on will be measured more by the progress in organic chemistry than in any other human effort. I believe that in organic chemistry lies the solution of the secrets of the past and of the future. I believe that its establishment and maintenance in this country, even under an embargo, mean the happiness, the progress, and the security of 100,000,000 people. No rate of duty will frighten me and no embargo will frighten me.

I notice that England has put an embargo against the importation of dyestuffs. I notice that France has done the same thing. I notice that Italy has done the same thing. I notice that Japan, if she has not already done so, is about to do so. They have awakened to the significance and the importance of organic chemistry. I pray that the time will come when American public opinion will come to an appreciation of what organic chemistry means, of what research means, in the way of progress. We have been interested as a people in the development of material resources—the digging of iron and coal from the ground, the raising of crops upon the surface, and the engaging in transportation and other forms of commercial effort. As a people we have paid little attention and given little encouragement to scientific research, but, Mr. President and Senators, the progress of the future depends upon scientific research. It is the man working in the chemical laboratory who is to blaze the way for human progress.

I want to see the chemical laboratories of this country multiplied again and again. They can not be multiplied, they can not be maintained, no student will attempt to attend their courses, unless there is a chemical industry in which those students upon graduation may find a career.

The two things—research in the laboratory and the successful conduct of a chemical industry—go hand in hand. Neither can proceed without the other.

I regret that the Senate voted down the selective embargo. I think it made a mistake. I was in the minority upon that proposition. That is my first choice as a remedy. The Senator from New Mexico [Mr. BURSUM] has offered an amendment which, in my judgment, is next best. It will give some chance, at least, for the survival of this industry of ours, which already bids fair to be able to meet the demands of our people, although it has only been devoted to its task for three or four years, and research was almost unknown in this country. I think that industry will get a decent chance to survive under the amendment offered by the Senator from New Mexico. Feeling as I do upon this question, feeling that it is vital to the security and the happiness and the contentment of this great Nation, I beg for its adoption.

Mr. MOSES. Mr. President, the Senator from New York [Mr. WADSWORTH] can not possibly be more sincere in the position which he occupies than I am in that which I occupy. The Senator from New York can not have higher respect for the Secretary of War than I have. On the record, I doubt if the Senator from New York can qualify as well as I can, because the Senator and I both happened once to sit in the same Republican National Convention, and I voted twice for the Secretary of War as a candidate for President, and the Senator never voted for him at all.

This is not the first letter which the Secretary of War has signed with reference to the embargo; and I say "signed," Mr. President, because I happen to know that the first letter was not written by him, and I wonder if he wrote this one, and if he knew everything of its implications.

Mr. WADSWORTH. Mr. President, does the Senator really wonder about that?

Mr. MOSES. I doubt very much, Mr. President, if the Secretary of War, with all that he has to deal with, can possibly go into the ramifications of this subject.

Mr. WADSWORTH. I shall be most interested when the Senator from New Hampshire visits the Secretary of War and makes that suggestion to him. I should like to be present.

Mr. MOSES. I probably shall.

Mr. WADSWORTH. I doubt if the Senator will.

Mr. MOSES. The Senator is entitled to that opinion.

Mr. President, as for the influences, the exertions that are at work and that exist in Washington with reference to this measure, they are patent to everybody. We have seen them without number. We have seen, yesterday and to-day, the Capitol invaded by a horde of men bearing in their lapels the label "Chemist." I suppose, Mr. President, the way to become a chemist in this country is to put a label in your lapel. We have seen the exigent importunities of the Synthetic Organic Chemical Manufacturers' Association—an association known in the trade as the S. O. C. M. Association, the "Soak-'em" association, an appellation, Mr. President, which well befits their activities—and the sole question here is whether the items of protection already voted in this bill will sufficiently protect the chemical and dye industries of the country.

I hold that they will. I hold that the chemical and dye industries of the country are not sacrosanct; that they do not have to be singled out for special favor; that they may be developed behind the wall of a protective tariff as well as the tin-plate industry or the silk industry or any other industry that thrives in this country.

Mr. President, I wish to say in conclusion only that I am as eager as the Senator from New York to see the chemical laboratories of this country in full operation and manned by an entirely efficient personnel, and that if the chemical and dye manufacturers of the country would spend half as much time, half as much money, and half as much effort in their laboratories and in their factories in developing their processes and their products as they have spent in Washington in the last two years seeking special privilege we would not have such a question as this before us.

Mr. SHEPPARD. I suggest the absence of a quorum.

The PRESIDING OFFICER. The Senator from Texas suggests the absence of a quorum. The Secretary will call the roll.

The roll was called, and the following Senators answered to their names:

Ashurst	Gooding	Myers	Simmons
Ball	Hale	New	Smith
Brandegee	Harrison	Nicholson	Smoot
Broussard	Heflin	Norbeck	Stanfield
Bursum	Jones, N. Mex.	Oddie	Stanley
Calder	Jones, Wash.	Overman	Sterling
Cameron	Kellogg	Pepper	Sutherland
Capper	Keyes	Phipps	Trammell
Cummins	Lenroot	Pomerene	Underwood
Curtis	Lodge	Ransdell	Wadsworth
Dial	McCormick	Rawson	Walsh, Mass.
du Pont	McCumber	Reed, Mo.	Walsh, Mont.
Edge	McKellar	Reed, Pa.	Warren
Ernst	McLean	Robinson	
Fletcher	McNary	Sheppard	
France	Moses	Shortridge	

The PRESIDING OFFICER. Sixty-one Senators having answered to their names, a quorum of the Senate is present.

Mr. SMOOT. Mr. President, I doubt whether any Senator has taken as much interest in this schedule as I. I have given days and nights and weeks of time to its consideration. No Senator wants to permit this industry to live more than I. The rates reported to the Senate in the dye paragraph, 7 cents a pound specific and 60 per cent ad valorem, granting to the President power to increase those rates from 50 per cent and transferring those rates from a foreign valuation to an American valuation, is virtually an embargo. The embargo was bad enough, but the proposed amendment is even more vicious and indefensible than the embargo.

I will take the six items which the Senator from New Mexico pointed to as evidence to show that there should be a duty higher than that imposed in the bill, and I want the Senator to follow me and see the result. The Senator from New Mexico pointed to six of the items in the bill, and he said that the American price on the first was 90 cents a pound, the foreign price 29.2 cents; the second, 90 cents, American price, and the foreign price 44.8 cents; the third, 55 cents, American price, and the foreign price 9.4 cents; the fourth, 25 cents, American price, and the foreign price 16.6 cents.

The fifth was 30 cents, as the cost in America, and in the foreign country 18 cents; on the sixth 80 cents was the cost in America, and the foreign price was 31 cents.

The average American cost of these six items is 61.66 cents a pound.

The amendment proposes to put a duty of 90 per cent and 10½ cents per pound upon those items, and 90 per cent of 61.66 cents is 55.49 cents. Then there is a specific duty of 10½ cents, making 65.99 cents.

The average of all of them is 61.66 cents; so, in order to get one of the articles named into this country, Germany, or any other country, would have to give the article away and pay the importer 4⅛ cents to get it into this country.

Embargo? If it was only an embargo, if they could give the product away to get it in, that is embargo enough. But the amendment provides more than that; they would have to give 4⅛ cents upon every pound of the articles coming into the United States before they could ever enter this country.

Mr. REED of Missouri. I do not want to interrupt the Senator further than to say that the argument he is now making will apply to every item in this bill.

Mr. SMOOT. I do not agree with the Senator, and, not only that, neither the Senator from Missouri nor anyone else can prove it.

Mr. REED of Missouri. I can come mighty near proving it.

Mr. SMOOT. I will say to the Senator that I do not agree with him.

Mr. WADSWORTH. Mr. President——

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from New York?

Mr. SMOOT. I yield, but I do not want to take too much time.

Mr. WADSWORTH. Just for a question.

Mr. SMOOT. I have not very much time.

Mr. WADSWORTH. Putting aside for a moment the question of a duty, and the prices and cost figures which the Senator is quoting, which I am not going to discuss, what will happen between the time of the passage of this act and any future possible raising of the rate by the President?

Mr. SMOOT. I am going to ask the Senate that the 60 days be stricken out and 15 days be inserted. The original amendment provided for 30 days. No one thought that in 30 days importers could get any great quantity of goods into this country; but I am willing to make it 15 days.

Mr. WADSWORTH. What sort of an investigation can be made in that period?

Mr. SMOOT. It is not the investigation; it is after the proclamation of the President that the added rates take effect.

Mr. WADSWORTH. How long will it take to make the investigation?

Mr. SMOOT. I can not say as to that.

Mr. WADSWORTH. That is the important thing.

Mr. SMOOT. I think the investigation is already being made.

Mr. WADSWORTH. By whom?

Mr. SMOOT. By the Tariff Commission. I do not think there is any question about it.

I want to say that 7 cents a pound and 60 per cent ad valorem on the foreign valuation is an absolute embargo upon 80 per cent of the dyes manufactured in this country.

Mr. POMERENE. What would it be on the American valuation?

Mr. SMOOT. It would increase that amount.

Mr. POMERENE. About how much?

Mr. SMOOT. I mean the amount of production. It would increase it up to 90 per cent. Let us take some of the items in general use and apply the proposed amendment.

Mr. SHEPPARD. Did the Senator base his last statement on the bill as reported, and not on the amendment?

Mr. SMOOT. The amendment as reported to the Senate. Let us take some of the items; for instance, synthetic indigo. Right after the war, when the manufacturers of synthetic indigo came here demanding the first embargo, it was

selling for 75 cents a pound. Your committee was told that in no case whatever could it be made and sold for less than 65 cents a pound. It was being exported at 75 cents a pound. But 65 cents a pound was the lowest that it could be made for, according to them. I know that they are selling it for 22 cents a pound to-day.

Mr. WADSWORTH. That is to their credit, is it not?

Mr. SMOOT. It was not to their credit to try to make the committee believe a year and a half ago that it could not be sold for less than 65 cents, since what has taken place of late.

Mr. WADSWORTH. You were not discussing tariff rates; you were discussing an embargo, to give them a chance to make the researches.

Mr. SMOOT. Eighty-five per cent of the items have nothing to do with medicine.

Mr. WADSWORTH. I am glad to know the embargo reduced the price of that one thing. That is what I have always suspected would happen.

Mr. SMOOT. I suppose the Senator from New York would be. What will happen if this amendment is agreed to?

Mr. LODGE. Mr. President——

Mr. SMOOT. I have but a few minutes. I hope the Senator will let me go on.

Synthetic indigo is selling for 22 cents. Ninety per cent of 22 cents is 19.8 cents. The balance is 2.2 cents. Then we have a specific duty of 10½ cents a pound, and 2.2 from 10½ leaves 8.3. In other words, no man can get that product into the United States, if this amendment goes into effect, unless he pays 8.3 cents for the privilege; yes, give it away and pay that amount to get it in.

Take the next article produced in great quantity in the country, acid black. To-day's price is 12 cents. Ninety per cent is 10.8, leaving 1.2 cents. With 10½ cents specific duty, deduct 1.2 cents, which would leave 9.6 cents that the exporter will be compelled to give besides the goods to get them into the United States.

Mr. President, the only reason I supported the rates as the committee reported them was because I want the small per cent of the products necessary for the defense of our country in time of war produced here. I have a letter admitting that it is only about 2 per cent, but suppose it was 15 per cent; I want the embargo in the form of rates, and I say now that if we have the power given the President, with 7 cents a pound and 60 per cent, increasing, under the American valuation, to 50 per cent, as provided for in the bill, this is what would happen: Suppose an item was $2 a pound, and suppose that same item sold for $20 a pound in the United States; 90 per cent of $20 is $18, and deducting that from $20 it leaves $2, and 10½ cents a pound leaves $1.89½. So, Mr. President, if the foreign price were $2 a pound and the price in this country were $20, under the provisions of the bill they could not get a pound of such produce unless they would give it away and pay the 11½ cents besides.

I am perfectly willing to do everything for this industry that any man on earth can do, but why take the whole industry and impose a duty of 10½ cents specific and 90 per cent ad valorem when there can not be a case pointed to where it does not amount to an embargo?

I want the President to have the power to impose an embargo upon certain articles. Let the President designate particular products which shall be assessed on the American valuation and bear not only the rates provided for in the bill but an increase of 50 per cent over and above them.

Mr. President, when the proper time comes I want to strike out "60 days" and insert "15 days," as I stated, so that it will read in this way:

But no such rate shall be decreased or increased more than 50 per cent of the rate specified in Title I of this act upon such merchandise—

Which refers not only to paragraph 26 but to paragraph 25—

Such rate or rates of duty shall become effective 15 days after the said proclamation of the President.

Mr. JONES of New Mexico. Will the Senator please read a little louder? We can not hear just what his proposal is.

Mr. SMOOT. I have not the time to read it again. I want to say to the Senate at this time that Mr. du Pont was a very fair witness before the committee. He told the committee that he did not want an ounce of dyes or chemicals to come into this country from any place on earth—not one ounce. He made the statement to me yesterday that that was his position now, and he wanted not only an embargo in every sense of the word, but he thought that it was absolutely necessary to build up the industry.

If I thought it was necessary to build up the industry I would not hesitate to vote for it. But I know it is not necessary.

Mr. DU PONT. Did Mr. du Pont give a written statement of his position?

Mr. SMOOT. Yes; he stated here——

Mr. DU PONT. Why does not the Senator read that?

Mr. SMOOT. Certainly; if the Senator wants me to read it, I will read it. After discussing the embargo and saying that an absolute embargo was the only thing that would preserve this industry, Mr. du Pont reiterated what his testimony was before the committee, that he did not want a single ounce of it to come into this country, and made this statement, and this is in his own writing, made yesterday. The Senator wants me to read it, and I will do so:

The present proposed duty upon coal-tar dyes does not protect the industry, and is therefore useless. This because the power given the President to increase the duties can not be invoked in time to prevent the importation of large quantities of German dyes.

In the amendment we provide 60 days. I have already announced to the Senate——

Mr. WADSWORTH. Will the Senator yield there just a moment? Is the Senator accurate in that?

Mr. SMOOT. In what?

Mr. WADSWORTH. Does not the 60-day provision apply to the period after the proclamation is announced?

Mr. SMOOT. Certainly.

Mr. WADSWORTH. But what happens before the proclamation is announced?

Mr. SMOOT. Nobody in Germany will know what the proclamation is going to be.

Mr. WADSWORTH. It would certainly be a raise, not a lowering.

Mr. SMOOT. I do not know about that. I say that if an investigation were made upon 85 per cent of these, there would be a lowering.

Mr. WADSWORTH. I disagree with that, of course.

Mr. SMOOT. The Senator may disagree with it, but I can prove it to the Senator, if he will take the prices of to-day.

Now, Mr. President, I do not care to say anything more. In fact I did not intend to say this much.

Mr. LODGE. Mr. President, I want to be clear about the 15 days. Can the President make the proclamation until the investigation has been had?

Mr. SMOOT. Why, no.

Mr. LODGE. The investigation has to come first?

Mr. SMOOT. Certainly. The bill provides:

That the ad valorem rate or rates of duty based upon such American selling price shall be the rate found upon said investigation by the President to be shown by the said differences in conditions of competition of trade in the markets of the United States necessary to equalize the differences so found in said conditions of competition in favor of either foreign manufacturers or producers, but no such rate shall be decreased or increased more than 50 per cent of the rate specified in Title I of this act upon such merchandise.

Mr. LODGE. I did not mean to have the whole bill read. I wanted to find out when the President should make his proclamation.

Mr. SMOOT. It provides further:

Such rate or rates of duty shall become effective 30 days after the date of the said proclamation of the President.

Mr. LODGE. He can not make the proclamation until the investigation has been made?

Mr. SMOOT. Why, no.

Mr. LODGE. I have here a letter dated August 16 from the Tariff Commission, which I shall ask to have printed in the RECORD, and in which this statement is made:

The time required for such an investigation is uncertain, but from experience gained in other chemical investigations we believe it will require from 8 to 10 months to make a satisfactory report on the subject.

During those 8 or 10 months, of course, the dyes would come in.

Mr. President, I did not mean to enter into this discussion. I took no interest whatever in the matter of rates or whether we keep out all other dyes or not. I have but one single interest in the question, which is derived from some years of experience in the Senate. I endeavored back in 1909, in conjunction with the Senator from Utah, to get some protection which would tend to give us an independent chemical production. We failed. We got into the war. We had no chemists who could furnish us with explosives and later with the gases. It was the same in England, which was then believing in the phantom of free trade. She found herself in the same condition. No one can possibly tell what that disadvantage, which weighed down upon both England and the United States, cost us in men, money, and time in the winning of the war. I made up my mind that, so far as I was concerned, I would use every effort in my power to see that the United States was never left again defenseless in that way.

I voted for the embargo when it was proposed by the Democratic Party. I voted for it during the war. I continued to vote for it when it was continued when the Democratic Party had not yet gone out of power. I voted for it for the sole reason that I wished the country to be independent in the matter of organic chemistry. No matter what it may cost, it is something that is worth any price they choose to pay to make the country independent in that direction.

Mr. President, I voted for it again for the same reason. It does not weigh with me that the dyes can come in at this price or can come in at another price. I want to do what the other countries have done who have learned something from their experience. I want this country to see to it, by tariff or embargo or in any other way, that organic chemistry in the United States is put in a position where we shall never find ourselves in the condition in which we were before. I am speaking not in the interest of any industry. I have not been approached by anybody representing an industry in that respect. I know the interests that are here. I have heard of the representatives of the German importing interests rejoicing in the lobbies here when the embargo was beaten the other day. I have taken this long interest in it for these years for but one reason, and I vote for this provision to-night for but one reason, and that is national defense and safety.

Mr. President, I ask that the letter from the Tariff Commission may be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

UNITED STATES TARIFF COMMISSION,
Washington, August 16, 1922.

Hon. J. S. FRELINGHUYSEN,
United States Senate, Washington, D. C.

MY DEAR SENATOR: We have your letter of August 15 in which you request the opinion of the Tariff Commission as to whether foreign costs of production in the dye and synthetic organic chemical industry can be obtained, and if so, what length of time will be required to complete an investigation sufficiently comprehensive for the purposes of section 315 of the pending tariff bill.

The commission is of the opinion that it is improbable that foreign costs of production can be obtained in any reasonable time from the cost records of foreign chemical manufacturers, especially those in Germany. It is probable, however, that cost data sufficiently accurate for the purposes of the pending bill can be made by chemists and accountants in the foreign field who are familiar with the manufacturing processes, labor conditions, costs of raw material, and the market price of the finished product.

The time required for such an investigation is uncertain, but from experience gained in other chemical investigations we believe it will require from 8 to 10 months to make a satisfactory report on the subject.

In reply to your request for the quantity and variety of dyes and other synthetic organic chemicals imported during 1921, we submit the following figures taken from the Census of Dyes and other Synthetic Organic Chemicals, 1921, a copy of which is inclosed. The total imports of coal-tar dyes were 3,914,036 pounds, valued at $5,156,779. Over 1,300 trade types were imported, as shown in detail beginning on page 91 of this report. The total quantity of dyes imported, in which most of the vat dyes are reduced to a single-strength basis, was 4,252,911 pounds.

In regard to the imports of other synthetic organic chemicals during the year 1921, the Department of Commerce lists separately only a part of those imported. The imports of these products, according to the partial list reported by the department, were 2,534,262 pounds, valued at $426,393. For further details we refer you to Tables 28 and 30, pages 155 and 156, of our census report referred to above.

If we may serve you further in this matter we shall be glad to do so.

Very truly yours,

THOMAS O. MARVIN, *Chairman.*

Mr. JONES of New Mexico. Mr. President, we have been discussing the bill for four months. We have developed the fact that there are many difficult problems with which to deal. Some of them, in fact most of them, I think, are being dealt with in the dark. We do not know what is going to be the effect of the action which we have taken, in my judgment, regarding the vast majority of the items in the bill. Confronted with these conditions, I have proposed an amendment. I offered it in the first place as a substitute for the bill that would leave the law where it was until we got sufficient light to intelligently change it. I believe now that is the course which we should take both for the welfare of the industries of the country and for the welfare of the country itself.

The discussion regarding the item demonstrated the wisdom of the amendment which I offered. We do not know what are the facts regarding the industry. We do not know the effect which it would have upon the textile industries of the country. We do not know the effect which it would have upon the chemical industry of the country. We are dealing in the dark. I do not believe in this kind of legislation. I do believe that before the Congress acts it should know what the facts are and have some information as to what the consequences would be. Regarding the industry we do not know either. We do not know what the facts are, nor do we know what the consequences would be.

I have been opposed to an embargo upon general principles. I am opposed to it now. An embargo means that the Government of the United States shall take under its wing the particular industry and manipulate its affairs according to its judgment. These are the principles which have actuated me in the discussion of the bill and in the votes which I have cast hitherto upon the question of the chemical industry and dyestuffs.

But my mind reverts to that time when the European nations were at war, when the industries of the United States were clamoring for dyes. I remember when I was in the Interior Department the agencies of the President of the United States were asking the manufacturers of the country to come to Washington to work out some plan whereby the organic chemical industry of the country could be organized and sustained for the benefit of the country as a whole. At that time we were in dire distress. These men came to Washington.

There was conference after conference, and even the then President of the United States, after considering the situation, virtually promised them the help of the United States if they would engage in those industries, if they would establish them and produce those things which were necessary for the welfare of the country. I recall those anxious days. What we should do now I do not know and you do not know. I venture to say that there is not a Senator within the sound of my voice who knows what it would cost to produce the different dyes, who knows what the profits would be under one rate of tariff or under another rate. We know nothing about it substantially. Certainly we do not have that clear and certain information which ought to guide the legislator in using the taxing power of his country. We do not know. But I do know that these people entered upon this industry with the virtual promise of their Government that they would be able to survive.

In these circumstances, Mr. President, I am willing to give the industry the benefit of the doubt. I do not know just what that will mean. I do not know how much profit it will put in the coffers of these corporations. But I do know that the Congress of the United States will be in session practically all the time from this period forward, and we can ascertain.

I do hope that the amendment which I have offered to the bill providing for an investigation of the industries may be adopted by the Congress. It is the first proposal in the history of legislation of which I have any knowledge providing the machinery for the investigation of domestic industries. We have levied duties which, in my judgment, will mean millions of unearned profits to some of the industries of the country, but the Congress is unwilling to confer power upon the Tariff Commission, which has been created to investigate the domestic industries and find out whether they need protection as prescribed in the bill or not.

I do not believe that the people of the country want to destroy any essential industry, but I do believe that the people of the country do not want to tax themselves for the mere profiteering of some industry. That we are legislating through this bill to put unearned dollars in the pockets of many of the people of the country I have not the slightest doubt.

I think that we should investigate the industries; that we should find out what they need, not what they want. Up to this good hour that is about all we have heard—how much does this industry want? Day after day in the Finance Committee I have listened to that query. When a witness would appear before the committee about the first question the distinguished Senator from Utah [Mr. SMOOT] would ask would be, "Well, what do you want?"

My God, is this to be the foundation of taxation legislation? I say no. For that reason did I offer my amendment to this bill. If we are going to tax the American people for the benefit of certain industries, in God's name why should we not know what we are doing before we do it? Why should we not investigate these industries? The other night, after my amendment was defeated, it was stated to me by a certain Senator on the other side of the Chamber that it was said that they had rather have seen the whole bill defeated than that my amendment should have been adopted. Why? Because they did not want the sunlight of investigation turned upon these industries. They desired to make statements to suit themselves; they desired interested parties to come here and say what they wanted and declined to let investigation be had.

However, Mr. President, here is an amendment which I think concerns a so-called key industry; I think it is an industry which is essential for the welfare of the country; I think it had the moral promise of support by this Government; and while I do not know what my vote may mean, I am willing to give to this industry the benefit of that vote, and I am going to support the amendment.

Mr. SIMMONS. Mr. President, I have only a few words to say in reference to this matter. When the Senator from New Mexico offered his amendment I asked him if the amendment in effect did not mean a substantial increase in the tariff rate prescribed for dyestuffs and if it did not substitute the American for the foreign valuation scheme. He answered that that was what the amendment meant.

Mr. President, a mere cursory consideration of the change in rates proposed by the amendment of the Senator from New Mexico shows that he proposes to increase the rates which are now in the bill from 33⅓ to probably 50 per cent. This side of the Chamber have voted every time the question has been presented against the rates that are now written in the bill. If they shall, therefore, vote for this high rate, they will be reversing themselves.

Secondly, the rates against which we have voted and which have been increased from 33⅓ to 50 per cent were based upon foreign valuation. If we shall now vote for the Bursum amendment, we shall vote not only to increase those rates from 33⅓ to 50 per cent, but, by substituting American valuation for foreign valuation, we shall practically vote to increase the rates in the pending bill more than 100 per cent.

Under those circumstances I can not believe that Senators on this side of the Chamber who have voted against the rates on dyestuffs which are contained in the bill based upon foreign valuation are now going to vote to increase those rates 33⅓ to 50 per cent and then base them upon the American valuation. I think a vote of that sort would be a vote of self-stultification, and I appeal to Democrats—I do not care what Republicans may do about this matter—but I appeal to the Democrats on this side of the Chamber not to stultify themselves in such a way as that.

Mr. EDGE. Mr. President, just a word. My colleague the senior senator from New Jersey [Mr. FRELINGHUYSEN] is unavoidably detained from this session of the Senate. As all the Members of the Senate very well know, he has, with facts and statistics at hand, I might say, led the fight for proper protection for this great industry in this country. Personally I feel, without any hesitation, that the embargo is in every way justified. I shall vote for an embargo, as I have before voted for it, if an opportunity is afforded; but I feel that the pending amendment certainly offers that much additional protection to this great industry, which employs so many thousands of men and which has been organized and developed during times of stress, and, to a great extent, at least, will afford the protection which is necessary. For that reason I shall support it.

I am sorry my colleague is not present to-night, because he has made such an exhaustive study of all the facts surrounding the necessary protection to this industry that I am sure the Senate and the country would have been benefited by the views which he would have expressed had he been present.

As I have said, I shall support the amendment simply on the conviction that it is an additional step in the direction of a proper protection to an industry which deserves the support and the protection of Congress at this time.

The PRESIDENT pro tempore. The question is on the amendment of the Senator from New Mexico [Mr. BURSUM].

Mr. MOSES. I ask for the yeas and nays.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. EDGE (when his name was called). I have a general pair with the senior Senator from Oklahoma [Mr. OWEN]. I transfer that pair to the junior Senator from Maryland [Mr. WELLER] and vote "yea."

Mr. HALE (when his name was called). Making the same announcement as before with regard to my pair and its transfer, I vote "yea."

Mr. HARRISON (when his name was called). I transfer my pair with the Senator from West Virginia [Mr. ELKINS] to the senior Senator from Texas [Mr. CULBERSON], and vote "nay."

Mr. POMERENE (when his name was called). As heretofore announced, I am paired with my colleague [Mr. WILLIS]. I transfer that pair to the senior Senator from Nebraska [Mr. HITCHCOCK], and vote "nay."

Mr. WALSH of Montana (when his name was called). I transfer my pair with the Senator from New Jersey [Mr. FRELINGHUYSEN] to the Senator from Rhode Island [Mr. GERRY], and vote "nay."

Mr. WATSON of Indiana (when his name was called). Making the same announcement with reference to my pair and its transfer as on the last roll call, I vote "yea."

The roll call was concluded.

Mr. McCUMBER. I have a general pair with the junior Senator from Utah [Mr. KING] who would vote against this amendment. I think I can transfer that pair to the junior Senator from Washington [Mr. POINDEXTER] who informs me that he is in favor of a high tariff, but is opposed to an embargo. On that telegram I base my right to transfer my pair to him, and will vote. I vote "yea."

Mr. DILLINGHAM. I have a general pair with the junior Senator from Virginia [Mr. GLASS]. In his absence, being unable to obtain a transfer, I am compelled to withhold my vote.

Mr. JONES of Washington (after having voted in the affirmative). The senior Senator from Virginia [Mr. SWANSON] is necessarily absent during the evening, and I am paired with him, with the understanding that I might transfer that pair if an opportunity should be afforded. I am unable, however, to secure a transfer, and therefore I withdraw my vote. If the Senator from Virginia were present, he would vote "nay."

Mr. McCORMICK. I have a standing pair with the junior Senator from Wyoming [Mr. KENDRICK], with the understanding that if either of us believes that the other, if present, would vote in the same sense each shall be at liberty to vote. I do not know whether he has been in the Chamber or not. I vote "yea."

Mr. NEW (after having voted in the affirmative). I have a general pair with the junior Senator from Tennessee [Mr. McKELLAR]. I should like to ask if he is recorded as voting?

The PRESIDENT pro tempore. The Senator from Tennessee has not voted.

Mr. NEW. Then I am compelled to withdraw my vote.

Mr. CURTIS. I desire to announce the following pairs:

The Senator from Michigan [Mr. TOWNSEND] with the Senator from Wisconsin [Mr. LA FOLLETTE];

The Senator from Illinois [Mr. McKINLEY] with the Senator from Arkansas [Mr. CARAWAY]; and

The Senator from Missouri [Mr. SPENCER] with the Senator from Georgia [Mr. HARRIS].

The result was announced—yeas 38, nays 23, as follows:

YEAS—38.

Ball	Edge	McNary	Sheppard
Brandegee	Ernst	Myers	Shortridge
Broussard	France	Nicholson	Stanfield
Bursum	Gooding	Norbeck	Sterling
Calder	Hale	Oddie	Sutherland
Cameron	Jones, N. Mex.	Pepper	Wadsworth
Colt	Lodge	Phipps	Warren
Cummins	McCormick	Ransdell	Watson, Ind.
Curtis	McCumber	Rawson	
du Pont	McLean	Reed, Pa.	

NAYS—23.

Ashurst	Kellogg	Pomerene	Smoot
Capper	Keyes	Reed, Mo.	Stanley
Dial	Lenroot	Robinson	Trammell
Fletcher	Moses	Shields	Underwood
Harrison	Newberry	Simmons	Walsh, Mont.
Heflin	Overman	Smith	

NOT VOTING—35.

Borah	Harreld	McKellar	Spencer
Caraway	Harris	McKinley	Swanson
Culberson	Hitchcock	Nelson	Townsend
Dillingham	Johnson	New	Walsh, Mass.
Elkins	Jones, Wash.	Norris	Watson, Ga.
Fernald	Kendrick	Owen	Weller
Frelinghuysen	King	Page	Williams
Gerry	Ladd	Pittman	Willis
Glass	La Follette	Poindexter	

So Mr. BURSUM's amendment was agreed to.

Mr. MOSES. I wish to give notice that I shall reserve a separate vote on this amendment in the Senate.

Mr. JONES of Washington. Mr. President, I have two amendments that I should like to combine, but, as they relate to different subjects, I can not do so. I shall take just a little of the time of the Senate, possibly, in presenting them.

I offer the amendment which I send to the desk.

The PRESIDENT pro tempore. The Secretary will state the amendment offered by the Senator from Washington.

The ASSISTANT SECRETARY. On page 29, line 13, after the word "nitrite," it is proposed to strike out "3" and insert "5," so that it will read:

Nitrite, 5 cents per pound.

Mr. JONES of Washington. Mr. President, sodium nitrite is a chemical compound composed of sodium, nitrogen, and oxygen. It is used chiefly in coal-tar dyes and in the dyeing industry. Our pre-war demand or need amounted to some five or six million pounds. Of this, we produced in this country about 1,700,000 pounds. Under the impetus of the war one plant was established in this country, using the arc process. This is established out in our State, and, as I am informed, they produced about half of the increased supply.

Our imports during the war increased very largely on account of the development of the dye industry. In 1920 I think

there were about 11,000,000 pounds imported, but in 1921 some two or three million pounds.

I just want to read briefly from a letter from the representative of the plant in my State, relating to the situation that confronts them. This letter is found in the hearings before the Finance Committee, and is addressed to me and I filed it with the committee. He states:

American manufacture of the chemical sodium nitrate, otherwise known as nitrite of soda, is in dire need of tariff protection against German and other foreign importations. This material is basic to the dyestuffs, ink, paint, rubber, and allied manufactures, and prior to the war it was secured almost exclusively from Germany and Norway, where it was, and still is, manufactured very cheaply by the air-fixation method, employing exceedingly cheap electric power for this purpose. The domestic manufacture, employing ordinary chemical methods, was very limited on account of necessarily high production costs. The country's pre-war needs aggregated about 3,000 tons per annum, valued at about $120 per ton, or 6 cents per pound. The demand increased rapidly during the war on account of the enormous expansion of our dyestuffs industry, and present needs are estimated at about 6,000 tons per annum. Owing to the dependence of this country upon Europe for most of its supply of this material and the great difficulty in securing same during the war, the price skyrocketed from 6 cents to 60 cents per pound—

That is a striking illustration of what our people, the consumers in this country, must bear if there comes a sudden demand for an article that we are not producing in this country. Here was a product that we had been getting for 6 cents a pound. Under the demand of the war, because it could not be supplied in this country, the price went up to 60 cents a pound that our people had to pay for the lack of development along these lines—

and would, without doubt, have gone a great deal higher if the American Nitrogen Products Co., of Seattle, Wash., had not entered the field about the time the United States declared war. We had begun preparations for the establishment of our air nitrogen fixation industry in 1916 and began operations in the spring of 1917, manufacturing sodium nitrite.

I desire that the Senate note this:

Our plant is the only commercially operating air nitrogen factory on United States soil employing the electric arc method and based upon utilization of hydroelectric energy.

They produced about one-half of the increased supply.

Mr. President, I am not going to take the time of the Senate further. They sent me a copy of a letter sent out by the representative of a German company to a firm in this country, representing to them that they can furnish this product at about 6 cents a pound, or even less than that, because of conditions confronting them. I ask to have this letter printed in the RECORD.

The PRESIDENT pro tempore. Without objection, it will be so ordered.

The letter is as follows:

PEERLESS COLOR CO. (INC.), *Bound Brook, N. J.*

GENTLEMEN: As previously advised you, we have for distribution in this country through American fiscal agents, that portion of nitrite of soda, as produced by the Badische Aniline & Soda Fabrik, of Germany, through their atmospheric nitrogen development, which has been allotted for consumption in the United States.

Naturally because of the existing business depression there is very little activity, with the result that prices have been reduced considerably; in fact, for spot material we can offer, subject to change, ton lots as low as 6 cents per pound, ex warehouse at New York, and for larger quantities it might be possible to shade this figure with a firm bid in hand, although the feeling here is very strong that the bottom of the market has been reached. We have on hand at the present time in New York approximately 50 tons, and no further shipments will come into this country until orders are placed for shipment from abroad.

We have instructions from Germany to find out the prospects of nitrite of soda consumption in the United States over the year 1921, and for this reason we are taking the liberty of addressing you to ask if you will kindly let us have your opinion in this regard. If the market has actually reached its lowest level, this might be a good time to consider requirement contracts for the coming year, and any suggestions that buyers have we shall be happy to cable abroad. The quality of our material is as good as that produced in any part of the world, and we shall be pleased to forward samples upon request.

Awaiting with interest your reply, we are,

Very truly yours,

C. B. PETERS CO. (INC.),
C. B. PETERS, *President.*

Mr. JONES of Washington. Upon that showing, I believe that this increase should be made.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment offered by the Senator from Washington.

On a division, the amendment was agreed to.

Mr. JONES of Washington. Mr. President, I have one other amendment, and then I will not detain the Senate further. I send it to the desk and ask to have it stated.

The PRESIDENT pro tempore. The Secretary will state the amendment.

The ASSISTANT SECRETARY. On page 32, it is proposed to strike out paragraph 204, as amended, and in lieu thereof to insert the following:

PAR. 204. Lime in cooperage, 50 cents per hundred pounds, gross weight; lime in bulk, 30 cents per hundred pounds, gross weight; hydrated lime, 40 cents per hundred pounds, gross weight; limestone, broken or crushed, in bulk, 15 cents per hundred pounds; ground limestone in bags, 7½ cents per 100 pounds; ground limestone in bulk, 5 cents per hundred pounds; including, in every case, the weight of the container.

Mr. JONES of Washington. Mr. President, this tariff proposal is to put the lime industry of the United States upon practically the same basis that Canada puts lime imports into that country. It is to meet especially a situation that confronts our industry on the Pacific coast.

While it is true that our State produces quite a small percentage of the total amount of lime produced in this country, yet, by reason of the peculiar situation confronting us there, the importations of lime—which are rather small, too, compared with the total amount of production—bear especially heavily upon our industry. These importations under the existing law have practically closed down the industry in our State; and this statement is borne out by the Tariff Commission, which says:

Of these imports approximately 90 per cent has come from Canada * * *.

Exports have been less than 1 per cent of production, 90 per cent going to Canada. This exchange of lime has caused severe competition between producers in British Columbia and the State of Washington.

That is true. I do not think the importations cause any particular trouble in the other sections of the country, and the principal effect of this amendment would be to meet the situation there.

I want to read a quotation from a letter that was put in the hearings by former Congressman Humphrey, of Washington, who appeared before the committee and presented this matter quite fully. In this letter it is said:

We know now, of course, what the House did with regard to lime. I am greatly disappointed that they gave us so low a rate of duty in the new bill. It is wholly inadequate and strikingly unfair.

This letter comes, I will say, from the president of the Roach Harbor Lime Co., the principal lime-producing company in our State, they having a capacity, as I understand, of about 450,000 barrels a year. Under the competition of the last few years this has run down to twenty or thirty thousand barrels. They are practically closed.

At the present market price on both sides of the line our lime would pay a duty to enter the Canadian markets of practically 65 cents per barrel. Under the new Fordney bill the rate of 10 cents per 100 pounds would mean 20 cents per barrel upon their lime coming into the United States from British Columbia. In other words, we are required to pay 65 cents per barrel under existing laws to enter the Canadian market, while our Congress is proposing to let them flood our markets with Chinese-made lime at a duty of 20 cents per barrel. This is so strikingly unjust and unfair that I can not properly characterize it. I sincerely hope you may be able to get a very important increase in the duty at the hands of the Senate committee. If they would give us a rate of duty which would be equivalent to that which we would have to pay to go into British Columbia, it would be more like it, although even that would not represent all the difference which exists. Their cost of manufacture is from 40 to 60 per cent less than ours. Their freight is considerably less than ours. In addition to both these advantages the rate of exchange is now about 14 per cent. Such a situation is simply intolerable. I am reliably informed that the Chinese and Hindus are now working all over British Columbia at common labor at $1 per day for 10 hours' work. It would require a duty of at least $1 per barrel, or 50 cents per hundred pounds, to equalize the difference in wages alone. That same difference would apply to the cost of their barrels, etc., and on top of that they would have the difference in freight rates by reason of the lower cost of operating British vessels, and they would have the 14 per cent or 15 per cent difference in exchange.

Mr. REED of Missouri. Mr. President, could this concern whose letter the Senator is reading enter the Canadian market if the Canadian Government did not levy a tax upon the goods made in America?

Mr. JONES of Washington. Possibly so, aside from the question of the cheaper labor. They say that this would not balance the difference in the labor conditions.

Mr. REED of Missouri. I observe that their chief reason for demanding the tariff is that there is a tariff upon our products.

Mr. JONES of Washington. That is not the chief reason. That is one of the reasons.

Mr. REED of Missouri. It is one of the principal reasons.

Mr. JONES of Washington. Yes.

Mr. REED of Missouri. The question I am addressing to the Senator is whether, if that tariff, which they bring in here as an argument, were wiped out, they could go into Canada and compete?

Mr. JONES of Washington. I do not know whether they could or not. The main thing they complain of is that they are placed at such a disadvantage in our own markets and that the Canadian has such an advantage in getting in here. They do not particularly seek to go into Canada.

Mr. REED of Missouri. I understood there was a statement in the letter—and I think I can almost quote it—that if it were not for the Canadian tariff the situation would not be so unfair, or some such expression.

Mr. JONES of Washington. It would not be so unfair, and that is one element of complaint, of course.

Mr. REED of Missouri. They must mean that without that they could gain some advantage by going into the Canadian market.

Mr. JONES of Washington. It does not mean that at all. It simply means that that is one of the disadvantages; it is one of their complaints. They do not say that one is more important than the other. They do say that they are put at this disadvantage in trying to get into the Canadian market by reason of the taxes they would have to pay to get in there. But that is not the only difference. There is the additional difference of the cheaper labor and lower wages, and that might prevent them from getting in even if these charges were removed. I think that is perfectly plain.

Mr. REED of Missouri. If the tariff cuts any figure, it must be because it bars out some of the American products.

Mr. JONES of Washington. Mr. President, I do not yield to the Senator further upon that proposition, because I understand his position, and I think he understands mine.

Mr. REED of Missouri. Very well.

Mr. JONES of Washington. I have not the time in the 15 minutes. I want it understood that they are not trying to get into the Canadian market. That is just as plain as can be. They do want, however, to have their own market, the American market; that is what they seek to have.

Mr. Humphrey points out here the importations which have come in, about a hundred thousand barrels, which have largely come in on the Pacific coast, from British Columbia. They have not only come into the markets of the State of Washington, but they have gone into California and into the Hawaiian Islands and taken the markets there which naturally and normally belong to our manufacturers.

He points out, and gives a table here showing, the difference in the wages and the character of the employment over in Canada as compared with ours. The cheaper freight rates they refer to here are not the railroad rates but the transportation rates on water. The Canadian lime mines are near the water, just as the Washington manufactory is; but it is generally conceded, I think, that the operation of the Canadian ships, the British ships, is cheaper, with lower rates, than ours. Those are the freight rates to which they refer.

I note in the hearings that it is contended that the lime produced in Canada is of a better quality or of a better class than that produced in the State of Washington. I am not a chemist, but I understand it is stated by Congressman HUMPHREY that the chemists of our State agricultural college and the chemists of the Agricultural Department have examined these limes and have found them substantially the same. That opinion is confirmed by the fact that the mines are located largely in the same territory, under the same natural conditions, and in the same natural surroundings, and one would naturally suppose that the lime rock is substantially the same in both localities. So I do not think there is any force in that contention.

This amendment is supposed to place our people upon substantially the same basis with the Canadians, so far as the rates which Canadians would have to pay to come into this country or the rates we have to pay to go into that country are concerned. They do not balance all of the differences. As a matter of fact, it is stated in this letter that it would take about a dollar a barrel, or 50 cents a hundred, and all that they ask here is 50 cents a barrel, or 50 cents for 200 pounds. In the interest of this American industry, I trust that this amendment will be agreed to.

Mr. McCUMBER. Mr. President, I want the attention of the Senate for just a moment, if I can have it. I appreciate the fact that we are mentally as well as physically tired, and when we get mentally tired we are likely to get a little careless. We have just adopted an amendment increasing the rate a thousand fold over the present rate, and we did not hear a whimper on the other side of the Chamber. The fact is, most of the Senators on the other side got up and voted for the amendment, which was too protective even for as staunch a protectionist as the Senator from North Dakota.

Mr. UNDERWOOD. I hope the Senator will recognize the fact that I rose in opposition to the proposal. I do not want him to say that there was no opposition to it on this side.

Mr. McCUMBER. I know the Senator did.

Mr. ROBINSON. I did the same thing.

Mr. McCUMBER. But the amendment was agreed to. It was carried because we were not paying much attention, and I simply mention it so that we will not get too careless about these matters just at the close of the discussion of the amendments upon the bill.

Mr. President, I want to call attention to this amendment. The other is agreed to, and we can take care of it in some way in conference, and try to make it as correct as we can, and if the article ought to have that much of an increase, I think we will allow it to stand. But let us take this matter of lime which comes in from Canada. I am rather surprised that somebody has not gotten up and talked about the poor man's home, which must go without being plastered, and all of that, which we heard discussed for a month or so when we were considering the rate on cement, brick, and so forth.

As a matter of fact, we import about 1 per cent of our consumption of lime in the United States, and most of those imports come in, as the Senator suggested, across the line in Washington. We also export just about the same amount of lime, and we export it over into Canada on the east side. So we have that seesaw between the United States and Canada, we exporting over on the east side and Canada importing on the west side into the United States. I suppose to equalize it Canada should have a duty at the east end as against the importation of American lime. The committee considered these matters when they were before it, and my opinion is that we ought not to change the rate at this late hour without some consideration.

Mr. ROBINSON. Mr. President, with respect to the last amendment voted upon, namely, the amendment proposed by the Senator from Washington [Mr. JONES] relating to nitrite, I voted against that amendment and now give notice that a separate vote is demanded upon the amendment when the bill gets into the Senate.

Concerning the pending amendment, under the act of 1913 there is a rate of 5 per cent ad valorem on lime. Limestone is on the free list under the present law. Under existing conditions the price of lime has increased very rapidly during the last few years. Commencing with 1916, the price averaged $4.52 per ton. In 1917 it was $6.29; in 1918 it was $8.36; in 1919 it was $8.84; and in 1920 it was $10.52, the figures for 1920 being the latest furnished.

The information submitted in the tariff surveys furnished by the Tariff Commission shows that the imports are less than 1 per cent of the domestic production. The exports are the same, namely, less than 1 per cent of the production. Ninety per cent of the imports come from Canada and 90 per cent of the exports go to Canada.

Under the facts furnished by the Tariff Commission, there appears to be no justification for imposing the proposed increase contemplated by the amendment of the Senator from Washington. It does seem as if this very useful and sometimes cheap commodity might be admitted with very small duties. The duties carried in the pending bill are the same as those provided in the Payne-Aldrich law. Under the existing law there are no importations to speak of, and the only effect of increasing the rate will be to accentuate or give further impetus to the already increasing prices of this product. I shall, therefore, vote against the amendment.

Mr. JONES of Washington. Mr. President, what I am about to ask is not in order, but the Senator from North Dakota discussed the amendment voted on a few minutes ago, and I ask unanimous consent to take just about a minute to refer to the statement he made. He said, as I understood him, that the previous amendment represented an increase of a thousandfold over the present tariff rate. That just illustrates what can be done with percentages. It does represent about 1,000 per cent increase of the present tariff rate, but the present rate is 5 per cent ad valorem, and this means, then, only 50 per cent ad valorem. That does not seem quite so large.

Mr. REED of Missouri. Mr. President, in the colloquy with the Senator who is the author of the amendment we did not quite agree as to the terms of the letter he read. I desire a moment to clarify that situation. The Senator read the letter, which is stated to be from the president of the largest lime-manufacturing plant on the Pacific coast. The letter states:

> Under the new Fordney bill the rate of 10 cents per 100 pounds would mean 20 cents per barrel upon their—

That is, the Canadian—

> lime coming into the United States from British Columbia. In other words, we are required to pay 65 cents per barrel under existing law to enter the Canadian market, while Congress is proposing to let them flood our market with some Chinese-made lime at a duty of 20 cents per barrel. This is so strikingly unjust that I can not properly characterize it. I sincerely hope you may be able to get a very important increase in the duty at the hands of the Senate committee. If they would give us a rate of duty which would be equivalent to that which we have to pay to go into British Columbia, it would be more likely, although that does not represent the entire difference.

Now, Mr. President, if that language means anything it means that we suffer a disadvantage because of the disparity in rates which are levied upon Canadian lime and duties which they

levy upon American lime. Manifestly there can be no disadvantage to us arising from any duty the Canadian levies upon our lime and the difference between that duty and the American duty unless we are able to make the lime and send it into Canada at a profit barring the duty.

More than that, we must be able to send it there and sell it at a profit if their tariff and our tariff are equal. When we come to analyze that statement and bring it down to its logical conclusion, it means that we are able to make lime and compete with Canada in the Canadian market in the absence of any tariff, and if that is true we certainly can compete in our own market against Canadian lime with the tariff that is placed in the bill at the present time without increasing it.

There is no answer to that. There can be no answer to it. I repeat, if we can go into Canada with a tariff equal to theirs and sell in their market, then we could go into Canada if there was no tariff in either country. That means that we could go into Canada and compete, and if we could compete in Canada in the absence of any tariff, we ought to compete at home with a high protective tariff such as is already written in the bill.

There is talk here about Chinese labor and India labor. Everybody who knows the facts knows that the rate of wages in Canada is higher than in the United States in almost every line. If it was not higher the people would not be living there, speaking broadly now and omitting special cases. People go into that new country and suffer the hardships that go with pioneer life because they can do a little better than they can in the United States, particularly when they have small capital. No man is going to work on that side when he can come a few miles south and get better wages. No man is going to work on our side of the line very long if wages are much higher in Canada, taking into account the increase in the hardships of life. There are but a limited number of inhabitants of India in Canada and only a very limited number of Chinese. They do not control the labor market or labor conditions, as everybody knows. This is another one of the cases which will not bear analysis.

Mr. President, the Senator in charge of the bill said that we increased some item a thousand per cent and that nobody on this side of the Chamber protested. Everybody protested who had an opportunity, but let me inquire why the distinguished and astute Senator in charge of the bill was not heard to protest against a thousand per cent increase? He is supposed to know more about the bill than anybody else, and yet I did not hear his clarion voice ring out a warning. He seems to have sat still and allowed the American people to be mulcted to the tune of a thousand per cent and now tries to shift the responsibility over on the devoted heads of the Democrats, who have been fighting against all this scheme of graft and robbery for some months.

We may have brain-fag, but our consciences are sufficiently alive so that if we had the information which the Senator has, even more men might have listened to protest. But what value is there in protest? We have protested against the various items by the hour, by the day, by the week, by the month, and argument has been as ineffective as an argument in favor of the innocence of the Savior would have been at the court of Pontius Pilate.

I submit that if the Senator in charge of the bill sees any more 1,000 per cent duties being levied, he ought to advise even the cloakrooms, and he ought to advise the country. He ought to let everybody know; for, after all, this is not a contest between the Democratic side and the Republican side. This is a question of a tax levied upon the American people; and it is a very poor excuse to be offered by any Senator that he sat still and saw 1,000 per cent added to a tax and that the other side of the Chamber did not rise to protest before it was worn out and had become weary in well-doing. I can understand, of course, how a Senator entertaining the views of our brethren on the other side of the aisle would think that 1,000 per cent tax was justifiable; and that, in fact, is a part of the very logic of their case. But the people of the United States have to pay the tax, and, thank Heaven, the people of the United States will have an opportunity to vote next November.

Mr. CALDER. Mr. President, the rate provided for in the amendment of the Senator from Washington is 50 cents per 100 pounds on lime which may be used for building purposes. The rate in the bill as reported from the Finance Committee is 5 cents per 100 pounds. The rate under the present law is 5 per cent. The rate under the Payne law was 5 cents per 100 pounds. It is possible that this commodity may be entitled to a higher rate than that given by the committee, but I can not for the life of me understand how under any circumstances it is entitled to the rate asked for by the Senator from Washington.

This is a commodity used in every building operation in the land, and while it is true that we only import about 1 per cent of our consumption, this large rate may tend to bring up the level of prices for all of the construction in the country. It seems to me that the rate is so high that the amendment ought to be defeated.

Mr. McCUMBER. Mr. President, the Senator from Missouri [Mr. REED] has been so long in a campaign in his own State that he has to carry the character of argument in his mind that he has probably been making there. Perhaps that would go down there, and if he would tell a Missourian that when a Senator moved to increase a rate from one-half a cent to 5 cents a pound he had increased the duty 1,000 per cent, they would believe it. He could perhaps convince them that the duty thereafter would be 1,000 per cent upon that article. That is what the Senator has just been stating in this Chamber. I think the average Senator who is a listener, however, understands that the raise was from one-half of 1 per cent to 5 per cent. That is 1,000 per cent increase over the present rate. It is not a 1,000 per cent duty, however, as was well explained by the Senator who made the motion to amend.

Mr. STANLEY. Mr. President, can the Senator state the ad valorem equivalent of the present rate?

Mr. McCUMBER. The present rate is one-half cent.

Mr. STANLEY. Can the Senator tell me the equivalent ad valorem?

Mr. McCUMBER. I understand it is 5 per cent ad valorem.

That is the only point I desire to make, and I did not do it in a manner that was discourteous to anyone. I have never followed that kind of a rule in argument and have never attempted to be sarcastic in my argument on a serious matter. I have generally thought it was worth fair and candid consideration. I did call attention to the fact that the raise was heavy. I voted against it and voted loud enough to have been heard. When we were called upon for a division, I stood up against it. That was enough to indicate at least the view of the chairman of the committee, and when I saw a great many Senators upon the other side of the Chamber rising in support of it and carrying an amendment of that kind, I thought it very proper to utter a caution against considering matters of that kind or voting upon them without due consideration.

We have got to hurry on with the amendments, without much opportunity for consideration, there being only about three-quarters of an hour in which we may discuss amendments at all. I gave simply one case the action in which I thought ought to be a little lesson to guide us in the consideration of amendments which will come up when we can no longer discuss them.

I have not, Mr. President, failed in my duty. It was called to my attention just what the amendment was, rushed through as it was, suddenly, and I sought to sound a note of warning that I thought it was unduly high, and I did so both by voice and by standing up on a division to be counted against it.

Mr. REED of Missouri. Mr. President——

The PRESIDENT pro tempore. The Chair desires to remind both the Senator from Missouri and the Senator from North Dakota that there is a provision in the unanimous-consent agreement that requires Senators to speak upon the question pending.

Mr. REED of Missouri. I am going to speak on that.

The PRESIDENT pro tempore. The Chair allowed both Senators to transgress the rule.

Mr. REED of Missouri. Mr. President, the Senator from North Dakota in discussing this amendment that seems to be under discussion, said I was sarcastic with reference to him and that he never is sarcastic. I hope the Senator does not for a moment think that I have at all gotten out of his class in the matter of courtesy.

The Senator several times referred to the fact that I have been in a campaign. I have been. The Senator was in a campaign. He also made the statement that I might make something go in Missouri. I am not boasting about the result in Missouri, but I think that what I said in Missouri went quite as well as what the Senator said in his own State, estimating it by results.

Mr. McCUMBER. The Senator is not thoroughly acquainted with what has been going on. I attended to my duties here in the Senate and was not in my State a day during the entire summer, so that the Senator can not say what I said in my State or what I did not say, for I was not there. I wish he would stick to the facts.

The PRESIDENT pro tempore. The Chair desires to remind Senators that this discussion is out of order.

Mr. ROBINSON. It is intimately related to the line of thought.

Mr. REED of Missouri. I think so; and I think, since the Senator has stated that I misrepresented his statement, that I am entitled to correct him. I endeavored to quote his exact language and to follow it to its legitimate conclusion. I do wish to say this—and with that I shall be content to sit down—that whether I was here or in Missouri, whether the Senator from North Dakota was here or in his State, I think I served the country quite as well where I was as the Senator did where he was.

The PRESIDENT pro tempore. The question is on the amendment proposed by the Senator from Washington [Mr. JONES].

The amendment was rejected.

Mr. McLEAN. Mr. President, I ask unanimous consent that the vote by which paragraph 1435a, on page 198, was agreed to may be reconsidered, in order that I may offer an amendment. The paragraph reads as follows:

Harness valued at more than $70 per set, saddles valued at more than $40 each, saddlery, and parts (except metal parts) for any of the foregoing, 35 per cent ad valorem.

The PRESIDENT pro tempore. The Senator from Connecticut asks unanimous consent——

Mr. WALSH of Montana. Reserving the right to object, I ask the Senator from Connecticut to state the amendment which he proposes to the amendment.

Mr. McLEAN. I shall be glad to do so.

The PRESIDENT pro tempore. The motion of the Senator from Connecticut is out of order unless the vote by which the amendment was adopted heretofore shall be reconsidered.

Mr. McLEAN. The Senator from Montana (Mr. WALSH) desired that I explain the amendment before the request was put, and I am willing to do that; indeed, I prefer to do that.

Mr. President, the Senate will remember, I think, when hides were put upon the free list that a great many articles which are composed in whole or in part of leather were also put upon the free list, and among them were harness and saddlery.

As originally adopted and as recommended by the committee a rate of 35 per cent ad valorem was imposed on harness and saddlery. That amendment, however, was rejected by the Senate.

The Committee on Finance on the day following felt that that was a mistake, as saddles are made of pigskins, which bear an ad valorem rate of 20 per cent, and as Canada imposes a duty of 35 per cent ad valorem upon harness and it is a highly finished product involving considerable labor, it was felt that it was unfair to put these articles on the free list. Therefore, the amendment which has been adopted by the Senate is the amendment which I have just read, proposing to put a rate of 35 per cent ad valorem upon harness valued at more than $70 a set and upon saddles valued at more than $40 each.

I am reliably informed that good saddles may be bought for $20 each and, as I have stated, I am also informed that saddles are made of pigskins, which carry a rate of 20 per cent ad valorem. So it seems to me to be unjust to this industry to leave it in this condition, having to pay a duty on its raw material. For that reason I desire to offer the amendment to the amendment.

Mr. WALSH of Montana. Mr. President, I object.

Mr. McLEAN. Then I move that the Senate reconsider the vote by which the amendment was agreed to.

The PRESIDENT pro tempore. The question is on the motion of the Senator from Connecticut to reconsider the vote by which paragraph 1435a was agreed to. [Putting the question.] The Chair is in doubt. Those who are in favor of the motion will rise and stand until they are counted. [A pause.] Those opposed will rise. [A pause.] The motion of the Senator from Connecticut is agreed to. The Senator will send the amendment which he proposes to the desk.

Mr. McLEAN. I send the amendments to the desk, and ask that the second amendment, which relates to saddles and saddlery, be first acted upon.

The ASSISTANT SECRETARY. In the committee amendment, on page 198, paragraph 1435a, in the second line of the paragraph, it is proposed to strike out the words "valued at more than $40 each."

The PRESIDENT pro tempore. The question is on agreeing to the amendment proposed by the Senator from Connecticut to the amendment of the committee.

Mr. WALSH of Massachusetts. Mr. President, I understood that the reason why saddles and saddlery were put upon the free list after the vote to put hides upon the free list was because harness and saddlery are made chiefly of cowhide; and, as no duty is imposed on cowhide, it did not seem necessary to levy a duty upon harness or saddlery.

Now I am informed that practically all the saddlery and harness which is made in this country is made of cowhide. Under those circumstances it does not seem to me that there ought to be a duty levied upon saddlery and harness.

Furthermore, there are no importations of any consequence, and the action of the committee after the vote upon hides it seems to me ought to stand. Under a previous law and under the present law there is no such duty, but it is now proposed, with hides free, to place a duty upon certain classes of harness and saddlery.

Mr. WALSH of Montana. Mr. President, I objected to reconsidering the vote in view of the statement made by the Senator from Connecticut to the effect that saddles are made of pigskin and that pigskin bears a duty. I suppose it is probable that some saddles are made of pigskin. Probably the English saddle and possibly the McClellan tree are made of pigskin, but a man riding a pigskin saddle out West would be a curiosity.

Moreover, Mr. President, a pigskin saddle requires about one-fifth of the amount of leather which is employed in the manufacture of an ordinary stock saddle. But saddles, as a matter of course, as everybody knows, are made of cowhide and not of pigskin, so the reason did not seem to be persuasive to any degree whatever. I do not know how much of pigskin is imported into this country for use in the manufacture of saddles, but I do know that in the matter of the production of pigs—the real pigs that furnish the skins—we do not import many of them into this country. So I really do not believe that the fact that pigskin bears a duty of 20 per cent is going to burden to any extent whatever the manufacture of even pigskin saddles in this country. The amendment, in my judgment, ought not to prevail.

Mr. McLEAN. Mr. President, just a word in reply to the statement which was made by the Senator from Massachusetts [Mr. WALSH]. I am informed by the experts that the seats of all these saddles are made of pigskin. I will also say to the Senator from Montana [Mr. WALSH] that there are a good many expensive saddles which are imported from England and a good many expensive sets of harness, some of it gold plated or silver plated.

Mr. WALSH of Montana. We make no point on that. The Senator has taken care of that by providing that harness costing more than $70 shall pay a duty and saddles costing more than $40 shall pay a duty.

Mr. McLEAN. Imported saddles, I am informed, average not over $40.

Mr. WALSH of Montana. What is the difference?

Mr. McLEAN. Then they come in free.

Mr. WALSH of Montana. Why should they not come in free when leather is free?

Mr. KELLOGG. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Connecticut yield to the Senator from Minnesota?

Mr. McLEAN. Yes.

Mr. KELLOGG. Do I understand that the proposition now is to put all saddles on the 35 per cent basis?

Mr. McLEAN. Yes.

Mr. KELLOGG. I thought if we had free leather we were going to have free manufactured products of leather. Now we have free leather and an effort is being made to increase the duty on saddles. Are you going to ask to put in boots and shoes next?

Mr. McLEAN. No. We have free iron ore, but we do not put knives on the free list.

Mr. KELLOGG. No; I notice that you do not.

Mr. McLEAN. There are a great many things that we did not put upon the free list where we have the raw material free. From 80 to 90 per cent of the value of the saddle is in the labor, and the pigskin that is used pays a duty of 20 per cent ad valorem, and it is no more than fair that these saddles should bear a reasonable rate of duty.

Mr. WALSH of Massachusetts. Mr. President, the original committee amendment provided for a rate of 35 per cent ad valorem on harness, saddles, and saddlery. Then the Finance Committee offered a substitute amendment fixing the rate of 35 per cent upon harness valued at over $70, and saddlery valued at over $40. That was abandoned after the vote upon hides, after the Senate had declared for free hides. Now the Senator from Connecticut proposes to restore the original amendment of the committee, which is higher than the substitute amendment of the committee, because the substitute amendment puts some limitations upon the value of the harness and saddlery that was to bear this duty of 35 per cent. How does the

Senator, in view of the action of the Senate for free hides, justify now asking the Senate to adopt a rate which is the same as the rate named by the committee when they were advocating a duty upon hides?

Mr. McLEAN. I certainly do justify it, and I have given my reasons. The action of the Senate in limiting the value of the saddle to $40 is of no benefit whatever, because they will all come in at less than that price.

Mr. WALSH of Massachusetts. Although the Senate has decided to admit hides free, the Senator says that it is now necessary, in order to protect this industry, to restore the rate which the Senate committee advocated when they were putting a duty upon hides?

Mr. McLEAN. Yes. The Senate put many varieties of fine leathers on the free list, and since that time it has reconsidered its action and put a tariff on those leathers.

Mr. WALSH of Massachusetts. Mr. President, it seems to me that harness and saddlery ought to be upon the free list, just as cowhides are.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment of the Senator from Connecticut to the amendment of the committee.

On a division the amendment to the amendment was rejected.

The PRESIDENT pro tempore. The Secretary will state the second amendment proposed by the Senator from Connecticut.

Mr. McLEAN. I withdraw the second amendment.

The PRESIDENT pro tempore. The amendment is withdrawn. The question is on agreeing to the amendment of the committee.

The amendment of the committee was agreed to.

Mr. SIMMONS. Mr. President, I send forward an amendment which I offer on behalf of the junior Senator from Utah [Mr. KING].

The PRESIDENT pro tempore. The amendment will be stated.

The ASSISTANT SECRETARY. On page 226, line 23, it is proposed to insert the following new paragraph:

PAR. 1611a. Menthol.

Mr. SIMMONS. Mr. President, I recognize that the time is short, and I have only a word to say with reference to this amendment.

Menthol is used exclusively in the manufacture of medicinal preparations. Booklet A–10 of the Tariff Information Surveys, at page 54, states:

> Menthol is used almost exclusively in medicine. It is an antiseptic and local anesthetic, valuable in neuralgia and irritations of the skin. Large quantities are also used in cough drops.

There is more about it which I will not read.

Menthol is one of the most valuable and widely used drugs in this country, and its use is enormously increasing. There is in my State a large establishment which was started in 1910–11, and they sold at that time 347,748 jars. In 1918–19 they were selling 17,628,192 jars, showing the extent to which one establishment has increased its business in the manufacture of medicines from menthol.

In addition to that, Mr. President, I am advised that not a pound of menthol is made in the United States. A tariff on menthol can afford no protection to any American growers or manufacturers, since menthol can not be made in this country. The establishment in my State to which I have referred states that it has never been able to buy a pound of menthol anywhere else in the world except from Japan.

Menthol in the House bill is dutiable at the rate of 25 per cent ad valorem, and the Senate proposes to tax it at the rate of 50 cents a pound.

As I have stated, menthol is used exclusively as a medicine, a very essential and necessary medicine, a medicine which has to do largely with nerve diseases and with coughs, pneumonia, and things of that sort. Medicine ought never, Mr. President, if it can be avoided, to be the subject of taxation, especially medicine that is commonly used among the people. That is a principle which I think will address itself to the intelligence and the humanity of every man, and which has prevailed in most tariff and taxation bills. For that reason and because menthol is not produced in this country and the importations therefore do not interfere with any domestic industry, but a duty upon them would simply add a burden to this medicine that is in common use among the people, I ask, in behalf of the Senator from Utah [Mr. KING] and myself, that this product be put upon the free list.

I ask that two pages of a statement which I have here, and from which I have read extracts, be printed as a part of my remarks without reading.

There being no objection, the matter referred to was ordered to be printed in the RECORD, as follows:

H. S. Richardson, president and general manager of the Vick Chemical Co., in discussing this subject, uses the following language with reference to the manufacture of this product by his company:

"It is not believed that it is the intention of Congress to tax the sick by putting a duty on medicines, except where protection is needed for American manufacturers. If this be the case, menthol should never carry a duty, because—

"First. Menthol is used exclusively in the manufacture of medicinal preparations.

"Menthol is an important medicinal obtained from peppermint oil. Booklet A–10, Tariff Information Surveys, page 54, states:

"'Menthol is used almost exclusively in medicine. It is an antiseptic and a local anesthetic, valuable in neuralgia and irritations of the skin. Large quantities are also used in cough drops, mentholated vaseline, sprays, and inhaling tubes. As an external preparation it is used in alcoholic solution or as a salve (when mixed with petrolatum or other greases).

"'Official preparations of menthol are menthol inunction, compound menthol inunction, antiseptic solution with pepsin, camphorated menthol, aromatic oil spray, menthol spray, compound menthol spray, menthol petroxylin, and antiseptic powder.'

Menthol is one of the most valuable and widely used drugs known. The United States Dispensatory, the standard authority on drugs and their uses, says of menthol:

"When locally applied it stimulates the nerves for the perception of cold, but depresses those for pain. It is actively antibacterial. It is used for its local anesthetic influence in various skin diseases accompanied with itching, such as urticaria. In headache and other forms of neuralgia the external application of menthol will frequently produce a considerable degree of relief. It is employed for its antiseptic and anesthetic influence in inflammations of the upper respiratory tract, such as acute coryza, pharyngitis, and laryngitis."

A. THE USE OF MENTHOL IS STEADILY INCREASING.

As its virtues have gradually become known, the use of menthol has steadily increased in the United States.

"From 1910 to 1913 imports averaged 43,000 pounds. For the period 1914–1918 imports averaged 145,000 pounds. Maximum import was during 1919, when 243,000 pounds were imported." (Tariff Information Surveys.)

As an illustration of how the use of menthol has increased, my father, a druggist in a small North Carolina town, 20 years ago, when menthol was new in this country, became interested in the drug. He found a way to combine it with camphor and other volatile oils in a base of crude petrolatum, so that when the salve was applied to the throat or chest, the body heat released the volatile ingredients in the form of vapors. He thus had a cheap, efficient vapor lamp in salve form, as these vapors, being lighter than air, rose up and were inhaled with each breath through the air passages to the lungs. At the same time the product had a rubefacient and antiphlogistic effect through the skin. Beginning with a few packages sold over the prescription counter its use has greatly increased, as follows:

Number of packages of Vicks sold by years.

	Jars sold.
1910–11	347,748
1911–12	523,152
1912–13	1,027,068
1913–14	1,357,590
1914–15	1,462,330
1915–16	2,418,213
1916–17	4,302,564
1917–18	6,846,480
1918–19	17,628,192

and this is only one product. There are over 300 manufacturers who put up menthol in package form. In addition an enormous quantity of menthol is used for prescription work. Nearly every druggist makes up his own menthol cough syrup, menthol sprays, inhalers, etc.

I give these figures to show how widespread is the use of menthol as a medicine. So far as I know, it has no other use.

Second. Not a pound of menthol is made in the United States.

A tariff on menthol can afford no protection to any American growers or manufacturers since menthol can not be made in this country. We have never been able to buy a pound of menthol anywhere else in the world, except from Japan. Peppermint, from which menthol is obtained, is grown in this country, but it is not the right kind to produce menthol. The oil contains a very much lower percentage of menthol, and requires more elaborate processes for extraction. So that unless we succeed in growing the same variety of black mint as that used in Japan, we do not believe that production in this country is possible.

For these two reasons, therefore—

Because menthol is used widely and exclusively as a medicine, and because a duty would give protection to no one, we respectfully urge that menthol be placed on the free list. The revenue derived from the present duty of 50 cents per pound on menthol is very small, running from $8,000 in 1908 to $57,000 in 1915, $86,000 in 1917, and $121,000 in 1919.

Mr. McCUMBER. Mr. President, the Senator from North Carolina says that there is no menthol manufactured in the United States. The Senator is absolutely right. There is none manufactured in the United States. There is none manufactured anywhere in the world except in Japan, if my information is correct. They have a complete monopoly, under Government control. They charge whatever they see fit, and what they see fit is what the trade will bear. It is sold here at about $5 a pound. The duty, therefore, would be about 10 per cent ad valorem. I think the product would absorb the duty, and, in my opinion, it would not raise the price.

Mr. SIMMONS. Mr. President, may I interrupt the Senator? Does the Senator think because a product of a foreign country, of which there is none produced in this country, is controlled by a trust, and they charge, therefore, a high price, especially

when that product is a medicine of the people, that we should impose a duty and thereby further advance this enormous, and it may be unconscionable, price?

Mr. McCUMBER. That is on the supposition that we necessarily advance the price by imposing a duty. Inasmuch as the Japanese can charge anything they have a mind to charge for this product, I have an idea that they are charging about what they think the traffic will bear to the consumers in North Carolina.

We will get from this duty, at this rate, about $150,000 a year. It is a revenue duty, pure and simple. I do not think that every product that we do not produce in the United States must necessarily be put upon the free list if it will bear a duty and bear it without an unjust imposition upon the American people. I think this is one of the cases where it will, and I think the Japanese Government, or its people, whoever controls the trust that controls the prices in Japan, can well afford to pay the $150,000 into the United States Treasury.

Mr. SIMMONS. Mr. President, just one word. If it is the policy of the Republican Party to place a revenue duty upon a medicine which is in common use by all of the 110,000,000 people of this country, of course the Senator is consistent.

Mr. UNDERWOOD. Mr. President, before this debate closes, I want to say that I have listened with much interest to the Senator in charge of the bill in his advocacy of revenue rates in this bill. I believe in a revenue tariff myself—it is the only kind of tariff I believe in—not a protective one; but whenever the Senator has been unable to sustain his rate for any other reason in the debate on this bill, he has said that it would produce a revenue.

If revenue is really what the Senator from North Dakota wants, why does he limit it to the articles named? If he wants revenue that does not protect anybody, there is a very much larger field to go into if he does not propose to discriminate. There is no coffee produced in continental United States. Most of our coffee comes from Brazil, and the Government of Brazil levies an export tax that the American people have to pay. If the Senator wants a revenue measure, why does he not tax coffee? I do not believe, myself, in levying revenue duties or protective duties on food products as a rule; but if I had to choose between levying a revenue duty on medicine and levying it on food, I would let the medicine come in free and put the tax on food.

Although I have great respect for the Senator in his ideas about this bill, I do not think he has been consistent in his defense of duties because they are revenue rates. If the Senator really desires to raise revenue, he has left out of this bill many, many articles that would produce very considerable revenue at a low rate of taxation. I know that his party has never stood for levying taxes on that class of articles that has not produced protection as well. I do not understand why this particular rate of duty is proposed; but I want to make this last appeal to the Senator: If there is nothing in this duty of a protective nature—and the Senator admits in his argument that it is not levied for the sake of protecting an industry—if we are going to discriminate and leave items on the free list, and there is no violation of the principles of the Republican Party whether this duty is levied or not, why should we tax a medicine that is necessary to the health of the American people?

In regard to an article of this kind, even if we do have to pay high prices for it, I do not believe one degree of increased burden should be added, and I do not think the Senator has justified his course in the matter at all by simply pointing out that some little revenue will come to the Government from levying this tax.

Mr. McCUMBER. Mr. President, I suppose that a duty if levied by the Republican Party is exceedingly offensive, but that it is absolutely right when it is levied by the Democratic Party. I do not try to work Republicanism and Democracy into a discussion of this tariff bill; I am simply discussing it from the American standpoint.

In the Underwood tariff law the Senator put 50 cents a pound upon menthol. What did he do it for? It was just as much a medicine then as it is a medicine now. Coffee was free, and we make coffee free. We are continuing the same duty and the same freedom from duties upon the same articles.

Mr. OVERMAN. Mr. President, the House made the duty 25 per cent ad valorem, and the Senate committee made it 50 cents a pound.

Mr. McCUMBER. Twenty-five per cent ad valorem is very much higher than 50 cents a pound. I am stating that the Senator from Alabama, in his perfect revenue bill, placed a duty of 50 cents a pound upon medicine which the American people use, and we carry that same duty, that same awful imposition, into this bill. It is a revenue duty, as I stated. The Senator was right when he had inserted in the bill which bears his name a provision placing a duty of 50 cents a pound upon menthol. We are right in carrying the 50 cents a pound on menthol, not as a protection, but as a revenue duty, pure and simple.

Mr. UNDERWOOD. Mr. President, the Senator is right about the bill, but not right about my attitude. Of course, I have to carry the burden of many things which are in the law which happens to bear my name in part, but my attitude in reference to such a class of medicines and such a class of foods is that they should go on the free list, that they should be untaxed. That was my attitude when the bill was written and it is my attitude now. I do not justify all the rates in the present law because it happens to bear my name. I have said on the Senate floor many times in this debate that, in my judgment, many of the rates were too high; that they were too conservatively written; and that if I had an opportunity now, with the light of the past before me, I would lower the rates. I still contend that if you are going to put this rate in only for a revenue purpose you should levy your revenue rates on something else besides a necessary medicine.

Mr. McCUMBER. I heard no protest from the Senator in 1913 against this duty when he had his bill before the Senate, and I think he will look in vain for a single word of protest.

Mr. UNDERWOOD. Mr. President——

The PRESIDENT pro tempore. Both the Senators have spoken twice upon this amendment and there can be no further debate.

Mr. UNDERWOOD. In the Senator's time, if he will permit me, I want to say that I was not in the Senate then, and he could not have heard my voice.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment proposed by the Senator from North Carolina [Mr. SIMMONS].

Mr. SHEPPARD. Mr. President, I do not desire to discuss this amendment, but I want to make an announcement. I had intended to offer amendments to certain paragraphs in the metal schedule and to the spun silk and sewing silk paragraphs of the silk schedule, the House text of which has remained unchanged, amendments to which therefore could not be offered by individual Senators while the committee amendments were pending. Inasmuch, however, as the issues connected with those schedules have been thoroughly made up, and inasmuch as reductions could not be hoped for, I shall not offer those amendments.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment offered by the Senator from North Carolina, which the Secretary will again state.

The ASSISTANT SECRETARY. On page 226, at the foot of the page, the Senator from North Carolina moves to insert a new paragraph, as follows:

PAR. 1611a. Menthol.

Mr. SIMMONS. I ask for a division.

On a division, the amendment was rejected.

Mr. WALSH of Montana. I inquire whether any change has been made in the text of paragraph 374, on page 84.

The ASSISTANT SECRETARY. The only change is that the word "coils" is inserted before the word "plates," on line 18.

Mr. WALSH of Montana. Then I move to amend by striking out, in line 18, the words "in crude form, 5 cents per pound," and to further amend by striking out "9," in line 20, and inserting "3½." If that amendment shall prevail, I shall move a further amendment to the free list, to read as follows:

Aluminum, aluminum scrap, and alloys of any kind in which aluminum is the component material of chief value.

So that aluminum, aluminum scrap, and alloys of aluminum will be on the free list, and aluminum in coils, plates, sheets, bars, rods, circles, disks, blanks, strips, rectangles, and squares will bear a duty of 3½ cents per pound, which is the duty prescribed in the existing law.

Mr. President, I do not desire to say anything in support of this amendment. I desire to have a yea-and-nay vote from the Senate, however, upon the question as to whether we shall put practically a prohibitive duty upon crude aluminum, aluminum scrap, and alloys of aluminum, when, as has been repeatedly declared in the Senate and not controverted, and which can not be controverted, the production of aluminum in the United States is in the hands of one single company, a complete, iron-bound monopoly, with no competition of any kind or character whatever; while, on the other hand, there are a large number of independent manufacturers of household utensils and other household goods of aluminum, and aluminum has become a

most essential factor in the automobile industry and in many other industries.

I simply desire to know whether the Senate will go upon record in favor of a protective tariff upon a commodity that is absolutely controlled by one single monopoly, and that in many respects an exceedingly offensive monopoly.

The PRESIDENT pro tempore. Does the Senator from Montana ask unanimous consent that both amendments shall be considered as one and that a single vote upon the amendments shall be taken?

Mr. WALSH of Montana. I ask unanimous consent that the two may be considered together.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and the amendments proposed by the Senator from Montana will be treated as a single amendment.

Mr. WALSH of Montana. I ask for the yeas and nays.

The yeas and nays were ordered.

The reading clerk proceeded to call the roll, and Mr. ASHURST responded in the affirmative.

Mr. PHIPPS. I would like to have the amendment reported again.

Mr. ROBINSON. Mr. President, a point of order. The roll call has begun.

The PRESIDENT pro tempore. The roll call has begun and a response has been made.

Mr. WALSH of Montana. If the amendment is not understood, I ask unanimous consent that the Secretary restate it.

The PRESIDENT pro tempore. The Chair will ask the Secretary to state the amendment.

The ASSISTANT SECRETARY. On page 84, paragraph 374, relating to aluminum, aluminum scrap, and alloys, on line 18 it is proposed to strike out the words "in crude form, 5 cents per pound."

Then, where it relates to coils, plates, sheets, bars, and so forth, on line 20, it is proposed to strike out "9" and to insert in lieu thereof "3½," so that if amended it will read:

Three and one-half cents per pound.

Mr. WALSH of Montana. I think the Secretary should state that it is also proposed to insert as a separate paragraph, at page 209, the following words:

Aluminum, aluminum scrap, and alloys of any kind in which aluminum is the component material of chief value.

So as to put those articles on the free list.

The PRESIDENT pro tempore. The Secretary will proceed with the roll call.

The reading clerk resumed the calling of the roll.

Mr. EDGE (when his name was called). Transferring my pair with the senior Senator from Oklahoma [Mr. OWEN] to the junior Senator from Vermont [Mr. PAGE], I vote "nay."

Mr. McCUMBER (when his name was called). Transferring my pair as on the previous vote, I vote "nay."

Mr. POMERENE (when his name was called). Transferring my pair, as heretofore announced, with my colleague [Mr. WILLIS] to the senior Senator from Nebraska [Mr. HITCHCOCK], I vote "yea."

Mr. WALSH of Montana (when his name was called). Transferring my pair as announced on the previous vote, I vote "yea."

Mr. WATSON of Indiana (when his name was called). Making the same transfer as before, I vote "nay."

The roll call was concluded.

Mr. HARRISON. I desire to announce that I am paired with the junior Senator from West Virginia [Mr. ELKINS]. In his absence I withhold my vote. If permitted to vote, I should vote "yea."

Mr. JONES of Washington (after having voted in the affirmative). As heretofore announced, I am paired for the evening with the senior Senator from Virginia [Mr. SWANSON]. However, understanding that he would vote, if present, as I have voted, I allow my vote to stand.

Mr. CURTIS. I desire to announce the following pairs:

The Senator from California [Mr. JOHNSON] with the Senator from Georgia [Mr. WATSON];

The Senator from Missouri [Mr. SPENCER] with the Senator from Georgia [Mr. HARRIS];

The Senator from Illinois [Mr. McKINLEY] with the Senator from Arkansas [Mr. CARAWAY];

The Senator from Michigan [Mr. TOWNSEND] with the Senator from Wisconsin [Mr. LA FOLLETTE];

The Senator from Vermont [Mr. DILLINGHAM] with the Senator from Virginia [Mr. GLASS]; and

The Senator from Maine [Mr. FERNALD] with the Senator from New Mexico [Mr. JONES].

The result was announced—yeas 24, nays 33, as follows:

YEAS—24.

Ashurst	Kellogg	Rawson	Smith
Capper	McKellar	Reed, Mo.	Stanley
Cummins	Myers	Robinson	Trammell
Dial	Norbeck	Sheppard	Underwood
Fletcher	Overman	Shields	Walsh, Mass.
Jones, Wash.	Pomerene	Simmons	Walsh, Mont.

NAYS—33.

Ball	Gooding	Moses	Stanfield
Brandegee	Hale	New	Sterling
Bursum	Harreld	Newberry	Sutherland
Calder	Keyes	Nicholson	Wadsworth
Cameron	Lodge	Oddie	Warren
Colt	McCormick	Pepper	Watson, Ind.
Curtis	McCumber	Phipps	
Edge	McLean	Shortridge	
Ernst	McNary	Smoot	

NOT VOTING—39.

Borah	Gerry	Ladd	Ransdell
Broussard	Glass	La Follette	Reed, Pa.
Caraway	Harris	Lenroot	Spencer
Culberson	Harrison	McKinley	Swanson
Dillingham	Heflin	Nelson	Townsend
du Pont	Hitchcock	Norris	Watson, Ga.
Elkins	Johnson	Owen	Weller
Fernald	Jones, N. Mex.	Page	Williams
France	Kendrick	Pittman	Willis
Frelinghuysen	King	Poindexter	

So the amendment of Mr. WALSH of Montana was rejected.

Mr. WALSH of Montana. Mr. President, I give notice that I shall reserve a vote on this question in the Senate.

The PRESIDENT pro tempore. The Chair may state at this moment that an amendment not agreed to as in Committee of the Whole need not be reserved for a vote in the Senate. It can be renewed when the bill reaches the Senate. The hour of 10 o'clock p. m. having arrived, debate has now ceased under the unanimous-consent agreement until after the bill has been reported to the Senate.

Mr. McCUMBER. Mr. President, I offer the amendment which I send to the desk.

The PRESIDENT pro tempore. The amendment will be stated.

The ASSISTANT SECRETARY. On page 131, line 25, after the word "noils" insert the following: "crin, vegetal, or palm-leaf fiber, twisted or not twisted," so as to read:

Flax tow and flax noils, crin, vegetal, or palm-leaf fiber, twisted or not twisted, three-fourths of 1 cent per pound.

The amendment was agreed to.

Mr. McCUMBER. On page 103, line 24, I ask unanimous consent to reconsider the vote by which the amendment was agreed to in that line and to disagree to the same.

The PRESIDENT pro tempore. The Senator from North Dakota asks unanimous consent to reconsider the vote by which the amendment which will now be stated by the Secretary was adopted.

The ASSISTANT SECRETARY. On page 103, line 24, after the words "crab meat" the Senate inserted the words "and lobster meat."

The PRESIDENT pro tempore. Is there objection? The Chair hears none. The question is upon agreeing to the amendment.

Mr. McCUMBER. I ask that the amendment be disagreed to.

The amendment was rejected.

Mr. JONES of Washington. Mr. President, I desire to reserve a separate vote in the Senate on the amendment made as in Committee of the Whole striking out the tariff on shingles and also the amendment adopted yesterday striking out the paragraph relating to logs.

Mr. SHORTRIDGE. Mr. President, I offer two amendments, which I ask may be considered together.

The PRESIDENT pro tempore. The Senator from California offers two amendments, which he asks may be considered together. Is there objection? The Chair hears none, and it is so ordered. The amendments will be stated.

The ASSISTANT SECRETARY. The amendments are to the House text, on page 107, line 19, after the word "in," to insert the words "bulk, crates," and a comma, with reference to the shipment of grapes.

Mr. UNDERWOOD. Mr. President, I rise to a point of order.

The PRESIDENT pro tempore. The Senator will state the point of order.

Mr. UNDERWOOD. As there can be no debate, I think the Secretary should report the paragraph as it would read if amended, so that the Senate may have some information on the subject.

The PRESIDENT pro tempore. The Chair is of that opinion, and the Secretary will state the paragraph as it would read if the amendments were agreed to.

The ASSISTANT SECRETARY. On page 107, line 19, paragraph 742, relating to grapes, the Senator from California proposes after the word "in" to insert the words "bulk, crates," so as to read:

Grapes in bulk, crates, barrels, or other packages.

The second amendment is, on the same page, 107, line 20, after the word "of," where it appears the first time in the line, to insert the words "such bulk, or," so that if amended it would read:

Grapes in bulk, crates, barrels, or other packages, 25 cents per cubic foot of such bulk or the capacity of the packages.

After the word "packages" it is proposed to insert the words "according as imported."

Mr. FLETCHER. Mr. President, I realize that no debate is in order, but I assume the Senator wants to——

The PRESIDENT pro tempore. There can not be debate upon the amendment.

Mr. FLETCHER. I am asking to correct the proposed amendment. "Grapes in bulk, crates, barrels, or other packages, 25 cents per cubic foot of the capacity of the packages" does not make sense. "Grapes in bulk or in crates or packages or barrels" might do, but if they are in bulk they are not in packages.

The PRESIDENT pro tempore. Does the Senator from Florida offer an amendment to the amendment?

Mr. FLETCHER. I am merely suggesting that that amendment should be made.

Mr. SHORTRIDGE. Let it be so amended.

Mr. FLETCHER. I merely suggest it for the Senator's consideration, because grapes that come in bulk are, of course, not in a package.

The PRESIDENT pro tempore. The question is on agreeing to the amendment offered by the Senator from California as modified.

The amendment as modified was agreed to.

The ASSISTANT SECRETARY. The Senator from California offers the further amendment, on page 118, after line 2, to insert the following:

Grape juice, grape sirup, and other similar products of the grape, by whatever name known, containing or capable of producing less than 1 per cent of alcohol, 70 cents per gallon; containing or capable of producing more than 1 per cent of alcohol, 70 cents per gallon, and in addition thereto $5 per proof gallon on the alcohol contained therein or that can be produced therefrom.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment. [Putting the question:] The noes seem to have it.

Mr. SHORTRIDGE. I ask for a division.

Mr. BRANDEGEE. Mr. President——

The PRESIDENT pro tempore. The Senator from Connecticut.

Mr. BRANDEGEE. I do not want to interfere with the Senator if he wants a division on the question. I will wait until that is taken.

Mr. SHORTRIDGE. Satisfied that Senators should have listened to the Secretary, who read the first paragraph——

Mr. ROBINSON. Mr. President, a point of order. No debate is in order.

Mr. SHORTRIDGE. I think Senators voted under a misapprehension.

Mr. ROBINSON. No debate is in order.

Mr. SHORTRIDGE. I am not debating. I am asking for a division.

The PRESIDENT pro tempore. The Senator from Connecticut will state his inquiry.

Mr. BRANDEGEE. I was going to make a parliamentary inquiry, but the Senator from California desires a division and I did not want to interfere with the division.

The PRESIDENT pro tempore. The Senator from California did not demand a division.

Mr. SHORTRIDGE. Begging the Chair's pardon, I have asked for a division.

The PRESIDENT pro tempore. The Chair was not advised of that demand.

Mr. REED of Missouri. Mr. President, a point of order. Did the Senator from California say he demanded a division before the question was decided, or is he demanding it now? If he is demanding it now, I make the point of order against it.

Mr. BRANDEGEE. Mr. President, if I may be permitted, I heard the Senator demand a division as soon as the vote was announced.

Mr. ROBINSON. Mr. President, a point of order. Debate is not in order.

The PRESIDENT pro tempore. Strictly speaking, the time had passed for a demand for a division; but the Chair feels that the rule ought to be construed with some latitude, and therefore orders a division. The question is on the amendment offered by the Senator from California.

On a division the amendment was agreed to.

Mr. BRANDEGEE. Now, Mr. President, it may be that the Chair has already ruled upon my inquiry; but, if so, I was not in the Chamber. In order to have a separate vote on an amendment in the Senate is it necessary to give notice in Committee of the Whole that a Senator demands a separate vote?

The PRESIDENT pro tempore. It is not necessary.

Mr. UNDERWOOD. Mr. President, I rise to a parliamentary inquiry.

The PRESIDENT pro tempore. The Senator will state the inquiry.

Mr. UNDERWOOD. Is it not in order in the Senate tomorrow, when we have 10-minute debate, to propose amendments similar to those which have just been passed upon?

The PRESIDENT pro tempore. When the bill reaches the Senate and after the amendments which have been made in the Committee of the Whole are disposed of, either by a vote en bloc or by separate votes, then the bill will be in the Senate and open to amendment.

Mr. UNDERWOOD. These amendments can be proposed then and there will be 10 minutes' debate?

The PRESIDENT pro tempore. The Chair so understands.

Mr. UNDERWOOD. Then I do not understand why the chairman of the committee is keeping us here to-night.

Mr. SMOOT. Mr. President, I offer the following amendment.

The PRESIDENT pro tempore. The Secretary will report the amendment proposed by the Senator from Utah.

The ASSISTANT SECRETARY. On page 260, after line 3, strike out all of paragraph 8 of section 308 and insert in lieu thereof the following new paragraph:

PAR. 8. Containers for compressed gases which comply with the laws and regulations for the transportation of such containers in the United States.

The amendment was agreed to.

Mr. SMOOT. Mr. President, I move that the vote whereby the Senate agreed to the committee amendment on page 383, beginning with line 6 down to the end of line 20, may be reconsidered in order that I may offer an amendment to it.

The PRESIDENT pro tempore. Is there objection to the reconsideration of the vote whereby the amendment referred to was agreed to? The Chair hears none, and the vote is reconsidered.

Mr. SMOOT. Now, I offer an amendment, which I send to the desk, to the amendment of the committee at that point.

The PRESIDENT pro tempore. The amendment to the amendment will be stated.

The ASSISTANT SECRETARY. On page 383, beginning with line 6, it is proposed to strike out all down to and including line 20, and insert in lieu thereof the following:

Comptrollers of customs shall examine the collector's accounts of receipts and disbursements of money and of receipts and disposition of merchandise and certify the same to the Secretary of the Treasury for transmission to the General Accounting Office. They shall perform such other duties as the Secretary of the Treasury may from time to time prescribe, and their administrative examination shall extend to all customs districts assigned to them by the Secretary of the Treasury.

Comptrollers of customs shall verify all assessments of duties and allowances of drawbacks made by collectors in connection with the liquidation thereof. In cases of disagreement between a collector and a comptroller of customs the latter shall report the facts to the Secretary of the Treasury for instructions.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment offered by the Senator from Utah to the amendment of the committee.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

Mr. TRAMMELL obtained the floor.

Mr. McCUMBER. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Florida yield to the Senator from North Dakota?

Mr. McCUMBER. I was about to ask the Senate to take a recess so that those who desire to arrange for separate votes in the Senate may have an opportunity to do so. The amendment of the Senator from Florida can come in just as well in the morning unless he desires to present it now.

Mr. TRAMMELL. I will occupy but a moment merely for the purpose of giving notice that I shall ask for a separate vote in the Senate on paragraph 743, on page 107.

The PRESIDENT pro tempore. The reservation of the Senator from Florida will be noted.

The bill is before the Senate as in Committee of the Whole and open to further amendment. If there be no further amendments to be offered as in Committee of the Whole, the bill will be reported to the Senate.

Mr. McCORMICK. Mr. President, I offer the amendment which I send to the desk.

The PRESIDENT pro tempore. The amendment will be stated.

The ASSISTANT SECRETARY. It is proposed to amend paragraph 207, page 34, lines 5, 6, and 7, so as to read:

fuller's earth, unwrought and unmanufactured, $1 per ton; wrought or manufactured, $2.50 per ton.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment offered by the Senator from Illinois.

The amendment was rejected.

Mr. NEWBERRY. Mr. President, I offer the amendment which I send to the desk.

The PRESIDENT pro tempore. The Secretary will state the amendment offered by the Senator from Michigan.

The ASSISTANT SECRETARY. On page 30, line 1, after the word "Potato," it is proposed to add the words "and wheat."

The PRESIDENT pro tempore. The question is upon agreeing to that amendment.

Mr. CURTIS. I ask that the amendment be stated, so that we may know to what it relates.

The PRESIDENT pro tempore. The Secretary will state the context of the amendment.

The ASSISTANT SECRETARY. So that if amended it will read:

PAR. 80. Starch: Potato and wheat, 2 cents per pound.

The PRESIDENT pro tempore. The question is on agreeing to the amendment offered by the Senator from Michigan.

On a division, the amendment was agreed to.

The PRESIDENT pro tempore. The bill is still before the Senate as in Committee of the Whole and open to further amendment. If there be no further amendment to be offered as in Committee of the Whole, the bill will be reported to the Senate. The Senate has had under consideration as in Committee of the Whole the following bill——

The ASSISTANT SECRETARY. An act to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes.

The PRESIDENT pro tempore. The bill is now in the Senate. The question is on concurring in the amendments made as in Committee of the Whole, except those which may be reserved.

Mr. McCUMBER. I move the Senate take a recess until to-morrow at 11 o'clock.

Mr. LENROOT. Mr. President, will the Senator withhold that motion for a moment?

Mr. McCUMBER. I withhold the motion.

Mr. LENROOT. I should like to inquire if we may not have unanimous consent that to-morrow and while the bill is in the Senate, although unreserved amendments may be concurred in en bloc, any amendment may be offered whether to reserved amendments or not? I make this request because I have endeavored to get a reprint of the bill; but we are informed it can not be done. Senators can not know what are amendments to amendments and what are amendments to committee amendments.

Mr. McCUMBER. I think the Senate should be extremely liberal in the allowance of the reconsideration of any amendment that has been adopted which it is necessary to reconsider for the purpose of offering an amendment, and I believe the Senator will have no difficulty along that line. We have followed that rule so far.

Mr. LENROOT. Yes; but I am speaking now only of the great mass of amendments which will be concurred in en bloc to-morrow. I am referring to that class of amendments.

Mr. McCUMBER. I have no objection.

Mr. LENROOT. Then, Mr. President, I ask unanimous consent that while the bill is in the Senate, if any Senator desires to offer an amendment to a committee amendment which has been concurred in en bloc, unanimous consent shall be given for reconsideration for that purpose only.

Mr. McCUMBER. I do not object to that.

The PRESIDENT pro tempore. Is there objection to the request of the Senator from Wisconsin? The Chair hears none, and it is so ordered.

Mr. LODGE. Mr. President, if the Senator from North Dakota will allow me, I merely desire to make an inquiry. A number of reservations as to different amendments have been announced and filed. I take it those notices will be read and the amendments in question will be considered as reserved from concurrence en bloc.

The PRESIDENT pro tempore. The Chair has already stated that to-morrow morning or before the amendments which have been agreed to as in Committee of the Whole are concurred in in the Senate, the Secretary will read the list of amendments reserved so far as he has been notified of them. The Chair desires to suggest, however, that under the unanimous consent just given it makes no difference whether an amendment has been reserved or not.

Mr. CALDER and Mr. PEPPER each submitted an amendment, intended to be proposed to the pending bill, which were ordered to lie on the table and to be printed.

Mr. SUTHERLAND and Mr. GOODING each submitted amendments, intended to be proposed to the pending bill, which were ordered to lie on the table and to be printed.

PETITIONS AND MEMORIALS.

Mr. PEPPER presented a petition of the Philadelphia (Pa.) Board of Trade, praying for the passage of House bill 12235, providing for reduction in the cost of issuing passports, etc., which was referred to the Committee on Foreign Relations.

He also presented a memorial of the Philadelphia (Pa.) Board of Trade, remonstrating against the passage of House bill 11548, to amend the Federal farm loan act, etc., and indorsing House Joint Resolution 314, amending the Constitution of the United States so as to prevent the further issuance of tax-exempt securities, etc., which was referred to the Committee on Banking and Currency.

He also presented a memorial of the Philadelphia (Pa.) Board of Trade, remonstrating against the passage of Senate bill 3844, to exempt interest on farm-land securities from taxation under the revenue act of 1921, which was referred to the Committee on Finance.

PENSIONS AND INCREASE OF PENSIONS.

Mr. BURSUM, from the Committee on Pensions, reported the following bills, which were read twice by their titles, and he submitted reports thereon:

A bill (S. 3919) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy and of wars other than the Civil War, and to certain widows and dependent relatives of such soldiers and sailors (Rept. No. 860); and

A bill (S. 3920) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent relatives of such soldiers and sailors (Rept. No. 861).

The PRESIDENT pro tempore. The bills will be placed on the calendar.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. McNARY (for Mr. NORRIS):

A bill (S. 3916) granting a pension to Matilda Bordenstab; to the Committee on Pensions.

By Mr. DILLINGHAM (for Mr. NELSON):

A bill (S. 3917) to amend section 876 of the Revised Statutes; and

A bill (S. 3918) to amend section 51 of chapter 4 of the Judicial Code; to the Committee on the Judiciary.

By Mr. SIMMONS:

A bill (S. 3921) granting a pension to Charles A. Stockard (with accompanying papers); to the Committee on Pensions.

By Mr. LENROOT:

A bill (S. 3922) abolishing the customs collection district of Duluth and Superior; to the Committee on Commerce.

ADDITIONAL CLERK TO THE DISTRICT COMMITTEE.

Mr. BALL submitted the following resolution (S. Res. 339), which was referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That Senate resolution No. 182, agreed to December 15, 1921, authorizing the continuance during the present session of Congress of Senate resolution No. 68, agreed to May 31, 1921, which authorizes the Senate Committee on the District of Columbia to employ an additional clerk to be paid out of the contingent fund of the Senate, be, and hereby is, extended and continued in full force and effect until the end of the Sixty-seventh Congress.

RECESS.

Mr. McCUMBER. I move that the Senate take a recess until to-morrow morning at 11 o'clock.

The motion was agreed to; and (at 10 o'clock and 25 minutes p. m.) the Senate took a recess until to-morrow, Friday, August 18, 1922, at 11 o'clock a. m.

HOUSE OF REPRESENTATIVES.

THURSDAY, *August 17, 1922.*

The House met at 12 o'clock noon and was called to order by the Speaker.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Thou art still with us, O Lord. In reverence we bow before each coming day, for it is the handiwork of Thy Providence. Help us to make anew our vows of service and meet with full understanding and directness the demands of duty. Keep us in sympathetic and faithful pursuance of the work to which our country has called us. We ask Thee, our Heavenly Father, to most graciously bless our Republic. Strengthen more and more the great fundamentals on which it was built. Bring deliverance to the helpless, recovery to the blind, and liberty to men everywhere. Continue Thou with us until the shadows lengthen and the evening comes; then grant us rest and peace. Through Christ. Amen.

The Journal of the proceedings of yesterday was read and approved.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted to—

Mr. CODD (at the request of Mr. MICHENER), indefinitely, on account of illness;

Mr. SEARS, indefinitely, on account of serious illness in his family;

Mr. SWING, for three weeks, on account of important business;

Mr. BRIGGS, for this week, on account of illness; and

Mr. FULMER, for two weeks.

DUTIES OF MEMBERS OF CONGRESS WITH RESPECT TO THE COURTS.

Mr. TUCKER. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD upon the relation and obligation of Members of Congress and of the courts, respectively, to legislation by Congress.

The SPEAKER. Is there objection?

There was no objection.

Mr. TUCKER. Mr. Speaker, the casual remark of a Member of this House to a friend the other day in my hearing is my apology for trespassing briefly upon the time of the House. The remark which I heard in passing was this:

I doubt whether this bill is constitutional, but we can pass it up to the courts, and they can decide that question.

I may add that this was not the first time I had heard such a sentiment expressed, nor was it the last time. It is a question of great importance and one about which there seems to be some confusion of thought and of duty.

I think it can be safely stated that the courts will not declare a law unconstitutional unless in their judgment it is plainly unconstitutional beyond a reasonable doubt. A great many decisions of the courts, Federal and State, could be quoted in support of this position. I will give only a few:

In Knox *v.* Lee (12 Wall. 457) the court says:

A decent respect for a coordinate branch of the Federal Government demands that the judiciary should presume, until the contrary is clearly shown, that there has been no transgression of power by Congress, all the Members of which act under the obligation of an oath of fidelity to the Constitution.

Chief Justice Waite declares in the Sinking Fund cases (99 U. S. 700):

The declaration (that an act of Congress is void) should never be made except in a clear case. Every possible presumption is in favor of the validity of a statute and this continues until the contrary is shown beyond a rational doubt.

In Ogden *v.* Saunders (12 Wheat. 213) the court says:

It is but a decent respect due to the * * * legislative body, by which any law is passed, to presume in favor of its validity, until the violation of the Constitution is proved beyond all reasonable doubt.

In Fletcher *v.* Peck (6 Cranch) the court says:

It is not on slight implication and vague conjecture that the legislature is to be pronounced to have transcended its powers and its acts to be considered as void. The opposition between the Constitution and the law should be such that the judge feels a clear and strong conviction of their incompatibility with each other.

Justice Miller, in the Trade-Mark cases (100 U. S. 96-97), says:

We adopt this course because when this court is called on in the course of the administration of the law to consider whether an act of Congress or any other department of the Government is within the constitutional authority of that department a due respect for a coordinate branch of the Government requires that we shall decide that it has transcended its powers only when that is so plain that we can not avoid the duty.

See also Osborne *v.* Staley (5 W. Va. 94) and Tate's Executors *v.* Bell (26 American Decisions, 222), where the court says:

It is here proper to remark that it is with reluctance the court will declare a law unconstitutional; not from any fears of consequences which might arise from conflict of opinion with another coordinate branch of the Government, but because the court might incline the more to doubt that opinion, where, on the same point, it may seem to have been formed upon deliberation by others officiating in a high and responsible sphere. Hence this court, in a doubtful case, would permit a law called in question to have its effect. But when the court is satisfied, there is an obligation resting upon them that it would be criminal to compromise.

In "The Origin and Scope of the American Doctrine of Constitutional Law," Professor Thayer treats this subject most interestingly, in the course of which he says:

It (the court) can only disregard the act when those who have the right to make laws have not merely made a mistake but have made a clear one, so clear that it is not open to rational question.

Many other authorities could be adduced, but these are sufficient to show that judges considering the constitutionality of a law regard the law as occupying the position of the prisoner in the dock, who has the right to claim his innocence unless the evidence shows him guilty beyond all reasonable doubt.

The reason why a judge can not declare the law of Congress unconstitutional unless he be satisfied beyond a reasonable doubt that it is unconstitutional rests upon strong grounds. First, the law has been passed by a coordinate branch of the Government, which is entitled to great respect at the hands of the court, and it will naturally hesitate to undo its work. Secondly, that reason is strongly enforced because the Members of Congress are required, upon taking their seats, to take an oath to support the Constitution of the United States. That oath carries with it the presumption that no bill will be voted for that the Member of Congress believes to be unconstitutional; so that the law comes to the court with the imprimatur of approval of 435 Members of the House and 96 Senators; and the weight of their approval, with the presumption of their examination of the bill, and of their conclusion as to its validity, must be, and ought to be, both compelling and persuasive. If a Member of the House or Senate can pass legislation up to the courts free from any responsibility for its validity themselves, what does the requirement of the oath which he takes mean? Is it merely a matter of form or is it a reality? The fact that we live under it carries with it the implication of obedience to the Constitution; and when a Member of Congress attempts to relieve himself of passing upon the constitutionality of a bill because the courts may have that duty to discharge, has he not failed to discharge the duty imposed upon him by his oath to support the Constitution—that is, to uphold it; not to pull it down, and not to do any act that will impair its integrity[Our oath is to support the Constitution.

Under the law of the land every man is required to support his wife and his family. If he doubts whether certain action on his part will contribute to the support of his wife and family, he must reject it; and any failure to contribute to their comfort, consistent with his condition in life, is a failure to support; and no man can justify his action in his relation to his family, about which he is uncertain, and the propriety of which he doubts.

And so a Member of Congress, in voting on a bill, must consider with care whether it be constitutional or not, and if he doubts its constitutionality it is held that he is not living up to the letter and spirit of his oath if he votes for it. So that if a Member of Congress doubts the constitutionality of a bill it is held that he should not vote for it, while the judge must declare it constitutional when it comes before him, unless beyond a reasonable doubt he believes it unconstitutional. That a Member of Congress, in obedience to his oath, is expected to consider seriously and carefully the constitutionality of a bill before he votes for it is recognized by all of the authorities.

Willoughby on the Constitution, page 1220, declares:

From necessity the Constitution must have intended that the legislative and executive departments should have the power, in the first instance at least, of determining the extent of the powers constitutionally granted to them, and that therefore the judiciary should not substitute its judgment for theirs except in cases where there is no doubt that the action which has been taken is not constitutionally warranted.

Judge Cooley, in his Constitutional Law, pages 153–154, says:

Legislators have their authority measured by the Constitution; they are chosen to do what it permits and nothing more, and they take solemn oath to obey and support it. When they disregard its provisions they usurp authority, abuse their trust, and violate the promises they have confirmed by an oath. To pass an act when they are in doubt whether it does not violate the Constitution is to treat as of no force the most imperative obligations any person can assume. * * * A witness in court who would treat his oath thus lightly and affirm things of which he was in doubt would be held a criminal. Indeed, it is because the legislature has applied the judgment of its members to

the question of its authority to pass the proposed law, and has only passed it after being satisfied of the authority, that the judiciary waive their own doubts and give it their support.

Tucker on the Constitution, page 379, declares:

He (the legislator) is bound to support the Constitution, to uphold it as one of the pillars to an edifice. He is under the Constitution, not above it. He can not support it by doing an act repugnant to it.

His public office is a public trust. If he doubts his power to do under the authority of the Constitution he is bound to resolve the doubt against the act, not in favor of it.

Hon. James M. Beck, Solicitor General of the United States, in a recent brief before the Supreme Court on this subject uses the following language:

It is the common belief that groups of men can agitate for any kind of a law without considering its constitutional aspects; for, if it be unconstitutional in substance or in motive, the Supreme Court will avert the evil of its enactment. This indifference to our form of government, which is now so widely prevalent, has its reflex action upon the representatives of the people both in the legislatures of the States and of the Nation. When laws are discussed which go to the verge of constitutional power the principal and sometimes the only discussion is that of policy, while the effect of such legislation upon our constitutional form of government is given little attention. The prevalent disposition seems to be to ignore constitutional questions by shifting them to the Supreme Court, in the belief that that court will exercise the full powers of revision, which I have tried to show the framers of the Constitution did not intend this court to have. The result may be an exaltation of this court, as a tribunal of extraordinary power; but, in the matter of constitutionalism, it inevitably leads to an impairment of the powers and duties of Congress and, above all, to the impairment of the popular conscience; for, in the last analysis, the Constitution will last in substance as long as the people believe in it and are willing to struggle for it.

Judge Cooley, in his Constitutional Limitations, page 254, seventh edition, puts more powerfully than any other author the duties of the legislator and the courts, and the reasons therefor:

The constitutionality of a law, then, is to be presumed, because the legislature, which was first required to pass upon the question, acting, as they must be deemed to have acted, with integrity and with a just desire to keep within the restrictions laid by the Constitution upon their action, have adjudged that it is so. They are a coordinate department of the Government with the judiciary, invested with very high and responsible duties, as to some of which their acts are not subject to judicial scrutiny, and they legislate under the solemnity of an official oath, which it is to be supposed they will not disregard. It must therefore be supposed that their own doubts of the constitutionality of their action have been deliberately solved in its favor, so that the courts may with some confidence repose upon their conclusion as one based upon their best judgment. For although it is plain upon the authorities that the courts should sustain legislative action when not clearly satisfied of its invalidity, it is equally plain in reason that the legislature should abstain from adopting such action if not fully assured of their authority to do so. Respect for the instrument under which they exercise their power should impel the legislature in every case to solve their doubts in its favor, and it is only because we are to presume they do so that courts are warranted in giving weight in any case to their decision. If it was understood that the legislators refrained from exercising their judgment, or that in cases of doubt they allowed themselves to lean in favor of the action they desired to accomplish, the foundation for the cases we have cited would be altogether taken away.

The position of the legislator and the court, therefore, on this subject is this: The legislator can not, in accordance with his oath, vote for any bill if he doubts its constitutionality. The judge who is sitting in judgment on that same law, if he doubts its constitutionality, as did the legislator, must, unless in his judgment it is plainly and beyond a reasonable doubt unconstitutional, declare it constitutional. He must have a clear vision of its repugnancy to the Constitution. The judge, before he can declare it unconstitutional, must have no rational doubt of its validity, while the legislator can not vote for it if he has any doubt as to its constitutionality. The reasons for these positions seem clear. Bound by his oath to support the Constitution, the Member of Congress must not enact a law whose constitutionality he doubts, for to doubt its validity and then enact it does not square with his oath to support the Constitution. The position of the judge, however, is very different. He approaches the consideration of the validity of the law passed by a coordinate department of the Government with every presumption of its validity, not only because it has been passed by a coordinate branch of the Government, but because every member of that coordinate branch, the court has a right to believe, by voting for it, has examined it to determine whether it was valid, and having found it constitutional enacts it into law. So that the law comes to the court with the sanction of every Member of both Houses of Congress, fortified and strengthened by the fact which the court takes cognizance of, that every legislator in House and Senate has examined the bill and has voted for it because he had no doubt of its validity and constitutionality. The legislator might be unable to vote for a bill because of his doubts as to its constitutionality, and though he voted against it as a Member of Congress, if, after the passage of such a bill, he be transferred to the bench and has to pass upon the validity of that law, though he could not vote for the bill when in Congress because he doubted its constitutionality, he can not, as a judge, declare it unconstitutional unless beyond all reasonable doubt he believes it to be so.

Tucker sums up the argument as follows (Tucker on the Constitution, p. 380):

In the case of the lawmaker the question to be asked is: "Have I a right under the Constitution to pass the act?" The onus is for him to show his authority. In the case of the judge the question is: "Is the law clearly unconstitutional? In annulling the law in support of the Constitution will I transcend my judicial functions and usurp the legislative; or is the repugnancy so strong that I will only act judicially in annulling the effect of the law and not transcend the boundary of my power?" The burden shifts in the two cases. The legislator must show that he has the right; the judge must show the legislator was clearly wrong.

Hence the lawmaker may not justify a vote for a measure which as judge he could not declare void; but, if the judiciary declares such an act unconstitutional, it should forbid the lawmaker to pass similar legislation. On the other hand, though the judiciary can not declare a law unconstitutional because not clearly repugnant, it does not justify the lawmaker in voting for it.

If these principles are correct, how can we consent to abdicate our functions in this body? And if so, will the courts continue to be bound by the rule that is predicated on the discharge of our duty in this body which we now abandon? If that duty be abandoned, will the courts continue to recognize it as existing? Will the courts recognize as an existing fact what Members of Congress openly repudiate? Judge Cooley, in the language above quoted, indicates clearly that the courts will not be bound if the Members of Congress fail to live up to their obligations; and Chief Justice Taft shows the same tendency in his recent opinion in the case of Bailey against the Drexel Furniture Co. (child-labor case), when he says:

In the light of these features of the act, a court must be blind not to see that the so-called tax is imposed to stop the employment of children within the age limits prescribed. Its prohibitory and regulatory effect and purpose are palpable. All others can see and understand this. How can we properly shut our minds to it?

Why should the courts be bound by a rule which is openly and notoriously violated? Will they not, as indicated in the above case of Bailey against the Drexel Furniture Co., take judicial notice of such an open and notorious fact? To refuse to live up to our obligation and yet expect the courts to consider it as still existing is a fraud upon the courts and Congress would never knowingly be a party to such an act.

I invoke the careful consideration by the House of this principle that our Government may continue to meet the demands of the people in the orderly and constitutional performance of our duties and in the continued progress of this great people under the protecting care of our Constitution faithfully and obediently followed, which is our best, our only hope of progressive development.

SENATE BILLS REFERRED.

Under clause 2, Rule XXIV, Senate bills of the following titles were taken from the Speaker's table and referred to their appropriate committees as indicated below:

S. 3808. An act authorizing the Secretary of the Interior to investigate and report to Congress upon the Columbia Basin irrigation project; to the Committee on Irrigation of Arid Lands.

S. 3519. An act defining the rights of the Mescalero Apache Indians in the Mescalero Indian Reservation, providing for an allotment of certain lands therein in severalty to the Mescalero Apache Indians, and creating and defining the All Year National Park, and for other purposes; to the Committee on Indian Affairs.

SECOND-CLASS POSTAL RATES.

Mr. KELLY of Pennsylvania. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by printing a statement on second-class postal rates, made by myself.

The SPEAKER. Is there objection?

There was no objection.

Mr. KELLY of Pennsylvania. Mr. Speaker, on June 9 I introduced in the House H. R. 11965, which is a measure to amend the provisions of the revenue act of 1917 by striking out the provision which increased the rate on second-class mail matter July 1, 1920, and July 1, 1921, and fixing as permanent the rates established on July 1, 1919. This bill seeks to repeal the last two increases, but provides that the first two shall stand.

The bill was referred to the Postmaster General for report, and the views of the department are contained in the following letter:

JUNE 22, 1922.

Hon. HALVOR STEENERSON,
Chairman Committee on the Post Office and Post Roads,
House of Representatives.

MY DEAR MR. STEENERSON: Referring to your request for an opinion on H. R. 11965, by Mr. KELLY of Pennsylvania, which contemplates a reduction in postal rates for second-class mail matter from the present zone rates and substituting those in effect July 1, 1919.

The department will give sympathetic attention to any rate readjustment in the joint interests of the public and the publishers and will heartily approve legislation looking to that end.

It is believed in the department that the postal rates now charged are excluding from the mails thousands of tons of second-class matter, which is being distributed through agencies other than the Post Office Department. It would appear that efforts to secure the reentry of this matter into the mails and with it an equitable revenue would be proper procedure.

Whether the loss sustained by the department following a reduction of our present rates would be offset by the increase of the matter offered to it for shipment is conjectural and can not be determined at this time except by experiment.

Whether the rates now charged by the Post Office Department are so much in excess of express and baggage charges as to be prohibitive to publishers is a matter for determination by analyses, already in process in the department by order of the joint commission, for which an appropriation has been made.

Each class of mail should compensate the department for its distribution, and our annual deficit is inexcusable. The Post Office Department must regard itself as a business branch of the Government and should support itself, and no class of mail should be in turn compelled to carry another class because it happens to be operated at a loss.

An increase of parcel-post rates to at least approach the cost of handling is under consideration by the department. The postage rates for the two classes of mail can not be viewed from the same standpoints entirely. The periodicals have an educational and news value, while the parcel post contributes chiefly to business transactions. Although the reduction contemplated in the Kelly bill relates only to the rates for advertising matter, it is recognized that they carry with them educational features.

It is generally held by Members of Congress whom I have consulted that the rates applied to zones far distant from the point of entry are now too high, and this may be found to apply to the other zones when a careful analysis has been made by the joint committee. If so, the department will lend every assistance toward an equitable readjustment.

I remain, very respectfully yours,

HUBERT WORK.

The House Committee on the Post Office and Post Roads held a hearing on this measure Tuesday, June 27. After consideration, it was decided to postpone action until December 1, in view of the fact that the Joint Postal Commission is making a study of the rates of all classes of mail and expects to have its report ready for submission at that time.

For the information of those who may be interested in this vexed question of second-class mail rates, I desire to print in the RECORD the statement made by myself before the Committee on the Post Office and Post Roads:

Mr. Chairman and Gentlemen of the Committee: The United States Postal Commission in 1844 gave the best definition of the true purpose of the Postal Service when they said it was created: "To render the citizen worthy by proper knowledge and enlightenment of his important privileges as a sovereign constituent of the Government; to diffuse enlightenment, social improvement, national affinities; elevating our people in the scale of civilization and bringing them together in patriotic affection."

It is not too much to say that the American Republic would have been impossible without the Postal Service. The history of the downfall of great nations in the past is simply the record of triumphant peoples which overran countries and then settled down into isolated communities and lost contact with each other. The one time hardy conquerors, inspired by common aims and common purposes, degenerated into important groups when they lost their common ideas and ideals. There was no organization of communication to keep the people in touch with each other as they considered common problems and common perils. The result was inevitable collapse before a handful of invaders who acted under self agreed discipline in the ranks of any army.

It was impossible, without the cementing force of common ideas in the minds of the people, to have a real national community of more than a few thousand people. It was true then and it is just as true to-day, that a nation must in the final analysis be limited in size by the possibility of communicating knowledge of common aims and purposes to the mass of the people.

America is an empire greater than any of the famous nations of ancient times. Her borders are further flung and her people more numerous than those of Assyria, Babylon, Persia, Greece, or Rome. Her success in accomplishing what Aristotle said was an impossibility has been due largely to an institution of which Aristotle knew nothing, the Postal Service. Without the Postal Service America would be a melee of warring nations, a Balkan of enmities, a jungle war for survival.

"Communication of intelligence with frequency and dispatch from one part to another of this continent is essentially requisite to its safety" declared the Continental Congress in the midst of its plans for independence through war.

To-day, education through easy communication of ideas to the people of every community in the land is essentially requisite to American unity, prosperity, and progress.

That education and communication of common ideas in America has come almost solely through the newspapers and periodicals which have become an inseparable part of our national life. Henry Ward Beecher well said, "Newspapers are the schoolmasters of the common people, a greater treasure to them than uncounted millions of gold." Half the readers of America read nothing else. The same publication has circulated in New York, and California, Minnesota, and Florida.

The press dispatch read in Chicago is read by the dwellers in Gopher Prairie. The magazine read in Washington is carefully perused by the American who lives under the Arctic Circle in Alaska.

This successful welding of a great nation through the cementing force of common ideas communicated through the press is the result of a determined Government policy. Congress declared in legislation that the unifying effect of a national press justified the granting of low postage rates. This action was for the direct encouragement of the distribution of newspapers and other periodicals to every part of the country.

George Washington had visioned the benefits of such a policy so clearly that he urged in 1789 that newspapers and other publications be sent through the mails without charge of any kind. Thomas Jefferson declared that the Post Office Department should not be conducted from the "standpoint of revenue, but from the standpoint of service of the public."

The first law on postal rates for newspapers and periodicals provided a rate of 1 cent per sheet for 100 miles and 1½ cents per sheet for distances over 100 miles. In 1851 newspapers were ordered distributed through the mails free within the county of publication, and a graduated scale of rates was fixed outside the county.

Under this plan the subscriber paid the postage. It was in the day of the stage coach, pony express, and mounted mail carriers, but still the rates were not as high as those which must be paid to-day under the revenue law in force.

The rates of 1851, reasonable as they were in comparison with the present rates, were permitted to remain but a single year. There was universal objection from the people, and in 1852 the zone rates were repealed and a cent a copy for any distance was substituted. In 1874 the postal rates for newspapers and other periodicals were fixed at 2 cents a pound for any distance. Then in 1885 the rate was made 1 cent a pound, and remained at that figure until the passage of the revenue act of 1917, the measure which provided for raising funds for the World War.

In the fall of 1917—to be exact, on October 3—without any public hearings before either the Post Office and Post Roads Committee of the Senate or the House, Congress passed a bill which established the present zone system as a war-revenue measure. This law became effective July 1, 1918, by Order No. 1458, having four regular advances on that portion of a publication devoted to advertising.

That law overthrew the policy which had been in force for 65 years and provided for a zone system of eight zones. It established a new principle when it provided for different rates upon the news and the advertising portions of newspapers and other periodicals.

There is not involved just now the problem of the zone system for newspapers. I do not believe in that system, for I believe it means breaking up the country into sections, and is a blow at national unity. The founders of this Nation who welded the thirteen Colonies into one Republic feared greatly that the empire they had constructed might be too wide and vast to be enduring. Their fears were without foundation only because there developed new methods of communication and a national press which carried common ideas to all parts of the country. A uniform postage rate for the newspapers and periodicals of America annihilated the distance between the boundaries of America, and thus a vastly greater territory than was dreamed by the founders of the Nation was welded into one united country.

But that is not the question now. The one issue involved in this measure is the wisdom and justice of scaling down the rates fixed in the revenue act of 1917.

In the first place, those rates were forced as a war-revenue measure, and they never could have been written into law save under whip and lash as a method for securing funds for the prosecution of the war against the Imperial German Government. Even under such conditions, there was such doubt as to the policy involved that it was provided that the rates should not go into effect for a year after the passage of the measure so that revision might be made.

Senator SIMMONS, in reporting the revenue bill to the Senate, declared that he was opposed to taxing publications through extra postage even as a war measure. He declared that he was glad that the conference committee had postponed the operation of the rates for a year and urged that the Post Office Committee utilize the intervening time to work the matter out in a satisfactory manner.

This was not done, and the rates went into effect with a new burden added on July 1 for four successive years. The war was completed and a new revenue measure adopted which removed or reduced all war taxes with this single exception. In spite of every appeal, there has been no relief granted in this case. The very one which should have had first attention from Congress. For this is not simply a question of taxation; it is a question of policy which involves grave injury to America.

If we judge wholly from the standpoint of the rates themselves, we find flagrant inconsistencies.

Under present rates any individual in America can send a newspaper more cheaply through the mails than the publisher.

The individual sender gets the advantage of a flat rate of 4 cents a pound any distance. He also sends in a separate package, which requires the Postal Service to pay the cost of collection, stamp cancellation, sorting, and handling.

The publisher, on the other hand, must pay a rate of from 5 to 10 cents a pound on the advertising matter even though he relieves the Postal Service of the expense of collecting, sorting, and delivering on board the mail car.

Such a condition is absurd and should immediately be corrected. From every standpoint of common sense the publisher should be given a more favorable rate than the individual who sends a single copy through the mails.

In mailing newspapers to foreign countries the same absurdities in rates are in evidence.

Any newspaper or publication of the second class can be sent under separate wrapper to a foreign land at the rate of 4 cents a pound. I can mail a newspaper here in Washington addressed to a city in Japan and it will be carried across all eight zones of the United States and across the Pacific Ocean for less than it costs the Washington publisher to mail a copy to his subscriber in California. Distance is eliminated for the readers of American newspapers in foreign countries, but there are high barriers for readers within the United States. Such inconsistencies in rates mean that New England publishers could save money by mailing their newspapers to subscribers on the Pacific coast through the Canadian postal system.

The same injustice is seen in the fourth-class rate for books. A catalogue of one of the great mail-order houses, weighing 8 ounces, goes any distance for 4 cents. The post office must collect, weigh, sort, and handle these catalogues, with all the expense involved.

But if that catalogue were printed as part of a newspaper or magazine permanently established and presumably performing a public service, it would cost the publisher more than the mail-order house.

Newspapers and other periodicals are only given second-class permits when they meet very strict requirements. They must be published for the dissemination of information and they must have a bona fide list of subscribers.

Still, any fly-by-night mail-order enterprise may issue its catalogue full of deceptive advertising and send it through the mail at lower rates than the newspaper whose name and reputation is a guaranty of honest business methods and straightforward advertising.

Further absurdities are shown in comparing present second-class rates with parcel-post rates.

A 10-pound package of fourth-class matter can be sent to the first and second zones for 14 cents, but it costs 20 cents if it is second-class matter. A 50-pound package, fourth class, goes to the first and second zones

for 54 cents, but the same weight package of second class costs $1. The inconsistencies may better be understood by realizing that the fourth-class matter may require large space, while the package containing newspapers and periodicals occupies little room and packs solidly in the car.

The total poundage of fourth-class matter is carried at a lower rate than the newspaper publications of the country.

The Postmaster General's report for 1921 shows that the average return for all fourth-class matter is 3½ cents per pound. The 1922 rate for second-class matter means an average return of 4 cents a pound. It must be remembered, too, that the expense of handling fourth-class matter is greater than second-class matter.

I am a believer in parcel post and have advocated it from its inception. But I do not believe that a national press should pay higher postal rates than potatoes. I believe carrying news is just as important a function of the post office as carrying butter and eggs.

There is a great hue and cry raised by so-called economists that a great deficit arises every year because of the carrying of second-class mails.

Wild speculation is indulged in without the slighest foundation. I defy any person in the Post Office Department or outside of it to state the cost of handling second-class mail matter to-day.

The Penrose-Overstreet Commission made a comprehensive study of postal matters in 1907 and made the following report:

"The Post Office Department is not now able and has never been able to furnish statistics as to the costs of the various classes of mail class by class. Its inability to do so is demonstrated by the fact that from the beginning of the controversy its only way of getting at the relative cost of second-class matter has been the crude method of dividing the total cost of the service by the total number of pounds carried and declaring the quotient to be the cost of carrying a pound of second-class matter. Until the entire system of expenditure, accounting, and bookkeeping in the Post Office Department is completely overhauled and put upon a new basis, it will be impossible, even with all the results from the present weighing statistically to ascertain the cost of the respective classes."

The average publisher delivers his publication, properly sorted, direct to the mail cars. There is no expense to the Postal Service here since the loading is done by railroad employees and is included in the rate paid the railroads by the Government.

It is possible to estimate the transportation cost of handling second-class matter. A publisher loads a car with 42,000 pounds of his periodical destined for a city in the third zone, 226 miles.

The Government pays the railroad company 35 cents a mile, or $79, which is the lowest rate granted any shipper. The publisher pays postage amounting to $945, or $866 more than the transportation cost. In the fourth zone the Government pays $221 and the publisher $1,365. In the fifth zone the Government pays $336 and the publisher $1,575. In the eighth zone the Government pays $1,130 and the publisher pays $2,415.

There is left the final operation of distribution at the point of destination. Other classes of mail average 12 handlings by postal employees, but second-class matter in bulk is handled only at the post office of final delivery.

Here is where it is impossible to even approximate the cost, because the carriers will be handling first class and other kinds of mail while delivering the periodicals.

But suppose that the carload of 42,000 pounds, or 21,000 magazines, goes to a single post office. The Post Office Department states that a carrier can make 300 stops in a day. That would mean that 70 carriers would deliver this mail shipment in a single day.

At $5 a day the cost would be $350. The transportation profit to the eighth zone was $1,285. Subtracting the cost of delivery leaves $935 for all other overhead expenses.

I maintain that it is possible for private enterprises, without the postal organization and paying higher rates of transportation, to make a handsome profit on this distribution.

It is inconceivable that the Post Office Department should have to confess that it can not perform this essential postal operation more cheaply than any private enterprise.

The fact is that private distributing companies are doing this work and making a profit.

To-day an express company will call at the plant of the publisher, collect bundles of periodicals, and deliver them at the door of the addressee in a city many miles distant at a lower cost than if those publications were sent by mail.

Private means of distribution are rapidly replacing the Post Office Department, which was organized to serve all the people.

Reports from the post offices where publishing is chiefly centered shows a marked tendency to a falling off of entry on the part of large shippers of second-class matter. In verification of this, I wish to quote a letter from the Third Assistant Postmaster General, W. Irving Glover, under date of June 21, 1921, in which he states as follows:

"It will be observed from the foregoing that the increase in the postage on second-class matter for the fiscal year of 1921 over that for the fiscal year of 1920 is far less than the increase in the postage for the fiscal year of 1920 over that for the 1919 year, as well as far less than that for the year 1919 over the postage for the year 1918. This is due in part to a falling off in the weight of mailings and in part to the fact that a number of publications of wide circulation have sent considerable portion of their copies by freight to certain distributing points, where they enter the mails for distribution within the near-by zones, thus receiving a lower rate of postage on the copies than if they had been mailed in the city of publication."

At my request the Post Office Department prepared a statement giving the weights of second-class matter mailed at Chicago, New York, and Philadelphia during 1920, 1921, and 1922.

This statement, with fourth quarter estimated by myself, is as follows:

Office.	Quarter.	Fiscal year 1920.	Fiscal year 1921.	9 months fiscal year 1922.
		Pounds.	*Pounds.*	*Pounds.*
Chicago	September	22,626,497	20,514,552	19,407,219
Do	December	29,396,793	20,797,224	20,357,220
Do	March	28,796,714	20,368,798	22,016,439
Do	June	25,400,611	20,095,987	[1] 20,593,626
Total		106,220,615	81,776,561	82,374,504

[1] Estimated.

Office.	Quarter.	Fiscal year 1920.	Fiscal year 1921.	9 months fiscal year 1922.
		Pounds.	*Pounds.*	*Pounds.*
New York	September	61,250,430	60,524,831	47,339,522
Do	December	43,033,912	62,749,895	50,591,539
Do	March	73,505,274	54,976,038	53,945,724
Do	June	72,760,717	50,163,609	[1] 50,625,591
Total		250,550,333	228,414,373	202,502,367
Philadelphia	September	30,353,993	38,423,724	16,149,523
Do	December	34,934,283	29,398,729	15,481,383
Do	March	39,402,508	22,521,549	17,707,593
Do	June	42,767,620	17,711,540	[1] 17,446,171
Total		147,458,404	108,055,542	66,784,685
Grand total		504,229,352	418,246,476	351,661,556

[1] Estimated.

Taking for granted that the last quarter of 1922 in Philadelphia alone will equal that of the third quarter, we note that the 1922 mailings in that one city are less by 80,000,000 pounds than the 1920 mailings. In other words, that great amount of mail matter has been taken out because the excessively high rates made it good business to send it by private means of transportation.

Any business man would be guilty of asinine folly if he did not use these private means.

Take a look at the situation. That 80,000,000 pounds of second-class mail means 1,900 carloads of 42,000 pounds each.

To get one of these loaded cars to the fourth zone costs the Post Office Department $221 each, and the 1,900 cost $419,900, but each one costs the publisher at present rates $1,365, or a total of $2,593,500.

But this mail matter can be sent by express to the fourth zone for 1½ cents a pound, which means $1,200,000 for the entire amount. The delivering can be made for less than a cent apiece, which would cost $400,000, or a total cost by private means of $1,600,000. That is $1,000,000 less than the postal charge under present rates.

Is it any wonder that second-class mail matter, which was once carried almost entirely by the Post Office Department, is disappearing from the mails?

Let us look at it from another angle. Taking the average for the year as a fair basis for the last quarter in 1922 we find that there was a drop of 152,567,796 pounds of second-class mail matter in 1922 in three cities.

Three thousand three hundred and sixty-two carloads can be sent to the fifth zone at a cost to the Post Office Department of $336 a car, or a total of $1,220,352.

At the rate provided in my bill, half reading and half advertising, the publishers would pay $3,813,600. There would be a clear transportation profit of $2,593,248. By express these periodicals could be sent at almost $400,000 less cost than even under these reduced rates provided in my bill. By fast freight they could be sent at a saving of almost $2,000,000 over these reduced rates.

Surely no further argument is needed to prove that these reduced rates are as high as can be levied in all justice.

Just what effect these reductions will have on revenues is shown by the following table, showing percentage of second-class mail by zones, covering the total pounds entered at the pound rate for the fiscal year 1921, with comparison of postage collectible thereon under present rate and the rate effective July 1, 1919, which is the rate fixed in my bill:

Zones.	Percentage of total pounds.	Pounds.	Postage at rate of July 1, 1921.	Postage at rate of July 1, 1919.	Per cent of decrease.
1 and 2	45	529,716,541.50	$11,270,039.46	$8,845,748.11	14.28
3	16	188,343,659.20	4,237,732.32	3,296,014.03	22.22
4	13.6	160,092,110.32	5,202,993.57	3,602,072.47	30.76
5	11	129,486,265.70	4,855,734.93	3,237,156.62	33.33
6	5.3	62,388,837.11	2,651,525.57	1,715,693.01	35.28
7	2.5	29,428,696.75	1,545,006.54	956,431.62	38.11
8	6.6	77,691,759.42	4,467,276.14	2,719,211.56	39.13
Total		1,177,147,870.00	34,230,308.53	24,372,327.42	[1] 30.44

[1] Average percentage.

On the 1921 figures, which are much higher than those of 1922, there would be a decrease in revenue of $9,857,981.11, with computation based on 50 per cent advertising and 50 per cent reading matter. Three hundred million pounds of second-class matter now being sent by private methods of transportation would more than make up that reduction.

But the critics say that it would be good policy to lose all this second-class matter since it is unprofitable business. Such a statement is based on fallacy, aside from the fact that the Post Office Department in so acting would betray its own mission.

The expenses of the Post Office Department would be reduced to a very small degree. No postmaster would be discharged and very few carriers, clerks, or supervisors would lose their jobs. There would be lessened payments to the railroads, but for every dollar lower expense there would be several dollars less revenue.

We should understand that here is a great business subject to the law of increasing returns. The great plant is there, fully equipped with an overhead expense which is practically the same regardless of business done.

Think of it for a moment—326,000 postal workers are employed in this great distributing organization, or one for every 337 persons in America.

It has an expense of more than half a billion dollars a year. Does any sane person think that if we put prohibitive rates on second-class matter and drive the business into private channels that that will benefit the service? This measure means that about $7,000,000 less revenue will be received on the present weight; but the second-class matter now being carried by private enterprise, if put back into mails would make up that loss in revenue without adding to present costs. It is common

sense to add business to the very peak of the volume which can be handled without adding to the expense of operation.

In any case I do not consider that this question hinges entirely on the profits to be made from the second-class mail. The newspaper and periodical help to promote education, inspire Americanism, and stimulate a united public mind. They are books, pulpits, platforms, and forums in one.

The rural free delivery is a service which is very expensive and which means a direct loss of many millions; but because there is a vital value in enabling farmers to keep in touch with their friends and relatives, to read publications which keep them abreast of current events and to dispel the isolation of rural existence, there is no demand for the discontinuance of this service.

The first letters to Alaska were delivered at a cost of $450 per letter; but those pathfinders in the new American empire were kept within the range of communication through the post office, and no regard was paid to the cost of that particular service.

There is a public benefit in the continuous dissemination of information to the people of America. Without it free institutions can not long endure.

The present rates strike a blow at the national press such as is shown in a letter I have just received. It stated:

"You will be interested to know that the revenue act of 1917 has very greatly hindered our publication in becoming a national medium. The circulation of Woman's Weekly at the present time is restricted to zones within a radius of 500 miles of Chicago, whereas we should have gone after national distribution long ago had it not been for the prohibitive tax that kept us from doing so."

Is it not wise to encourage a national press by advantageous rates, even though it should be proven that there is some difference between cost of the service and revenue received?

One thing is certain, the rates charged by the post office, the greatest distributing organization in the world, should not be so high as to divert the business to private methods of transportation. Aside from any question of policy the transfer of newspapers and periodicals to other transportation, simply argues a woeful inefficiency on the part of the Postal Service or unwise legislation by Congress.

There is a specious argument being made that these excessively high postage rates apply only to the portion of the periodical devoted to advertisements and that reading matter goes at flat rates.

Such a plea would argue that the advertising and reading matter are separate and distinct. The fact is that there could be no reading matter without the advertisements.

The average newspaper publisher pays more for the white paper than he receives in subscriptions. He could not supply the news, editorial articles, pictures, and other informational and educational features without the advertising revenue. A single great press association spends $5,000,000 a year to gather news of the world for its members.

It costs the newspapers of this country at least $10,000,000 a year to cover the national news in Washington. Without this expenditure it would be impossible under present conditions to inform the American public as to the conduct of their own Government.

The great trade papers and reviews dealing with certain phases of industry, art, literature, etc., would be impossible to produce were it not for the advertising columns. The advertiser make possible the circulation of the medium of information which help to stabilize conditions and perpetuate American institutions.

It is foolish to argue that advertisements have no educational value. The Hughes Commission, in its report of 1912, states that "The amount of space given to advertising is no criterion of the educational value of a magazine." The advertisements carry to the public the news of every advance in industrial achievement. They chronicle every step in the upward climb of mankind to secure new comforts and conveniences. They light the fires of ambition in the minds and hearts of countless Americans and widen the horizon of every reader in the land. They have helped the manufacturer to appeal direct to the consumer, resulting in standardized production which has made America the foremost commercial Nation.

The advertising pages are business highways of the Nation. Would you tax only those who use the waterway or roadway, because perchance they secure a direct benefit from it? Not a sale can be made nor a pound of goods moved without communication between buyer and seller and the interchange of information. The whole life of the country depends upon its facilities for intercommunication.

Would anyone suggest that traveling salesmen be taxed by special levy because they sell goods? On the contrary, there is a worthy measure pending in Congress granting traveling salesmen a 25 per cent discount in railroad rates. Then why should there be levied excessively high rates on advertising pages, which are so many business messengers going direct to the homes of the people?

The contention that this is a tax that can be shifted to an advertiser is obviously unsound. It can not be passed on to the advertiser for the very reason that it is levied on only a part of the advertising in newspapers and periodicals. The New York department store will not pay a higher rate in order that California readers may see the advertisement. The advertising rate is determined not according to the cost of delivering the publication to subscribers but according to the number of subscribers and their potential buying power. This advertising rate is governed by competition with rates for advertising in nonmailed and therefore untaxed newspapers and periodicals, and the other untaxed means of advertising such as billboards and posters, as well as the cost of alternative methods of promoting sales, and publicity by additional sales agents, discounts to trade, prizes, window displays, sampling, etc. The conclusion that this tax in the form of an excess charge for the advertising portion of newspapers and periodicals distributed through the mails can be passed on to the advertiser whose announcements are thus carried is untenable.

That additional advertising has not been secured to cover these increased rates may be seen from the four-year record of June advertising in Printers' Ink issue of June 8, 1922.

A list of 61 leading magazines shows that in June, 1920, 2,676,735 lines of advertising were carried. In June, 1922, the total was 1,644,109, showing a 40 per cent loss in the amount of advertising carried.

It should not be levied by the government which seeks to promote business nor by the government which depends upon the newspapers and periodicals to carry messages to the public. These publications are the medium through which vital information as to tax laws, tax methods, and countless Government needs is taken to the American people. I do not believe that special supertaxes should be levied upon this cooperating industry, especially when it is subject to all other taxes levied upon industry as a whole.

Then, if it is desirable to tax their profits it can be done through a vastly more efficient system than this. This system means greater costs to collect than any other. The average rate of 4 cents a pound is 2½ cents above the flat rate of 1½ cents. On 500,000,000 pounds that means a revenue of $12,500,000. Clerical and auditing work in segregating advertising and reading matter costs the post office and the publishers at least $1,000,000. Paying 8 per cent for collection is too high for any form of taxation.

Finally, let me say that this country has been made possible because information highways were provided by the Postal Service over which knowledge might pass with the least interference possible. It can not live and grow on the idea that these publications are outlaws to be driven from the highways into the byways.

Already great injury has been inflicted by the postal rates of the revenue law of 1917. For a great number of valuable publications the comfort of this measure will come too late. It will be like a pardon after execution. They have disappeared—destroyed or merged into some other publication.

"The power to tax is the power to destroy," said Chief Justice John Marshall. But because Congress has the power to tax newspapers and periodicals out of business is no argument for the use of that power. Oppressive taxation is a most effective method of destroying the press whose freedom is guaranteed in the Constitution.

Finally, on a dollar and cent basis it is a wise policy to grant advantageous rates to second-class matter. It is the fountain source of first-class matter upon which the Government reaps a handsome profit. It is a selling service for the Post Office Department, but it receives no commissions and apparently very little credit for developing business.

Not an activity of the Postal Service but is freely and widely advertised in the press. Civil-service examinations, parcel-post rules, postal-savings plans, uncalled-for letters, and a host of other messages of the department to the people are carried without charge. One circular letter without postage sent to the patrons of the Post Office Department would cost several million dollars. Material for a hundred circular letters is carried every year into almost every home in America without the cost of a single penny.

Just how important is this service is shown by the statement issued by Postmaster General Hubert Work, May 12. He said:

"Postal-improvement week, which marked the close of a year's constant effort to improve the Mail Service, has now passed into history, but the effect will survive for many years to come, because of the applied principles of good service, which made of it an outstanding success, both in the way of actual physical handling of the mail and in the more intangible achievement of a better understanding the public has gained of our service.

"The department is indebted to the newspapers and other publications for a generous and invaluable publicity."

Every other department of the Government, too, uses the press as the medium for the dissemination of information which otherwise would have to be sent out through circulars or booklets at tremendous cost.

Surely there should be no quibbling over the question of the exact cost of sending through the mails the publications which perform so vital a service. Surely there should be no valid objection now to modifying the war rates to a point which still means an increase of 175 per cent over the pre-war rates.

In order that the situation may be seen at a glance, I have prepared the following table showing the comparison of freight, express, present second-class rates, and the rates provided in my bill per hundred pounds from New York City to cities in the several zones:

Zones.	Freight.	Express.	Second-class mail.	Proposed 1919 rate.
Zone 1, 50 miles: zone 2, 50 to 150 miles: Albany, N. Y.	$0.35½	$1.45	$1.75	$1.50
Zone 3, 150 to 300 miles: Boston, Mass.	.55½	1.50	2.25	1.75
Zone 4, 300 to 600 miles: Columbus, Ohio.	.82	1.49	3.25	2.25
Zone 5, 600 to 1,000 miles: Atlanta, Ga.	1.58½	2.22	3.75	2.50
Zone 6, 1,000 to 1,400 miles: Galveston, Tex.	2.87	3.84½	4.25	2.75
Zone 7, 1,400 to 1,800 miles: Denver, Colo.	2.90½	4.05	5.25	3.25
Zone 8, over 1,800 miles: Salt Lake City, Utah	4.13½	5.47½	5.75	3.50

NOTE.—Freight rates shown herein are subject to a 10 per cent reduction effective July 1, 1922. Second-class mail rates are based on 50 per cent advertising and 50 per cent reading matter. A water rate of 70½ cents applies on magazines and periodicals to Galveston, Tex. (7th zone), and a rate of $1.25 to Pacific coast points (8th zone) via Panama Canal.

ADJOURNMENT.

Mr. MONDELL. Mr. Speaker, I move that the House do now adjourn.

The question was taken.

Mr. GARRETT of Tennessee. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 134, nays 71, not voting 222, as follows:

YEAS—134.

Anderson	Brooks, Pa.	Chindblom	Dallinger

So the motion to adjourn was agreed to.

The Clerk announced the following pairs:

On the vote:

Mr. Burton (for) with Mr. Oldfield (against).

Mr. Thompson (for) with Mr. Tague (against).

Mr. Nolan (for) with Mr. Riordan (against).

Mr. Dickinson (for) with Mr. Linthicum (against).

Mr. Wood of Indiana (for) with Mr. Sisson (against).

Mr. Crowther (for) with Mr. Kitchin (against).

Mr. Schall (for) with Mr. Jacoway (against).

Miss Robertson (for) with Mr. Aswell (against).

Mr. Shaw (for) with Mr. Johnson of Kentucky (against).

Mr. Osborne (for) with Mr. Stoll (against).

Mr. A. P. Nelson (for) with Mr. Carew (against).

Mr. Webster (for) with Mr. Lee of Georgia (against).

Mr. Parker of New Jersey (for) with Mr. Ten Eyck (against).

Mr. Stiness (for) with Mr. Dupré (against).

Mr. Evans (for) with Mr. Rainey of Illinois (against).

Mr. Taylor of New Jersey (for) with Mr. Hawes (against).

Mr. Sinclair (for) with Mr. Sullivan (against).

Mr. Langley (for) with Mr. Woods of Virginia (against).

Mr. Codd (for) with Mr. Bell (against).

Mr. Patterson of New Jersey (for) with Mr. Carter (against).

Mr. Winslow (for) with Mr. Thomas (against).

Mr. McArthur (for) with Mr. Wise (against).

Mr. Radcliffe (for) with Mr. Collins (against).

Mr. Keller (for) with Mr. Mead (against).

Mr. Atkeson (for) with Mr. Deal (against).

Mr. Kline of Pennsylvania (for) with Mr. Overstreet (against).

Mr. Newton of Minnesota (for) with Mr. Lea of California (against).

Mr. MacGregor (for) with Mr. Swank (against).

Mr. Dowell (for) with Mr. Barkley (against).

Mr. Beck (for) with Mr. Johnson of Mississippi (against).

Mr. Knutson (for) with Mr. Kindred (against).

Mr. Connolly of Pennsylvania (for) with Mr. Black (against).

Mr. Lineberger (for) with Mr. Taylor of Colorado (against).

Mr. Colton (for) with Mr. Drewry (against).

Mr. Brennan (for) with Mr. Fields (against).

Mr. Kendall (for) with Mr. Rucker (against).

Mr. Burtness (for) with Mr. Fulmer (against).

Mr. Frear (for) with Mr. Hayden (against).

Mr. Arentz (for) with Mr. Steagall (against).

Mr. Hukriede (for) with Mr. Raker (against).

Mr. Anthony (for) with Mr. Fisher (against).

Mr. McFadden (for) with Mr. Sears (against).

Mr. Morin (for) with Mr. Harrison (against).

Mr. Gahn (for) with Mr. Quin (against).

Mr. Frothingham (for) with Mr. Dominick (against).

Mr. Williams of Illinois (for) with Mr. Sabath (against).

Mr. Hutchinson (for) with Mr. Goldsborough (against).

Mr. Brooks of Illinois (for) with Mr. Tyson (against).

Mr. Jones of Pennsylvania (for) with Mr. Briggs (against).

Mr. Beedy (for) with Mr. Logan (against).

Mr. Kearns (for) with Mr. Collier (against).

Mr. Haugen (for) with Mr. Kunz (against).

Mr. Cramton (for) with Mr. Bankhead (against).

Mr. Luce (for) with Mr. Connally of Texas (against).

Mr. Kahn (for) with Mr. Cullen (against).

Mr. Begg (for) with Mr. O'Brien (against).

Mr. Madden (for) with Mr. Cockran (against).

Mr. Kiess (for) with Mr. Montague (against).

Mr. Brown of Tennessee (for) with Mr. Crisp (against).

Mr. French (for) with Mr. Blanton (against).

Mr. White of Kansas (for) with Mr. Taylor of Arkansas (against).

Mr. Reed of New York (for) with Mr. London (against).

Mr. Yates (for) with Mr. Rainey of Alabama (against).

Accordingly (at 12 o'clock and 28 minutes p. m.) the House adjourned until to-morrow, Friday, August 18, 1922, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

669. Under clause 2 of Rule XXIV, a letter from the Secretary of the Treasury, transmitting two suggested paragraphs of legislation to relieve the accounts of former Acting Collector of Internal Revenue J. L. Flynn and of Collector of Internal Revenue John P. McLaughlin, both of the first California district, was referred to the Committee on Claims.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. EDMONDS: A bill (H. R. 12344) to provide for the deportation of aliens who participate in riotous gatherings, and for other purposes; to the Committee on Immigration and Naturalization.

By Mr. MOORE of Virginia: A bill (H. R. 12345) to authorize and direct the construction and maintenance of a memorial highway connecting Mount Vernon, in the State of Virginia, with the city of Washington, in the District of Columbia, and for other purposes; to the Committee on Roads.

By Mr. WARD of North Carolina: A bill (H. R. 12346) to require the Interstate Commerce Commission to fix and regulate the compensation of all interstate railroad service; to the Committee on Interstate and Foreign Commerce.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. CABLE: A bill (H. R. 12347) granting a pension to Lavenia A. Collett; to the Committee on Invalid Pensions.

Also, a bill (H. R. 12348) granting a pension to Perry Davis; to the Committee on Pensions.

Also, a bill (H. R. 12349) granting a pension to George W. Sowers; to the Committee on Invalid Pensions.

By Mr. CROWTHER: A bill (H. R. 12350) granting a pension to Cornelia de C. Williams; to the Committee on Pensions.

By Mr. MICHENER: A bill (H. R. 12351) granting a pension to Thirza C. Gifford; to the Committee on Invalid Pensions.

By Mr. SANDERS of New York: A bill (H. R. 12352) granting a pension to Sarah A. Parks; to the Committee on Invalid Pensions.

Also, a bill (H. R. 12353) granting an increase of pension to Arminda Russell; to the Committee on Invalid Pensions.

By Mr. SWING: A bill (H. R. 12354) for the relief of J. Jessup & Sons; to the Committee on Claims.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

6180. By Mr. FOCHT: Petition of Penns Creek Grange, No. 1723, protesting against the proposed duty on potash; to the Committee on Ways and Means.

6181. By Mr. FULLER: Petition of the Illinois Agricultural Association favoring a tariff on soy beans and their products and other vegetable oils; to the Committee on Ways and Means.

6182. By Mr. KISSEL: Petition of Preiss Bros., New York City, N. Y., relating to the tariff on wool; to the Committee on Ways and Means.

6183. Also, petition of the Omaha Chamber of Commerce relating to the decision of the Supreme Court of the United States in the Central Pacific case, requiring a separation of the Central Pacific Railroad from the Southern Pacific Co.; to the Committee on Interstate and Foreign Commerce.

6184. Also, petition of Hawley & Hoops, New York City, N. Y., relating to the industry of confectionery; to the Committee on Ways and Means.

6185. By Mr. MOORE of Virginia: Petition of the Arlington County Civic Federation relative to railroads, mines, and telephone and telegraph lines; to the Committee on Interstate and Foreign Commerce.

6186. By Mr. SANDERS of New York: Petition of the congregation of the First Baptist Church of Batavia, N. Y., urging the United States to help the Armenians by giving financial support in their efforts against Turkish oppression; to the Committee on Foreign Affairs.

SENATE.

FRIDAY, *August 18, 1922.*

(*Legislative day of Thursday, August 3, 1922.*)

The Senate met at 11 o'clock a. m., on the expiration of the recess.

THE TARIFF.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes.

Mr. McCUMBER. Mr. President, I ask unanimous consent to have printed in the RECORD a brief statement on "United States tariffs and periods of prosperity and adversity," prepared by Mr. Frederic E. Kip. I think it is a valuable contribution in the way of information. I ask that it may be printed in 8-point type and italicized as therein indicated.

Mr. HEFLIN. Mr. President, what is the Senator's request?

Mr. McCUMBER. To have printed in the RECORD a brief relative to American tariffs, with data, and so forth.

Mr. HEFLIN. I have no objection.

The PRESIDENT pro tempore. Without objection, the request of the Senator is granted.

The matter referred to is as follows:

UNITED STATES TARIFFS AND PERIODS OF PROSPERITY AND ADVERSITY (1789 TO 1922).

(By Frederic E. Kip, Montclair, N. J.)

"TARIFF FOR REVENUE ONLY" AS AGAINST "PROTECTIVE TARIFF."

"Tariff for revenue only" (since its adoption in 1832 by the Democratic Party) *has been highly detrimental to our workers, our farmers, and directly or indirectly to all our people.*

Notwithstanding the positive evidence of this, to-day again, as in times past, Democratic Senators, Democratic editors, and Democratic professors of colleges are strenuously denouncing the "Fordney-McCumber Republican tariff bill" now before the United States Senate, claiming that the higher rates of duties in this bill over the rates of the present "Democratic Underwood tariff bill" will raise the cost of living and do all sorts of other damage.

We hear volumes in speeches from Democratic Senators on the floor of the United States Senate, and many articles are written by Democratic newspapers and professors relative to the new rates of the "Republican tariff bill" being a tax upon the people, a burden on our workers, farmers, and consumers and a benefit only to big business and trusts. How is it that these Senators, editors, and professors can be so grievously mistaken when history records *in no uncertain terms* the disastrous results attending each and every Democratic "tariff for revenue only" bill since the formation of our Government in 1789 right to this very date, including the present "Democratic Underwood tariff bill"?

By what reasoning, therefore, can these Democratic Senators, editors, and professors espouse a cause so disastrous to our people's best interests? Granting that they are sincere, then the only answer is that they base their conclusions on a false premise, and, consequently, their foundation being faulty, their entire structure becomes erroneous; in fact, this is the case, as will soon be seen, viz:

Under the dispensation and conception of the Democratic Party the tariff rates are *actually a tax on all consumers because the rates of duties* are fixed and applied by the Democratic Party only in relation to "tariff for revenue" and without regard to any beneficial results flowing out of production from a new domestic industry or the increase of production from a previously established domestic industry.

Under the Democratic theory of "tariff for revenue only," if a foreign article costs abroad $1, and the duty is 25 per cent, viz, 25 cents, the article would cost our consumers, plus selling expenses, $1.25, and that is the end of the matter under Democratic theory and practice. Under their theory there are no compensating benefits, no balancing at the other end, and hence a duty of 25 per cent, *as always applied by the Democratic Party, is without question a tax and burden on our people.*

The trouble with the Democratic Party is that having had their minds directed since 1832 to a "tariff for revenue only," and knowing that such tariff is a tax on the people, they can not adjust their minds to the significant great truth, that although rates of duty under a tariff for revenue are a tax on the people, *a tariff for protection is not a tax but a great benefit to our workers, our farmers, and all our people.*

Under the Republican Party's protective tariff principles the duty rates are fixed with the express purpose of producing in the United States articles not previously produced here, thereby building up our domestic industry and employing American operatives that formerly have been employed abroad.

Again we will take the same example, viz: The foreign article costs abroad $1; a protective duty of 40 per cent has built up a domestic industry, therefore the foreign price plus duty, viz, 40 cents, making the price $1.40. This price is in effect only for a short period; intensive competition between the old foreign and the new United States producer results in the lowering of prices, so instead of the article being sold at $1.40 it is sold at $1.35 and finally at $1.25; then by that time the production of the domestic industry has been built up to large proportions and internal competition and large production still further reduce prices, so that under the Republican protective tariff system not only is the article sold to the American con-

sumer at $1 to $1.15, against $1.25 under the Democratic tariff for revenue system, but under the Republican system thousands of additional operatives are employed in the United States and their additional purchasing power helps to make better times in the most prosperous Nation in the whole world and the envy of all Christendom.

The McKinley bill, passed October 6, 1890, illustrates and proves the great benefits of the Republican protective tariff system. In this bill, among other articles that were accorded protective rates, were tin plate, silk velvets and plushes, and collars and cuffs.

There was then (1890) no tin-plate industry in the United States and only a small industry in velvets and plushes and collars and cuffs. Besides that, the foreign tin-plate manufacturers claimed we could never make tin plate here, because we had no mines of tin in the United States; so here was a case, if there ever was one, to prove the Democratic contention that the increase of duties on tin plate must add to the prices and place an extra burden on the people.

Well, even in this case did it do it? Here are the real true facts:

First. We unearthed deposits of tin, principally in the State of Indiana.

Second. Capital immediately started to build proper plants for the making of tin plate.

Third. Within two years we were making in our mills in the United States from tin supplied entirely from our own mines the finest quality of tin plate in the world, *and selling it at much less than the imported article was formerly sold* when we had a much lower rate of duty, and by our enormous production, reducing cost, we are to-day selling a better quality of tin plate at about one-half the price at which the foreign article was formerly sold when the tariff rates were lower.

Through this development we are employing great numbers of workers and are putting up and selling all over the world immense quantities of canned goods, vegetables, fruits, meats, etc., requiring enormous amounts of tin plate, to the great benefit of our workers, farmers, and all of our people.

Again, the same record with the other two industries, viz, velvets and plushes and collars and cuffs.

To-day the consumers are buying both much lower than formerly, when the rates of duty were less, and lower than ever would have been the case had we confined ourselves entirely to the foreign article. As a matter of fact, to-day collars and cuffs can be purchased retail in the United States as cheaply as they can be purchased in England, without any duty, from whence they were formerly all imported.

And, mark you, with these and similar developments thousands and thousands of additional operatives are employed here, who in turn make demand for our farm and other products. By our large production, machinery equipment, invention, etc., we are enabled to pay the highest wages in the world and still produce many articles (automobiles, sewing machines, special tools, etc.) at such prices as to enable us to export largely to foreign countries having wages to-day one-tenth or even one-twentieth of the wages paid our workers.

FALLACY OF CONTENTION OF LOW TARIFF TO INCREASE EXPORT TRADE AND ENABLE EUROPE TO PAY HER DEBTS.

Considerable stress has been laid on the argument that to-day, we being a creditor nation instead of, as formerly, a debtor nation, we should now operate on low tariff rates—which in reality means lower wages to all our employed labor—and thereby increase our export trade and better enable Europe to pay her debts.

This entirely ignores the fact that the consumptive power of the United States to-day is more than all of the rest of the civilized world combined, and under the Republican Party's beneficial protective tariff system it operates as follows:

Our 110,000,000 people have a purchasing power—due to the amount of wages earned in proportion to their living expenses—equal to six times that of Europe, including Great Britain, France, Germany, Italy, etc. Therefore our country has a purchasing power, gauged by that of Europe, of not 110,000,000 but 660,000,000 people.

This enormous purchasing power enables the building up of plants with tremendous production, as, for instance, the Ford automobile, where hundreds of thousands of dollars can be invested in one machine, and whereby large American wages can be paid—at the present time six, eight, and ten times those of Europe—and at the same time the cost per unit can be so reduced that many, many articles, as, for instance, automobiles, sewing machines, special tools, etc., can be exported and sold in enormous quantities in competition with countries having much lower wages but higher unit cost of production.

This is the Republican Party's method of maintaining the wages of our operatives, as against the other method, which is nothing more or less than John C. Calhoun's theory of "tariff for revenue only," promulgated in 1832 by the Democratic Party, which has proven disastrous to labor and to our country during each and every period that it has been tried since 1816, as is set forth more fully herein.

WHICH SYSTEM IS BETTER?

Now, which is the better system, the Democratic system of "tariff for revenue only," which adds a positive tax burden upon the people *and keeps labor of foreign countries employed in such foreign countries*, with little or no purchasing power for United States products, or *the Republican Party's system of protective tariff rates, that builds up a domestic industry, reduces prices to our consumers, and employs labor within the borders of the United States, with a great purchasing power that benefits our farmers and all our people?* Well, history has answered the question for you, viz:

The present United States Nation, the greatest, richest, and most beneficial nation in the wide world, is the answer, and at least 95 per cent of all its marvelous achievement and development has been due to and under the régime of the Republican Party's protective tariff upbuilding policies.

FUNDAMENTAL SECURITY OF A NATION.

Another great and fundamental truth, and one that should be remembered for all time by this and every nation, is that "*not only the wealth and independence but the very fundamental security of a nation is only obtainable through diversity of manufacturing within her own borders.*"

This was seen and splendidly expressed by our greatest analytical genius, Alexander Hamilton, way back in 1800:

"Not only the wealth but the independence and security of a country appear to be materially connected with the prosperity of manufactures."

Almost the identical thought was expressed 120 years later by Reginald McKenna, chancellor of the British exchequer, and the death knell of England's free trade was sounded when he promulgated in 1919 the following as a truth, at last most bitterly learned by England:

"The experience of the war has shown that the strength and safety of the British nation in time of peril *lie in the possession by this nation of the power to produce its requirements from its own soil and its own factories*, rather than in the possession of values which may be exported and exchanged for products and manufactures of foreign countries."

It has taken "free-trade" England 100 years and the agony of the greatest war in all history to find out what young Hamilton knew in 1800 and to discover the fallacy of "free trade."

ENGLAND BECOMES A PROTECTIONIST NATION.

In 1920 and 1921 England—our low-tariff advocates' shining example—passed her so-called "safeguarding the realm acts," viz, bills placing duties of 33⅓ per cent on over 6,000 articles and creating a supreme board with power to add additional duties of one-third—33⅓ per cent—their value if investigation shows that a foreign article is being sold for less than cost of production in Great Britain plus a reasonable profit, *so "free-trade" Great Britain becomes protectionist Great Britain.*

VIEWS OF FORMER PRESIDENTS AND PROMINENT MEN.

In view of England's complete abandonment of "free trade" and "tariff for revenue only," the writings of some of our early Presidents—many of them Democrats—and some of our leading men from 1789 to 1920, are most apt and interesting.

1. George Washington—letter to Lafayette:

"However unimportant America may be considered at present and however Britain may affect to despise her trade there will assuredly come a day when this country will have some weight in the scale of empires."

2. Alexander Hamilton:

"Not only the wealth but the independence and security of a country appear to be materially connected with the prosperity of manufactures."

3. Thomas Jefferson—message, 1802:

"To cultivate peace, maintain commerce and navigation, to foster our fisheries, *and protect manufactures adapted to our circumstances*, etc., are the landmarks by which to guide ourselves in all our relations."

4. James Madison—letter to Joseph C. Cabell, September 18, 1828:

"The meaning of the phrase 'to regulate trade' must be sought in the general use of it; in other words, in the objects to which the power was generally understood to be applicable when the phrase was inserted in the Constitution.

"The power has been understood and used by all commercial and manufacturing nations as embracing the *object of encouraging manufactures.* It is believed that not a single exception can be named."

5. James Monroe—message, December 2, 1817:

"Our manufactures will require the continued attention of Congress. The capital employed in them is considerable, and the knowledge required in the machinery and fabric of all the most useful manufactures is of great value. Their preservation, which depends on due encouragement, is connected with the high interests of the Nation."

6. Daniel Webster:

"That is the truest American policy which shall most usefully employ American capital and American labor and best sustain the whole population. Agriculture, commerce, and manufactures will prosper together or languish together."

7. Henry Clay—speech before Congress, 1842:

"The greatest want of civilized society is the market for the exchange and sale of its surplus produce. This market may exist at home or abroad, but it must exist somewhere if society prospers. The home market is first in order and paramount in importance."

A GREAT CONCEPTION AND A GREAT TRUTH.

8. Mathew Carey:

"If there be any one truth in political economy more sacred and irrefragable than another, it is that the prosperity of nations bears an exact proportion *to the encouragement of their domestic industry* and that their decay and decrepitude commences and proceeds *pari passu* with their neglect of it."

A GREAT TRUTH SUCCINCTLY STATED.

9. Henry C. Carey:

"*Manufactures are at once an evidence and a measure of civilization.*"

10. Abraham Lincoln:

"I do not know much about the tariff; but I know this much, when we buy manufactured goods abroad we get the goods and the foreigner gets the money. When we buy the goods manufactured at home we get both the goods and the money."

11. James G. Blaine:

"The benefits of protection go, first and last, to the men who earn their bread in the sweat of their faces."

SO IN 1897 AND DOUBLY SO IN 1922.

12. William McKinley:

"We lead all nations in agriculture; we lead all nations in mining; we lead all nations in manufacturing. These are the trophies which we bring after 29 years of a protective tariff."

"Not only the wealth and independence but the very fundamental security of a nation is *only* obtainable through diversity of manufacturing within her own borders."

DEMOCRATIC PARTY FORMERLY A PROTECTIONIST PARTY.

From the speeches of Democratic Senators and articles of Democratic editors and professors one would get the idea that "low tariff" or "tariff for revenue only" had always been a principle of the Democratic Party. Would therefore call particular attention to the fact that all Democratic Presidents for 32 years—1800 to 1832—also Presidents George Washington and John Adams for 12 years previous thereto—1789 to 1800—were extreme protectionists, and that the great Thomas Jefferson—the first President elected by the Democratic Party—founder and great leader of the Democratic Party, was an extreme protectionist, and while President of the United States actually embargoed shipments of all foreign articles. The Democratic Party espoused, for the first time in its history, "low tariff" or "tariff for revenue only" in 1832, and entirely for selfish sectional reasons. (For full particulars, see Note A.)

PRESIDENTS OF THE UNITED STATES FROM 1789 TO 1922.

The following is a record of all the Presidents (from George Washington, elected in 1789, to the present occupant of the White House), with the notations as to the political faith and tariff views of each; consequently the political faith of their Cabinets and the statesmen surrounding them:

TABLE T-1.—*Table of Presidents.*

Elected in year—	Names.	Political party.	Tariff views.	Administrations of—		Remarks.
				Protection.	Low tariff—Tariff for revenue.	
1789	George Washington	Federalist	Protectionist	Period 1		
1792	do	do	do	Period 2		
1796	John Adams	do	do	Period 3		
1800	Thomas Jefferson	Democrat	do	Period 4		
1804	do	do	do	Period 5		
1808	James Madison	do	do	Period 6		
1812	do	do	do	Period 7		
1816	James Monroe	do	do	Period 8		
1820	do	do	do	Period 9		Low-tariff period A.
1824	John Quincy Adams	Federalist	do	Period 10		
1828	Andrew Jackson	Democrat	do	Period 11		
1832	do[1]	do	do	Period 12		
1836	Martin Van Buren	do	Tariff for revenue only		1	Low-tariff period B.
1840	William Henry Harrison	Whig	Protectionist	Period 13		
1844	James K. Polk	Democrat	Tariff for revenue only		2	Low-tariff period C, 16-year Democratic control.
1848	Zachary Taylor	Whig	Protectionist	Period 14		
1852	Franklin Pierce	Democrat	Tariff for revenue only		3	
1856	James Buchanan	do	do		4	
1860	Abraham Lincoln	Republican	Protectionist	Period 15		
1864	do	do	do	Period 16		
1868	Ulysses S. Grant	do	do	Period 17		
1872	do	do	do	Period 18		
1876	Rutherford B. Hayes	do	do	Period 19		
1880	James A. Garfield	do	do	Period 20		
1884	Grover Cleveland[2]	Democrat	Tariff for revenue only		5	Low-tariff period D.
1888	Benjamin Harrison	Republican	Protectionist	Period 21		
1892	Grover Cleveland	Democrat	Tariff for revenue only		6	Low-tariff period E.
1896	William McKinley	Republican	Protectionist	Period 22		
1900	do	do	do	Period 23		
1904	Theodore Roosevelt	do	do	Period 24		
1908	William H. Taft	do	do	Period 25		
1912	Woodrow Wilson	Democrat	Tariff for revenue only		7	Low-tariff period F.
1916	do	do	do		8	
1920	Warren G. Harding	Republican	Protectionist	Period 26		
	Total administrations			34		

[1] Kindly note that every United States President previous to 1836 was a strong protectionist.
[2] House and Senate were Republican, so no detrimental Democratic legislation was passed.

THIRTY-FOUR PRESIDENTIAL ADMINISTRATIONS—WASHINGTON TO HARDING.

There have been, as shown by the table T-1, 34 presidential elections or administrations since our Government was formed in 1789, and you will note from this table of Presidents this significant fact, that of the 34 presidential terms 26 were protective administrations and only 8 were "tariff for revenue only" or "low tariff."

The eight "low-tariff" administrations extended over five periods, totaling 46 years, as shown in the following table, T-2.

The first administration of President Cleveland, 1884 to 1886 (period "D"), is not counted, because both the Senate and the House were Republican, preventing Democratic tariff and other bills from being passed.

TABLE T–2.—*Low-tariff periods.*[1]

Period.	Tariff.	Years.	Operating under—	War.	Results.
A	*Low tariff*	*1816 to 1824 (8 years)*	*Low-tariff bill, Apr. 27, 1816*	*No war*	*Adversity for entire period.*
B	*Tariff for revenue*	*1832 to 1840 (8 years)*	*Compromise bill, Mar. 2, 1833*	*No war*	*Adversity for entire period.*
C	*Tariff for revenue*	*1844 to 1860 (16 years)*	*Walker bill, July 30, 1846, and still lower tariff, Mar. 3, 1857.*	*War, 1848 to 1855*	*Prosperity during period of the foreign wars. Great adversity for entire period other than war.*
E	*Tariff for revenue*	*1892 to 1896 (4 years)*	*Wilson-Gorman bill, Aug. 27, 1894*	*No war*	*Great adversity for entire period.*
F	*Tariff for revenue*	[1] *1912 to 1922 (10 years)*	*Underwood bill, Oct. 3, 1913*	*No war for first year*	*Great adversity for the period previous to war.*
				War, 1914 to 1919	*Prosperity for the war period (1915 to 1919), then great adversity.*

[1] *Total of 46 years of "low tariff" or "tariff for revenue only.".)*

If "low tariff" and "tariff for revenue only" are as beneficial as claimed for them by our Democratic friends (Senators, editors, and professors), the history of the periods when "low tariff" and "tariffs for revenue only" were in force for over 100 years should prove it. Therefore the study of the results of these periods as set forth in full in Table T–4 is of the utmost importance.

The 26 protective administrations extend also over five periods, totaling 87 years, as shown in Table T–3.

TABLE T–3.—*Protective-tariff periods.*

Period.	Tariff.	Years.	Operating under—	War.	Results.
No. 1	Protective	1789 to 1816 (27 years)	Bill, July 4, 1789, and 15 other protective tariff bills, 1789 to July 5, 1816.	No war 1789 to 1812. War 1812–1814.	Prosperity; from almost ruin in 1789 to great prosperity and development.
No. 2	do	1824 to 1832 (8 years)	Bills, May 22, 1824, May 19, 1828. Specific minimum, compound ad valorem, 20 per cent to 50 per cent.	No war	All duties advance to protective point, 20 to 50 per cent. The greatest kind of prosperity replacing previous adversity.
No. 3	do	1840 to 1844 (4 years)	Bill, September 11, 1841. Bill, August 31, 1842. Specific minimum, compound ad valorem, 1 per cent to 50 per cent.	No war	Duties again advanced to a protective point (1 to 50 per cent), and again prosperity replaced the adversity which had resulted from the "low tariff" compromise tariff act of 1833.
No. 4	do	1860 to 1892 (32 years)	Bill, April 12, 1861, and 23 additional protective bills (for complete list see page 25), including the tariff commission bill, July 1, 1883, and McKinley bill, October 6, 1890.	War 1861 to 1865. No war 1865 to 1892.	The financial agony, chaos, and distress which came to its culmination in the years 1855 to 1860, so vividly portrayed by the then ruling Democratic President, was cured by these protective tariff bills. Great prosperity from 1865 to 1873. Panic conditions, 1873 to 1877, due to overspeculation, coupled with reduction in tariff (bill of June 6, 1872); the detrimental effects of such reductions were recognized and the previous rates restored by tariff act of March 3, 1875. Immense prosperity, 1877 to 1892, and tremendous amount of development in industry, agriculture, and all over the country.
No. 5	do	1896 to 1912 (16 years)	Dingley bill, July 24, 1897. Compound specific and ad valorem rates. The most scientific and successful tariff enacted up to this date, Payne-Aldrich bill, August 5, 1909; substantial reductions and many compound and specific rates. Most successful tariff bill.	No European war	The Dingley bill (1897) cured the tremendous depression of President Cleveland's administration (1892 to 1896) and reestablished prosperity. The development of our industries, commerce, agriculture, and arts, during this fifth protective tariff period, was tremendous and probably the greatest of any period in our history. Under the Payne-Aldrich bill there was still further development with labor fully employed and the country more prosperous than ever before.

A MARVELOUS DEVELOPMENT OF THE UNITED STATES.

No one can gainsay that a wonderful and marvelous development has been made, from the puny Government that could not pay its debts in 1789 and was well-nigh bankrupt to our to-day's greatest, richest, and most beneficial Government on the face of the globe.

The development, achievement, and wealth of the United States are to-day the wonder and envy of the world; and yet a few years previous to 1800 (1796) Benjamin Franklin, then United States ambassador to England, importuned all the courts of Europe for a loan of $100,000 for the United States Government; the loan was refused by every court of Europe, including France, but was finally granted by France. During the Great War, viz, in 1917 and 1918, the United States loaned to European governments—principally Great Britain and France—considerably over $10,000,000,000, *so no one can gainsay the fact that our country has been marvelously developed and successful during these past 125 years.* From asking a loan of $100,000 to loaning over $10,000,000,000 is a pretty big jump.

Has the Democratic Party, through its theory of "low tariff" or "tariff for revenue only" contributed its share to this marvelous development?

The combined prosperity, adversity, and development table (Table T–4) fully answers this all-important question.

THE UNION OF COLONIES—THE FORMATION OF OUR FEDERAL GOVERNMENT—EARLY FREE TRADE AND EARLY PROTECTION.

After winning our independence in the war of 1776 we existed as a "Union of Colonies" with entire "free trade." The free trade of this period was accompanied by most disastrous results. The wares of foreign countries, particularly Great Britain, were dumped upon our shores, for which our money went abroad until we were actually drained of all our specie and had hardly a dollar left in circulating medium.

Because the greater part of our goods came from abroad our own laborers were idle and nothing but debt and ruin stared us in the face.

This deplorable state of affairs was one of the principal causes which led to Washington making his call upon the States for a business conference, which resulted in the adoption of the Constitution in 1787 and the formation of the Federal Government in 1789. The debt and distress which resulted from free trade under the "Union of Colonies" were cured at the very inception of our new Government by protective tariff duties.

The very first bill passed by the new Government (after bill No. 1, relating to the "time and manner of administering certain oaths" required by the sixth article of the Constitution, was passed) was bill No. 2, a protective tariff bill, passed July 4, 1789, and signed by President George Washington.

The preamble of this bill reads as follows:

"Whereas it is necessary for the support of Government, for the discharge of the debts of the United States, and the encouragement and *protection of manufactures* that duties be laid on goods, wares, and merchandise imported."

The third measure passed by the Congress was bill No. 3, "An act imposing duties on tonnage," signed by Washington July 20, 1789.

The fourth measure passed by Congress was bill No. 4, "Establishing the State Department," and was signed by Washington July 27, 1789.

The fifth measure passed by Congress was bill No. 5, providing for the "Collection of duties on merchandise and tonnage," signed July 31, 1789.

It will be seen from this record that the paramount thought in the minds of our first legislators and President was raising of revenue and "*protection to American industries.*"

TABLE T-4.—*Illustrating prosperity, adversity, and development from 1789 to 1922.*

[The protective-tariff periods are printed in roman type and the low-tariff periods are printed in italics.]

Period.	Years.	War.	Operating under—	Record of prosperity, adversity, and development.
1.....	27 years.....	War of 1812-1814..	Protective tariffs, 1789-1816. First tariff bill, July 5, 1789. Other bills: July 20, 1789. July 27, 1789. July 31, 1789. Aug. 10, 1790. Mar. 3, 1791. May 2, 1792. June 7, 1794. Jan. 25, 1795. Mar. 3, 1797. July 8, 1797. May 13, 1800. Mar. 26, 1804. Mar. 27, 1804. July 1, 1812. July 29, 1813. July 5, 1816..	This, the first United States protective tariff act (note the preamble about protection of manufacturing), was introduced by James Madison, a protectionist Democrat, who later became President, and was signed by George Washington, a Protectionist, then President. THE BENEFICIAL EFFECTS OF THIS FIRST TARIFF WERE SEEN AT ONCE IN THE INDUSTRIAL PROGRESS MADE IN BOTH AGRICULTURE AND MANUFACTURES, IN SPITE OF ATTEMPTS OF THE MOTHER COUNTRY TO CRUSH OUT THE INFANT INDUSTRIES OF THE STATES. NOTE.—So from the very beginning of our Government protective tariff duties started us along the lines of our great development. The tariff bill of July 1, 1812, imposed double (or so-called war) duties. After the passage of this act, and until the low tariff of 1816 came into operation, the advance made in industry and other development was (for these early days) simply marvelous notwithstanding the short war of 1812 with Great Britain. *Development.* Great development in industry for those early days (1789 to 1816). Woodrow Wilson (when professor at Princeton College) says in his History of the American Republic—"Distinct manufacturing regions began to develop in the Middle States and in the East."
A.....	*8 years..... 1816-1824 (8 years).*	*No war.....*	*First low tariff duties.* *Tariff bill-* *Apr. 27, 1816.* *Apr. 20, 1818.* *Mar. 3, 1819.*	*"Congress considered that they could repeal many of the war taxes and still have rates remain sufficiently protective. Made many reductions, but in this opinion they were mistaken. The duties in the new bill were not sufficiently high to keep out excessive importations and with the determination of Great Britain to ruin our infant industries the years following this tariff proved most disastrous. Bankruptcy and general financial ruin followed, and the evils of 'low tariff' were most apparent."* *The evil effects of the conditions brought about by the low tariff at this period are graphically told by Woodrow Wilson, then professor at Princeton University, in the third volume of his "History of the American People."* *"Peace changed the face of trade, English merchants poured their goods once again into the American ports, so long shut against them by embargoes and war. Manufactories had sprung up while the ports were closed. In the year 1815 close upon $50,000,000 had been invested in the manufacture of textile fabrics alone. The new movement did not stop with the establishment of cotton fabrics. The manufacture of wool and flax and hemp and even silk was added. Iron manufactures, so long ago set up, but tentative and feeble hitherto, increased from hundreds of thousands to millions in value under the stimulation of foreign trade cut-off. Almost everything in general use in the country was sooner or later added to the growing list* *"Industry, long ago begun upon a small scale, took heart to grow, and those which Americans had hitherto not dreamed of attempting were heartily embarked upon. Distinct manufacturing regions began sensibly to develop in the Middle States and in the East, with interests and characteristics which statesmen could not afford to overlook. It was manifestly injurious to every young industry that a flood of English imports should continue to pour into the country at the open ports. The remedy was a protective tariff, such as Mr. Hamilton had wished to see at first, and the young Republican leaders of Congress did not hesitate to advocate and establish it."* *Kindly note the significant fact that Woodrow Wilson, then a professor, and free to use his own opinion, states unequivocally that the remedy for the disastrous times was a "protective tariff."* *Also kindly note that there was no war to interrupt the normal working of this low tariff and that the detriment, distress, and financial ruin were continuous with the running of the low tariff rates, viz, from 1816 to 1824, when a protective tariff bill replaced the low tariff duty rates.*
2.....	1824-1832 (8 years)	No war.....	May 22, 1824, to July 14, 1832: Restoration of protective tariff rates. Specific, compound, minimum, and ad valorem bill of May 22, 1824. Bill, May 19, 1828: Known by its enemies and foreigners as the "Tariff of abomination." Specific, compound, minimum, and ad valorem rates, 20 to 50 per cent.	The agitations for higher duties (kindly bear in mind that the Presidency and Congress were controlled entirely by Democrats) were so earnest that in 1824 a new law was passed which restored many duties to a protective point, which resulted in great prosperity and development in all kinds of industrial enterprises—so much so that many of our leading statesmen of that day, including Daniel Webster, who had been free traders, became permanently stanch Protectionists. This change of sentiment resulted in 1828 in a new tariff based upon specific, compound, minimum, and ad valorem rates, averaging duties from 20 to 50 per cent. This law was called by its enemies and foreigners a "Tariff of abomination," but it proved to be a most beneficial law, because of its thoroughly protective features. Capital was invested in industry and agriculture, and our industries, particularly in the North, received an impetus unknown before in any previous period of our history. Right at this time the Democratic Party changed its colors from protection to the contrary, and the doctrine of "free trade" and "Tariff for revenue only" was born. (For full account of this complete reversal of policy see Note A.)

NOTE A.

REASON FOR DEMOCRATIC PARTY'S CHANGE FROM PROTECTION OF "LOW TARIFF" OR "TARIFF FOR REVENUE ONLY."

John C. Calhoun, who in the early years had always been a protectionist, now believing that free trade or "low tariff" was better for the South, because he thought and claimed the *South would always remain an agricultural country and would, therefore, benefit more by selling its one staple product, cotton, abroad as high as possible, and buying manufactured goods abroad as cheaply as possible, became an advocate of low tariffs.* He was followed by his fellow statesmen and the entire slave power of the South, who thought they saw special advantages which the North was getting against the South, under the so-called American system of protection.

Now that we have history to look back to, only a slight investigation will show how erroneous was the opinion of John C. Calhoun and the entire South when they thought that the South would never become an industrial country, and through selfish, sectional spirit threatened in 1832 secession from the Union.

The following is a record of the South's production of cotton:

Number of bales produced.

1830	732,218
1831	805,439
1832	815,900
1833	930,962
1834	962,343
1835	1,061,821
1836	1,129,016
1837	1,428,384
1838	1,092,980

1839	1,653,722
1840	1,347,640
1841	1,398,282
1842	2,035,481
1843	1,750,060
1844	2,078,910
1845	1,806,110
1846	2,603,763
1847	2,128,433
1848	2,615,031
1849	2,066,187
1850	2,136,083
YEARLY AVERAGE.	
1851–1855	2,924,937
1856–1860	3,598,676
1861–1865	1,785,866
1866–1870	2,607,371
1871–1875	3,622,468
1876–1880	5,036,215
1881–1885	5,865,845
1886–1890	7,231,521
1891–1895	8,040,225
1896–1900	10,152,934
1901–1905	11,006,613
1906–1910	12,175,867
1911–1915	14,169,707
1916–1920	12,689,212

The following are the number of bales consumed by the cotton factories in the Southern States for the years ending July 31, 1916 and 1920:

States.	1916	1920
	Bales.	*Bales.*
North Carolina	1,105,000	1,154,142
South Carolina	930,000	847,201
Georgia	820,000	820,005
Alabama	345,000	372,244
Tennessee	123,000	123,990
Texas	70,000	84,147
Mississippi	37,000	39,206
Louisiana	32,000	42,424
Kentucky	30,000	26,361
Missouri	30,000	322,867
Arkansas	7,000	
Oklahoma	6,000	
Virginia and other States	512,000	
Total	4,047,000	3,832,587

John C. Calhoun and his Democratic friends were just as strenuously positive that protective duties were bad for the South and that the South would never be an industrial country as our Democratic friends are to-day that protective duties are bad not only for the South but for the whole country. The following proves how far wrong they were:

Through the benefit and results of protective tariffs in the years that have passed between 1832 and now, and in spite of their own intention and prophecy—

	Bales of cotton.
The textile mills of one of the Southern States (North Carolina) consumed in the fiscal year ending July 31, 1920	1,154,142
The mills of four principal industrial Southern States, namely, North Carolina, South Carolina, Georgia, and Alabama, consumed for the same period	3,193,592
And the mills of the entire Southern States consumed for the year ending July 31, 1920	3,832,587

The total number of bales of cotton raised in 1832, when South Carolina threatened to secede, was 815,900 bales.

So you see the present total consumption of cotton by the textile mills of the Southern States is nearly five times the quantity of cotton that was raised in the entire South in 1832, the year the South first promulgated their new theory of "tariff for revenue only" and protection is unconstitutional. In the light of these significant figures history has certainly proven the opinion of John C. Calhoun and his Democratic followers to be entirely erroneous.

Protection and protection alone has already built up the industries of the Southern States to this remarkable extent, and if Republican tariff bills like the coming Fordney-McCumber bill are kept on the statute books it will still further build them up.

The following is the consumption of American cotton of the entire textile mills of the North for the years ending July 31, 1916 and 1920:

States.	1916	1920
	Bales.	*Bales.*
Massachusetts	1,274,297	462,222
New Hampshire	282,157	294,333
New York	235,068	251,997
Rhode Island	234,014	305,791
Maine	188,751	194,572
Connecticut	124,755	149,058
New Jersey	42,590	46,433
Vermont	12,922	12,902
Total	2,394,554	1,717,308
Used by the Southern States	4,047,000	3,832,587

So that the South to-day, through the operation of beneficial tariffs put upon our statute books, contrary to their wishes and against their protest, is actually consuming almost double the amount of cotton the North is consuming, and the outlook for a much larger consumption in the South during the next few years is most promising.

TABLE T–4.—*Illustrating prosperity, adversity, and development from 1789 to 1922*—Continued.

Period.	Years.	War.	Operating under—	Record of prosperity, adversity, and development.
B.....	*1832 to 1840 (8 years)*	*No war*.....	*Compromise tariff act, Mar. 2, 1833, in effort to save the Union, reducing biannually by one-tenth all duties in excess of 20 per cent.*	*In 1832, notwithstanding that Andrew Jackson, a great advocate of protection, was the Democratic President, some concessions were made to the southern demands with a view of pacifying the Southern States, but these concessions were not satisfactory and the South demanded most important tariff reductions, and, if same were not granted, threatened to secede from the Union; in fact, an ordinance of nullification was adopted by the State of South Carolina, which declared that the Federal tariff acts of 1828 and 1832 were null, void, and no law nor binding upon the State, its officers, or citizens. It also prohibited the payment of duties under either act within the State after Feb. 1, 1833.* *This will give you some idea of the pitch that the South had worked themselves up to on account of thinking that the North got all the benefit of protection and that they, for their advancement, must have "low duties," "tariff for revenue only."* *South Carolina's threat of secession was vigorously answered by Andrew Jackson's famous announcement, "The Union must and shall be preserved." This proclamation of Dec. 10, 1832, ending with the words, "The Constitution and the laws are supreme and the Union indissoluble," are among the ablest and most interesting of our state papers. Congress passed a bill empowering the President to enforce the laws. But Jackson was naturally reluctant to use force, especially against his native State. "To preserve the Union," a compromise on the tariff was effected under the leadership of Henry Clay. Jackson signed the force bill and the tariff bill on the same day, Mar. 2, 1833. Two weeks later South Carolina repealed her nullification ordinance.* *This compromise to the South, to prevent secession, the so-called "compromise tariff" of Mar. 2, 1833, provided for a gradual reduction in duties by a sliding scale of one-tenth biannually of all duties in excess of 20 per cent.* *The result upon the country was most apparent, and soon it suffered one of the most terrific and disastrous periods of its existence. The Government and the people became almost bankrupt, idleness of labor existed everywhere, and there was intense suffering among all classes of people. However, notwithstanding this condition of affairs, the Democratic national platform of 1840 condemned protection and indorsed free trade.* *Certainly there was no development of any industrial enterprise during this stagnation period.* *Again, take particular note of the fact that there was no war and the distress, ruin, and unemployment ran the entire period of Democratic control.*
3.....	1840 to 1844 (4 years). Acts of Sept. 11, 1841; Aug. 31, 1842.	No war.....	Restoration of protective rates in bill, Aug. 31, 1842: Many specific and compound rates ranging from 1 to 50 per cent.	The result of this tariff bill was simply marvelous, and great development was made in industry during these four years. The Democratic Party came again into power four years later (1844) and obtained the executive and legislative functions of the Government through the elect on of a Democratic President, James K. Polk, by a campaign of deception—
C.....	*1844 to 1860 (16 years).*	*War with Mexico, 1846.*	*The Walker tariff of July 30, 1846, and still lower tariff rates of tariff bill Mar. 3, 1857.*	*President Polk, posing as a protectionist in Pennsylvania and the North, and as a free-trader in the South, and many of the voters believed that they were voting for a candidate who was not hostile to the industrial interests of the country.*

TABLE T–4.—*Illustrating prosperity, adversity, and development from 1789 to 1922*—Continued.

Period.	Years.	War.	Operating under—	Record of prosperity, adversity, and development.
C.....	*1844 to 1860 (16 years)*—Con. *Acts of Walker, July 30, 1846; March 3, 1857.*	*War with Mexico, 1846*—Con. *Discovery of gold in California, 1848–1850. The Crimean War of 1853. This war ended in 1855; no war 1855 to 1860.*	*The Walker tariff, etc.*—Continued.	*The Walker law or tariff of 1846 was passed. For a certain period under this law the detrimental effects were not apparent, owing to the war with Mexico in 1846, discovery of gold in California in 1848–1850, and the great Crimean War, involving Great Britain, France, Turkey, and Russia, which made an abnormal demand (just as the Great War did in 1915 to 1918), for supplies, foodstuffs, and shut off to a great extent foreign-made goods from coming into the United States from foreign countries, or (and please get the full significance of this) in other words, war acted to bring about similar conditions to a protective tariff, and while the conditions similar to protective tariff conditions were maintained there was a fair measure of prosperity, even under the Democratic legislation, but when the war ended (as it did in 1855), immediately again Democratic adversity became rampant. The Democratic Party did not attribute this great adversity and depression to their low tariff rates, but evidently thought to cure matters by a still lower tariff embodied in their new tariff bill of 1857. Then panic and ruin came swift and sure. The disaster to industry and agriculture and the agony and distress of mind and body of our people were the most severe and disastrous of any period of our history and were simply heart-rending.* *No historian, in a few words, could with more force describe the agony and ruin of this period after 16 years of continuous Democratic control and the carrying out of the fallacious Democratic theories of "low tariff" and "tariff for revenue only," than did the Democratic President of that day in his annual addresses to Congress of 1858 and 1860.* *PRESIDENT BUCHANAN'S SECOND ANNUAL MESSAGE TO CONGRESS, DECEMBER 6, 1858.* *"With all the elements of national wealth in abundance our manufactures were suspended, our useful public and private enterprises were arrested, and thousands of laborers were deprived of employment and reduced to want. Universal distress prevailed among the commercial, manufacturing, and mechanical classes. All were experiencing sad reverses at the same moment, our manufacturers everywhere suffered severely—not because of the recent reduction in the tariff of duties on imports, but because there was no demand at any price for their productions."* *AGAIN THE DEMOCRATIC PRESIDENT BUCHANAN DESCRIBES THE SITUATION IN HIS LAST ANNUAL MESSAGE TO CONGRESS OF DECEMBER 4, 1860, IN THE FOLLOWING LANGUAGE:* *"Panic and distress of a fearful character prevailed throughout the land. Our laboring population is without employment, and consequently deprived of the means of earning their bread. Indeed, all hope seems to have deserted the minds of men."* *Think of what these words mean; particularly when spoken by the then ruling Democratic President, who with his party had had complete control of our Government for 16 years and were responsible for the appalling condition of the country.* *It is pretty strenuous and agonizing times, when our President in his message to Congress and the people, after due deliberation states:* *"Indeed, all hope seems to have deserted the minds of men, and* *"There was no demand at any price for their productions."* *It would also be well to note the great philanthropist and humanitarian Peter Cooper's description of existing conditions of that time:* *"British iron and cloth came in and gold went out, and with each successive day the dependence of our farmers on foreign markets became more complete. With 1857 came the culmination of the system, merchants and manufacturers being ruined, banks being compelled to suspend payment, and the Treasury being reduced to a condition of bankruptcy nearly approaching that which had existed at the close of the 'free trade period' of 1817 and 1839. The distress was universal and deplorable in the extreme."* *Kindly realize that this Democratic President and the great humanitarian-philanthropist, Peter Cooper, are stating the true facts written by them at that time and truthfully portraying as then existing the condition of labor, industry, commerce, and the agony of our people, and this was the result after the experiment of low tariffs and tariff for revenue only for 16 years with the Democratic Party in constant and complete control of the Presidency and all other functions of our Government.* *Certainly it was a most deplorable ending of a period of purely sectional politics, "Tariff for revenue only," and the trial of a sectional tariff law. The Democratic Party took control of the Government at a time when the nation was enjoying an amazing period of prosperity and business expansion. The test of the free-trade policy was made under the most favorable conditions posible and proved a complete and dismal failure.* *Ruin and disaster were on hand everywhere, owing to Democratic domination of the Presidency and Congress for 16 years and the continuous application of the principles of "Tariff for revenue only" and "Free trade."* *That great period of depression is now 72 years ago and outside the memory of the present generation, but it is well to refer to the history of those dark days, particularly when we are now being asked by the same Democratic Party to adopt the same policies of low tariff that resulted in this most terrible appalling ruin and distress.* *It has been estimated that 75 per cent of all our industries had either suspended or ceased to operate and nearly all labor was idle. No wonder "Indeed, all hope seems to have deserted the minds of men."* *"It is stated by our statisticians that between 1846 and 1860 not a single new competitive industry was established in the United States."* *WHAT A RECORD! WHO, THEN, HAS BUILT UP THIS GREAT COUNTRY FROM THE WEAKLING IT WAS THEN TO THE GREATEST INDUSTRIAL COUNTRY IN THE WHOLE WORLD?*
4.....	1860–1892 (32 years)	Domestic war 1860 to 1865; no war, 1865 to 1870; Franco-Prussian War, 1870; no war, 1871 to 1892.	Republican protective tariff rates, principally the Morrill bill of Apr. 12, 1861; commission-tariff bill of July 1, 1883; McKinley bill, Oct. 6, 1890, and 20 minor tariff bills, viz: Aug. 5, 1861. Dec. 24, 1861. July 14, 1862. Mar. 3, 1863. Apr. 20, 1864. June 30, 1864. June 5, 1865. Mar. 15, 1866. July 28, 1866. Mar. 2, 1867. July 14, 1870. Dec. 20, 1870. May 1, 1872. June 6, 1872. Feb. 8, 1873. June 22, 1874. Mar. 3, 1875. July 1, 1879. July 14, 1880. May 6, 1882. Dec. 3, 1882. Mar. 3, 1883. Oct. 6, 1890.	Complete Republican control for 32 years. (President Cleveland was elected November, 1884, but both House and Senate being Republican, no Democratic bills were passed. The domestic war of the Rebellion interrupted everything because the very life of the Nation hung in the balance. After the war ended in 1865 there began the great industrial development and achievement in agriculture, in the arts and commerce, entirely under Republican tariffs and laws. This development was interrupted by the panic of 1873. This panic was mainly caused by inflation and overspeculation after the War of the Rebellion and was accelerated and probably supported by the reduction of 10 per cent on all duty rates passed by tariff act of June 6, 1872. This reduction in the tariff was thought by many to have precipitated the panic of 1873, and for this reason was entirely repealed on Mar. 3, 1875, leaving the duties at the point where they were before the tariff act of June 6, 1872, was put in operation. Within a year or two from the date of repeal, in 1875, of such reduced rates prosperity again asserted itself, and the improvement in times was manifest from 1876 on. Then came one of our greatest periods of prosperity and development—principally from 1877 to 1894. The development of all our resources, mines, agriculture, industry, etc., was larger than ever and simply marvelous and beyond anything the world has ever experienced before. Great credit and honor are due to the Republican Party for its tremendous share in the developing and aiding to make our country the greatest country on earth. Of all of the Republican tariff bills passed from 1861 to 1890, the two most conspicuous for benefit were the Morrill bill, passed Apr. 12, 1861, and the McKinley bill, passed Oct. 6, 1890. The McKinley bill established a number of new industries, which had never before successfully operated in the United States, notably the tin-plate industry (which has grown to tremendous proportion to the great benefit of our consumers), silk, velvets and plushes, and collars and cuffs (full particulars of which are set forth on page 4 hereof).

TABLE T–4.—*Illustrating prosperity, adversity, and development from 1789 to 1922*—Continued.

Period.	Years.	War.	Operating under—	Record of prosperity, adversity, and development.
E.....	1892 to 1896 (4 years).	No war.....	President Cleveland's low Wilson-Gorman tariff bill of Aug. 27, 1894.	The Democratic President, Grover Cleveland, was elected the first time in 1884, but as both the House and the Senate were Republican, no Democratic tariff bills were passed.
			Aug. 27, 1894.....	*Therefore, since 1860, the two periods in which the Democratic party had control of both the Executive and legislative branches of the Government were under President Grover Cleveland (1892 to 1896) and President Woodrow Wilson (1912 to 1920).* *President Cleveland had served notice upon employers that protection was to be destroyed and that wages must be reduced. He had warned importers to cease importing until duties were lowered, and wholesale and retail merchants not to buy American manufactures, but rather to wait until the agents of foreigners appeared to solicit their orders. This was the plain effect of what Mr. Cleveland said in his inaugural address, and what the people understood him to say.* *Nine days after Mr. Cleveland's election, the New York Commercial Bulletin, a free-trade journal, informed American workingmen that "labor may be expected to yield its quota of concession," and that "those who have taught workingmen that a reduction of the tariff does not mean a relative reduction in wages have adulterated a great reform with a very paradoxical doctrine."* *Within a year from the passage (Aug. 27, 1894), of the Wilson-Gorman "tariff for revenue only" bill, it seemed as though all industry was paralyzed, and millions of honest, sincere workmen were walking the streets seeking employment in vain, and distress and financial agony were on most of our people. Cozey's Army marched on to Washington with placards, "We don't want charity—We want work." Some 50 per cent of our railroads and 30 per cent of our national banks were in the hands of receivers. The distress and agony of the people were the worst ever experienced, excepting the awful period of 1855 to 1860. After having experienced four years (1892 to 1896) of normal results from the "tariff for revenue only" (no great European war then to give us war prosperity), the people to a unit were through with it at any cost. Even the Democratic platform of 1896 was as silent as a tombstone as to "tariff for revenue only." To have mentioned the subject at all would have been like waving a red flag before an enraged bull.* *In 1896 all the American people were completely through with the fallacies of "free trade" and "tariff for revenue only." The distress of mind and body and the agony of those fearful four years had taught them its bitter lessons.* The result was that William McKinley, the author of protective tariff and father of the McKinley tariff bill, was elected President by a tremendous majority.
6.....	1896 to 1912 (16 years).	No war.....	Highly protective, scientific tariff bill. Many compound and specific rates of duty. Dingley bill passed July 24, 1897.	The Republican Party, being again in power, passed July 24, 1897, the Dingley protective tariff bill, considered the most perfect enacted up to this time. Many compound and specific rates were substituted for ad valorem duties. This bill brought new development in industry and agriculture everywhere and the people flourished as never before. There was a panic in 1907 known as a financial panic. It was confined to financial centers. Industry and agriculture were in no way detrimentally affected.
			Payne-Aldrich protective tariff bill of August 5, 1909.	On August 5, 1909, the Payne-Aldrich protective tariff bill was passed. Substantial reductions were made in some schedules and others were altered in accordance with changed conditions of industry and labor. Under this bill the country was still further developed and labor fully employed. Our prosperity was at its peak in 1912 when the Democratic Party was again returned to power. It took a new generation to forget the agonies placed upon the people by the Democratic Party in 1894 and 1857, and a great split in the Republican Party, to return the Democratic Party again to power. The high-water mark of prosperity, judged by the remuneration to labor and the returns in industry and agriculture, was reached in 1911 and 1912. Labor was fully employed from Maine to California at the highest wages ever paid in the United States previous to the declaration of the great European war, and the conditions of industry and agriculture were more prosperous than at any period ever reached in our industrial and agricultural development.
F.....	*1912 to 1922 (10 years).*	*No war 1913 and up to July 31, 1914; great European war, July 31, 1914, to November 11, 1918; no war 1919 to 1922.*	*Low tariff: Democratic Underwood tariff bill of October 3, 1913; lowest tariff of any civilized country in the world.*	*The Underwood tariff, as shown in Note "B," is the lowest tariff in the world, and, therefore, no wonder that after its passage the disastrous result of this half free-trade tariff bill was immediately felt in every city, town, and hamlet of our country. Many factories closed completely and honest labor walked the streets by thousands upon thousands vainly searching for employment.* *The distress was so great that the churches in New York City were opened to lodge the unemployed, and for the first time in history the morgue in New York was opened up at night by order of the city officials as a lodging place for the unemployed who had no place to sleep. Again, under the Democratic low tariff the disastrous and distressful conditions of 1846 to 1860 and 1892 to 1896 were being duplicated. Estimated number of unemployed over 4,000,000. Absolutely no industrial or other development previous to breaking out of the Great War, July 31, 1914. The Great War found the United States industries without business and Great Britain, France, Italy, and Russia poured orders in great volume into the United States for war supplies. Realizing, due to war and restricted production, shortage of food supplies, all of our foodstuffs began to advance immediately.* *The Great War, therefore, suspended to a large degree importations and stimulated all domestic industrial activities, or in other words, acted to produce the same results as a protective tariff would produce, and mark this specially, as it is of the utmost importance, prosperity was obtained under adverse Democratic laws by changing the conditions to those conditions that would have been produced under a protective tariff.* *So we had for four years war prosperity, and—mark you this again most carefully—when the war was over and conditions similar to those of a protective tariff were removed, we returned again (as previous to the war) to extreme adversity and the very greatest kind of depression, with between 5,000,000 and 6,000,000 out of employment.* *Is it possible to obtain any more definite or convincing proof than this, of the benefits or detriments of the two systems? Certainly no development in any considerable degree in this last Democratic (the present) period.* *The cure again, as in the past four other Democratic periods of depression, will be Republican tariff and other constructive Republican legislation.*
			Emergency tariff act of May 27, 1921.	Republican protective tariff relating to farm products only.
			June, 1922, Fordney-McCumber tariff bill now (June, 1922) before the U. S. Senate.	Republican tariff created on the theory of protection to American industry and workmen. Expected to furnish employment for our millions of present unemployed.

NOTE B.—Owing to a split in the Republican Party the election of November, 1912, put the Democratic Party in full control of the executive and legislative functions of our Government, and shortly after, March 4, 1913, President Wilson called a special session of Congress to consider the framing of a new tariff bill. When Congress convened and the general public obtained an inkling of the character of the tariff bill that would be enacted, immediately thereafter, like a biting frost over night, the business of this country in all lines of industry restricted itself by every means possible and the high-water mark of prosperity in industry commenced rapidly to recede, resulting in constantly increasing curtailment of business, closing of factories, and loss of employment for labor. Finally, on October 3, 1913, the Underwood-Simmons tariff bill was passed. Now at last the country knew that all the Democratic platform and campaign promises not to disturb labor, legitimate business, or industry were simply fakes and evidently made to be broken, because here was a bill, now an actual law, granting to foreigners by far the lowest duty rates ever heard of in the United States. In fact, the lowest duties of any civilized country in the world.

The periods of depression and panic are shown in italics in the foregoing table. You will have seen that these periods of depression, disaster, and panic are coincident with the periods of "low tariff" or "tariff for revenue only," and that they run consistently from 1789, when our Government was formed, to the present time, except for the time thereof that their normal operations were interrupted by foreign wars.

SINCE THE FORMATION OF OUR GOVERNMENT IN 1789 WE HAVE HAD FIVE PERIODS OF PROTECTIVE TARIFF AND FIVE PERIODS OF LOW TARIFF.

Tariff Table "T–4" shows that since the formation of our Government in 1789 we have had five periods—periods 1, 2, 3, 4, and 5—working under protective-tariff duty rates extending over 87 years of time, and that we have had five periods—

periods A, B, C, E, and F—working under "low-tariff" or "tariff-for-revenue-only" duty rates, extending over 46 years of time; so that the 133 years, since 1789 to 1922, have been divided into 87 years operating under protective-tariff duty rates and 46 years operating under "low-tariff" or "tariff-for-revenue-only" duty rates.

The historical evidence for periods A, B, C, E, and F of 108 years—1816 to 1922—overwhelmingly proves that "low tariff" or "tariff for revenue only" *whenever indulged in, has always brought distress, ruin, and agony to our industries, our workers, and directly or indirectly to all our people*, and in further proof that the Republican policy of protection is the correct and upbuilding policy for the United States. During two of these five Democratic periods of great depression the detrimental Democratic conditions were set aside temporarily, on account of *foreign wars acting to create conditions similar to protective tariff*, viz, restriction of articles of imports and large domestic industrial activity, and during the temporary change from Democratic to Republican conditions the country was successful with industry active and labor well employed. When, however, the wars ended and we returned to normal conditions—suspended during the wars—*Democratic adversity immediately reappeared in full measure.* A better proof of the two systems could not possibly be obtained.

OUR DEVELOPMENT AND PERIODS OF ADVERSITY AND PROSPERITY.

Absolutely no one can gainsay that our country has made wonderful and marvelous development since Benjamin Franklin's day (1796) to to-day. Certainly that does not have to be proven, and some system and some laws are in a great measure responsible for this tremendous development.

How much, therefore, of this marvelous development has been achieved under the 46 years of low-tariff rates and how much under the 87 years of protective-tariff rates?

RESULTS OF 46 YEARS OF "LOW TARIFF" OR "TARIFF FOR REVENUE ONLY."

Democratic Presidents and prominent Democrats have answered the query relative to the 46 years of low-tariff rates.

Woodrow Wilson (then professor) in his history of the American Republic, speaking relative to period "A" (1816 to 1824):

"It was manifestly injurious to every young industry that a flood of English imports should continue to pour into the country at the open ports."

The Democratic President, Buchanan, in his annual addresses to Congress of 1858 and 1860, speaking relative to period "C":

"With all the elements of national wealth in abundance our manufactures were suspended, our useful public and private enterprises were arrested, and thousands of laborers were deprived of employment and reduced to want. Universal distress prevailed among the commercial, manufacturing, and mechanical classes.

"Panic and distress of a fearful character prevailed throughout the land. Our laboring population is without employment, and consequently deprived of the means of earning their bread.

"*Indeed, all hope seems to heve deserted the minds of men.*"

It was stated by our statisticians that between 1846 and 1860 not a single new competitive industry was established in the United States.

Of the period "B" (1833 to 1840) it was recorded that "*the Government and the people became almost bankrupt. Idleness of labor existed everywhere and there was intense suffering among all classes of people.*"

So much for three of the five low-tariff-rate periods, viz:

"A," 1816 to 1824, 8 years.

"B," 1833 to 1840, 7 years.

"C," 1844 to 1860, 16 years.

Absolutely no industrial or other development during these three periods extending over 31 years.

The other two low-tariff-rate periods, viz:

"E," 1892 to 1896, 4 years,

"F," 1913 to 1922, 9 years,

are well within the memory of the present generation.

In the period of 1892 to 1896 ("E") we know that practically all industry was paralyzed, millions of honest workmen seeking work from Maine to California in vain. Coxey's army marching on to Washington with their placards—

"We don't want charity, *we want work.*"

With 50 per cent of the railroads and 30 per cent of the national banks in the hands of the receivers, *it goes without saying there was no industrial, agricultural, or any other development in those four dark years.*

Now, as to the last low-tariff period, 1913 to 1922 ("F"), history of the 1892–1896 period was repeating itself under the low tariff rates of the Underwood bill, passed October 3, 1913. In the winter of 1913 and 1914, as stated, it was estimated that over 4,000,000 were unemployed. Soup kitchens were opened in every large city. Unemployed workmen were sleeping in the city churches and in the morgue, and financial ruin and distress were on every hand.

Then came the great foreign war, the greatest the world has known, and involving practically all of Europe. The war made war prosperity and war developments. The war is now over, but we still have the low Democratic Underwood tariff rates (the lowest in the world) and we still have the old Democratic adversity.

Therefore as to the 46 years of operation of our country under low tariff rates the historical record thereof proves beyond a shadow of doubt that during the entire period (*except when the normal working of the low tariff rates were set aside through foreign wars*) there was ruin, distress, and financial agony on our industries, our agriculture, and our people, *and that during all of this 46-year period little contribution was made to our enormous industrial and other development.* Certainly not a record to be proud of!

RESULTS OF 87 YEARS OF PROTECTIVE TARIFF.

The 87-year periods of protective tariff rates *are almost entirely responsible* for (say, at least 95 per cent responsible) our marvelous development from the puny Nation of 1789 to the greatest, richest, and most important Nation on the face of the globe.

FOREIGN MONEY VALUES AND FOREIGN WAGES NOW INFINITELY LOWER THAN AT ANY TIME IN THE WORLD'S HISTORY.

Now, please take in another most important and controlling fact, the outcome of which is very far-reaching, viz: That these detrimental conditions have occurred when low tariff rates have been indulged in over these many years, but *during all that time the wages paid in the United States have been approximately two to two and one-half times the wages paid in the competing foreign countries.*

Now, through the cataclysm of the great foreign war and the resultant depreciation in foreign money values (exchange) the wages paid in the United States are six to ten times the wages paid in the competing foreign countries, and whereas low tariff duty rates have been consistently and distressingly detrimental to our workers, our farmers, and our country during the past 108 years, now, owing to the greater difference in the wages of foreign competing countries, they are many times more detrimental, and it is simply suicidal to even consider to-day low tariff duty rates. A few facts and figures will prove this beyond a shadow of doubt.

The following table, "B," shows the normal and the present value of the currency of the foreign countries:

TABLE B.

	Normal.	Present value.	Percentage of depreciation.
Germany (mark)	23.8 cents	⅓ cent	98
Austria (crown)	20.3 cents	0.01 cent	99
Italy (lira)	19.3 cents	5¼ cents	75
France (franc)	do	9½ cents	50
Belgium (franc)	do	8½ cents	50
Great Britain (pound)	$4.88	$4.50	7½
Japan (yen)	49.8 cents	47.8 cents	4
Russia (ruble)	51.46 cents	0.07 cent for 100 rubles.	99
Poland (mark)	23.8 cents	0.02 cent	99

To-day an ounce of gold pays the American worker for 17 hours of labor in the United States, as against 50.16 hours of labor in Great Britain, 95.5 hours of labor in Japan, 117.31 hours of labor in France, 117.31 hours of labor in Belgium, 201.55 hours of labor in Germany, 203 hours of labor in Russia, and 203 hours of labor in Poland.

And whereas "low tariff rates" and "tariff for revenue only" have been greatly detrimental all these years in the past, to-day the same are bound to be infinitely more detrimental. And how patriotic Democratic Senators, editors, and professors can to-day espouse the cause of low tariff is utterly inconceivable and seemingly beyond the analysis of reason.

For over 100 years low tariff rates have been greatly detrimental, and when the wages in the—

United States were twice what they were in England, now wages in the United States are three times higher.

United States were two and one-fourth times what they were in France, now wages in the United States are six times higher.

United States were two and one-half times what they were in Germany, now wages in the United States are ten times higher.

United States were two and one-half times what they were in Italy, now wages in the United States are eight times higher.

If the record of 108 years shows low tariff so detrimental to our country when our wages were on an average of about twice those of Europe, what would be the result if our Democratic Senators, editors, and professors had their way in retaining the Underwood tariff rates, when the average wages in the United States to-day are six to ten times more than those now paid by competing foreign countries?

It goes without saying that to maintain in the United States at this time low tariff rates out of all proportion to the present labor cost abroad would result in the greatest depression yet visited upon the American people.

The only hope of prosperity for the American people is through the pending Republican tariff bill now before the United States Senate.

Again, although very few people are aware of the fact, the duty rates that we are now operating under, viz:

OUR PRESENT DEMOCRATIC RATES (UNDERWOOD) ARE THE LOWEST IN THE WORLD.

The Democratic Underwood tariff rates (passed October 3, 1913) are the lowest duty rates of any country in the world.

The following are the average rates of duty collected for the 12 months ending December 31, 1920, under this Democratic tariff:

	Per cent.
January, 1920	6.12
February, 1920	5.81
March, 1920	6.78
April, 1920	5.81
May, 1920	6.86
June, 1920	6.46
July, 1920	5.96
August, 1920	6.00
September, 1920	7.02
October, 1920	7.72
November, 1920	7.08
December, 1920	7.52

or an average for the year of 6.49 per cent.

The average duties of the principal foreign countries are as follows:

	Average duty.	Probable rates to-day are—
	Per cent.	*Per cent.*
Great Britain, 1919-20	8.56	15
France, pre-war	8.55	25
Germany, April-December, 1919	15.66	25
Italy, pre-war	7.78	18

Think of it. The average rates of duties collected in the United States under the Democratic Underwood tariff are far lower than any civilized country in the world. The average duties in so-called "free-trade" England were, in 1919, 30 per cent higher than the United States (8.56 for England and 6.49 for the United States), and to-day England's rate will not be less than an average of 15 per cent, or double the Underwood rates of duties.

On the basis of $4 per day wages paid in the United States for a certain vocation, the wages paid at the present time in competing with foreign countries, due to depreciation in foreign money values (exchange), would be as follows:

Wage Table T-5.

Wages paid in the United States are following times higher than foreign countries—	Countries.	Per day.	Against wages paid in United States of per day.	Against wages paid in these foreign countries before the Great War.
10 times higher than Germany	Germany	43 cents	$4.00	$1.40
11 times higher than Austria	Austria	32 cents	4.00	1.40
8 times higher than Italy	Italy	65 cents	4.00	1.00
6 times higher than Belgium	Belgium	$1.00	4.00	1.50
6 times higher than France	France	$1.00	4.00	1.50
4½ times higher than Japan	Japan	75 cents	4.00	.60
2 to 3 times higher than England	England	$2	4.00	1.65
12 times higher than Russia	Russia	25 cents	4.00	1.25
12 times higher than Poland	Poland	25 cents	4.00	1.20

This table shows the vast difference now existing between the foreign and United States wages in comparison to what they were before the war.

If low tariff has been so detrimental in the past under a ratio of wages far more favorable to our workers, how infinitely more so must it be now.

Before the war wages in the United States were two and one-half times more than in Germany. Now in the United States they are nine times higher than in Germany.

HOW EUROPEAN NATIONS HAVE PROTECTED THEMSELVES AND THEIR LABOR.

England, France, Italy, Germany, etc., and our Democratic Senators, editors, and our importers are all clamoring to retain the present low Underwood tariff duty rates, but what have these countries done themselves to meet this war result of the lowest wages to labor in foreign countries known to Christendom?

Great Britain passed in 1920–21 what they style "safeguarding of the realm acts." These bills place a duty of 33⅓ per cent on over 6,000 articles; beside that they create a supreme board who shall investigate, and if they determine that *any article is being imported into Great Britain at less than cost of production in Great Britain, plus a reasonable profit*, this board can by proclamation place an additional duty of 33⅓ per cent (total of 66⅔ per cent) on any such article. Our "low tariff," "tariff for revenue only" friends used to point with great pride to "free-trade" Great Britain as the shining example of the desirability of their theory. Well, they can not longer do so. England has deserted them and turned strongly into a protectionist nation.

The cable news acquaints us with the English Premier's and Great Britain's great alarm.

[From New York Tribune, July 10, 1922.]

"LONDON, July 9.—Thursday night Lloyd-George issued a statement in which he said: 'Nobody contemplated the possibility of the German mark being 2,000 to the pound sterling, with a prospect of greater depreciation. It has started on a run, and nobody knows where it is going to end. I am alarmed at the prospects in Germany. Everything I hear tends to deepen the alarm I feel. It is a serious possibility with which we are confronted—that you may get the most highly industrialized country in Europe, excepting our own, organized, intelligent, enterprising, employing workmen at wages 40 to 50 per cent below our own, sending goods for competition throughout the world. We could not leave this country absolutely without defense against possibilities of that kind.'"

Our Democratic Senators and low-tariff advocates should mark well Lloyd-George's closing words:

"*We could not leave this country absolutely without defense against possibilities of that kind.*"

So Great Britain protects herself by her above-mentioned "*safeguarding of the realm acts*" imposing duties which may amount to a total of 66⅔ per cent on any article of foreign manufacture sold in Great Britain at less than its cost in Great Britain plus a reasonable profit. If that is not the Republican Party's protective-tariff system and principle, will some Democratic Senator or low-tariff advocate please tell us what it is?

So much for England's protection of her industries and workers from the present foreign pittance in wages.

What has France done to protect herself?

France has a sliding scale of duties to be applied to countries in accordance with their currency depreciation and consequently their wages.

For instance, when anything is shipped from the United States or any other country into France, it must be accompanied by a "certificate of identification." If such a certificate shows that a certain piece of metal was made in the United States the duty is 40 per cent; if produced in Germany or similar low value currency countries, the duty is 140 per cent.

If anyone has any doubts on this matter they can prove it by inquiry of the French consul at New York City.

Canada for duty purposes allows only a 50 per cent depreciation in exchange.

Italy and the other countries have also protected themselves.

It is rather inconsistent of them, also our Democratic Senators (we would expect it from our importers), to protect themselves and then ask us to throw open our customs ports by low duties (the Underwood rates average the lowest in the world) with foreign wages (the big element in cost of production) being to-day about one-fifth of what they were before the Great War.

Again, and most emphatically, too, the present Democratic Underwood tariff rates, under which we are to-day collecting our duties, are, as we have already proven (page 35), the lowest tariff rates of any country in the world, viz:

	Per cent.
Average rates, United States	6.49
Average rates, Great Britain, 1919–20	8.56
Since 1919–20 the British "safeguarding of the realm acts" have about doubled their previous duties, so that the average customs duty collected in Great Britain to-day is approximately	15

Or, in other words, 150 per cent (one and one-half times) more than the United States duties collected under the present Democratic Underwood tariff bill.

In all sincerity we ask our low tariff advocates, Do facts not count with them? Have they lost all ability to analyze according to facts as they actually exist?

Emphatically, and positively, this is the one period in the history of the world when low tariff can not be indulged in without subjecting our people and our country to the greatest agony, distress, and financial ruin ever visited upon any free people, and if our Democratic Senators, newspapers, and other low tariff advocates can not see the unmistakable evidence of the storm that will rage if an adequate tariff bill is not passed, when already the thunderings are rumbling and lightnings are seen playing all over the world, with so-called "free trade" England protecting herself with duties of 66⅔ per cent, and now looking for other means for further protection, and other countries doing likewise—then they do not deserve to further represent the American people, because, under such circumstances, it is not proper representation, but simply misrepresentation.

TARIFF AND ITS RELATION TO WAGES AND COST OF PRODUCTION.

This whole question of tariff is to the minds of many surrounded by much mystery, but on analysis it is perfectly simple. It is simply a question of foreign wages and cost of production abroad, as against domestic wages and cost of production in the United States.

For clearness of understanding we will divide the subject into two classes:

Class A. Instrumentalities (services or articles) that *can not* be transported from abroad.

Class B. Instrumentalities (services or articles) that *can* be transported from abroad, such as any article of commerce.

About one-third (33⅓ per cent) of our vocations in the United States come under the nontransportable class A.

And about two-thirds (66⅔ per cent) come under the transportable class B.

The builders, masons, bricklayers, carpenters, and our professional classes—lawyers, doctors, professors, teachers, and so forth—come under class A. Most of our lawyers, professors, and professional classes lean toward low tariff or the theory of free trade (particularly directly after coming out of college and being imbued with the erroneous teachings of college professors as to the benefits of low tariffs), they thinking they should buy their wants in the lowest markets of the world as they have no protection in their vocation. There is where they are greatly mistaken. They have the greatest kind of protection from foreign labor, viz, that of prohibition, the extremest of all protection. For instance, a builder (mason, bricklayer, carpenter, and so forth) can not build a house in Germany to be occupied by a family in New York City. A lawyer can not try a case in France to be decided by a judge in Boston. Nor can a doctor prescribe in England for a patient living in Philadelphia. So, instead of not being protected they are protected entirely from foreign competition by the most complete of all protection, viz, prohibition, and it would be well for our lawyers and professional men to realize in the future that they are not at all exempt from the benefits of protection directly and that they are infinitely benefited by it indirectly.

Now as to transportable articles, which we class as B:

The rates of freight on these transportable articles are no higher than the railroad freight from our more inland cities, so in that regard they stand alike.

You have seen that wages that were before the war in Germany $1.40 per day are to-day (due mainly to depreciation in their currency) 43 cents per day and that in most other foreign countries the wages are also to-day much lower than before the Great War.

Death, to a healthy man, seems a long way off, and so do these pittances of wages abroad seem a long way off, but we are all paid, whether in America, Germany, France, England, abroad, or anywhere, not for working, but for producing some article, some product, whether of hand or brain.

If our workmen knew that 100,000 men of the utmost skill in their vocation were going to land shortly in America under contract to work for 43 cents per day, or 50 cents per day, they certainly would be beside themselves with indignation and determination to prevent such a disastrous occurrence at any cost.

Yet labor is paid for producing something, some produce, some article, not for working as work, and in all seriousness, therefore, what is the difference (unless there is some compensatory duty to pay for entry into *the United States*) *between 100,000 expert men coming here to work for 40 to 50 cents per day, or millions of expert men working abroad producing the same article, for sale in the United States, on exactly that basis.* There is absolutely no difference, and that is all there is to this seeming mystery of tariff duties. It is cost of foreign production, made up principally by foreign wages and overhead cost, as against domestic wages and domestic overhead cost.

LOW TARIFF PERIODS AND RATIO OF FOREIGN AND DOMESTIC WAGES.

No one can gainsay the fact that during the period of 46 years of this country's operation under "low tariff" or "tariff for revenue only" there was distress, agony, and financial ruin on the country and our people, excepting for a few years when the normal operation of existing laws was suspended by the changed conditions brought about by war.

Furthermore, that none of this long period of 46 years contributed, in any marked degree, to our country's marvelous and unique development.

No one can gainsay—due mainly through the results of the Great War in depreciation of foreign moneys—that to-day wages in the United States are three, four, six, and ten times more than in competing foreign countries as against two to two and one-half times more before the Great War.

In view of such facts, to have anyone advocate the continuance of the present Underwood duty rates—the lowest in the world—or any system of low tariff duty rates *would seem almost traitorous.*

PROGRESS OF 87 YEARS OF PROTECTION AND FUNDAMENTAL SECURITY OF OUR NATION.

Again, the following two great significant facts should rivet every citizen's most profound attention, viz, that the marvelous development and achievement of this, to-day the greatest of all countries, has been mainly accomplished during five periods of protective tariff laws, extending over 87 years of our country's 133 years of existence, and that *security of this Nation is required for the safety of the world, and that—*

"Not only the wealth and independence but the very fundamental security of a nation is only obtainable through diversity of manufacturing within her own borders."

After reading this true historical account of 133 years (1789 to 1922) *recording the disaster and adversity to our country and people during each and every low tariff period, and the prosperity of protective tariff periods; and after knowing that the wages paid in the United States during all of these periods were two to two and one-half times more than in the competing foreign countries, and also knowing that the wages paid in the United States to-day are six, eight, and ten times more than now paid by competing foreign countries, surely no one can in his sane senses conscientiously advocate, under the present extraordinary circumstances, low tariff duties.*

Duplicate copies of this tariff statement can be obtained on request from

FREDERIC E. KIP,
Montclair, N. J.

JULY 4, 1922.

The PRESIDENT pro tempore. The Secretary will read the list of amendments which have been reserved for a separate vote in the Senate.

Mr. McCUMBER. Mr. President, before the list is read I suggest the absence of a quorum.

The PRESIDENT pro tempore. The Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Ashurst	Fletcher	McCumber	Shortridge
Ball	Frelinghuysen	McKellar	Simmons
Borah	Gerry	McLean	Smith
Brandegee	Glass	McNary	Smoot
Broussard	Gooding	Moses	Stanley
Bursum	Hale	New	Sterling
Calder	Harreld	Newberry	Sutherland
Cameron	Harrison	Nicholson	Swanson
Capper	Heflin	Norbeck	Trammell
Colt	Hitchcock	Oddie	Underwood
Culberson	Jones, N. Mex.	Overman	Walsh, Mass.
Cummins	Jones, Wash.	Pepper	Walsh, Mont.
Curtis	Kellogg	Phipps	Warren
Dial	Kendrick	Pomerene	Watson, Ga.
Dillingham	Keyes	Ransdell	Watson, Ind.
du Pont	Lenroot	Reed, Pa.	
Edge	Lodge	Robinson	
Ernst	McCormick	Sheppard	

Mr. CURTIS. I desire to announce that the Senator from Minnesota [Mr. NELSON] is absent on account of a death in his family.

I also wish to announce that the junior Senator from Ohio [Mr. WILLIS] is necessarily absent because of serious illness in his family.

Mr. UNDERWOOD. I wish to announce that the Senator from Nevada [Mr. PITTMAN] is necessarily absent on account of illness.

The PRESIDENT pro tempore. Sixty-nine Senators have answered to their names. There is a quorum present.

The Secretary will read the list of reserved amendments.

The ASSISTANT SECRETARY. Reading the list of reservations by pages and paragraphs as they appear in the bill, those noted are as follows:

Pages 10, 11, and 15, in paragraph 25, the five amendments offered by Mr. BURSUM on synthetic chemicals and explosives; reserved by Mr. MOSES.

Page 29, line 13, in paragraph 78, the nitrite amendment; reserved by Mr. ROBINSON.

Page 33, paragraph 204 (a), crude magnesite; reserved by Mr. CALDER and Mr. JONES of New Mexico.

Page 36, paragraph 213, china, porcelain, etc.; reserved by Mr. JONES of New Mexico and Mr. CALDER.

Page 39, paragraph 218, bottles and articles of glass; reserved by Mr. JONES of New Mexico.

Page 40, line 24, in paragraph 218, rates of illuminating articles; reserved by Mr. SUTHERLAND.

Page 42, line 10, in paragraph 219, rate on cylinder, crown, and sheet glass; reserved by Mr. JONES of New Mexico.

Page 53, paragraph 305, line 12, the amendment relative to steel alloys; reserved by Mr. CALDER.

Page 66, paragraph 337, card clothing; reserved by Mr. JONES of New Mexico.

Page 67, line 19, in paragraph 339, tableware, rates on, composed of iron or steel and enameled or glazed with vitreous glasses; reserved by Mr. SUTHERLAND.

Page 67, paragraph 339, rates on aluminum tableware; reserved by Mr. JONES of New Mexico.

Page 83, paragraph 371, bicycles, etc.; reserved by Mr. CALDER.

Page 83, paragraph 372, beginning with line 24, textiles and machinery; reserved by Mr. JONES of New Mexico.

Page 86, paragraph 382, woven fabrics, with metal threads; reserved by Mr. JONES of New Mexico.

Page 93, paragraph 408, shingles; reserved by Mr. JONES of Washington.

Page 95, paragraph 501, line 17, sugar schedule and rates on sugar; reserved by Mr. HARRISON.

Page 107, line 24, paragraph 743, citrus fruits; reserved by Mr. TRAMMELL.

Page 114, paragraph 776, chocolate and cocoa; reserved by Mr. CALDER.

Page 134, paragraph 1007, hose, suitable for conducting liquids or gases; reserved by Mr. LODGE.

Page 146, paragraph 1109, woven fabrics, etc.; reserved by Mr. LENROOT.

Page 156, paragraph 1205, silk fabrics; reserved by Mr. JONES of New Mexico.

Page 161, paragraph 1206, silk plushes and pile fabrics; reserved by Mr. JONES of New Mexico.

Page 163, paragraph 1207, silk ribbons, etc.; reserved by Mr. JONES of New Mexico.

Page 165, paragraph 1215, artificial silk waste, etc.; reserved by both Mr. PEPPER and Mr. CALDER—Mr. PEPPER on the fourth line from the end of the paragraph, the amendment of the committee.

Page 175, paragraph 1309, jacquard designs on ruled paper; reserved by Mr. JONES of New Mexico and Mr. CALDER.

Page 181, paragraph 1406, lines 18 and 19, straw hats; reserved by Mr. CALDER.

Page 193, paragraph 1430, laces and embroideries; reserved by Mr. JONES of New Mexico.

Page 195, line 14, in paragraph 1431, leather; reserved by Mr. CALDER.

Page 199, line 15, in paragraph 1438, ivory tusks, etc.; reserved by Mr. CALDER.

Page 201, paragraph 1444, rosaries, chaplets, etc.; reserved by Mr. REED of Missouri.

Page 236, a new paragraph, 1671a, relative to free importation of tomatoes during certain months; reserved by Mr. TRAMMELL and Mr. FLETCHER.

Page 238, paragraph 1683, logs, etc.; reserved by Mr. JONES of Washington.

Page 267, line 16 to line 20, in section 312, bonded smelting warehouses; reserved by Mr. JONES of New Mexico.

Page 272, and following, sections 315, 316, and 317, the executive powers; reserved by Mr. OVERMAN.

Page 286, section 321, embargo on dyes, reserved by several Senators.

Mr. McCUMBER. Mr. President, if the Secretary has concluded the reading of the list of reserved amendments——

The PRESIDENT pro tempore. Allow the Chair to make one observation before recognizing the Senator from North Dakota. This is the proper time and the last opportunity for reservations for separate votes upon amendments agreed to as in Committee of the Whole; and if any Senator desires to make a reservation which is not found upon the list which the Secretary has read, this is the time to do it.

Mr. McCUMBER, Mr. TRAMMELL, and Mr. HARRISON addressed the Chair.

The PRESIDENT pro tempore. The Senator from North Dakota.

Mr. McCUMBER. I desire to add to the reservations of amendments which have been read by the Secretary the following reservation:

On page 3, line 7, where the motion to strike out the word "paracetaldehyde" and to insert in lieu thereof the words "and paracetaldehyde, 20 per cent ad valorem," was agreed to.

Mr. McLEAN. Mr. President, on page 198, paragraph 1435a, I wish to reserve a separate vote on the following amendments:

Line 2, to strike out the words "valued at more than $40 each"; and in line 1 to strike out the words "valued at more than $70 each."

Mr. JONES of Washington. On page 91, paragraph 402, there is a portion of the amendment which the Secretary has read as having been reserved by me. That is the paragraph relating to logs, which was stricken out and transferred to the free list. The Secretary only indicated the item in the free list. I also wish to reserve the item which was stricken out on page 91, paragraph 402.

Mr. LENROOT. Mr. President, if a reservation has not already been made of the amendments of the committee on page 29, lines 8 and 9, I wish to make the reservation.

Mr. BRANDEGEE. Mr. President, I do not know whether all the Senators who are now present were here last night, but I wish to call the attention of Senators, in connection with the reservations for separate votes that are being requested, to page 11515 of the RECORD of August 17, where the following appears:

Mr. LENROOT. Then, Mr. President, I ask unanimous consent that while the bill is in the Senate, if any Senator desires to offer an amendment to a committee amendment which has been concurred in en bloc, unanimous consent shall be given for reconsideration for that purpose only.

Mr. McCUMBER. I do not object to that.

The PRESIDENT pro tempore. Is there objection to the request of the Senator from Wisconsin? The Chair hears none, and it is so ordered.

So that, as it seems to me, if I may say so, in the way of a parliamentary inquiry, after all the committee amendments have been agreed to en bloc, the Senate has already given unanimous consent that the vote by which any one of those amendments was concurred in may be reconsidered and amendments be offered to it and voted upon.

Mr. LENROOT. For the purpose only of offering amendments.

Mr. BRANDEGEE. I say it may be reconsidered and amendments may be offered to the amendment, and the amendment which is offered may be voted upon; which is equivalent to a separate vote in the Senate, so far as the proposition of amending the amendment is concerned.

The PRESIDENT pro tempore. The observation of the Chair to which the Senator from Connecticut [Mr. BRANDEGEE] has referred is a little too broad. The unanimous-consent agreement does not cover the whole situation.

Mr. McCUMBER. Mr. President, I was going to suggest at the proper time a unanimous-consent agreement that we pass upon all of the reserved amendments before we concur in the amendments en bloc. That will very materially assist in facilitating the business of the Senate, and will obviate the necessity of a request for a reconsideration of the vote by which each paragraph was agreed to. I also desire to couple with that request for unanimous consent an additional request for unanimous consent that whenever a paragraph is reserved for a separate vote in the Senate any amendment to that paragraph may then be considered and the paragraph be disposed of.

Mr. SMITH. Mr. President, on page 193, paragraph 1430, I reserve the amendment which I will send to the desk and have read when the opportunity presents itself for me to offer it.

Mr. ASHURST. Mr. President, on page 120, line 19, I desire to reserve a separate vote on the amendment I have heretofore offered and which has been voted upon, striking out the numeral "7" and inserting the numeral "10."

The PRESIDENT pro tempore. The amendments being reserved are those which were agreed to as in Committee of the Whole.

Mr. ASHURST. I thank the Chair. I will reserve the amendment which I have indicated for a separate vote.

The PRESIDENT pro tempore. An amendment that may be proposed is not material at this time.

Mr. WALSH of Massachusetts. I should like to reserve for a separate vote in the Senate paragraph 1102, placing a duty upon certain wools.

Mr. JONES of New Mexico. Mr. President, a parliamentary inquiry. The Senate as in Committee of the Whole adopted a new section relating to the Tariff Commission. As in Committee of the Whole I offered a substitute for that provision, which was not adopted. My inquiry is, Is it necessary to reserve a separate vote upon that section in order to secure another vote upon the subject?

The PRESIDENT pro tempore. The Chair understands that the amendment offered by the Senator from New Mexico was not agreed to?

Mr. JONES of New Mexico. It was not.

The PRESIDENT pro tempore. Then, it is not necessary to reserve it.

Mr. FLETCHER. Mr. President, at the time we were considering paragraph 333, relating to the duty on horseshoes, it was passed over. I was not present later when it was considered, and I do not know just what shape it is now in; but I reserve a vote on paragraph 333, page 66.

Mr. SHORTRIDGE. Mr. President, I desire to reserve for a separate vote in the Senate the item in respect to citrate of lime, the House having fixed a certain rate, the committee reporting a certain rate. We asked to have it increased and the Senate as in Committee of the Whole passed upon the matter.

The PRESIDENT pro tempore. On what page and paragraph?

Mr. SHORTRIDGE. On page 20, paragraph 46.

The PRESIDENT pro tempore. Does the Senator from North Dakota desire to present his request for unanimous consent?

Mr. McCUMBER. I ask unanimous consent that the reserved amendments, and so forth, may be disposed of before the unreserved amendments are adopted en bloc, and that during the time when reserved amendments are under consideration the paragraph to which any such amendment may relate may be subject to any amendment which may be offered.

The PRESIDENT pro tempore. The Chair prefers that the request be reduced to writing so that there may be no misunderstanding about it as we proceed with the disposition of these amendments.

Mr. McCUMBER. I have just stated the request, and I think it can be read as I have given it.

Mr. LODGE. Mr. President, in connection with the request for unanimous consent which is asked——

Mr. WATSON of Georgia. Mr. President, we are being asked to agree to enter into a unanimous-consent agreement which we can not hear. We should like to hear distinctly what it is we are asked to consent to unanimously.

Mr. McCUMBER. I can state the request to the Senate, if I may have order while I am doing so. We entered into a unanimous-consent agreement yesterday evening that any unreserved amendments might be amended, although they were adopted in block. Now, to avoid the reconsideration of any one of that block of amendments in order to offer an amendment, I asked unanimous consent that we might consider these reserved amendments and that at the same time we considered those reserved amendments the paragraph to which the amendment relates might be subject to such further amendment as might be offered. We could then dispose of the paragraph at one time, without going back to it again after we have adopted or rejected the reserved amendment and then subjecting the same paragraph to other amendments. The purpose of this simply was to facilitate the disposition of each one of these amendments.

Mr. LENROOT, Mr. LODGE, and Mr. BRANDEGEE addressed the Chair.

The PRESIDENT pro tempore. Does the Senator from North Dakota yield; and if so, to whom?

Mr. McCUMBER. I yield to the Senator from Wisconsin.

Mr. LENROOT. I should just like to suggest that that would be entirely agreeable provided we could dispose of all the committee amendments by 4 o'clock to-morrow; but if that agreement were made and individual amendments were offered to each paragraph we might reach 4 o'clock to-morrow without the committee amendments being disposed of.

Mr. LODGE. Precisely. I was about to make that point myself.

Mr. McCUMBER. Very well. We can meet that, then, by simply having a unanimous-consent agreement that we shall first consider the reserved amendments in the order in which they have been taken down by the Secretary and read to the Senate.

Mr. LODGE. Mr. President, under the rules of the Senate the amendments to be agreed to in block, unless I am mistaken, must be put first. After the reservations are made, the practice is to put the question on those that are not reserved, and to which it is assumed there is no objection. The trouble with this, it seems to me, is that we may find ourselves to-morrow with the hour of 4 o'clock striking—for evidently there are many amendments and many reservations—and we shall have to vote on the bill without the Senate having agreed to the great mass of unobjected amendments. I think that is a great risk to take.

The PRESIDENT pro tempore. The Senator from Massachusetts has stated the rule correctly.

Mr. McCUMBER. That is certainly correct.

The PRESIDENT pro tempore. It provides that the first question after a bill passes into the Senate shall be, Will the Senate concur in the amendments which have been made as in the Committee of the Whole?

Mr. McCUMBER. Of course, Mr. President; but that can be changed by a unanimous-consent agreement.

The PRESIDENT pro tempore. The Chair is inclined to think it can be changed by unanimous consent.

Mr. LODGE. I think it can, but that is just what I object to. I think we run the risk of finding ourselves voting on the bill without any amendments agreed to except the few that may be agreed to in the next 24 hours.

Mr. McCUMBER. If the Senator objects to it, of course the only difference will be that possibly we will have to reconsider very many of these amendments which we agreed to in block.

Mr. LENROOT. But it will not be necessary to put that question, because we already have unanimous consent to reconsider in those cases.

Mr. McCUMBER. Yes. Very well; I will withdraw the request, Mr. President.

The PRESIDENT pro tempore. The request is withdrawn. The question is upon concurring in the Senate in the amendments which have been agreed to as in Committee of the Whole, with the exception of those amendments which have been reserved for a separate vote.

The amendments made as in Committee of the Whole, not reserved, were concurred in.

The PRESIDENT pro tempore. The Secretary will read the first amendment so reserved.

Mr. UNDERWOOD. The understanding, Mr. President, is that the amendments will come up now in the order in which they were reserved?

The PRESIDENT pro tempore. Unless the Senate otherwise directs, they will be presented in the order in which they are found in the bill.

Mr. UNDERWOOD. In the order in which they are found in the bill? I just wanted to know what the rule was.

The PRESIDENT pro tempore. The Chair does not know of any rule in regard to that.

Mr. UNDERWOOD. I mean, I wanted to know the holding of the Chair so that there may not be confusion. I have no interest in the matter, but I should like to know the order in which they are to come up. They can either come up in the order in which they have been reserved and are on this paper that was read or they can come up in the order in which they are found in the bill. I ask the Chair which order he intends to observe?

The PRESIDENT pro tempore. The Chair understands that the Secretary will read them in the order in which they are found in the bill.

Mr. UNDERWOOD. Then, I ask unanimous consent that it may be understood that the reserved amendments shall be taken up in the order in which they are found in the bill.

The PRESIDENT pro tempore. Is there objection?

Mr. SIMMONS. Mr. President, I understood that a list had been made of all the reserved amendments.

Mr. LODGE. It has, and it has been read.

Mr. SIMMONS. Why would it not be better, then, to take up the amendments in the order in which they appear upon that list?

Mr. LODGE. As I understand, that is just what the Senator from Alabama asks for. The list was made on the basis of the bill.

Mr. UNDERWOOD. I just wanted a permanent order. I do not care which way it is made, but I wanted a permanent order made so that we can know what we are doing; that is all.

Mr. BRANDEGEE. Mr. President, was the list of the reserved amendments, as read by the Secretary, a list in the order in which they occur in the bill?

The PRESIDENT pro tempore. It is.

Mr. BRANDEGEE. Very well. Then, it is immaterial which order is made. I ask unanimous consent that the reserved amendments may be considered in the order in which they appear in the list read by the Secretary.

Mr. UNDERWOOD. That is the same thing.

The PRESIDENT pro tempore. The Secretary read them in the order in which they are found in the bill.

Mr. BRANDEGEE. That is the reason why I am in favor of it.

Mr. McCUMBER. But after the Secretary read those, there were quite a number of others found; and I do not know whether they were put on in the regular order or not.

The PRESIDENT pro tempore. They were put upon the list in the order in which they are found in the bill.

Mr. McCUMBER. Very well; that covers it.

Mr. McCORMICK. Mr. President, do I understand that an amendment not formally reserved may not be considered in the Senate?

The PRESIDENT pro tempore. An amendment that was agreed to in Committee of the Whole and not reserved will be subject to the——

Mr. McCORMICK. No; an amendment which was not agreed to in Committee of the Whole.

Mr. LODGE. It will have to be reoffered.

The PRESIDENT pro tempore. An amendment which was not agreed to is as open as an amendment can be. It can be offered at any time when the bill is in the Senate.

Mr. McCORMICK. I just wanted to be sure.

The PRESIDENT pro tempore. The Secretary will read the first amendment reserved.

Mr. UNDERWOOD. Mr. President, I should like to know whether that unanimous-consent agreement was made—not that it is material, except that I think we should have an orderly procedure and stand by it. Has it been agreed that these amendments shall be read as they appear on this list?

The PRESIDENT pro tempore. The Chair heard no objection to the request for unanimous consent preferred by the Senator from Alabama, and it is so ordered.

The ASSISTANT SECRETARY. On page 3, line 7, the Senator from North Dakota [Mr. McCUMBER] reserved the amendment by which the Senate, as in Committee of the Whole, struck out the word "paracetaldehyde" and inserted the words "and paracetaldehyde, 20 per cent ad valorem" and a semicolon.

The PRESIDENT pro tempore. The question is upon concurring in the amendment made as in Committee of the Whole.

Mr. McCUMBER. Mr. President, I wish to state briefly what occurred yesterday when this amendment was offered:

Mr. FRANCE. I offer an amendment which I send to the desk.

The PRESIDENT pro tempore. The Secretary will state the amendment.

The ASSISTANT SECRETARY. On page 3, line 7, to strike out the word "paracetaldehyde" and to insert in lieu thereof the words "and paracetaldehyde, 20 per cent ad valorem."

Mr. FRANCE. This merely slightly reduces the duty on some chemicals not manufactured in this country. I believe the chairman of the committee has no objection to the amendment, and I hope it may be adopted.

Mr. President, I think the Senator from Maryland was mistaken when he said that these were chemicals not manufactured in this country. They are synthetic chemicals, coal-tar products, and I think should bear the same rate of duty that other coal-tar products bear. In addition to that, Mr. President, I understand that there is a great deal of capital invested to-day in the manufacture of this product in the United States, and that this amendment will seriously handicap, if not destroy, the business in this country. Therefore I ask that that amendment be not concurred in.

The PRESIDENT pro tempore. The question is upon concurring in the amendment made as in Committee of the Whole.

The amendment was nonconcurred in.

The PRESIDENT pro tempore. The Secretary will state the next amendment reserved.

The ASSISTANT SECRETARY. On pages 10, 11, and 15, five amendments offered by the Senator from New Mexico [Mr. BURSUM] to synthetitc chemicals and explosives were considered as one amendment.

The first of those amendments, in paragraph 25, page 10, strikes out in line 17 "50 per cent ad valorem and 7 cents per pound" and inserts in lieu thereof the following words:

Seventy-five per cent ad valorem based upon American selling price (as defined in division (f) of section 402, Title IV) of any similar competitive article manufactured or produced in the United States, and 10½ cents per pound. If there be no similar competitive article manufactured or produced in the United States, then the ad valorem rate shall be based upon the foreign value or the export value, whichever is the higher, as defined in paragraphs (a), (b), and (c) of section 402, Title IV. For the purposes of this paragraph any coal-tar products provided for in this act shall be considered similar to or competitive with any imported coal-tar product which accomplishes results substantially equal to those accomplished by the domestic product when used in substantially the same manner: *Provided*, That no duty imposed under this paragraph shall be increased under the provisions of section 315.

The PRESIDENT pro tempore. In the Committee of the Whole the five amendments proposed by the Senator from New Mexico were considered as one amendment, and they will be so considered in the Senate.

Mr. MOSES. Mr. President, when this action was taken in the Committee of the Whole last night I reserved a separate vote on the amendment in the Senate. The Senate, however, by such a decisive majority decided in favor of the rates contained in the amendment offered by the Senator from New Mexico that I have no desire to detain the Senate and waste its time, in view of the limited number of hours at our disposal. I therefore shall not press the right to a separate vote which I asked for last night.

Mr. LODGE. Mr. President, for information, the amendment read by the Secretary——

Mr. SIMMONS. Mr. President, there is so much confusion in the Chamber that I can not hear a word the Senator is saying.

Mr. LODGE. I will try to make the Senator hear.

Mr. SIMMONS. I know the Senator is trying to make me hear, but the Senate will not permit me to hear.

Mr. LODGE. They do not permit it, but I will try to penetrate the noise if I can. I asked whether the amendment offered by the Senator from New Mexico last night and adopted by a decisive majority in regard to the duty on dyes is not practically the same as the one which has just been read as a reservation?

Mr. MOSES. It is the one.

Mr. LODGE. That is what I supposed. Then why should we waste our time over it now?

The PRESIDENT pro tempore. It was reserved for a separate vote, and it must be voted on at this time.

Mr. LODGE. I understand.

Mr. SMOOT. Mr. President, I do not believe Senators know in detail what their vote meant yesterday. If this amendment is adopted it means that every dye and chemical the product of coal tar coming into this country shall pay 90 per cent ad valorem and 10½ cents per pound specific. Do Senators realize what burden they are placing upon the users of these dyes and chemicals?

Mr. BURSUM. Mr. President, I know the Senator does not desire to mislead us in this matter, but on the dyes which are not manufactured here and which we are obliged to bring in from the outside the foreign valuation applies, so that the duty is less, of course.

Mr. SMOOT. Mr. President, the duty is not less. The duty is only less as far as the transfer from the American to the foreign valuation is concerned, but the duty is still 90 per cent ad valorem and 10½ cents a pound.

Mr. BURSUM. But 90 per cent on the American and 90 per cent on the foreign valuation are entirely different propositions.

Mr. SMOOT. It is an embargo a thousand times over, and worse than an embargo.

This means that every coal-tar product which is not made in the United States will bear a rate of duty of 90 per cent ad valorem and 10½ cents per pound. In other words, in most of the cases of goods coming into this country they would have to pay a rate of duty so high that it is a crime to impose it.

Mr. FRELINGHUYSEN. Will the Senator support an embargo, if this provision is defeated?

Mr. SMOOT. I say that I would rather a thousand times have an embargo than this provision, and so would the Senator from New Jersey. If the Senator from New Jersey will tell the Senate what he really believes, he will say that he would rather have the embargo than this provision; and he wants to protect this industry, and so do I. But this means that no matter whether a similar product is made in this country or not, there is to be a duty of 90 per cent on importations and 10½ cents specific. If the item costs 10½ cents a pound, then the specific duty is 100 per cent, and the ad valorem duty is 90 per cent besides. Why load the American user with that kind of a burden?

Mr. SIMMONS. Mr. President, will the Senator yield?

Mr. SMOOT. I have only a few moments.

Mr. SIMMONS. I just want to ask a question. What will be the aggregate increase over the duties in the bill if we raise the rate to 90 per cent ad valorem and 10½ cents specific, and then adopt the American valuation?

Mr. SMOOT. Of course, if we adopt American valuation, none of the articles can come into this country, even if they are given away, without paying to the importer a certain amount of money. In answer to the other question of the Senator, I will say that it is a 50 per cent raise over and above the rates put in the bill, which I supported.

Mr. SIMMONS. Changing from the American to the foreign valuation would probably double the rate, or more than double it?

Mr. SMOOT. It would more than double it as to these items. I want to say to the Senator from New Jersey that rather than have this outrageous thing put into law I would prefer to vote for the limited embargo. I will say further to the Senator from New Jersey that no human being can defend this before the American people. It is impossible of successful defense.

Mr. McCUMBER. Mr. President, the embargo provision was defeated by a vote in the Committee of the Whole some time ago. The Committee on Finance reported in favor of an embargo. I agree entirely with the Senator from Utah that this will be a complete embargo. That is why I shall vote for it.

Mr. FRELINGHUYSEN. Mr. President, I offered the amendment to the bill providing for an embargo of one year, with a further provision allowing the President, if it was necessary, to extend it for another year. That was defeated in the Committee of the Whole.

I had an amendment prepared to offer in the Senate. I am not convinced that the Senate is willing to vote for an em-

bargo. I believe that this industry needs all of the protection which can be given in this bill, and therefore I am in favor of the rates imposed in the Bursum amendment, because I want to see the industry preserved in this country. I am willing to take my chances that some of these rates are too high, and stand for a readjustment under the presidential power; but my primary interest in this amendment is that it protects the industry beyond the original provision for rates in this bill.

When you realize that England has provided a subsidy of $50,000,000 to encourage an independent dye industry, and embargoes against other countries; when you realize that Italy has an embargo; that Japan guarantees 8 per cent return and profit to every dye industry established within her country; when you realize that France has an embargo, you must understand that it is necessary for us to adopt drastic provisions to protect this industry, which has grown from an investment of $3,000,000 capital, when the war broke out, to $174,000,000 capital; and that, apart from this, the chemical industry in this country has expanded until to-day it represents an investment of $2,500,000,000.

Germany dominated the dye industry prior to the war. The question now is whether we shall protect this industry and make it independent in this country. There are in my State 55 plants; and I am not referring to the Du Ponts, or the Allied Chemical Corporation. There are 55 individual plants, with capital from $1,000 to $1,000,000, which have been built up under this embargo. They are manufacturers who, when called upon by the textile interests of the country to furnish dyes, conducted experiments and furnished dyes to the American textile industry, and kept the workers employed during the war.

There is a higher motive in my desire to have the protective duties in this amendment adopted, and that is the question of national defense. When we realize that it was due to the genius of the German chemists, and the advance in the science by the German industries, that enabled Germany to get almost to the channel ports; when we realize that the next war will be fought with chemicals, I think it is our patriotic duty to give this industry the highest protection that can be imposed. Therefore, that is why I am for this amendment, realizing that there are not enough votes in this Chamber to pass the embargo provision, although I would have preferred that policy to this.

Mr. BURSUM. Mr. President, it is idle to debate whether or not the rates are based upon equity, and whether or not they are exactly just. Everyone knows that with a multitude of rates and thousands of dyes, it would be impossible for Congress to definitely fix the multitude of rates which would be required to cover this industry. Even the Tariff Commission, our scientific agency, do not feel equipped at this time to provide these rates within any very short period.

There is no hazard to be risked by the enactment of this amendment, so far as the country is concerned.

We can trust the President and our Tariff Commission to frame a just and equitable rate at the earliest possible opportunity, and in the meantime the amendment simply tides this great industry over until those rates can be promulgated by the President under and by virtue of section 315.

No nation can be considered as a leading nation among the nations of the world unless it can establish within its borders superiority in chemistry, and that applies not only to national defense but to the development of every industry. It applies to the development of our farms, and to nearly every other line of business.

It has not been long since we sent to the other side of the seas 2,000,000 Americans to suppress the ambition of Germany to set up an autocracy of the world. American blood was shed on foreign soil to save the world, and if we are to allow this industry now to perish, that shedding of blood will have been in vain. We will have set aside what was obtained through the great World War. We will have put America at the mercy of the Germans again.

I say that when Mr. du Pont wrote the Senator from Utah that he favored the manufacture of all dyes in this country he was right, and I am in favor of Americans making these dyes. There is no reason why they should not make them as well as the manufacturers in any other country on the face of the earth, and if we make these dyes we will have the money at home and we will have the dyes. We will have them available for the country's defense, and the country can compete with any nation on the earth.

I think the amendment ought to be concurred in.

Mr. EDGE. Mr. President, in connection with the consideration of this subject there appeared in Washington yesterday a delegation of 50 or more young men who have been engaged and are engaged as working chemists in some of the plants throughout the country. They prepared what appeals to me as a very interesting statement of their interest in this matter, and as it is short, I would like to have the Secretary read it in my time.

The PRESIDENT pro tempore. The Secretary will read the statement.

The reading clerk read as follows:

WASHINGTON, D. C., *August 16, 1922.*

To the President and Members of the Congress:

We are chemists employed in the research, operating, and analytical departments of manufactories of drugs, dyestuffs, and other organic chemicals. We want you to know what will be the position of America's chemists of to-day and the future if this industry is permitted again to fall under German control.

The events of the past two weeks have suddenly made clear to us the danger to us and our science. The omission of the selective embargo from the pending tariff will mean the permanent loss of the organic chemical industry to America.

We approach this matter as chemists do, from a scientific and humanitarian standpoint, in a simply logical fashion. We want to present the chemists' point of view. We believe that this has not yet been done effectively.

We have spent from four to six years in collegiate courses specializing in some branch of chemistry, a highly technical subject. The last few years we have devoted whole-heartedly to the advancement of America's knowledge and ability in organic chemistry. Failure to include in the tariff bill the one positive guaranty of our continued existence will sweep into oblivion our time, our positions, and, above all, our special training.

Already the results are apparent in this industry. No man among us to-day can advise his younger brothers to take up this work with any hope of reward—indeed, he would even have no hope for a job. We ourselves can not see ahead opportunities for making a living.

Already research work, which can be accomplished by trained chemists alone, has been discontinued, even abandoned. But few will endow research for its own sake, and the work accomplished under such auspices, excellent though it may be, must be far less than our important position in the world demands.

Plainly, the industry which he had hoped to make our life work faces financial disaster. Daily additional firms are overtaken by it. There is no one to whom the trained chemists thus abandoned by the wayside can turn to use their special abilities and knowledge. The remaining firms are overburdened now.

New and enlarged facilities and instructing staffs recently provided in many of our educational institutions call for still more new students. They will not come under present circumstances. More than $40,000,000 are now invested in buildings and equipment devoted to chemical instruction and research in the colleges and universities throughout the country. Recent investments in chemical educational facilities include: New York, $6,700,015; Massachusetts, $4,146,017; Ohio, $3,196,204; Connecticut, $3,786,495; Pennsylvania, $2,444,521; Minnesota, $2,351,210; Illinois, $1,886,983; California, $1,390,587; Michigan, $1,390,850; and Indiana, $1,098,726. Shall these facilities be scrapped and the instructors sent out into the already overcrowded field? They must be unless we retain our organic chemical victory so hard fought for and dearly won.

The world to-day depends on the chemist for its advancement. Who is to replace gasoline and create new lubricants? Who has replaced the silkworm? Who is to lead in eliminating present manufacturing waste? The chemist. There is no industry where his works can not be seen. Is this industry which is a training school in knowledge and technique—this industry which is peculiarly the chemist's own to be discontinued by lack of knowledge, by inattention, or, we hesitate to think, by neglect?

Transcending the chemist's own welfare, however, is the future of all the people of our country beside which that of the chemist is negligible. Dyes we could live without, but those new therapeutics of recent years have become indispensible. Without this industry, whence will come those sinews of defense which we were so slow in producing in the war should the time again come when they must be had to preserve our personal and national lives? The knowledge which will enable us to maintain a position of equality can be gained only through constant research.

America must not abandon this industry. We must continue to increase our power. The administration has assured us that we shall be permitted to live, and this we entreat—yes; demand—shall be kept for the welfare of our fellow citizens, for ourselves, and for American posterity.

COMMITTEE OF AMERICAN CHEMISTS,
A. J. PASTENE, *Chairman.*

During the reading of the statement—

Mr. SIMMONS. Mr. President, a parliamentary inquiry.

The PRESIDENT pro tempore. The Senator will state the inquiry.

Mr. SIMMONS. I make the inquiry as to whether a Senator may be allowed more than 10 minutes for the reading of an article?

The PRESIDENT pro tempore. When the 10 minutes have expired, the reading will cease.

Mr. FRELINGHUYSEN. Mr. President, may I inquire if I have any further time on the amendment?

The PRESIDENT pro tempore. The unanimous-consent agreement provides that no Senator shall speak more than once nor longer than 10 minutes after the bill is in the Senate. The Senator from New Jersey has spoken once and therefore can not be recognized again on the amendment.

Mr. SIMMONS. Mr. President, as I discussed this matter last night, I do not desire to discuss it at length again. The Senator from Utah [Mr. SMOOT], who is familiar with it, has advised us that the placing of these rates upon the American

valuation instead of upon the foreign valuation, upon which all other rates in the bill are based, would increase the rates of the bill, at least 100 per cent, as I understood, and I think that is a correct statement on the part of the Senator from Utah.

The rates in the present bill, to which the Senate has heretofore agreed, are 50 per cent ad valorem and 7 cents a pound. The amendment we are now considering would increase that ad valorem from 50 to 90 per cent and the specific rate from 7 to 10 cents. That would be undoubtedly an increase in the rate to the extent of certainly not less than 50 per cent. A 90 per cent duty upon the foreign valuation basis would be 180 per cent duty upon the American valuation. So the effect of the amendment is practically to impose an ad valorem rate of 180 per cent, plus a specific rate of 10 cents a pound, upon the various dye products mentioned in the paragraph.

There are two objections to this amendment, Mr. President: First is the fundamental objection that, having imposed the foreign valuation throughout the bill, we now propose with reference to this particular item to substitute the American valuation, a principle which the Finance Committee itself has overwhelmingly condemned as unsound and a proposition which, if it were to be applied to the general items in the bill, would be overwhelmingly voted down by the Senate. It is proposed to establish that principle and write it into the bill with reference to the enormous quantity products which are the result of the operation of the dye industry in this country. I object to it for that reason.

I object to it also, Mr. President, upon the ground that we have repudiated the idea of an embargo upon dyestuffs. That was discussed thoroughly in the Senate in Committee of the Whole and was voted down. The embargo which we voted down was only a limited embargo and was to expire at the end of one year, with the privilege of renewing it only for an additional year. Its possible life was only two years, but we voted it down. Now, here we have revived the principle of an embargo, for these duties admittedly are an embargo. No man can question the fact that 150 per cent ad valorem plus 10 cents a pound on dyestuffs would be an embargo in effect. Now, we have revived the principle of the embargo and it is not limited in the amendment to two years, but on the contrary once the amendment is written into the law it would become a permanent law of the United States until repealed.

I want to say to Senators on this side of the Chamber that we have voted against the American valuation principle or announced ourselves against it. We have voted against an embargo. Shall we now stultify ourselves by voting not only for an embargo but voting for the American valuation and voting in effect for a permanent embargo in favor of an industry which we have already favored more than any other industry ever was favored before? When we first began to raise the duties upon these articles at the request of the manufacturers they told us that the raise was all they required in order to enable them to meet German competition, and that was before we went into the war.

The PRESIDENT pro tempore. The Senator from North Carolina will suspend while the Senate receives a message from the House of Representatives.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. Overhue, its enrolling clerk, announced that the Speaker of the House had signed the following enrolled bills and joint resolutions, and they were thereupon signed by the President pro tempore:

H. R. 314. An act for the relief of Forrest R. Black;

H. R. 6817. An act to authorize the Secretary of the Interior to issue patent to the State of Michigan, in trust, of a certain described tract of land to be used as a game refuge;

H. R. 7598. An act authorizing the Secretary of the Interior to dedicate and set apart as a national monument certain lands in Riverside County, Calif.;

H. R. 7812. An act to extend the time for cutting timber in the Coconino and Tusayan National Forests, Ariz.;

H. R. 8244. An act permitting Frances Mack Mann to purchase certain public lands;

H. R. 8845. An act for the relief of Mattie Alexander;

H. R. 9048. An act to authorize the California Débris Commission to reimburse the city of Sacramento, Calif., for money expended by said city in the construction of the Sacramento weir;

H. R. 9257. An act to permit adjustment of conflicting claims to certain lands in Mohave County, Ariz.;

H. R. 9746. An act for the relief of Emmett Otto Cooney;

H. R. 9814. An act amending the proviso of the act approved August 24, 1912, with reference to educational leave to employees of the Indian Service;

H. R. 10517. An act providing for the confirmation of title of certain purchasers from the State of Louisiana of lands formerly included in the Fort Sabine Military Reservation, in Cameron Parish, La., now abandoned;

H. R. 10957. An act to rebuild the school building of the Indian school near Tomah, Wis.;

H. R. 11054. An act to validate certain deeds executed by members of the Five Civilized Tribes, and for other purposes;

H. R. 11233. An act authorizing the Secretary of Commerce to convey certain land to the county of Muscatine, Iowa;

H. J. Res. 170. Joint resolution to approve the holding of a national and international exhibition in the city of Philadelphia in 1926 upon the Fairmount Park and parkway site selected by the Sesquicentennial Exhibition Association, and lands contiguous thereto that may be acquired for that purpose, as an appropriate celebration of the one hundred and fiftieth anniversary of the signing of the Declaration of Independence; and

H. J. Res. 316. Joint resolution authorizing the reappointment of Frederick Mears as a commissioned officer of the Regular Army and making him available, when so reappointed, for service as chairman and chief engineer of the Alaskan Engineering Commission.

The message also announced that the House had agreed to a concurrent resolution (H. Con. Res. 64) providing for the assembling of the two Houses at 12.15 to-day in the Hall of the House of Representatives for the purpose of receiving a communication from the President of the United States, in which it requested the concurrence of the Senate.

JOINT MEETING OF THE TWO HOUSES.

Mr. LODGE. I ask unanimous consent that the Senate concur in the concurrent resolution just presented from the House.

The PRESIDENT pro tempore. The Chair lays before the Senate a concurrent resolution from the House of Representatives, which will be read.

The concurrent resolution (H. Con. Res. 64) was read, considered by unanimous consent, and agreed to, as follows:

Resolved by the House of Representatives (the Senate concurring), That the two Houses of Congress assemble in the Hall of the House of Representatives on Friday, the 18th day of August, 1922, at 12.15 o'clock in the afternoon, for the purpose of receiving such communication as the President of the United States shall be pleased to make to them.

Mr. LODGE. Mr. President, in accordance with the terms of the concurrent resolution just agreed to, I move that the Senate take a recess, to reconvene immediately after the delivery of the message of the President.

The motion was agreed to.

The PRESIDENT pro tempore. In accordance with the concurrent resolution of the two Houses, the Senate will proceed to the Hall of the House of Representatives to receive a communication from the President of the United States. The Sergeant at Arms will take charge.

Thereupon the Senate, preceded by its Sergeant at Arms, the President pro tempore, and the Secretary, proceeded to the Hall of the House of Representatives.

ADDRESS BY THE PRESIDENT OF THE UNITED STATES.

The address of the President of the United States this day delivered at the joint meeting of the two Houses of Congress is as follows:

GENTLEMEN OF THE CONGRESS: It is manifestly my duty to bring to your attention the industrial situation which confronts the country. The situation growing out of the prevailing railway and coal-mining strikes is so serious, so menacing to the Nation's welfare, that I should be remiss if I failed frankly to lay the matter before you and at the same time acquaint you and the whole people with such efforts as the Executive branch of the Government has made by the voluntary exercise of its good offices to effect a settlement.

The suspension of the coal industry dates back to last April 1, when the working agreement between mine operators and the United Mine Workers came to an end. Anticipating that expiration of contract, which was negotiated with the Government's sanction in 1920, the present administration sought, as early as last October, conferences between the operators and miners in order to facilitate either a new or extended agreement in order to avoid any suspension of production when April 1 arrived. At that time the mine workers declined to confer, though the operators were agreeable, the mine workers excusing their declination on the ground that the union officials could have no authority to negotiate until after their annual convention.

A short time prior to the expiration of the working agreement the mine workers invited a conference with the operators in the central competitive field, covering the States of Pennsylvania, Ohio, Indiana, and Illinois, and in spite of the union declination of the Government's informal suggestion for the

conference, five months before, the Government, informally but sincerely, commended the conference, but it was declined by certain groups of operators, and the coal-mining controversy ended in the strike of April 1. It was instantly made nation-wide, so far as the organized mine workers could control, and included many districts in the bituminous field where there was neither grievance nor dispute, and effected a complete tie-up of the production in the anthracite field.

It is to be noted that when the suspension began large stocks of coal were on hand, mined at wages higher than those paid during the war, there was only the buying impelled by necessity, and there was a belief that coal must yield to the postwar readjustment. When the stocks on hand began to reach such diminution as to menace industry and hinder transportation, approximately June 1, overtures were initiated by the Government in the hope of expediting settlement. None of these availed. Individual and district tenders of settlement on the part of operators—in some instances appeals for settlement—were wholly unavailing. The dominant groups among the operators were insistent on having district agreements; the dominant mine workers were demanding a nation-wide settlement. The Government being without authority to enforce a strike settlement in the coal industry, could only volunteer its good offices in finding a way of adjustment.

Accordingly, a conference of the coal operators' associations and the general and district officials of the United Mine Workers was called, to meet in Washington on July 1. The designation of representation was left to the officials of the various organizations, and there was nation-wide representation, except from the nonunion fields of the country. Before the joint meeting I expressed the deep concern of the country and invited them to meet at a conference table and end the disputes between them. The conference did not develop even a hope. The operators were asking for their district or territorial conferences; the workers demanded national settlement on old bases. Appraising correctly the hopelessness of the situation, I again invited both operators and workers to meet with me, and tendered a means of settlement so justly inspired that it was difficult to see how anyone believing in industrial peace and justice to all concerned could decline it. In substance, it called on the operators to open their mines, on the mine workers to resume work at the same pay and under the same working conditions as prevailed at the time the strike began. In turn, the Government was to create at once a coal commission, or two of them, if preferred by all parties to the dispute, so that one could deal with the bituminous situation, the other with the problems in the anthracite field.

Among the commissioners were to be representatives of the operators, representatives of the mine workers, and outstanding, disinterested, and able representatives of the American public. The commission was to be instructed to direct its first inquiry to the rate of wage to be paid for the period ending next April 1, and then to enter upon a fact-finding inquiry into every phase of the industry, and point the way to avoid future suspensions in production. The disputants all indorsed the suggestion of a fact-finding commission. The anthracite operators promptly accepted the entire proposal. The mine workers refused to resume work under the arbitration plan. The majority of the bituminous operators filed an acceptance, but a considerable minority declined the proposal.

Under these circumstances, having no authority to demand compliance, the Government had no other course than to invite a resumption of production under the rights of all parties to the controversy, with assurance of Government protection of each and every one in his lawful pursuits. This fact was communicated to the governors of all coal-producing States, and with two exceptions assurances of maintained law and order were promptly given. In some instances concrete proof of effective readiness to protect all men, strikers and nonstriking workmen alike, was promptly given. But little or no new production followed. The simple but significant truth was revealed that, except for such coal as comes from the districts worked by nonorganized miners, the country is at the mercy of the United Mine Workers.

Governors in various States reported that their operators and miners had no dispute and were eager to resume production. District leaders informed me that their workmen were anxious to return to their jobs but that they were not permitted to do so. Hundreds of wives of workmen have addressed the White House, beseeching a settlement, alleging that they knew no grievance, and there is an unending story of appeals for relief where necessity or suffering were impelling, where a mere expression of need ought to find ready compliance.

At every stage the Government has been a just neutral regarding wage scales and working contracts. There are fundamental evils in our present system of producing and distribution which make the wage problem difficult. In the bituminous coal fields are vastly more mines than are requisite to the country's needs, and there are 200,000 more mine workers than are needed to produce in continuous employment the country's normal requirements. By continuous employment I mean approximately 280 working days in the year. In many instances last year men were employed less than 150 days, in some cases much fewer than that. In the overmanned sections men divide the working time, and high wages are necessary to meet the cost of the barest living. Interrupted transportation, sorely broken employment, the failure to develop storage against enlarged demands and inadequate carrying—all these present problems bearing on righteous wage adjustment, and demand constructive solution.

Because of these things, because of the impressions of many cases of unjustifiable profits in the industry, and because public interest demands investigation, and demands the finding of facts be given to the public, I am asking at your hands the authority to create a commission to make a searching investigation into the whole coal industry, with provision for its lawful activities and the bestowal of authority to reveal every phase of coal production, sale, and distribution. I am speaking now on behalf of mine workers, mine operators, and the American public. It will bring protection to all and point the way to continuity of production and the better economic functioning of the industry in the future.

The necessity for such a searching national investigation with constructive recommendation is imperative. At the moment the coal skies are clearing, but unless we find a cure for the economic ills which affect the industry and therein find a basis for righteous relationship, we shall be faced with a like menacing situation on next April 1 on the expiration of the wage contracts which are now being made.

The need for such investigation and independent consideration is revealed by both operators and mine workers in the provision in the Cleveland agreement so recently made. The Government will gladly cooperate with the industry in this program so far as it is the public interest so to do, but I have an unalterable conviction that no lasting satisfaction or worthwhile results will ensue unless we may have a Government commission, independent of the industry, clothed with authority by the Congress to search deeply, so that it may advise as to fair wages and as to conditions of labor and recommend the enactment of laws to protect the public in the future.

The almost total exhaustion of stocks of coal, the crippled condition of the railways, the distressed situation that has arisen and might grow worse in our great cities due to the shortage of anthracite, the suffering which might arise in the Northwest through failure to meet winter needs by lake transportation, all these added to the possibility of outrageous price demands, in spite of the most zealous voluntary efforts of the Government to restrain them, make it necessary to ask you to consider at once some form of temporary control of distribution and prices.

The administration earnestly has sought to restrain profiteering and to secure the rightful distribution of such coal as has been available in this emergency. There were no legal powers for price control. There has been cordial cooperation in many fields, a fine revelation of business conscience stronger than the temptation to profit by a people's misfortune. There have been instances of flat refusal. I rejoice to make grateful acknowledgment to those who preferred to contribute to national welfare rather than profit by a Nation's distress.

If it may have your approval, I recommend immediate provision for a temporary national coal agency, with needed capital, to purchase, sell, and distribute coal which is carried in interstate shipment. I do not mean that all interstate coal shall be handled by such a Federal organization; perhaps none will be necessary; but it will restore its capital to the Public Treasury and will be the instrumentality of guarding the public interest where private conscience is insensible to a public need.

This proposal does not relate to any possible employment in intrastate shipments. Price restraint and equitable distribution in intrastate shipments is a responsibility of the State's own government. In such voluntary activities as have been carried on thus far the Federal Government has endeavored to reestablish the authority and responsibility in the States which was undermined in the necessary centralization of authority during the World War.

The public menace in the coal situation was made more acute and more serious at the beginning of July by the strike of the Federated Shop Crafts in the railroad service—a strike against a wage decision made by the Railroad Labor Board, directly affecting approximately 400,000 men. The justice of

the decision is not for discussion here. The decision has been lost sight of in subsequent developments. In any event, it was always possible to appeal for rehearing and the submission of new evidence, and it is always a safe assumption that a Government agency of adjustment deciding unjustly will be quick to make right any wrong.

The Railroad Labor Board was created by Congress for the express purpose of hearing and deciding disputes between the carriers and their employees, so that no controversy need lead to an interruption in interstate transportation.

It was inevitable that many wage disputes should arise. Wages had mounted upward, necessarily and justly, during the war upheaval, likewise the cost of transportation, so that the higher wages might be paid. It was inevitable that some readjustments should follow. Naturally these readjustments were resisted. The administrative government neither advocated nor opposed. It only held that the Labor Board was the lawful agency of the Government to hear and decide disputes, and its authority must be sustained, as the law contemplates. This must be so, whether the carriers or the employees ignore its decisions.

Unhappily, a number of decisions of this board had been ignored by the carriers. In only one instance, however, had a decision, challenged by a carrier, been brought to the attention of the Department of Justice, and this decision was promptly carried to the courts and has recently been sustained in the Federal court of appeals. The public or the Executive had no knowledge of the ignored decisions in other cases, because they did not hinder transportation. When these failures of many of the carriers to abide by decisions of the board were brought to my attention, I could more fairly appraise the feelings of the strikers, though they had a remedy without seeking to paralyze interstate commerce.

The law creating the Railroad Labor Board is inadequate. Contrary to popular impression, it has little or no power to enforce its decisions. It can impose no penalties on either party disregarding its decisions. It can not halt a strike, and manifestly Congress deliberately omitted the enactment of compulsory arbitration. The decisions of the board must be made enforceable and effective against carriers and employees alike. But the law is new, and no perfection of it by Congress at this moment could be helpful in the present threatened paralysis of transportation.

Happily it is always lawful and ofttimes possible to settle disputes outside of court, so, in a desire to serve public welfare, I ventured upon an attempt at mediation. Those who had preceded me in attempted settlements had made some progress. I submitted to the officials of the striking employees and the chairman of the Association of Railway Executives, in writing, on the same day, a tentative proposal for settlement. Knowing that some of the carriers had offended by ignoring the decisions of the board and the employees had struck when they had a remedy without the strike, I felt it was best to start all over again, resume work, all to agree to abide faithfully by the board's decisions, make it a real tribunal of peace in transportation, and everybody serve the public. The barrier to be surmounted was the question of seniority. By the workmen these rights are held to be sacred, and unsurrendered by a strike. By the carriers the preservation of seniority is the weapon of discipline on the one hand and the reward of faithful employees on the other. It has been an almost invariable rule that when strikes have been lost seniority and its advantages have been surrendered; when strikes have been settled seniority has been restored.

In the tentative proposal which I sponsored it was provided that everybody should go to work, with seniority rights unimpaired, that there should be no discrimination by either workmen or carriers against workmen who did or did not strike. I realized that the proposal must carry a disappointment to employees who had inherited promotion by staying loyally on the job, and to such new men as had sought jobs looking to permanent employment, but I wanted the fresh start and maintained transportation service, and I appraised the disappointment of the few to be less important than the impending misfortune to the Nation. It was not what I would ask ordinarily to be considered or conceded, but at that moment of deep anxiety, with the coal shortage gravely menacing, I was thinking of the pressing demands of the welfare of the whole people. I believed the sacrifice brought to the men involved could be amply compensated for by the carriers in practical ways. I believed that the matter of transcendent importance was the acceptance of the proposal to respect the Labor Board's decisions on the questions which formed the issue at the time of the strike. The public compensation would be complete in guarding by law against recurrence.

The proposal was rejected by the carriers. Though the rejection did not end all negotiation, it left the Government only one course—to call the striking workmen to return to work, to call the carriers to assign them to work, and leave the dispute about seniority to the Labor Board for decision. When negotiation or mediation fails, this is the course contemplated by the law and the Government can have no chart for its course except the law.

To this call a majority of the carriers responded favorably, proposing to reemploy all strikers except those guilty of violence against workmen or property, to restore the striking workmen to their old positions where vacant, or to like positions where vacancies are filled; questions of seniority which can not be settled between the employer and employees to go to the Labor Board for decision. The minority of the carriers proposed to assign jobs to workmen on strike only where the positions were vacant. Neither proposal has been accepted.

Thus the narrative brings us to the present moment, but it has not included the developments which have heightened the Government's concern. Sympathetic strikes have developed here and there, seriously impairing interstate commerce. Deserted transcontinental trains in the desert regions of the Southwest have revealed the cruelty and contempt for law on the part of some railway employees, who have conspired to paralyze transportation, and lawlessness and violence in a hundred places have revealed the failure of the striking unions to hold their forces to law observance. Men who refused to strike and who have braved insult and assault and risked their lives to serve a public need have been cruelly attacked and wounded or killed. Men seeking work and guards attempting to protect lives and property, even officers of the Federal Government, have been assaulted, humiliated, and hindered in their duties. Strikers have armed themselves and gathered in mobs about railroad shops to offer armed violence to any man attempting to go to work. There is a state of lawlessness shocking to every conception of American law and order and violating the cherished guaranties of American freedom. At no time has the Federal Government been unready or unwilling to give its support to maintain law and order and restrain violence, but in no case has State authority confessed its inability to cope with the situation and asked for Federal assistance.

Under these conditions of hindrance and intimidation there has been such a lack of care of motive power that the deterioration of locomotives and the noncompliance with the safety requirements of the law are threatening the breakdown of transportation. This very serious menace is magnified by the millions of losses to fruit growers and other producers of perishable foodstuffs, and comparable losses to farmers who depend on transportation to market their grains at harvest time. Even worse, it is hindering the transport of available coal when industry is on the verge of paralysis because of coal shortage, and life and health are menaced by coal famine in the great centers of population. Surely the threatening conditions must impress the Congress and the country that no body of men, whether limited in numbers and responsible for railway management or powerful in numbers and the necessary forces in railroad operation, shall be permitted to choose a course which so imperils public welfare. Neither organizations of employers nor workingmen's unions may escape responsibility. When related to a public service the mere fact of organization magnifies that responsibility and public interest transcends that of either grouped capital or organized labor.

Another development is so significant that the hardships of the moment may well be endured to rivet popular attention to necessary settlement. It is fundamental to all freedom that all men have unquestioned rights to lawful pursuits, to work and to live and choose their own lawful ways to happiness. In these strikes these rights have been denied by assault and violence, by armed lawlessness. In many communities the municipal authorities have winked at these violations, until liberty is a mockery and the law a matter of community contempt. It is fair to say that the great mass of organized workmen do not approve, but they seem helpless to hinder. These conditions can not remain in free America. If free men can not toil according to their own lawful choosing, all our constitutional guaranties born of democracy are surrendered to mobocracy and the freedom of a hundred millions is surrendered to the small minority which would have no law.

It is not my thought to ask Congress to deal with these fundamental problems at this time. No hasty action would contribute to the solution of the present critical situation. There is existing law by which to settle the prevailing disputes. There are statutes forbidding conspiracy to hinder interstate commerce. There are laws to assure the highest possible safety in railway

service. It is my purpose to invoke these laws, civil and criminal, against all offenders alike.

The legal safeguarding against like menaces in the future must be worked out when no passion sways, when no prejudice influences, when the whole problem may be appraised, and the public welfare may be asserted against any and every interest which assumes authority beyond that of the Government itself.

One specific thing I must ask at your hands at the earliest possible moment. There is pending a bill to provide for the better protection of aliens and for the enforcement of their treaty rights. It is a measure, in short, to create a jurisdiction for the Federal courts through which the National Government will have appropriate power to protect aliens in the rights secured to them under treaties and to deal with crimes which affect our foreign relations.

The matter has been before Congress on many previous occasions. President Tyler, in his first annual message, advised Congress that inasmuch as "the Government is charged with the maintenance of peace and the preservation of amicable relations with the nations of the earth, it ought to possess without question all the reasonable and proper means of maintaining the one and preserving the other."

President Harrison asked for the same bestowal of jurisdiction, having encountered deep embarrassment which grew out of the lynching of 11 aliens in New Orleans in 1891. President McKinley, dealing with a like problem in 1899, asked the conferring upon Federal courts jurisdiction in that class of international cases where the ultimate responsibility of the Federal Government may be involved. President Roosevelt uttered a like request to Congress in 1906, and President Taft pointed out the defect in the present Federal jurisdiction when he made his inaugural address in 1909. He declared that "it puts our Government in a pusillanimous position to make definite engagement to protect aliens and then to excuse the failure to perform these engagements by an explanation that the duty to keep them is in States or cities not within our control. If we would promise, we must put ourselves in a position to perform our promise. We can not permit the possible failure of justice, due to local prejudice in any State or municipal government, to expose us to the risk of war which might be avoided if Federal jurisdiction were asserted by suitable legislation by Congress."

My renewal of this oft-made recommendation is impelled by a pitiable sense of Federal impotence to deal with the shocking crime at Herrin, Ill., which so recently shamed and horrified the country. In that butchery of human beings, wrought in madness, it is alleged that two aliens were murdered. This act adds to the outraged sense of American justice the humiliation which lies in the Federal Government's confessed lack of authority to punish that unutterable crime.

Had it happened in any other land than our own, and the wrath of righteous justice were not effectively expressed, we should have pitied the civilization that would tolerate and sorrow for the Government unwilling or unable to mete out just punishment.

I have felt the deep current of popular resentment that the Federal Government has not sought to efface this blot from our national shield, that the Federal Government has been tolerant of the mockery of local inquiry and the failure of justice in Illinois. It is the regrettable truth that the Federal Government can not act under the law. But the bestowal of the jurisdiction necessary to enable Federal courts to act appropriately will open the way to punish barbarity and butchery at Herrin or elsewhere, no matter in whose name or for what purpose the insufferable outrage is committed.

It is deplorable that there are or can be American communities where even there are citizens, not to speak of public officials, who believe mob warfare is admissible to cure any situation. It is terrorizing to know that such madness may be directed against men merely for choosing to accept lawful employment. I wish the Federal Government to be able to put an end to such crimes against civilization and punish those who sanction them.

In the weeks of patient conference and attempts at settlement I have come to appraise another element in the engrossing industrial dispute of which it is only fair to take cognizance. It is in some degree responsible for the strikes and has hindered attempts at adjustment. I refer to the warfare on the unions of labor. The Government has no sympathy or approval for this element of discord in the ranks of industry. Any legislation in the future must be as free from this element of trouble making as it is from labor extremists who strive for class domination. We recognize these organizations in the law, and we must accredit them with incalculable contribution to labor's uplift. It is of public interest to preserve them and profit by the good that is in them, but we must check the abuses and the excesses which conflict with public interest, precisely as we have been progressively legislating to prevent capitalistic, corporate, or managerial domination which is contrary to public welfare. We also recognize the right of employers and employees alike, within the law, to establish their methods of conducting business, to choose their employment and to determine their relations with each other. We must reassert the doctrine that in this Republic the first obligation and the first allegiance of every citizen, high or low, is to his Government, and to hold that Government to be the just and unchallenged sponsor for public welfare and the liberty, security, and rights of all its citizens. No matter what clouds may gather, no matter what storms may ensue, no matter what hardships may attend, or what sacrifice may be necessary, government by law must and will be sustained.

Wherefore I am resolved to use all the power of the Government to maintain transportation and sustain the right of men to work.

The Senate returned to its Chamber at 1 o'clock and 5 minutes p. m., and the President pro tempore resumed the chair.

On motion of Mr. MOSES it was—

Ordered, That the address this day delivered by the President of the United States before the two Houses of Congress be printed as a Senate document, and that 50,000 additional copies be printed for the use of the Senate.

THE TARIFF.

The Senate resumed the consideration of the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes.

The PRESIDENT pro tempore. The Chair desires to announce to the Senator from North Carolina [Mr. SIMMONS] that the time he has consumed will not be reckoned against him in view of the circumstances under which he was interrupted.

Mr. SIMMONS. I thank the Chair for the ruling, but my speech was cut off. However, as I had nearly finished I shall not say anything further.

The PRESIDENT pro tempore. The question is upon concurring in the amendment made as in Committee of the Whole offered by the Senator from New Mexico [Mr. BURSUM].

The amendments were to amend paragraph 25, coal-tar products, lines 17 and 18, on page 10, by striking out the words "50 per cent ad valorem and 7 cents per pound" and inserting in lieu thereof the following:

Seventy-five per cent ad valorem based upon American selling price (as defined in division (f) of section 402, Title IV) of any similar competitive article manufactured or produced in the United States and 10½ cents per pound. If there be no similar competitive article manufactured or produced in the United States, then the ad valorem rate shall be based upon the foreign value or the export value, whichever is the higher, as defined in paragraphs (a), (b), and (c) of section 402, Title IV. For the purposes of this paragraph any coal-tar products provided for in this act shall be considered similar to or competitive with any imported coal-tar product which accomplishes results substantially equal to those accomplished by the domestic product when used in substantially the same manner: *Provided*, That no duty imposed under this paragraph shall be increased under the provisions of section 315.

Amend paragraph 26, on page 11, line 21, by inserting, after the figures "1546," the words "all synthetic organic medicinals and chemicals not specially provided for."

Also amend paragraph 26, line 6, page 12, by striking out in line 6 the words "60 per cent ad valorem and 7 cents per pound" and substituting in lieu thereof the following:

Ninety per cent ad valorem based upon American selling price (as defined in division (f) of section 402, Title IV) of any similar competitive article manufactured or produced in the United States and 10½ cents per pound. If there be no similar competitive article manufactured or produced in the United States, then the ad valorem rate shall be based upon the foreign value or the export value, whichever is the higher, as defined in paragraphs (a), (b), and (c) of section 402, Title IV.

Also amend lines 7, 14, and 17, on page 12, by striking out the figure "7" and inserting in lieu thereof the figures "10½."

Also, on page 15, line 16, after the word "impress," add the following:

For the purposes of this paragraph, any coal-tar product provided for, and all synthetic organic medicinals and chemicals not specially provided for, in this act shall be considered similar to or competitive with any imported coal-tar product or any synthetic organic medicinal or chemical not specially provided for which accomplishes results substantially equal to those accomplished by the domestic product when used in substantially the same manner: *Provided*, That no duty imposed under this paragraph shall be increased under the provisions of section 315.

Mr. UNDERWOOD. If the debate is concluded, I ask for the yeas and nays.

The PRESIDENT pro tempore. It is the understanding of the Chair that the five amendments proposed by the Senator

from New Mexico will be treated as one amendment, to be voted upon at the same time, as was done in Committee of the Whole. The yeas and nays are demanded on concurring in the amendment.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. EDGE (when his name was called). I transfer my general pair with the senior Senator from Oklahoma [Mr. OWEN] to the junior Senator from Maryland [Mr. WELLER] and vote "yea." I will let this announcement of my pair and transfer stand for the day.

Mr. HARRISON (when his name was called). Transferring my pair with the junior Senator from West Virginia [Mr. ELKINS] to the senior Senator from California [Mr. JOHNSON], I vote "nay."

Mr. JONES of New Mexico (when his name was called). I have a general pair with the Senator from Maine [Mr. FERNALD]. I am informed that on this question he would vote as I intend to vote. I therefore vote "yea."

Mr. McCUMBER (when his name was called). I have a general pair with the junior Senator from Utah [Mr. KING]. I transfer that pair to the junior Senator from Washington [Mr. POINDEXTER]. This notice of transfer may stand on all the votes to-day unless otherwise stated. I vote "yea."

Mr. POMERENE (when his name was called). As heretofore announced, my colleague [Mr. WILLIS] is detained because of serious illness in his family. I am paired with him. I transfer that pair to the senior Senator from Nevada [Mr. PITTMAN] and vote "nay."

Mr. WATSON of Georgia (when his name was called). I have a general pair with the senior Senator from California [Mr. JOHNSON]. However, I am informed that on this question his vote would be the same as mine, and I am therefore at liberty to vote. I vote "nay."

Mr. WATSON of Indiana (when his name was called). I transfer my general pair with the senior Senator from Mississippi [Mr. WILLIAMS] to the junior Senator from North Dakota [Mr. LADD] and vote "yea."

The roll call was concluded.

Mr. CURTIS. I wish to announce that the Senator from Wisconsin [Mr. LA FOLLETTE] is paired with the Senator from Michigan [Mr. TOWNSEND]. On this question the Senator from Wisconsin would vote "nay" and the Senator from Michigan would vote "yea."

I also wish to announce that the Senator from Colorado [Mr. NICHOLSON] is paired with the Senator from Minnesota [Mr. NELSON]. On this question the Senator from Colorado would vote "yea" and the Senator from Minnesota would vote "nay."

I also wish to announce the following general pairs:

The Senator from Missouri [Mr. SPENCER] with the Senator from Georgia [Mr. HARRIS]; and

The Senator from Illinois [Mr. McKINLEY] with the Senator from Arkansas [Mr. CARAWAY].

The result was announced—yeas 39, nays 31, as follows:

YEAS—39.

Ball	du Pont	McCumber	Reed, Pa.
Brandegee	Edge	McLean	Sheppard
Broussard	Ernst	McNary	Shortridge
Bursum	France	New	Stanfield
Calder	Frelinghuysen	Norbeck	Sterling
Cameron	Gooding	Oddie	Sutherland
Colt	Hale	Pepper	Wadsworth
Cummins	Jones, N. Mex.	Phipps	Warren
Curtis	Jones, Wash.	Ransdell	Watson, Ind.
Dillingham	Lodge	Rawson	

NAYS—31.

Ashurst	Harrison	Moses	Smoot
Borah	Heflin	Newberry	Stanley
Capper	Hitchcock	Overman	Swanson
Dial	Kellogg	Pomerene	Trammell
Fletcher	Kendrick	Robinson	Underwood
Gerry	Keyes	Shields	Walsh, Mont.
Glass	Lenroot	Simmons	Watson, Ga.
Harreld	McKellar	Smith	

NOT VOTING—26.

Caraway	Ladd	Norris	Townsend
Culberson	La Follette	Owen	Walsh, Mass.
Elkins	McCormick	Page	Weller
Fernald	McKinley	Pittman	Williams
Harris	Myers	Poindexter	Willis
Johnson	Nelson	Reed, Mo.	
King	Nicholson	Spencer	

So the amendment was concurred in.

The PRESIDENT pro tempore. The Secretary will state the next amendment which has been reserved.

The ASSISTANT SECRETARY. The next reserved amendment is on page 20, paragraph 46, lime citrate. As in Committee of the Whole, the Senate struck out "7" and inserted "6," so that the paragraph now reads:

Lime, citrate of, 6 cents per pound.

The PRESIDENT pro tempore. The question is on concurring in the amendment.

Mr. SHORTRIDGE. Mr. President, I propose that in lieu of the numeral "6," in line 16, page 20, the numeral "9" be inserted before the word "cents," so that the paragraph shall read: "Lime, citrate of, 9 cents per pound." The subject matter has been very generally discussed. When the bill was before the Committee of the Whole on May 15 there was elaborate argument for and against the report of the committee which fixes the rate of duty on citrate of lime at 6 cents. The House fixed the rate at 7 cents per pound. Now the Senate has fixed a rate of 18 cents per pound on citric acid, and we are asking for 9 cents per pound on citrate of lime. The question is, What is the proportion in justice to all parties concerned? Senators are familiar with the subject matter, I am assuming, and necessarily I must be very brief in my remarks.

From citrate of lime we get citric acid. After a very thorough consideration, as stated, the Senate has fixed a duty of 18 cents on citric acid. We of California raise lemons and produce citrate of lime. Eastern manufacturers convert the citrate of lime into the citric acid. Our chief competitor is Italy. For manifest, obvious reasons we can not compete with that competitor. This is recognized by all thoughtful men.

If the figures submitted are accurate and correct, then it follows that if the American manufacturer is entitled to an 18-cent tariff on citric acid the lemon growers are entitled to a tariff of 9 cents on the citrate of lime. Turn to the debate on this question as it appears in the RECORD and it will be seen that my colleague demonstrated that in theory and in fact citrate of lime should be accorded a protection of, at the very least, 9 cents per pound.

For illustration, the citrate of lime which is produced from the lemon in California is shipped to New Jersey, and the matter of freight is to be considered. There the manufacturer converts it into citric acid. The authoritative testimony submitted demonstrates what I have just stated. The bill as now framed gives the manufacturer in New Jersey or of any other State at least a 3-cent advantage or compensation in the conversion process. Of course, I admit that there is some controversy as to what conversion allowance the manufacturer should have; what conversion recognition or allowance should be given to the manufacturer; but I hasten to add that no one has proved by analysis that the conversion allowance should be more than 3 cents, although an allowance of 6 cents is claimed and an allowance of at least 4 cents is demanded.

I have stood here and, full well recognizing what I was doing, gladly voted for ample and adequate protective-tariff duties for many manufacturing establishments in this country, and I am appealing to those who believe in a protective-tariff doctrine to give the producers of citrate of lime, the lemon growers, at least 9 cents per pound on this product. This will do no injury to the manufacturer; it will not in any appreciable degree, if at all, affect the profits of that industry, which are great.

I do not know whether I can appeal with hope of success to Democratic Senators; but this is really not a political question; it is a very practical proposition. Assuming that the 18-cent rate on citric acid will remain in the bill, then, to equalize it, 9 cents should be accorded on the item of citrate of lime.

I will not enlarge upon the details or upon the figures which prompt and, I think, fully justify me in making these more or less broad and declarative statements of fact. The matter was argued here on the 15th of May, a vote was taken, and the result is there recorded. I am assuming that those who then favored a 9-cent rate, for which we asked, still believe they were right, and I am hoping that there may be some Senators who then thought otherwise will now come to recognize the justice of what I have thus briefly set forth.

Mr. President, I have here in my hand a telegram received to-day. It comes from the California Citrus League. It states our case briefly and clearly:

LOS ANGELES, CALIF., *August 18, 1922.*

Hon. SAMUEL M. SHORTRIDGE,
United States Senate, Washington, D. C.:

Understand Senate rate of 6 cents on citrate of lime, paragraph 46, is to be considered under Senator JOHNSON'S amendment August 4 last year raising rate to 9 cents. Proposed 9-cent rate is much below rate requested by California Citrus League and 6-cent rate is entirely out of relationship to adequate ratio between citric acid and citrate of lime. Giving consideration to recovery of citric acid from citrate of lime and allowing for difference between labor cost of converting in Italy and this country justifies a rate of more than 9 cents on citrate of lime as compared with 18 cents on citric acid. Any rate less than this figure gives an excess protection to converter of Italian citrate. We urge your support of 9-cent rate on citrate of lime in order to adequately protect American lemon growers as compared with American converters who manufacture citric acid from imported citrate of lime and to give measure of protection intended under 18-cent rate on acid.

E. G. DEZELL,
Chairman Tariff Committee California Citrus League.

So that, in the first instance, Mr. President, this may be said to be a matter of competition between America and Italy; and, in the second instance, the controversy is as between the producers of citrate of lime and the manufacturers of citric acid. We are asking for a just and proper ratio of 9 to 18—9 cents on citrate of lime, which is absolutely necessary, and 18 cents on citric acid, which has already been fixed.

The PRESIDING OFFICER (Mr. ODDIE in the chair). The time of the Senator from California has expired.

Mr. WALSH of Montana. Mr. President, when the paragraph relating to olive oil was under consideration I made bold to inquire of the colleague of the Senator who has just addressed the Senate as to what kind of answer I could make to the people of my State, the farmers of my State, if I voted for a duty of 60 cents a gallon on olive oil. I want to address a similar inquiry to the junior Senator from California in connection with the rate which he now advocates. The competitor of the domestic producer in this matter is Italy, and the purpose of the increased rate is to exclude to a certain extent importations from Italy, to be replaced by the product of California.

We have been struggling in the State of Montana for the last five years—happily the situation is much relieved this year—from a series of droughts, the like of which has never been known in our history, one year after another, so severe that the Congress of the United States has generously appropriated in successive years considerable sums of money to be loaned to the farmers of that State in order that they might buy seed to plant another crop.

In that situation of affairs, Mr. President, the scientists of the Agricultural Department experiment stations have been endeavoring to discover drought-resisting varieties of the various grains; and it has been discovered that durum wheat will endure droughts that no other variety of wheat will withstand, and our people have been encouraged accordingly to the cultivation of durum wheat instead of the ordinary varieties, and it has been planted in very considerable quantities.

Durum wheat is practically valueless for the manufacture of our form of bread. It is consumed in the manufacture of macaroni and vermicelli, and so on, a quality of food that our people do not consume in large quantities, but that, as is well known, is consumed in great quantities in Italy. So that Italy became the great market for the sale of durum wheat, and the farmers realized a very comfortable amount for the durum wheat which they planted and which they were able to produce notwithstanding the prevalence of the drought. The purchasing power of Italy, however, has collapsed, much as has that of all Europe, but that country has suffered particularly. As a consequence, durum wheat is a drug on the market, and fell during the last marketing season to 50 cents a bushel. It will remain there until the purchasing power of Italy is restored.

How am I going to vote for this duty, the purpose of which is further to place obstacles in the way of a resuscitation of industry in Italy? In other words, the Senator wants me to vote money out of the pockets of my people for the purpose of enriching his—his, blessed with a genial soil and a magnificent climate, a lovely place to live in. Our people go there and spend the winter, and they come back and try to make a living out of the soil of Montana; and the Senator wants me to vote a tax on those people in order to help out the growers of citrus fruits, who cultivate their crops on property worth from $1,000 to $10,000 an acre in the State of California.

Of course, citrate of lime is a small matter. Here is the duty on lemons, the duty on prunes, the duty on peaches—high, practically prohibitive duties upon everything that Italy exports, everything out of which she can possibly realize the money with which to buy our durum wheat; but I do not speak about durum wheat alone. We are in the same situation with respect to everything else. We export annually 250,000,000 bushels of wheat, almost one-third of the entire American production. That is turned back upon the American market by reason of the policy which is here advocated, and which has been so often evidenced, of imposing prohibitive duties upon the importation into this country of European products. The consequence is that the great bulk of that 250,000,000 bushels will be turned back upon the American market, depressing the price until I am keenly apprehensive, notwithstanding the way in which Providence has blessed us with an abundant crop this year, that the farmers in my State will still be in a state of destitution.

Mr. FRELINGHUYSEN. Mr. President, the Senator from California [Mr. SHORTRIDGE] stated that this was a New Jersey industry. It is not a New Jersey industry entirely; but there are several manufacturing companies, old-established concerns, that have been producing citric acid from citrate of lime for many years.

The rate of duty under the Payne law was 7 cents per pound on citric acid and citrate of lime was free. We placed a duty of 18 cents per pound on citric acid and 6 cents per pound on citrate of lime. We did it because the Tariff Commission said that any other differential increasing the rate of duty on the citrate of lime would maladjust the rates, and this is their report:

> The rates of duty between citrate of lime (7 cents per pound) and citric acid in paragraph 1 (12 cents per pound) are maladjusted. Citrate of lime is a raw material used for the manufacture of citric acid, 2 pounds of citrate of lime being required to produce 1 pound of citric acid; hence a duty of 7 cents per pound on citrate of lime is equivalent to 14 cents per pound on the citric-acid content, which is 2 cents greater than the duty provided for citric acid. Therefore manufacturers engaged in converting citrate of lime into citric acid are placed at a disadvantage of 2 cents per pound in purchasing their raw material, as compared with imported citric acid.

So the Senate committee reduced the rate of duty on citrate of lime to 6 cents per pound and placed a rate on citric acid of 18 cents per pound, 6 cents covering the difference in labor costs in making citric acid and 12 cents the duty on citrate of lime in the ratio of 2 pounds to 1, making the rate 18 cents per pound, the committee believing that to be a fair differential. If the rate of duty suggested by the Senator from California should prevail a duty of 24 cents a pound should be placed upon citric acid.

The industry has been referred to as a small one. It is quite considerable. Citrate of lime was imported to the extent of 2,961,000 pounds in 1918, 3,864,000 pounds in 1919, 12,490,000 pounds in 1920, and 754,000 pounds in nine months of 1921. The people of California hope to raise the lemons to make the citrate of lime from which the citric acid is produced, but they do not produce enough. The United States will be obliged to cease producing citric acid if this industry is cut out. Californians will only be able to supply perhaps one-quarter of the consumption, with a problematical increase to one-half of the consumption within five years, and the balance will be imported and supplied by the foreign makers, throwing out of employment American labor and taking away from them that part of the industry which they now enjoy.

The Senator from California asks for a rate that is prohibitive. I hope that his amendment will not prevail.

Mr. SIMMONS. Mr. President, I just can not understand these propositions. Under the present law citrate of lime is dutiable at 1 cent per pound. The Finance Committee reported and we adopted a rate of 6 cents per pound, six times the present rate. Now the Senator from California wants to double that rate.

Mr. SHORTRIDGE. Mr. President, not to double it. I asked for 9 cents a pound.

Mr. SIMMONS. Nine cents? I thought it was 12 cents.

Mr. SHORTRIDGE. Oh, no. If I may repeat, citric acid carries a duty of 18 cents per pound. The House bill, the Senator will observe, carries a rate of 7 cents per pound on citrate of lime. The committee reduced it to 6 cents. We are asking for 9 cents a pound.

Mr. SIMMONS. Mr. President, I do not pretend to understand all the facts with reference to this industry in California or upon the Atlantic seaboard; but I see from the Tariff Commission's statement that citrate of lime is produced in California from cull lemons but in amounts much below imports. That is to say, this particular product is made out of lemons that probably are not merchantable for other purposes. They are the waste of the orchards. That is to say, California, producing to the full capacity of the raw material which is grown in that State, and I assume only in that State on the Pacific coast, is unable to produce anything like the amount required for consumption in this country, and of necessity we are compelled to import a much larger amount of this product than is produced in the United States.

Of course, it is clear that under those circumstances, if a duty is placed upon that part of this article which is imported, the full amount of that duty will be added to the price charged the consumer for the domestic product. In other words, this is a tariff that will be effective not only upon the imports but upon the entire domestic production to the full extent of the duty. I have not the facts as to the consumption in this country, and I can not estimate how much the American people will have to pay as the result of this increase in duty, but it will be a very large sum. Over and above that, however, Mr. President, as I understand, this raw material is needed for the purpose of producing the finished product by manufacturers of that product located upon the Atlantic coast. If this duty is increased to 9 cents a pound the manufacturers of this product

upon the Atlantic coast will have to pay a duty of 9 cents a pound upon their raw material or go out of business. If they use the California product they will have to pay, in addition, the freight upon that product from the Pacific coast to the Atlantic coast.

I do not know, Mr. President, but I suppose the purpose of this proposition is to force the American consumers of this raw material in the manufacture of the finished product upon the Atlantic coast to buy their materials from California to the extent that California is able to supply that demand. It does not seem to me that that is good business. It does not seem to me that in the interest of cull lemons grown in one State in this Union we ought to impose an excessive duty upon a raw material manufactured 3,000 miles away from there.

It may be a small matter; I am speaking without very accurate information; but it looks to me as if it was a proposition of that character, and that is the kind of proposition which does not appeal to my conscience or to my intelligence, and I hope the increase will not be made.

Mr. SHORTRIDGE. Mr. President, in order that there may be no misunderstanding as to the matter before the Senate, I understand the question to be that the Senate concur in the amendment made as in Committee of the Whole. My amendment proposes to raise the rate from 6 to 9 cents.

The PRESIDING OFFICER (Mr. ODDIE in the chair). The Secretary will state the amendment.

The ASSISTANT SECRETARY. The Senator from California moves to strike out "6," the rate adopted in Committee of the Whole, and in lieu to insert "9," so that it will read:

Lime, citrate of, 9 cents per pound.

Mr. SHORTRIDGE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The Secretary will call the roll.

The roll was called, and the following Senators answered to their names:

Ashurst	France	McLean	Sheppard
Ball	Frelinghuysen	McNary	Shields
Brandegee	Glass	New	Shortridge
Broussard	Gooding	Newberry	Simmons
Bursum	Hale	Nicholson	Smith
Calder	Harreld	Norbeck	Smoot
Cameron	Heflin	Oddie	Stanfield
Capper	Hitchcock	Overman	Stanley
Colt	Jones, N. Mex.	Pepper	Sterling
Culberson	Jones, Wash.	Phipps	Sutherland
Curtis	Kellogg	Pomerene	Swanson
Dial	Kendrick	Ransdell	Trammell
Dillingham	Keyes	Rawson	Underwood
Edge	Lodge	Reed, Mo.	Walsh, Mass.
Ernst	McCormick	Reed, Pa.	Walsh, Mont.
Fletcher	McKellar	Robinson	

The PRESIDING OFFICER. Sixty-three Senators having answered to their names, a quorum is present. The question is on agreeing to the amendment of the Senator from California to the amendment made as in Committee of the Whole.

Mr. CALDER. May the amendment be stated again, Mr. President?

The ASSISTANT SECRETARY. In paragraph 46, page 20, line 16, the Senate in Committee of the Whole changed the rate on citrate of lime from 7 cents to 6 cents per pound. The Senator from California moves to strike out "6" and to insert "9," so that if amended it will read:

Lime, citrate of, 9 cents per pound.

Mr. SHORTRIDGE. I ask for the yeas and nays on agreeing to the amendment to the amendment.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. HARRISON (when his name was called). I have a pair with the Senator from West Virginia [Mr. ELKINS], which I transfer to the Senator from Montana [Mr. MYERS] and vote "nay."

Mr. POMERENE (when his name was called). Again announcing my pair with my colleague [Mr. WILLIS], I transfer that pair to the senior Senator from Nevada [Mr. PITTMAN] and vote "nay."

The roll call having been concluded, the result was announced—yeas 13, nays 46, as follows:

YEAS—13.

Ball	Capper	Nicholson	Warren
Broussard	Gooding	Oddie	
Bursum	Jones, Wash.	Shortridge	
Cameron	McNary	Stanfield	

NAYS—46.

Borah	Dial	Frelinghuysen	Kendrick
Brandegee	Dillingham	Glass	Keyes
Calder	Edge	Hale	Lenroot
Colt	Ernst	Harrison	McCumber
Culberson	Fletcher	Hitchcock	McKellar
Curtis	France	Kellogg	Moses
New	Pomerene	Simmons	Trammell
Newberry	Rawson	Smith	Underwood
Norbeck	Reed, Mo.	Smoot	Walsh, Mass.
Overman	Reed, Pa.	Stanley	Walsh, Mont.
Pepper	Sheppard	Sterling	
Phipps	Shields	Swanson	

NOT VOTING—37.

Ashurst	Johnson	Nelson	Townsend
Caraway	Jones, N. Mex.	Norris	Wadsworth
Cummins	King	Owen	Watson, Ga.
du Pont	Ladd	Page	Watson, Ind.
Elkins	La Follette	Pittman	Weller
Fernald	Lodge	Poindexter	Williams
Gerry	McCormick	Ransdell	Willis
Harreld	McKinley	Robinson	
Harris	McLean	Spencer	
Heflin	Myers	Sutherland	

So Mr. SHORTRIDGE'S amendment to the amendment made in the Committee of the Whole was rejected.

The PRESIDING OFFICER. The question now is on concurring in the amendment made in Committee of the Whole.

The amendment was concurred in.

The PRESIDING OFFICER. The Secretary will state the next amendment reserved for a separate vote.

The ASSISTANT SECRETARY. Paragraph 50a, vegetable oils, page 22, was reserved by the Senator from Idaho [Mr. GOODING].

Mr. GOODING. I offer the amendment which I send to the desk.

The PRESIDING OFFICER. The Seretary will state the amendment to the amendment.

The ASSISTANT SECRETARY. In paragraph 50a, page 22, on line 6, the Senator from Idaho proposes to strike out all of the matter after the word "pound" down to and including the word "reason" in line 19, or the proviso, being the remainder of the paragraph.

Mr. GOODING. I ask that the Secretary read the proviso proposed to be stricken out.

The PRESIDING OFFICER. The Secretary will read as requested.

The ASSISTANT SECRETARY. It is proposed to strike out the proviso in the following words:

Provided, That such oils may be imported under bond in an amount to be fixed by the Secretary of the Treasury and under such regulations as he shall prescribe; and if within three years from the date of importation or withdrawal from bonded warehouse satisfactory proof is furnished that the oil has been used in the manufacture of articles unfit for food, the duties shall be remitted: *Provided further*, That if any such oil imported under bond as above prescribed is used in the manufacture of articles fit for food there shall be levied, collected, and paid on any oil so used in violation of the bond, in addition to the regular duties provided by this paragraph, 3 cents per pound, which shall not be remitted or refunded on exportation of the articles or for any other reason.

Mr. GOODING. Mr. President, I am quite sure if there had been time to consider this important schedule, important to agriculture, at the time it was before the committee, this proviso giving to the soap manufacturers of the country free vegetable oil would not have been found in the bill. I am rather inclined to think possibly that the great dairy interests are somewhat to blame as they were under the impression that they would be protected by edible oil bearing a reasonable protective duty. But upon investigation it is easy to understand that the dairy interests and no other interests in the country which furnish the edible oils would be protected unless this proviso were stricken out.

Of course the soap manufacturers, as a business proposition, would of necessity buy the cheapest vegetable oils they could find in the world. The price of vegetable oils in Manchuria, in Japan, in China, plus the freight, would be the price of vegetable oils in this country because it is understood by those who are familiar with the use of vegetable oils that there can be an interchange of practically all vegetable oils in their use for nonedible purposes.

To show how the great agricultural interests in the country, the dairy interests of the country, and the fish-oil interests of the country are vitally affected, I send to the desk and ask to have read a resolution and the names of those who have signed it. Many of these national bodies were represented by the heads of the organization, who have been in the city for the last week, and many Senators have had the matter presented to them.

The PRESIDING OFFICER. The Secretary will read as requested.

The reading clerk read as follows:

Resolution—Vegetable oils.

To the Congress of the United States:

We, the undersigned representatives of farm organizations comprising the producers of vegetable, animal, and fish oils and other fats, respectfully petition your honorable body to eliminate from paragraph 50a of the permanent tariff bill of 1922 the proviso which would remit to manufacturers or users of imported vegetable oils the imposed tariff rates when such oils have been shown to have been used in the manufacture of nonedible commodities. This provision would absolutely

destroy whatever benefit was intended to be granted to domestic producers of oils and fats, would reduce present revenues, and in a large measure would destroy the protection already given the dairy industry in the dairy schedules of the bill.

Respectfully submitted.

J. J. BROWN,
Commissioner of Agriculture, Georgia.
H. L. KENT,
President State College of Agriculture, New Mexico.

WASHINGTON, D. C., *August 14, 1922.*

Mr. GOODING. I ask to have printed as a part of my remarks a letter received from J. A. Arnold transmitting the names of 381 southern newspapers which have indorsed the duty on vegetable oils and other southern agricultural farm products. Three hundred and seventeen of the newspapers are in Texas, 17 in Georgia, 32 in Arkansas, 3 in Louisiana, 5 in Missouri, and 1 in North Carolina. It gives the names of the papers and the names of the editors and their addresses.

The PRESIDING OFFICER. Without objection, it is so ordered.

The matter referred to is as follows:

SOUTHERN TARIFF ASSOCIATION (NONPARTISAN),
Washington, D. C., August 16, 1922.

Senator F. R. GOODING,
Washington, D. C.

DEAR SENATOR GOODING: We inclose resolution favoring a duty on vegetable oils and other southern products, signed by 381 newspapers in the South.

In Texas 81 per cent of the newspapers have joined with the producers in demanding a duty on southern products. In other States we have just begun to canvass, but sufficient progress has been made to justify the estimate that 90 per cent of the rural press of the entire South is favorable to the resolution.

Yours truly, J. A. ARNOLD, *Manager.*

Resolution favoring a tariff.

We favor a tariff on vegetable oils, peanuts, live stock, meats, hides, wool, grain, poultry, dairy products, and all agricultural, pastoral, and mineral products and urge our Senators and Congressmen to support a national tariff policy that will preserve American industries against destructive foreign competition.

We must have a duty on these products that will equalize the cost of production in our section with that of similar products of foreign countries.

We indorse the schedule demanded by the various organizations authorized to represent these industries as submitted by the Southern Tariff Association to the Senate tariff bloc.

We favor American valuation as a basis of levying ad valorem duties.

Mr. GOODING. I think one of the arguments that had some weight in the Senate when vegetable oils were under consideration was the charge or the claim that was made that it would dam up the fats in the country and deprive the American manufacturer of soap or of vegetable oils a market in Europe. I want to read the exports——

The PRESIDING OFFICER. The Senator's time has expired.

Mr. GOODING. I ask to have printed in connection with my remarks the statement giving the exports, and so forth.

The PRESIDING OFFICER. Without objection, it is so ordered.

The matter referred to is as follows:

COCONUT OIL.

Rate in emergency tariff, 20 cents per gallon.
Value per pound, based on import valuation, 1921, 10 cents per pound.
Rate in Senate bill, 4 cents per pound.
Computed ad valorem, based on import value, 40 per cent.

COTTONSEED OIL.

Rate in emergency tariff, 20 cents per gallon.
Value per pound, based on import valuation, 1921, 9 cents per pound.
Rate in Senate bill, 3 cents per pound.
Computed ad valorem, based on import value, 33⅓ per cent.

SOYA-BEAN OIL.

Rate in emergency tariff, free.
Rate in Senate bill, 3 cents per pound.
Value per pound, based on import valuation, 1921, 4 cents per pound.
Computed ad valorem, 75 per cent.

PEANUT OIL.

Rate in Senate bill, 4 cents per pound.
Value per pound, based on import valuation, 10 cents per pound.
Computed ad valorem, 40 per cent.

Exports of principal oils and fats.

(In millions of pounds.)

If the provision exempting from tariff duties such imported vegetable oils as are used in the manufacture of soap and other inedible products is enacted into law, the entire vegetable-oil tariff program will be nullified and no protective benefit will accrue to the American farmer nor will there be any revenue derived by the Federal Government. The extensive interchangeability of the different oils and fats affords an easy means of completely avoiding the rates that now are contemplated for the protection of domestic edible oils and fats.

Soya beans, peanut and cotton oils are all usable to advantage in the manufacture of lard substitutes, cooking oils, margarines, and soap, and it would be entirely practicable to divert the incoming soya-bean oil entirely to technical uses, which would take from the domestic producer his market in the soap and other nonedible industries and throw on the edible market the entire domestic production of oils and fats.

While coconut oil can not be used to advantage in the manufacture of lard substitutes, it is the best oil for margarines, filled milk, and soap, and if used in the soap industry it also will replace large quantities of home-grown oils.

It is the same with the other oils, and for economic purposes the imported and domestic oils can be considered in the aggregate.

A great deal is said to the effect that certain foreign oils are not competitive with our domestic agriculture, but such claims are fallacious, as every importation of vegetable oils in some way competes with our domestic dairy, cotton, corn, hog, peanut, flaxseed, soya-bean, and fish oil industry.

One of the arguments used by the advocates of free trade in vegetable oils is that tariff duties will divert foreign oils directly to Europe and this country, therefore, will lose such foreign trade. However, it must be recalled that such of the fats and oils produced in the Orient and South Sea Islands as were needed in Europe actually went directly there before the war. The shifting of such shipments from this country is merely a restoration of the former trade movements following the opening up of the old trade routes and channels. Considering the matter from a world angle, it seems reasonable that Europe can get directly its oils and fats cheaper than by permitting them to pass through this country and to be increased in value by our high transportation, handling, and manufacturing costs.

It also is argued that the emergency tariff has caused the falling off of our cotton-oil exports, whereas 1921 showed the largest cotton-oil exports for the last six years and also showed by far the largest lard exports in history. Had it not been that lard was relatively cheaper than cotton oil there is no question that the cotton-oil exports would have been vastly greater. During 1921 the excess of exports over imports of the principal oils and fats was $79,000,000 pounds, also the largest in history.

There is no doubt that the emergency tariff had a marked influence in the increased price scale for oils and fats in this country. This fact is recognized by the Tariff Commission in its recent report. Other factors, of course, were involved, such as a short cotton crop and a large foreign demand for lard and oils, but without the emergency tariff there is no doubt that agriculture would have been in a far worse position and would have required a much longer time for recovery. The dairy, hog, and corn industries were greatly aided through the effect of this measure on the oil market.

These foreign oils are produced and prepared for market by the cheap labor of the Orient and the South Sea Islands. With lowered water and rail transportation rates, with the correction of the present wasteful practices of handling and marketing and with improved transportation and marketing facilities, there seems to be a certainty that these oils can be delivered in future to our consuming centers at much lower prices than have been possible in the past. Economies can be, and with the development of the industry will be, effected that will largely offset the duties on oils, and if such duties do not become fully effective such economies will increase the great competition that existed prior to the emergency tariff.

Mr. EDGE. Mr. President, I am rather surprised that this eleventh-hour attempt to circumvent the final action of the Finance Committee in this matter should be made.

Mr. McCORMICK. Mr. President——

Mr. EDGE. I want to make clear in my few moments——

The PRESIDING OFFICER. Does the Senator from New Jersey yield to the Senator from Illinois?

Mr. EDGE. I have only 10 minutes.

Mr. McCORMICK. I merely wished to ask the Senator if he meant to use the term "circumvent." Certainly we are free to offer amendments.

Mr. EDGE. I will withdraw the term. Perhaps the word was not well chosen.

I am afraid Senators may be confused as to the intent of the amendment prepared by the Finance Committee. The amendment simply provides that upon the taking out of bonds importations of vegetable oil to be used for the production of nonedible commodities may be received duty free, but not for the production of any commodities that can be used for food purposes but solely and alone for industrial purposes.

I can not understand why the dairymen or the farmers or any other class of citizens should be particularly interested in trying to keep out of the country that lower class of vegetable oils which everyone understands are used in the production of industrial products—soap and other things. They do not use the same type of vegetable oils that are generally produced in this country for edible purposes, and it is absolutely essential that industrial concerns import from various parts of the Orient in order to meet the competition necessary in the production of soap and other commodities for export and domestic purposes.

The Senate has given the dairymen the highest duties they have ever had on milk and cream and eggs, and it does seem to me for the dairymen to be worried about an industrial production which is in no way in competition, so far as I can follow the arguments, with their products, is going a step beyond reason.

Let me read a resolution which referred to this subject and which was subscribed to by the secretary of the National Dairy Union, as follows:

> We also recognize the importance of these oils in the industries and arts, and would suggest that importers and refiners be allowed a suitable rebate on all such oils that are denatured and used for any purpose other than human food.

The secretary of the National Dairy Union subscribed to that resolution passed at a meeting of dairymen. It would seem to me that the secretary of the Dairy Union was thoroughly familiar with what he was doing at that time. When the Finance Committee considered the entire subject they arrived at the very businesslike conclusion that if the imported vegetable oils were to be used alone for industrial purposes, then there would be no reason for the imposition of a duty, thus raising the price of the product.

Mr. McCORMICK. Mr. President——

Mr. EDGE. I will yield in just a moment. Again the Senator from Idaho [Mr. GOODING] has referred to exportations. The exportation of food products produced by vegetable oils mainly produced in this country are very large, indeed. Out of a total of something like 3,600,000,000 pounds of various edible products 1,396,000,000 pounds have been exported—over one-third, in other words, produced in this country and exported. That, it seems to me, is proof conclusive of the greatness of the industry and the continued use of products raised by farmers, so far as the higher grade vegetable oils that are raised in this country are concerned.

The Senator from Idaho referred to the fish-oil industry. Out of a total of 509,705 pounds of various oil products consumed in this country I am informed there was a total of less than 13,000 pounds of fish oil. Compare 13,000 pounds of fish oil, half of it produced along our coast and the other half imported, with 509,000 pounds of other types of oil. It does not seem to me it is an industry that should be greatly affected, anyhow.

Mr. McCORMICK. Mr. President, before the Senator takes his seat will he tell the Senate the tariff on soap as proposed to-day?

Mr. EDGE. I can not tell the Senator offhand; but let me say to the Senator from Illinois that so far as the soap manufacturers are concerned I think the evidence before the Finance Committee will bear me out that they do not care whether there is any tariff on soap or not. It was put on mainly for revenue purposes. They have never asked for a tariff on soap, according to my understanding.

Mr. GOODING. Does the Senator object to having a little tariff on vegetable oils for revenue purposes?

Mr. EDGE. I was answering the question of the Senator from Illinois as to the tariff on soap, a finished product, not a raw material.

Mr. McCORMICK. Mr. President, if the tariff on soap be levied for revenue purposes and be unnecessary for the protection of the soap industry, then, with the advantage accruing to the soap industry by reason of the revenue tariff, that industry will not suffer from the tariff on oils. The Senator from New Jersey, who is unusually well informed, will remember that it is in the high-priced soap that these oils are used. Am I not right as to that?

Mr. EDGE. I am informed that a very small proportion of the higher grade of oil is used.

Mr. McCORMICK. The low-grade soaps are made in part of tankage and similar material, rather than of the more valuable vegetable oils. Perhaps the Senator from New Jersey can give us the names of the officers of the dairy union and tell us where their offices are located.

Mr. FRELINGHUYSEN. Mr. President, I know the Senator from Illinois does not wish to have a false and misleading impression go in the RECORD. He spoke of tankage being used in the low-grade soaps. There is not enough tankage produced in this country to manufacture one one-hundredth part of the low-grade laundry soap which is manufactured in this country.

Mr. GOODING. Mr. President——

The PRESIDING OFFICER. Does the Senator from Illinois yield to the Senator from Idaho?

Mr. McCORMICK. I yield to the Senator.

Mr. GOODING. I will say to the Senator from Illinois that no vegetable oils go into the manufacture of laundry soap. That soap is made out of the cheaper fats. Vegetable oils are only used in the making of high-priced soaps, on which there is a 50 per cent ad valorem.

Mr. EDGE. Mr. President, the Senator from Illinois [Mr. McCORMICK] asked me for my authority for the resolution which I read. I now desire to state that the resolution was adopted by the representatives of the dairy association which was assembled at Buffalo, N. Y., and is signed and approved by the secretary of the National Dairy Union.

Mr. GOODING. Who are the officers?

Mr. EDGE. A. M. Loomis is the secretary and Milo D. Campbell is the chairman.

Mr. McCORMICK. Here is an amazing thing. The names of Mr. Loomis and Mr. Morley for the National Dairy Union are signed to a resolution to the contrary.

Mr. EDGE. Yes; that is exactly what this circular letter marvels at—why the change of position.

Mr. McCORMICK. What did the Senator say?

Mr. EDGE. That is exactly what this circular letter marvels at—why the change of position from the meeting of the delegates in Buffalo and a later meeting in Washington.

Mr. McCORMICK. It may marvel, but a man in the light of new information may change his mind. That has been known to take place even on the floor of the Senate.

Mr. EDGE. Perhaps the information was misinformation.

Mr. McCORMICK. Even Senators are guided by misinformation at intervals.

Mr. GOODING. Mr. President, will the Senator yield to me for a moment?

Mr. McCORMICK. My time is growing short.

Mr. GOODING. I wish to say that Mr. Loomis has been here in the District Committee room for two days of this week. Several Senators have met him; they have heard him plead for a duty on vegetable oils; so there can not be any question about the position of Mr. Loomis at the present time, and of the position of the organization which he represents.

Mr. LODGE. Mr. President——

Mr. McCORMICK. If the Senator from Massachusetts desires to interrupt me, I yield.

Mr. LODGE. I do not wish to take up any of the Senator's time, and I shall take but a moment. The Senator from New Jersey, greatly to my surprise, referred to the total production of fish oil, as I understood him, as being 13,000,000 pounds. I do not know who gave him that information.

Mr. EDGE. The figures in this table are the only authentic figures which may be obtained. Let me say, they are taken from Bulletin 769 of the United States Department of Agriculture and are for the year 1917, the last year for which the statistics are available.

Mr. LODGE. There are later statistics quoted in the Tariff Summary. In 1920 menhaden oil alone was produced to the extent of 27,000,000 pounds. There was also herring oil, the production of which amounted to 2,852,000 pounds, and whale oil, of which 23,000,000 pounds were produced. The production of menhaden oil alone, as I have stated, amounted in 1920 to 27,000,000 pounds, and 21,000,000 pounds represent the production for nine months in 1921.

Mr. McCORMICK. Mr. President, I think I know something of the names which are attached to this memorial and the associations which are parties to it. In a small way, I have something to do with the dairy industry but in a fashion which is in no wise affected by the pending bill. The ordinary dairyman, the producer of commercial milk, so called, has been in dire distress, as every informed man knows, for the last year or year and a half, in the State of the Senator from New Jersey, in New York, and wherever there has been a great dairy industry. No wonder they protest, and protest vehemently, that if a tariff for revenue, forsooth, is to be imposed on soap, the manufacturers of soap enjoying that protection may very well bear the protection demanded by the dairymen.

Mr. FRELINGHUYSEN. Mr. President, before the Senator takes his seat will he answer one question?

Mr. McCORMICK. I yield to the Senator.

Mr. FRELINGHUYSEN. How is the tariff on vegetable oils going to affect the dairyman? I should like to have the Senator answer that question.

Mr. McCORMICK. Oh, the Senator knows very well that edible oils and the fats derived from milk enter into competition with one another.

Mr. FRELINGHUYSEN. What does the Senator consider edible oils? Is soya-bean oil edible? I am asking the Senator a question.

Mr. McCORMICK. Is the soya bean not used for forage purposes?

Mr. FRELINGHUYSEN. The soya bean is not edible. Soya-bean oil is used for forage purposes.

Mr. FRELINGHUYSEN. Mr. President——

Mr. McCUMBER. Mr. President, I wish to speak for a few moments.

Mr. FRELINGHUYSEN. I yield to the Senator from North Dakota.

Mr. McCUMBER. I merely desire to state briefly the conditions and the considerations which actuated the committee in fixing these rates. This was a matter in which intense interest was evidenced on the part of the dairymen who desired a duty and on behalf of the producers of soap, paints, and so forth, who desire to bring in the raw product free. The dairymen at the time the question was first presented to the Senate Finance Committee made the contention as the basis of their argument that vegetable oils came in and were used for edible purposes mixed with milk, or took the place of milk or butter or cream. I might say that practically all their objections to the free vegetable oils were based upon that assumption.

Mr. President, we sought to reach a conclusion that would meet the demands at that time of the dairy people and at the same time allow the products to come in free for those who use them for nonedible purposes. Therefore, of all the vegetable oils which come into this country we relieved from duty only four of them, and we relieved those from duty only upon condition that they should not be used for any edible purpose. What were those four? First, coconut oil. We ascertained that there are consumed in the United States 168,602,000 pounds of coconut oil. That oil can be used for edible purposes in making coconut butter, and so forth, and it is a serious competitor of good dairy butter. But how can we meet that situation? There is just one way to meet it, and that is to get rid of the Philippine Islands, because 90 per cent of all of our importations of that product comes in from the Philippine Islands, and therefore no duty would affect that which is imported from those islands, as we have no right to impose a duty upon them.

Next comes cottonseed oil. There are produced and consumed in the United States 126,390,000 pounds of cottonseed oil. Where is that produced? It is all produced in the United States, only $25 worth being imported in the year ending June 30, 1922. Therefore, as to product, so far as the dairyman's interest is concerned, it does not make any difference whether we put a duty on it or whether we do not, because it is all produced in the United States, and to the extent that cottonseed oil may conflict with the dairy interests we are without any remedy whatever.

Mr. GOODING. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from Idaho?

Mr. McCUMBER. I yield.

Mr. GOODING. The Senator understands, does he not, that soya-bean oil can be used interchangeably with any of the other vegetable oils?

Mr. McCUMBER. If the Senator will allow me, I will take that up in a moment. I stated a moment ago there were four of the important vegetable oils which have been relieved from duty. I have shown that the two most important ones perhaps, namely, coconut oil and cottonseed oil, are beyond any remedy that could be provided by a tariff, because they are produced at home or in the Philippine Islands.

I next refer to peanut oil. The quantity of peanut oil consumed in the United States amounts to 15,126,000 pounds annually, and in the year ending June 30, 1922, there were imported but $322,000 worth. Peanut oil can be used to the extent that it may be imported in edible products. It may be used in making some kinds of imitation butter, and, to the extent that it is so used, of course it came in conflict with the dairy product.

Mr. GOODING. Mr. President——

Mr. McCUMBER. I yield to the Senator from Idaho.

Mr. GOODING. The point to which I wish to call the attention of the Senator is that the great importation of soya-bean oil into this country will control the price of all the other oils. Of course, the soap people will draw their supply from Manchuria and from China and Japan. They will buy all that character of oil they can and will then fix the price of the other oils here in America.

Mr. McCUMBER. I agree with the Senator that if there is added to the quantity of such oil even one-tenth of 1 per cent it may have some influence on the price of vegetable oils, but I want to be fair, and so I will say I think the influence of that much oil brought into the United States would be infinitesimal in the matter of fixing prices. I do not know what proportion could be used for edible purposes.

Take the next item, soya-bean oil, is a very important factor, because we import annually into the United States 124,000,000 pounds of it, but I do not understand that that can be used for edible purposes at all.

Mr. GOODING. The soya bean?

Mr. McCUMBER. The soya-bean oil. I do not understand that, so far at least, it has been used for edible purposes; but whether it can be so used or not, this bill as amended provides that none of it may be used for edible purposes unless it pays the duty. So we get down finally, Mr. President, to the mere matter of displacement, because that is really what is involved in the question.

To what extent do these oils displace the American oils and fats? Because if the soap makers and other industries can not obtain the foreign oils it will compel them, of course, to use the American product. As the Senator from Idaho [Mr. GOODING] has often stated, we are producing more of the American product than we consume in the United States; and his argument is—and there is some force in that argument—that to that extent it would have an influence upon the price of all American oils and fat products that otherwise would go into soap.

I am simply presenting both sides of the proposition as fairly as I can, so that Senators may balance the one as against the other in arriving at a conclusion.

Mr. GOODING. Mr. President, I want to say to the Senator that in 1917—these are the latest figures I was able to get—425,000,000 pounds of vegetable oils were used in the manufacture of soap. It is such a tremendous quantity that it will absolutely control the prices of all vegetable oils in America, and that is the reason why we have had a campaign or a propaganda on here for 18 months by the soap people, in which they have sent out——

The PRESIDENT pro tempore. The time of the Senator from North Dakota has expired.

Mr. FRELINGHUYSEN. Mr. President, as I understand this situation, the Senator from Idaho [Mr. GOODING] has made a motion to strike out what is known as the bonding provision—a provision that provides that vegetable oils imported for nonedible purposes shall be imported in bond, and the tariff rate imposed in this act shall be remitted; that where those oils go into edible products there shall be a duty on coconut oil of 4 cents per pound, which is 50 per cent ad valorem; on cottonseed oil of 3 cents per pound, which is 50 per cent ad valorem; on peanut oil of 4 cents per pound, which is 70 per cent ad valorem; and on soya-bean oil 3 cents per pound, which is 60 per cent ad valorem.

A good deal of misinformation about vegetable oil has been given on this floor to-day. It has been stated that in common soap there is no coconut or soya-bean oil or offgrade cottonseed oil. Practically the prime ingredients of the common laundry and white soap are cottonseed, soya-bean, and coconut oils. There is a duty of 5 per cent on the cheaper grades of soap, but as far as the soap makers are concerned they do not care for that duty. You can take it off.

Mr. GOODING. Mr. President——

Mr. FRELINGHUYSEN. Mr. President, I refuse to yield until I finish my remarks. Then I will yield to a question from the Senator from Idaho.

On the finer toilet soaps there is a duty of 50 per cent, which is purely a revenue duty, placed there because they are luxuries. There are soaps imported that cost $1 and $2 a cake, and there is absolutely no competition whatever in regard to those importations; but the result of this duty is this: The dairymen of the country think that this is going to benefit them. It will not benefit them at all. The prejudice that they entertain is against the coconut oil which goes into filled milk, and they can not relieve it by this duty, because millions of pounds are imported from the Philippines free and will be no matter what duty is imposed in this bill. Ninety per cent of all of the vegetable oils imported are used in the soap-making industry. Not one pound of those oils—coconut and soya-bean—is produced in this country, and of the soya-bean oil—and it ran last year into imports of 112,000,000 pounds—only 350,000 pounds were used remotely in edible products. If you put on this high duty, however, you do one of two things: You lay a tax of $25,000,000, approximately, on an industry in this country unnecessarily, because we are not making a pound of these oils here, or else you create an embargo and back up those oils in continental Europe, where they are used for edible purposes, and therefore throw back on this country the immense amount of cottonseed oil we have in surplus and the billion pounds of hog-lard products that we have as a surplus, for which an outlet is needed.

Mr. President, I would not say a word if we were going to encourage an infant industry in this country. I would not say a word if it could be remotely shown from any of the hearings or any of the testimony that these oils could be produced here; but the farmer who needs an outlet for his surplus food products, his fats, and his cottonseed oil is going to suffer much more by this tax than he realizes.

Mr. GOODING. Mr. President——

Mr. FRELINGHUYSEN. If you impose it, it means that you are going to destroy your export market needlessly. I think that this duty, imposed without the bonding provisions for the remission of taxes to the industry using this product commercially, is unnecessary, unwise, and vicious taxation.

Mr. GOODING. Mr. President, will the Senator yield for a question?

Mr. FRELINGHUYSEN. I yield.

Mr. GOODING. I ask the Senator if he knows anything about the price of what are called the lower fats to-day?

Mr. FRELINGHUYSEN. I know nothing about the price of the lower fats. It has nothing to do with this matter.

Mr. GOODING. The Senator made the statement that these vegetable oils went into laundry soaps and the lower-grade soaps. I want to read, for his information, the price of cottonseed oil. Its price is from 11 to 11¼ cents a pound. The price of coconut oil is 8½ to 8¾ cents a pound. The price of soya-bean oil is 11¼ cents a pound. The price of peanut oil is 12 to 12½ cents a pound. You can buy laundry soap for less than 12 cents a pound, and yet the Senator would have the Senate believe that these valuable oils are going into laundry soaps and the cheaper soaps.

Mr. RANSDELL. Mr. President, the Senator from New Jersey [Mr. FRELINGHUYSEN], who has just taken his seat, and his colleague, the junior Senator from New Jersey [Mr. EDGE], I notice, have been very strongly in favor of protective duties on many commodities of manufacture. I do not criticize them; I applaud them. I have tried to do the best I could for everything from my part of the country, and I glory in a Senator who does that; but at the same time, where a Senator does that, he ought to have a little generosity, it seems to me, in carrying out the same policy toward other industries, whether they be agriculture or manufacture.

The amendment we are considering is designed to protect agriculture; and I say to you, sir, that it is to protect the soya-bean industry of this country, which is a very important one, as I shall show. It is also necessary to protect our cottonseed-oil and peanut-oil industries, both of which are very important. Then there is another great industry which has not been mentioned in this debate—not of the farm—the menhaden fish-oil industry. I heard some gentlemen yesterday, testifying before a committee of Senators, say that there was about $50,000,000 invested in that industry. It is a very promising one. It extends on the Atlantic coast from Maine around to the western coast of Texas. It is growing rapidly and produces a large quantity of fish oil and fertilizer material. These Senators, of whom I was one, were assured that if this provision is allowed to stay in the bill and soya-bean oil is brought in absolutely free from Manchuria for nonedible purposes—for that is what it means—it will completely destroy this great fish-oil industry.

I said, sir, that soya beans are a product of this country, a very important agricultural product of this country.

Mr. REED of Missouri. Mr. President——

Mr. RANSDELL. I can not yield for the moment. I have only 10 minutes, and I can not get into a debate on this subject. I want to talk for my 10 minutes.

Permit me to read to the Senate a very brief dispatch from this city which appeared in the New Orleans Times-Picayune of the 16th instant. It reads thus:

WASHINGTON, Aug. 15.—The soy bean rapidly is taking a place as a major crop in the farming systems of the Corn Belt, replacing oats to a considerable extent and taking part of the corn acreage, says the Department of Agriculture. Although primarily used for forage, pasture, and ensilage, the growing of seed during the last few years has become a very profitable industry. The production of seed has increased to the point where the supply greatly exceeds the demand for planting.

Listen to this, Senators:

Two mills in Illinois have planned to use about 750,000 bushels this season, it has been reported to the department, while other mills are planning on a smaller scale to extract meal and oil.

Soy-bean oil is used in the manufacture of soaps and paints, and also used in the manufacture of lard and butter substitutes, rubber substitutes, linoleum and printing ink, and as a salad oil. The cake or meal is a superior cattle feed and of high value for human consumption.

That is in the Corn Belt, Mr. President. I wish to say to Senators from the cotton States that in my judgment soya beans present the most promising crop of which I have any knowledge under boll-weevil conditions. I have had a little experience myself with soya beans. I have investigated the industry pretty thoroughly. I know full well that an ordinarily good farmer can cultivate 40 to 50 acres of land in soya beans. He can not cultivate more than 10 or 20 acres in cotton and gather it. Soya beans can be cultivated entirely by improved implements, without ever getting off the plow that prepares the land, the improved machine that plants the seed, the cultivator that cultivates it, the machine that gathers the ripe beans. It can all be done by machinery. It is a wonderfully promising industry in the Cotton Belt.

One of the things that troubles us most in the Cotton Belt under boll-weevil conditions is the extremely high price of fertilizer. The soya bean carries a great quantity of nitrogen into the ground. It is almost as good a nitrogen bearer as cowpeas.

When you gather the soya beans themselves—from 20 to 35 bushels per acre—you harvest them by machinery and leave the stalks standing. Those stalks, with the leaves, the branches, and the main stems, contain a considerable quantity of nitrogen and potential humus. That nitrogen can then be turned into the ground with the stalks, thereby enriching the soil and giving a good return to the farmer. It is my honest opinion that not only will soya beans assist materially to build up the cotton industry in the South, but they will furnish an excellent means of diversifying the crops of the South, with great benefit to the Nation.

Mr. FRELINGHUYSEN. Mr. President——

Mr. RANSDELL. I can not yield. I have only 10 minutes, and that is about exhausted.

I think that we ought to adopt this amendment, because if we do not we will seriously check the development of the soya bean as a great agricultural crop which can be grown successfully throughout the Union. We will injure the cottonseed industry and do great harm to the peanuts. If we can believe the testimony of the gentlemen engaged in the menhaden fish-oil industry, that promising business will be completely destroyed, for they say it is a low-grade oil, suitable mainly for nonedible purposes, such as soaps and things of that kind, and that it can not possibly compete with free soya-bean oil from Manchuria.

This bill is a protective-tariff measure and, in my judgment, we should by all means carry out the same degree of protection to the agricultural interests of the Nation that we give to the manufacturing interests.

Mr. ASHURST. Mr. President, in my time, I ask unanimous consent that the Secretary read the following letter at the desk. It is from the Piatt County Farm Bureau, addressed to the Senator from Idaho [Mr. GOODING].

The PRESIDENT pro tempore. The Secretary will read as requested.

The Assistant Secretary read as follows:

THE PIATT COUNTY FARM BUREAU,
Monticello, Ill., July 28, 1922.

Senator FRANK R. GOODING,
Washington, D. C.

DEAR SIR: Piatt County, Ill., is a small county in the east central part of the State, with about 1,300 farmers. The farmers of this county are appreciative of the work which you have done in attempting to establish a duty on soy bean and allied vegetable oils in the new tariff. It is rather strange to us that when the bill was voted upon in the Senate of all the Corn Belt Senators there was only one who voted in favor of this duty. I write you to let you know we appreciate and approve your action.

As you know, the soy bean is being raised in increased acreages in Illinois and other Corn Belt States. The increase in acreage of soy beans in our county this year is probably from 1,000 to 1,500 per cent over last year. In addition the farmers here have become so interested that they have organized a cooperative company to establish a plant to crush soy beans.

We need this new crop, because corn and oats are becoming more and more unprofitable to the Corn Belt farmer. The vegetable oil offers a ready substitute. With a fair protection, the soy bean will be a profitable crop to Illinois farmers, and the mills crushing beans can do so at a profit to themselves and to the farmer. However, if there is no duty established, soy beans will barely pay us the cost of production and the mills will go broke.

Does there yet remain anything which might be done to obtain this tariff? We are hoping that such is the case.

Very respectfully yours,

J. W. WATSON,
Farm Adviser, Piatt County Farm Bureau.

Mr. HARRELD. Mr. President, I confess that when this proposition was first advanced to amend this schedule providing for the remission of the duty on imported vegetable oils not used in edible products I was struck with it favorably. On reflection, however, I have come to the conclusion in my own mind that the amendment offered by the Senator from Idaho should be adopted.

I was struck by the remark which the Senator from North Dakota [Mr. MCCUMBER] made a while ago when he said this was largely a question of displacement. There is in this country a demand for a certain amount of vegetable oils. It is admitted that the production of vegetable oils in this country is amply sufficient to supply that demand, and any oils shipped into this country simply displace and destroy the market for our home production. That was the basis of my argument in regard to a duty on mineral oils.

I can remember when a man would take his cotton to the gin, and the cotton seed was thrown in a heap and allowed to decay, or was used as fertilizer; there was absolutely no market for it. But there grew up such a demand within a few years for that product of the farm that a few years ago it reached a price of $80 a ton. Then suddenly in a very short time the price of the cotton seed dropped from $80 a ton to $20 a ton, and people began to wonder what was causing the drop. An investigation was started, and it was soon ascertained that it was caused by the importation of vast quantities of soya-bean oil from the Orient, and whereas the farmer would take his cotton to the gin and get almost as much for his seed as he got for the cotton, he found all at once that he got hardly anything for his cotton seed, and it was directly because of the importation of the soya-bean oil from the Orient.

I repeat, we have a certain demand for these vegetable oils which we produce, and as long as that demand is supplied by our own farmers in this country there is no reason for allowing the importation of vast quantities of vegetable oils into this country free of duty to compete with that product. The farmers of this country are having a hard enough time. They are not getting to-day a living price for the things they produce, and if there is any set of men in this country to-day who need protection in the way of a tariff, it is the farmers of this country. They are coming here asking that they be given this protection against the importation of cheap vegetable oils which are produced in the Orient with the cheap labor and cheap conditions surrounding its production. I favor this amendment.

Mr. REED of Missouri. Mr. President, I have been attracted by the argument of the Senator from Louisiana, and so much so that I can not refrain from giving it a moment's attention. He tells us two important things; first, that if we do not stop the importation of soya-bean oil and other oils from the Orient for manufacturing purposes, we are going to destroy the fish-oil industry in this country, and that there is some one concern, the name of which the Senator thought he recollected, that is interested in producing fish oil.

Mr. RANSDELL. If the Senator will permit me, I said the industry extended from Maine down to the Rio Grande, and there are quite a number of concerns engaged in it. I do not pretend to know them all.

Mr. REED of Missouri. I thought the Senator mentioned only the Menhaden Fish Oil Co.

Mr. RANSDELL. No, Senator. Menhaden is the name of a fish. It is a little fish that is fit for oil and nothing but oil. It is not edible.

Mr. REED of Missouri. Is that the fish that has $50,000,000 invested in that industry?

Mr. RANSDELL. I understand it has, and they say about that little fish that they once found a school of them in the ocean 100 miles long and 25 miles wide. I do not know anything about it. It is one of the fish stories they tell us, however.

Mr. REED of Missouri. And we have had a very fishy argument about it.

Mr. RANSDELL. That is all right.

Mr. REED of Missouri. It seems that this fish stretches through the Atlantic Ocean or the Pacific—it does not make any difference which—for hundreds of miles. The Senator said that the fish has $50,000,000 invested in the business. He did not exactly mean that; he meant that somebody has $50,000,000 invested in the business of getting oil out of the fish.

Mr. RANSDELL. The industry.

Mr. REED of Missouri. I am not acquainted with this variety of fish. I plead all proper ignorance. But the idea of the Senator is, of course, that this fish ought to be protected against the pauper fish of Europe. Here is a fish that grows out in the ocean, which stretches in schools hundreds of miles long, and in order to protect the business of taking that fish, the oil of which is unfit for any edible purpose, it is proposed to put a duty upon soya-bean oil, which is shipped from the

other side of the world. If that be not protection gone crazy, I do not know where you would find an example of it.

But let us follow the Senator's argument. He says that soya beans are a better crop than cotton. He says that one man can raise many times more in acreage of soya beans than he can of cotton. He says that practically all the work is done by machinery. He says that the soya bean planted in this country not only produces this remunerative and easily handled crop, more profitable than cotton, but that it fertilizes the soil and leaves it rich; and having said all of that, he then tells us that that industry has to be protected against soya beans raised in other places. Having argued that the soya-bean oil coming into this country will destroy the fish industry, he proposes to promote an enormous production of soya-bean oil here, which of course would destroy his flock of fish and their industry. That is the argument—an argument which destroys itself.

The Senator tells the farmers of this country that here is the most productive crop—for cotton has always been king—that can be produced, with all the benefits and with but little labor, and yet it must be protected against competition from abroad. Then he tells us that the fish-oil industry will be destroyed by soya beans. Then he proposes to raise the soya bean right under the nose of the gentleman who is catching the fish, to promote the industry.

Mr. President, is there anything in the world that we can do without protection by law? Are we the most helpless people in all the world? Is it true that no American citizen can make a living unless we have a law passed to give him an advantage over every other man in the world? Is it true that there is no one thing in the country that can be produced except back of a tariff wall? If so, then there is no one thing we can sell abroad and we are indeed a hermit Nation, a Nation made hermit by incapacity and by inability of its own people to compete with the world.

When we lay down along with the cold facts of life the bald statement that we can compete on nothing we find as a matter of fact that we do export enormous quantities of goods and that the exports have been increasing from year to year and from day to day with a marvelous rapidity. Of course, everybody but a dyed-in-the-wool protectionist knows that if we can sell abroad in competition with the world any particular article we can certainly sell that article at home in competition with the world. If we sell it abroad in competition with the world, and then demand a law which will increase the price of the competitive article coming from abroad to the domestic market, it follows that the proponent of that law intends to rob the American people by charging them a high price and to give the foreigner the benefit of the low price. So that at the end of 50 years of protection the proposition is that the prices shall not be reduced to our people, who have taxed themselves all of those years, but we shall continue to pay the high prices and the benefits of our manufactures and the reduction in prices shall go to the foreigners who have never paid a dollar of that tax.

The PRESIDENT pro tempore. The time of the Senator from Missouri has expired. The question is upon agreeing to the amendment proposed by the Senator from Idaho [Mr. GOODING] to the amendment made as in Committee of the Whole.

Mr. REED of Missouri. I ask for the yeas and nays.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. EDGE (when his name was called). I transfer my pair with the senior Senator from Oklahoma [Mr. OWEN] to the Senator from Vermont [Mr. PAGE] and vote "nay."

Mr. McCUMBER (when his name was called). I am informed that my general pair, the junior Senator from Utah [Mr. KING], would vote as I shall vote on this amendment. I therefore vote. I vote "nay."

Mr. POMERENE (when his name was called). Again announcing my pair with my colleague [Mr. WILLIS], I desire to state that on the same question in Committee of the Whole my colleague and I voted the same way, so I feel free to vote at this time. I vote "nay."

Mr. SIMMONS (when his name was called). I have a general pair with the junior Senator from Minnesota [Mr. KELLOGG]. In his absence I withhold my vote.

Mr. WATSON of Indiana (when his name was called). Making the same announcement as before, I vote "yea."

The roll call was concluded.

Mr. JONES of New Mexico. I transfer my general pair with the Senator from Maine [Mr. FERNALD] to the Senator from Nevada [Mr. PITTMAN], and vote "yea."

Mr. SWANSON. My colleague [Mr. GLASS] is paired with the senior Senator from Vermont [Mr. DILLINGHAM]. My colleague is unavoidably detained from the Senate.

Mr. CURTIS. I wish to announce the following general pairs:

The Senator from Vermont [Mr. DILLINGHAM] with the Senator from Virginia [Mr. GLASS];

The Senator from California [Mr. JOHNSON] with the Senator from Georgia [Mr. WATSON];

The Senator from Illinois [Mr. McKINLEY] with the Senator from Arkansas [Mr. CARAWAY]; and

The Senator from Missouri [Mr. SPENCER] with the Senator from Georgia [Mr. HARRIS].

The result was announced—yeas 38, nays 26, as follows:

YEAS—38.

Ashurst	Harreld	McNary	Sheppard
Ball	Heflin	Moses	Shortridge
Broussard	Hitchcock	Nicholson	Stanfield
Cameron	Jones, N. Mex.	Norbeck	Sterling
Capper	Jones, Wash.	Oddie	Swanson
Cummins	Kendrick	Pepper	Trammell
Fletcher	Keyes	Phipps	Warren
France	Lenroot	Ransdell	Watson, Ind.
Gooding	Lodge	Rawson	
Hale	McCormick	Reed, Pa.	

NAYS—26.

Brandegee	Ernst	Newberry	Sutherland
Bursum	Frelinghuysen	Pomerene	Underwood
Calder	Gerry	Reed, Mo.	Wadsworth
Colt	McCumber	Robinson	Walsh, Mass.
Curtis	McKellar	Smith	Walsh, Mont.
Dial	Myers	Smoot	
Edge	New	Stanley	

NOT VOTING—32.

Borah	Harris	McLean	Shields
Caraway	Harrison	Nelson	Simmons
Culberson	Johnson	Norris	Spencer
Dillingham	Kellogg	Overman	Townsend
du Pont	King	Owen	Watson, Ga.
Elkins	Ladd	Page	Weller
Fernald	La Follette	Pittman	Williams
Glass	McKinley	Poindexter	Willis

So Mr. GOODING's amendment to the amendment made as in Committee of the Whole was agreed to.

The PRESIDENT pro tempore. The question now is upon concurring in the amendment made as in Committee of the Whole as amended in the Senate.

The amendment as amended was concurred in.

The ASSISTANT SECRETARY. The next reserved amendment, reserved by the Senator from Wisconsin [Mr. LENROOT], is on page 29, lines 8 and 9, in paragraph 78, where the committee propose to increase the rate on chloride or salt, in bags, sacks, barrels, or other packages, to 20 cents per 100 pounds, and in bulk to 16 cents per 100 pounds.

Mr. LENROOT. Mr. President, I shall not occupy the time of the Senate except to say that the Senate rates practically double the rates as proposed by the House. I demand the yeas and nays on concurring in the amendment.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. POMERENE (when his name was called). Again announcing my pair with my colleague, the junior Senator from Ohio [Mr. WILLIS], I transfer that pair to the senior Senator from Tennessee [Mr. SHIELDS] and vote "nay."

Mr. WATSON of Indiana (when his name was called). Making the same announcement as before relative to my pair and its transfer, I vote "yea."

The roll call was concluded.

Mr. POMERENE (after having voted in the negative). A moment ago I transferred my pair with my colleague the junior Senator from Ohio [Mr. WILLIS] to the senior Senator from Tennessee [Mr. SHIELDS]. The Senator from Tennessee has since come into the Chamber and voted. I therefore cancel that transfer, allow my pair with my colleague to stand, and withdraw my vote.

Mr. WATSON of Georgia. I have a general pair with the Senator from California [Mr. JOHNSON]. Not knowing how that Senator would vote if present and being unable to secure a transfer of the pair, I withhold my vote.

Mr. HARRISON. I transfer my pair with the junior Senator from West Virginia [Mr. ELKINS] to the senior Senator from Texas [Mr. CULBERSON] and vote "nay."

Mr. JONES of New Mexico (after having voted in the negative). I neglected to state the transfer of my pair. I transfer my general pair with the Senator from Maine [Mr. FERNALD] to the Senator from Nevada [Mr. PITTMAN]. I ask that that announcement may stand for the day, and I will let my vote stand.

Mr. EDGE. I transfer my pair with the senior Senator from Oklahoma [Mr. OWEN] to the Senator from Vermont [Mr. PAGE] and vote "yea."

The result was announced—yeas 33, nays 35, as follows:

YEAS—33.

Ball	Ernst	New	Shortridge
Brandegee	France	Newberry	Smoot
Broussard	Frelinghuysen	Nicholson	Stanfield
Bursum	Gooding	Oddie	Sutherland
Calder	Harreld	Pepper	Wadsworth
Cameron	Lodge	Phipps	Watson, Ind.
Colt	McCumber	Ransdell	
Curtis	McLean	Rawson	
Edge	McNary	Reed, Pa.	

NAYS—35.

Ashurst	Heflin	Moses	Smith
Borah	Jones, N. Mex.	Myers	Stanley
Capper	Jones, Wash.	Norbeck	Swanson
Cummins	Kellogg	Overman	Trammell
Dial	Kendrick	Reed, Mo.	Underwood
Fletcher	Keyes	Robinson	Walsh, Mass.
Gerry	Lenroot	Sheppard	Walsh, Mont.
Hale	McCormick	Shields	Warren
Harrison	McKellar	Simmons	

NOT VOTING—28.

Caraway	Harris	Nelson	Spencer
Culberson	Hitchcock	Norris	Sterling
Dillingham	Johnson	Owen	Townsend
du Pont	King	Page	Watson, Ga.
Elkins	Ladd	Pittman	Weller
Fernald	La Follette	Poindexter	Williams
Glass	McKinley	Pomerene	Willis

So the amendment made as in Committee of the Whole was not concurred in.

The PRESIDENT pro tempore. The Secretary will state the next reserved amendment.

The ASSISTANT SECRETARY. On page 29, in the same paragraph, line 13, the vote by which the rate on nitrate was changed as in Committee of the Whole from 3 cents per pound to 5 cents per pound was reserved by the Senator from Arkansas [Mr. ROBINSON].

Mr. ROBINSON. Mr. President——

Mr. LENROOT. Will the Senator from Arkansas yield for a moment?

The PRESIDENT pro tempore. Does the Senator from Arkansas yield to the Senator from Wisconsin?

Mr. ROBINSON. I yield.

Mr. LENROOT. A parliamentary inquiry. There were two amendments embraced in the last reservation. Was the last vote on both the amendments together?

The PRESIDENT pro tempore. The Chair omitted to say that it was the understanding that the two amendments were to be voted upon at the same time as one amendment.

Mr. LENROOT. So that the record will show that the vote was upon both amendments?

The PRESIDENT pro tempore. The record will so show.

Mr. ROBINSON. Mr. President, the pending amendment is not of great relative importance. There have been reserved for a separate vote in the Senate something more than 45 amendments. Many of them are of very great importance. Therefore, the Senate ought to pursue a policy that will enable us to vote upon all of the reserved amendments, particularly those that are important, prior to the hour for the final vote on the bill, 4 o'clock to-morrow afternoon. We have consumed from 11 o'clock until almost 3.30 o'clock, barring the time that was consumed in the delivery of the President's address, in the consideration of four amendments, one of which, the last, was not discussed at all. I am therefore going to limit my remarks on the pending amendment to a very few statements.

The present rate on this commodity is one-half cent per pound. The House provision carries a duty of 3 cents per pound. The dye industry, in which this commodity is used in the production of coal-tar dyes and in other ways, has greatly developed in the United States during the last few years. The House provision, in my judgment, is adequate, if not excessive.

The amendment of the Senator from Washington [Mr. JONES], which contemplates increasing the rate from 3 cents a pound, as fixed by the House, to 5 cents a pound, was characterized by the Senator from North Dakota [Mr. MCCUMBER] on yesterday as reckless, careless legislation. I shall content myself, Mr. President, with suggesting to the Senate that the amendment of the Senator from Washington has only the amiable personality and the forceful suggestions of that very lovable Senator to commend it—nothing else. The amendment ought to be rejected.

Mr. JONES of Washington. Mr. President, I agree with the Senator from Arkansas that we ought to conserve the time so that these amendments may all be voted upon by to-morrow afternoon, and I shall conserve the time just as much as possible and shall only take a moment or two on the pending question.

I am inclined to think that the Senator from Arkansas uttered his last very nice sentence to take away the effect probably of the criticism of the chairman of the committee which led to the reservation of the amendment. It is rather peculiar and it illustrates how things which happen here on the floor of the Senate may influence even learned Senators in their action on the bill.

The only objection made by the Senator from North Dakota to the amendment was that it raised the rate over the present law about 1,000 per cent. He called that to the attention of Senators on the other side of the Chamber. I can not see where that has anything to do with the merits of the proposition; but I have scanned this bill and I find that one provision reported by the Finance Committee raises the rates on an item under the present tariff over a trillion quadrillion per cent and then some more.

Mr. ROBINSON. Will the Senator from Washington yield to me?

The PRESIDENT pro tempore. Does the Senator from Washington yield to the Senator from Arkansas?

Mr. JONES of Washington. Yes.

Mr. ROBINSON. The Senator from Washington certainly, in view of the action of the Senate touching many of the amendments, does not argue that as a justification for this excessive increase?

Mr. JONES of Washington. Oh, no; I merely make that suggestion as showing the only argument submitted by the chairman of the committee against the amendment. Then, just a while ago we voted an item into the bill as to which the Senate committee reported a rate 500 per cent higher than that of the present law. Five hundred per cent, of course, is very small. There are many items in this bill on which a rate of duty is imposed but on which the present law levies no tariff rate at all. Then we put a tariff on. The Senator from New York [Mr. CALDER] suggests to me that that would represent an increase of 1,000 per cent. He will have to study his arithmetic again. He can not tell us what the per cent of increase is in a case of that kind.

Mr. President, I stated the facts last night with reference to this commodity. Before the World War we produced in this country about a million and a half pounds of this article, and our consumption was about 6,000,000 pounds.

During the war a new plant started up. It happened to start up out in my State, and they produced about half of the additional supply needed. They state that they have the only plant of its kind in the United States, using the arc process of fixation of nitrogen from the air. That is an industry that we would like to have developed in this country, and they present a showing here that I have not seen presented with reference to any of the other articles.

Our Democratic friends have gotten tired of our references to Germany, and I must say that there have been a great many references to Germany without very much proof as to what they are actually doing; and yet I presented a letter from a German agent, representing the people who produce this article in Germany, showing that they have on hand a supply that they propose to sell in this country at a lower rate, even, than it sold for before the war, on account of business conditions. The only proposition is as to whether or not we want to continue the development of this industry in this country.

Of course, unless my Democratic friends can see something in this duty from a revenue standpoint I can not complain of their voting against it; but I want to say that I can not understand why a Republican can not well vote for this proposition. I want to call attention to what I stated last night, that the actual ad valorem rate with this duty of 5 cents is only 50 per cent, and we have a great many rates higher than 50 per cent ad valorem on items in this bill. So from the protectionist standpoint it seems to me that we are not only justified in voting for this duty but that the necessities of the situation require that we should give encouragement to the development of this industry in this country.

Mr. MCCUMBER. Mr. President, I just want to correct a statement of the Senator from Washington. I did not urge as a reason for not raising the duty that it was 1,000 per cent above the present duty.

Mr. JONES of Washington. No; but that was the only suggestion the Senator made.

Mr. MCCUMBER. I simply made that suggestion for the purpose of basing upon it the statement that we ought to consider these matters a little before voting on them.

Mr. JONES of Washington. It was more effective, probably, than any argument the Senator could have presented.

Mr. McCUMBER. Possibly. I hope not, however.

The PRESIDENT pro tempore. The question is on concurring in the amendment made as in Committee of the Whole.

The amendment was nonconcurred in.

The PRESIDENT pro tempore. The Secretary will state the next amendment reserved.

The ASSISTANT SECRETARY. On page 33, paragraph 204 (a), crude magnesite, the committee inserted a new paragraph, 204 (a), which was amended in three particulars in Committee of the Whole.

On line 1, "five-sixteenths" was stricken out and "one-half" inserted in lieu thereof.

On line 2, "five-eighths" was stricken out and "three-fourths" was inserted.

On line 4, "four-tenths" was stricken out and "three-fourths" was inserted.

So that as amended the paragraph now reads:

PAR. 204. (a) Crude magnesite, one-half of 1 cent per pound; caustic calcined magnesite, three-fourths of 1 cent per pound; dead-burned and grain magnesite, not suitable for manufacture into oxychloride cements, three-fourths of 1 cent per pound.

Mr. CALDER. Mr. President, I submit an amendment to the paragraph, which I send to the desk and ask to have stated.

The PRESIDENT pro tempore. The Secretary will state the amendment proposed by the Senator from New York to the amendment made as in Committee of the Whole.

Mr. ROBINSON. Mr. President, I inquire if the amendment presented by the Senator from New York is an amendment to the pending paragraph?

Mr. CALDER. Mr. President, my amendment, if adopted, would bring the rates back to those submitted by the Finance Committee, which the Senate in Committee of the Whole rejected.

The PRESIDENT pro tempore. The amendment will be stated.

The ASSISTANT SECRETARY. The Senator from New York proposes three amendments in one, to change the rates back to the rates as originally reported:

On line 1, strike out "one-half," which was agreed to in Committee of the Whole, and insert "five-sixteenths," the reported sum.

On line 2, strike out "three-fourths" and insert "five-eighths," the original sum reported.

On line 4, strike out "three-fourths" and insert in lieu thereof "four-tenths."

Mr. CALDER obtained the floor.

Mr. ROBINSON. Mr. President——

The PRESIDENT pro tempore. Does the Senator from New York yield to the Senator from Arkansas?

Mr. CALDER. I do.

Mr. ROBINSON. I wish to inquire the effect of the amendment proposed by the Senator from New York. It is to reduce the rates that were agreed to in Committee of the Whole, is it?

Mr. CALDER. It is.

Mr. ROBINSON. And it restores the rates to the basis originally reported by the Committee on Finance?

Mr. CALDER. That is correct.

Mr. McCUMBER. Mr. President——

Mr. CALDER. I yield to the Senator.

Mr. McCUMBER. There is no necessity for an amendment. This is simply a proposal to disagree to the amendment made in Committee of the Whole.

Mr. CALDER. I wanted to be certain about it.

Mr. McCUMBER. However, we can take it up in that form.

Mr. CALDER. The Senator from North Dakota suggests that the proper course would be to disagree to the amendment made in Committee of the Whole. I offer this as an amendment, however, Mr. President.

The PRESIDENT pro tempore. The question is upon concurring in the amendment made as in Committee of the Whole. To that paragraph the Senator has now offered a certain amendment. Under the unanimous-consent agreement the Chair is of opinion that he has a right to offer this amendment.

Mr. CALDER. Mr. President, my amendments, if agreed to, will bring this paragraph back to the rates proposed by the Finance Committee. To-day magnesite is free. It ought to have some protection. In the consideration of this particular paragraph the Finance Committee considered all of the elements concerning it.

Mr. ROBINSON. Mr. President, will the Senator yield to me?

Mr. CALDER. Yes.

Mr. ROBINSON. I think, under the unanimous-consent agreement secured by the Senator from Wisconsin [Mr. LENROOT] yesterday evening, the Senator from New York is entitled to have the vote by which this amendment was agreed to reconsidered in order that he may offer his amendment. Under the parliamentary status as impliedly, at least, suggested by the Chair, his amendment would not be in order; but the Senator from Wisconsin, as I recall, secured consent yesterday afternoon to reconsider the vote by which any amendment was agreed to in Committee of the Whole if any Senator desired to offer an amendment to that amendment before the vote to concur finally was taken.

The PRESIDENT pro tempore. The Chair is considering the matter from the standpoint that the vote has been reconsidered, inasmuch as the unanimous-consent agreement seems to the Chair to have that effect.

Mr. ROBINSON. Very well. The Chair is correct. I thought the Chair had suggested that the amendment could not be offered.

The PRESIDENT pro tempore. No. Were it not for the unanimous-consent agreement it could not be.

Mr. ROBINSON. It could not be; the Chair is right; but that was the object of my suggestion.

Mr. CALDER. Mr. President, I stated a moment ago that this commodity is on the free list to-day. It always has been on the free list. The proposition now is to levy a duty upon it. The Finance Committee believed it ought to have a duty; but those who came before the committee and urged the rate that is now in the bill wanted to have a rate of duty high enough not only to pay for the production of the commodity but to pay for the freight rate all the way from the west to the east coast. It seemed to the committee, and I concurred in their views, that it was a fair thing to ask for a fair market for this commodity; and therefore we gave them a duty high enough, it seemed to me, to bring their product all the way around—they took the water route—and back to Pittsburgh, and then have sufficient to pay them under the rate the Finance Committee reported.

Mr. President, there are some things about this proposition that were not discussed when the matter was up before. Nothing was said then, or not much was said, of the use made of this commodity in building operations generally. I am informed that every year in this country we construct something like 50,000 houses of this so-called stucco, and this caustic calcined material is used in that stucco work, so this very largely increased duty would tend materially to increase the cost of building houses.

I have here a memorandum, sent to me by some people interested in this matter in New York who have to do with this stucco construction work, and they say this, among other things:

For the year 1921, 51 per cent of the magnesite received by their concern was domestic California magnesite, and 48 per cent was imported. The average price paid for the domestic product was $59.03 f. o. b. New York, while the average price paid for the imported article was $64 f. o. b. New York. In fact, they were compelled to pay a higher price for the caustic calcined magnesite when imported than they were compelled to pay for the domestic product. For the first three months of this year, 41 per cent of the magnesite required in connection with this plastic cement was domestic, and the average price was $56. The average price of the imported product was $58.

So, Mr. President, it seems to me that the duty carried in this bill as reported by the Finance Committee, and as now proposed by me, is sufficient to give this commodity all the protection it ought to have. We can not expect here, when this commodity is mined only on the far west coast, to give it a duty that will bring it all the way to the east coast and give them the entire market. They have a right to a fair chance, but not a right to a complete monopoly of this business.

Mr. NICHOLSON. Mr. President, before the Senator sits down may I ask him a question concerning this matter?

Mr. CALDER. The Senator may. I yield.

Mr. NICHOLSON. What per cent of magnesite is used in each ton of the stucco material of which the Senator speaks?

Mr. CALDER. I can not answer the Senator's question. I have not that information.

Mr. NICHOLSON. I will state for the information of the Senate that the cost it will add to the material which the Senator from New York has been discussing amounts to very little. I doubt if it will add 50 cents per ton of stucco used to the cost. That is my best information.

Mr. CALDER. I can not answer the Senator's question. I do not know. I have never made that inquiry; but I do say, in response to the Senator, that this commodity has a right to a protective duty; it has a right to be assisted in every way in that regard; but it has no right to expect the entire business of the country.

The PRESIDENT pro tempore. Treating the three amendments as one, the question is upon agreeing to the amendment offered by the Senator from New York to the amendment made as in Committee of the Whole.

Mr. POMERENE. Mr. President, I want to say a word in behalf of this lower rate.

I have been advised that there is in California a deposit of magnesite of an inferior quality. There is, as I am told, in the State of Washington a deposit of a superior quality. Prior to these discoveries most of the magnesite which came to this country came from Austria. It is largely owned, I believe, by American capital—at least, I am so told.

I know that the iron and steel industries of the country are very much opposed to these increased rates, and I think with reason. I am told also that this Washington deposit of magnesite is owned and controlled by one very rich man, and this higher duty is for the benefit of that one rich man. At least, that is the information I get from those who claim to be conversant with the subject. It may be that his friends may be defeating themselves by this higher rate, as I am told, because while some time ago magnesite occupied a certain field in the steel industry, some of the manufacturers have found a substitute for it. The higher rate proposed here may cut off all importations. If so, it defeats the revenue feature of the bill so far as it relates to this item. If the higher rate is placed on this item and the price of magnesite is advanced abnormally it may encourage the production of this substitute.

I am not going to object to reasonable duties, but when it happens that there has been a very excellent deposit discovered, and it is now in the control of an individual, I do not know why we should be so very solicitous about enriching him at the expense of every user of steel in the country. That is the situation as it presents itself to me through those who are conversant with the industry. For this reason I shall oppose the higher duty.

Mr. FLETCHER. Mr. President, very briefly I would state that my information is that with magnesite on the free list, as it is to-day, American producers are supplying over 80 per cent of this country's needs, three years after the war. That is taking place to-day. That would seem to prove conclusively that the domestic producers are able to withstand foreign competition without any tariff whatever on this article.

I am in favor of the reduction of the duty. In fact, I believe that really in the public interest there should not be any duty at all on this article.

Mr. JONES of Washington. Mr. President, we can get different contentions, apparently, from those who are interested. Referring to the statement made by the Senator from Florida, a statement has been given to me, which I think is reliable, showing that the imports into this country in the month of June amounted to 14,000 tons. At that rate the imports per year would be greater than the imports were before the war.

The Senator from Florida suggests that magnesite is on the free list now. It is on the free list. Before the war we were producing practically no magnesite in this country. I believe that only about 4,000 tons per annum were produced in this country, and our consumption was nearly 200,000 tons. It was not known that we could supply the market in this country.

Under the impetus of the war, because of the necessities of the war, our production rose to about 300,000 tons. In other words, we were supplying the home market in this country. With adequate protection, we can supply the home market, and it does seem to me that in a matter of this kind, which apparently is vital to some of the industries of this country, and which would be vital to the problems which would grow out of a war, if we should get into one again, we should do everything which may be necessary to develop the industry in this country.

The Senator from Ohio [Mr. POMERENE] stated that he understood that one man owns this company out in my State. I do not know about that. I do not know who owns the company. But I am very reliably informed that there are just two companies in Austria, which control all the magnesite there, and that is the principal source of the foreign magnesite. There are only two companies there.

I would rather have the industry in this country controlled by one man than to get our supply from an industry controlled by two companies in a foreign country.

I doubt, however, if only one man owns the plant in our State. But that is not the only plant in the country. It is a large plant. We have developed this industry very greatly in our State, but it has been developed in several of the Western States, until, as I said a while ago, the annual production during the war was about 300,000 tons, or sufficient to supply the needs of this country.

I just want to call the attention of the Republicans to this situation. They will remember that the House of Representatives passed some emergency tariff legislation. After they had passed an emergency omnibus bill they passed some independent bills covering propositions which they considered important and necessary to legislate upon. One of those emergency bills was a bill covering magnesite, and they recommended the very rate which the Senate, in the Committee of the Whole, has adopted, the proposition that is pending before the Senate. That bill came over to the Senate, and the Finance Committee of the Senate reported it favorably and had it placed upon the calendar. After very carefully investigating the matter, they came to the conclusion that the industry required this amount of duty and, as I said, reported the bill favorably. But the matter was never brought up in the Senate.

This is a vital proposition, I think, in the way of national defense as well as in the development of an industry here. It is very important out in my State. One of the great plants was developed there. People went into it at the behest of the Government, at the urgency of the Government, invested six or seven million dollars in it, and got their plant constructed and in operation, with four or five hundred men employed.

The Senator from Florida says he has information to the effect that we are supplying our home needs. That plant, I know, is not supplying any part of the needs of this country. Instead of 450 men employed they have 9 caretakers. The plant is shut down. They can not run in competition with the Austrian magnesite, which is rapidly taking the market in this country, 14,000 tons a month being imported, while the imports before the war, as I said awhile ago, were only about 160,000 tons a year.

The Senator from New York says that some stucco company or representative urges that this rate should not be so high. I can cite some people who use magnesite who urge this duty. There appeared before the committee Mr. Schundler, of Joliet, Ill., who said: "I am here on my own behalf as the largest dealer in plastic magnesite of the United States."

He is not asking for a reduction of duty. He is asking for the duty in the bill as it passed the House. What is the reason he gives? He says that he wants good magnesite for his business. He says the magnesite produced in this country is far better than that produced in Greece or in Austria. I have not time to read his testimony. It will be found on pages 1083 and 1084 of the hearings. He wants a staple supply of good, uniform magnesite, in order to turn out good work for his customers, the business which comes to him here in this country.

Mr. President, I could take more time, but I do not feel I ought to do it in justice to the other amendments. But this is a vital amendment to our section of the country, and I believe it is vital to the needs of the whole country. I believe it is vital in time of war, and with the consideration that has been given to it, with the recommendations which have been made by the House, the recommendations which have been made by the Finance Committee, and the recommendations which have been made by the Senate in Committee of the Whole, I believe that we are fully justified and that we ought to vote down the amendment of the Senator from New York.

Mr. GOODING. Mr. President, I wish the good people over in the great city of New York would just stop long enough to think of the great wealth pouring into that city from the West and what the building of the West means to them. Every year, twice a year, all the merchants of the West make pilgrimages to New York City to buy their supplies. Especially is that true of manufactured goods.

You can not go on building New York unless you let the West grow and unless you let us have an opportunity to develop our industries in the West. I want to say to the Senator from New York that a man working in a magnesite mine in any Western State is worth to the manufacturers of the East 20,000 miners working in Austria. You will not even give us an opportunity to furnish you with the raw material. You want to go abroad to get it.

Mr. CALDER. The Senator knows that the Committee on Finance carefully considered this subject, and believed that the duty fixed by them, which is equivalent to 45 per cent, was ample.

Mr. GOODING. The House gave it very much greater consideration, spent very much more time on it, and concluded that it needed the protection they gave it.

Mr. CALDER. I do not think they spent any more time on it than the Finance Committee did.

Mr. GOODING. I know that tremendous influence was brought to bear, but, of course, I do not say that that had anything to do with the Committee on Finance. I know something

about what a great task it is to prepare a tariff bill. I have been around the committee long enough to know that it is a human impossibility for the members of the committee to understand fully the needs of every industry.

I am just pleading that you make New York City bigger. I want you to become a little more American over there, however, instead of turning up your trousers when it rains in London. Remember that you are under the same flag and a part of America and do not covet all the wealth of the country. Let us go on and develop our mines out there, and we will continue to pour money into New York, as we have in the past.

The development of this ore means millions of dollars paid to the transcontinental railroads. We will give them freights, which I hope will mean a lowering of freight rates on agricultural products, which must be accorded, it seems to me, if the agricultural interests of the West are to live and survive.

The PRESIDENT pro tempore. The question is on agreeing to the amendment of the Senator from New York [Mr. CALDER] to the amendment made as in Committee of the Whole.

Mr. JONES of Washington. I ask for the yeas and nays.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. EDGE (when his name was called). Making the same announcement as before, I vote "yea."

Mr. HARRISON (when his name was called). I understand that my pair, the Senator from West Virginia [Mr. ELKINS], would vote as I intend to vote on this proposition. I vote "yea." If my pair were present, I understand he would vote "yea."

Mr. McCUMBER (when his name was called). On this vote I transfer my general pair with the junior Senator from Utah [Mr. KING] to the junior Senator from Maryland [Mr. WELLER] and vote "yea."

Mr. POMERENE (when his name was called). Announcing my pair with my colleague [Mr. WILLIS] as heretofore, I understand that if he were present he would vote as I intend to vote. I therefore feel at liberty to vote. I vote "yea."

The roll call was concluded.

Mr. McKELLAR (after having voted in the affirmative). I transfer my pair with the Senator from Indiana [Mr. NEW] to the senior Senator from Texas [Mr. CULBERSON] and allow my vote to stand.

Mr. McCUMBER (after having voted in the affirmative). There is some question about the transfer of my pair. I wish to withdraw the transfer and also withdraw my vote. That will leave me paired with the junior Senator from Utah [Mr. KING].

Mr. CURTIS. I wish to announce the following general pairs:

The Senator from Indiana [Mr. WATSON] with the Senator from Mississippi [Mr. WILLIAMS];

The Senator from California [Mr. JOHNSON] with the Senator from Georgia [Mr. WATSON];

The Senator from Michigan [Mr. TOWNSEND] with the Senator from Wisconsin [Mr. LA FOLLETTE];

The Senator from Illinois [Mr. McKINLEY] with the Senator from Arkansas [Mr. CARAWAY]; and

The Senator from Missouri [Mr. SPENCER] with the Senator from Georgia [Mr. HARRIS].

The result was announced—yeas 34, nays 27, as follows:

YEAS—34.

Brandegee	Gerry	Phipps	Stanley
Calder	Glass	Pomerene	Sutherland
Colt	Harrison	Reed, Mo.	Swanson
Dial	Heflin	Reed, Pa.	Trammell
Dillingham	Hitchcock	Robinson	Underwood
Edge	Kellogg	Sheppard	Wadsworth
Fletcher	McKellar	Shields	Walsh, Mass.
France	Newberry	Simmons	
Frelinghuysen	Pepper	Smith	

NAYS—27.

Broussard	Ernst	McCormick	Oddie
Bursum	Gooding	McLean	Ransdell
Cameron	Hale	McNary	Rawson
Capper	Jones, N. Mex.	Moses	Shortridge
Cummins	Jones, Wash.	Myers	Stanfield
Curtis	Kendrick	Nicholson	Warren
du Pont	Lodge	Norbeck	

NOT VOTING—35.

Ashurst	Johnson	New	Sterling
Ball	Keyes	Norris	Townsend
Borah	King	Overman	Walsh, Mont.
Caraway	Ladd	Owen	Watson, Ga.
Culberson	La Follette	Page	Watson, Ind.
Elkins	Lenroot	Pittman	Weller
Fernald	McCumber	Poindexter	Williams
Harreld	McKinley	Smoot	Willis
Harris	Nelson	Spencer	

So Mr. CALDER's amendment to the amendment made as in Committee of the Whole was agreed to.

The PRESIDENT pro tempore. The question is upon concurring in the amendment made as in Committee of the Whole as amended in the Senate.

The amendment as amended was concurred in.

The PRESIDENT pro tempore. The next reserved amendment will be stated.

The ASSISTANT SECRETARY. On page 36, paragraph 213, china, porcelain, etc., reserved by Senators CALDER and JONES of New Mexico. The committee proposed to increase the rates to 60 per cent and 70 per cent ad valorem.

Mr. JONES of New Mexico. Mr. President, I desire briefly to call the paragraph to the attention of the Senate. It relates to chinaware and porcelain. It was discussed at considerable length when we were originally going over the bill and discussing committee amendments. I think I may suggest that at that period of the consideration of the bill there was no disposition to lower any rate which the committee had suggested, but later on a more liberal feeling developed. I believe, in view of all the discussion that has occurred since that time, and the development of the industry, that even the Finance Committee would be willing to make some modification in the rates.

The rates in this paragraph are higher than those in the Payne-Aldrich law. In the present law the rates are high, being 50 per cent and 55 per cent. The rates in the Payne-Aldrich law were only 55 and 60 per cent. The rates proposed by the committee and adopted as in Committee of the Whole would increase those rates to 60 and 70 per cent, I believe higher than ever occurred in any previous tariff law.

On the previous argument we showed the very small amount of the importations compared with the American production and we also showed that the importations were of a different class of design from those made in this country; that it gave to the consumers of the country an opportunity to get some other designs, something that might suit their tastes and convenience better at a more reasonable price.

On page 37, line 4, I move to strike out the numeral "60" and insert "50" and in line 8 to strike out the numeral "70" and insert "60," making the rates 50 per cent and 60 per cent, respectively. I ask that the amendments may be voted on together, as they are in the same relative proportion, being a reduction in the one case from 60 to 50 per cent and in the other case from 70 to 60 per cent.

Mr. FRELINGHUYSEN. Mr. President, I hope there will be no change in the rates of duty in the china and earthen ware schedule. At the time the matter was discussed and the rates were debated I pointed out to the Senate the situation which existed with regard to the competition of the various pottery-making countries of Europe. I had prepared by the examiners at Baltimore and New York certain figures showing the importations, the consular invoice price, the invoice export value, the invoice date, and the home value. I pointed out to the Senate that there was an association in Germany, a cartel, which required the export value to be higher than the foreign home value. The investigation showed that the percentage of increase of the export value over the home value amounted to 238 per cent.

In white earthen tableware the invoice showed the foreign home value to be 70 cents, landing charge 43 cents, and the selling price of the comparable domestic article was $4.90, requiring a rate of duty of 364 per cent to equalize the difference.

The Senate rate was 60 per cent for white table chinaware. In the case of an importation in March, 1922, from the Hutchenreuter factory, consular invoice 1408 showed an export value of $908 and a home value of $218, or a difference of 316 per cent. Coming under the other paragraph, decorated china tableware from the Kohla factory, consular invoice 1733 shows an export value of $605 and a home value of $151, so that more than 300 per cent would be required to equalize the difference.

The imports of German china are showing a gradual increase, as are the imports from Czechoslovakia, as well as from Japan. An international investigation which was made by the Department of commerce just before the outbreak of the World War indicated the cost of production in the United States f. o. b. factory, per unit of production, was 129 per cent higher than it was in the best potteries of Austria and 197 per cent higher than the German china potteries.

The labor cost in the manufacture of china in the United States was shown to be 73 per cent higher than the cost of producing English earthenware, 182 per cent higher than the labor cost of the Austrian china, and 314 per cent higher than that of the German potteries.

Mr. President, we have in this country $25,000,000 invested in this industry, and there are over 27,000 wage earners em-

ployed in it. There is a change, however, which can be made in this paragraph and which will be made, and that is a reduction in the rate on what is known as "bone china"; but, so far as the competition in the other items is concerned, these rates are not sufficient to meet the difference between the cost of production in Germany and here. Germany at any time also can lower its export rates and sell under the American manufacturing cost. I hope the amendment will not prevail.

Mr. McCUMBER. Mr. President, I wish to commend the arguments of both Senators who have spoken upon this question for their brevity; and in view of the fact that at the rate we are proceeding, if we run every hour and minute until 4 o'clock to-morrow, we shall not quite have gotten through with all of the reserved amendments, I hope that Senators will be as brief as possible upon some of the amendments so that Senators who intend to propose independent amendments may also have an opportunity to propose them.

I only wish to say in connection with the pending amendment that under the present law the rates are 50 and 55 per cent. That duty is for revenue. For both revenue and protection we have increased the 50 per cent to 60 per cent and the 55 per cent to 70 per cent.

Mr. JONES of New Mexico. Mr. President——

The PRESIDENT pro tempore. The Senator from New Mexico has already spoken upon the amendment. The question is——

Mr. JONES of New Mexico. Then, I should like to ask the Senator from North Dakota [Mr. McCUMBER] a question. I desire to ask the Senator from North Dakota if he does not believe that the present rates of 50 per cent and 55 per cent are protective rates? The Senator from North Dakota said that those rates were for revenue only. I ask the Senator if he does not believe that there is protection afforded by those rates?

Mr. McCUMBER. I will answer that I do not. We would not have increased the rates if we had thought they were already protective.

The PRESIDENT pro tempore. The question is on agreeing to the amendment proposed by the Senator from New Mexico [Mr. JONES].

Mr. JONES of New Mexico. I ask for the yeas and nays on the amendment.

The yeas and nays were ordered.

Mr. MOSES. Mr. President, a parliamentary inquiry.

The PRESIDENT pro tempore. The Senator from New Hampshire will state his parliamentary inquiry.

Mr. MOSES. The pending question before the Senate is what?

The PRESIDENT pro tempore. The pending question is the amendment offered by the Senator from New Mexico [Mr. JONES].

The reading clerk proceeded to call the roll.

Mr. HARRISON (when his name was called). I transfer my pair with the Senator from West Virginia [Mr. ELKINS] to the senior Senator from Texas [Mr. CULBERSON] and vote "yea."

The roll call was concluded.

Mr. WATSON of Indiana. Making the same announcement as heretofore with regard to my pair and its transfer, I vote "nay."

Mr. CURTIS. I wish to announce the following pairs:

The junior Senator from Ohio [Mr. WILLIS] with the senior Senator from Ohio [Mr. POMERENE];

The Senator from California [Mr. JOHNSON] with the Senator from Georgia [Mr. WATSON];

The Senator from Michigan [Mr. TOWNSEND] with the Senator from Wisconsin [Mr. LA FOLLETTE];

The Senator from Illinois [Mr. McKINLEY] with the Senator from Arkansas [Mr. CARAWAY]; and

The Senator from Missouri [Mr. SPENCER] with the Senator from Georgia [Mr. HARRIS].

The result was announced—yeas 28, nays 36, as follows:

YEAS—28.

Ashurst	Glass	McKellar	Shields
Borah	Harrison	Myers	Simmons
Broussard	Heflin	Overman	Smith
Capper	Hitchcock	Ransdell	Swanson
Dial	Jones, N. Mex.	Reed, Mo.	Trammell
Fletcher	Kellogg	Robinson	Underwood
Gerry	Kendrick	Sheppard	Walsh, Mass.

NAYS—36.

Ball	Cummins	Frelinghuysen	McCumber
Brandegee	Curtis	Gooding	McLean
Bursum	Dillingham	Hale	McNary
Calder	du Pont	Jones, Wash.	Moses
Cameron	Edge	Keyes	New
Colt	Ernst	Lodge	Newberry
Oddie	Reed, Pa.	Stanfield	Wadsworth
Pepper	Shortridge	Sterling	Warren
Phipps	Smoot	Sutherland	Watson, Ind.

NOT VOTING—32.

Caraway	King	Norbeck	Spencer
Culberson	Ladd	Norris	Stanley
Elkins	La Follette	Owen	Townsend
Fernald	Lenroot	Page	Walsh, Mont.
France	McCormick	Pittman	Watson, Ga.
Harreld	McKinley	Poindexter	Weller
Harris	Nelson	Pomerene	Williams
Johnson	Nicholson	Rawson	Willis

So the amendment of Mr. JONES of New Mexico was rejected.

Mr. FRELINGHUYSEN. I offer the amendment which I send to the desk to the pending paragraph.

Mr. BALL. Before that is considered, will the Senator yield to me?

Mr. FRELINGHUYSEN. I will yield to the Senator from Delaware in a moment.

The PRESIDENT pro tempore. The Chair is of the opinion that the amendment submitted by the Senator from New Jersey is not in order at this time.

Mr. FRELINGHUYSEN. Will the Chair please state why? It is an amendment reducing the rate on a certain class of china falling within this paragraph.

The PRESIDENT pro tempore. The Senate is acting upon reserved amendments and amendments to reserved amendments.

Mr. FRELINGHUYSEN. A separate vote was reserved on this paragraph.

The PRESIDENT pro tempore. A separate vote was reserved upon the amendments which have been agreed to as in Committee of the Whole in this paragraph.

Mr. UNDERWOOD. Mr. President, this morning, not having any idea of the amendment the Senator desired to offer, but in order that there might not be any confusion about this matter and so that it might be made certain, I asked unanimous consent that we dispose of the amendments in the order in which they were listed in the paper read at the desk. That was agreed to by unanimous consent, and it seems to me that excludes any other amendment until the reserved amendments shall have been disposed of.

The PRESIDENT pro tempore. The Senator from Alabama is correct.

Mr. FRELINGHUYSEN. A parliamentary inquiry.

The PRESIDENT pro tempore. The Senator from New Jersey will state his parliamentary inquiry.

Mr. FRELINGHUYSEN. The amendment proposed by me reduces the rate on a certain class of china known as "bone china," which is covered by this paragraph. I should not think the Senate would object to a reduction of the rate, and, inasmuch as it affects this paragraph, I ask unanimous consent that the amendment offered by me may now be considered.

The PRESIDENT pro tempore. Is there objection to the request of the Senator from New Jersey?

Mr. McCUMBER. I hope the Senator will not ask that, because he can return to it again the moment we get through with the reserved amendments, and if the precedent is established other Senators will be entitled to ask the same thing.

Mr. FRELINGHUYSEN. If there will be an opportunity to offer the amendment to this paragraph later, I will now withdraw it.

Mr. McCUMBER. There will be such opportunity.

The PRESIDENT pro tempore. The question is on concurring in the amendments made as in Committee of the Whole on page 37, lines 4 and 8.

The amendments were concurred in.

Mr. BALL. Mr. President, some weeks ago the senior Senator from New Hampshire [Mr. MOSES] made certain statements to the effect that the Government had loaned the Du Ponts some ninety-nine million, nearly $100,000,000; that no interest had been paid on those loans, and that $35,000,000 of that amount had not yet been accounted for. I hold in my hand a statement from the Du Pont Co. itemizing their receipts, giving the numbers of their checks, and so forth, which I ask unanimous consent to have printed in the RECORD.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and it is so ordered.

The matter referred to is as follows:

MEMORANDUM OF REPLY TO STATEMENT OF SENATOR MOSES IN UNITED STATES SENATE ON JULY 14, 1922.

During the discussion of the tariff bill in the United States Senate on Friday, July 14, Senator MOSES, of New Hampshire, made statements concerning the dealings of E. I. du Pont de Nemours & Co. and its subsidiaries with the United States Government in the late World War which I feel should not be allowed to stand uncorrected. He said:

"I have here a tabulation drawn from official sources showing that, beginning with January 10, 1918, and running through to a latest date

of February 11, 1919, the Du Pont Co. and two of its subsidiaries secured advances from the Federal Treasury in the gross sum of $99,250,552.80. This money, Mr. President, was paid for the purpose of creating huge establishments which bear the Du Pont name and which were devoted to furnishing supplies to the Government during the war. Thus the people of the United States not only financed the Du Ponts in the tremendous extension of their business but were also mulcted by the Du Ponts to an extent which enabled the company to increase its plant value to an admitted $220,000,000, while at the same time taking out net profits which in one year amounted to $129,000,000.

"The Du Ponts still hold, as of July 1, 1922, $35,121,066.02 of Government funds unaccounted for, although the war ended almost four years ago. On practically none of this $100,000,000 of public money advanced to them did the Du Ponts pay interest; and the only security they ever gave for any portion of this huge sum of the public's funds was their own notes or bonds."

The money advanced by the United States Government to E. I. du Pont de Nemours & Co. (hereinafter referred to as Du Pont Co.) was used for the purchase of raw materials for the fulfillment of contracts to supply the Government with explosives, with the exception of $3,870,000 advanced by the Navy under contract 35819 for the construction of a plant for the production of T. N. T. for the Navy.

The Du Pont Co.'s war construction work to meet the demands of foreign Governments for explosives was virtually completed before the United States went into the war, and none of the funds advanced by our Government in 1918 could have been used "to increase its plant value to an admitted $220,000,000." The same statement applies to the profits which were mentioned in the Senator's speech.

The records show that the $54,807,380.93 advanced to the Du Pont Co. has been completely liquidated and accounted for by the completion of contracts, the delivery of material, the settlement of claims, or the return of cash to the United States Treasury.

To a subsidiary of the Du Pont Co., viz, the Du Pont Engineering Co., the Government advanced money to be used and which was used only in connection with the construction and operation of Government-owned plants.

For the construction of Government-owned plants the Du Pont Engineering Co. received direct advances from the War Department totaling $24,506,250, and in addition thereto the sum of $160,579.87, making a total of $24,666,829.87. The sum of $160,579.87 represented profit which had accrued to the Du Pont Engineering Co. under the first contracts for the construction of these Government-owned plants, which profit was waived in favor of the United States under the later contracts. The cost of construction of the Government-owned plants, the greatest of which was the Old Hickory smokeless powder plant near Nashville, Tenn., totaled $99,923,608.23. These plants were built by the Du Pont Engineering Co. at a profit to it of $1 per plant, but as the third plant was not completed, due to the armistice, the total profit paid to the Du Pont Engineering Co. on construction work totaling $99,923,608.23 was $2.

The remainder of the funds advanced by the Government to the Du Pont Engineering Co., viz, $20,667,800, was advanced for use in the procurement of raw materials, payment of labor, etc., in connection with the operation of Government-owned plants.

As of June 30, 1922, the Du Pont Engineering Co. had on hand $940,960.60. This sum of $940,960.60 remained because some accounts were still in process of adjustment with the War Department. A total of $45,334,629.87 was advanced to the Du Pont Engineering Co. in connection with the construction and operation of Government-owned plants. There was returned to the United States by four checks, dated June 30, 1920, of Du Pont Engineering Co., a total of $3,174,000; by check dated January 19, 1921, the sum of $133,981.57; and by check dated March 23, 1921, the sum of $16,516.20, or a total of $3,324,497.77 returned in cash to the United States. The balance of the funds advanced to Du Pont Engineering Co. were expended in connection with the construction and operation of the Government-owned plants, all of which expenditures have been approved by the War Department with the exception of certain items in dispute involving approximately $361,709.

All moneys advanced by the Government to the Du Pont Engineering Co. were kept in separate bank accounts and were drawn on only for use in connection with the contracts for the Government-owned plants, and all interest on unexpended funds advanced accrued to the benefit of the United States.

To another subsidiary of the Du Pont Co., viz, the Du Pont American Industries (Inc.), the Government advanced $5,400,000, to be used by the Du Pont American Industries (Inc.), as agent for the United States, in the purchase of cotton linters for the United States and its allies. These funds were kept in separate bank accounts, and interest to the amount of $147,965.28 accrued to the benefit of the United States.

Du Pont American Industries (Inc.) was accountable for the total sum of $5,547,965.28, and by five checks, dated July 19, 1920, it returned to the United States in cash the total sum of $5,410,105.62 and has been credited with the return of an additional sum of $77,849.98 through the approval by the United States of certain accounts. Pending final settlement of one or two accounts, the Du Pont American Industries (Inc.) has in hand only $62,175.62, which includes accrued interest.

The attached statement gives a detail of the advances made by the United States on and after January 10, 1918, to E. I. du Pont de Nemours & Co. and its subsidiaries, the Du Pont Engineering Co., and the Du Pont American Industries (Inc.).

Advances made by the United States to E. I. du Pont de Nemours & Co. on and after January 10, 1918, for use in the procurement of supplies and materials and the construction of a plant for the Navy.

Government contract number.	Amount of advance.	Date advances were received.	Security.

Total	5,400,000.00		

The PRESIDENT pro tempore. The Secretary will state the next reserved amendment.

The ASSISTANT SECRETARY. On page 39, in paragraph 218, relating to bottles and all articles of every description composed wholly or in chief value of glass or paste, in Committee of the Whole the Senate struck out the whole paragraph as it appeared in the House bill and inserted a new paragraph, which occupies two pages in the bill.

The PRESIDENT pro tempore. The reading of it will be dispensed with if there be no objection. The Chair hears none.

Mr. JONES of New Mexico. Mr. President, the rate of duty fixed in the paragraph as amended I have not before me. Will the Secretary state the rate of duty upon bottles?

The PRESIDENT pro tempore. The Secretary will state the rates referred to.

The ASSISTANT SECRETARY. Upon articles composed wholly or in chief value of glass or paste the rate is 75 per cent ad valorem.

Upon illuminating articles of every description, including chimneys, globes, shades, and prisms—the words "incandescent electric light bulbs, with or without filaments," were stricken out—the rate is changed from 70 to 45 per cent ad valorem.

On semitranslucent glass, or combinations of the same, the rate is 70 per cent ad valorem.

On table and kitchen articles and utensils and all articles of every description not specially provided for composed wholly or in chief value of glass or paste the rate is 65 per cent ad valorem.

On table and kitchen articles and utensils composed wholly or in chief value of glass or paste or a combination of glass

and paste, when pressed and unpolished, the rate is 50 per cent ad valorem.

Mr. JONES of New Mexico. Mr. President, the Secretary has read quite enough. That amendment brought in a number of very high rates, and I do not care to take up the time of the Senate in discussing each one of them. I do not think we have had much encouragement in proposing amendments or reductions of those rates. I should like to have a vote upon concurring in the committee amendment which the Secretary has just stated. I shall content myself with voting against the amendment as it is proposed.

Mr. SUTHERLAND. Mr. President, when the Senate considered paragraph 218 in Committee of the Whole it ratified all the items as fixed by the committee, with the exception of the second bracket, which covers illuminating articles of every description. Quite an extended debate was carried on with reference to that one bracket, because it included incandescent-light bulbs, with or without filaments. These words were more recently cut out of that bracket and made a separate paragraph—229—and the rate was lowered to 35 per cent.

While voting upon the entire bracket with those words in it, however, the Senate, having mostly in mind that this covered the incandescent-light bulbs, fixed the rate at 45 per cent. I do not know exactly what the amendment is that the Senator is now proposing. I have pending an amendment which would restore the original committee rate of 70 per cent to the other items in that bracket.

The PRESIDENT pro tempore. The Senator from New Mexico has offered no amendment.

Mr. SUTHERLAND. Then my amendment, which I have before the Senate, proposes to restore the rate in line 24 to the original Senate rate of 70 per cent, and the reason for that is this: I think it was perfectly proper to cut out the incandescent-light bulbs. I do not think they belonged in this paragraph. Those bulbs are manufactured almost entirely by machinery. All the other items in the bracket, however—chimneys, globes, shades, and prisms for use in connection with artificial illumination—are manufactured by hand, by expensive labor, and the cost of manufacture in this country and Europe are very far apart.

For instance, in Czechoslovakia the labor cost of producing one hundred 10-inch duplex lamp chimneys is 7 cents. In Germany it is 12 cents. In the United States it is $2.11. That is just the labor cost.

The labor cost of producing one hundred 12-inch duplex lamp chimneys in Czechoslovakia is 10 cents, in Germany 14 cents, and in the United States $2.96.

The labor cost of producing a small shade, under 6 inches in size, is 31 cents per 100 in Czechoslovakia and $2.48 in the United States.

The skilled-labor cost of producing 100 pieces of a 10-inch shade in Germany is 26 cents and in the United States $4.23.

My amendment proposes to restore the 70 per cent in order to make this item harmonize and agree with the other items in paragraph 218. It would be an absolute injustice to the workers in this industry to cut down the duty to 45 per cent. They could not possibly maintain the industry in this country in competition with the shipments from Czechoslovakia and Germany and Austria, and I hope it will be the pleasure of the Senate to restore the original rates. The entire paragraph then will go to conference.

I ask to have my amendment stated.

The PRESIDENT pro tempore. The Secretary will state the amendment proposed by the Senator from West Virginia [Mr. SUTHERLAND] to the amendment made as in Committee of the Whole.

The ASSISTANT SECRETARY. On page 40, in the committee amendment, line 24, it is proposed to strike out "45" and insert "70," so that it will read "70 per cent ad valorem."

Mr. PEPPER. Mr. President, I very much hope that the amendment proposed by the Senator from West Virginia [Mr. SUTHERLAND] will prevail.

When this paragraph was originally reported to the Committee of the Whole it contained, as has been explained, a bracket dealing with incandescent bulbs. These articles were given the same rate of protection as various other articles specified in the same paragraph. The presence of the illuminating-bulb bracket drew forth a very effective opposition from the Senator from New Mexico [Mr. JONES], who directed his attention to a perfectly valid criticism of the presence in this paragraph of the illuminating-bulb bracket. Unfortunately, however, he aimed at the bulbs not with a rifle but with a shotgun, and he shattered, in addition to the bulbs, the shades, the prisms, and various types of glass which require a high degree of skill in their production.

The way the matter now stands is that the illuminating-bulb bracket has been transferred from paragraph 218 to paragraph 229, and in paragraph 229 it carries an ad valorem duty of 35 per cent instead of 45 per cent. At present, therefore, paragraph 218 stands with a 45 per cent rate, which is far too low to be protective of the only articles that are left therein, the rate having been adopted with reference to the presence in the paragraph of something that has now been taken out of it. The amendment of the Senator from West Virginia would merely have the effect of restoring the committee rate as to all the articles that are left in paragraph 218, illuminating bulbs having been transferred and having taken their proper duty in paragraph 229.

Mr. SUTHERLAND. Mr. President, may I interrupt the Senator?

Mr. PEPPER. I yield.

Mr. SUTHERLAND. I call the Senator's attention to the fact that he was mistaken, just as I was; that the electric incandescent-light bulbs have been placed in paragraph 229 and reduced to 20 per cent. The rate fixed is 20 per cent instead of 35 per cent.

Mr. PEPPER. The Senator is correct, Mr. President. It was originally 35 per cent, I think, in paragraph 229. Subsequently it was reduced to 20 per cent; but the rate on the incandescent bulbs is now 20 per cent under paragraph 229, and therefore the Senator from New Mexico has accomplished the purpose which he had in mind when he made his very effective argument against their presence in paragraph 218. If the amendment proposed by the Senator from West Virginia were to prevail, we should have the policy of the committee exactly carried out and the criticism of the Senator from New Mexico adequately met.

The PRESIDING OFFICER (Mr. BRANDEGEE in the chair). The question is on the amendment proposed by the Senator from West Virginia to the amendment made as in Committee of the Whole.

The amendment to the amendment was agreed to.

The PRESIDING OFFICER. The question now is upon concurring in the amendment made as in Committee of the Whole as amended.

The amendment as amended was concurred in.

The ASSISTANT SECRETARY. The next reserved amendment is on page 42, line 10, paragraph 217, cylinder, crown, and sheet glass. The amendments in that paragraph were reserved by the Senator from New Mexico [Mr. JONES].

Mr. JONES of New Mexico. Mr. President, this paragraph includes a number of different rates, and on a previous discussion of the paragraph I presented a great deal of information.

This industry can produce this glass in the United States as cheaply as it can be produced anywhere. I have no doubt that the Senator from West Virginia will be able to present some figures about Czechoslovakia or Austria, but none of this glass is coming in from those countries now. I am not going to take up the time arguing the question of these erratic statements regarding the difference in wages in Germany and Austria and in this country at a time about which we have no information in regard to wages, the result being that there is no great influx of importations.

I think it would be useless to take up the time of the Senate to have even a vote on as important a paragraph as this, to change those amendments. That they are extremely important I think there is no doubt. I think this is one of those extortionate provisions in this bill, and wholly unnecessary.

Mr. SMITH. What is the rate of duty imposed on incandescent bulbs?

Mr. JONES of New Mexico. That is in another paragraph, but I may say that that rate has been reduced to 20 per cent.

Mr. SMITH. This relates to certain forms of manufactured glass?

Mr. JONES of New Mexico. All sorts of cylinder, crown, and sheet glass, by whatever process made. It includes window panes, and all forms of glass made by that process, by machinery. The greater portion of it is made by machinery, and they can get a cylinder of this glass about 9 feet long and 2 or 3 feet in diameter in a short time, and by a simple mechanical process. It is true some of it is produced by mouth blowing, but that, of course, is smaller cylinders, which are much more expensive.

The business is divided up, in a way. The duties vary. There are specific duties which run into large percentages, much higher than the rates in the present law.

I think it is a waste of time to argue it, however, and as Senators are getting impatient to reach other items I shall con-

tent myself by asking again a general vote en bloc on the rates in paragraph 219. I will not even ask for the yeas and nays.

The PRESIDING OFFICER. The question is on concurring in the amendments made as in Committee of the Whole in paragraph 219.

The amendments were concurred in.

The next amendment reserved was, in paragraph 305, page 53, line 12, on steel and alloys of steel, reserved by the Senator from New York [Mr. CALDER].

Mr. CALDER. Mr. President, the amendment I contemplated offering to this paragraph I find is an amendment to the House text, and it is not in order now.

The amendment was concurred in.

The next amendment reserved was on page 66, paragraph 333, horseshoes and nails, reserved by the Senator from Florida [Mr. FLETCHER].

Mr. FLETCHER. Mr. President, this is not a very important item. It affects a good many people, all people who own horses and use horses, and I think the present law putting common horse, mule, or ox shoes, of wrought iron or steel, on the free list, ought to be maintained.

My proposal is, in order to put horseshoes on the free list, to strike out the words "common horse, mule, or ox shoes, of wrought iron or steel" from this paragraph and insert a new paragraph, paragraph 1585a carrying that language, so that horse, mule, or ox shoes, of wrought iron or steel, should go on the free list.

Then I would propose that the duty on the remaining described articles, horse, mule, or ox shoes, punched, drilled, or tapped, of wrought iron or steel, for use with adjustable wrought iron or steel skid calks, and solid drop-forged calked shoes of wrought iron or steel, be given a rate of one-fifth of 1 cent a pound.

I call attention to the fact that horseshoes have been on the free list up to this time; that the production in this country in 1914 amounted to $9,000,000, and that the importations are practically negligible. The importations in 1917 amounted to $16,517 in value. They come chiefly from Canada. In 1918 the value of the importations was $4,185; in 1919 it was $2,796; in 1920 it was $3,496; and in the nine months of 1921 only $629 worth or 7,945 pounds were imported.

The exports are quite large. In 1918 we exported, in quantity, 6,399,934 pounds; in 1919 we exported 7,581,585 pounds; in 1920 we exported 4,108,908 pounds, and in the nine months of 1921 we exported 1,048,461 pounds.

The industry needs no protection, and we get very little revenue from it, because the importations amount to nothing of consequence. Therefore I move that the language "common horse, mule, or ox shoes, of wrought iron or steel," be stricken out, and that those words be transferred to paragraph 1585a, so that they will go on the free list.

If I may do so, in the same motion I move that the remainder of this paragraph, beginning with line 7 and going through line 10, be included in paragraph 333, and that the rate be one-fifth of 1 cent per pound instead of 2 cents per pound on that portion of the paragraph.

Mr. McLEAN. Is the Senator willing that the vote should be taken on both the amendments at once?

Mr. FLETCHER. I am. I propose that. So that the duty on all the portion of the paragraph beginning in line 7, down to line 10, would be one-fifth of a cent per pound instead of 2 cents, and the articles in the other portion of the paragraph, down to and including the word "steel" in line 6, should go on the free list.

Mr. McLEAN. I want to call attention to the fact that we have reduced the Payne-Aldrich rate on horseshoes to six-tenths of a cent per pound. That is a very reasonable duty. I realize that there are very few importations, but those which are imported are, I take it, fancy shoes, which certain gentlemen insist upon having for their horses. This duty would produce a little revenue and ought to be imposed. It is a reduction from the Payne-Aldrich rate.

The provision with regard to the nails is more important. The Senator must bear in mind that some of these nails are made of Swedish steel, and that steel bears a duty of six-tenths of a cent per pound. Canada imposes a duty of 7 cents a pound on horseshoe nails, and they are making them there and are taking our foreign trade. When you take into consideration the fact that we have to-day six-tenths of a cent a pound upon the imported Swedish steel, the duty seems very reasonable.

Mr. FRELINGHUYSEN. Mr. President, there are four factories at the present time which are making these special products called "Never-Slip" shoes. There are two factories in Wisconsin, one in New Jersey, and one in Minnesota.

Those are special shoes, and the labor is over 60 per cent of the cost of production. They cost about $7 per hundred pounds. The duty of 1 cent, therefore, is about 30 per cent ad valorem. There is trade competition with Germany and with Czechoslovakia, I am informed. The committee reduced the rate from 2 cents, and it is only 1 cent.

The PRESIDING OFFICER. The question is on agreeing to the amendment proposed by the Senator from Florida [Mr. FLETCHER] to the amendment made as in Committee of the Whole.

Mr. FLETCHER. On that I ask for the yeas and nays.

The yeas and nays were ordered, and the Assistant Secretary proceeded to call the roll.

Mr. WATSON of Indiana (when his name was called). Making the same announcement as before, I vote "nay."

The roll call was concluded.

Mr. HARRISON. Transferring my pair with the junior Senator from West Virginia [Mr. ELKINS] to the senior Senator from Texas [Mr. CULBERSON], I vote "yea."

Mr. POMERENE. Announcing my pair with my colleague [Mr. WILLIS], I transfer that pair to the senior Senator from Montana [Mr. MYERS] and vote "yea."

The result was announced—yeas 26, nays 35, as follows:

YEAS—26.

Ashurst	Heflin	Reed, Mo.	Swanson
Capper	Jones, N. Mex.	Robinson	Trammell
Dial	Kellogg	Sheppard	Underwood
Fletcher	McKellar	Shields	Walsh, Mass.
Gerry	Overman	Simmons	Walsh, Mont.
Glass	Pomerene	Smith	
Harrison	Ransdell	Stanley	

NAYS—35.

Ball	du Pont	McCumber	Reed, Pa.
Brandegee	Edge	McLean	Shortridge
Broussard	Ernst	McNary	Smoot
Bursum	Frelinghuysen	Moses	Sterling
Calder	Gooding	New	Sutherland
Cameron	Hale	Newberry	Wadsworth
Colt	Jones, Wash.	Oddie	Warren
Curtis	Keyes	Pepper	Watson, Ind.
Dillingham	Lodge	Phipps	

NOT VOTING—35.

Borah	Hitchcock	Myers	Rawson
Caraway	Johnson	Nelson	Spencer
Culberson	Kendrick	Nicholson	Stanfield
Cummins	King	Norbeck	Townsend
Elkins	Ladd	Norris	Watson, Ga.
Fernald	La Follette	Owen	Weller
France	Lenroot	Page	Williams
Harreld	McCormick	Pittman	Willis.
Harris	McKinley	Poindexter	

So Mr. FLETCHER's amendment to the amendment, made as in Committee of the Whole, was rejected.

The PRESIDING OFFICER. The question is on concurring in the amendments made as in Committee of the Whole.

The amendments were concurred in.

The ASSISTANT SECRETARY. On page 66, paragraph 337, card clothing, the amendment in the paragraph reserved by the Senator from New Mexico [Mr. JONES].

Mr. JONES of New Mexico. Mr. President, the question was discussed at considerable length. I wanted to give the Senate a chance to reconsider its action. The House proposed a rate of 35 per cent on card clothing. The Senate increased that rate to 45 per cent in Committee of the Whole. It seems to me that 35 per cent as fixed by the House is at least as high as the rate should be. It is the highest rate provided by present law on all classes of card clothing. If the committee amendment were not agreed to, it would leave the House rate of 35 per cent ad valorem. The paragraph was discussed at considerable length, and I do not care to discuss it further, but I ask for the yeas and nays on concurring in the amendment.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. HARRISON (when his name was called). Making the same announcement as before, I vote "nay."

Mr. POMERENE (when his name was called). Again announcing my pair with my colleague [Mr. WILLIS], I transfer that pair to the senior Senator from Nebraska [Mr. HITCHCOCK] and vote "nay."

Mr. WATSON of Indiana (when his name was called). Making the same announcement as before, I vote "yea."

The roll call was concluded.

Mr. WALSH of Montana (after having voted in the negative). I am paired with the senior Senator from New Jersey [Mr. FRELINGHUYSEN]. I transfer that pair to my colleague [Mr. MYERS] and allow my vote to stand.

The result was announced—yeas 38, nays 24, as follows:

YEAS—38.

Ball	Bursum	Capper	Dillingham
Brandegee	Calder	Colt	du Pont
Broussard	Cameron	Curtis	Edge

Ernst	Keyes	Newberry	Sterling
France	Lodge	Oddie	Sutherland
Gooding	McCumber	Pepper	Wadsworth
Hale	McLean	Phipps	Warren
Harreld	McNary	Reed, Pa.	Watson, Ind.
Jones, Wash.	Moses	Shortridge	
Kendrick	New	Smoot	

NAYS—24.

Ashurst	Heflin	Reed, Mo.	Stanley
Dial	Jones, N. Mex.	Robinson	Swanson
Fletcher	McKellar	Sheppard	Trammell
Gerry	Overman	Shields	Underwood
Glass	Pomerene	Simmons	Walsh, Mass.
Harrison	Ransdell	Smith	Walsh, Mont.

NOT VOTING—34.

Borah	Johnson	Nelson	Spencer
Caraway	Kellogg	Nicholson	Stanfield
Culberson	King	Norbeck	Townsend
Cummins	Ladd	Norris	Watson, Ga.
Elkins	La Follette	Owen	Weller
Fernald	Lenroot	Page	Williams
Frelinghuysen	McCormick	Pittman	Willis
Harris	McKinley	Poindexter	
Hitchcock	Myers	Rawson	

So the amendment made as in the Committee of the Whole was concurred in.

The PRESIDING OFFICER. The Secretary will state the next reserved amendment.

The ASSISTANT SECRETARY. On page 67 line 19, in paragraph 339, enameled tableware, as in Committee of the Whole the Senate disagreed to the reported amendment, which proposed to strike out "30" and to insert "50."

Mr. SUTHERLAND. Mr. President, last Tuesday I was out of the city for the day attending a State convention, and during my absence the action was taken with reference to this matter, which is shown in the RECORD of that date. The Senate by a very decisive vote refused to reduce the rate of duty on enameled tableware to 25 per cent. Then, apparently under a misunderstanding, but few Senators being present in the Chamber, as I have been informed, on the question being put, in the opinion of the Chair, the committee amendment was disagreed to.

The committee went very carefully over all the facts relating to the manufacture of enameled ware, and, based upon the statements of production costs in this country and abroad, while it was shown that it would really require a much larger rate than that proposed by the committee to equalize the difference between the cost of production in this country and abroad, the committee decided to impose a rate of duty at 50 per cent, which was regarded as being very fair and reasonable.

The rate under the Payne-Aldrich law, I believe, was 40 per cent. The conditions now are, of course, very different from those which then existed, owing to the debasement of currencies in countries on the other side of the ocean. When the Underwood bill was passed importations of these articles increased immediately to the extent of 25 per cent. That occurred during the few months when the Underwood law was in operation before the World War began. The importations have been increasing very largely also in the last few months.

I ask that the rate recommended by the Committee on Finance of 50 per cent on this item may stand, because from the investigations which were conducted by the committee the imposition of that rate is absolutely necessary in order to maintain this industry in competition with the industry abroad.

The PRESIDING OFFICER. The Senator from West Virginia, then, desires that the Senate shall nonconcur in the amendment which was made as in Committee of the Whole?

Mr. SUTHERLAND. I desire that the Senate shall nonconcur in the amendment which was so made but shall restore the rate of duty which was reported by the committee.

The PRESIDING OFFICER. If the committee amendment shall be disagreed to the rate will be restored.

Mr. SUTHERLAND. Yes.

Mr. JONES of New Mexico. Mr. President, I merely wish to state that in 1913 we exported large quantities of enameled tableware, the exports going principally to Canada, Argentina, Mexico, England, and Cuba. Since that time our exports have increased enormously.

I do not understand just what would be the effect of the question as submitted to the Senate by the Chair. The House proposal was for a duty of 30 per cent, and that is the rate which now stands. I think the Senator from West Virginia would have to move to amend that rate by inserting another rate in order to accomplish what he has in mind.

Mr. SUTHERLAND. I will ask for a ruling of the Chair on the question.

The PRESIDING OFFICER. As the Chair understands, the committee amendment recommended that the House rate of 30 per cent be stricken out, and that a rate of 50 per cent be substituted therefor; and that that amendment was disagreed to. Therefore, the House rate of 30 per cent was left in the bill. The question is on concurring in the amendment which was made as in Committee of the Whole.

Mr. SUTHERLAND. And if it is nonconcurred in, then the original committee rate would stand, would it not, Mr. President?

The PRESIDING OFFICER. There was no amendment made by the Senate as in Committee of the Whole. The question, therefore, is on concurring in the action taken as in Committee of the Whole, as the Chair has stated. If the Senator from West Virginia does not want that action concurred in, and if it is not concurred in, then he may move to insert a different rate, the Chair assumes.

Mr. SUTHERLAND. That action would not restore the original rate which was recommended by the committee?

The PRESIDING OFFICER. The Chair does not think it would, but that it would leave the duty at the rate fixed by the House.

Mr. SUTHERLAND. Then, would it be proper to make a motion to nonconcur in the amendment made as in Committee of the Whole and restore the House rate?

The PRESIDING OFFICER. The question is on concurring in the amendment which has been made as in Committee of the Whole, and the Senator from West Virginia would want that voted down?

Mr. SUTHERLAND. Yes.

Mr. WALSH of Montana. I desire to offer a little further information about this particular commodity. Our production in 1914 was over $20,000,000 worth, and, of course, has increased very largely since. For the nine months ending in the month of March last our importations were $248,666 worth, and for the similar period of the preceding year they were $309,043 worth.

In other words, it would appear that not only our importations are inconsequential as compared with the total amount which is produced in this country but the importations are actually falling off.

Mr. SUTHERLAND. Mr. President, I move to strike out "30" and in lieu thereof to insert "50" in paragraph 339, on line 19, page 67.

The PRESIDING OFFICER. That amendment is in order. The question is on the amendment proposed by the Senator from West Virginia. [Putting the question.] In the opinion of the Chair, the "noes" have it.

Mr. SUTHERLAND. I ask for a division.

The PRESIDING OFFICER. Those in favor of the motion of the Senator from West Virginia to strike out "30" and insert "50" will rise and stand in their places and be counted. [A pause.] Those opposed will rise and stand and be counted. [A pause.] The ayes are 15 and the noes are 22. There is no quorum voting. The Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Ashurst	Frelinghuysen	McNary	Shortridge
Ball	Gerry	New	Simmons
Brandegee	Gooding	Nicholson	Smith
Broussard	Hale	Norbeck	Smoot
Bursum	Harreld	Oddie	Stanley
Calder	Harrison	Overman	Sutherland
Cameron	Heflin	Pepper	Swanson
Capper	Jones, N. Mex.	Phipps	Trammell
Curtis	Jones, Wash.	Pomerene	Underwood
Dial	Kellogg	Ransdell	Wadsworth
Dillingham	Kendrick	Rawson	Walsh, Mass.
du Pont	Keyes	Reed, Mo.	Walsh, Mont.
Ernst	Lodge	Reed, Pa.	Warren
Fletcher	McCumber	Robinson	
France	McLean	Sheppard	

The PRESIDENT pro tempore. Fifty-eight Senators have answered to their names. There is a quorum present.

Mr. SUTHERLAND. Mr. President, I ask for a yea-and-nay vote on my motion to restore the rate recommended by the committee.

Mr. ROBINSON. Mr. President, I desire to be heard on the amendment.

A moment ago the Senate took a division on the pending amendment, and it appeared from the division that the amendment was lost. The then occupant of the chair saw fit to announce the vote on the amendment, which, of course, disclosed that a quorum had not voted. Throughout the proceedings on this bill, certainly during the last 24 hours, a quorum has not voted on any division. I wonder if the count had disclosed the reverse of what was actually shown, namely, that the amendment had been agreed to, if the then occupant of the chair would have seen fit to announce the count and then declare the absence of a quorum. I wonder if it is the policy to compel a quorum to vote upon all votes by a division. If that is the case, it will result in a record vote upon every issue that hereafter arises, for we do not propose to have the Chair compel a quorum to

vote on a division when the result of the vote does not suit the individual who happens to be in the chair and to have the other rule applied when the count pleases the occupant of the chair.

Of course these remarks do not apply to the President pro tempore. The President pro tempore, the Senator from Iowa [Mr. CUMMINS], has usually made the count, and in accordance with the practice in the Senate has announced the result without compelling on his own motion the attendance of a quorum. The object of taking the vote by division instead of by roll call usually is to avoid the necessity of compelling the attendance of a quorum.

In view of the course that this matter has taken, in view of the fact that the amendment proposed by the Senator from West Virginia was lost by a large vote, and the occupant of the Chair saw fit to announce the count, I hope the Senate will stand by its action upon the division and defeat the amendment.

Mr. BRANDEGEE. Mr. President, the Senator says that the occupant of the Chair saw fit to announce that there was no quorum present in view of the fact that the vote had gone as it did. I hope the Senator will believe me when I say to him that, in my opinion, where there has been a viva voce vote and a Member of the Senate asks for a division for the purpose of a more accurate count, and there is a division by a rising vote, the Senate is entitled to know how many voted "yea" and how many voted "nay." I never have agreed with the practice which was established by former Vice President Marshall, as I recall.

Mr. ROBINSON. Mr. President, will the Senator yield for a question?

Mr. BRANDEGEE. Certainly.

Mr. ROBINSON. The Senator admits that it has been the practice of the Senate and has been the practice during the course of the consideration of this bill to pursue the other course, namely, to declare the result without announcing the number unless, of course, some Senator demanded the number?

Mr. BRANDEGEE. I agree to that entirely. It has been the practice, and I think the very unwise practice for this reason: The object of asking for a division is that a Senator may not have his rights decided simply by the sound, which is no criterion whatever of the number who have voted, but may see those who stand up and vote. The count is taken so quickly by the clerks—it is not done by the Chair, as the Senator knows, but is done by the clerks and reported to the Chair—it is done so quickly that a Senator does not have time himself to count the yeas and then to count the nays; so that if the count discloses the absence of a quorum and the Chair knows it, the Chair has the right to make the point of no quorum just as much as any Senator on the floor has.

Mr. ROBINSON. I have not questioned the power of any Senator to make the point of no quorum.

Mr. BRANDEGEE. I understand that. I am simply saying that in the course of my remarks to justify myself, because I say to the Senator that I should make the point of no quorum no matter which way the vote had gone, because I believe that a quorum ought to vote. Nevertheless, I think it is the right of the Senate, whether a quorum always ought to vote or not, to know the number of those who voted "yes" and the number who voted "no."

Mr. ROBINSON. Will the Senator permit me to interrupt him?

Mr. BRANDEGEE. Certainly.

Mr. ROBINSON. If any Senator desires to do so, he certainly has the right to make that demand. I doubt, under the precedents and practices of the Senate, the propriety of the occupant of the chair volunteering to do so, unless he chooses to exercise his right to demand the presence of a quorum, which I have conceded from the beginning he has the power to do; but the effect of the action taken by the Senator from Connecticut in the chair is to compel a record vote upon all of these amendments and the attendance of a quorum.

Mr. BRANDEGEE. Why, the idea of it and the effect of it is to have entered upon the RECORD, so that the public may see, the number who voted "yes" and the number who voted "no." I have always announced publicly, from the chair and otherwise, that whenever I was called to preside over the Senate I should never maintain a secret the number of those that were whispered to me by the clerk as having voted "yes" or having voted "no," but should make announcement of the fact; and if I do make an announcement and less than a quorum has voted I have the right, as the Senator admits, to make the point of no quorum.

Mr. LODGE. Mr. President, the Senator has the right to make the point of no quorum in his capacity as a Senator; there is no doubt about that; but, in my judgment, he has no right to say that because the rising vote does not disclose a quorum there is not a quorum present. There may be a quorum present. He has no authority whatever to go upon. There may be Senators sitting here who have not risen. It does not follow in the least because the rising vote shows less than a quorum that there is not a quorum sitting in the Chamber at that moment.

Mr. BRANDEGEE. No; it does not.

Mr. LODGE. And it never can disclose it.

Mr. BRANDEGEE. No; it can not.

Mr. ROBINSON. Mr. President, if the Senator will yield, the Senator from Massachusetts, in my opinion, is absolutely correct. The only official way in which the absence of a quorum can be determined is either upon a call of the Senate for that purpose or upon a record vote. That is the object of demanding a record vote. You can not get the advantage of failing to take a record vote and the speed of action that results therefrom unless, when your side of the proposition loses, you are willing to take your medicine.

Mr. BRANDEGEE. I am always willing to take my medicine. It is very sweet medicine for me to take to ascertain the truth. As I say, if I stated in my remark that a quorum was not voting, I would not contend that because——

Mr. LODGE. My point is——

Mr. McCUMBER. Mr. President, I call for the regular order.

Mr. LODGE. My point is that the announcement by the Chair of the number of Senators who have voted on a rising vote does not disclose the absence of a quorum, and no amount of announcing it will make it disclose the absence of a quorum. Nothing will disclose the absence of a quorum except a call of the Senate.

The PRESIDENT pro tempore. The Chair will observe that that is not the question now before the Senate. The question is on agreeing to the amendment of the Senator from West Virginia.

Mr. LODGE. It is a question of order that has been raised, and a very important one.

Mr. JONES of New Mexico. Mr. President, a parliamentary inquiry.

Mr. LODGE. I raise the point of order——

The PRESIDENT pro tempore. And the Chair sustains it.

Mr. LODGE. I raise the point of order that the declaration of a rising vote does not disclose the absence of a quorum. I want to make that a part of the RECORD.

The PRESIDENT pro tempore. The Chair understands that since that time there has been a call of the Senate, which has developed a quorum, and therefore the question is upon agreeing to the amendment of the Senator from West Virginia.

Mr. UNDERWOOD. But, Mr. President——

Mr. ROBINSON. Mr. President, I make the point of order that that amendment was rejected. It follows as a matter of law from the sustaining of the point made by the Senator from Massachusetts that upon the vote that was taken and declared by the then occupant of the chair, the amendment of the Senator from West Virginia was rejected.

Mr. LODGE. Undoubtedly.

Mr. ROBINSON. I make that point, and therefore that the question does not now recur upon the amendment of the Senator from West Virginia, but upon the next amendment reserved.

The PRESIDENT pro tempore. The Chair feels bound by the decision of the then occupant of the chair, and the only manner in which that decision could be reversed would be upon appeal from his decision.

Mr. SUTHERLAND. Mr. President, I ask for a yea-and-nay vote on my amendment.

The PRESIDENT pro tempore. The Chair holds that the question is upon agreeing to the amendment proposed by the Senator from West Virginia.

Mr. SUTHERLAND. Upon that I ask for the yeas and nays.

The PRESIDENT pro tempore. The Senator from West Virginia asks for the yeas and nays. Is the request seconded?

Mr. SUTHERLAND. Mr. President, as I understand now, the question is upon the amendment which I offered to the paragraph before the Senate, which was to restore the committee rate of 50 per cent in this paragraph. On that I ask for the yeas and nays.

Mr. ROBINSON. Mr. President, within my time, which I have not quite consumed, I point out to the present occupant of the chair, the President pro tempore, that there was an express ruling by the then occupant of the chair that a quorum had not voted. The occupant of the chair did not pass upon the question as to whether the amendment had been

agreed to. He saw fit to declare that a quorum had not voted, and to order the calling of the roll for the purpose of determining whether a quorum was present. In accordance with the ruling that the Chair made a few moments ago, when the Chair announced that 14 Senators had voted "yea" and 21 Senators had voted "nay," it followed as a matter of law that the amendment was rejected; and the suggestion of the absence of a quorum by the Senator from Connecticut did not vitiate the action already taken by the Senate. It simply means, if this practice is to be pursued, that when you demand a division and lose, after having lost, if the occupant of the chair is willing to do so and to lend himself to that sort of parliamentary practice, you can have another test of the matter, to try the case over again.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment.

Mr. SUTHERLAND. I should like to have the Chair rule as to what I can do now in order to get the matter——

The PRESIDENT pro tempore. The Secretary will state the amendment now pending.

The ASSISTANT SECRETARY. On page 67, on line 19, it is proposed to strike out "30" and insert "50."

Mr. ROBINSON. Mr. President, I make the point of order that that amendment has been disposed of by the Senate.

The PRESIDENT pro tempore. There is no record before the Chair that will enable him to rule upon that point of order.

Mr. ROBINSON. I make the point of order that the announcement of the vote by the occupant of the chair automatically effected the defeat of the amendment, and that that amendment is not now before the Senate. I want that passed upon, so that I can appeal from the decision of the Chair if the Chair overrules my point of order.

The PRESIDENT pro tempore. In order to enable the Senate to decide the matter the Chair overrules the point of order.

Mr. ROBINSON. Mr. President, from the decision of the Chair I respectfully appeal, and on that question I demand the yeas and nays.

The yeas and nays were ordered.

Mr. WATSON of Indiana. I move to lay the appeal on the table.

Mr. JONES of New Mexico. Upon that motion I ask for the yeas and nays.

The PRESIDENT pro tempore. The Chair must state the question first. The question is, Shall the ruling of the Chair stand as the judgment of the Senate?

Mr. ROBINSON. No, Mr. President; a point of order. That is not the question. The question is upon the motion of the Senator from Indiana, who moved to lay my appeal upon the table.

The PRESIDENT pro tempore. The Chair has not yet concluded his statement. The Sentaor from Indiana moves to lay the appeal upon the table, and the yeas and nays have been demanded upon that question. Is the demand seconded? It is sufficiently seconded, and the Secretary will call the roll.

The reading clerk proceeded to call the roll.

Mr. HARRISON (when his name was called). I transfer my pair with the Senator from West Virginia [Mr. ELKINS] to the Senator from Montana [Mr. MYERS] and vote "nay."

Mr. POMERENE (when his name was called). I transfer my pair with my colleague [Mr. WILLIS], heretofore announced, to the senior Senator from Texas [Mr. CULBERSON].

The roll call was concluded.

Mr. DILLINGHAM (after having voted in the affirmative). I have already voted, but I observe that the junior Senator from Virginia [Mr. GLASS], with whom I have a general pair, has not voted. I therefore transfer that pair to the senior Senator from Minnesota [Mr. NELSON] and allow my vote to stand.

Mr. JONES of Washington (after having voted in the affirmative). I understand the senior Senator from Virginia [Mr. SWANSON] has not voted. He told me a short time ago that he had to leave the Senate for a while, and I agreed to pair with him. I transfer my pair with that Senator to the junior Senator from Maryland [Mr. WELLER] and allow my vote to stand.

The result was announced—yeas 31, nays 31, as follows:

YEAS—31.

Ball	Edge	McLean	Phipps
Brandegee	Ernst	McNary	Rawson
Calder	France	Moses	Reed, Pa.
Cameron	Gooding	New	Shortridge
Capper	Hale	Newberry	Smoot
Colt	Harreld	Norbeck	Sutherland
Dillingham	Jones, Wash.	Oddie	Watson, Ind.
du Pont	Keyes	Pepper	

NAYS—31.

Ashurst	Hitchcock	Pomerene	Stanley
Broussard	Jones, N. Mex.	Ransdell	Sterling
Dial	Kellogg	Reed, Mo.	Trammell
Fletcher	Kendrick	Robinson	Underwood
Frelinghuysen	Lodge	Sheppard	Wadsworth
Gerry	McCumber	Shields	Walsh, Mass.
Harrison	McKellar	Simmons	Walsh, Mont.
Heflin	Overman	Smith	

NOT VOTING—34.

Borah	Harris	Nelson	Swanson
Bursum	Johnson	Nicholson	Townsend
Caraway	King	Norris	Warren
Culberson	Ladd	Owen	Watson, Ga.
Cummins	La Follette	Page	Weller
Curtis	Lenroot	Pittman	Williams
Elkins	McCormick	Poindexter	Willis
Fernald	McKinley	Spencer	
Glass	Myers	Stanfield	

So the Senate refused to lay the appeal from the decision of the Chair on the table.

The PRESIDENT pro tempore. The question now is, Shall the ruling of the Chair stand as the judgment of the Senate? The yeas and nays have been ordered.

Mr. SHORTRIDGE. Mr. President, a parliamentary inquiry.

The PRESIDENT pro tempore. The Senator will state his inquiry.

Mr. SHORTRIDGE. What is the question to be voted upon?

The PRESIDENT pro tempore. The question is, Shall the ruling of the Chair made upon the point of order presented by the Senator from Arkansas [Mr. ROBINSON] stand as the judgment of the Senate on which the yeas and nays have been ordered?

The reading clerk proceed to call the roll.

Mr. DILLINGHAM (when his name was called). Making the same announcement as to my pair and its transfer as before, I vote "yea."

Mr. HARRISON (when his name was called). Making the same announcement as before, I vote "nay."

Mr. JONES of Washington (when his name was called). Making the same announcement with reference to my pair and its transfer as before, I vote "yea."

Mr. POMERENE (when his name was called). Again transferring my pair with my colleague [Mr. WILLIS] to the senior Senator from Texas [Mr. CULBERSON], I vote "nay."

The roll call having been concluded, resulted—yeas 33, nays 30, as follows:

YEAS—33.

Ball	Edge	McLean	Rawson
Brandegee	Ernst	McNary	Reed, Pa.
Bursum	France	Moses	Shortridge
Calder	Gooding	New	Smoot
Cameron	Hale	Newberry	Sutherland
Capper	Harreld	Norbeck	Watson, Ind.
Colt	Jones, Wash.	Oddie	
Dillingham	Keyes	Pepper	
du Pont	Lenroot	Phipps	

NAYS—30.

Ashurst	Jones, N. Mex.	Ransdell	Sterling
Broussard	Kellogg	Reed, Mo.	Trammell
Dial	Kendrick	Robinson	Underwood
Fletcher	Lodge	Sheppard	Wadsworth
Gerry	McCumber	Shields	Walsh, Mass.
Harrison	McKellar	Simmons	Walsh, Mont.
Heflin	Overman	Smith	
Hitchcock	Pomerene	Stanley	

NOT VOTING—33.

Borah	Harris	Nicholson	Townsend
Caraway	Johnson	Norris	Warren
Culberson	King	Owen	Watson, Ga.
Cummins	Ladd	Page	Weller
Curtis	La Follette	Pittman	Williams
Elkins	McCormick	Poindexter	Willis
Fernald	McKinley	Spencer	
Frelinghuysen	Myers	Stanfield	
Glass	Nelson	Swanson	

The PRESIDENT pro tempore. On this question the yeas are 33 and the nays are 30. So the ruling of the Chair stands as the judgment of the Senate. The question is now upon the amendment proposed by the Senator from West Virginia to the amendment made as in Committee of the Whole, on which the yeas and nays have been ordered.

The reading clerk proceeded to call the roll.

Mr. HARRISON (when his name was called). Making the same announcement as before, I vote "nay."

Mr. JONES of Washington (when his name was called). Announcing my pair as before, I desire to state that I am informed that my pair, the senior Senator from Virginia [Mr. SWANSON], would vote the same as I shall vote, and therefore I am at liberty to vote. I vote "nay."

Mr. McCUMBER (when his name was called). I have a general pair with the junior Senator from Utah [Mr. KING]. I do not know to whom I could transfer that pair, and I therefore withhold my vote.

Mr. POMERENE (when his name was called). I again transfer my pair with my colleague [Mr. WILLIS] to the senior Senator from Texas [Mr. CULBERSON] and vote "nay."

Mr. WATSON of Indiana (when his name was called). Making the same announcement as before as to my pair and its transfer, I vote "yea."

The roll call having been concluded, the result was announced—yeas 20, nays 44, as follows:

YEAS—20.

Ball	Cameron	McNary	Reed, Pa.
Brandegee	Edge	Norbeck	Shortridge
Broussard	Frelinghuysen	Oddie	Sutherland
Bursum	Gooding	Pepper	Wadsworth
Calder	McLean	Phipps	Watson, Ind.

NAYS—44.

Ashurst	Glass	Lodge	Sheppard
Capper	Harreld	McKellar	Shields
Colt	Harrison	Moses	Simmons
Cummins	Heflin	New	Smith
Curtis	Hitchcock	Newberry	Smoot
Dial	Jones, N. Mex.	Overman	Stanley
Dillingham	Jones, Wash.	Pomerene	Sterling
Ernst	Kellogg	Ransdell	Trammell
Fletcher	Kendrick	Rawson	Underwood
France	Keyes	Reed, Mo.	Walsh, Mass.
Gerry	Lenroot	Robinson	Walsh, Mont.

NOT VOTING—32.

Borah	Johnson	Nelson	Stanfield
Caraway	King	Nicholson	Swanson
Culberson	Ladd	Norris	Townsend
du Pont	La Follette	Owen	Warren
Elkins	McCormick	Page	Watson, Ga.
Fernald	McCumber	Pittman	Weller
Hale	McKinley	Poindexter	Williams
Harris	Myers	Spencer	Willis

So Mr. SUTHERLAND's amendment to the amendment made as in Committee of the Whole was rejected.

The ASSISTANT SECRETARY. In the same paragraph, paragraph 339, and in the following line, aluminum tableware, in Committee of the Whole, on page 67, line 20, the Senate struck out "28" and inserted in lieu "15 cents per pound and 60," so that when amended it will read "composed wholly or in chief value of aluminum, 15 cents per pound and 60 per cent ad valorem." Reserved by the Senator from New Mexico [Mr. JONES].

Mr. JONES of New Mexico. Mr. President, this relates to aluminum ware and has been fully discussed, but I think we ought to have another vote on it. Senators will observe that there is a specific duty of 15 cents per pound, which is fully compensatory for the duties which were levied upon sheet aluminum. Aluminum ware is produced solely by one concern in the United States, and the importations, in my opinion, do not justify the rate.

I move to strike out the numeral "60" and insert "30." That would leave a specific duty of 15 cents per pound and an ad valorem duty of 30 per cent.

The PRESIDENT pro tempore. The Secretary will report the proposed amendment to the amendment.

The ASSISTANT SECRETARY. On page 67, in line 21, in the amendment, strike out "60" and insert "30," so that if amended it would read "15 cents per pound and 30 per cent ad valorem."

Mr. JONES of New Mexico. Upon that I ask for the yeas and nays.

The yeas and nays were ordered and the Assistant Secretary proceeded to call the roll.

Mr. HARRISON (when his name was called). Making the same announcement as before, I vote "yea."

Mr. McCUMBER (when his name was called). I transfer my general pair with the junior Senator from Utah [Mr. KING] to the junior Senator from Washington [Mr. POINDEXTER] and vote "nay."

Mr. POMERENE (when his name was called). Again transferring my pair with my colleague [Mr. WILLIS] to the senior Senator from Texas [Mr. CULBERSON], I vote "yea."

The roll call having been concluded, the result was announced—yeas 30, nays 35, as follows:

YEAS—30.

Ashurst	Harrison	Pomerene	Smith
Borah	Heflin	Ransdell	Stanley
Capper	Hitchcock	Rawson	Trammell
Cummins	Jones, N. Mex.	Reed, Mo.	Underwood
Dial	Kellogg	Robinson	Walsh, Mass.
Fletcher	Kendrick	Sheppard	Walsh, Mont.
Gerry	McKellar	Shields	
Glass	Overman	Simmons	

NAYS—35.

Ball	du Pont	Lodge	Pepper
Brandegee	Edge	McCumber	Phipps
Broussard	Ernst	McLean	Shortridge
Bursum	Frelinghuysen	McNary	Smoot
Calder	Gooding	Moses	Sterling
Cameron	Hale	New	Sutherland
Colt	Harreld	Newberry	Wadsworth
Curtis	Keyes	Nicholson	Warren
Dillingham	Lenroot	Oddie	

NOT VOTING—31.

Caraway	King	Norris	Swanson
Culberson	Ladd	Owen	Townsend

So the amendment of Mr. JONES of New Mexico to the amendment made as in Committee of the Whole was rejected.

The PRESIDENT pro tempore. The question now is upon concurring in the amendment made as in Committee of the Whole.

The amendment was concurred in, there being on a division—ayes 33, noes 20.

The PRESIDENT pro tempore. The Secretary will state the next amendment reserved.

The ASSISTANT SECRETARY. On page 83, paragraph 371, bicycles, reserved by the Senator from New York [Mr. CALDER].

Mr. CALDER. Mr. President, I submit the amendment which I send to the desk.

The PRESIDENT pro tempore. The Secretary will report the amendment proposed by the Senator from New York.

The ASSISTANT SECRETARY. On page 83, line 8, strike out "30" and insert "45," so as to read "bicycles and parts thereof, not including tires, 45 per cent ad valorem."

Mr. CALDER. Mr. President, the amendment offered places a duty on bicycles exactly as recommended by the Finance Committee. This rate was arrived at after a careful study of all the facts. This business is entitled to protection. The bill as it came from the House provided a duty of 30 per cent on the basis of American valuation. The duty under the Payne-Aldrich law was 45 per cent.

The industry is a large one in this country and produces about $5,000,000 worth of bicycles every year. It has had a most difficult task in the past to contend with foreign competition. It is also true that some importations have taken place since the war, but there was a very heavy importation before the war. I might say that bicycles sold in this country to-day are no higher in price than they were before the war, because in this country there is very severe competition. I trust the amendment may be agreed to.

Mr. SIMMONS. Mr. President, I do not care to discuss the question at length, but it seems to me from the statement of the Senator from New York that no case for this high duty is made out. The Senator admits that importations to this country at this time are very small, and that they are not as large as they were before the war. The Senator, however, asks that the duty be imposed upon the ground that there is competition among the domestic manufacturers, but I can not conceive of that being a reason for the imposition of a duty.

Mr. CALDER. If the Senator will permit me, I might add that to-day there are many orders being taken in this country for the English production.

Mr. SIMMONS. Mr. President, before the World War, when imports were much larger than they now are, we were competing with great Britain, and instead of imports having increased they have declined. Of course, orders are now being taken, if we are buying from abroad at all, as orders were taken before the war. That does not prove anything at all. But I had understood, Mr. President, that in the production of automobiles, of motor cycles, and bicycles, and all the articles which are used as vehicles of travel, we in the United States were upon a basis of production cost that gave us at least a fair opportunity for competition with any country in the world producing like articles. The American automobile and the American motor cycle and the American bicycle have found a market in every country in the world in competition with like products of every other country. It would seem under those circumstances that we do not need a 45 per cent duty in order to protect the American manufacturer in the production of such articles.

We have not at this time any serious competition from Germany in the manufacture of any of these articles. The old cry of cheap German production does not avail with reference to America. Our competitor is not Germany, but our competitors are countries that are more nearly equal to us than is Germany in the cost of production.

If it is necessary, Mr. President, to protect these articles to the extent of 45 per cent duty, then it is necessary to protect everything that is produced in the United States to a like extent, for if we can not maintain competition with reference to these articles, in the manufacture of which we are the pioneers and the chief producers in the world, then we can not compete with the world in anything.

Mr. President, we are the greatest exporters in the world; our exportations of various products to-day amount in value to over $4,000,000,000. Those products are sold in the world, in competition with the balance of the world. There is no article which we produce and sell abroad in which the conditions of competition are more advantageous to us than they are in these particular articles.

Mr. CALDER. Will the Senator permit me to interrupt him?

Mr. SIMMONS. Yes.

Mr. CALDER. I desire to say that the exports of these vehicles are almost entirely of motor cycles.

Mr. SIMMONS. I am not talking particularly about exports; I am talking about our ability to manufacture articles of this character in competition with the world. If we can not compete against the world in these articles, we can not compete in any articles. No country has specialized to a greater extent than we in the production of motor and other vehicles. There is no country which has been able to invent and discover machinery and methods of production which tend to reduce cost in the production of automobiles, motor cycles, and bicycles to a greater extent than has the United States.

Mr. President, I hope the Senate will not increase this rate. It is already too high.

The PRESIDENT pro tempore. The question is on agreeing to the amendment offered by the Senator from New York.

Mr. SIMMONS. I ask for the yeas and nays.

The yeas and nays were ordered, and the Assistant Secretary proceeded to call the roll.

Mr. McCUMBER (when his name was called). Transferring my pair as on the previous vote, I vote "nay."

Mr. POMERENE (when his name was called). Again announcing my pair with my colleague [Mr. WILLIS], I transfer that pair to the senior Senator from Texas [Mr. CULBERSON] and vote "nay."

Mr. WATSON of Indiana (when his name was called). Making the same announcement as before concerning my pair and its transfer, I vote "yea."

The roll call having been concluded, the result was announced—yeas 23, nays 38, as follows:

YEAS—23.

Ball	Ernst	Keyes	Phipps
Bursum	France	McNary	Reed, Pa.
Calder	Frelinghuysen	New	Shortridge
Cameron	Gooding	Nicholson	Wadsworth
du Pont	Hale	Oddie	Watson, Ind.
Edge	Harreld	Pepper	

NAYS—38.

Broussard	Hitchcock	Pomerene	Stanley
Capper	Jones, N. Mex.	Ransdell	Sterling
Cummins	Kellogg	Rawson	Sutherland
Curtis	Kendrick	Reed, Mo.	Trammell
Dial	Lenroot	Robinson	Underwood
Dillingham	McCumber	Sheppard	Walsh, Mass.
Fletcher	Moses	Shields	Walsh, Mont.
Gerry	Myers	Simmons	Warren
Glass	Newberry	Smith	
Heflin	Overman	Smoot	

NOT VOTING—35.

Ashurst	Harrison	McKinley	Spencer
Borah	Johnson	McLean	Stanfield
Brandegee	Jones, Wash.	Nelson	Swanson
Caraway	King	Norbeck	Townsend
Colt	Ladd	Norris	Watson, Ga.
Culberson	La Follette	Owen	Weller
Elkins	Lodge	Page	Williams
Fernald	McCormick	Pittman	Willis
Harris	McKellar	Poindexter	

So Mr. CALDER'S amendment to the amendment was rejected.

The PRESIDENT pro tempore. The question now is upon concurring in the amendment in paragraph 371 made as in Committee of the Whole.

The amendment was concurred in.

The PRESIDENT pro tempore. The Secretary will state the next amendment reserved.

The ASSISTANT SECRETARY. On page 83, paragraph 372, textile machinery, reserved by the Senator from New Mexico [Mr. JONES].

Mr. JONES of New Mexico. Mr. President, the amendment to which I desire to call attention relates to the basket clause on page 84, line 5, covering articles not specially provided for. The rate originally reported by the committee was 50 per cent, but the committee brought in a subsequent amendment reducing that to 35 per cent. The clause reads:

Knitting, braiding, and insulating machines, and all other textile machinery or parts thereof, finished or unfinished, not specially provided for, 35 per cent ad valorem.

I have no objection at this time regarding the machines, but I wish to call the attention of the Senate to the effect of that part of the language which includes "machinery not specially provided for."

I wish to give some prices of American-made machines and the prices of English-made machines. It will be observed that the prices of the English-made machines to which this rate of duty applies are just about twice, on the average, the American prices.

I read:

The price of an American carding machine is $925. The landed cost of a similar English machine, exclusive of duty, is $1,413. The landed cost of the English machine, including the present duty, which is 20 per cent, is $1,674.

The price of an American drawing frame is $830. The price of the English frame, without duty, is $1,427; and with the present duty of 20 per cent it is $1,697, or more than twice the price of the American machine.

The price of an American intermediate machine is $1,430. The price of the same English machine, exclusive of duty, is $2,315. With the present duty, it is $2,756.

The price of an American finisher lapper is $1,300. The English price, without duty, is $2,565. With the present duty, it is $3,048.

Mr. President, on line 3, after the word "machines," I move to insert "35 per cent ad valorem; all other textile machinery, or parts thereof, finished or unfinished, not specially provided for, 20 per cent ad valorem."

Mr. McCUMBER. Mr. President, the Senator is not reading from the paragraph as it was amended on the motion of the committee in the Senate, and he will have to consider the committee amendments if he wants to change them. The committee amendment reads, as I remember, that on page 84 we struck out all of the matter beginning with the word "knitting," in line 3, down to and including "ad valorem," on line 5, and inserted in lieu thereof the following:

Knitting, braiding, lace-braiding, and insulating machines, and all other similar textile machinery, or parts thereof, finished or unfinished, not specially provided for, 50 per cent ad valorem; all other textile machinery, or parts thereof, finished or unfinished, not specially provided for, 50 per cent ad valorem; all other textile machinery, or parts thereof, finished or unfinished, not specially provided for, 35 per cent ad valorem.

That is the way it now stands.

Mr. JONES of New Mexico. I thank the Senator for advising me on that point. Referring to the last numeral there, "35 per cent," which covers the class of machinery to which I have just made reference, I move to strike out "35" and insert "20."

The PRESIDENT pro tempore. The Secretary will state the amendment proposed by the Senator from New Mexico to the amendment made as in Committee of the Whole.

The ASSISTANT SECRETARY. In the amendment inserted on page 84, after "ad valorem," in line 5, it is proposed to strike out "35" where it occurs in the last line of the amendment and to insert in lieu thereof "20."

Mr. JONES of New Mexico. Upon that I ask for the yeas and nays.

The yeas and nays were ordered, and the Assistant Secretary proceeded to call the roll.

Mr. POMERENE (when his name was called). I again transfer my pair with my colleague [Mr. WILLIS] to the senior Senator from Texas [Mr. CULBERSON] and will vote. I vote "yea."

Mr. WATSON of Indiana (when his name was called). Making the same announcement as before, I vote "nay."

The roll call was concluded.

Mr. HARRISON. I transfer my general pair with the Senator from West Virginia [Mr. ELKINS] to the senior Senator from Tennessee [Mr. SHIELDS] and will vote. I vote "yea."

Mr. JONES of Washington (after having voted in the negative). Making the same announcement as before with reference to my pair and its transfer, I will allow my vote to stand.

Mr. CURTIS. I have been requested to announce the following general pairs:

The Senator from Michigan [Mr. TOWNSEND] with the Senator from Wisconsin [Mr. LA FOLLETTE];

The Senator from California [Mr. JOHNSON] with the Senator from Georgia [Mr. WATSON];

The Senator from Illinois [Mr. MCKINLEY] with the Senator from Arkansas [Mr. CARAWAY]; and

The Senator from Missouri [Mr. SPENCER] with the Senator from Georgia [Mr. HARRIS].

The result was announced—yeas 22, nays 43, as follows:

YEAS—22.

Ashurst	Heflin	Pomerene	Trammell
Dial	Hitchcock	Ransdell	Underwood
Fletcher	Jones, N. Mex.	Robinson	Walsh, Mass.
Gerry	McKellar	Sheppard	Walsh, Mont.
Glass	Myers	Simmons	
Harrison	Overman	Smith	

NAYS—43.

Ball	Bursum	Capper	Curtis
Brandegee	Calder	Colt	Dillingham
Broussard	Cameron	Cummins	du Pont

Edge	Kellogg	New	Shortridge
Ernst	Keyes	Newberry	Smoot
France	Lenroot	Nicholson	Sterling
Frelinghuysen	Lodge	Oddie	Sutherland
Gooding	McCumber	Pepper	Wadsworth
Hale	McLean	Phipps	Warren
Harreld	McNary	Rawson	Watson, Ind.
Jones, Wash.	Moses	Reed, Pa.	

NOT VOTING—31.

Borah	King	Owen	Stanley
Caraway	Ladd	Page	Swanson
Culberson	La Follette	Pittman	Townsend
Elkins	McCormick	Poindexter	Watson, Ga.
Fernald	McKinley	Reed, Mo.	Weller
Harris	Nelson	Shields	Williams
Johnson	Norbeck	Spencer	Willis
Kendrick	Norris	Stanfield	

So the amendment of Mr. JONES of New Mexico to the amendment made as in Committee of the Whole was rejected.

The PRESIDENT pro tempore. The question now is upon concurring in the amendment made as in Committee of the Whole.

The amendment was concurred in.

Mr. JONES of New Mexico. Mr. President, I withdraw the special request regarding paragraph 382, on page 86.

The PRESIDENT pro tempore. The question now is upon concurring in the amendments made in that paragraph as in Committee of the Whole.

The amendments made as in Committee of the Whole were concurred in.

The ASSISTANT SECRETARY. The next amendment reserved is on page 91, paragraph 402, which also includes a paragraph of the free list—paragraph 1683, on page 238, the tariff regarding logs.

Mr. JONES of Washington. Mr. President, I know the sentiment of the Senate with reference to this item, and I shall not take the time of the Senate to ask for a vote upon it, but will allow it to go to conference. I withdraw my request for a further consideration, and it may be voted upon.

The PRESIDENT pro tempore. The request for a separate vote being withdrawn, the question is upon concurring in the amendments made as in Committee of the Whole.

The amendments were concurred in.

Mr. JONES of Washington. That also includes the item on the free list.

The PRESIDENT pro tempore. Does the Senator also withdraw the reservation in regard to paragraph 1683?

Mr. JONES of Washington. I withdraw my request as to the item in the free list that covers the same matter.

The PRESIDENT pro tempore. The reservation having been withdrawn, the question is, Will the Senate concur in the amendments made as in Committee of the Whole in paragraph 1683?

The amendments were concurred in.

The ASSISTANT SECRETARY. The next amendment reserved is on page 93, paragraph 408, relative to shingles.

Mr. JONES of Washington. Mr. President, the Senate has expressed itself very emphatically with reference to that. I know there will be no change in the vote, and I therefore shall not take the time of the Senate to give further consideration to that amendment. I withdraw my request and will allow it to come to a vote.

The PRESIDENT pro tempore. The question is upon concurring in the amendment made as in Committee of the Whole in paragraph 408.

The amendment was concurred in.

The ASSISTANT SECRETARY. On page 95, line 18, in the sugar schedule, where in Committee of the Whole the Senate changed the rate on sugar testing by the polariscope above 50 sugar degrees, and not above 75 sugar degrees, the Senate struck out "1 16/100" in the House text and inserted in lieu thereof "1 25/100."

Mr. HARRISON. I desire to offer an amendment to that.

The PRESIDENT pro tempore. The Secretary will state the amendment.

The ASSISTANT SECRETARY. The Senator from Mississippi moves to strike out "1 25/100 cents" and insert in lieu thereof the words "seventy one-hundredths of 1 cent."

Mr. HARRISON. Mr. President, when this matter was before the committee it was very fully discussed; certain assertions were made touching it and certain defenses made. I shall not rehash what was said then. The amendment I propose would place a duty of 1.4 cents a pound on sugars imported from Cuba. The bill as passed by the House and as reported by the Committee on Finance to the Senate carried a duty of 1.6 cents a pound upon Cuban sugar.

I am led to offer this amendment because of the letter I read to the Senate, written by the Senator from Utah [Mr. SMOOT], who offered this amendment raising the duty carried in the committee bill from 1.6 cents to 1.84 cents. The Senator from Utah [Mr. SMOOT] stated in the letter to General Crowder that he was head of the sugar schedule, as a member of the Committee on Finance; that he was holding it, waiting and wishing for a prompt reply to the proposition to Cuba to reduce her crop to two and a half million tons this last year, and that he would use his influence to see that the rate was placed at 1.4 cents a pound on Cuban sugar.

Mr. President, if the distinguished Senator from Utah, who knows as much about the subject as any Senator here, who has taken such a deep interest in the proposition, believed that 1.4 cents a pound on the importation of Cuban sugars was sufficient at that time to be written into the permanent law, there is no excuse or reason now for making it higher. Indeed, there is every reason, from an investigation into present-day conditions, comparing them with the conditions of last year, that the rate ought not to be even 1.4 cents a pound. I shall read the letter of the Senator from Utah to refresh the memories of the Members of the Senate, so that we can vote intelligently upon this rate, which probably means more and affects directly more consumers in this country than any other rate carried in the bill. Indeed, there is no rate in the bill which would be felt to such an extent and so quickly as will the high rate imposed on sugar. It means an increase to the consumers over the rate carried in the Underwood tariff law of practically $100,000,000.

Here is the letter which was written by the Senator from Utah, in charge of the sugar schedule, as he says in the letter——

Mr. SMOOT. The Senator is mistaken there.

Mr. HARRISON. I am going to read, and the letter can speak for itself, because I do not want to do the Senator any injustice.

Mr. SMOOT. I was not at the head of it and I was not in charge of it.

Mr. HARRISON. The Senator says at the end of the letter:

I have had the sugar schedule in the pending bill passed over until I hear definitely from you.

Mr. SMOOT. The same as many other items were passed over.

Mr. HARRISON. I am not criticizing the Senator about that. I am just saying that in the committee he had the power to hold it over, and told General Crowder, when he wrote this letter a few months ago, "Give me a quick response, because I am holding the sugar schedule over until I hear from you." Those who know the Senator realize his influence in this matter as well as in other matters coming before the Committee on Finance. Here is what he said:

DEAR GENERAL CROWDER: I hope that you will lay before the President of Cuba my attitude toward the sugar industry both of Cuba and of the United States.

I will not read the second paragraph, because that affects the bringing in of the sugar in bond and shipping it out immediately.

I am sure that the limitation of the Cuban crop of sugar for the present year—

Nothing about the years to follow, merely the present year—

to two and a half billion tons will be the solution of the problem, not only for Cuba but for the United States as well. So sure am I of this that I think that it would be wise to have incorporated into the pending tariff bill—

That is, the permanent law—

a rate of duty of 1⅛ cents per pound, which would make the duty on Cuban sugar 1.4 cents per pound.

Mr. President, I ask Senators how they can justify voting for a higher rate than 1.4 cents on the importation of Cuban sugars when this authority upon sugar says that he will use his influence to have that rate incorporated into the permanent law?

I submit that when the emergency tariff law was up last year the 1.6 cents was written into it—an increase over the Underwood permanent tariff law of 0.6 of a cent—on the theory that the price of raw sugars produced in Cuba was 1½ cents a pound, and that they needed the 1.6 cents in order to protect and safeguard the sugar-beet interests of this country.

Is that the condition now? Indeed it is not. Raw Cuban sugars are selling to-day for from 3¾ to 4 cents a pound, and the cost to make this crop in the United States is less than it was last year. So whatever justification there may have been for a 1.6-cent rate on sugars last year in the emergency tariff bill, when Cuban sugar was selling at 1½ cents a pound, could not apply now, because it is selling in Cuba, as I have said, at from 2 to 2½ cents per pound more than that.

This is a grant to the sugar-beet interests of the country, which is small, because it produces only one-tenth of the sugar

consumed in this country. It is too much, Senators; it is too big a burden to impose upon the consumers of the country.

I am not unaware of the fact that in his very powerful speech the other day the Senator from Utah, by the illustration of his charts upon the wall, impressed certain Senators that the tax on sugar was not reflected on the consumers of the country. Indeed he employed this language in speaking of me. He said:

I have heard it often stated upon the floor that the duty placed upon sugar immediately was passed on to the consumer of the country in the amount of the added duty. Is that so?

And he pointed to me when he said that.

Let us take the facts—not windjamming, but the facts.

And he said further:

Do not think that the American consumer is going to get it. History proves otherwise.

Here is what he did to you who had not investigated the question: He presented a chart showing the difference in the selling prices before the various tariff bills went into effect and afterwards; but he took the prices on dates close to the times of the passage of the tariff bills, when he knew that they did not reflect the real situation as they would if he had taken the average throughout the year.

Mr. SMOOT. Mr. President——

Mr. HARRISON. I have but 10 minutes.

Mr. SMOOT. I recognize that fact.

Mr. HARRISON. But I will yield to the Senator.

Mr. SMOOT. Oh, no; go ahead.

Mr. HARRISON. The Senator from Utah answered a question propounded by the senior Senator from Ohio [Mr. POMERENE]. He said he got those figures from Willett & Gray, I believe. I have here what Willett, of that firm, said. The Senator from Utah knows that when a tariff bill is being discussed, and some people have wool which they want to bring in, they will rush it in before the bill is passed. The same thing is true of sugar. They want to avoid the increased rate. If we are debating for three or four months the imposition of a high rate on sugar, and the refiners have it abroad, they are going to bring it in before they think the law can be passed, in order to escape the payment of the duty. So, if the Senator had gone back three or four months before the laws were passed, or had gone backward three or four months after the laws had been passed, and had taken the averages, he would have seen that the tariff is reflected in the price to the American consumer.

Here is what Mr. Willett, one of the statisticians the Senator relies upon, and from whom he obtained the statistics he pictured in his charts, said before the Hardwick committee:

I would like to have the committee satisfied that any reduction of duty goes to the consumer, and any addition of duty is paid by the consumer in any year under any duty which differs from any other duty, making necessary allowances for market fluctuations affected by supply and demand.

The PRESIDENT pro tempore. The time of the Senator has expired.

Mr. HARRISON. I can speak 10 minutes on the amendment adopted in the Committee of the Whole, can I not?

The PRESIDENT pro tempore. The Chair is of the opinion that the Senator is limited to 10 minutes. The unanimous-consent agreement reads in this way upon that point:

After the bill is reported to the Senate and unreserved amendments made in Committee of the Whole are concurred in, no Senator shall speak more than once nor longer than 10 minutes upon any reserved amendment or any amendment that may be offered in the Senate or upon any motion or motions made in regard thereto.

Mr. HARRISON. Does the Chair hold that I can not talk any longer than the 10 minutes I have occupied?

The PRESIDENT pro tempore. The Chair is of the opinion that the Senator can not talk longer than 10 minutes upon the amendment which he has offered.

Mr. NICHOLSON. I ask unanimous consent that the time of the Senator from Mississippi be extended five minutes.

Mr. McCUMBER. That can not be done under the unanimous-consent agreement.

Mr. SMOOT. Mr. President, I want to say to the Senator that in January, 1921, when the emergency tariff bill was under consideration I made a statement, and believed it to be a fact, because I had never made an investigation to find out otherwise, that the rate that was placed upon the sugar was immediately reflected in the price of the sugar to the consumers in the United States. At that time I believed it.

Following that statement upon the floor of the Senate, Mr. Ballou and also Mr. Palmer called on me in my office and said, "You evidently have not followed the history of the influence of a change in rate on the price of sugar."

I told them I believed the statement I had made. I thought whenever sugar was coming into this country at a certain rate of duty that the duty was immediately transferred to the consumer in the United States. But when I asked my clerk to get the weekly quotations on sugar from the first tariff law up until the present date I discovered the change in the price from one week to another, and in some cases from one day to another, and at times a violent change.

I wondered to myself why such a thing happened. I turned to the dates where the violent changes took place and found in every case that it was where a change of duty had been enacted into law, and found wherever the duty had been increased the price of Cuban sugar had declined, and wherever the rate of duty had been decreased the price of Cuban sugar the very next day had increased.

Every paper in Cuba is condemning the increase in the rate on sugar because of the fact that if the increase is made Cuban sugar will be just that much less in price. If that is true then the increase in the duty does not apply to the consumer in the United States. I call the Senate's attention to the fact that about three-fourths of all the sugar produced in the Cuban islands to-day is by these same refiners who have conducted the propaganda against the increase in duty.

The Senator refers to the fact that to-day Cuban sugar is selling at 3¾ to 4 cents a pound. Why is it selling for that instead of 1.6 cents as at the time when they had the sugar industry in this country by the throat and would have destroyed it, in my opinion, if strenuous efforts had not been made to save it? The reason why Cuban sugar is selling to-day at 3¾ to 4 cents a pound as against 1.6 cents, as referred to by the Senator from Mississippi, is because of the fact that the domestic sugar crop is off the market and the refiners producing sugar in Cuba bring it into this country, and double the price of sugar as soon as the domestic crop is off the market. I ask Senators, if they have the time, to read my speech on this subject delivered a few days ago. Every year as soon as the domestic crop comes upon the market sugar declines. As soon as the domestic crop is exhausted sugar increases in price.

I am not going to repeat what I said the other day, but I say now to Senators that in the figures which I gave of the prices of sugar just before the enactment of past laws affecting prices of sugar I did not in my investigation confine myself to one week before or one week following. I took the month before and I took the month after so as to be perfectly fair.

Mr. President, I want to say that it is claimed by the press and the people of Cuba that any advance in the duty on sugar decreases the price of Cuban sugar, compelling them to sell Cuban sugar at a lower figure in an amount equal to the advance in duty. I could bring into the Chamber numerous clippings from Cuban papers and every one of them contain that statement. The Senator from Mississippi and the refiners claim the advance in duty will increase the price of sugar to the American consumer. I will say frankly to the Senator from Mississippi that I thought so too until I looked into the question. It can not be true that it decreases the price of sugar in Cuba and increases the price of sugar in the United States unless the same refiners are taking a royalty on both ends.

The Senator referred to the fact that the price was affected by rushing in sugar just before a duty became effective. Does the Senator think that when the duty is lowered they are going to rush the sugar in?

Mr. HARRISON. Does the Senator ask me a question?

Mr. SMOOT. Yes; I should like an answer to that question.

Mr. HARRISON. I think without question that the higher the rate on the proposition the more it is going to be reflected on the consumers of the country, and when the rate is doubled it would naturally have an influence and cause the people in Cuba to bring the sugar here before the increased duty is imposed, of course, and that enables the big sugar people in the West to increase their prices, of course.

Mr. SMOOT. But the trouble is, when the rate was lowered, did the same thing happen? Why, Mr. President——

Mr. HARRISON. Why, of course not.

Mr. SMOOT. It came in just the same, and after the price was lowered the very next day the New York price was increased nearly in amount to the decrease in the rate of duty. That will be so as long as the refiners control the sugar, not only in Cuba but of the United States.

I want to warn Senators and I want to warn the American people that if they destroy the beet-sugar industry in this country they will pay not only the amount that they would otherwise pay in duty, but they will pay a great many times every year what the duty would amount to, and every year they will pay more than the cost of all the sugar factories in the United States. That developed in the year 1911 when the

beet-sugar crop was almost a failure, as was also the Louisiana crop.

The PRESIDENT pro tempore. The time of the Senator from Utah has expired.

Mr. GERRY. Mr. President, I should like to call the attention of the Senator to the fact that in the year 1913–14 the world produced 1,500,000 tons more of sugar than was produced in the year 1921–22. Besides that, the American market is using nearly 5,000,000 tons of sugar instead of 4,500,000 tons, with the result that there has been a demand for sugar from the Cuban market to make up the deficit of 2,000,000 tons which the world as a whole requires. The result has been that the American market has been taking something like 600,000 tons a month. That includes 66,000 tons which was refined and shipped to Europe.

It is the old question over again of the law of supply and demand. The demand was greater than the supply. As a matter of fact, for the next six months there will be only sufficient sugar from Cuba and the home market to supply something like 275,000 tons a month and this at a time of year when all the canning is being done and when there is a great demand for sweet drinks and other sugar consumptions. If we take all this into consideration, it is very easy to see why the price of sugar has gone up and why it is very likely to continue to go up in the future, especially with an added duty.

Mr. President, if under the proposal of the beet-sugar people voiced by the Senator from Utah they had been able to limit the Cuban crop to 2,500,000 tons, the country would have been in dire straits in the next six months, because the Cuban crop this year was something like 3,900,000 tons, and even with that production we are going to have a shortage of sugar.

The beet-sugar industry has been able to thrive on lower duties, as I have shown in certain statistics which I have previously put in the RECORD, and has been able to pay large dividends, is still producing large quantities of sugar and will undoubtedly continue to do so.

Mr. NICHOLSON. Mr. President, will the Senator yield for a question?

Mr. GERRY. I have only 10 minutes and can not yield. It is a most extraordinary argument which the Senator from Utah makes, if I understand him correctly, that an increased duty will not increase the price of sugar. If it will not increase the price of sugar, then there is no reason why the beet-sugar companies and the Louisiana producers should be so vociferously demanding an increased duty to protect their industries.

Mr. SMOOT. Mr. President, will the Senator yield?

Mr. GERRY. I yield to the Senator for a question.

Mr. SMOOT. I just want to say to the Senator that the only reason would be that if we had the higher rate on sugar, if it was the desire to destroy the industry entirely, we would have that guaranty that they could not do it within that limit. That is all.

Mr. GERRY. The Senator from Utah practically admits that the duty does have an effect on the sugar market and tends to hold up the price.

Another contention that has been made is that if it were not for the beet-sugar industry the market would be entirely controlled by the Cuban crop. I think the answer to that is what happened in 1920, when sugar was brought in from different parts of the world and the price dropped from something like 22 or 23 cents a pound to 6 or 7 cents a pound, if I am correct in my recollection, for I am speaking now from memory.

The beet-sugar industry, in my opinion, under the Underwood rate could supply its share of sugar and the American public would not have an added tax of something like $200,000,000 or more, for that is what this increased duty will mean with the pyramiding that always takes place when an increased duty is added—$200,000,000 or more on the American public in these hard times, when the high cost of living has such an important meaning to so many of the people.

Mr. HEFLIN. Mr. President, on the pending question I demand the yeas and nays.

Mr. BROUSSARD. Mr. President, I shall take only a moment. I wish to comment on the argument which has been made by my friend from Rhode Island [Mr. GERRY]. The statement is made that the Cuban sugar crop is short; that the world production of sugar this year is short; therefore the price is increasing, because, says the Senator, the price responds to the law of supply and demand. That is absolutely the argument that we have been making right along, that sugar, being a product universally used, has a world market; that that market fluctuates with the supply and demand, and naturally whenever a duty is put on that article when imported into this country the producer or importer must absolutely absorb that duty, just the same as he absorbs the freight. The result is, Mr. President, that it makes no difference to the consumer whether there is a duty or not, so far as the price of the article is concerned.

Mr. President, I shall not take the time to refer to the hearings before the committee in reference to this matter, but every one of the representatives of the Cuban sugar interests who testified before the Finance Committee stated that any addition in the tariff on sugar would have to be absorbed by the Cuban producer. They have made that argument here; the hearings are full of it. That exactly answers the argument which has been made by my friend from Rhode Island. This commodity in the United States has its price fixed by the world supply and demand, and whenever there is a duty placed on it those who import it here must pay that duty. That was demonstrated, Mr. President, in 1890, when under the McKinley law sugar went on the free list.

Mr. GERRY. Will the Senator yield to me?

Mr. BROUSSARD. I will yield for a question, but I should like to finish as soon as I can.

Mr. GERRY. I merely wish to ask the Senator if he does not think that the proposed duty on sugar will make the price of sugar higher?

Mr. BROUSSARD. It will not.

Mr. GERRY. Then why are the Louisiana producers of sugar so much in favor of the duty?

Mr. BROUSSARD. Of course, the Senator from Rhode Island is diverting me from my argument; but if the Senator is interested in that matter, I can explain that in a very short time. The only reason why we want a tariff on sugar is in order to put the American sugar producer, whose cost is higher than that of the Cuban producer, on a basis where there will be similarity of cost, so that in years of plentiful crops the cheap Cuban crop will not come in here and destroy the crop of the higher cost of production. That is the only reason we seek the duty. So long as the average production of sugar keeps up with the demand for sugar, these duties will not be effective, but if there shall be years when Cuba increases her production, as she did two years ago, to over 4,000,000 tons, when four years ago she only produced 2,500,000 tons, the Senator from Rhode Island can readily see that, being the cheaper producer, she will put us out of business during such years and absolutely destroy the higher cost American-produced sugar. That is why we want this duty.

However, we make the contention—and it is absolutely sound—that in the average years the duty plays no part at all, except that it brings revenue into the United States Treasury. It can not be claimed that that is not a correct proposition. There is no question that it is a correct proposition; nor is there any question that this duty is a fair one. I have read into the RECORD, and I have before me at this moment, but I shall not take the time of the Senate to read them again, statements from four governmental sources of information, including the War Finance Corporation, the Agricultural Department, and the Department of Commerce, showing that the difference of cost of production between Louisiana sugar and Cuban sugar averages over 2½ cents. The cost of the beet-sugar producer is just a little below our cost. So when I asked for a duty of 2 cents here I was strictly within the facts as established and presented to us by various departments of the Government. A duty of 1.84, Mr. President, is certainly away below 2½ cents, the difference in the cost of production; so, to my mind, we should take no action to reduce the duty of 1.84, which has been put into the pending bill.

Mr. SHORTRIDGE. Mr. President, I crave the hearing of Senators present for a moment only. Time was when we were practically dependent upon foreign countries for our sugar supply. I am assuming that Senators are familiar with the history of this industry. There were those, in other days, who thought it wise to put sugar on the free list and, in lieu of a tariff, to impose a bounty. Such was the provision in the McKinley law. There was one thorough protective tariff member of that committee who now adorns the Supreme Court of the United States, then a Representative from my State of California, who filed a single minority, dissenting report in which he pointed out the folly of substituting a bounty for adequate tariff duties, the policy which was indorsed by the Ways and Means Committee of the House of Representatives. History has demonstrated that the then Hon. Joseph McKenna, now Mr. Justice McKenna, was economically right.

Time was when we were dependent upon foreign countries for sugar. To-day we have the great sugar-producing industry in our own dear land. Louisiana is deeply concerned in this matter; Utah, Colorado, California, and other States are also interested in it. Under the system of protection we are no

longer so dependent upon foreign countries. Vast capital is now invested in this industry. Hundreds and thousands of our fellow citizens are profitably employed in it. The farmers of California are directly interested; the producers in every one of the beet-sugar and cane-sugar producing States of our Union are directly interested. They come before this Congress—the Senate at this moment—and say "We can not live or prosper without this protection." The manufacturers of beet sugar, honorable men, patriotic men, Republicans and Democrats, rising all above party feeling, come here and tell us the same thing. It is a great and important industry, employing men, women, and children in the fields and in the factories.

We are not legislating here for this moment; I know we look into the future; and, as a practical proposition, as a simple fact which is presented to us, we are to decide whether this industry, so essential, so beneficial, shall survive and prosper or shall perish.

The same argument thus briefly intimated applies to many other industries in our country. It is true of products of the great State of Arkansas; it is true of the products of the great State of Missouri; it is true as to many of the agricultural products of my own State and other States represented by patriotic Senators here gathered.

I am not troubling you, Mr. President, and myself with going into figures. I merely wish to call attention to the past and to the present. The industry has grown; it has developed. The price of sugar is not exorbitant, and we are here asking American Senators, American lawmakers, to have regard, not for Cuba, not for the Hawaiian Islands although they belong to us, not for the Philippines over which our flag flies, not for any of the West Indies or the Central American sugar-producing peoples, but to have first regard for our own people. What I am trying to do in a few words, poorly spoken, is to impress upon the thoughtful minds of men who love their country and would see its people prosper that we can produce sugar in America; that the domestic industry gives employment to our own people; and to urge Senators to devote their thoughts, as our hearts are consecrated, to the interests of the people of our own country. The consumers will not suffer.

Mr. HARRISON. Mr. President, will the Senator yield?

Mr. SHORTRIDGE. I yield to the Senator.

Mr. HARRISON. Does the Senator think that in order to take care of 10 per cent of the people of this country we should levy a tax of $200,000,000 on the consumers of the country? Is that just and fair? Ought we not have some regard for the consumers as well as for the producers?

Mr. SHORTRIDGE. I have answered the Senator. I invited his mind to go backward to consider the time when we were dependent upon foreign countries for our sugar, assuming that he would remember, as I assume the country remembers, what we paid for sugar then and what we are paying for it now. As the Senator from Utah [Mr. SMOOT] has said, strike down and destroy the American industry and put us in a position of dependency upon foreign countries, whether it be Cuba or any other country, and the price of sugar will go mounting sky high. Therefore the argument seems to me unanswerable. I may look through a glass darkly, but I know the history of my country, and I happen to know the history of this industry.

I mentioned the name of a Californian here a few months ago in a passing colloquy, I think, with the Senator from Arkansas, when I called attention to the fact that Claus Spreckels, German born, conceived the idea that we in California could raise as good sugar beets as could be raised in Germany. He went to Germany; he brought back German sugar-beet seed; he brought here highly trained chemists, and by a process of development and cultivation we are raising high-grade sugar beets in California. He, in a sense, was the pioneer of the great American sugar-beet industry. It has grown; and instead of producing probably not more than 10 per cent of the sugar consumed in this country, see what we are producing now and consider the price of sugar then and what it is now.

So I wish to appeal to American Senators who love their country to shape their conduct with first and sole regard to this land of ours. The consumers will not suffer—let me answer directly my friend from Mississippi—by this proposed tariff, but the consumers will suffer if by folly on our part and failure to give adequate protection to this industry we shall once more become dependent upon foreign countries.

It is for America, for American men and women in every State in the Union that I am urging upon the thoughtful minds of Senators, regardless of politics, to stand for the rate thus far fixed. It is my earnest belief that in so doing we will serve our country, and as for me I wish it once and for all to be understood that I think I serve my party best when I serve my country best.

The PRESIDING OFFICER (Mr. STERLING in the chair). The time of the Senator from California has expired.

Mr. GOODING. Mr. President, I just want to ask one question. Is there a Senator on the other side of the Chamber, or one on this side, who does not know that the American Sugar Trust own and control practically all the sugar plantations of Cuba?

Mr. HARRISON. Mr. President, may I ask the Senator a question?

Mr. GOODING. Yes.

Mr. HARRISON. Does not the Senator know that the Utah-Idaho Sugar Co., in which certain Senators have said that they own an interest, and which has holdings in the Senator's State, was indicted for practicing conscienceless profiteering upon the American consumers, and the case was only dropped by the Department of Justice because the Lever law was declared unconstitutional?

Mr. GOODING. Mr. President, I am not aware that they were indicted. I am not familiar with the case; but I do know that every time the Sugar Trust of this country, who own the plantations in Cuba, have had control of this market the American people have always paid a higher price for their sugar. The American sugar crop grown by Americans sold for an average of 5 cents a pound. The price of sugar is now 7 cents a pound and is still going up. Is there any doubt in any Senator's mind that that great trust, which we know has existed in America for a number of years, will take advantage of every opportunity to rob the American people?

Let me say to you that in the West to-day contracts are entered into with all the farmers upon a sliding scale, so that if the price of sugar increases at all, the farmers get the benefit of it all.

Mr. GERRY. Mr. President, will the Senator yield?

The PRESIDING OFFICER (Mr. STERLING in the chair). Does the Senator from Idaho yield to the Senator from Rhode Island?

Mr. GOODING. Yes; I yield.

Mr. GERRY. Is it not also true that Mexican and Russian labor has been brought in and child labor has been employed?

Mr. GOODING. I answered that question the other day—only to the extent that during the war, when 4,000,000 of our boys answered the country's call, in order to produce sugar for the American people, this Government permitted them to be brought in, very properly; and you would deny them all in the interest of the Sugar Trust of Cuba! You would destroy our industries for the Sugar Trust of America! There is not any question about your position.

Mr. GERRY. And they also employ child labor, to the detriment of the children.

Mr. GOODING. That is not true.

Mr. GERRY. It is a matter of record in the Children's Bureau.

Mr. SMOOT. I want to say to the Senator that that is not true.

Mr. NICHOLSON. Mr. President, I want just a minute to reply to the question asked by the Senator from Rhode Island. If children are working in the beet fields, it is because the farmer is underpaid for his beets; and you who live in the East are now asking that these poor children work in the beet fields for little or nothing in order that you, who are well able to pay a price sufficient to obviate the working conditions in the beet fields complained of by the Senator, but will not, may enjoy cheap sugar in your tea and coffee.

Mr. CALDER. Mr. President, the Committee on Finance of the Senate, after hearings extending over a number of days and after careful deliberation, recommended to the Senate a rate of 2 cents a pound on sugar and 1.60 on Cuban sugar. The pending amendment provides for a rate of 1.40 on Cuban sugar. I shall vote against that amendment, and if it is defeated shall offer the amendment provided for in the committee's report.

Mr. President, the rate recommended by the Committee on Finance is the highest rate ever carried in any bill passed by the American Congress. It is the rate in the emergency tariff bill passed last year by this very Congress, at a time when it was believed that many American industries, particularly our agricultural industries, needed protection. The 1.60 rate for Cuban sugar is a protective rate, and, from my study of the subject, ought to be sufficient to protect the American beet and cane producer. At the time it was agreed upon in the Finance Committee it meant a rate of about 80 per cent ad valorem. At the price of Cuban sugar to-day, the rate is a little under 50 per cent.

If the Cuban crop had been limited, as was proposed, the price to-day would be immeasurably higher than that asked for

Cuban sugar. The price is as high to-day, Mr. President, because there is no sugar available for the American consumer except the Cuban crop.

Mr. BROUSSARD. Mr. President——

The PRESIDING OFFICER. Does the Senator from New York yield to the Senator from Louisiana?

Mr. CALDER. I will not yield. I only have a few minutes.

Mr. BROUSSARD. Just for a question.

Mr. CALDER. I will not yield, I will say to the Senator.

The PRESIDING OFFICER. The Senator from New York declines to yield.

Mr. CALDER. Mr. President, if the rate of 1.84 for Cuban sugar, or 2.31 for sugar generally, prevails, it will not profit the American producer, for he has sold all of his sugar; but it will profit the speculators, who have already begun to fill up our warehouses, and will make vast sums of money, running into the millions, perhaps, as the result of this increased rate.

Much has been said of the American refiner and how he will profit by this. Mr. President, I know of some refiners in this country who are not very much interested in just what this rate will be, because these refiners are interested alike in the importation of sugar and also in the sugar raised in America. It seems to me that the rate recommended by the Finance Committee, as I said in the beginning, is sufficient to give a protective duty to American industry and at the same time deal reasonably with the American consumer.

Mr. SIMMONS. Mr. President——

Mr. NICHOLSON. Mr. President, I desire to ask the Senator a question.

Mr. CALDER. I yield to the Senator.

Mr. SIMMONS. Mr. President, have I the floor or have I not the floor? I thought I was recognized, and I have been taken off my feet once or twice.

The PRESIDING OFFICER. The Chair had not recognized the Senator from North Carolina. The Chair will recognize him.

Mr. SIMMONS. Mr. President, I am grateful for this tardy recognition.

I do not want to take much time in discussing this sugar proposition, and yet I recognize the fact that the sugar industry in the United States is not an infant. So far as the American cane-sugar industry is concerned, it was established about 100 years ago, and it has made very little progress during that 100 years, although every time we have had a tariff bill that industry has been before the Congress claiming that if given a bit more protection it would be able gradually more largely to supply the American demand.

It has been the same story with the beet-sugar industry in the United States. It grew up and flourished as the beet industry in Europe grew up and flourished; but the beet industry here and the beet industry in Europe, as well as the cane industry in this country, could not without Government subsidy have lived a day in competition with cane-made sugar in the home of the cane-made sugar—that is to say, in the West India Islands.

They talk about the cane industry in Louisiana! The cane industry in Louisiana is not in trouble because of any difference in the labor cost of this country and Cuba. It may be slightly greater in the United States than in Cuba; but this great trust to which the Senator from Idaho referred a little while ago, this American corporation that is producing sugar over in Cuba, is employing negro labor just as negro labor is employed in Louisiana in the production of cane sugar.

Mr. BROUSSARD. Mr. President——

Mr. SIMMONS. I do not yield to the Senator. I have not enough time now to yield. I say that if this trust or this corporation to which the Senator from Idaho has alluded is producing sugar in Louisiana and sugar in Cuba, in both countries it is employing negro labor.

Mr. GOODING. Mr. President——

Mr. SIMMONS. And the negro labor of Cuba is just about as intelligent as the negro labor in America and commands very nearly the same compensation.

Mr. GOODING. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Carolina yield to the Senator from Idaho?

Mr. SIMMONS. I do not yield. I have already said that I am not going to yield any of my 10 minutes.

The trouble with the cane producers of Louisiana is not the difference in labor cost. It is the difference in natural conditions; and they are asking the American people to give them a subsidy in order that they may be put upon a parity with Cuba, because a disparity is present because of natural conditions. The first of those natural conditions is the seasons. By reason of the early frosts that they have in Louisiana very frequently the crop is destroyed, and if you will examine the tables you will find that occasionally in one year Louisiana produces twice as much sugar as it does the next year. It is because an early frost often destroys the crop. That is one of the natural reasons why we can not produce in competition with Cuba; and the other natural reason why Louisiana can not without subsidy produce sugar in competition with Cuba is the fact that in Louisiana it is necessary to replant frequently, every one or two years, while in Cuba it is not necessary to replant more than once in 15 years. The futile and unjust thing is now being proposed that we shall tax the American people to the extent of $115,000,000 under this measure in order vainly to try to equalize natural differences that exist between the production of this article in the United States and in Cuba.

That much I have to say about the cane-sugar business.

Now, with reference to the beet-sugar business:

Mr. President, Europe attempted to raise its supply of sugar by the production of beets. Europe granted enormous bounties to the beet-sugar producers of that country in order to enable them to make sugar in competition with the cane sugar of the islands. That thing went on and on. It became such a burden to the people of Europe that they held a convention at Brussels, and as the result of that convention they decided that they would stop these bounties. While these bounties were being given the beet-sugar production of the world was 64 per cent of the entire consumption. That was about 20 years ago. To-day the beet-sugar production of the world is less than 21 per cent of the consumption of the world, showing that since the bounties upon this product were withdrawn by the governments of the world the beet sugar can not stand, can not live, can not exist in competition with the cane-sugar production.

We are asked here that the American people be saddled year after year—a hundred years after the production of sugar has begun in this country—that they be saddled year after year, from now on until doomsday, with taxation to the extent of $115,000,000 a year in order that we may hothouse cane sugar and hothouse beet sugar.

Mr. BROUSSARD. Mr. President, I have a few minutes of my time left.

The PRESIDING OFFICER. Under the unanimous-consent agreement, a Senator can speak but once. The question is on agreeing to the amendment of the Senator from Mississippi.

Mr. HARRISON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Ashurst	Frelinghuysen	McLean	Sheppard
Ball	Gerry	McNary	Shields
Brandegee	Glass	Moses	Shortridge
Broussard	Gooding	Myers	Simmons
Bursum	Hale	New	Smith
Calder	Harreld	Newberry	Smoot
Cameron	Harrison	Nicholson	Stanfield
Capper	Heflin	Norbeck	Stanley
Colt	Hitchcock	Oddie	Sterling
Cummins	Jones, N. Mex.	Overman	Sutherland
Curtis	Jones, Wash.	Pepper	Trammell
Dial	Kellogg	Phipps	Underwood
Dillingham	Kendrick	Pomerene	Wadsworth
du Pont	Keyes	Ransdell	Walsh, Mass.
Edge	Lenroot	Rawson	Walsh, Mont.
Ernst	Lodge	Reed, Mo.	Warren
Fletcher	McCumber	Reed, Pa.	Watson, Ind.
France	McKellar	Robinson	

The PRESIDING OFFICER. Seventy-one Senators having answered to their names, a quorum is present. The question is on agreeing to the amendment of the Senator from Mississippi [Mr. HARRISON] to the amendment made as in Committee of the Whole.

Mr. SMOOT. On that I ask for the yeas and nays.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. JONES of New Mexico (when his name was called). I have no pair on this subject, and I therefore vote "nay."

Mr. CURTIS (when Mr. LA FOLLETTE's name was called). The Senator from Wisconsin [Mr. LA FOLLETTE] is paired on this vote with the Senator from Michigan [Mr. TOWNSEND]. If present the Senator from Wisconsin would vote "yea" and the Senator from Michigan would vote "nay."

Mr. POMERENE (when his name was called). I transfer my pair with my colleague [Mr. WILLIS] to the senior Senator from Texas [Mr. CULBERSON] and vote "yea."

Mr. WATSON of Indiana (when his name was called). Making the same announcement as before, I vote "nay."

The roll call was concluded.

Mr. McCUMBER. I transfer my pair with the junior Senator from Utah [Mr. KING] to the junior Senator from Washington [Mr. POINDEXTER] and vote "nay."

Mr. HARRISON (after having voted in the affirmative). I transfer my pair with the junior Senator from West Virginia [Mr. ELKINS] to the senior Senator from Oklahoma [Mr. OWEN] and allow my vote to stand.

Mr. EDGE. I am informed that if present the senior Senator from Oklahoma [Mr. OWEN] would vote "yea." I shall therefore vote. I vote "yea."

The PRESIDING OFFICER (Mr. JONES of Washington in the chair). The Chair desires to state that he transfers his pair with the senior Senator from Virginia [Mr. SWANSON] to the senior Senator from Maine [Mr. FERNALD] and allows his vote to stand.

The result was announced—yeas 24, nays 47, as follows:

YEAS—24.

Ashurst	Harrison	Pomerene	Smith
Dial	Heflin	Reed, Mo.	Stanley
Edge	Hitchcock	Robinson	Trammell
Fletcher	McKellar	Sheppard	Underwood
Gerry	Myers	Shields	Walsh, Mass.
Glass	Overman	Simmons	Walsh, Mont.

NAYS—47.

Ball	Ernst	Lodge	Ransdell
Brandegee	France	McCumber	Rawson
Broussard	Frelinghuysen	McLean	Reed, Pa.
Bursum	Gooding	McNary	Shortridge
Calder	Hale	Moses	Smoot
Cameron	Harreld	New	Stanfield
Capper	Jones, N. Mex.	Newberry	Sterling
Colt	Jones, Wash.	Nicholson	Sutherland
Cummins	Kellogg	Norbeck	Wadsworth
Curtis	Kendrick	Oddie	Warren
Dillingham	Keyes	Pepper	Watson, Ind.
du Pont	Lenroot	Phipps	

NOT VOTING—25.

Borah	King	Owen	Watson, Ga.
Caraway	Ladd	Page	Weller
Culberson	La Follette	Pittman	Williams
Elkins	McCormick	Poindexter	Willis
Fernald	McKinley	Spencer	
Harris	Nelson	Swanson	
Johnson	Norris	Townsend	

So Mr. HARRISON's amendment to the amendment made as in Committee of the Whole was rejected.

Mr. HARRISON. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state his inquiry.

Mr. HARRISON. Is debate open on the amendment now pending, as adopted in the Committee of the Whole?

The PRESIDING OFFICER. It is debatable.

Mr. HARRISON. I have spoken 10 minutes on the subject.

The PRESIDING OFFICER. The question is on concurring in the amendment adopted in the Committee of the Whole.

Mr. HARRISON. Am I permitted to speak again?

The PRESIDING OFFICER. The Senator has spoken on his own amendment, as the Chair understands it.

Mr. HARRISON. That is correct.

The PRESIDING OFFICER. The Senator is recognized.

Mr. HARRISON. Mr. President, the real proposition is whether we are going to indorse the action of the Finance Committee in placing 1.6 cents duty on sugar from Cuba or stand by the previous action of the Committee of the Whole in raising the rate to 1.84 cents. That is the vital question now, and the decision of that question will affect the American consumer to the extent of from twenty-three to fifty million dollars.

It has been argued that this tax will not be reflected in the price to the consumer. I want to read what the Senator from Utah has said on that subject, in order that Senators may not be led astray when voting upon this proposition, and offer as an excuse hereafter that they were led by the Senator from Utah, in his speech the other day, to believe to the contrary. This occurred during the debate on the emergency tariff bill on January 26, 1921:

Mr. HARRISON. I want the figures of the Senator from Utah on sugar, to see if he is as far wrong on sugar as he was on shoes.

Mr. SMOOT. Of course, Mr. President, the Senator can make that statement, broadly speaking; but the Senator from Utah does not generally make a statement on the floor of the Senate unless he knows what he is talking about.

This is an emergency bill, to remain in effect until the other bill is put into force. The 80,000,000 pounds of sugar that is consumed by the American public takes in all the sugar that is made into candy and all that goes into the manufacturing of products. If you take it all, say there is 80,000,000 pounds of sugar consumed, and that is the full crop of Cuban sugar, if it all came here at the peak of production it would be $160,000,000.

Mr. HARRISON. One hundred and sixty million dollars it would cost the American people.

Mr. SMOOT. No; I say if that took place, at 2 cents; but I have not any idea, in the first place, that the bill is going to become a law, because I do not think the Senator from Mississippi, as well as others, intends it to.

Mr. HARRISON. I can not prevent it, and the Senator knows that.

Mr. SMOOT. There are others who will prevent it. So far as that is concerned, if it did become a law it would not be in operation a year. The amount that would be collected from the Cuban sugar would, I will say to the Senator, all go into the Treasury of the United States, and Cuba is where the great sugar crop comes from.

Mr. HARRISON. Where would the tax come from? It would come from the consumers of the country.

Mr. SMOOT. Yes; but it would go into the Treasury of the United States.

Mr. STANLEY. Mr. President——

Mr. HARRISON. I yield to the Senator from Kentucky.

Mr. STANLEY. I should like to ask the Senator from Utah if he is calculating now simply on the amount of tax to be collected from the Cuban producer?

Mr. SMOOT. This would be about our consumption. There are 100,000,000 people, and this would be 80,000,000 pounds, and that is 80 pounds per capita.

Mr. STANLEY. The Senator is assuming that the entire consumption of the American people would be the amount produced in Cuba, or 80,000,000 pounds.

Mr. SMOOT. No; I was not assuming that at all. In fact, all of the Cuban crop does not come here, but most of it does. I am saying that is the largest crop, but with 100,000,000 people, 80 pounds per capita is 800,000,000 pounds. Of course, 2 cents a pound will bring us $160,000,000.

* * * * * * *

Mr. STANLEY. The reason I asked that question was that we can not figure the Cuban sugar crop alone when we figure imports, because the duty will affect the beet sugar and the Louisiana sugar in the same way.

Mr. SMOOT. We understand that.

Mr. UNDERWOOD. That was the question I intended to ask the Senator. In his statement he had left out of the calculation the fact that if we put the duty on at the customhouse, it would not only raise the value to the American consumer of the imported sugar, but it would practically to the same extent put up the price of American sugar raised in this country.

Mr. SMOOT. There is no doubt about it at all.

Mr. UNDERWOOD. Then the American people would pay the increased price.

Mr. SMOOT. That is what I say. I was figuring the amount per capita.

Mr. HARRISON. That is the purpose of the bill, to make the American people pay the price in order to help the producers of the country.

Mr. SMOOT. The Senator stated that only half of the tax on importations went into the Treasury of the United States.

Mr. HARRISON. I expect to show before the debate is over that part of that, only about half of it, goes into the Treasury of the United States.

Mr. SMOOT. I will admit that whatever sugar is produced in this country there is nothing that goes into the Treasury of the United States on that sugar, but on every pound of sugar that is imported into the country the amount of tax paid, no matter whether 1 cent or 2 cents or 3 cents, or whatever it may be per pound, all goes into the Treasury of the United States.

Mr. HARRISON. But it raises the price of sugar in this country under those circumstances so much to the consumer. That is what I am trying to bring out.

Mr. SMOOT. That is what I say. I have not said that it did not.

Mr. HARRISON. We do not differ.

Mr. SMOOT. Just the same as any article, for instance, like coffee. Coffee comes in free. If there were a duty put upon it and the coffee is not produced in this country, of course the consumer pays it. No one ever questioned that that I know of.

* * * * * * *

Mr. SIMMONS. What would be the aggregate?

Mr. SMOOT. I can not tell how long the bill will be continued in effect.

Mr. SIMMONS. Assuming it will be in operation a year?

Mr. SMOOT. Nor can I tell what the price of Cuban sugar is going to be. Cuban sugar is so low now that it seems to me it can not stay at the figure at which it is now. Cuban sugar delivered at New York is 4⅝ cents a pound.

Mr. SIMMONS. The Senator's calculation, I understood, was based upon the assumption that Cuban sugar would go up 8 cents.

Mr. SMOOT. No; I did not say that. If it went to 8 cents, though, under the bill it would not cost the people anything for tax.

Mr. SIMMONS. I do not see how the Senator figures that.

Mr. SMOOT. If the Senator will read the amendment he will see that is exactly what the amendment provides.

Mr. SIMMONS. It will be effective only to the extent of raising it to 8 cents.

Mr. SMOOT. Whenever Cuban sugar reaches the price of 8 cents per pound, then there is no additional duty upon it.

Mr. SIMMONS. No additional duty, but the duty operates until it gets to 8 cents a pound and if the duty forces it to 8 cents a pound then it does not apply any longer. Suppose sugar sells to-day for 6 cents a pound and it is forced up by reason of the duty to 8 cents a pound, would not the duty have been the reason and the cause for the increased price?

Mr. SMOOT. That duty would be collected by the Government of the United States. There is no doubt of that at all.

Mr. SIMMONS. It would be collected by the United States and a like increase would be made in the price of all domestic sugar.

Mr. SMOOT. There is no doubt about it, because of the fact that such a small amount of domestic sugar is raised in the United States, comparatively speaking. Whatever the Cuban price is in New York, and the refiners name that price, so is all the sugar manufactured in the United States based upon that same price. That is understood by the Senator and by everybody else.

Mr. SIMMONS. Cuban sugar sells to-day, as I understand, at between 4 and 5 cents a pound.

And yet the Senator by his argument, adroit as it was, led Senators to vote for the unconscionably high tax on the consumers of the country of 1.84 cents per pounds, because they believed that the consumers of the country would never have to pay it; in other words, that it would bear down the price in Cuba.

Senators, the question is before you. If you are going to place this tax of $200,000,000 on the American consumers when they are in no position to bear it, then vote "yea" on the next roll call. On the other hand, if you want to help the consumers in a little way, just a slight way, vote "nay." That would relieve them some, just a little bit, though not very much.

Let me tell you, Senators, that before this incident is closed the American people will know everything behind the scenes where this rate was adopted and this scheme was attempted to be put over on the Cuban people at the expense of the consumers of sugar in the United States. If you would allow my resolution to pass and investigate everything behind this matter you would see that not only was the great and influential and powerful member of the Finance Committee [Mr. SMOOT] writing this proposal to Crowder, our representative to Cuba, that if they would restrict the crop to two and one-half million tons that year that he would use his good offices to put over the tariff at 1.4 permanently in the law, but that it was O. K.'d by Herbert Hoover and the letter was handed over to the President of Cuba. Vote as your conscience dictates, and when the Senate adjourns, as it will in just a few days, aye, perhaps in a few hours, you must give an account to your constituents for the imposition of this unconscionable rate that you are imposing. It is indefensible, aye, inexcusable, and you must make answer for it.

Mr. President, on the pending question I demand the yeas and nays.

Mr. SMOOT. Mr. President, there are some Senators now in the Chamber who were not present when the Senator from Mississippi made that same statement in his first speech on the pending amendment this evening. He did not read that part of the RECORD before, but asked it be printed in the RECORD. I remember well that when the emergency tariff bill was up, as I have already stated, that I thought and believed that every cent of duty that was imposed upon Cuban sugar would be paid by the American consumer. But, Mr. President, the investigation which I have made since then, and I have told the Senate how it came about, demonstrated beyond any question of doubt that they do not pay it in whole. I have had sent to me hundreds of clippings from the Spanish papers of Cuba and the English papers published on that island claiming that if the duty on sugar was increased the price of Cuban sugar would drop just to the amount of the increase. I want to say that in the past that has been the history, as I demonstrated beyond any question of doubt when I spoke upon this subject the other day. No Senator has risen on the floor to deny those figures. They can not be denied.

I want to say to Senators that sugar conditions are rapidly changing in Cuba and have been changing in late years. The refiner was not satisfied with the profits made upon the refined sugar, twice the amount that was made upon an equal amount of sugar raised from the soil by the toil of thousands of people, but tampered with the scales so as to rob the Government of the United States in the matter of the duty collected.

Mr. REED of Missouri. Who did that?

Mr. SMOOT. In conclusion, Mr. President, I want to make just this statement again. It is claimed by the people and the press of Cuba——

Mr. REED of Missouri. Mr. President——

The PRESIDING OFFICER (Mr. JONES of Washington in the chair). Does the Senator from Utah yield to the Senator from Missouri?

Mr. SMOOT. I yield for a question.

Mr. REED of Missouri. I want to inquire who it was that tampered with the scales.

Mr. SMOOT. The Senator certainly must remember the case the Government instituted against a company in New York who robbed the Government of hundreds of thousands of dollars by tampering with the scales.

Mr. REED of Missouri. I do not remember it, and I ask the Senator to remind me of it.

Mr. WALSH of Montana. I remember that the American Refining Co., who owns a great and important share in the beet-sugar companies here, was involved.

Mr. SMOOT. They do not own a single, solitary share in the Idaho Sugar Co.

Mr. WALSH of Montana. They own all the factories in Colorado. They own factories in my State.

Mr. SMOOT. I do not know anything about what they own in Montana.

I want to say that such a thing has never been charged against any local sugar producer. I say now that the refiners have a strangle hold upon the production of sugar in Cuba, the six great refiners producing all but a few hundred thousand tons of the sugar that comes into this country from Cuba, and I say without question of doubt that when the local domestic crop was coming onto the market they reduced the Cuban sugar to 1.67 cents, but just as soon as consumption of the local sugar crop occurred and the domestic people had none to sell outside of their local customers they have advanced their sugar to-day to nearly 4 cents a pound.

Mr. JONES of New Mexico. Mr. President——

Mr. SMOOT. I have but 10 minutes, but I yield for a question.

Mr. JONES of New Mexico. I want to ask, if all that is true, how the sugar-beet growers of the United States are going to get the benefit of the tariff on sugar?

Mr. SMOOT. I have already answered that question this afternoon when the Senator was not here, and it would take the balance of my time or I would gladly answer it again. I think I could convince the Senator from New Mexico and other Senators how they would get the advantage.

Mr. STANLEY. Mr. President——

Mr. SMOOT. I can not yield.

Mr. STANLEY. I just want to ask the Senator——

The PRESIDING OFFICER. The Senator from Utah declines to yield.

Mr. SMOOT. I have only two minutes left.

Mr. STANLEY. I just want to ask the Senator a question.

The PRESIDING OFFICER. The Senator from Utah declines to yield.

Mr. SMOOT. I want to make this statement in closing: It is claimed by the people and press of Cuba that any advance in the duty on sugar decreases the price of Cuban sugar, compelling them to sell Cuban sugar at a lower price equal to the advance in duty. The Senator from Mississippi and the refiners claim the advance in duty will increase the price of sugar to the American consumer unless the refiners, who are the Cuban sugar producers to-day, absorb the claimed decrease in Cuba and the claimed increase in the United States, or both, and this no doubt they intend to do.

I have demonstrated that the Cuban price decreased with the increased duty, and the American consumer was not called upon to pay the full increase.

Mr. President, I did not know that a year ago, as I said, and it only came when I asked for the quotations of sugar from the beginning of the production of beet sugar in the United States week by week and as laws have been enacted, beginning with the Wilson law, and then followed by the Dingley law, then the Underwood law and the Cuban reciprocity act, it demonstrated that whenever the rates were changed the price of sugar in Cuba changed. I did not take the prices for one week before or one week after. I took two months before and two months after and averaged the prices. The price quoted changed greatly in a day, and I did not know the reason until I had analyzed the figures in a detailed investigation to learn why it was, and it showed the date of the passage of the law corresponded with the radical change in price.

The PRESIDING OFFICER. The time of the Senator from Utah has expired.

Mr. STANLEY. Mr. President, I would like to ask the Senator from Utah in my time if there is more than one sugar refiner in the United States.

Mr. SMOOT. Yes; there is more than one sugar refiner in the United States.

Mr. STANLEY. Then, if there is such a change in price, it is due to an understanding between the refiners as to a concurrent increase in price automatically with the Federal regulation.

Mr. SMOOT. I have no doubt of it. What I put in the RECORD the other day shows what the rates were and the quotations on sugar weekly. I say that the six great refiners absolutely control the situation. We are in their power, and I say if the domestic sugar industry is destroyed they will have the full 12 months in the year to make the American people pay tribute to them, as there will be no domestic sugar to interfere.

Mr. STANLEY. Mr. President, this startling statement of the Senator from Utah is the most damning confession of the utter ignorance and impotence of those in charge of the execution of the laws that has ever been heard on the floor of this body. It is the most humiliating and the most abominable admission of the utter incompetence of the Federal Government. Boiled down and analyzed, what does the statement of the Senator amount to? It is simply this: If we lower the duty, according to the natural laws which the Senator from Utah believed were in operation, we would also lower the cost of this product. He admits now that by the bungling imposition of one duty upon raw sugar and another duty upon refined sugar, half a dozen trusts will gobble up any reduction

as fast as it is made. This increase in price following instantly upon the passage of the law would be evidence enough to convict any crook on earth in the eyes of an Attorney General who knew the difference between a jayhawker and a Sunday-school teacher. Your Department of Justice is either corrupt or it is imbecile if this thing can be done and go unwhipped of justice. I have often thought it was one or the other, or both, and now I know it. This is the last admission that damns the already doubly damned Attorney General of the United States. Tell the Senate why we can not relieve the people. Because the trusts, and not the public, would get the benefit, and probably they would. If that is the case, somebody ought to find a new Attorney General and a Department of Justice that will function.

I have spent some years of my life investigating the question of the violation of the antitrust acts of the United States, and I tell you, Mr. President, that thing can not be done without leaving the palpable, unquestioned, admitted proof of guilt. If these big sugar refiners can alter their prices and absorb these profits instantly upon the passage of this bill, increase these prices to increase as we decrease the duty, slap the Senate in the face, then the Department of Justice deserves the contempt and the pity of every sensible lawyer in the world if it does not stop it.

Mr. President, we have become so accustomed to regard the enforcement of the Sherman antitrust law with indifference or contempt, we have become so accustomed to relieving this malefactor and excusing that one and substituting commissions for courts and investing this, that, and the other lame duck and discredited politician with the right to determine that which is dearest to the people, their property rights, their liberty, their taxes, their everything, that we forget that there is a law in the land. We are going to fix the price of sugar by the trust, the price of coal by commissions. Why not do away with the courts? Why not repeal the laws and let one great corrupt autocracy run the country, with such assistance as a protective tariff and a reactionary Republican Congress can give it?

Mr. SMOOT. Will the Senator yield to me for just a moment?

The PRESIDING OFFICER. Does the Senator from Kentucky yield to the Senator from Utah?

Mr. STANLEY. Yes; I yield.

Mr. SMOOT. I simply wish to ask at this time, Mr. President, to insert in the RECORD the tables to which I referred the other day, showing exactly the facts as I have stated them in relation to the price of sugar following the passage of various tariff bills, beginning with the Wilson tariff bill in 1894.

Mr. STANLEY. I am inclined to agree with the Senator that the prices automatically rise as we lower the tariff; but when they do that they slap the Government in the face; they defy the Department of Justice; they are worse outlaws than were Robin Hood or Jesse James when they went unpunished in the presence of sheriffs and county judges; and they are doing this damnable thing in the presence of the Attorney General by the word of the leader in the Republican Party, and you can not drag an indictment out of this poor crippled thing that you have in charge of the Department of Justice with a fifth chain.

Mr. SMOOT. I desire to suggest to the Senator from Kentucky that of course these things mostly took place at the time when the other party was in power. If there is no objection, I should like to have the tables printed in the RECORD.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

The tables are as follows:

The Wilson tariff and the price of sugar.

	New York in bond price of raw sugar per 100 pounds.	United States duty per 100 pounds.	New York duty-paid price of raw sugar per 100 pounds.	Refiners' margin.	New York wholesale price of granulated sugar per 100 pounds.
June 28, 1894	$3.125	.....	$3.125	$0.855	$3.98

[1] Dec. 27, 1903, Cuban reciprocity effective, reducing duty on 96° sugar to $1.348 per 100 pounds.

DISTRIBUTION OF 33.7 CENTS REMISSION OF DUTY.

After lowering the duty 33.7 cents per 100, the New York wholesale price of granulated sugar declined only 13 cents per 100, 20.7 cents per 100, or 61.4 per cent of the entire reduction, being appropriated by American refiners.

Mr. HARRISON. Mr. President, I hope the Senator will insert the tables, and I desire to follow them up by placing in the RECORD the average price of sugar for the year preceding the passage of each of the tariff laws and the average price for the year immediately following.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Mississippi? The Chair hears none, and it is so ordered.

The matter referred to is as follows:

On page 3548 of the report of the Hardwick hearings Mr. Willett submits the following table:

METHOD NO. 1.—*Effect of reduction of $2.24 per 100 pounds duty on 96° sugar to free sugar.*

	100 pounds.	107 pounds.
During 3 years and 3 months preceding free duty (Jan. 1, 1888, to Apr. 1, 1891) the average cost to refiners of 100 pounds of 96° test centrifugals was	$5.849	
It requires 107 pounds of 96° test raws to make 100 pounds of granulated of 100° test; 107 pounds 96° test, at $5.849, is		$6.258
During 3 years and 5 months of free duty (Apr. 1, 1891, to Aug. 1, 1894) the average cost to refiners for 100 pounds of 96° test raws was	3.390	
It requires 107 pounds of 96° test to make 100 pounds of 100° test granulated; 107 pounds raws, at $3.39 per 100 pounds is		3.627
Refiners gain by reduction of duty and lower cost of raws		2.631
During the 3 years and 3 months preceding free duty refiners sold granulated at average price per 100 pounds of	6.921	
During 3 years and 5 months of free duty at average price of	4.409	
A difference (reduction) of		2.512
Refiner kept the difference between $2.631 and $2.512 per 100 pounds		.119
During the 3 years 3 months preceding free duty the duty on 96° test raws per 100 pounds was	2.240	
Duty on 107 pounds raws, 96° test (to make 100 pounds granulated), at $2.24, was	2.397	
Refiner's gain from removal of duty and lower cost of raws as above		2.631
Duty taken off of 107 pounds 96° test raws		2.397
Leaving refiners saving from lower-cost raws		.234
Refiners kept part of this saving, as above stated		.119
The consumer received the rest of this saving per 100 pounds		.115
The consumer therefore received the benefit of the full duty taken off of 107 pounds raws, $2.397 plus the $0.115		2.512
During the time of free duty the consumer paid for granulated		4.409
During the time of $2.24 duty the consumer paid for granulated		6.921

METHOD NO. 1.—*Effect of reduction of $2.24 per 100 pounds duty on 96° sugar to free sugar*—Continued.

[Hardwick hearings, p. 3553, testimony of Wallace P. Willett.]

	100 pounds.	107 pounds.
From Jan. 1, 1888, to Apr. 1, 1891 (3 years and 3 months preceding reciprocity), the duty on raw sugar of 96° test was, per 100 pounds	$2.24	
From Apr. 1, 1891, to Aug. 1, 1894, 3 years and 5 months of free duty		
Before free duty refined granulated averaged	6.921	
Before free duty raw 96° averaged	5.849	
Difference between raw and refined	1.072	
During free duty refined averaged	4.409	
During free duty raws averaged	3.390	
	1.019	
Difference between the above difference was	.053	
Duty on 100 pounds 96° raws at $2.24 equals duty on 107 pounds raws required to make 100 pounds of granulated		$2.397
Refined before free duty sold at per 100 pounds	6.921	
Duty taken off price 100 pounds refined was	2.397	
Leaving free duty value with duty off	4.524	
Difference between raws and refined, less under free duty	.053	
Under free duty refiners should sell refined at	4.471	
During free duty refiners sold refined at	4.409	
Benefit to consumer from low cost of raws	.062	
Giving the consumer the benefit of the full duty on 100 pounds refined	2.397	
Total benefit to consumer	2.459	
Before free duty the difference between raw and refined was	1.072	
Cost of refining under $2.24 duty was	.714	
Refiners' profit and surplus was	.358	
During free sugar the difference between raw and refined was	1.019	
Cost of refining under free duty was	.548	
Refiners' profit and surplus under free duty was	.471	
Refiners' profit and surplus under $2.24 duty was	.358	
Refiners saved under free duty	.113	

The first method gave refiners increased profit under free sugar of $0.119 and consumers a total benefit of $2.512 per 100 pounds.

METHOD NO. 1.—*Effect of reduction of $2.24 per 100 pounds duty on 96° sugar to free sugar.*

[Hardwick hearings, p. 3548, testimony of Wallace P. Willett.]

	100 pounds.	107 pounds.
The 40 per cent ad valorem duty equaled average of	$0.915	
Free duty	.000	
Difference in duty	.915	
The duty on 107 pounds 96° test raws, at $0.915		$0.979
The duty on 107 pounds 96° test raws, free		.000
The difference in duty on 100 pounds refined was		.979
The period of 40 per cent ad valorem duty from Aug. 28, 1894, to July 24, 1897, was 155 weeks.		
The period of free duty from Apr. 1, 1891, to Aug. 28, 1894, was 179 weeks.		
The average price of 96° test centrifugals for 155 weeks of 40 per cent duty was	3.434	
And for 179 weeks of free duty	3.390	
Reduction in raws under free duty	.044	
It requires 107 pounds of 96° to make 100 pounds 100° test; under 40 per cent duty 107 pounds raws, at $3.434, cost		3.674
Under free duty 107 pounds raws, at $3.39, cost		3.627
Under free duty refiners paid less for raws		.047
Under 40 per cent duty refiners sold granulated at	4.311	
Under free duty refiners sold granulated at	4.409	
Under free duty refiners sold granulated at more by	.098	
Under free duty refiners saved in price of raws	.047	
Under free duty refiners were better off (than under 40 per cent duty, by	.145	

Or to reverse it, refiners lost $0.145 per 100 pounds by the change from free to $0.979 duty and the consumer paid $0.834 per 100 pounds of the increased duty.

In other words, the refiner paid $0.145 of the increased duty and the consumer the balance—$0.834.

METHOD No. 1.—*Effect of reduction of $2.24 per 100 pounds duty on 96° sugar to free sugar.*
[Hardwick hearings, p. 3549.]

	100 pounds.	107 pounds.
The Dingley duty on 96° centrifugals was	$1.685	
The 40 per cent ad valorem	.915	
Difference in duty	.770	
Duty on 107 pounds 96° test raws, at $1.685, equals		$1.803
Duty on 107 pounds 96° test raws, at $0.915, equals		.979
		.824
The period of the Dingley law $1.685 duty was from July 24, 1897, to Dec. 27, 1903, when reciprocity began, 340 weeks, and the period of 40 per cent duty from Aug. 28, 1894, to July 24, 1897, 155 weeks.		
The average price of 96° centrifugals for 340 weeks of Dingley bill, was $4.075 per 100 pounds	4.075	
And for 155 weeks of 40 per cent duty	3.434	
Less under 40 per cent duty	.641	
It requires 107 pounds 96° test to make 100 pounds test. Under Dingley bill 107 pounds 96° cost, at	4.075	4.360
Under 40 per cent bill 107 pounds 96° cost, at	3.434	3.674
Under 40 per cent duty refiners paid less for raws		.686
Under Dingley bill refiners sold granulated at	4.897	
Under 40 per cent bill refiners sold granulated at	4.311	
Under 40 per cent refiners sold granulated at less by	.586	
Under 40 per cent refiners paid less for raws	.686	
Refiners were better off under 40 per cent duty	.100	

To reverse, refiners lost $0.10 per 100 pounds by the change from 40 per cent to $1.685 duty and consumers paid $0.720 per 100 pounds of the increased duty. The difference between $0.724 of duty paid by consumers and only $0.586 increase in the price of granulated was because of the lower range of prices for raws, owing to overproduction of supplies. From 1897 to 1903 beet sugar increased about 1,000,000 tons; cane sugar increased about 1,300,000 tons.

The PRESIDING OFFICER. The question now is on concurring in the amendment made as in Committee of the Whole.

Mr. HARRISON. I suggest the absence of a quorum.

The PRESIDING OFFICER. The Senator from Mississippi suggests the absence of a quorum. The Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Ashurst	Gerry	McNary	Simmons
Ball	Glass	Moses	Smith
Brandegee	Gooding	Myers	Smoot
Broussard	Hale	New	Stanfield
Bursum	Harreld	Newberry	Stanley
Calder	Harrison	Nicholson	Sterling
Cameron	Heflin	Norbeck	Sutherland
Capper	Hitchcock	Oddie	Swanson
Colt	Jones, N. Mex.	Overman	Trammell
Cummins	Jones, Wash.	Pepper	Underwood
Curtis	Kellogg	Phipps	Wadsworth
Dial	Kendrick	Pomerene	Walsh, Mass.
Dillingham	Keyes	Ransdell	Walsh, Mont.
du Pont	Lenroot	Reed, Pa.	Warren
Edge	Lodge	Robinson	Watson, Ind.
Ernst	McCumber	Sheppard	
Fletcher	McKellar	Shields	
France	McLean	Shortridge	

The PRESIDING OFFICER. Sixty-nine Senators have answered to their names. A quorum is present. The question is on concurring in the amendment made as in Committee of the Whole.

Mr. HARRISON. On that I ask for the yeas and nays.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. CURTIS (when Mr. BORAH's name was called). The Senator from Idaho [Mr. BORAH] is paired with the Senator from Maryland [Mr. WELLER]. If the Senator from Idaho were present, he would vote "nay" and the Senator from Maryland, if present and permitted to vote, would vote "yea."

Mr. HARRISON (when his name was called). I have a general pair with the junior Senator from West Virginia [Mr. ELKINS], but I understand he would vote as I intend to vote on this question. Therefore I feel at liberty to vote, and vote "nay."

Mr. KELLOGG (when his name was called). On this question I am paired with my colleague [Mr. NELSON]. If I were permitted to vote, I should vote "nay."

Mr. KEYES (when his name was called). On this question I have a pair with the junior Senator from Vermont [Mr. PAGE]. If permitted to vote, I should vote "nay."

Mr. CURTIS (when Mr. LA FOLLETTE's name was called). The Senator from Wisconsin [Mr. LA FOLLETTE] is paired with the Senator from Michigan [Mr. TOWNSEND]. Were the Senator from Wisconsin present he would vote "nay." The Senator from Michigan, if present and permitted to vote, would vote "yea."

Mr. McCUMBER (when his name was called). I have a general pair with the junior Senator from Utah [Mr. KING]. If he were present, he would vote "yea" and I should vote "nay"; but, not being able to obtain a transfer of that pair, I withhold my vote.

Mr. POMERENE (when his name was called). I again transfer my pair with my colleague [Mr. WILLIS] to the senior Senator from Texas [Mr. CULBERSON] and vote "nay."

Mr. WATSON of Indiana (when his name was called). Making the same announcement with reference to my pair and its transfer as before, I vote "yea."

The roll call was concluded.

Mr. EDGE. Making the same announcement as before concerning my pair and its transfer, I vote "nay."

Mr. CURTIS. I wish to announce the following general pairs:

The Senator from Illinois [Mr. MCKINLEY] with the Senator from Arkansas [Mr. CARAWAY];

The Senator from Missouri [Mr. SPENCER] with the Senator from Georgia [Mr. HARRIS];

The Senator from California [Mr. JOHNSON] with the Senator from Georgia [Mr. WATSON]; and

The Senator from Maine [Mr. FERNALD] with the Senator from West Virginia [Mr. ELKINS].

The result was announced—yeas 35, nays 33, as follows:

YEAS—35.

Ball	du Pont	Moses	Reed, Pa.
Brandegee	Ernst	New	Shortridge
Broussard	Gooding	Newberry	Smoot
Bursum	Harreld	Nicholson	Stanfield
Cameron	Jones, N. Mex.	Norbeck	Sterling
Capper	Jones, Wash.	Oddie	Wadsworth
Cummins	Kendrick	Pepper	Warren
Curtis	McLean	Phipps	Watson, Ind.
Dillingham	McNary	Ransdell	

NAYS—33.

Ashurst	Glass	Overman	Sutherland
Calder	Hale	Pomerene	Swanson
Colt	Harrison	Reed, Mo.	Trammell
Dial	Heflin	Robinson	Underwood
Edge	Hitchcock	Sheppard	Walsh, Mass.
Fletcher	Lenroot	Shields	Walsh, Mont.
France	Lodge	Simmons	
Frelinghuysen	McKellar	Smith	
Gerry	Myers	Stanley	

NOT VOTING—28.

Borah	Kellogg	McKinley	Rawson
Caraway	Keyes	Nelson	Spencer
Culberson	King	Norris	Townsend
Elkins	Ladd	Owen	Watson, Ga.
Fernald	La Follette	Page	Weller
Harris	McCormick	Pittman	Williams
Johnson	McCumber	Poindexter	Willis

So the amendment, made as in Committee of the Whole, was concurred in.

The PRESIDENT pro tempore. The Secretary will state the next amendment reserved.

The ASSISTANT SECRETARY. The next amendment reserved is, on page 107, paragraph 743, citrus fruits, reserved by the Senator from Florida [Mr. TRAMMELL]. In paragraph 743, in Committee of the Whole, the committee reported an amendment which was amended upon its suggestion as follows: After the word "limes," in line 24, the following words were stricken out:

Oranges, and grapefruit, 1 cent per pound.

And the following words were inserted:

In their natural state or in brine, and oranges, 1 cent per pound; grapefruit, one-half of 1 cent per pound.

Mr. FLETCHER. Mr. President, it will be seen that the bill as it came from the House provided for a duty on lemons of 2 cents per pound, and for a duty on limes, oranges, and grapefruit of 1 cent per pound. I ask the Senate to retain the provision just exactly as it came from the House, and therefore to decline to concur in the amendment made as in Committee of the Whole.

The Committee of the Whole, for some reason or other, drew a distinction between oranges and grapefruit. That distinction does not exist naturally and has no foundation or basis in reason. Oranges and grapefruit are produced in the same orchards. They are cultivated alike. They mature alike. The grapefruit and the orange go to market alike, in the same way and under similar conditions. The provision for 1 cent per pound is the same that was carried in previous legislation, under the Payne-Aldrich law.

There were some differences under the act of 1913 with respect to the different packages—certain size packages 18 cents, certain other sizes 35 cents, and then in bulk half a cent a pound, on oranges and grapefruit alike. Oranges and grapefruit have always been treated, in previous legislation, upon precisely the same footing. Why the committee saw fit to draw the distinction and make the discrimination embodied in the amendment of the committee is beyond my comprehension.

Mr. WALSH of Montana. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Florida yield to the Senator from Montana?

Mr. FLETCHER. I do.

Mr. WALSH of Montana. It may have occurred to the Senator that it was because grapefruit are produced in Florida, and oranges in California.

Mr. FLETCHER. I had a sort of secret notion to that effect, but I did not care to utter it, because I hate to believe that because lemons are produced in California and nowhere else they get a duty of 2 cents, and because California produces oranges, certain kinds of oranges—the "Sunkist" kind, particularly—there is no difficulty in maintaining a duty of 1 cent a pound on oranges, but because California does not produce grapefruit to any great extent, the duty on grapefruit must be placed at one-half a cent per pound. Florida happens to be in the same class as to oranges, and therefore Florida gets the 1 cent a pound on oranges; but since California does not produce any grapefruit worth while, at least she does not pride herself on it, there is discrimination as to that duty. She produces grapefruit, but, of course, it does not compare in flavor and in juice and in quality with that produced in Florida, and she does not make any special boast, I think, as to her grapefruit. For that reason, perhaps, California has not insisted on the 1-cent duty on grapefruit.

The grapefruit industry is an important one in Florida, however, and the only real competitor we have is Cuba. The States producing grapefruit—and my authority for that is the statement furnished in this compilation of tariff information—are the following: It is grown commercially in Arizona to a small extent, and it is also found in home orchards in Texas, Louisiana, Mississippi, and Alabama, and it is produced in California; but the production in Florida has grown immensely, and the chief production in this country is in Florida.

The imports practically all come from Cuba, as stated in this book of information and as I know. Cuba has a differential of 20 per cent on all these duties, and consequently it may be that some good American citizens who pride themselves on their patriotism—and with that kind of patriotism I must confess I have precious little sympathy—take their capital and go down to Cuba and invest it in enterprises in Cuba and then come here to the Congress of the United States and ask for special privileges because they are Americans, and are able to have their products grown in a foreign country, relieved of tariff duties that they may the better compete with our domestic producers.

Mr. GOODING. Mr. President, will the Senator yield for a minute?

The PRESIDENT pro tempore. Does the Senator from Florida yield to the Senator from Idaho?

Mr. FLETCHER. I have but a very brief time.

Mr. GOODING. I want to help the Senator. I assure him of that.

Mr. FLETCHER. I yield for that purpose.

Mr. GOODING. I want to say to the Senator that they have 40,000 coolie laborers in Cuba working on their plantations down there and doing their work, and they are increasing by about 8,000 a year.

Mr. FLETCHER. Precisely.

Mr. GOODING. You would not have any trouble at all in growing grapefruit if we repealed the Chinese exclusion act, which, of course, we are not going to do; but that is what we have to meet, and that is what you fruit growers in Florida have to meet when you come in competition with Mr. Cuban or, worse than that, Mr. American Capitalist employing that cheap labor.

Mr. FLETCHER. That is what the Americans do; they go to Cuba, where they can get this cheap labor and where the soil is fertile so that they do not have to use very much fertilizer in producing their crops, and then they have the audacity to come to Congress and ask Congress to give them special favors on the products that they produce in foreign countries.

Mr. GOODING. Out of reach of our Sherman antitrust law, too.

Mr. FLETCHER. And the same way, perhaps, in Mexico with their tomatoes. We will get to that a little later, however.

I say that we ought not to exert ourselves very much to help out these people who leave their own country, when there are opportunities here for investing their capital and developing enterprises in their own land, where they can get cheap labor and other favorable conditions, and then come to Congress and say, because they are Americans and because they employ American capital, that we ought to give them special favors.

So I insist, Mr. President, that since the importations of grapefruit amount to something over $800,000 a year in value the duty yields a revenue, a very important revenue. Those importations are from Cuba. They will increase, of course, but there is no warrant for us to give American capital the benefit of reduced duties when they go to Cuba, where they already have a differential of 20 per cent. They can produce these commodities there at a great deal less cost than they can in this country, and hence they go there; but this Government is under no obligation to grant them special favors simply because they happen to be American citizens.

I make the point, first, that there is a revenue of considerable importance to be derived from this duty. Importations of grapefruit from Cuba—and there is where the importations come from into this country—amount in value to some $800,000 a year; and, second, there is a clear discrimination, if you concur in this amendment, between the products produced almost exclusively in Florida and products produced elsewhere. There is a discrimination in the amendment of the committee between the orange and the grapefruit which does not belong there naturally and for which there is no foundation in reason or justice.

I therefore ask that the amendment made as in Committee of the Whole be rejected and that we go back to the House rates, as provided in this bill, treating grapefruit and oranges precisely on the same footing, as all previous legislation has treated them, and give a duty of 1 cent a pound on oranges and grapefruit and limes.

The PRESIDENT pro tempore. The time of the Senator from Florida has expired.

Mr. SHORTRIDGE. Mr. President, I shall enter into no controversy with the learned Senator from Florida [Mr. FLETCHER] as to the relative merits of the California and the Florida produced grapefruit. I am willing for the moment to salute Florida as the champion grapefruit-producing State in our glorious Union.

I understand the Senator to contend that the State of Florida needs and asks for a duty of 1 cent a pound on grapefruit, and I understand the Senator to appeal to us and say that that is necessary for the prosperity of his State. I assume that he is earnest and sincere in his view. I very fully and unqualifiedly agree with him; and I say that whether we raise a single grapefruit in the State of California or not.

I have heretofore said, in the course of some discussions—and I remember that I mentioned the State of Florida—that I would vote for a tariff to encourage, protect, and benefit an industry in Florida as gladly as I would for a similar product or industry in my own State. I also wish to say to Senators and to the committee and to gentlemen from other States whose climate is so inclement as not to be able to produce oranges or lemons or grapefruit, due to the moonshine that filters down through the leaves of their great forests, that there is no distinction in reason—I say this with deference—for placing grapefruit at one-half cent per pound and oranges at 1 cent per pound.

But I have troubled you too long. I merely rose to say that I agree with the Senator from Florida, and I hope that his amendment will prevail.

Mr. TRAMMELL. Mr. President, I wish to thank the Senator from California for his indorsement of the position of my colleague and myself that there should be no discrimination between the orange and grapefruit in a tariff bill.

In my State we produce probably about one-third as many grapefruit as oranges. In other words, that constitutes one-third of the citrus-fruit industry in the State of Florida. When the House was dealing with the question, as had previously been the case, the House fixed a rate of duty at the same figure upon grapefruit, oranges, and limes, giving a higher rate, however, 2 cents a pound, to lemons, which are produced almost exclusively in California.

I have investigated the matter since I found that the committee recommended this reduction from the House rate. As before stated, the House rate was the same on oranges, on grapefruit, and limes, and that has been the history heretofore in dealing with the citrus-fruit industry. The three have been placed in the same class heretofore and bore a similar rate at all times.

But the Senate Finance Committee, I feel, laboring under a misapprehension, due to the fact that certain American citizens who had entered upon the grapefruit industry in the Isle of Pines, appeared before the committee and asked for a reduction, made this reduction. Its recommendation for a reduction was made exclusively upon the recommendation of three citizens from the United States who have made investments in the grapefruit industry in the Isle of Pines. The idea, of course, is to encourage and build up the industry there, to the detriment of the United States, and to the detriment in particular of the State of Florida.

It has been no easy thing to build up the grapefruit industry in my State. Years ago there was but little demand for grapefruit in our country. The people did not understand the grapefruit. They did not care for them; they did not think of them as being as palatable and as delicious as they are, and it has only been by the expenditure of time and money and effort for years and years that the people of Florida—because the people of Florida produce, I believe statistics show, probably 90 per cent of all the grapefruit produced in the United States—have built up a reasonably good market for grapefruit here in our own country. And now that market having been built up, the industry being reasonably profitable, some American capitalists go to the Isle of Pines, make investments there, and upon the claim that they are American citizens representing American capital ask the American Congress for a discrimination in the tariff bill in favor of the products produced by them.

This reduction is not only one-half cent per pound, being one-half the rate fixed upon oranges, but with the differential of 20 per cent allowed to Cuba the rate is cut to where we will have only the protection of two-fifths of 1 cent upon our grapefruit, and yet the rate on oranges would remain 1 cent a pound.

I can not believe that the committee, had it understood fully the facts surrounding the industry in America, and in Florida in particular, would have recommended that the rate be only two-fifths of a cent per pound upon grapefruit when they allowed a rate of 1 cent a pound upon oranges.

In the name of justice, Mr. President and Senators, we appeal to the Senate to defeat the amendment offered by the committee and to stand for the duty as fixed by the House, which will allow 1 cent a pound upon oranges and grapefruit alike, and it should be the same duty.

One is no more profitable and no less profitable than the other, and if oranges are entitled to a protection of 1 cent per pound certainly grapefruit should enjoy the same protection of 1 cent a pound. I hope that the amendment of the committee will be rejected, and that the rate prescribed in the bill as it came from the House, which will work no discrimination against Florida or any part of the United States, will be allowed to stand.

Mr. REED of Missouri. Mr. President, the Senator from Florida is in error. The committee were not mistaken. The members of the committee knew exactly what they were doing. They were playing politics with the people's money. They were levying these taxes in response to political demands. They were impelled by only one motive, and that was to win an election, and they put all of their money, if I may use a sporting phrase, on one card, and that was the card of political advantage.

This bill is consistent with nothing except the desire to serve special interests in return for special favors. The committee made no mistake. The guiding spirits were the most astute politicians of the opposing party. They sought to build a tariff wall which would protect their friends and reward those who had contributed to their campaign funds. They undertook to erect a structure by which their benefactors could become beneficiaries and their sponsors could become profiteers. They have succeeded with a degree of perfection that is a compliment at once to their intelligence and an inverse compliment to their consciences.

My friends from Florida utter a plaintiff plea that their product shall be placed upon an equality with the products of the great State of California. They forget the important consideration which controlled the members of the committee framing the bill. The members of that committee fully understood that California was a political battle ground, and that Florida was not a political battle ground. The benefaction conferred upon the citrus-fruit growers of California might turn the vote of that great State, and as it turned the election might correspondingly turn; whereas it was understood in advance that the vote of Florida would not be determined by any such sinister or sordid consideration, that Florida would vote according to her idea regarding the principles of the Federal Government, while California would vote, or might vote, according to the principle of profits. So, naturally, a distinction is made between the products of these two great States.

I have sat here for some days following the course of this debate. I have heard in one paragraph of an address, a eulogy upon California, how the golden sunlight falls in drifting waves of powdered benefaction and blessing upon the hills and valleys of the great Pacific State; how the stars smile as beneath them sweeps the majestic acreage of California; of how the dews fall with a peculiar gentleness upon the soil of that beloved and heaven-blessed State, and of how her people, better than any other class of men or women on earth, represent the highest production of Almighty God's handiwork.

All this of California; and yet she is the universal pauper. She is the one State which can compete in nothing. The genius of her sons falls prostrate before the productive capacity of pauper labor of all countries on earth. Her handiwork is inferior in the markets of the world to that which is produced by the dull fingers of the illiterate of other nations. Her fields refuse to produce the products of sunshine and of shower, and they bring forth only a sterile crop, which can not compete with the products of any other land on earth. They must be protected and coddled in the cradle of national care and solicitude; they must have applied to their lips the pap bottle of favor, and they must be nursed and diapered by the salaried hands of a taxed people. This is California as painted here to-day by her representatives upon the floor of the Senate.

I entertain no such view of California. I believe that she has been blessed beyond most States by the fertility of her soil and by the kindness of Heaven. I believe that her people are progressive in everything except the character of her statesmanship, and that has only suffered because her statesmanship has subordinated State pride to State cupidity, and that, as a matter of fact, what California needs is some one to proclaim her greatness, and not add, as a sort of corollary to that greatness, the fact that she is incapable of taking care of herself, and must be nursed by the public pap.

The PRESIDENT pro tempore. The time of the Senator has expired.

Mr. REED of Missouri. I had not gotten well started.

Mr. McCUMBER. Mr. President, the wonderful argument to which we have just listened will fall to the ground when we consider what changes we have made in the paragraph, and show that we have considered both the California and Florida interests. Under the good Democratic tariff Florida got one-half of 1 cent per pound upon limes and oranges in bulk. We give her 1 cent a pound. The only producer of limes that amounts to anything in this country is Florida.

Mr. FLETCHER. We have only 1 cent on limes.

Mr. McCUMBER. Yes; 1 cent on limes.

Mr. TRAMMELL. And 2 cents on lemons.

Mr. McCUMBER. It has been increased at least one-half of 1 cent. The quantity of grapefruit raised in California does not amount to a great deal. I do not know just the cost of producing oranges and grapefruit, but we have to take into consideration the competition, whatever there may be of the one with the other. The grapefruit weighs a great deal more according to its bulk than the orange. There is more water in it. There was the question of the importations from a little country which we own ourselves in the South and also from the Isle of Pines. The committee, after hearing both sides, gave one-half of 1 cent to the one, which was the present rate, and raised the other from one-half of 1 cent to 1 cent, raising the oranges from one-half of 1 cent to 1 cent and raising lemons to 2 cents. The protection is the same wherever it may be grown and whatever State may produce it.

I would be perfectly willing, so far as I am concerned, to accept the proposition made by the Senator from Florida if he thinks that we are not giving a sufficient protection for his Florida products, but I desire to call the attention of the Senator to the fact that we have inserted after the word "limes" the words "in their natural state or in brine." I think that ought to be continued in some way in the provision.

Mr. FLETCHER. I have no objection to that.

Mr. McCUMBER. If the Senator desires that we should disagree to the committee amendment and then after the word "limes" insert "in their natural state or in brine," I have no objection to it.

Mr. FLETCHER. That would be entirely satisfactory.

The PRESIDENT pro tempore. The question is, Will the Senate concur in the amendment made as in Committee of the Whole?

Mr. FLETCHER. I suggest that we disagree to the committee amendment first.

Mr. McCUMBER. I ask the Senator if we can not accomplish the same thing by striking out the words "one-half of" in line 26?

Mr. TRAMMELL. That would accomplish the result.

Mr. McCUMBER. Then before we vote upon the committee amendment, I move to amend the amendment by striking out "one-half of" in line 26.

The PRESIDENT pro tempore. The question is upon the amendment proposed by the Senator from North Dakota to the amendment.

The amendment to the amendment was agreed to.

The PRESIDENT pro tempore. The question is, Will the Senate concur in the amendment made as in Committee of the Whole as amended in the Senate?

Mr. FLETCHER. Let the amendment be stated as it would then read.

The ASSISTANT SECRETARY. If amended, it would read "lemons, 2 cents per pound; limes in their natural state or in brine, and oranges, 1 cent per pound; grapefruit, 1 cent per pound."

Mr. WATSON of Indiana. Mr. President, on that question I demand the yeas and nays.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. EDGE (when his name was called). I transfer my pair with the senior Senator from Oklahoma [Mr. OWEN] to the Senator from Vermont [Mr. PAGE] and vote "yea."

Mr. McCUMBER (when his name was called). I transfer my general pair with the junior Senator from Utah [Mr. KING] to the junior Senator from Washington [Mr. POINDEXTER] and vote "yea."

Mr. SUTHERLAND (when his name was called). I transfer my pair with the senior Senator from Arkansas [Mr. ROBINSON] to the junior Senator from Maryland [Mr. WELLER] and vote "yea."

Mr. WATSON of Indiana (when his name was called). Making the same announcement as to my pair and its transfer, I vote "yea."

The roll call was concluded.

Mr. POMERENE. I transfer my pair with my colleague [Mr. WILLIS] to the senior Senator from Texas [Mr. CULBERSON] and vote "nay."

The result was announced—yeas 42, nays 20, as follows:

YEAS—42.

Ashurst	du Pont	Lodge	Reed, Pa.
Ball	Edge	McCumber	Sheppard
Brandegee	Ernst	McLean	Shortridge
Broussard	Fletcher	McNary	Smoot
Bursum	France	Moses	Stanfield
Calder	Gooding	New	Sutherland
Cameron	Hale	Nicholson	Trammell
Capper	Harreld	Norbeck	Warren
Cummins	Jones, N. Mex.	Oddie	Watson, Ind.
Curtis	Jones, Wash.	Pepper	
Dillingham	Kendrick	Phipps	

NAYS—20.

Dial	Lenroot	Reed, Mo.	Sterling
Frelinghuysen	McKellar	Shields	Swanson
Glass	Myers	Simmons	Underwood
Hitchcock	Overman	Smith	Wadsworth
Kellogg	Pomerene	Stanley	Walsh, Mont.

NOT VOTING—34.

Borah	Heflin	Newberry	Spencer
Caraway	Johnson	Norris	Townsend
Colt	Keyes	Owen	Walsh, Mass.
Culberson	King	Page	Watson, Ga.
Elkins	Ladd	Pittman	Weller
Fernald	La Follette	Poindexter	Williams
Gerry	McCormick	Ransdell	Willis
Harris	McKinley	Rawson	
Harrison	Nelson	Robinson	

So the amendment made as in Committee of the Whole, as amended, was concurred in.

The PRESIDENT pro tempore. The Chair is advised that the reservation on page 114, paragraph 776, has been withdrawn. The question is, Will the Senate concur in the amendment made as in Committee of the Whole?

Mr. UNDERWOOD. Mr. President, I do not care to delay the matter, but I do not understand the proposition on which the Senate is asked to vote. It has not been reported.

The PRESIDENT pro tempore. The Secretary will report the amendment reserved.

The ASSISTANT SECRETARY. The reservation made on page 114, paragraph 776, on chocolate and cocoa, has been withdrawn. There are two amendments in the paragraph made as in Committee of the Whole.

The PRESIDENT pro tempore. The question is, Will the Senate concur in the amendments made as in Committee of the Whole?

The amendments were concurred in.

The ASSISTANT SECRETARY. On page 120, line 19, in reference to the rate on long-staple cotton, the Senate, as in Committee of the Whole, inserted a new paragraph in the bill after line 17, as follows:

PAR. 900. Cotton having a staple of 1⅛ inches or more in length 7 cents per pound.

Mr. ASHURST. Mr. President, on July 12 the Senate rejected the amendment which I tendered proposing to strike out the numeral "7" and to insert the numeral "10." I now move, on page 120, line 19, that the numeral "7" be stricken out and that the numeral "10" be inserted.

The PRESIDENT pro tempore. The Secretary will state the amendment proposed by the Senator from Arizona to the committee amendment.

The ASSISTANT SECRETARY. On page 120, line 19, it is proposed, before the word "cents," to strike out the numeral "7" and in lieu thereof to insert the numeral "10," so that the paragraph will read:

Cotton having a staple of 1⅛ inches or more in length, 10 cents per pound.

Mr. TRAMMELL. Mr. President, I hope the amendment proposed by the Senator from Arizona [Mr. ASHURST] to the committee amendment will be adopted. If there is any industry in the country which needs to be encouraged by protection, I feel that it is the long-staple cotton industry. Our domestic long-staple cotton competes with the Egyptian or sea-island cotton, which is produced at about one-half the cost for which it can be produced in this country. Under a rate of 7 cents a pound there is still an advantage in favor of the Egyptian cotton of probably 17 or 18 cents per pound.

Even during the World War and following that war, on account of Egypt being able to produce this class of cotton at a lower cost than it could be produced in the United States, the product in this country was allowed to accumulate, to be stored in the warehouses to quite an extent, and our producers were unable to dispose of it at a price that would equalize to them the cost of production and cover the higher wage cost and the cost of fertilizers.

In my own State, in the northern tier of counties, we produce what is known as long-staple or sea-island cotton. We have realized that our industry there has been interfered with to quite an extent on account of the competition of the Egyptian cotton, which is produced by cheap labor and at a far less expense. My understanding is from those who are familiar with the figures that it costs in Florida approximately probably from 40 to 42 cents a pound, while in Egypt it costs only 23 cents a pound, to produce this particular grade of cotton.

Mr. McKELLAR. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Florida yield to the Senator from Tennessee?

Mr. TRAMMELL. I yield.

Mr. McKELLAR. I merely wish to ask the Senator what is now the price of long-staple cotton?

Mr. TRAMMELL. My recollection is that the price of long-staple cotton is from 35 to 40 cents per pound at the present time. Within the first two years after the war the American producers were obliged to dispose of it at a price less than the cost of production, and on account of the competition in my State, where for a time this particular grade of cotton was produced rather extensively, Florida being one of the extensive cotton-producing States of the Union, the industry has been very much crippled and impaired, due to that fact, and also, of course, to the ravages of the boll weevil.

I desire, Mr. President, to indorse the amendment which has been offered by the Senator from Arizona to the committee amendment, and I hope it may be adopted.

Mr. REED of Missouri. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Florida yield to the Senator from Missouri?

Mr. TRAMMELL. I yield.

Mr. REED of Missouri. Before the Senator takes his seat, I desire to ask what is the acreage of long-staple cotton in Florida?

Mr. TRAMMELL. I do not know the exact acreage, but the acreage is much less than it was a few years ago.

Mr. REED of Missouri. The acreage has been growing less for a number of years, has it not?

Mr. TRAMMELL. It did not grow less until the crop was attacked by the boll weevil. Even now we are trying to produce it, and do produce it, although it is not reasonably profitable to the farmer.

Mr. REED of Missouri. Without desiring to prolong this colloquy, I desire to ask, is it not a fact that this variety of cotton is raised in a very limited territory?

Mr. TRAMMELL. In the United States it is raised in a very limited territory.

Mr. REED of Missouri. Are not the lands on which it is grown speedily reduced in their productive capacity?

Mr. TRAMMELL. No; I do not think that is true. I do not think the land where that variety of cotton is grown becomes exhausted any more quickly than it would if any other crop were grown.

Mr. REED of Missouri. Can the Senator tell me what proportion of the cotton which is raised in the United States is long-staple cotton?

Mr. TRAMMELL. The long-staple cotton is a very small proportion, compared to the number of acres devoted to the cultivation of cotton, and the consumption of this character of cotton is very small in comparison with that of short-staple cotton. The production, however, I think, is proportionate to the consumption in comparison to short-staple cotton.

Mr. REED of Missouri. Is it not true that we can not produce in this country at the maximum one-tenth of the consumption of long-staple cotton?

Mr. TRAMMELL. I think we can produce considerably more of long-staple cotton in this country than is consumed in this country. I think that that can be done.

Mr. REED of Missouri. I do not want to contradict my friend, for whom I entertain the highest opinion, but he is the only man I have ever heard make that assertion.

Mr. TRAMMELL. Mr. President——

Mr. STANLEY. Will the Senator yield to me?

Mr. TRAMMELL. I have only a few moments, if the Senator will pardon me. I can not make a half-hour speech in 10 minutes.

The Government, realizing that the importations were crowding out the domestic product, during the first year following the war for a time put an embargo on the importation of Egyptian cotton. That in itself is a concrete illustration of the fact that for at least a year or two following the war there was a greater production of the long-staple cotton in this country than was being consumed or, at least, than was being purchased. I forget the exact length of time during which the embargo was operative, but it was a very wise and very just provision.

Mr. FRELINGHUYSEN. Mr. President——

The PRESIDENT pre tempore. Does the Senator from Florida yield to the Senator from New Jersey?

Mr. TRAMMELL. I do not know whether or not my time has expired.

Mr. FRELINGHUYSEN. I merely desire to ask the Senator a question. I should like to ask the Senator for information regarding long-staple or sea-island cotton which was raised in the South Atlantic States. Is it not true that that cotton is of a very fine quality?

Mr. TRAMMELL. Yes; it is a very fine quality cotton.

The PRESIDENT pro tempore. The Chair advises the Senator from Florida that he has but one minute remaining.

Mr. TRAMMELL. That is the character of cotton to which I have had reference—the long-staple and sea-island cotton, which is more commonly called in our part of the country long-staple cotton.

Mr. FRELINGHUYSEN. Why is it not raised now?

Mr. TRAMMELL. The production has been cut down very largely on account of the ravages of the boll weevil, just as the production of short-staple cotton has also been reduced; but the acreage of long-staple cotton is being extended at the present time.

Mr. FRELINGHUYSEN. Will a high tariff stop the boll weevil?

Mr. TRAMMELL. If the Senator is inspired to ask me such a question I do not know that the answer would have a tendency to edify him or to inform him upon the subject, so I do not care to answer the question.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment offered by the Senator from Arizona.

Mr. STANLEY. Mr. President, as a Democrat I most earnestly hope that this duty will not be imposed. There is only less excuse for the imposition of a duty on long-staple cotton than there is for a duty on short staple wool. In the light of history, when an enlightened public opinion has had an opportunity to express itself upon the iniquities of this tariff bill, the two things which will stand out utterly indefensible and absolutely iniquitous will be the duty on cotton and on wool, and the one excuse that the convicted wool grafters can offer will be that "we are limed with the same stick," and that there were found in the South men who were just as willing to eat from this dirty dish, feast from these same filthy fleshpots as were the men who were willing to prosper at the expense of the nakedness of the American people.

Not one-fifth of the long-staple cotton ever was or ever will be raised in the United States. The sea-island cotton has gone; the boll weevil has destroyed it. The production of long-staple cotton is a government-fostered institution; it is raised in government infirmaries upon a few acres of land, reclaimed by the Government, for which the occupants have promised to pay at some distant date. I repeat it is grown on reclaimed land, under peculiar conditions, and a few thousand bales of it are produced. Four-fifths of the cotton of this character which is used in the United States comes from abroad and always will come from abroad. For every 10 cents a pound duty that is put on this cotton 50 cents are added to the cost of the cotton, because it is necessary to pay five times the 10 cents for the imported bale for every bale that is protected.

Now, where does this cotton go? I have looked into that question. We have been told that it goes into fine fabrics, into automobile tires. This is the thread of America. All our fine threads, all our sewing threads are made from long-staple cotton. There is not a sewing woman in the United States, there is not a widow left struggling to keep the wolf from the door with a slender needle who is not placed under tribute by the growers of long staple cotton in Arizona and in the Imperial Valley of California.

Of all the people on earth to plunder, the women at the sewing machine are the last!

Our fathers were moved to tears by the story of—

> A woman clad in unwomanly rags,
> Singing the song of the shirt;
> Sewing at once with a double thread,
> A shroud as well as a shirt.

There is not a sweatshop, there is not a woman bowed above her machine, eking out a slender existence for herself and her orphan children, who is not placed under tribute by this abominable and conscienceless exaction. There is no excuse for it. It is a duty upon a necessity of life, and it is a duty levied, I am sorry to say, at the demand of some of my own colleagues.

It hurts me worse to hear this doctrine of plunder, this doctrine of protectionism, this doctrine of subsidizing industries preached by my own colleagues. I can forgive the tariff barons upon the other side. I can forgive the hungry hordes upon the other side of this Chamber. I can say of them, as my Savior said of those who crucified him:

> Father, forgive them, they know not what they do.

But I am at a loss to find any excuse for so intelligent a statesman as the Senator from Arizona [Mr. ASHURST], for so gifted a Representative as the great Senator from Florida [Mr. FLETCHER], when they rise in their places and recant the doctrines of their fathers and spit upon a Democratic principle and a Democratic platform, and attempt to lay tribute upon the sewing women of America and to make the very threads in their garments the prey of this abominable protectionism.

Mr. CAMERON. Mr. President, I am very glad to note that the Senator from Kentucky has seen fit to discuss his colleagues rather than the article that we have before the Senate, and upon which we are asking a duty.

The senior Senator from Arizona [Mr. ASHURST] well knows the worth of protection on long-staple cotton, and so does the senior Senator from Florida [Mr. FLETCHER]. The idea is this, gentlemen of the Senate:

We can produce enough long-staple cotton in the United States, or in Arizona alone, to supply the entire United States. There is no question about that. The duty of 10 cents a pound which we are asking upon this article is not too much; and I believe, from the way some of the Senators upon the other side have been voting to-night on grapefruit and other matters, that there is no reason why we should not expect their support on this article.

We know that the duty of 7 cents a pound, the rate now established, is not enough to maintain the industry in our State and in California. I hope, therefore, that when the Senators vote upon this matter they will agree to the amendment of the Senator from Arizona, and give us a duty of 10 cents per pound.

Mr. SIMMONS. Mr. President, just one word.

If the Senator from Arizona is correct in the statement that enough cotton of the long-staple variety can be raised in the State of Arizona to supply the entire demand of America—and I do not think the statement is correct—that would not interfere, in my judgment, except to a very meager extent, with the importation of cotton from Egypt.

Senators are laboring under the erroneous impression that the competition between the Egyptian cotton and the American cotton is as to the length of the staple. That is not the fact. If we raised five times as much long-staple cotton in this country as we do raise, we would still import from Egypt practically as much as we now import from Egypt, because the competition is not as to the length of staple. We can grow as long a staple here as they can grow in Egypt, but we can not grow here the finer staple that they grow in Egypt. The Egyptian cotton, as I have said, is sought by the spinners of fine yarn and the manufacturers of fine cotton goods in Europe and in the United States not because of its length of staple so much as because of the fineness of that staple. There is no other spot upon the earth where they can raise the particularly fine grade of long-staple cotton that is demanded and is necessary

in the production of the fine cotton yarn and cotton goods, and that is the point of competition.

You will not keep out Egyptian cotton by placing a duty upon long-staple cotton. Our spinners have to have it. They make fine cotton goods, and they will have it regardless of the price they have to pay for it.

The trouble about this business is that when we impose a duty of 10 cents a pound upon long-staple cotton the duty is carried forward to the yarns and to the cotton goods, and when it gets to the yarns and the cotton goods it will be 12 or 15 cents a pound, and that 12 or 15 cents a pound will have to be paid not only upon the cheaper goods that are made out of American long-staple cotton but it will have to be paid on all the fine cotton goods that are manufactured in America out of fine Egyptian cotton, and it will have to be paid upon all the fine cotton goods that we import from Europe, and there is where we get the most of our fine cotton goods. It will have to be paid upon every pound of that, because all of these fine goods that we import from Europe, or practically all of them, are made out of cotton of which Egyptian cotton is the material of chief value.

So it will turn out that in order to enable a few farmers—probably two or three thousand farmers in Arizona and probably a few hundred farmers in some of the valleys of the Mississippi and in California—to get 10 cents a pound more, or 7 cents a pound more, as the case may be, for their cotton—I believe 30,000 bales were raised in Arizona last year, as against probably forty or fifty or sixty thousand bales a year or two ago—while they will get 7 cents a pound more or 10 cents a pound more, as the duty may be fixed at 10 or 7 cents a pound, every consumer in the United States of goods made out of long-staple American cotton or made out of cotton of which Egyptian or long-staple cotton is the element of chief value, will have to pay from 12 to 15 cents a pound more for his cotton goods. The result will be, Mr. President, that the American consumer of cotton goods will probably have to pay by reason of this duty into the Treasury of the United States and into the pockets of a few producers in this country from five to ten dollars for every dollar that will go into the pockets of the producers of long-staple cotton in this country.

I wish the Senator from Arizona would not press his amendment. It can not be justified upon any principle of public welfare.

Mr. McKELLAR. Mr. President, will the Senator yield?

Mr. SIMMONS. I yield to the Senator from Tennessee.

Mr. McKELLAR. I just want to call the attention of the Senator to the fact that in 1920 there were only 1,868 bales of this long-staple cotton raised in the whole sea-island country—practically none.

Mr. SIMMONS. I knew there was very much less raised after the emergency tariff act, which put a 7-cent duty upon it, went into operation, than there was before. That is on a parallel with the effect of this emergency tariff upon many other things. Since the emergency tariff went into effect, putting a high duty upon wheat, wheat has gone down from $1.50 a bushel until it is selling in Chicago for less than $1 a bushel. Corn has gone down from something near $1 a bushel until it is selling for not much more than 50 cents a bushel; and so have oats and rye and everything else. It seems now, from the statistics which the Senator from Tennessee has just given, that that tariff is about to destroy the long-staple cotton industry in the State of Arizona; and yet, with that fearful example staring the Senator from Arizona in the face, he wants to increase the duty, and probably, if he does, that will result in the complete destruction of the industry in his State!

Mr. ASHURST. Mr. President, it is particularly unfortunate for me that I must follow such an able and well-informed statesman as the Senator from North Carolina [Mr. SIMMONS]. When he appeals to me to withdraw the amendment it is a powerful appeal, and only the conviction that I have a duty to perform to the people of the United States precludes me from withdrawing the amendment.

Personal friendship and the affection which has ever existed between the Senator from North Carolina and myself must not interfere, however, between me and the performance of a public duty. I am also particularly unfortunate this evening that I must follow the distinguished and eloquent Senator from Kentucky [Mr. STANLEY], whose speeches are like long-entangled skeins of silver braid, but upon close observation we see that he simply leaped from lambent flame into brilliant fire with a passionate and eager ardor, and that if he had consulted Senator TOM HEFLIN and Senator ED SMITH he might have made an accurate speech regarding cotton.

The Senator from Kentucky [Mr. STANLEY]—and that affection which I feel for the Senator from North Carolina is advancing upon the Senator from Kentucky, and I forgive him—I forgive him for his undemocratic vote on the Underwood tariff bill which laid a duty of 35 per cent ad valorem on the clothes which we wear, and let the raw material come in free. Mr. President, I also forgive him for voting for the Underwood tariff bill, which levied a duty on thread that the housewife used. He tells ue about the song of the shirt; but when the Underwood tariff bill was up he was, oh, so silent about levying a duty upon thread and at the same time putting the raw material upon the free list.

In front of me is the Senator from South Carolina [Mr. SMITH]; and I should hesitate to put into the scales my poor knowledge of cotton as against his knowledge. A great statesman from his State, John C. Calhoun, once said:

> There is no principle of government better established than that the burdens and benefits of government should rest equally and alike upon all.

That is the principle for which southern, eastern, northern, and western Democrats stand. We stand here to insist that if you tax the shirt, the trousers, and the coat, you must also tax the raw material. We say here that if protection be a good thing for the barons of Wall Street and for the manufacturers in New Jersey, New York, Delaware. and Pennsylvania, it is a good thing for the cowboy and the rancher on the plains of Wyoming and Arizona. We practically apply the doctrine of John C. Calhoun, that there is no principle of government better established than that the burdens and benefits of government do and should extend alike upon all.

No man can defend a vote laying a duty, a tax upon clothing, and then putting wool upon the free list. It can not be defended in the forum of conscience; it can not be defended parliamentarily.

What is the situation as to Arizona cotton? The Senator from Kentucky inveighs against it; but men went out under a burning sun a few years ago, where the cacti lifted their thorny arms into the brazen gloom, and American industry is now spreading a mantle of white cotton in the summer out upon those deserts. There it is in its raw state. [Exhibiting.] Here it is in the skein. Here it is in the bobbin, and here it is, Mr. President, woven into luxurious cloth, which the rich only buy.

I can not afford to wear it; it costs too much for my lean, thin purse. If I were writing a revenue bill—one to produce revenue and put money into our Treasury, the first things I would tax would be diamonds and long-staple cotton, because this cotton goes into this character cloth, this luxurious cloth, the names of which only those who have achieved familiarity with European customs and modes and fashions can pronounce.

Yet, the Senator says that should be untaxed. Would the Senator tax the clothing which the common people wear and not tax this luxurious character cloth nor the raw material? He says it should not be taxed, that it should be on the free list, that the raw material should be free. I am surprised that the Senator from Kentucky, who represents a State bottomed upon the true faith, should say that the poor man's article of food and the poor man's article of clothing should be taxed, but that this luxurious cloth, worn only in the parlors of the dilettante, should not be taxed.

Mr. STANLEY. Mr. President——

Mr. ASHURST. I have only two or three minutes. I can not yield at this time.

Mr. STANLEY. I am sorry——

Mr. ASHURST. I decline to yield.

Mr. STANLEY. Because I did not say anything of that kind.

Mr. ASHURST. I am very glad to know, then, that the Senator did not say it. The truth is that the Senator, in the superabundance of his elastic eloquence, says many things which at times we do not ourselves understand.

I am composed this evening. I do not feel that I have declared a heresy simply because I insist that in making a tariff bill, if it be right to put clothing upon the dutiable list, it is right to put wool upon the dutiable list. If it be correct to put leather goods upon the dutiable list, it is correct to put a duty upon the cattle which the cowboy must go out and raise and send to market after he has worked 15 hours a day with his herds.

I stand here to speak for those who can not speak for themselves, that great inarticulate mass of people who will some day be penetrated by the profound and sublime truth that you can not have protection in the East and free trade in the West, that you can not have protected fabrics and free raw material.

I see my friend from Missouri [Mr. REED] coming down the aisle and entering the lists. I am now disturbed and much discomposed, Mr. President, because frequently, without much to support his case, he apparently can make a good case. He is just fresh from a contest in Missouri that was watched not only by Washington but by all America as well, and he emerged the victor. But with his really wonderful eloquence, before

which I gladly bow, he can not, he dare not, say, for he is too honest a man to say, too great a statesman to say, that it is right to protect the products of the factory but wrong to protect the products of the farm. He is bound to say that if protection is to be the policy of this country, it must apply to all alike. If a tariff for revenue is to be the policy of this country, it shall fall equally and upon all alike.

The PRESIDENT pro tempore. The question is upon the amendment proposed by the Senator from Arizona to the amendment agreed to in Committee of the Whole.

Mr. CAMERON. I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. REED of Missouri. Mr. President, I wanted to ask the Senator from Arizona a question. I have no desire to make a speech. How many acres of ground in his State raise this particular variety of cotton?

Mr. ASHURST. The Senator is entitled to an absolute answer.

Mr. REED of Missouri. Oh——

Mr. ASHURST. Two hundred thousand acres in Arizona, and about 200,000 acres in California.

Mr. REED of Missouri. I knew California had to be protected, of course. How many acres are in cultivation?

That is an infinitesimal amount compared with the importations of long-staple cotton. It is a bagatelle. The fact is that in addition to that, the long-staple cotton, so called, raised upon these irrigated lands, is inferior to the cotton raised in Egypt.

Mr. ASHURST. Will the Senator let me have two or three minutes time to answer that?

Mr. REED of Missouri. I have only 10 minutes.

Mr. ASHURST. Let me say in reply to that statement that when civilization was imperiled, when our cavalrymen of the clouds were carrying the pennant of victory in their beaks and the American emblem in their talons our brave aces and aeronauts felt secure. They knew they would not fall, because the wings of their steeds were made of Arizona long-staple cotton.

Mr. STANLEY. Mr. President, now I am going to yield the palm for spread-eagle oratory. The Senator sailed clear off of the earth. In truth, we never had an airplane made out of long-staple cotton in the war, and everybody knows that. We did not get any airplanes over there.

The PRESIDENT pro tempore. The time of the Senator from Arizona has expired.

Mr. ASHURST. I am asking the Senator from Missouri to yield to me.

Mr. REED of Missouri. I could not fail to yield to my friend from Arizona for a reasonable length of time.

Mr. ASHURST. The Senator from Kentucky has stated that there was no airplane wings made of the Arizona cotton. Let me say to him that not only were there airplane wings made of the long-staple cotton, but the Bureau of Standards, the Secretary of Agriculture, and the Secretary of Commerce urged Arizona to speed up its production of this cotton. Moreover, they urged them to plant the castor beans so that we might have the acetone for the airplanes. Yet Arizona's cotton crop is derided here. We forget part of her history.

Mr. ODDIE. Mr. President——

Mr. REED of Missouri. Mr. President, I hope I may proceed. I can not hear the Senator. I do not want to decline to yield.

This is a glorious evening, Mr. President, a wonderful epoch in history, when we can describe the cavalry in the air as carrying in their beaks huge pennants of Arizona cotton.

Mr. ASHURST. Mr. President, I said nothing of the sort. [Laughter.] I said they carried the pennant of victory in their beaks.

Mr. REED of Missouri. The cavalry of the air carrying in their beaks the pennants of victory, and grasping in their talons something else—I do not remember what it was.

Mr. STANLEY. That is a nightmare, and not real cavalry. [Laughter.]

The PRESIDENT pro tempore. Does the Senator from Missouri yield?

Mr. REED of Missouri. I am yielding, of course, to anybody. If we get as badly mixed in our logic as we do in our metaphors, God knows where we will end before this discussion is over.

The fact about the matter is that nearly all of the long-staple cotton we use is imported into this country; that the American cotton is a very inferior product. Somebody may have wanted it during the war. Every man who is at a loss for logic goes back to the war for his main premise, and generally for his conclusion. But we have to import long-staple cotton from Egypt if we promote the manufacture of goods in this country. That is legitimate. It does not involve any tax. It tends to promote American industry in conformity with what our friends on the other side of the aisle believe in, and in conformity with that which we believe in.

The Senator from Arizona makes only one mistake. He insists that if an iniquitous, an unjustifiable, an indefensible tariff is levied for the protection of a particular industry, that affords a justification for levying a similar tribute upon the American people for some other product.

That is a strange kind of logic. A horse thief of Arizona, or of any other State, might just as well justify himself by declaring that horse stealing was prevalent in Massachusetts, and therefore it ought to be encouraged by law in Arizona.

How a man can stand and declare himself to be the enemy of all crime and the champion of all virtue of course is not only the position of the Senator from Arizona, but is the justifiable position of every Democratic Senator, and at the same time justify himself in levying a robber tariff for the benefit of his people upon the hypothesis that those whom he has denounced as robbers, pickpockets, maurauders, and buccanneers, have in the pursuit of their various avocations levied a tribute on the particular goods they may produce—how that can afford a justification is beyond my ken.

Now, either one of two things is true. Either a tariff levied for the purpose of shutting out foreign competition and enabling the American manufacturer to raise his price to a point where he makes a profit—I omit where he is able to perpetrate a robbery—is justifiable, or it is an unjustifiable proposition. If it is justifiable, then every man in this Chamber, Democrat and Republican, ought to sign that creed, acknowledge that faith and go along with that crowd.

The PRESIDENT pro tempore. The time of the Senator from Missouri has expired.

Mr. REED of Missouri. Let me in one sentence conclude what I was saying. If it is unjustifiable, then we can not justify our conduct in adopting a similar method on the ground that the iniquity originated on the other side of the aisle.

Mr. ODDIE. Mr. President, I would like to ask a question of the Senator from Arizona in regard to the matter. I ask him if it is not a fact that recently one of the large automobile-tire concerns has built a large plant in southern California for the purpose of utilizing the long-staple cotton from Arizona and other Western States?

Mr. ASHURST. I think that is true; in fact, I know it to be true.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment proposed by the Senator from Arizona [Mr. ASHURST] to the amendment made as in Committee of the Whole, upon which the yeas and nays have been ordered. The Secretary will call the roll.

The reading clerk proceeded to call the roll.

Mr. McCUMBER (when his name was called). Transferring my pair as on the previous vote, I vote "nay."

Mr. POMERENE (when his name was called). I transfer my pair with my colleague [Mr. WILLIS] to the senior Senator from Texas [Mr. CULBERSON] and vote "nay."

The roll call was concluded.

Mr. DILLINGHAM. I have a general pair with the Senator from Virginia [Mr. GLASS]. However, I am informed that he would vote as I intend to vote. So I am at liberty to vote. I vote "nay."

Mr. UNDERWOOD. I wish to announce that the junior Senator from Mississippi [Mr. HARRISON] is paired with the junior Senator from West Virginia [Mr. ELKINS].

The result was announced—yeas 18, nays 47, as follows:

YEAS—18.

Ashurst	Gooding	Nicholson	Shortridge
Bursum	Jones, N. Mex.	Norbeck	Trammell
Cameron	Jones, Wash.	Oddie	Warren
Capper	Kendrick	Ransdell	
du Pont	McNary	Sheppard	

NAYS—47.

Ball	Gerry	Moses	Simmons
Brandegee	Hale	Myers	Smith
Calder	Heflin	New	Smoot
Colt	Hitchcock	Newberry	Stanley
Cummins	Kellogg	Overman	Sterling
Curtis	Keyes	Pepper	Sutherland
Dial	Lenroot	Phipps	Swanson
Dillingham	Lodge	Pomerene	Underwood
Edge	McCormick	Rawson	Wadsworth
Ernst	McCumber	Reed, Pa.	Walsh, Mass.
Fletcher	McKellar	Robinson	Walsh, Mont.
Frelinghuysen	McLean	Shields	

NOT VOTING—31.

Borah	Harreld	Nelson	Stanfield
Broussard	Harris	Norris	Townsend
Carraway	Harrison	Owen	Watson, Ga.
Culberson	Johnson	Page	Watson, Ind.
Elkins	King	Pittman	Weller
Fernald	Ladd	Poindexter	Williams
France	La Follette	Reed, Mo.	Willis
Glass	McKinley	Spencer	

So Mr. ASHURST's amendment to the amendment made as in Committee of the Whole was rejected.

The PRESIDENT pro tempore. The question now is, Will the Senate concur in the amendment as in Committee of the Whole?

The amendment was concurred in.

Mr. LODGE. Mr. President, I desire to propose an amendment on page 134, paragraph 1007, "hose, suitable for conducting liquids or gases, composed wholly or in chief value of vegetable fiber."

The amendment made to the paragraph by the Finance Committee fixes a duty of 17 cents per pound and 10 per cent ad valorem. I move that the 10 per cent be increased to 20 per cent. I do not think that 10 per cent gives sufficient protection, owing to the heavy duties placed upon the yarns of which the hose is made. The 17 cents is supposed to be a compensatory duty. It seems to me that the industry needs a further protection, and therefore I make the motion.

The PRESIDENT pro tempore. The Secretary will report the amendment offered by the Senator from Massachusetts.

The ASSISTANT SECRETARY. On page 134, in paragraph 1007, "hose, suitable for conducting liquids or gases," in the committee amendment agreed to as in Committee of the Whole, the Senator from Massachusetts moves to strike out "10" and insert "20," so that as amended it would read "17 cents per pound and 20 per cent ad valorem."

The PRESIDENT pro tempore. The question is upon the amendment proposed by the Senator from Massachusetts.

The amendment was rejected.

The PRESIDENT pro tempore. The question now is, Will the Senate concur in the amendment made as in Committee of the Whole?

The amendment was concurred in.

Mr. LODGE. Mr. President, I ask permission to have printed in the RECORD in this connection a letter and a short brief in regard to the matter.

The PRESIDENT pro tempore. Without objection, the request is granted.

The matter referred to is as follows:

MALDEN, MASS., *April 28, 1922.*

Hon. HENRY CABOT LODGE,
United States Senate, Washington, D. C.

MY DEAR SENATOR LODGE: May we take the liberty of troubling you again about our difficulties with regard to the new tariff bill as reported out of your Finance Committee?

We are referring to the duty on manufactured linen fire hose, paragraph 1007, and on yarns of which they are made, paragraph 1004.

There are only a few manufacturers of linen fire hose in this country, and we speak for them all.

We requested both before the House and Senate committees that the tariff on finished hose be placed at 50 per cent ad valorem. The Senate bill at present prices amounts to practically 50 per cent. This request was made on the assumption that the tariff on yarns would be no more than the amount asked for by the yarn manufacturers and as reported in the Fordney bill.

The practical application of the tariff as reported out of the Senate committee increases the duty on yarns and also the duty on hose, but the duty on hose is not increased sufficiently to take care of the increase in the duty on yarns, and it is our opinion that paragraph 1007 should be amended so as to more nearly take up the differential between the two proposed rates. Should the tariff on yarns be passed as reported by the Senate Finance Committee the duty on finished hose is not high enough.

This is so because the English manufacturer can sell his hose for $1 a pound. His duty under paragraph 1007 would amount to 37 cents, the freight and insurance would bring his cost f. o. b. America's ports, say, $1.40 per pound, largely on account of the difference between American and English labor.

We are obliged to charge for our hose under the present low tariff on yarns prices ranging from $1.65 to $1.78, and necessarily under the increased yarn duties the price would be higher, and in the fact of this condition we are wondering what is going to happen to our industry. Frankly, we do not see how we can exist with the tariff on yarns left where it is in paragraph 1004, unless a provision like this is added to paragraph 1007, which will, we think, take care of the situation under the return of normal conditions.

"*Provided*, That the duty on the foregoing shall not be less than 60 per cent ad valorem."

If this is done the foreign manufacturer will be able to land his hose here on present schedules at around $1.60 a pound, and we will be able to compete with that within our price ranges. The factor of 60 per cent ad valorem will take care of the declining market abroad in raw material and labor.

The paragraph as we suggest in amendment will be as follows:

"PAR. 1007. Hose, suitable for conducting liquids or gases, composed wholly or in chief value of vegetable fiber, 17 cents per pound and 20 per cent ad valorem: *Provided*, That the duty on the foregoing shall not be less than 60 per cent ad valorem."

We are not asking for protection to give us a chance to charge exorbitant prices, but merely to have a fair run with foreign competitors, and we do not see how we are going to under these conditions.

Yours truly,

CHAS. NIEDNER'S SONS CO.,
WM. NIEDNER, *Treasurer.*

Brief for Eureka Fire Hose Manufacturing Co., Charles Niedner's Sons Co., and William & Charles Beck (Inc.) on Schedule 10, flax-line yarns, paragraphs 1004–1007.

GENTLEMEN: This brief is submitted by and in behalf of every linen fire-hose manufacturer in the United States.

There are three contentions:

1. That flax-line yarns imported solely for the manufacture of linen fire hose should be admitted free from duty.

2. That if it seems wise to impose a duty upon flax-line yarns admitted for this or any other purpose the duty should be upon an ad valorem and not upon a specific basis.

3. The duty imposed on finished hose under paragraph 1007 in the proposed bill is insufficient.

1. Linen fire hose, such as you see hanging in the corridors of all large buildings and about industrial plants, is a high-grade product, manufactured to comply with specifications as determined by the boards of fire underwriters. It is made exclusively from imported flax-line yarns of grades between 8 and 20 lea, inclusive.

There is not grown in this country a suitable flax, nor is there manufactured in this country a flax-line yarn suitable for making high-grade fire hose.

Necessarily any duty whatever which is paid by the manufacturers of linen fire hose upon the yarns entering into their products only forces the consumer of fire hose in this country to pay just so much more for the finished product. Inasmuch as this is an item entering into building costs, everything should be done to decrease these costs and encourage new construction rather than to increase them. Further, as no one needs protection for this class of raw material, it seems to us highly advisable that flax-line yarns imported solely for the manufacture of linen fire hose should be admitted free from duty.

If it should be admitted that it is possible to procure a character of yarn in this country to make a cheap and inferior grade of fire hose, evidence and proof is available that there is no adequate supply to satisfy the requirements of the hose manufacturers.

2. It is submitted that the specific duty on yarns as proposed in paragraph 1004 is wholly impracticable and unscientific and may, under conditions which it is quite probable will arise in the near future, drive out of existence manufacturers using this class of material.

Under the proposed bill the completely manufactured foreign goods with which we have to compete are assessed only at an ad valorem duty of 26 per cent, while the raw material or yarns is advanced from an ad valorem duty of 20 per cent to a specific duty amounting to from 35 to 40 per cent of present-day values and which would amount to from 70 to 80 per cent ad valorem should these goods reach the prewar values, which is entirely probable.

It may be argued that under the proposed American valuation clause the foreign article with which we must compete will pay a higher duty than if assessed upon the foreign values, which we admit; but even so, the foreign goods may well be landed here at less cost than we are able to manufacture them for.

To illustrate specifically this conclusion, let us take an actual example. In May, 1921, our Underwriter's hose, 2½-inch, was selling at approximately $2 per pound. The duty on such hose under the proposed Fordney bill, 26 per cent ad valorem, would be 52 cents per pound. Now, bear in mind that slightly more than 1 pound of boiled yarn, 30 lea, would be required to make 1 pound of hose, so that the duty as scheduled in the proposed bill upon that 1 pound of hose would be 20 cents. Therefore the net protection would amount to 52 cents per pound of hose minus 20 cents, leaving 32 cents, which is a protection of 16 per cent upon the domestic price. It will be obvious, of course, that as prices gradually recede to normal the percentage at a specific rate of duty will constantly increase, while the imported finished hose which competes with our goods will pay less and less duty, until finally we will have to pay as much duty in actual dollars and cents upon yarn and raw material per pound as our foreign competitor pays upon his finished article, as we will show.

Assume that the hose mentioned above selling at $2 a pound was selling at 75 cents a pound in 1914 and the yarn now costing us 75 cents a pound without duty would have cost us 25 cents a pound in 1914, and consider this with regard to our ratio of protection. If our selling price recedes to pre-war or 75 cents a pound for the hose we are now selling at approximately $2 a pound, the duty that the foreign manufacturer will pay will be 26 per cent of 75 cents, or 19½ cents per pound. Now, under the present schedule if we are required to pay a specific duty of 20 cents per pound (which is 19 cents plus 1 cent for waste) on 25-cent yarn, this is equal to an ad valorem duty of 80 per cent, while our foreign competitor is paying 26 per cent upon the finished article. The only answer to this appears to be that the price will not recede. Our contention is just as sound that it will recede, and in any event the contingency should be provided against and the American manufacturer protected.

Let us look for the moment at the foreign manufacturer's price and assume, which is substantially correct, that he can manufacture hose for $1.25 per pound, which is comparable to our hose at $2 a pound. This is, of course, accounted for by his cheaper labor and material. Importing this hose at $1.25 he would, under the proposed bill, pay a duty of 52 cents (26 per cent of $2, the American valuation), which would land his hose in this country at $1.77 per pound, which is 23 cents less than we could sell the same hose for, and this he is able to do notwithstanding the present high prices in Europe, so that if hose in this country reaches the 1914 price of 75 cents per pound the foreign manufacturer's selling price would be about 50 cents a pound. Add to this his duty at 26 per cent, or 19 cents, which is 26 per cent of 75 cents, American valuation, he will be able to sell his product at 69 cents a pound in this market, while if our raw material costs us 25 cents a pound we pay specific duty on yarns of 20 cents per pound, making the price of our material 45 cents a pound, and we could not sell our hose for less than 75 cents a pound, or 6 cents above the price of our foreign competitor.

All of this justifies us, we think, in asking that even if any duty be imposed on flax-line yarns used in the manufacture of linen fire hose it should, like the finished article, be upon an ad valorem basis, for on a falling market the foreign manufacturer gets the advantage and the domestic merchant is penalized.

It will be observed that the proponents of the specific duty on flax-line yarns as reported in the bill are yarn manufacturers. They are unable to supply the demand for suitable flax-line yarn from this country. To place a specific duty upon linen yarns under so broad a classification as they request is to practically put a noncompetetive price upon flax-line yarn, suitable for the manufacture of linen fire hose, upon which they need no protection, for they can not supply it.

The differential between American and foreign labor and raw material is, in our opinion, in the future to be so high as to warrant the duty on linen fire hose being placed as high as 50 per cent ad valorem. This is especially true should your committee deem it advisable to place a specific duty upon the yarn, for the arguments used in the preceding paragraphs should convince one that the differential resulting between the foreign conditions and specific duty and 26 per cent ad valorem on the finished goods is by no means wide enough, and we beg to state that in our opinion the duty upon manufactured linen fire hose should be 50 per cent ad valorem.

And, in general, in our opinion the so-called "American valuation" is unscientific and will be a poorly operating system.

We beg to recommend to you the following:

First. The addition to paragraph 1004 of the proposed bill the words: "Provided, That flax-line yarns of 8 lea and not finer than 20 lea, imported solely for the manufacture of linen fire hose, shall be admitted free of duty."

Second. Should it be deemed wise not to adopt the preceding recommendation, then instead of a specific duty on flax-line yarns of 8 lea and not finer than 20 lea, an ad valorem duty of 20 per cent.

Third. A change in paragraph 1007 from 26 to 50 per cent ad valorem.

Fourth. In any event, a differential between the ad valorem value of flax-line yarn of 8 lea and not finer than 20 lea, and finished linen fire hose of 30 per cent.

EUREKA FIRE HOSE MANUFACTURING CO.,
Jersey City, N. J.
CHARLES NIEDNER'S SONS CO.,
Malden, Mass.
WM. & DEAS. BECK (INC.),
Lawrence, Mass.
LINUS C. COGGAN, *Counsel.*

The PRESIDENT pro tempore. The Secretary will report the next amendment reserved.

The ASSISTANT SECRETARY. On page 140, paragraph 1102, relating to wool, reserved by the Senator from Massachusetts [Mr. WALSH].

Mr. WALSH of Massachusetts. Mr. President, the Senate in Committee of the Whole voted to levy a duty of 33 cents per pound on wool in the clean content. That duty is the highest ever levied under any law upon wool. It is higher than the duty levied in the Payne-Aldrich law. It is higher even than the duty levied in the House text of the pending bill. It is one of the duties in the bill that everyone agrees will be effective in increasing the price of woolen goods to the American people.

This duty will increase the price to the manufacturers of woolen goods $72,000,000; this duty when pyramided will increase the price to the consumers of woolen goods the enormous sum of $200,000,000.

Mr. GOODING. Mr. President——

Mr. WALSH of Massachusetts. Mr. President, I do not yield. There is no question whatever here about the duty being effective in increasing prices; there is no question whatever about the amount that the consumers of America will have to pay by reason of the increased duties that the Senate amendment levies.

I am not going to take the time of the Senate to go over the reasons why this duty should not be levied. The question was fully and extensively debated when we were considering this amendment as in Committee of the Whole. I do wish, however, to make a final protest against asking the American public to assume this tremendous burden; I do wish to ask the Senate to hesitate before it undertakes to impose this duty; and I ask it to realize the tremendous consequences in increased prices for the clothing which the people of America must wear and for the blankets and other woolen goods which must protect them in the years to come.

There is absolutely no reason why this duty should be levied, except that the demands of the woolgrowers must be satisfied; and this is the rate which they demand and which they are asking the United States Senate to support and to approve.

Mr. President, the issue is a very simple one: Are we willing and prepared in this hour of great business depression, of deflation in prices, when the American public is demanding reduction in the cost of production, when wages have been reduced, to levy a duty of these extreme proportions and upon so essential a commodity as wool and one so necessary for the health and protection and comfort of the American people?

I repeat, we are now about to vote upon one of the most burdensome duties which are levied in this bill. We are about to levy the highest known duty upon raw wool. We are now about to vote upon a measure which will exact from the consumers of America $200,000,000 for the wool in the clothing which they wear and in the blankets which protect them from the cold. It seems incredible that the Congress of the United States should at this juncture proceed to levy such a high duty as this upon raw wool.

Under the present law, until the passage of the emergency law, wool was on the free list, and even under the emergency tariff law and, indeed, even under the Payne-Aldrich law no such high rate was provided as is provided for in this amendment.

Mr. STANFIELD. Mr. President——

Mr. WALSH of Massachusetts. I am sorry I can not yield. I have only 10 minutes.

The House of Representatives, which is Republican by an overwhelming majority, after long deliberation, after full consideration of this subject, at a time when this industry was passing through its greatest depression a year ago, considered 25 cents per pound ample and sufficient protection; yet the Senate proposes to increase that duty by 33 per cent, and to levy here to-day a duty of 33 cents per pound. Mr. President, I do not believe it can be justified; I do not believe it can be defended.

That this industry has suffered since the war no man questions; that the woolgrowers have had to bear heavy and severe financial losses no man can question, but so have the women and the men of America who wear woolen clothing; so have the men and women of America who wrap themselves up on cold winter nights in woolen blankets had to bear this depression—to bear the losses that have come as the result of the World War. It is not fair, it is not honest, it is not just, it is not right to ask them to go into their pockets to the extent of $200,000,000 in order to place $30,000,000 in the pockets of the woolgrowers of this country. It can not be defended, it can not be justified.

I ask the Senate in the vote that is now about to be taken to reduce this rate, to reduce this burden, to lessen this obligation upon the men and women and children of America, who must pay for every pound of wool that goes into their clothing, for every pound of wool that goes into their underwear, for every pound of wool that goes into the blankets that protect them against the cold. I ask the Senate to hesitate about imposing this obligation on 100,000,000 of our people in order that those who are engaged in one industry may receive the benefit of this duty.

No one here can question or doubt the result of this vote. All agree that we must import wool, that we must import 50 per cent of the wool that we consume, and that this duty will be effective not only upon the wool that we import but also upon the domestic wool; and that, therefore, when we vote to place this duty we vote to tax the American people who use wool in their clothing for the benefit of one industry. That can not be justified; I repeat, it is not fair, it is not sound policy to burden the American public with this duty.

I ask, Mr. President, that a record vote be taken, so that the American public at least may know those who propose to use the taxing power of this Nation to tax innocent people—millions of them—on the pretext of bringing prosperity to a depressed industry.

The PRESIDENT pro tempore. The time of the Senator from Massachusetts has expired.

Mr. ODDIE. Mr. President, I ask permission to have printed in the RECORD an article from The Protectionist of August, which gives the opinion of some noted foreigners as well as Americans on the question of whether or not a protective tariff results in raising or reducing prices to the consumer. This article shows very plainly the fallacy of the arguments we have heard from the other side, and shows clearly that when industries are built up by proper protection it results ultimately in the lowering of prices to the consumer.

The PRESIDENT pro tempore. Without objection, the article presented by the Senator from Nevada will be printed in the RECORD.

The article referred to is as follows:

[From the Protectionist, August, 1922.]

DOMESTIC PRICES NOT INCREASED BY IMPORT DUTIES—EVIDENCE COMPILED BY SIR GUILFORD L. MOLESWORTH FOR THE BRITISH PRIME MINISTER OF PARTICULAR INTEREST JUST NOW.

In these troublous times when opponents of the tariff are crying from the roof tops that the Fordney-McCumber bill, if enacted, will add billions to the cost of living, it is interesting and instructive to read the testimony of a well-known English economist. In 1919 Sir Guilford L. Molesworth addressed the following letter to the British Prime Minister:

"SIR: In the present financial crisis, when the nation is verging on bankruptcy, and there is a talk of largely increasing our already intolerable burden of direct taxation, we are recklessly neglecting an enormous source of revenue from indirect taxation.

"Supplies of all kinds are now pouring into England from Germany and other countries, which, if taxed, would produce a magnificent revenue; but this measure has not been adopted, owing to the prevailing fallacy that it would increase the cost of imported articles.

"If you wish it I shall be glad to furnish you with overwhelming evidence that when a duty has been imposed, if not prohibitive, it has fallen on the foreign importer or his agent, and not on the consumer; and that the cost of the articles taxed has diminished instead of increasing. I can also furnish you with an explanation of the causes of this apparent paradox.

"I remain, sir, your obedient servant.

"GUILFORD L. MOLESWORTH.

"THE MANOR HOUSE, BEXLEY, KENT, *October 22, 1919.*"

Following up the suggestion made in this letter, Mr. Molesworth collected the "overwhelming evidence" and sent it to the Prime Minister the following month (November, 1919). We give it in full herewith:

EVIDENCE OF THE FALL OF PRICES UNDER IMPORT DUTIES.

In a very large number of cases the imposition of import duties has been followed by a fall of prices, numerous examples of which are given in the following pages.

To shallow thinkers such a result appears impossible, but a little consideration will serve to explain the apparent paradox:

1. Before the import duty comes into force, there is a rush on the part of the foreign producer, or his agent, to send in as much produce as possible so as to escape the duty. This naturally has a tendency to depress prices, and the fall is rendered permanent by development and competition in the home market.

2. The home manufacturers, being protected from wholesale dumping of surplus goods, are in a position to carry on their industry on a more satisfactory footing than before.

3. The foreign producer must sell his surplus produce, and the import duty is generally borne by him.

4. The revenue brought in from import duties—if the import duty be general and not partial—saves direct taxation, and the home producer is thus enabled to produce at lower rates than when heavily taxed.

5. A foreign monopoly which has maintained high prices is often killed by an import duty.

The philosophy of the whole matter has been explained by that great American statesman, Alexander Hamilton, in his famous report of 1791, as Secretary of the Treasury:

But, though it were true that the immediate and certain effect of a tariff was an increase of price, it is universally true that the contrary is the ultimate effect, with every successful manufacture. When a domestic manufacture has attained to perfection, and has engaged in the prosecution of it a competent number of persons, it can be afforded, and accordingly seldom or never fails to be sold cheaper, in process of time, than the foreign article for which it is a substitute. The internal competition which takes place soon does away with everything like monopoly, and by degrees reduces the price of the article to the minimum of a reasonable profit on the capital employed. This accords with the reason of the thing, and with experience.

EXAMPLES OF FALL IN PRICES.

The following cases afford a few instances proving that the imposition of a tariff does not necessarily raise the price.

M. Thiers, in his speech of January 22, 1870, stated that a tariff on linen and cotton thread had reduced the price of a kilogram of linen thread from 7 to 3½ francs, and that the price of cotton thread had been reduced in greater proportion. In introducing the tariff, M. Thiers said:

"It is urged that all the protection accorded to industries constitute monopolies; and, to enrich a few monopolies, we burden the whole country. It is true there is a monopoly, but it is not in France, it is in England. I say this little monopoly which you accord to French industry destroys the monopoly of foreign industry."

Under the high protective tariff in the United States between the years 1860 and 1883, cotton hosiery was reduced to nearly one-half the prices of 1860.

In 1867 a protective duty was imposed on wool. In 1872 there were in the United States 143 looms producing 1,500,000 yards of Brussels tapestry. In 1880 there were 1,070 looms producing 16,950,000 yards. The price fell from $2.30 in 1872 to $1.50 in 1880 and to 93 cents in 1890.

Mr. Wycoff, United States census agent, stated that the average decline in the value of silk goods was not less than 25 per cent, probably as much as 30 per cent, in 15 years.

Salt under a tariff fell in price from $1.80 in 1866 to 74 cents in 1882.

Mr. T. Dudley, formerly United States consul at Liverpool, gave the following rates of fall under the protective tariff between 1861 and 1883: Cotton goods, 25 per cent; woolen goods, carpets, etc., 25 per cent; silk, 35 per cent to 40 per cent; crockery, 37 per cent. In 1860 the duty on crockery was 24 per cent; the tariff imposed a duty of 40 per cent, which was afterwards raised to 55 per cent ad valorem; and now many kinds of crockery are sold in the United States at lower rates than in England.

The manufacture of steel rails in the United States commenced in 1867; at that date steel rails cost $150 per ton. The duty was changed to $28 per ton, and in 1872 the price had fallen to $112. In 1874 it fell to $49, in 1876 to $39, and in 1885 to $27.

The report of the committee authorized by the Senate to investigate the result of the McKinley Act has stated that in 28 months the retail prices of 214 articles of common consumption declined 64 per cent and that wages advanced 75 per cent.

From an official estimate prepared for the use of the Senate of the United States it appears that:

The price of barley, protected in 1890, declined 30 per cent, giving additional employment to 40,000 persons.

The price of beet sugar, protected in 1897, declined 20 per cent, giving additional employment to 5,000 persons.

The price of carpets, protected in 1861, fell 10 per cent, with additional employment to 6,600 persons.

The price of lace curtains, protected in 1897, fell 10 per cent, giving additional employment to 3,000 persons.

The price of gypsum, protected in 1897, fell 33 per cent, giving additional employment to 3,700 persons.

The price of wire nails, protected in 1883, fell 25 per cent, with increased employment to 8,000 persons.

The price of steel rails, protected in 1870, fell 80 per cent, with increased employment to 18,000 persons.

The price of watches, protected in 1870, fell 50 per cent, with increased employment to 1,880 persons.

The price of silk, protected in 1861, fell 25 per cent, with increased employment to 77,000 persons.

Wages paid to operatives employed in the manufacture of silk rose from $297,000 in 1850 to $25,276,000 in 1905.

The number of operatives employed in silk manufacture in Great Britain diminished from 130,723 in 1851, to 39,035 in 1901.

TARIFFS AND WHEAT PRICES.

Many of those who are not satisfied with our present fiscal policy object to giving their adhesion to the movement in favor of tariff reform, on the ground that they disapprove of the taxation of food. This is an objection which a careful study of facts would at once remove. It is based on the mistaken assumption that a tax on foodstuffs must increase their price. Experience has proved that this is not the case. The price of corn is generally regulated by the laws of supply and demand, and by the general conditions of exchange, currency, transport and production. Tariffs, in their direct action, have but little influence on prices, unless they are excessive or prohibitory. Under a well-regulated system of moderate import duties, there is an action tending to the equalization of prices in different countries, and this is maintained by constant telegraphic communication of brokers with the principal markets of the world. A few examples will suffice to show that not only is the duty paid by the foreigner, but, in most cases, the consumer gains, by a reduction in the price of foodstuffs under an import duty. The committee of the Belgian House of Representatives, in their report of 1886, stated that, on several occasions on which duties were imposed on wheat, the price thereafter fell; and when the duty was abolished, it rose, except in one instance.

Again, in a consular report dated May 14, 1883, Sir E. Malet wrote: "Eight years' experience has shown that the higher duties introduced in 1879 had been attended with the most successful results, fiscally, but they had failed as protective duties—that is, they failed to raise the price of wheat. Prices had fallen instead of rising."

Again Mr. Vansittart, consul at Wurtemburg, reported in 1888: "Since the addition of the duties, all kinds of grain were cheaper than ever."

In 1888 the duty on wheat in Italy was raised from 1 franc per quintal to 4 francs, and practically the price of bread remained unchanged, the tendency being rather to a fall than a rise, although large quantities of foreign wheat were imported into Italy. Similar results ensued in Germany in 1892, when the duty was raised, and the price of wheat fell 9 per cent. Also in France in 1895, when the duty was raised, the price of bread fell 7 per cent.

Again, when the duty of 1s. a quarter was imposed in Great Britain in 1902 the price of imported wheat fell slightly, and it was only after this useful tax had been wantonly flung away by Mr. Ritchie's economic pedantry that the price of wheat rose. A valuable source of revenue was thus foolishly sacrificed and the burden of taxation, which had been borne by the foreigner, was transferred to the British taxpayer without a single compensating advantage.

In all these cases it is evident that the burden of taxation fell upon the foreign producer, not upon the consumer. In the Colony of Victoria, in 1888, under an import duty of 9s. 8d. per quarter on wheat, bread was cheaper than in New South Wales, which admitted wheat duty free, the reason being that the Victorian farmer was protected from the influx of foreign surplus, and consequently was able not only to grow wheat with confidence, but owing to the reduction of other taxation, caused by the revenue derived from foreign imports, he was in a position to grow wheat at a cheaper rate. The internal competition was thereby stimulated to an extent which tended to a fall rather than a rise in prices.

Of course, if the duty be so heavy as to be prohibitive, the price will rise in times of scarcity, as was the case when a duty of 12s. 6d. was imposed in France, when the "outside level" of prices was as low as 27s. or 28s. The price of wheat in France has lately been lower than in England. Few people realize the fact that wheat is only one of the many factors which make up the retail price of bread.

THE TIN-PLATE INDUSTRY.

In 1890, the year of the McKinley tariff, the duty of 1 cent per pound on tin plate imported into the United States was raised to 2.2 cents. The price at that time was 3.5 cents; and it fell to 2.9 cents under the increased duty in 1894, and thereafter steadily fell, until in 1898 it touched the low price of 2.2 cents.

The benefit, however, was not confined to tin plate, but it led to increased revenue and capital to the country and increased prosperity, employment, and wages to those industries that were affected by the tin-plate industry.

The measure on which Mr. McKinley laid the greatest stress in putting forward his bill was the development of the tin-plate industry. In reply to his opponents he said:

"They insist that we can not make tin plates; so they said about plate glass and cutlery and pottery."

Before the passing of the McKinley bill there was an import duty of 1 cent per pound on tin plates, but this was insufficient to keep the Welsh manufacturers' combine from swamping the struggling industry in the United States. In 1890 (the year of the McKinley Act) the Welsh Tinplate Association had raised the price of tin plates from 2.9 cents to 3.5 cents per pound, with the duty added. The import duty, therefore, was increased to 2.2 cents; and this, according to the theory of free traders, ought to have raised the price to 4.7 cents, but, on the contrary, the price fell to 2.9 cents in 1894, and thereafter it fell steadily, year by year, until, in 1898, it touched the low price of 2.2 cents per pound.

The great development of the canning trade and the consequent demand, however, caused a rise in the price of tin plates; and this tendency was increased by the great coal strike, and also by a strike of the tin-plate operatives, who obtained a substantial increase of wages, so that in 1898 the price rose to 3.2 cents, but it has since fallen to 2.8 cents in 1906, as against 3.5 cents in 1891.

In the 10 years succeeding 1891 the yearly import of foreign plates to the United States fell from 327,000 to 52,000 tons, whilst the domestic production increased from 1,000 to 400,000 tons.

Now, to sum up the results:

(1) The tin-plate industry has been successfully developed and the Welsh monopoly destroyed.
(2) Capital has been largely attracted to the United States.
(3) Revenue has been increased by the import duty.
(4) Increased employment has been afforded.
(5) Wages of the tin-plate operatives increased.
(6) Cost of tin plates considerably reduced.
(7) A saving of nearly $2,000,000 yearly, compared with the cost when the consumer was dependent on foreign supplies.
(8) The payment which formerly went to the foreigner for tin plates now circulates through the wage earners, amongst retail traders, and gives additional employment to industries allied to the tin-plate industry, such as chemical works, iron works, mining, etc.
(9) The canning establishments have increased.
(10) More employment has been afforded in canning.
(11) More fruit and vegetables have been canned.
(12) An export trade of tin plates has sprung up in the United States.

McKinley estimated that if the tin plates consumed were made in the United States it would give employment to 23,000 men, but the benefit would not stop there, the additional labor in mining the coal and

ores, the lead, the tin, the lumber for boxes, and the sulphuric acid, would furnish labor to 50,000 workmen and bring support to 100,000 people.

In the face of past experience, as evidenced by the foregoing figures, is it possible that the intelligent reading public can take seriously the statement of the junior Senator from Massachusetts that the resultant increase in prices of agricultural products in the Bay State alone will exceed $52,000,000 if the pending tariff bill becomes a law, and that the increase in the cost of living throughout the United States will amount to $1,316,569,449?

As a matter of fact, under the present Underwood tariff, the lowest tariff in our history, we have had the highest prices and the most profiteering of any period of our national existence. The present Underwood tariff has succeeded only in creating widespread unemployment and destroying the purchasing power of the consumer.

The New York Mail, in a recent editorial, summed up the situation very aptly:

"Free-trade Democrats in the Senate are assailing the pending bill with prophecies that it will add to the cost of living. That is an old, old story with free traders. For nearly a century they have been saying it over and over again until it has worn so deep a groove in the Democratic platform that no Democrat can see over the sides of it.

"All that they have said in the present debate was uttered in precisely the same terms by their Democratic predecessors of years ago, in denouncing every protective tariff law before enactment.

"Never do these same Democrats (nor did their predecessors) justify their argument by taking the figures of a protective-tariff period to prove that protection has ever added a penny to the cost of living. They do not do it, because results do not show it.

"Democrats talk fiercely of what a protective tariff will do; but you never can get a word out of them as to what a protective tariff has done. The difference is the difference between prophecy and results."

DOES A PROTECTIVE TARIFF CRIPPLE OUR EXPORT TRADE?

One of the favorite arguments of free traders, importers, and internationalists, who are more concerned about "abroad" than they are about America, is that a protective tariff will cripple America's foreign market and result in diminished exports. All sorts of twisted reasoning is offered in support of this argument, says the National Republican.

The best test of its soundness and validity is the experience of the United States under protective tariffs. If a protective tariff curtails our foreign market the records of exports during the periods when a protective tariff was in force should and would show the fact.

But the records of foreign trade issued by the Department of Commerce show just the contrary.

The McKinley protective tariff law was enacted in 1890. The following is the official record of our exports during the years the McKinley tariff law was in force:

1891	$884,480,810
1892	1,030,278,148
1893	847,665,194
1894	892,140,572

The Dingley protective tariff law was enacted in 1897. The following is the official record of our exports during the 11 years that tariff law was in operation:

1898	$1,231,482,330
1899	1,227,023,302
1900	1,394,483,082
1901	1,487,764,991
1902	1,381,719,401
1903	1,420,141,679
1904	1,460,827,271
1905	1,518,561,666
1906	1,743,864,500
1907	1,880,851,078
1908	1,860,773,346

The Payne-Aldrich protective tariff law was enacted in 1909. The following is the official record of our exports during the operation of that tariff act:

1909	$1,663,011,104
1910	1,744,984,720
1911	2,049,320,199
1912	2,204,322,409
1913	2,465,884,149

These official figures conclusively prove the falsity of the propaganda that a protective tariff means a loss of our foreign markets. They are an absolute refutation of the free trade and importing propaganda that unless we permit foreign producers to grab our markets we can not hope to sell abroad.

Mr. STANFIELD. Mr. President, the argument of the Senator from Massachusetts is that of the free trader who does not recognize the necessity for American independence in all lines of production. The answer to his argument as to the necessity of this duty is undoubtedly reflected in the statistical reports showing the shrinkage of the sheep industry in the United States. Under the free-trade policy of the Democratic Party the number of sheep in the United States has diminished from 50,000,000 to 35,000,000 head.

There is no reason why the United States should not be independent in its wool production, but if the policy of the Senator from Massachusetts shall be followed out, and we are not to have protection to equalize the difference in the cost of production of wool in the United States and the cost in foreign countries, the United States will soon be dependent upon the outside world for its wool. I wish to say to Senators that we will then pay more than this duty will mean; the tax imposed upon America will be a much larger tax, and it will be paid to a foreign monopoly if we destroy the American woolgrower. It is certainly necessary that we should have the rates here provided, and even more than those rates, for the reports of the Government indicate that the difference in the cost of production is more than the rate proposed in this bill.

Mr. WALSH of Massachusetts. Mr. President, I ask for the yeas and nays on concurring in the amendment made as in Committee of the Whole.

Mr. BURSUM, Mr. LENROOT, and Mr. GOODING addressed the Chair.

The PRESIDENT pro tempore. The Senator from New Mexico.

Mr. WALSH of Massachusetts. Has the Chair ruled on the question of whether or not the yeas and nays were ordered?

The PRESIDENT pro tempore. The Chair will state——

Mr. GOODING. There will be no question about having the yeas and nays ordered on the amendment.

The PRESIDENT pro tempore. The Chair will put that question to the Senate the moment the discussion shall have been ended.

Mr. BURSUM. Mr. President, I think I have the floor.

The PRESIDENT pro tempore. The Senator from New Mexico has the floor.

Mr. BURSUM. Mr. President, the duty of 33 cents a pound imposed upon wool by the pending bill is a very fair duty. Of all the duties levied in this bill based upon the actual difference between the cost of production of the American product and the foreign article the duty on wool comes nearer passing muster under a scientific examination by experts than almost any other duty levied by the bill.

The Senator from Massachusetts has complained that this duty will cost $70,000,000, which will go into the pockets of the wool men of the country. I take it the Senator does not intend to mislead anyone. The estimate of $70,000,000 is evidently intended to cover the total consumption, including the imports of wool from other countries, which constitute about 50 per cent of our consumption. Therefore, out of the $70,000,000, $35,000,000 will go into the Treasury for the purpose of defraying the expenses of the Government.

No one can say that every citizen ought not to contribute toward the maintenance of the Government. Even the Democratic Party demands that; it has been their principle to favor a tariff for revenue, and a tariff for revenue means that those who are the consumers must pay the duties, of course, and they are paid for the purpose of running the Government. So in this case one half of the duty will go into the Treasury and the other half for the purpose of aiding the woolgrowers. It is for the purpose of protecting the woolgrowers of this country against the competition of cheap labor of foreign countries.

The Senator from Massachusetts [Mr. WALSH] states that $130,000,000 is charged up to the consumers of this country by reason of this duty, making in all $200,000,000. The $130,000,000 is a protective duty given to the manufacturers—the manufacturers of the State of Massachusetts, more than those of any other State, for Massachusetts has large woolen mills and employs hundreds and thousands of wage earners to work in those factories. If this duty raises the cost of the manufactured article it can be for no other legitimate purpose than to raise the wages of those workmen so that they may live upon an American standard, so that they may live as men desire to live in this country of ours. I say that if that $130,000,000 is for that purpose—and it manifestly is, and it can not be for any other legitimate purpose—it could not be applied to a better purpose; and this duty, therefore, will help create a condition of prosperity in the State of Massachusetts, from which the distinguished Senator hails, so that his people can enjoy a living wage under the American standard. It does do that, and that is what we claim for it.

We have not only given duties on the wool but we have given duties on every kind of manufactures in the State of Massachusetts that needs a duty.

There are in this bill duties much higher than these duties, Mr. President, on articles manufactured in the State of Massachusetts. That State has cotton mills by the score; it has lace factories; it has hosiery factories and woolens which are protected, and they are protected because the manufacturers of the State require that protection to protect them against ruinous competition from other countries. After this tariff bill gets into force and gets into working and the country benefits by its results there will no longer be any reason for stating upon this floor the great suffering on account of the depression which the people of Massachusetts have suffered and the woolgrowers of the West have suffered. This tariff bill will cure all of that.

The State of Massachusetts even has such things as we have heard of to-day—dye works and chemical works. Those concerns are protected against the ruinous competition of Germany. The principle of protection extends not only to the woolgrower but to every manufacturer. It extends to every part of the

Union, and it is extended to the State of Massachusetts more in proportion to her size, on account of her numerous industries, than to any other State in the Union. I am glad of it; and I know that two years hence we will hear the story of approval from the great State of Massachusetts and the appreciation of what this Congress did in protecting American labor against the cheap labor of other countries.

Mr. GOODING. Mr. President, the great junior Senator from Massachusetts [Mr. WALSH] makes a most remarkable statement. If he believes that the people are going to pay $200,000,000 more for clothing because there is a duty of 33 cents a pound on scoured wool, then he has a duty to perform here to the American people by protecting them in some way or other against the profiteers.

The American wool clip is worth about $65,000,000. Will the Senator tell me why it should be pyramided over and over again until it reaches $200,000,000, or, as Mr. Goldman says, $360,000,000? If the duty on wool is pyramided, is not the duty on manufactures pyramided, too, just the same? Why have you selected wool to show that the American people are going to be robbed merely because there is a duty on the raw material?

Mr. WALSH of Massachusetts. Mr. President——

Mr. GOODING. I have asked the Senator a question; and if he will answer it quickly, I will yield. I have only 10 minutes.

Mr. WALSH of Massachusetts. The Senator has asked me a question, and I shall be glad to answer it. My authority is the expert of the Tariff Commission, who communicated to the Senator from New York [Mr. CALDER] the information that this duty upon wool, when pyramided, would represent to the American consumers $200,000,000.

Mr. GOODING. Yes; I know that.

Mr. WALSH of Massachusetts. Not for the finished product but for the cloth.

Mr. GOODING. I will not yield any longer. The Senator does not answer my question at all. He merely says that the Tariff Commission stated something to the Senator from New York [Mr. CALDER]. Admitting that to be true for the sake of the argument, I want to say that there is a most serious condition existing in America. If an industry can not be given proper protection so as to let it live without the profiteers of America pyramiding the duty three or four times over, then I say that we want to commence filling up the penitentiaries of America just as quickly as possible, because no Government can exist under such selfish conditions as those.

I do not believe that the Senator believes that is possible. I am not ready to believe that the wholesalers and the retailers are following out the policy that Mr. Goldman has laid down. If they are, then you and I must do something very quickly to protect the American people. I know, or I have reason to believe, that this is just a part of a propaganda that they are scattering over this country to make an excuse for increasing the cost of clothing; and it comes, of course, to the Democratic Party as water on their wheel. They believe that if the American people can be alarmed, as they were years ago when the Republican Party tried to give protection to the tin-plate industry, it will wreck the Republican Party. That is the reason why the Senator is talking that way—not because he believes it, but because he believes that it is good Democratic policy to tell the people that they are going to be robbed.

Then I wonder if the Senator from Massachusetts knows that the Underwood-Simmons bill gave not only 35 per cent ad valorem on cloth that was made out of all wool but 70 per cent ad valorem?

Mr. STANFIELD. Mr. President, will the Senator yield?

Mr. GOODING. I wonder if the Senator knows anything about the conversion cost in this tariff question? It has had little or no discussion upon this floor. That is what your manufacturers have had all the time.

Mr. STANFIELD. Mr. President——

Mr. GOODING. I can not yield. I have not the time. I want to say something to the Senator from Massachusetts.

I made the statement upon this floor, and it is true, that this city alone pays more for its woolen goods than came into this country under the Payne-Aldrich law each year. It is not the tariff on wool that fixes the price of woolen goods; it is the compensatory duty that is given to your manufacturers that tells how much shall be paid on a dollar's worth of cloth when it is imported into this country. I want to say to the Senator that I found upon investigation that this man Goldman took more for distributing a yard of cloth to the merchant tailors of this country than the woolgrower who grew the wool, the railroad that hauled it to Boston, the manufacturer who manufactured it into a yard of cloth, and the tariff that is on the wool all put together. I traced that wool from Idaho to Boston, and I traced the yard of cloth back to the merchant tailor, and I found that Mr. Goldman took more for a yard of cloth, merely for distributing it, than all the rest of the forces combined that entered into the production of that yard of cloth.

The Senator may be right that the people are going to be robbed, but not because there is a duty on wool, because the Senator must admit that a Democratic duty on the cloth was pyramided; that if one duty is pyramided, they are all pyramided; and the question comes: My God! Can we live, can we permit any industry to live in America, simply because it must be protected? It means that it can not live if that is true.

So there is something to be done here in this country if it is true. I am not willing to admit that it is true, by the way; but if the resolution that I introduced here calling for an investigation of Mr. Goldman is passed, I will prove that it is not true. If it is true, then we want to begin getting ready to take care of his kind of people. I think the Senate has something to do, and has to do it quickly, because there is too much profiteering in America. It is just a question of whether we can protect an industry and let it live or not.

The farmers have not got anything, even in this bill, compared with the manufacturers. When you figure the conversion cost in the Underwood bill, you gave ten times as much protection to the manfacturers as you gave the farmers; and this bill gives four or five times as much to the manufacturers as it gives to the farmers. You have not any right, as a manufacturer, to claim protection on my labor or my money that is put into a pound of wool. You are only entitled to protection on your conversion cost. I told that story once before, and gave the figures, and showed it very clearly upon this floor. It has been forgotten. We have entered into the discussion of this tariff question in a pretty small way, after all. Now the mask is torn off, and the selfish interests of this country are shown up just a little bit.

Mr. McCUMBER. Mr. President, a number of the younger Senators who are getting tired and sleepy are importuning me to get their usual night's rest, and I should like to help them out, but I want to be certain that we shall dispose of all of these committee amendments and also have a good, reasonable time in which to dispose of individual amendments before 4 o'clock to-morrow.

I am going to ask at this time, therefore, an additional unanimous-consent agreement—that at 2 o'clock to-morrow the reserved committee amendments which at that time have not been disposed of may be voted on en bloc without further debate. That would give the other two hours, certainly, for individual amendments and would insure that all of these amendments shall be acted upon.

Mr. SIMMONS. Why does the Senator ask that those which have not been voted upon be voted upon en bloc? Why not simply ask that they be voted upon without further debate?

Mr. McCUMBER. I thought of saving a little time. I will change my request so that it will read that each may be voted upon immediately, without further debate, after the hour of 2 o'clock.

Mr. SIMMONS. In their order.

Mr. MOSES. Does the Senator mean that at 2 o'clock any reserved amendment which has not been discussed shall be disposed of without any debate whatever?

Mr. McCUMBER. That is what it means.

Mr. MOSES. And that reserved amendments shall be taken up in their order as they appear in the bill?

Mr. McCUMBER. Certainly. We have already agreed by unanimous consent that the reserved amendments shall be taken up in the order in which they appear in the bill.

Mr. MOSES. I shall have to object to that request.

Mr. McCUMBER. If that is objected to, I will make another attempt, and ask unanimous consent at this time to deviate from our previous unanimous-consent agreement that the items which have been reserved shall be taken up in their order, and ask that we shall take up at this time the paragraphs on page 272, sections 315, 316, 317, covering the presidential powers, which were reserved by the Senator from North Carolina.

Mr. MOSES. I shall have to object to that also.

Mr. McCUMBER. The reason is that they may require considerable debate, and I would like to have them disposed of, and be certain that they will be disposed of before 4 o'clock.

Mr. UNDERWOOD. If they are not disposed of before 4 o'clock they would have to be voted on without debate.

Mr. McCUMBER. Is that the construction the Senator gives to the unanimous-consent agreement? I am doubtful, under the unanimous-consent agreement, whether we could vote on any amendment after 4 o'clock. My understanding of the agreement is that everything that is not voted upon in the shape of

an amendment by 4 o'clock will be out of existence, so far as this bill is concerned, and we shall have to vote on the bill as it then stands, without those amendments.

Mr. UNDERWOOD. Mr. President, I have no desire in the world to prevent the Senator from reaching a vote, and I do not know that there will be a great deal of debate on those particular sections of the bill; but at this late hour of the night I am not going to agree to enter into a discussion of that particular amendment if I can avoid it.

Mr. McCUMBER. I was trying to accommodate the Senator and to accommodate other Senators.

Mr. UNDERWOOD. I was perfectly willing to agree to the proposition that any reserved amendments which were not reached by 2 o'clock should be voted on without further debate, but I am not going to agree to dispense with the order and consider at this time of night, when everyone is tired out, the most important feature of the entire bill.

Mr. McCUMBER. The Senator from New Hampshire will not agree to that, so that puts that out of the way.

Mr. MOSES. Mr. President, the basis of my objection to the unanimous-consent request which the Senator asks is that all the reserved amendments to the administrative features are not included in his request. There is a reserved amendment on page 384 which is not on the printed list, I may say to the Senator, because the printed list is erroneous, and it will be found at the Secretary's desk that there is another reserved amendment on page 384.

Mr. McCUMBER. My unanimous-consent proposition stated that all reserved amendments should be considered.

Mr. MOSES. But the Senator enumerated certain paragraphs in which there were reserved amendments in the administrative feature, and omitted this one. Because of that, I object. If that other paragraph is included among those which are to be taken up, I shall not object. I can not at the moment turn to the provision.

Mr. McCUMBER. The Senator is mistaken about my mentioning any particular paragraph to be voted upon. I said all paragraphs.

Mr. MOSES. Then the Senator enumerated three by number.

Mr. McCUMBER. That was in my second proposition, when I asked that those be taken up immediately.

Mr. MOSES. May I ask the Senator to restate the unanimous-consent agreement which he is asking?

Mr. McCUMBER. In substance, my first request was that at the hour of 2 o'clock p. m. to-morrow the Senate should proceed to vote, without further debate, upon any reserved amendments which had not before that time been disposed of.

Mr. UNDERWOOD. May I ask what amendment the Senator from New Hampshire reserved? I just want to know for information.

Mr. MOSES. It is the addition to section 526, which was put on last night, page 384, reached last night too late to have any word of debate upon it. I raised a point of order against it upon the ground that ethically, at least, it was the same amendment which had been disposed of by a disagreeing vote earlier in the consideration of the bill. I was overruled in that, and it was kept in the bill. I then reserved a separate vote on it.

Mr. UNDERWOOD. What is the subject matter?

Mr. MOSES. The subject matter is that written consent of the American holder of trade-marks must be had before any trade-marked goods can come into this country. I will say to the Senator that that vitally affects a piece of legislation in which he is greatly interested.

Mr. UNDERWOOD. The Senator means the American claims bill?

Mr. MOSES. It is absolutely vital to it.

Mr. UNDERWOOD. I have no objection to the Senator having the right to have a vote on that amendment before 2 o'clock, if that is all that stands in the way of the Senator's consent.

Mr. MOSES. I want 10 minutes on it also.

Mr. UNDERWOOD. I have no objection to that, either.

Mr. CURTIS. Mr. President, I suggest that the Senator from North Dakota modify his request, and ask that the reservation covering the administrative features, and the trade-mark amendment——

Mr. MOSES. That is in the administrative section.

Mr. CURTIS. Be taken up to-morrow morning at 11 o'clock, and be disposed of the first thing.

Mr. MOSES. I shall not object to that.

Mr. UNDERWOOD. I shall have no objection if the Senator wants to take up the administrative features, and the amendment reserved by the Senator from New Hampshire, at 11 o'clock.

Mr. MOSES. That is also in the administrative features.

Mr. UNDERWOOD. As far as I am individually concerned I will have no objection, but I do seriously object to going into those questions to-night.

Mr. MOSES. I do not want the Senator from Alabama to segregate the reserved amendments. The reservation which I have made is also in the administrative section.

Mr. UNDERWOOD. I have no objection to what the Senator wants to do, if it is done to-morrow and not to-night.

The PRESIDENT pro tempore. I think the Chair ought to say at this point that although he has had great difficulty in reaching a conclusion with respect to the proper interpretation of the unanimous-consent agreement last made, as at present advised, the Chair will hold that it is impossible to carry a bill through the regular parliamentary stages without giving an opportunity to vote upon the reserved amendments and upon any other amendments which may be offered in the Senate. The bill can not pass to a third reading and be finally voted upon without those stages being observed.

Mr. UNDERWOOD. I think the President pro tempore is clearly correct in his ruling. Of course, if you wanted to drop overboard these administrative features, I would have no objection; but I agree with the ruling of the Chair entirely that this agreement must be construed in a reasonable way, and the reasonable way is that the bill shall be considered in its entirety. So I think the Chair is right that if we do not reach the administrative feature before 4 o'clock it will have to be voted on without debate.

Mr. McCUMBER. Mr. President, if I am assured that that rule will be followed by the Senate, then I have no objection to our recessing now.

Mr. UNDERWOOD. I do not think there can be any question about it.

The PRESIDENT pro tempore. That rule will be followed by the Chair, but the Chair can not predict what the action of the Senate may be.

Mr. JONES of New Mexico. Mr. President, it is evident that there are a number of reserved amendments which Senators want to discuss at least briefly, and I think it is quite evident that unless there is some change in the unanimous-consent agreement, the time will come when we must vote without any discussion whatever, without any opportunity to explain the objects in view; and I make the suggestion that we amend the unanimous-consent agreement by limiting debate from this time forward to five minutes instead of ten. I suggest that to the Senator from North Dakota, hoping that he may make a request that from this time forward speeches shall be limited to five minutes on all motions and amendments.

The PRESIDENT pro tempore. The Chair has much more doubt in regard to the validity of a unanimous-consent agreement of that kind than the interpretation just mentioned. The rules of the Senate provide that a unanimous-consent agreement fixing a time for voting upon a bill shall not be changed without one day's notice. The Chair is not entirely clear whether that rule applies to the present unanimous-consent agreement, but he entertains some doubt upon the subject.

Mr. OVERMAN. Mr. President, since the ruling of the Chair has been announced, why should the Senator want a unanimous-consent agreement? After 4 o'clock, if we have not completed the amendments, we can vote on them.

Mr. MOSES. But there will be no chance for any word of debate.

Mr. OVERMAN. That is true.

Mr. MOSES. I do not intend to have some of these amendments go in without any word of debate whatever.

The PRESIDENT pro tempore. Under the unanimous-consent agreement, all debate will cease at 4 o'clock.

Mr. McCUMBER. With the construction of the agreement given by the Chair, I move that we take a recess until to-morrow at 11 o'clock.

Mr. MOSES. Let us see just what is the disposition of the reserved amendments—the flexible section.

Mr. SIMMONS. Let us vote on the matter now pending.

Mr. WALSH of Massachusetts. Yes. I hope we may have a vote on the pending paragraph before we take a recess. We have ended the debate upon it.

Mr. McCUMBER. I would be glad to do so, but I was informed that there are quite a number who wish to speak on it.

Mr. WALSH of Massachusetts. I am informed that there are no other Senators who wish to speak on it.

Mr. McCUMBER. Then I shall be glad to withhold the motion for a recess.

The PRESIDENT pro tempore. The question is, Will the Senate concur in the amendment of the Finance Committee in paragraph 1102?

Mr. WALSH of Massachusetts. On that I ask for the yeas and nays.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. HARRISON (when his name was called). I transfer my pair with the junior Senator from West Virginia [Mr. ELKINS] to the senior Senator from Oklahoma [Mr. OWEN] and vote "nay."

Mr. CURTIS (when Mr. LA FOLLETTE's name was called). I was requested to announce that the Senator from Wisconsin [Mr. LA FOLLETTE] is paired with the Senator from Michigan [Mr. TOWNSEND]. If present, the Senator from Wisconsin would vote "nay" and the Senator from Michigan would vote "yea."

Mr. McCUMBER (when his name was called). Transferring my pair as on the previous vote, I vote "yea."

Mr. POMERENE (when his name was called). I transfer my pair with my colleague [Mr. WILLIS], as heretofore announced, to the senior Senator from Texas [Mr. CULBERSON] and vote "nay."

Mr. WATSON of Indiana (when his name was called). Making the same announcement as before, I vote "yea."

The roll call was concluded.

Mr. EDGE. I understand that my pair, the senior Senator from Oklahoma [Mr. OWEN], if present, would vote as I propose to vote. I vote "nay."

Mr. CURTIS. I desire to announce the following general pairs:

The Senator from California [Mr. JOHNSON] with the Senator from Georgia [Mr. WATSON];

The Senator from Illinois [Mr. McKINLEY] with the Senator from Arkansas [Mr. CARAWAY]; and

The Senator from Missouri [Mr. SPENCER] with the Senator from Georgia [Mr. HARRIS].

The result was announced—yeas 45, nays 28, as follows:

YEAS—45.

Ashurst	Ernst	McLean	Reed, Pa.
Ball	France	McNary	Sheppard
Brandegee	Frelinghuysen	Moses	Shortridge
Broussard	Gooding	New	Smoot
Bursum	Hale	Newberry	Stanfield
Cameron	Harreld	Nicholson	Sterling
Capper	Jones, N. Mex.	Norbeck	Sutherland
Colt	Jones, Wash.	Oddie	Warren
Cummins	Kendrick	Pepper	Watson, Ind.
Curtis	Keyes	Phipps	
Dillingham	Lodge	Ransdell	
du Pont	McCumber	Rawson	

NAYS—28.

Borah	Heflin	Overman	Stanley
Dial	Hitchcock	Pomerene	Swanson
Edge	Kellogg	Reed, Mo.	Trammell
Fletcher	Lenroot	Robinson	Underwood
Gerry	McCormick	Shields	Wadsworth
Glass	McKellar	Simmons	Walsh, Mass.
Harrison	Myers	Smith	Walsh, Mont.

NOT VOTING—23.

Calder	Johnson	Norris	Townsend
Caraway	King	Owen	Watson, Ga.
Culberson	Ladd	Page	Weller
Elkins	La Follette	Pittman	Williams
Fernald	McKinley	Poindexter	Willis
Harris	Nelson	Spencer	

So the amendment made as in Committee of the Whole was concurred in.

Mr. JONES of New Mexico. Mr. President, I ask unanimous consent that all speeches on any motion or amendment from this time forward shall be limited to five minutes.

Mr. MOSES. Mr. President, may I ask the Senator, in order to avoid a multiplicity of requests for unanimous consent, that he also include in the request that at the beginning of the session to-morrow the reserved amendments to the administrative sections shall be taken up?

Mr. WATSON of Indiana. I do not think the two should be coupled, because the Chair indicated that he might not hold an agreement to limit debate to five minutes in order.

Mr. MOSES. If there is any doubt about how the Chair would rule, I will ask the Senator from New Mexico to withhold his request until I proffer mine.

The PRESIDENT pro tempore. Is there objection to the request of the Senator from New Mexico?

Mr. MOSES. Mr. President, the Senator from New Mexico and myself are trying to come to some understanding as to whether another unanimous-consent request shall be coupled with it. My present understanding is that the Senator from New Mexico withholds his request for the moment to permit me to ask unanimous consent that upon the opening of the session of the Senate to-morrow the Senate will proceed to the consideration of the reserved amendments to the administrative features of the bill.

Mr. JONES of New Mexico. The Senator refers to sections 315, 316, 317, and 317a?

Mr. MOSES. And section 526.

Mr. JONES of New Mexico. I have no objection to that.

The PRESIDENT pro tempore. Will the Senator from New Mexico state his modified request?

Mr. JONES of New Mexico. My modified request is for unanimous consent that henceforth the debate on all motions and amendments be limited to five minutes, and that upon the convening of the Senate to-morrow morning we shall proceed to the consideration of the so-called presidential power sections 315, 316, 317, 317a, and 526.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and it is so ordered.

Mr. WATSON of Indiana. The unanimous consent has been granted?

The PRESIDENT pro tempore. In response to the question of the Senator from Indiana, the Chair advises the Senate that the unanimous consent agreement has been entered into.

Mr. McCORMICK. Both as regards limitation of speeches to five minutes and——

The PRESIDENT pro tempore. Speeches are limited to five minutes, and the Senate proceeds to-morrow morning to the consideration of the sections relative to presidential powers.

ADJUSTED COMPENSATION TO WORLD-WAR VETERANS.

The PRESIDENT pro tempore laid before the Senate a telegram from Robert G. Woodside, commander in chief of the Veterans of Foreign Wars of the United States, favoring the prompt passage of the so-called soldiers' bonus bill, which was ordered to lie on the table and to be printed in the RECORD, as follows:

[Postal telegram.]

SEATTLE, WASH., *August 17, 1922.*

President pro tempore and Members United States Senate,
Washington, D. C.:

The Veterans of Foreign Wars of the United States in national encampment assembled in Seattle, Wash., comprising State commanders and delegates from every State in the Union, including our ladies' auxiliaries, representing over 5,000,000 ex-service men and their families, respectfully urge upon you the fulfillment of your resolution to take up and dispose of the veterans' adjusted compensation bill immediately after the passage of the tariff bill. This measure has been pending in Congress for over three years, and the citizens of the country are in favor of its passage by a vote of three to one whenever given opportunity to express their sentiments.

ROBERT G. WOODSIDE,
Commander in Chief.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. WADSWORTH:

A bill (S. 3923) for the relief of the State of New York; to the Committee on Claims.

By Mr. HARRISON (for Mr. KING):

A bill (S. 3924) to authorize the Secretary of the Interior to extend the time for payment of construction charges on the Strawberry Valley reclamation project; to the Committee on Irrigation and Reclamation.

By Mr. SUTHERLAND:

A bill (S. 3925) granting a pension to Sarah P. Cunningham; to the Committee on Pensions.

ADDITIONAL CLERK TO MILITARY AFFAIRS COMMITTEE.

Mr. WADSWORTH submitted the following resolution (S. Res. 340), which was referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That Senate Resolution No. 184, agreed to December 13, 1921, authorizing and directing the Senate Committee on Military Affairs to employ an additional clerk at the rate of $1,600 per annum, to be paid out of the miscellaneous items of the contingent fund of the Senate during the second session of the Sixty-seventh Congress, be, and the same is hereby, extended and continued in full force and effect until the end of the Sixty-seventh Congress.

RECESS.

Mr. McCUMBER. I move that the Senate take a recess until to-morrow morning at 11 o'clock.

Mr. JONES of New Mexico. Will the Senator make it 10.30? It has been suggested by some Senators on this side to make it 10.30.

Mr. McCUMBER. Very well; I move that the Senate take a recess until to-morrow morning at 10.30 o'clock.

The motion was agreed to, and (at 11 o'clock and 10 minutes p. m.) the Senate took a recess until to-morrow, Saturday, August 19, 1922, at 10.30 o'clock a. m.

HOUSE OF REPRESENTATIVES.

FRIDAY, *August 18, 1922.*

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

O Lord, the Father's care and the Father's love are still over us like the brooding sky. O may we know Thee as the true and living God. Strengthen our inner lives by reflection, faith, and discipline. Pardon our offenses and make the grace of forgiveness the sinew of our breasts. Preserve our country from all the follies that follow in the wake of greed, self-indulgence, and extravagance. Spare us and make a way of escape from the destroying illusions of the day. We beseech Thee to lead us toward those high moralities and ideals which are summed up in the character and government of Him whose cross is the symbol of His power and glory and whose life is the example for all men. In His name. Amen.

The Journal of the proceedings of yesterday was read and approved.

ORDER OF BUSINESS.

Mr. MONDELL. Mr. Speaker, I present the following resolution——

The SPEAKER. The gentleman from Wyoming presents a resolution which the Clerk will report.

Mr. MONDELL. And ask for its immediate consideration.

The SPEAKER. The Clerk will report the resolution.

The Clerk read as follows:

Resolved by the House of Representatives (the Senate concurring), That the two Houses of Congress assemble in the Hall of the House of Representatives on Friday, the 18th day of August, 1922, at 12 o'clock and 15 minutes in the afternoon, for the purpose of receiving such communication as the President shall be pleased to make to them.

Mr. HUDDLESTON. Mr. Speaker, I make the point of order that there is no quorum of the House present.

Mr. GARRETT of Tennessee. Will the gentleman from Alabama withhold that for a moment?

Mr. HUDDLESTON. I will.

Mr. GARRETT of Tennessee. Mr. Speaker, upon the 7th of August I received a message from the office of the gentleman from Wyoming stating that it was desirable that the Members be here on the 15th because of the strike situation. I do not mean to say that the message was sent by the gentleman from Wyoming, but it was sent, however, by Mr. Barrow. I immediately wired, or had wired, to the Democrats suggesting their presence. We have now had three roll calls showing a much larger number of Democrats present in proportion than there are of the majority side. I do not think that the program arranged for to-day should be interfered with, and I hope the gentleman from Alabama will withdraw his point. The RECORD shows the Democrats here in a larger proportion than the Republicans.

Mr. HUDDLESTON. Will the gentleman yield?

Mr. GARRETT of Tennessee. Certainly I will yield.

Mr. HUDDLESTON. I would like to inquire of the majority leader, Mr. MONDELL, whether it is intended that the House shall adjourn immediately after the President's message is delivered?

Mr. MONDELL. That is our present purpose.

Mr. HUDDLESTON. Does not the gentleman feel like it would be fair, not only fair but expedient and for the public welfare, that Members should have some opportunity to express themselves upon the important matters expected to be dealt with by the President's message? Or are we coming here to sit like a lot of dummies, hear the President's message, then disband and go home?

Mr. PARKS of Arkansas. That is what we have been doing.

Mr. HUDDLESTON. I am not willing to continue to do that.

Mr. MONDELL. I have no manner of doubt but what gentlemen will have in due time opportunity to express themselves in regard to the President's message, but I think we have never had discussion of the President's message at the time it is delivered.

Mr. HUDDLESTON. Will the gentleman from Wyoming tell us what the program for to-day is?

Mr. MONDELL. Well, the present program is to adjourn for to-day.

Mr. HUDDLESTON. What will we do to-morrow?

Mr. MONDELL. That has not been fully determined upon, but my present thought is that we shall have a session to-morrow.

Mr. HUDDLESTON. Will the gentleman from Wyoming tell us what that session will be devoted to?

Mr. MONDELL. I could not tell the gentleman at this time, but I do not expect that important business will be transacted. The gentleman will in time have ample opportunity to express himself upon the subject of the President's message.

Mr. HUDDLESTON. It has been stated that it is the purpose of the gentleman from Wyoming, and those whom he leads, to adjourn the House from day to day and to hold sessions merely for the purpose of considering conference reports and matters which may come up in that connection. It occurs to me that it is stultifying the House to follow any such procedure in a national crisis such as the present, and I for one am not willing to do so.

Mr. MONDELL. There is no arrangement, understanding, or agreement to that effect at all.

Mr. HUDDLESTON. If the gentleman merely wishes to marshal the House without the presence of a quorum for the purpose of hearing the President's address, I think the Members should be here for other purposes also. I am strongly inclined to insist—although I regret very greatly to run counter to the wishes of the minority leader—my inclination is very strongly to insist that if the House is worth being here at all, a quorum should be here and hear the President. It is not merely for the purpose of giving him a forum in which to speak to the newspapers that we assemble here. Without a quorum the House is not here, and if we have not a quorum, why should we hear the President or anybody else? I hope that our leader, the gentleman from Tennessee [Mr. GARRETT], will not insist upon my withdrawing the point of order. If he does insist, then I shall withdraw it, but not otherwise.

Mr. MONDELL. I think the gentleman will embarrass his side more than this side by pursuing that policy.

Mr. GARRETT of Tennessee. Mr. Speaker, if the gentleman will permit, that sort of talk does not help.

Mr. MONDELL. Whether or no it helps, it is true.

Mr. GARRETT of Tennessee. We have here more minority Members, as demonstrated on three roll calls, than there are majority Members.

Mr. MONDELL. Mr. Speaker, that is not the fact.

Mr. GARRETT of Tennessee. Well, I mean in proportion.

Mr. MONDELL. The roll calls will not bear out such an assertion.

Mr. HUDDLESTON. The issues about to be discussed before the House by the President are not partisan matters. They relate to the public welfare. The question is, Shall the House perform its functions or not? That is the proposition.

Mr. GARRETT of Tennessee. Mr. Speaker, as I recall the roll-call showing, it was 65 Democrats and 131 Republicans on the first day.

Mr. MONDELL. Well, the gentleman from Tennessee said "a greater number."

Mr. GARRETT of Tennessee. Well, I said "in proportion to the membership" on a side. I hope the gentleman from Alabama will withdraw the point.

Mr. HUDDLESTON. Mr. Speaker, may I say that solely out of deference to the gentleman from Tennessee [Mr. GARRETT] I will withdraw the point? I do not do so in pursuance of my own judgment or for what I regard as the public welfare. I merely defer to him as our accredited leader.

The SPEAKER. The question is on agreeing to the resolution submitted by the gentleman from Wyoming.

The question was taken, and the resolution was agreed to.

MESSAGE FROM THE SENATE.

A message from the Senate by Mr. Craven, its Chief Clerk, announced that the Senate had passed the following resolution:

Senate Resolution 338.

Resolved, That the Senate has heard with profound sorrow the announcement of the death of Hon. LEMUEL P. PADGETT, late a Representative from the State of Tennessee.

Resolved, That the Secretary communicate these resolutions to the House of Representatives and transmit a copy thereof to the family of the deceased.

Resolved, That as a further mark of respect to the memory of the deceased, the Senate do now take a recess until 10 o'clock to-morrow morning.

The message also announced that the Senate had passed without amendment House resolution of the following title:

House Concurrent Resolution 64.

Resolved by the House of Representatives (the Senate concurring), That the two Houses of Congress assemble in the Hall of the House of Representatives on Friday, the 18th day of August, 1922, at 12.15 o'clock in the afternoon, for the purpose of receiving such communication as the President of the United States shall be pleased to make to them.

ENROLLED BILLS SIGNED.

Mr. RICKETTS, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bills and joint resolutions of the following titles, when the Speaker signed the same:

H. R. 9814. An act amending the proviso of the act approved August 24, 1912, with reference to educational leave to employees of the Indian Service;

H. R. 7598. An act authorizing the Secretary of the Interior to dedicate and set apart as a national monument certain lands in Riverside County, Calif.;

H. R. 9048. An act to authorize the California Débris Commission to reimburse the city of Sacramento, Calif., for money expended by said city in the construction of the Sacramento weir;

H. R. 10957. An act to rebuild the school building of the Indian school near Tomah, Wis.;

H. R. 11233. An act authorizing the Secretary of Commerce to convey certain lands to the county of Muscatine, Iowa;

H. J. Res. 316. Joint resolution authorizing the reappointment of Frederick Mears as a commissioned officer of the Regular Army and making him available, when so reappointed, for service as chairman and chief engineer of the Alaskan Engineering Commission;

H. R. 9257. An act to permit adjustment of conflicting claims to certain lands in Mohave County, Ariz.;

H. R. 8845. An act for the relief of Mattie Alexander;

H. R. 7812. An act to extend the time for cutting timber in the Coconino and Tusayan National Forests, Ariz.;

H. R. 314. An act for the relief of Forrest R. Black;

H. R. 6817. An act to authorize the Secretary of the Interior to issue patent to the State of Michigan, in trust, of a certain described tract of land to be used as a game refuge;

H. R. 9746. An act for the relief of Emmett Otto Cooney;

H. R. 10517. An act providing for the confirmation of title of certain purchasers from the State of Louisiana of lands formerly included in the Fort Sabine Military Reservation in Cameron Parish, La., now abandoned;

H. R. 11054. An act to validate certain deeds executed by members of the Five Civilized Tribes, and for other purposes;

H. J. Res. 170. Joint resolution to approve the holding of a national and international exhibition in the city of Philadelphia in 1926 upon the Fairmount Park and parkway site selected by the Sesquicentennial Exhibition Association, and lands contiguous thereto that may be acquired for that purpose, as an appropriate celebration of the one hundred and fiftieth anniversary of the signing of the Declaration of Independence; and

H. R. 8244. An act permitting Frances Mack Mann to purchase certain public lands.

LEAVE OF ABSENCE.

Mr. WISE, by unanimous consent, was granted leave of absence, for two weeks, on account of important business.

RECESS.

The SPEAKER. The first three rows of seats will please be reserved for Members of the Senate and the Cabinet.

Mr. MONDELL. Mr. Speaker, I ask unanimous consent that the House stand in recess, subject to the call of the Chair.

The SPEAKER. The gentleman from Wyoming asks unanimous consent that the House stand in recess subject to the call of the Chair. Is there objection?

There was no objection.

Accordingly (at 12 o'clock and 15 minutes p. m.) the House stood in recess, subject to the call of the Chair.

The recess having expired, the House (at 12 o'clock and 18 minutes p. m.) resumed its session.

JOINT SESSION OF SENATE AND HOUSE.

At 12 o'clock and 19 minutes p. m. the members of the President's Cabinet entered the Hall and took seats at the left of the Speaker's rostrum.

At 12 o'clock and 20 minutes p. m. the Doorkeeper announced the President pro tempore of the Senate and the Members of the Senate.

The Members of the House rose.

The Senate, preceded by their President pro tempore and by their Secretary and Sergeant at Arms, entered the Chamber.

The PRESIDENT pro tempore of the Senate took the Chair at the right of the Speaker and the Members of the Senate took the seats reserved for them.

The SPEAKER. The Chair appoints as a committee on the part of the House to wait upon the President and escort him to the Chamber the gentleman from Wyoming [Mr. MONDELL], the gentleman from Kansas [Mr. CAMPBELL], the gentleman from Minnesota [Mr. DAVIS], the gentleman from Tennessee [Mr. GARRETT], and the gentleman from Texas [Mr. GARNER].

The PRESIDENT pro tempore of the Senate. On behalf of the Senate the Chair appoints the Senator from Massachusetts [Mr. LODGE], the Senator from North Dakota [Mr. MCCUMBER], the Senator from Utah [Mr. SMOOT], the Senator from Alabama [Mr. UNDERWOOD], and the Senator from Arkansas [Mr. ROBINSON].

At 12 o'clock and 23 minutes p. m. the President of the United States, escorted by the committee of Senators and Representatives, entered the Hall of the House, was announced by the Doorkeeper, and stood at the Clerk's desk amid applause on the floor and in the galleries.

The SPEAKER. Gentlemen of the Senate and of the House of Representatives, the President of the United States. [Applause.]

ADDRESS OF THE PRESIDENT.

The PRESIDENT. Gentlemen of the Congress, it is manifestly my duty to bring to your attention the industrial situation which confronts the country. The situation growing out of the prevailing railway and coal-mining strikes is so serious, so menacing to the Nation's welfare, that I should be remiss if I failed frankly to lay the matter before you and at the same time acquaint you and the whole people with such efforts as the executive branch of the Government has made by the voluntary exercise of its good offices to effect a settlement.

The suspension of the coal industry dates back to last April 1, when the working agreement between mine operators and the United Mine Workers came to an end. Anticipating that expiration of contract, which was negotiated with the Government's sanction in 1920, the present administration sought, as early as last October, conferences between the operators and miners in order to facilitate either a new or extended agreement in order to avoid any suspension of production when April 1 arrived. At that time the mine workers declined to confer, though the operators were agreeable, the mine workers excusing their declination on the ground that the union officials could have no authority to negotiate until after their annual convention.

A short time prior to the expiration of the working agreement the mine workers invited a conference with the operators in the central competitive field, covering the States of Pennsylvania, Ohio, Indiana, and Illinois, and in spite of the union declination of the Government's informal suggestion for the conference five months before, the Government, informally but sincerely, commended the conference, but it was declined by certain groups of operators, and the coal-mining controversy ended in the strike of April 1. It was instantly made nation-wide, so far as the organized mine workers could control, and included many districts in the bituminous field where there was neither grievance nor dispute, and effected a complete tie-up of the production in the anthracite field.

It is to be noted that when the suspension began large stocks of coal were on hand, mined at wages higher than those paid during the war; there was only the buying impelled by necessity, and there was a belief that coal must yield to the post-war readjustment. When the stocks on hand began to reach such diminution as to menace industry and hinder transportation, approximately June 1, overtures were initiated by the Government in the hope of expediting settlement. None of these availed. Individual and district tenders of settlement on the part of operators—in some instances appeals for settlement—were wholly unavailing. The dominant groups among the operators were insistent on having district agreements; the dominant mine workers were demanding a nation-wide settlement. The Government being without authority to enforce a strike settlement in the coal industry, could only volunteer its good offices in finding a way of adjustment.

Accordingly a conference of the coal operators' associations and the general and district officials of the United Mine Workers was called, to meet in Washington on July 1. The designation of representation was left to the officials of the various organizations, and there was nation-wide representation, except from the nonunion fields of the country. Before the joint meeting I expressed the deep concern of the country and invited them to meet at a conference table and end the disputes between them. The conference did not develop even a hope. The operators were asking for their district or territorial conferences; the workers demanded national settlement on old bases. Appraising correctly the hopelessness of the situation, I again invited both operators and workers to meet with me and tendered a means of settlement so justly inspired that it was difficult to see how anyone believing in industrial peace and justice to all concerned could decline it. In substance, it called on the operators to open their mines, on the mine workers to resume work at the same pay and under the same working conditions as prevailed at the time the strike began. In turn, the Government was to create at once a coal commission, or two of them if preferred by all parties to the dispute, so that one could deal with the bituminous situation, the other with the problems in the anthracite field.

Among the commissioners were to be representatives of the operators, representatives of the mine workers, and outstanding, disinterested, and able representatives of the American public. The commission was to be instructed to direct its first inquiry to the rate of wage to be paid for the period ending next April 1, and then to enter upon a fact-finding inquiry into every phase of the industry, and point the way to avoid future suspensions in production. The disputants all indorsed the suggestion of a fact-finding commission. The anthracite operators promptly accepted the entire proposal. The mine workers refused to resume work under the arbitration plan. The majority of the bituminous operators filed an acceptance, but a considerable minority declined the proposal.

Under these circumstances, having no authority to demand compliance, the Government had no other course than to invite a resumption of production under the rights of all parties to the controversy; with assurance of Government protection of each and every one in his lawful pursuits. This fact was communicated to the governors of all coal-producing States, and with two exceptions assurances of maintained law and order were promptly given. In some instances concrete proof of effective readiness to protect all men, strikers and nonstriking workmen alike, was promptly given. But little or no new production followed. The simple but significant truth was revealed that, except for such coal as comes from the districts worked by nonorganized miners, the country is at the mercy of the United Mine Workers.

Governors in various States reported that their operators and miners had no dispute and were eager to resume production. District leaders informed me that their workmen were anxious to return to their jobs but that they were not permitted to do so. Hundreds of wives of workmen have addressed the White House, beseeching a settlement, alleging that they knew no grievance, and there is an unending story of appeals for relief where necessity or suffering were impelling, where a mere expression of need ought to find ready compliance.

At every stage the Government has been a just neutral regarding wage scales and working contracts. There are fundamental evils in our present system of producing and distribution which make the wage problem difficult. In the bituminous coal fields are vastly more mines than are requisite to the country's needs and there are 200,000 more mine workers than are needed to produce in continuous employment the country's normal requirements. By continuous employment I mean approximately 280 working days in the year. In many instances last year men were employed less than 150 days, in some cases much fewer than that. In the overmanned sections men divide the working time, and high wages are necessary to meet the cost of the barest living. Interrupted transportation, sorely broken employment, the failure to develop storage against enlarged demands, and inadequate carrying—all these present problems bearing on righteous wage adjustment and demand constructive solution.

Because of these things, because of the impressions of many cases of unjustifiable profits in the industry, and because public interest demands investigation, and demands the finding of facts be given to the public, I am asking at your hands the authority to create a commission to make a searching investigation into the whole coal industry, with provision for its lawful activities and the bestowal of authority to reveal every phase of coal production, sale, and distribution. I am speaking now on behalf of mine workers, mine operators, and the American public. It will bring protection to all and point the way to continuity of production and the better economic functioning of the industry in the future.

The necessity for such a searching national investigation with constructive recommendation is imperative. At the moment the coal skies are clearing, but unless we find a cure for the economic ills which affect the industry, and therein find a basis for righteous relationship, we shall be faced with a like menacing situation on next April 1, on the expiration of the wage contracts which are now being made.

The need for such investigation and independent consideration is revealed by both operators and mine workers in the provision in the Cleveland agreement so recently made. The Government will gladly cooperate with the industry in this program so far as it is the public interest so to do, but I have an unalterable conviction that no lasting satisfaction or worth-while results will ensue unless we may have a Government commission, independent of the industry, clothed with authority by the Congress to search deeply, so that it may advise as to fair wages and as to conditions of labor, and recommend the enactment of laws to protect the public in the future. [Applause.]

The almost total exhaustion of stocks of coal, the crippled condition of the railways, the distressed situation that has arisen and might grow worse in our great cities due to the shortage of anthracite, the suffering which might arise in the Northwest through failure to meet winter needs by lake transportation, all these added to the possibility of outrageous price demands, in spite of the most zealous voluntary efforts of the Government to restrain them, make it necessary to ask you to consider at once some form of temporary control of distribution and prices.

The administration earnestly has sought to restrain profiteering and to secure the rightful distribution of such coal as has been available in this emergency. There were no legal powers for price control. There has been cordial cooperation in many fields, a fine revelation of business conscience stronger than the temptation to profit by a people's misfortune. There have been instances of flat refusal. I rejoice to make grateful acknowledgment to those who preferred to contribute to national welfare rather than profit by a Nation's distress.

If it may have your approval, I recommend immediate provision for a temporary national coal agency, with needed capital, to purchase, sell, and distribute coal which is carried in interstate shipment. I do not mean that all interstate coal shall be handled by such a Federal organization; perhaps none will be necessary; but it will restore its capital to the Public Treasury and will be the instrumentality of guarding the public interest where private conscience is insensible to a public need.

This proposal does not relate to any possible employment in intrastate shipments. Price restraint and equitable distribution in intrastate shipments is a responsibility of the State's own government. In such voluntary activities as have been carried on thus far the Federal Government has endeavored to reestablish the authority and responsibility in the States which was undermined in the necessary centralization of authority during the World War.

The public menace in the coal situation was made more acute and more serious at the beginning of July by the strike of the Federated Shop Crafts in the railroad service—a strike against a wage decision made by the Railroad Labor Board, directly affecting approximately 400,000 men. The justice of the decision is not for discussion here. The decision has been lost sight of in subsequent developments. In any event, it was always possible to appeal for rehearing and the submission of new evidence, and it is always a safe assumption that a Government agency of adjustment deciding unjustly will be quick to make right any wrong.

The Railroad Labor Board was created by Congress for the express purpose of hearing and deciding disputes between the carriers and their employees, so that no controversy need lead to an interruption in interstate transportation.

It was inevitable that many wage disputes should arise. Wages had mounted upward, necessarily and justly, during the war upheaval, likewise the cost of transportation, so that the higher wages might be paid. It was inevitable that some readjustments should follow. Naturally, these readjustments were resisted. The administrative Government neither advocated nor opposed. It only held that the Labor Board was the lawful agency of the Government to hear and decide disputes, and its authority must be sustained, as the law contemplates. [Applause.] This must be so, whether the carriers or the employees ignore its decisions.

Unhappily a number of decisions of this board had been ignored by the carriers. In only one instance, however, had a decision, challenged by a carrier, been brought to the attention of the Department of Justice, and this decision was promptly carried to the courts and has recently been sustained in the Federal Court of Appeals. The public or the Executive had no knowledge of the ignored decisions in other cases, because they did not hinder transportation. When these failures of many of the carriers to abide by decisions of the board were brought to my attention, I could more fairly appraise the feelings of the strikers, though they had a remedy without seeking to paralyze interstate commerce.

The law creating the Railroad Labor Board is inadequate. Contrary to popular impression, it has little or no power to enforce its decisions. It can impose no penalties on either party disregarding its decisions. It can not halt a strike, and manifestly Congress deliberately omitted the enactment of compulsory arbitration. The decisions of the board must be made enforceable and effective against carriers and employees alike. But the law is new, and no perfection of it by Congress at this moment could be helpful in the present threatened paralysis of transportation.

Happily it is always lawful and ofttimes possible to settle disputes outside of court, so, in a desire to serve public welfare, I ventured upon an attempt at mediation. Those who had pre-

ceded me in attempted settlements had made some progress. I submitted to the officials of the striking employees and the chairman of the Association of Railway Executives in writing on the same day, a tentative proposal for settlement. Knowing that some of the carriers had offended by ignoring the decisions of the board and the employees had struck when they had a remedy without the strike, I felt it was best to start all over again, resume work, all to agree to abide faithfully by the board's decisions, make it a real tribunal of peace in transportation, and everybody serve the public. The barrier to be surmounted was the question of seniority. By the workmen these rights are held to be sacred, and unsurrendered by a strike. By the carriers the preservation of seniority is the weapon of discipline on the one hand and the reward of faithful employees on the other. It has been an almost invariable rule that when strikes have been lost seniority and its advantages have been surrendered; when strikes have been settled seniority has been restored.

In the tentative proposal which I sponsored it was provided that everybody should go to work, with seniority rights unimpaired, that there should be no discrimination by either workmen or carriers against workmen who did or did not strike. I realized that the proposal must carry a dissappointment to employees who had inherited promotion by staying loyally on the job, and to such new men as had sought jobs looking to permanent employment, but I wanted the fresh start and maintained transportation service, and I appraised the disappointment of the few to be less important than the impending misfortune to the Nation. It was not what I would ask ordinarily to be considered or conceded, but at that moment of deep anxiety, with the coal shortage gravely menacing, I was thinking of the pressing demands of the welfare of the whole people. I believed the sacrifice brought to the men involved could be amply compensated for by the carriers in practical ways. I believed that the matter of transcendent importance was the acceptance of the proposal to respect the Labor Board's decisions on the questions which formed the issue at the time of the strike. The public compensation would be complete in guarding by law against recurrence.

The proposal was rejected by the carriers. Though the rejection did not end all negotiation, it left the Government only one course—to call the striking workmen to return to work, to call the carriers to assign them to work, and leave the dispute about seniority to the Labor Board for decision. When negotiation or mediation fails, this is the course contemplated by the law and the Government can have no chart for its course except the law. [Applause.]

To this call a majority of the carriers responded favorably, proposing to reemploy all strikers except those guilty of violence against workmen or property, to restore the striking workmen *to their* old positions where vacant, or to like positions where vacancies are filled; questions of seniority which can not be settled between the employer and employees to go to the Labor Board for decision. The minority of the carriers proposed to assign jobs to workmen on strike only where the positions were vacant. Neither proposal has been accepted.

Thus the narrative brings us to the present moment, but it has not included the developments which have heightened the Government's concern. Sympathetic strikes have developed here and there, seriously impairing interstate commerce. Deserted transcontinental trains in the desert regions of the Southwest have revealed the cruelty and contempt for law on the part of some railway employees, who have conspired to paralyze transportation, and lawlessness and violence in a hundred places have revealed the failure of the striking unions to hold their forces to law observance. Men who refused to strike and who have braved insult and assault and risked their lives to serve a public need have been cruelly attacked and wounded or killed. Men seeking work and guards attempting to protect lives and property, even officers of the Federal Government, have been assaulted, humiliated, and hindered in their duties. Strikers have armed themselves and gathered in mobs about railroad shops to offer armed violence to any man attempting to go to work. There is a state of lawlessness shocking to every conception of American law and order and violating the cherished guaranties of American freedom. At no time has the Federal Government been unready or unwilling to give its support to maintain law and order and restrain violence, but in no case has State authority confessed its inability to cope with the situation and asked for Federal assistance.

Under these conditions of hindrance and intimidation there has been such a lack of care of motive power that the deterioration of locomotives and the noncompliance with the safety requirements of the law are threatening the breakdown of transportation. This very serious menace is magnified by the millions of losses to fruit growers and other producers of perishable foodstuffs, and comparable losses to farmers who depend on transportation to market their grains at harvest time. Even worse, it is hindering the transport of available coal when industry is on the verge of paralysis because of coal shortage, and life and health are menaced by coal famine in the great centers of population. Surely the threatening conditions must impress the Congress and the country that no body of men, whether limited in numbers and responsible for railway management or powerful in numbers and the necessary forces in railroad operation, shall be permitted to choose a course which so imperils public welfare. [Applause.] Neither organizations of employers nor workingmen's unions may escape responsibility. When related to a public service the mere fact of organization magnifies that responsibility and public interest transcends that of either grouped capital or organized labor. [Applause.]

Another development is so significant that the hardships of the moment may well be endured to rivet popular attention to necessary settlement. It is fundamental to all freedom that all men have unquestioned rights to lawful pursuits, to work and to live and choose their own lawful ways to happiness. In these strikes these rights have been denied by assault and violence, and by armed lawlessness. In many communities the municipal authorities have winked at these violations, until liberty is a mockery and the law a matter of community contempt. It is fair to say that the great mass of organized workmen do not approve, but they seem helpless to hinder. These conditions can not remain in free America. [Applause.] If free men can not toil according to their own lawful choosing, all our constitutional guaranties born of democracy are surrendered to mobocracy and the freedom of a hundred millions is surrendered to the small minority which would have no law.

It is not my thought to ask Congress to deal with these fundamental problems at this time. No hasty action would contribute to the solution of the present critical situation. There is existing law by which to settle the prevailing disputes. There are statutes forbidding conspiracy to hinder interstate commerce. There are laws to assure the highest possible safety in railway service. It is my purpose to invoke these laws, civil and criminal, against all offenders alike. [Applause.]

The legal safeguarding against like menaces in the future must be worked out when no passion sways, when no prejudice influences, when the whole problem may be appraised, and the public welfare may be asserted against any and every interest which assumes authority beyond that of the Government itself.

One specific thing I must ask at your hands at the earliest possible moment. There is pending a bill to provide for the better protection of aliens and for the enforcement of their treaty rights. It is a measure, in short, to create a jurisdiction for the Federal courts through which the National Government will have appropriate power to protect aliens in the rights secured to them under treaties and to deal with crimes which affect our foreign relations.

The matter has been before Congress on many previous occasions. President Tyler, in his first annual message, advised Congress that inasmuch as "the Government is charged with the maintenance of peace and the preservation of amicable relations with the nations of the earth, it ought to possess without question all the reasonable and proper means of maintaining the one and preserving the other."

President Harrison asked for the same bestowal of jurisdiction, having encountered deep embarrassment which grew out of the lynching of 11 aliens in New Orleans in 1891. President McKinley, dealing with a like problem in 1899, asked the conferring upon Federal courts jurisdiction in that class of international cases where the ultimate responsibility of the Federal Government may be involved. President Roosevelt uttered a like request to Congress in 1906, and President Taft pointed out the defect in the present Federal jurisdiction when he made his inaugural address in 1909. He declared that "it puts our Government in a pusillanimous position to make definite engagement to protect aliens and then to excuse the failure to perform these engagements by an explanation that the duty to keep them is in States or cities not within our control. If we would promise, we must put ourselves in a position to perform our promise. We can not permit the possible failure of justice, due to local prejudice in any State or municipal government, to expose us to the risk of war which might be avoided if Federal jurisdiction were asserted by suitable legislation by Congrgess."

My renewal of this oft-made recommendation is impelled by a pitiable sense of Federal impotence to deal with the shocking crime at Herrin, Ill., which so recently shamed and horrified the country. [Applause.] In that butchery of human beings, wrought in madness, it is alleged that two aliens were murdered. This act adds to the outraged sense of American justice the humiliation which lies in the Federal Government's confessed lack of authority to punish that unutterable crime.

Had it happened in any other land than our own, and the wrath of righteous justice were not effectively expressed, we should have pitied the civilization that would tolerate and sorrow for the government unwilling or unable to mete out just punishment.

I have felt the deep current of popular resentment that the Federal Government has not sought to efface this blot from our national shield; that the Federal Government has been tolerant of the mockery of local inquiry and the failure of justice in Illinois. It is the regrettable truth that the Federal Government can not act under the law. But the bestowal of the jurisdiction necessary to enable Federal courts to act appropriately will open the way to punish barbarity and butchery at Herrin or elsewhere, no matter in whose name or for what purpose the insufferable outrage is committed. [Applause.]

It is deplorable that there are or can be American communities where even there are citizens, not to speak of public officials, who believe mob warfare is admissible to cure any situation. It is terrorizing to know that such madness may be directed against men merely for choosing to accept lawful employment. I wish the Federal Government to be able to put an end to such crimes against civilization and punish those who sanction them. [Applause.]

In the weeks of patient conference and attempts at settlement I have come to appraise another element in the engrossing industrial dispute of which it is only fair to take cognizance. It is in some degree responsible for the strikes and has hindered attempts at adjustment. I refer to the warfare on the unions of labor. The Government has no sympathy or approval for this element of discord in the ranks of industry. [Applause.] Any legislation in the future must be as free from this element of trouble making as it is from labor extremists who strive for class domination. We recognize these organizations in the law, and we must accredit them with incalculable contribution to labor's uplift. It is of public interest to preserve them and profit by the good that is in them, but we must check the abuses and the excesses which conflict with public interest, precisely as we have been progressively legislating to prevent capitalistic, corporate, or managerial domination which is contrary to public welfare. [Applause.] We also recognize the right of employers and employees alike, within the law, to establish their methods of conducting business, to choose their employment, and to determine their relations with each other. We must reassert the doctrine that in this Republic the first obligation and the first allegiance of every citizen, high or low, is to his Government, and to hold that Government to be the just and unchallenged sponsor for public welfare, and the liberty, security, and rights of all its citizens. No matter what clouds may gather, no matter what storms may ensue, no matter what hardships may attend or what sacrifices may be necessary, government by law must and will be sustained. [Applause.]

Wherefore I am resolved to use all the power of the Government to maintain transportation and sustain the right of men to work. [Applause, the Members rising.]

At 1 o'clock and 2 minutes p. m. the President and the members of his Cabinet retired from the Hall of the House.

Whereupon the President pro tempore and the Members of the Senate returned to their Chamber.

The SPEAKER. The joint session of the two Houses is now adjourned.

ADJOURNMENT.

At 1 o'clock and 5 minutes p. m. the House resumed its session.

Mr. MONDELL. Mr. Speaker, I move that the House do now adjourn.

Mr. GARRETT of Tennessee. Will the gentleman withhold that motion for a moment?

Mr. MONDELL. I will.

Mr. GARRETT of Tennessee. Mr. Speaker, will it be agreeable to the gentleman to allow half an hour of debate at this time?

Mr. MONDELL. I think not now, Mr. Speaker. I think it is not usual to have debate immediately following the presentation of a message from the President. I think I shall have to insist upon my motion at this time.

The SPEAKER. The gentleman from Wyoming moves that the House do now adjourn.

Mr. GARRETT of Tennessee. Mr. Speaker, on that motion I ask for the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 131, nays 65, not voting 231, as follows:

YEAS—131.

Anderson	Dunbar	Kendall	Robsion

So the motion to adjourn was agreed to.

The Clerk announced the following pairs:

On this vote:

Mr. Burton (for) with Mr. Oldfield (against).

Mr. Wood of Indiana (for) with Mr. Sisson (against).

Mr. Crowther (for) with Mr. Kitchin (against).

Mr. Nolan (for) with Mr. Riordan (against).

Mr. Dickinson (for) with Mr. Linthicum (against).

Mr. Schall (for) with Mr. Jacoway (against).

Mr. Olpp (for) with Mr. Aswell (against).

Mr. Reed of New York (for) with Mr. Hooker (against).

Mr. Davis of Minnesota (for) with Mr. Sears (against).

Mr. White of Kansas (for) with Mr. Bankhead (against).

Mr. Newton of Minnesota (for) with Mr. Johnson of Kentucky (against).

Mr. Taylor of New Jersey (for) with Mr. Steadman (against).

Mr. Begg (for) with Mr. Barkley (against).

Mr. Newton of Missouri (for) with Mr. Clark of Florida (against).

Mr. Hukriede (for) with Mr. Lee of Georgia (against).

Mr. A. P. Nelson (for) with Mr. Ten Eyck (against).

Mr. Evans (for) with Mr. Connally of Texas (against).

Mr. Brown of Tennessee (for) with Mr. Mead (against).

Mr. Frear (for) with Mr. Fields (against).

Mr. Patterson of New Jersey (for) with Mr. Gallivan (against).

Mr. Goodykoontz (for) with Mr. Rayburn (against).

Mr. Burtness (for) with Mr. Hayden (against).

Mr. Keller (for) with Mr. Sabath (against).

Mr. Perkins (for) with Mr. Cockran (against).

Mr. Kiess (for) with Mr. London (against).

Mr. Radcliffe (for) with Mr. Vinson (against).

Mr. Luce (for) with Mr. Cullen (against).

Mr. Knutson (for) with Mr. Montague (against).

Mr. Brooks of Pennsylvania (for) with Mr. O'Brien (against).

Mr. Layton (for) with Mr. Deal (against).

Mr. McFadden (for) with Mr. Dupré (against).

Mr. Kahn (for) with Mr. Dupré (against).

Mr. Connolly of Pennsylvania (for) with Mr. Bell (against).

Mr. Christopherson (for) with Mr. Johnson of Mississippi (against).

Mr. Kennedy (for) with Mr. Stoll (against).

Mr. Lee of New York (for) with Mr. Carew (against).

Mr. Coughlin (for) with Mr. Taylor of Arkansas (against).

Mr. Graham of Pennsylvania (for) with Mr. Collier (against).

Mr. Bacharach (for) with Mr. Martin (against).

Mr. Ackerman (for) with Mr. Woods of Virginia (against).

Mr. Beck (for) with Mr. Dominick (against).

Mr. Larson of Minnesota (for) with Mr. Rainey of Illinois (against).

Mr. Atkeson (for) with Mr. Fisher (against).

Mr. Lineberger (for) with Mr. Goldsborough (against).

Mr. McArthur (for) with Mr. Hawes (against).

Mr. Anthony (for) with Mr. Rucker (against).

Mr. Gahn (for) with Mr. Fulmer (against).

Mr. Frothingham (for) with Mr. Raker (against).

Mr. Kline of Pennsylvania (for) with Mr. Collins (against).

Mr. Lawrence (for) with Mr. Drewry (against).

Mr. Madden (for) with Mr. Brand (against).

Mr. Webster (for) with Mr. Kunz (against).

Mr. Thompson (for) with Mr. Tague (against).

Mr. Winslow (for) with Mr. Swank (against).

Mr. Osborne (for) with Mr. Kindred (against).

Mr. Arentz (for) with Mr. Sullivan (against).

Mr. Cramton (for) with Mr. Logan (against).

Mr. Griest (for) with Mr. Wise (against).

Miss Robertson (for) with Mr. Tyson (against).

Mr. Hutchinson (for) with Mr. Black (against).

Mr. Steenerson (for) with Mr. Blanton (against).

Mr. Wyant (for) with Mr. Clark of Florida (against).

Mr. Funk (for) with Mr. Park of Georgia (against).

Mr. Yates (for) with Mr. Rainey of Alabama (against).

Accordingly (at 1 o'clock and 26 minutes p. m.) the House adjourned until Saturday, August 19, 1922, at 12 o'clock noon.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. VOLSTEAD: A bill (H. R. 12355) to amend section 876 of the Revised Statutes; to the Committee on the Judiciary.

Also, a bill (H. R. 12356) to amend section 51 of chapter 4 of the Judicial Code; to the Committee on the Judiciary.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. DRANE: A bill (H. R. 12357) making additional appropriation for improvement of the channel from Clearwater Harbor through Boca Ceiga Bay to Tampa Bay, Fla.; to the Committee on Claims.

By Mr. ECHOLS: A bill (H. R. 12358) granting a pension to Georgia Ann Scarbrough; to the Committee on Invalid Pensions.

By Mr. FRENCH: A bill (H. R. 12359) granting a pension to Hester E. Aldrich; to the Committee on Invalid Pensions.

By Mr. KEARNS: A bill (H. R. 12360) granting an increase of pension to Henry T. Hertslet; to the Committee on Pensions.

Also, a bill (H. R. 12361) granting a pension to Florence S. Bradbury; to the Committee on Invalid Pensions.

By Mr. LAMPERT: A bill (H. R. 12362) granting a pension to Georgia M. Sabin; to the Committee on Pensions.

Also, a bill (H. R. 12363) granting a pension to William N. Bamforth; to the Committee on Pensions.

By Mr. LINEBERGER: A bill (H. R. 12364) granting a pension to Charity I. Haskell; to the Committee on Invalid Pensions.

By Mr. SNELL: A bill (H. R. 12365) granting a pension to Ida Nelson; to the Committee on Invalid Pensions.

Also, a bill (H. R. 12366) granting an increase of pension to Jennie E. Nelson; to the Committee on Invalid Pensions.

By Mr. WATSON: A bill (H. R. 12367) granting a pension to James Mullen; to the Committee on Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

6187. By Mr. ANSORGE: Petition of Edward S. R. Sequin, of New York City, advocating the passage of the Underwood bill amending the act to provide compensation for employees of the United States suffering injuries while in the performance of their duties; to the Committee on the Judiciary.

6188. By Mr. DARROW: Petition of the Philadelphia Board of Trade in opposition to Senate bill 3844, to exempt interest on farm-land securities from taxation under the revenue act of 1921; to the Committee on Ways and Means.

6189. By Mr. FULLER: Petition of the executive committee of the La Salle County (Ill.) Farm Bureau, favoring an amendment to the farm loan act raising the limit on loans from $10,000 to $25,000; to the Committee on Agriculture.

6190. By Mr. KISSEL: Petition of the American Sugar Refining Co., New York City, regarding import duties on sugar; to the Committee on Ways and Means.

6191. Also, petition of Soldiers' and Sailors' Club, New York City, opposing the working hours of from 8 to 5 daily and 8 to 12 Saturdays for the various vocation schools under the United States Veterans' Bureau; to the Committee on Interstate and Foreign Commerce.

6192. Also, petition of Dry Goods Economist, New York City, opposing a bonus for soldiers of the World War; to the Committee on Ways and Means.

6193. By Mr. RAKER: Petitions of the Sacramento Clearing House and the Sacramento Valley Development Association, of Sacramento; the Lake Tahoe Railway & Transportation Co. and the Coos Bay Lumber Co., of San Francisco; the Board of Trustees of the City of Nevada, of Nevada City; and the Berkeley Manufacturers' Association, of Berkeley; all in the State of California, protesting against the separation of the Central Pacific Railway Co. and the Southern Pacific Railroad Co. in California; to the Committee on Interstate and Foreign Commerce.

6194. Also, petitions of the Chamber of Commerce of Williams, Colusa County; the Pacific Lumber Co, by Howard MacDonald, president; the Mutual Business Club, of San Francisco; the Santa Fe Improvement Association, of Oakland; and the Chamber of Commerce of the City of Grass Valley, all in the State of California, protesting against the proposed separation

of the Central Pacific and Southern Pacific Railroad systems in California; to the Committee on Interstate and Foreign Commerce.

6195. Also, petitions of L. R. Smith, general chairman, Brotherhood of Railroad Signalmen of America, Southern Pacific system, of Oakland; the Berkeley Chamber of Commerce; the Earl Fruit Co. (Inc.), of Sacramento; and the Accountants' Association, by Edward O. Mills, president, of San Francisco, all in the State of California, protesting against the separation of the Central Pacific Railway Co. from the Southern Pacific Co. in California; to the Committee on Interstate and Foreign Commerce.

6196. Also, petition signed by 263 residents of Red Bluff, Tehama County, Calif., protesting against the enactment of the pending compulsory Sunday observance bills in Congress, namely, House bills 4388 and 9753, and Senate bill 1948; to the Committee on the District of Columbia.

6197. By Mr. TEMPLE: Evidence in support of House bill 12342, granting a pension to Kate Clear; to the Committee on Invalid Pensions.

SENATE.

SATURDAY, *August 19, 1922.*

(Legislative day of Thursday, August 3, 1922.)

The Senate met at 10.30 o'clock a. m., on the expiration of the recess.

THE TARIFF.

The Senate resumed the consideration of the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes.

Mr. McCUMBER. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The Secretary will call the roll.

The roll was called, and the following Senators answered to their names.

Ashurst	Ernst	McNary	Smith
Ball	Frelinghuysen	Moses	Smoot
Borah	Gooding	Myers	Sterling
Brandegee	Hale	New	Sutherland
Broussard	Harreld	Nicholson	Trammell
Calder	Harrison	Norbeck	Underwood
Cameron	Jones, Wash.	Oddie	Wadsworth
Capper	Kellogg	Overman	Walsh, Mass.
Colt	Kendrick	Pomerene	Walsh, Mont.
Culberson	Keyes	Ransdell	Warren
Cummins	Lodge	Reed, Pa.	Watson, Ga.
Curtis	McCormick	Robinson	
Dillingham	McCumber	Sheppard	
Edge	McLean	Shortridge	

Mr. UNDERWOOD. I desire to announce the absence of the Senator from Nevada [Mr. PITTMAN], on account of illness.

The PRESIDENT pro tempore. Fifty-three Senators having answered to their names, there is a quorum present.

Mr. STERLING. Mr. President, I ask unanimous consent that I may be permitted to make a brief statement—not exceeding, I think, five minutes—on an amendment which at one time I had expected to propose. It is a matter of great public interest, and I desire to state the reason for not presenting the amendment formally and asking for its adoption.

The PRESIDENT pro tempore. Is there objection? [After a pause.] The Chair hears no objection.

Mr. UNDERWOOD. Let it be read. I could not hear what the Senator said, the noise in the Chamber was so great.

The PRESIDENT pro tempore. The Senate will be in order.

Mr. STERLING. I ask unanimous consent that I may make a very brief statement in regard to an amendment which I had intended to propose to the tariff bill, but which, under the circumstances, I do not propose to offer. As I said, it is a matter of such public interest that a statement of this kind ought to be made.

The PRESIDENT pro tempore. Is there objection?

Mr. MOSES. I did not hear what the request was.

The PRESIDENT pro tempore. The Senate will be in order, and nothing will be done until the Senate is in order.

Mr. STERLING. I will say to the Senator from New Hampshire that the request is to make a very brief statement in regard to an amendment which I had intended to present.

The PRESIDENT pro tempore. The Chair hears no objection.

Mr. STERLING. I send the amendment to the desk and ask that it may be read.

The PRESIDENT pro tempore. The amendment will be read for the information of the Senate.

The READING CLERK. On page 396, line 15, at the end of section 581, insert the following:

Officers of the customs, the Coast Guard, the Treasury Department, or other officers whose duty it is to enforce the national prohibition act, may go on board any vessel, at any place in the United States or within 4 marine leagues of the coast of the United States, and hail, stop, and board such vessel in the enforcement of the laws prohibiting, regulating, taxing, or relating to the liquor traffic; and such officers shall have all of the authority conferred by this section and by section 3067 of the Revised Statutes (act of March 2, 1790, ch. 22, 1 Stat. L. 668) upon customs officers in the enforcement of the customs laws.

Mr. STERLING. Mr. President, the object of the amendment is apparent. The smuggling of liquor into the United States is one of the most difficult problems with which the prohibition enforcement officers have to contend, and much of the smuggled liquor comes by way of the sea. It is believed that more liquor is smuggled into the United States along the Atlantic coast from North Carolina to Florida than in any other place in the country. The Bahama Islands are a great source of supply. The original amendment, of which this is a modification, was presented and printed as an amendment, intended to be proposed, on July 6 last.

I subsequently learned that our Secretary of State had taken up the question with the representative of the British Government for the purpose, if possible, of arriving at an agreement under which Great Britain would not object to the search of her vessels for the purpose of ascertaining whether they carried contraband liquor on board within a reasonable distance beyond the 3-mile limit. It was ascertained that the Secretary of State was of the opinion that the 3-mile limit was generally accepted among the principal maritime nations of the world as the limit of a nation's jurisdiction over the adjacent sea, and that this Government had on more than one occasion committed itself to that limit. Hence, in the view of the Secretary, there should be an international understanding or agreement in regard to the matter. Otherwise, interference with foreign vessels outside the 3-mile limit might bring about international complications and subject this Government to claims for damages.

With this as the situation, it was thought that a law of Congress which authorized the boarding and search of foreign vessels beyond the 3-mile limit might involve serious controversy and possibly claims for damages on the part of the nations whose vessels had been thus interfered with, although in pursuance of our municipal law. For this reason it was decided not to press the amendment at this time. It is to be hoped that a reasonable understanding with Great Britain will be reached in regard to our right to go beyond the 3-mile limit for the purpose of securing the better enforcement of our national prohibition law. Such an arrangement with Great Britain would, I am satisfied, be followed by similar understandings with other maritime nations.

Mr. SHEPPARD. Mr. President, may I ask the Senator a question there?

Mr. STERLING. Mr. President, I have begged the indulgence of the Senate in order that I might make this statement, and I hope not to be interrupted, if the Senator will excuse me.

Mr. SHEPPARD. Very well.

Mr. STERLING. The limit of 3 miles was fixed, if fixed at all, in the eighteenth century, when that distance was the greatest range of cannon, and was upon the theory that a nation could exercise territorial jurisdiction over the sea as far as it could effectively control the sea by force of arms. Since the range of cannon has increased to a distance of four or five times beyond what it was in the eighteenth century, so, likewise, has the distance over which effective control can be exercised. Nearly all the publicists agree that the reason of the rule having failed, the rule itself should no longer prevail, and agree also that there is need for the extension of the limit beyond 3 miles from the shore. Great Britain has hitherto held to the 3-mile limit, claiming that it was the limit now recognized in international law, and our Government has itself on occasion denied the right of other nations to extend this limit.

It is earnestly hoped that an understanding may be reached; if not, the question will remain as to whether the United States will not be justified in extending her jurisdiction over territorial sea to a distance of 10 or 12 miles at least from the shore, in order to secure the enforcement of our own national legislation and the welfare of our people.

A law thus extending our jurisdiction might not conform to a rule of international law as at present understood, but a rule having its origin in the range of a cannon shot nearly two centuries ago, yet it would conform to present-day needs, not only as they actually exist in our own case, but as such needs are recognized by the great majority of international jurists throughout the world.

I think I have read the opinions of every international jurist, from Bynkershoek, who wrote in 1744, down to the present day, upon the subject of the extent of the marginal sea. I have made excerpts from the writings of those jurists and publicists, and I ask unanimous consent that I may put these excerpts in the RECORD in connection with my remarks.

There being no objection, the matter was ordered to be printed in the RECORD.

The following, being the excerpts referred to, are from the book entitled "The Extent of the Marginal Sea," largely a compilation by Henry G. Crocker and published in 1919:

THE EXTENT OF THE MARGINAL SEA.

Sir Thomas Barclay, senior vice president of the Institute of International Law; vice president of the International Law Association; examiner in jurisprudence and international public and private law at the University of Oxford.

Problems of International Practice and Diplomacy (1907) (p. 109). He says: "No branch of international law is in a more unsatisfactory condition than that of the rights and duties arising out of the possession and use of the margin of sea, along the coast line of States, called 'territorial waters.' No general understanding has yet been arrived at on such an essential matter as the width of the margin, and even the nature of the dominion the adjacent State is entitled to exercise is still the subject of controversy" (p. 3).

Johann Kaspar Bluntschli, German; president of the Institute of International Law; professor of law in the University of Zurich and other German universities; generally considered one of the greatest European authorities on international law.

Le Droit International Codifie (1895) (par. 302): "When the open sea forms the frontier of a State, we include within the national territory that part of the sea over which the State from the shore can enforce its power—that is, a strip of sea extending up to the range of a cannon shot from the shore" (p. 8).

Henri J. F. X. Bonfils, professor of commercial law at the University of Toulouse. His work is considered in France a standard authority on international law and has run through seven editions.

Manuel de Droit International Public (1914) (par. 491): "* * * almost all the modern authors and several diplomatic treaties admit that the extent of the jurisdictional sea is equal to the greatest range of cannon. This is the reasonable standard and the limit of general law, excepting special conventions" (p. 11).

Cornelius van Bynkershoek, a Dutch jurist; president of the Supreme Court of Holland.

De Dominio Maris (1744) (pp. 363–365). After describing different opinions he says: "Wherefore on the whole it seems a better rule that the control of the land (over the sea) extends as far as cannon will carry, for that is as far as we seem to have both command and possession. I am speaking, however, of our own times, in which we use those engines of war; otherwise I should have to say in general terms that the control from the land ends where the power of men's weapons ends; for it is this, as we have said, that guarantees possession" (p. 15).

Carlos Calvo. Argentinian publicist and diplomat; member of the Institute of International Law; minister at Berlin and Paris; leading Spanish writer on international law.

Le Droit International Theorique et Pratique, fifth edition (1896). (Par. 355): "Publicists are far from agreeing as to the extent to be assigned to territorial waters." Paragraph 356: "From these general principles it is easy to draw the conclusion that territorial waters should include only the space capable of being defended from the mainland, or of serving as a base for attacks on the adjacent coast. Since the invention of firearms this space has generally been limited to 3 nautical miles from the shore line at low tide. * * * This distance of 3 nautical miles is not, however, unalterable. It is agreed to-day that this distance is too short, as it no longer agrees with the range of the newly perfected guns, whose balls can be projected to a distance of 5 miles; it is only just, then, that this limit should be proportionately extended" (pp. 20, 21).

Giuseppe Carnazza-Amari. Italian publicist; member of the Institute of International Law; professor at the University of Catania.

Traité de Droit International Public en Temps de Paix (1880, 82). Section 12: "The State possesses in the interest of its security a right of surveillance and jurisdiction over territorial waters. It follows that it may take all measures which its defense and its needs require. Thus, it has the right of demanding explanation of all vessels passing through the seas which belong to it in order to establish the intention with which they approach; to prevent acts of hostility between foreign vessels, which might interfere with its tranquillity; to establish customs ordinances, and visit ships suspected of contraband; to regulate maritime ceremonials; * * * to exercise civil and penal jurisdiction over all acts of nationals and over all aliens which may exercise any influence upon its territory—in a word, take all the measures which its safety and its needs require" (p. 38).

Sir Edward Shepherd Creasy. English historian; author of "Fifteen Decisive Battles of the World," and other books.

First Platform of International Law (1876), page 241: "* * * a nation's right to compel others to keep the peace in the open sea near its coast extends over so much of the sea as the nation could command by artillery placed on its coast. This extent has hitherto been fixed by general consent at a maritime league, or 3 miles seaward; but from the great improvements which have recently been made in the range of cannon, it is probable that a line of 5 miles will hereafter be adopted as the measure." Page 245: "States may exercise a qualified jurisdiction over the seas near their coast for more than the 3 (or 5) mile limit for fiscal and defensive purposes; that is, for the purpose of enforcement of their revenue laws, and in order to prevent foreign-armed vessels from 'hovering on their coasts' in a menacing and annoying manner. Both Great Britain and the United States have prohibited the transshipment within 4 leagues of their coasts of foreign goods without payment of duties. The American Supreme Court has declared this regulation to be founded on international law" (pp. 44, 47).

Ferdinand Baron de Cussy. French publicist and diplomat.

Phases et Causes Celebres du Droit Maritime des Nations (1856): "* * * the sovereignty over the territorial sea reaches as far as the range of cannon shot from the shore, so far as concerns the protection which a neutral State owes to vessels of a belligerent nation; but the surveillance which ought to be exercised in the matter of customs, to prevent smuggling, may extend still farther" (p. 52).

Frantz Clément René Despagnet. French publicist; member of the Institute of International Law; professor of international law at the University of Bordeaux; has written many books with many editions.

Cours de Droit International Public, fourth edition (1910).

Despagnet (1910): "The limit of the territorial sea seawards has varied greatly. The old authors extend it very far, to exaggerated or ill-defined distances, some a hundred miles and others to the visual horizon. Bynkershoek first stated the principle that the power of the land ends where the force of arms ends. To-day it is agreed that the limit of the territorial sea is fixed at the extreme point at which the State may; from the shore, compel respect for its sovereignty—that is, the greatest range of cannon. This range clearly varies according to the progress of ballistics, and it is now estimated at 20 kilometers.

"Treaties may fix the limit between the contracting States for customs police, which is usually admitted in international conventions or municipal laws to extend to 4 or 5 leagues. Finally, numerous treaties already existing relating to fishing adopt 3 marine miles from low-water mark. (Hague Convention, May 6, 1882, art. 2; Declaration of Constantinople, October 20, 1888, regarding the neutralization of the Suez Canal.)

"We must remark that this last limit has been adopted because we have taken account of the older usual range of cannon. But we must not conclude from this that it constitutes the normal limit outside special conventions. The limit of common law always remains, excepting conventions to the contrary, the greatest range of cannon at the time in question." (See letter of Messrs. Courcel and Gram, arbitrators in the conflict between Great Britain and the United States on the question of fishing on the Bering Sea, Annuaire de l'Institut de Droit International, vol. 13, p. 282.)

William Edward Hall, British publicist and member of the Institute of International Law. His "Treatise on International Law" has run through six editions, and has been regarded as an authority from the date of its appearance.

Treatise on International Law, seventh edition, 1917:

"SEC. 41. Their precise extent, however, is not so certain [referring to marginal waters]. Generally their limit is fixed at a marine league from the shore; but this distance was defined by the supposed range of a gun of position, and the effect of the recent increase in the power of artillery has not yet been taken into consideration, either as supplying a new measure of the space over which control may be efficiently exercised or as enlarging that within which acts of violence may be dangerous to persons and property on shore. It may be doubted, in view of the very diverse opinions which have been held until lately as to the extent to which marginal seas may be appropriated, of the lateness of the time at which much more extensive claims have been fully abandoned, and of the absence of cases in which the breadth of territorial water has come into international question, whether the 3-mile limit has ever been unequivocally settled; but in any case, as it has been determined, if determined at all, upon an assumption which has ceased to hold good, it would be pedantry to adhere to the rule in its present form; and perhaps it may be said without impropriety that a State has theoretically the right to extend its territorial waters from time to time at its will with the increased range of guns. Whether it would in practice be judicious to do so; whether it would be politic for a country, which wished to avoid dangerous friction between itself and other nations, to act in this direction without having secured the concurrence of the more important maritime States, either by the negotiation of separate treaties, or through the acceptance of the principle in a conference of the powers, is a widely different matter, and one which is outside the purview of law." In a footnote he says: "The question of the principle upon which the extent of marginal waters should be founded, and of the breadth of water that should be included, has of late attracted a considerable amount of attention. It is felt, and growingly felt, not only that the width of 3 miles is insufficient for the safety of the territory but that it is desirable for a State to have control over a large space of water for the purpose of regulating and preserving the fisheries in it," etc. (pp. 74, 75).

Hautefeuille (1868), Kluber (1874), Latour (1889), Perels (1885), Piedelievre (1894), Schmalz (1823), Ralston (1910), and Testa (1886), all hold that the limit of the maritime frontier is determined by the longest range of cannon. But Piedelievre, differing from some authors who hold that the 3-mile limit is the general practice, says: "It is certain that in the absence of all conventions the extent of the marginal sea is measured by the greatest range of cannon placed on shore."

"Secondary law has sanctioned this rule; the majority of treaties on the subject have adopted the same rule. * * * Almost all modern publicists of greatest authority have taken the range of cannon as the only limit of the territorial sea which was rational and in conformity with principles of primitive law. This natural limit has been recognized by a great number of States in their municipal laws and regulations" (pp. 105, 106).

James Kent, American jurist; professor of law in Columbia College; justice of the State supreme court; his "Commentaries" has passed through fourteen editions and continues to rank as a legal classic.

Commentaries on American Law, 1896, volume 1, page 26: "It is difficult to draw any precise or determinate conclusion, amidst the variety of opinions, as to the distance to which a State may lawfully extend its exclusive dominion over the sea adjoining its territories, and beyond those portions of the sea which are embraced by harbors, gulfs, bays, and estuaries, and over which its jurisdiction unquestionably extends. All that can reasonably be asserted is, that the dominion of the sovereign of the shore over the contiguous sea extends as far as is requisite for his safety, and for some lawful end. A more extended dominion must rest entirely upon force and martime supremacy. According to the current of modern authority, the general territorial jurisdiction extends into the sea as far as cannon shot will reach and no farther; and this is generally calculated to be a marine league; and the Congress of the United States have recognized this limitation, by authorizing the district courts to take cognizance of all captures made within a marine league of the American shores." (P. 180, 181.)

Rev. Thomas Joseph Lawrence, English publicist; member of the Institute of International Law; lecturer on international law at the Royal Naval College, Portsmouth; deputy professor of international law at Cambridge; professor of international law in the University of Chicago; written several books on international law.

Principles of International Law, fifth edition, 1913: "A State's territory includes the sea within a 3-mile limit of its shore. * * * A few attempts have been made in recent times to extend the limit in order to keep pace with the increased range of modern artillery, * * * and are justified by the increase of the range of cannon from 3 to 15 miles" (pp. 280, 281).

Franz Von Liszt. German publicist; member of the Institute of International Law; professor at Giessen, Marburg, Halle, Berlin; director of the college of criminal law at the University of Berlin. Has written many books on criminal law.

Das Volkerrecht, fifth edition, 1907, page 86: "Coastal waters are those parts of the open sea which the adjacent State may control from the coast. The determination of the limit of the coastal waters is disputed. Ancient literature accepted cannon-shot distance * * *. In the modern law of Germany and other countries, as well as in the most important modern treaties, the distance is frequently established at 3 sea miles, this distance to be reckoned from low-water mark. * * * But we can not speak of a general recognition of this method of calculation. The objection to the '3-mile zone' is that formerly it may have corresponded with the extent of cannon distance, but that now, in expert tests, the distance would amount to from 5 to 7 miles, or 9 to 12 kilometers. In deciding the boundaries you have to go on this principle; you define the littoral rights from the point of view of the defense of the State on the one hand, and on the other their power to maintain this. The border of coastal waters must extend as far as the adjacent State is able to assure its jurisdiction and interest. For this reason it is advisable to return to the old rule by which the utmost border of coastal waters is determined by cannon shot. Certainly each adjacent State can make the extent narrower, or measure it differently for the execution of its different laws; thus make the extent greater for customs and sanitary police than for the exercise of jurisdiction, taking it for granted that they stay all the time within cannon distance" (pp. 292, 293).

Fedor Fedorovich Martens. Russian publicist; member of the Institute of International Law; member of the permanent court of arbitration at The Hague; professor, diplomat, and arbitrator. Has written several works on international law which have been translated into other languages and have had several editions.

Le Tribunal d'Arbitrage de Paris et la Mer Territoriale, 1894, page 39. "Finally, the imperium of the adjacent State is absolute in the radius of territorial waters dominated by cannon. We must recognize, however, that the limits of the territorial sea ought to change with the modifications in the range of cannon. However, if at a certain time this range was 3 miles, the extent of territorial sea was only 3 miles.

"If a present cannon carry to 12 or 15 miles, the territorial sea of modern adjacent States ought also to extend to 15 miles," page 43: "An agreement between the powers with respect to the limits of the territorial sea is a condition sine qua non of success in establishing measures of protection in the open sea for the preservation of the legitimate interests of the nations and the rights of their subjects.

"It is desirable that this agreement be arrived at soon by reason of the great interests connected with maritime fishing which States are obliged to defend in virtue of their own sovereignty with the concurrence of other nations.

"However, up to the time when this international agreement shall have become an accomplished fact, each State has the incontestable right of declaring, as its territorial sea, the waters which it dominates by batteries from the shore. In view of the necessity of defining the range of cannon and in view of the exigencies of maritime navigation and international commerce the adjacent State may limit this range of cannon to a distance of a number of miles fixed by itself. Instead of the limit of 3 marine miles the adjacent State has the incontestable right of taking 10 miles or even more.

"In our opinion the limit of 10 miles is more in accord with the mean range of modern cannon and a more efficacious protection of the interests of the adjacent population which live upon maritime fishing" (pp. 294–295).

George Friedrich von Martens. German jurist; professor of natural and international law at the University of Gottingen.

Précis du Droit des Gens Moderne de l'Europe, 1864 (p. 141): "A nation may assume an exclusive right over those neighboring portions of the sea susceptible of control from the shore. * * * All nations of Europe to-day agree that the rule is that straits, gulfs, and the adjacent sea belong to the owner of the shore, at least as far as the range of a cannon placed on the shore" (p. 295).

Antoine Louis Nuger. His book is cited with approval by many writers on international law.

Des Droits de l'Etat sur la Mer Territoriale, 1887. He says, after having referred to the territorial waters jurisdiction act of 1878 and to the fact that when it was presented to the English Parliament the extent to assign to the territorial sea was not discussed, and to the declaration of the Government establishing the limit within the range of cannon, or 3 miles, which did not meet with any opposition, as follows:

"The truth is that this identification, correct at one time when the range of cannon did not exceed 3 miles, is to-day nonsense. This distance has been sanctioned in certain treaties relating to special questions and having quite a distinct object. But it is evident that these can only be effective so far as the point the parties have in view is concerned. For the rest it is necessary to refer to principles." He says further, "It is not even absolutely true to say that the distance of 3 miles has definitively been adopted in practice, except, of course, in relation to fishing." Summing up the doctrine he has sustained, he states the following propositions:

"First. The longest range of cannon according to the progress of ballistics at each period is the common measure, the only rational one; it is that of the universal law of nations, which must be observed in the absence of treaty.

"Second. An international agreement for the adoption of a fixed and invariable distance under a definite standard is not desirable.

"Third. It is desirable, however, that the exercise of certain rights of the State be regulated by treaties, as, for instance, fishing, the control and supervision of customs, etc."

Marquis de Olivart. Spanish publicist; member of the Institute of International Law; author of numerous works on international law.

Tratado de Derecho Internacional Publico, fourth edition, 1903, section 41: "The generally practiced international law, repeatedly confirmed by conventional law, limits the extent of territorial sea to the range of cannon, which is considered to be 3 nautical miles; but, as in such case the rule laid down by Bynkershoek is applicable, such geographical limit can not be considered invariable, as at all times it is dependent upon progress in arms of warfare"; and he further states that "the State can extend its sphere of action to a zone wider than 3 miles in order to check contraband trade, especially smuggling carried on by its own people" (p. 332).

L. F. L. Oppenheim, professor of international law at the University of Cambridge and a recognized authority.

International Law, second edition, 1912.

Oppenheim says that "although Bynkershoek's rule, terre potestas finitur ubi finitur armorum vis, is now generally recognized by theory and practice, and consequently a belt of such breadth is considered under the sway of the littoral State as is within effective range of the shore batteries, there is still no unanimity on account of the fact that such range is day by day increasing. Since at the end of the eighteenth century the range of artillery was about 3 miles, or 1 marine league, that distance became generally recognized as the breadth of the maritime belt." In a note to this statement he says: "But not universally. Thus Norway claims a breadth of 4 miles and Spain even a breadth of 6 miles." Further he says that "no sooner was a common doctrine originated than the range of projectiles increased with the manufacture of heavier guns, and although Great Britain, France, Austria, the United States of America, and other States in municipal laws and international treaties still adhere to a breadth of 1 league, the time will come when by a common agreement such breadth will be very much extended."

Jean F. T. Ortolan, French naval officer; his work is a standard authority in international maritime law.

Regles Internationales et Diplomatic de la Mer, second edition, 1853. "The greatest range of cannon is the common standard of measurement adopted by the universal law of nations, which must be observed by all in the absence of treaty." He expresses his opinion that treaties establishing a fixed limit should not "digress far from this latter standard, the danger being of opposing the principles of reason upon which the special control over the territorial sea is based" (p. 351).

Sir Robert Joseph Phillimore, distinguished English jurist, member of the Institute of International Law; held several high positions in England.

Commentaries upon International Law, third edition, 1879:

"The rule of law may be now considered as fairly established, namely, that this absolute property and jurisdiction does not extend, unless by the specific provisions of a treaty or an unquestioned usage, beyond a marine league (being 3 miles) or the distance of a cannon shot from the shore at low tide."

"This is the limit fixed to absolute property and jurisdiction; but the rights of independence and self-preservation in times of peace have been judicially considered to justify a nation in preventing her revenue laws from being evaded by foreigners beyond this exact limit" (p. 375).

Alphonse Rivier, Swiss publicist; professor of international law at the University of Brussels; member of the Institute of International law.

Principes du Droit des Gens, 1896: Takes the position that the marginal or territorial sea "extends so far from the coast as the territorial power can be defended and maintained—that is, to the range of a cannon shot." After mentioning that some nations claim a territory of greater extent for customs purposes, Rivier says: "It is undoubtedly correct that by virtue of the liberty of the sea, and not merely to assure the customs service but also for the sanitary police and for other objects, that national establishments may be placed beyond the limits of the territorial sea properly so called."

Walther M. A. Schucking, German publicist; member of the Institute of International Law; professor of public law in Marburg; author of numerous works on international law.

Das Kustenmeer im Internationalen Rechte, 1897: "Since the necessity of the protection of the coast against a hostile attack is one of the most urgent reasons for the extension of the sovereignty of the adjacent States, we must agree with Bynkershoek that the sovereignty of the State shall extend as far as an effective control can be exercised." He refers to the suggestion of Mr. Seward, our Secretary of State, in regard to a change in the 3-mile limit and says: "But is there any need of an agreement to abandon the 3-mile limit? We think not, because of the 3-mile limit having never wholly replaced the cannon-shot range, nor of it ever having been generally accepted." He later says: "We should rather define the law thus, that every adjacent State has the right to extend its boundaries as far over the sea as it thinks necessary for its protection against disease, smuggling, etc., but it shall not trespass in the limit marked by a cannon's range."

Emmeric de Vattel. Swiss jurist and publicist. His works are famous and have been translated into numerous foreign languages and is still of great value.

The Law of Nations, or the Principles of Natural Law Applied to the Conduct and to the Affairs of Nations and of Sovereigns. Translated into English in 1916. "Each State may regulate as it thinks best the use of those waters as far as the affairs of its citizens either with one another or with the sovereign are concerned; but between nation and nation the most reasonable rule that can be laid down is that in general the sovereignty of a State over its marginal waters extends as far as is necessary for its safety and as far as it can be effectively maintained" (p. 458).

John Westlake, English writer; member of the Institute of International Law; professor of international law in the University of Cambridge.

International Law, second edition, 1910: "Hence that distance, namely, the range of a cannon, then considered to be 3 miles measuring from low-water mark, became a commonplace among authors for the width of the littoral sea, and we may say that the agreement on it as a minimum is universal; no State claims less. As a maximum, the agreement is not universal, and it may be doubted whether it is so nearly such as to make it a rule of international law while the increased range of cannon shot, as well as the increased protection for shore fisheries against trawl nets and other destructive devices, has made the reason for it quite obsolete and inadequate."

The following are from American authors not referred to in Mr. Crocker's book:

Hershey (1912), professor of international law at the University of Indiana, in his "Essentials of International Public Law," says: "There can be no doubt that an extension of the 3-mile limit for all territorial purposes would be desirable. The marine league no longer satisfies the needs of modern requirements for defense. An extension to meet these requirements is certainly favored by an ever-increasing number of publicists and is strongly recommended by the Institute of International Law."

Roland R. Foulke, of the Philadelphia bar, in his treatise on international law, says, section 311: "There is no common agreement as to the distance from the shore to which this jurisdiction extends or as to the starting point from which to measure. The 3-mile, or 1 maritime league, limit was suggested in the eighteenth century, as that was then the range of shot fired from cannon at a fixed position on shore. This limit has been generally assented to, but claims have frequently

been made to jurisdiction over a greater distance," citing Norway, Spain, and the so-called "hovering" statutes of Great Britain and the United States.

Reference is made to sections 2811, 2812, 2813, 2814, 2867, and 2868, Revised Statutes, act of March 2, 1799, and to section 3067, Revised Statutes, act of March 2, 1799, which have never been repealed.

Section 3067 is as follows:

"It shall be lawful for all collectors, naval officers, surveyors, inspectors, and the officers of the revenue cutters to go on board of vessels in any part of the United States, or within 4 leagues of the coast thereof, if bound to the United States, whether in or out of their respective districts, for the purposes of demanding the manifests and of examining and searching the vessels; and those officers, respectively, shall have free access to the cabin and every other part of a vessel."

Mr. SHEPPARD. May I ask the Senator a question before he takes his seat?

Mr. STERLING. Certainly.

Mr. SHEPPARD. The Senator has evidently given this subject very thorough study. I ask him if, in his opinion, Congress has the right to extend the 3-mile limit?

Mr. STERLING. Congress may pass such a law, undoubtedly, but at the risk of international complications, which might subject us to claims for damages because of interference with the vessels of other nations. Let me say to the Senator that I hope arrangements will be made with other nations covering that matter. I think the Secretary of State is in entire good faith endeavoring to make such an agreement.

Mr. SHEPPARD. I trust the Secretary of State will be successful. It is a matter, however, which we can not allow to rest until permanently and satisfactorily settled.

Mr. STERLING. I agree with the Senator from Texas.

The PRESIDENT pro tempore. The Chair holds that the regular order this morning is upon the sections reserved by the Senator from North Carolina [Mr. OVERMAN], and the Chair desires to ask the Senator from North Carolina whether all the amendments reserved by him shall be treated as one amendment and voted upon at one time?

Mr. OVERMAN. Yes, Mr. President; I want them considered as one amendment.

Mr. President, I demanded that this amendment be reserved, not for the purpose of discussion, because in the Committee of the Whole it was very ably and fully discussed, but I regard it as the most important amendment that has been adopted of all the amendments adopted on this tariff bill. It goes a bowshot further than anything that has ever been done by Congress to undermine the great superstructure upon which this Republic was built.

This bill that we are about to pass I think is the most indefensible bill ever passed by any Congress, having no friends except those parties it was framed to serve and for whose benefit it is to be passed, taxing 100,000,000 of people in order to serve 265,000 manufacturers. It is indefensible and most iniquitous, and not only so, but by the adoption of this amendment it will be made absolutely revolutionary. Great Senators, representing a great people, absolutely abdicate the sacred trust reposed in them by a free people to preserve and maintain the Constitution. The power reserved by the people in section 8, Article I, of the Constitution, which says that Congress shall levy all taxes and imposts, this bill proposes to delegate to one man, centralizing in the Executive the power to kill or to make alive. The power to tax is the power to destroy, and this power delegated to the Executive will enable him to reward friends or destroy enemies, to reward his friends especially who furnish the campaign funds.

Mr. President, I think the greatest opportunity ever presented to a President will be presented to Warren G. Harding when this bill is handed to him for his signature, to put aside the purple crown and restore the liberties of the people which this Congress has frittered away so ruthlessly.

I simply wanted to protest not only against this bill, but against this violation of the Constitution of the United States, and in behalf of a great State, representing a great people, always jealous of their rights, desiring to preserve the Constitution and the liberties of the people guaranteed to them, protest against the passage of the bill and most emphatically the adoption of this amendment, and I ask for the yeas and nays upon its passage.

The PRESIDENT pro tempore. The Chair hears no objection to the request of the Senator from North Carolina that the amendments made as in Committee of the Whole as to sections 315, 316, 317, and 317a be treated as a single amendment, and be voted on at the same time.

Mr. UNDERWOOD. If there is to be no further debate, I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. McCUMBER. Mr. President, I want to make only one statement upon these sections. I want to make it because I want to correct what I regard as a misunderstanding—that is, the general idea which seems to be so prevalent in the Senate that the President, under subdivision (b), adopting the American selling price as the standard, may place upon these products any duty, may raise the duty to any extent. There is one limitation beyond which he can not go. In the matter of the levying of additional duties he can not go, under any circumstances, beyond what equalizes the difference in the costs of production at home and abroad, because that is specially provided for.

Mr. ROBINSON. Will the Senator yield?

Mr. McCUMBER. I yield.

Mr. ROBINSON. The President has to determine what constitutes the difference between the costs of production at home and abroad, does he not?

Mr. McCUMBER. He does.

Mr. ROBINSON. His decision on that would be conclusive, would it not?

Mr. McCUMBER. Oh, yes.

Mr. ROBINSON. If he made a mistake, there would be no review of it?

Mr. McCUMBER. That has been argued out already.

Mr. ROBINSON. The whole subject has been argued out. Of course, the Senator understands that it can not be argued out in five minutes.

Mr. McCUMBER. That one subject has not been. When we changed it, so as not to cover the difference between competitive conditions, but the difference between the cost of production at home and abroad, we placed a limitation upon the amount of duty which could be imposed, which was not in the bill as originally reported.

Mr. ROBINSON. Will the Senator yield for a question?

Mr. McCUMBER. Yes.

Mr. ROBINSON. In almost every controversy which has arisen before the Finance Committee and before the Senate about what constitutes the difference in the costs of production at home and abroad there have been very great differences, have there not?

Mr. McCUMBER. We have had very little evidence on that subject, because of our inability to get the costs of production at home and abroad, and therefore, there being very little evidence upon the subject, there was necessarily very little controversy upon it.

Mr. ROBINSON. Mr. President, that does not answer the question as it exists in my mind. I may not have made it clear to the Senator from North Dakota. Throughout the history of tariff legislation in the United States controversies have frequently arisen, both in the Congress and before the committees having jurisdiction of the subject, as to what constitutes the difference in the costs at home and abroad, and those differences have been very great, one party in interest contending for one amount and other parties in interest contending for a very much less or a very much greater amount. So the ascertainment of the difference in the costs of production at home and abroad involves a very complicated investigation, which may not result in an accurate, scientific conclusion.

Mr. McCUMBER. That is true of every other question of fact which must be established by a court or by anybody upon evidence. We have not had that subject considered to any great extent in the consideration of any of the tariff bills, because we have never made a systematic attempt to arrive at the cost of production abroad. Our tariffs have been based upon the selling price of an article abroad, and that is all we have considered in the making up of our tariff bills, and we have compared that with the selling price of the same or similar articles in the United States. Under this bill, as we have now amended it, the Tariff Commission will proceed immediately to ascertain, if it is possible and practicable, the difference in the costs of production at home and abroad.

Mr. POMERENE. Mr. President, sections 315 and 316 have been substantially changed for the better by the action of the Senate in Committee of the Whole, but I want to call the Senate's attention to the provisions of this bill as they now are.

Under section 315, as reported to the Senate by the Finance Committee, it is declared "that in order to regulate the foreign commerce of the United States and to put into force and effect the policy of the Congress by this act intended," the President is given certain powers to investigate the difference in the conditions of competition in trade in the United States and foreign countries. For the first time in the history of tariff legislation it was here attempted not only to have the tariff cover the difference in the costs of production between this and foreign countries, but it was to cover the difference in conditions of competition. In other words, it was sought to pro-

tect the present profits of manufacturers and producers as well as wages in cost of production.

When this section was before the Senate many Republicans as well as Democrats objected to it, and it was so amended as to require the President, upon investigation, to ascertain the difference in the "cost of production." That harks back to the old system of the tariff which looked to the difference in the wage costs in this country and in other countries.

But let me remind Senators that when we passed upon nearly all of the amendments and voted in all of the rates we were acting under the policy defined by section 315, which related to competitive conditions. So it may be assumed, I think, that up until the time we voted upon section 315, on August 11, we had before us the rates which were reported to the Senate by the Finance Committee which looked to the preservation of competitive conditions, as the other rates intended to protect profits as well as costs of production; or, to put the proposition in another form, the rates fixed up to that date related to competitive prices. We fixed, therefore, rates which protected the difference not only in wage costs, but in profits as well. It may therefore be assumed that all of the rates fixed before August 11 protect the profits of the producer as well as the wage costs. Will it mean that the task is before the President to reduce all of the rates approved before August 11? Now the duty of the Tariff Commission will be to look into the difference in wage costs, but we have adopted rate scales which protect the profits as well.

It seems to me, therefore, while the provision as now amended would indicate to the public mind that our purpose was only to cover the difference in wage cost, that we can not conceal the fact that up until August 11 we adopted rates which protected profits as well as the difference in cost of production.

The PRESIDENT pro tempore. The time of the Senator has expired. The Chair understands that unanimous consent has been given to vote upon the four sections at the same time and as a single amendment.

Mr. MOSES. The four sections or the sections reserved by the Senator from North Carolina?

The PRESIDENT pro tempore. The sections reserved by the Senator from North Carolina.

Mr. WALSH of Montana. Mr. President, the provisions under consideration have undoubtedly undergone some improvement from the standpoint of policy. The powers given the President are wisely restricted, but so far as my consideration of them has enabled me to speak, I do not think the provisions now change the legal aspect of the question presented at all. I think the same infirmity inheres in the amended provision as was pointed out in the original amendment proposed by the committee.

I have not had an opportunity to examine with the care which it deserves the elaborate brief prepared by Judge Devries put into the RECORD in support of the provisions, but the cursory examination which I have been enabled to give it does not disclose that it consists of anything more than an elaboration of the arguments, if they may be so called, advanced on the floor in support of the provisions.

I desire to invite attention, however, to two features, namely, that no argument whatever was made on the floor nor does any appear in the brief at all in answer to the contention that it is impossible to ascertain either the differences in competition, the language of the original provision, or the differences in the cost of production in this country and abroad, for the simple reason that the cost of production abroad differs in different countries and differs in the same country as among different producers, and the cost of production in this country differs as between different producers.

Likewise, no argument whatever is made in answer to the suggestion that while the President is obliged to proceed according to a certain rule after he shall have entered upon an investigation, he is under no obligation to begin the investigation. So that it is left entirely in his discretion as to whether the rates shall remain as they are or whether they shall be changed. So in truth and in fact, he is invested with unlimited discretion with respect to the change of the rates. It will be understood that that feature is not changed by the amendments which the original provisions have undergone.

All in all, Mr. President, I think this is a most unwise power to confer upon any executive or administrative officer. It is a surrender of the most sacred power invested by the people in the Congress. I believe that provision was taken in the preparation of our Constitution to guard against this improvident delegation by placing it beyond the power of Congress thus to delegate the power to any executive officer.

Mr. BORAH. Mr. President, of course, it is impossible to discuss the proposition in five minutes even if it were necessary to go into it. It has been very fully discussed by very able Members of the Senate. I only want to say that after reading the brief in favor of the constitutionality of the proposition I am unable to reach that conclusion myself. It is so clearly and distinctly in contravention of the constitutional principles of our Government that I can not give my support to it and I can not give my support to the bill if it is in the bill. I would not vote for the bill, however, for other reasons.

But, aside from the constitutional proposition, it is to my mind the most serious departure from a wise policy with reference to tariff making that we could well conceive of. I should be very glad to see a commission created and exhaust the powers of Congress upon that commission and enable it to go as far as it is possible for us to send it in the way of establishing facts and upon those facts recommending rates; but, even aside from the constitutional question, I am not willing to turn over to another department of the Government, which is clearly and distinctly a political department of the Government, the power to deal with these important matters. As I said, it is impossible to discuss it at this time. I simply wanted to state my position.

Mr. HEFLIN. Mr. President, I heartily concur in what the Senator from Idaho [Mr. BORAH] has said. There is no Member of this body who could be elected by the people of his State if he were to tell them that he was going to vote to take the taxing power out of the hands of Congress and put it in the hands of the President. I feel that it is an abuse of the confidence, a violation of the trust that the people have reposed in us. When they elected us they never dreamed that their servants would undertake to do what is undertaken to be done here to-day.

Mr. President, the tariff barons come down here with rates which they have fixed, rates which they say will give them profits. They submit those rates to leaders of the Republican Party, and the Republican leaders in the main have put those rates in the bill. Now they are not satisfied with that; they are not satisfied with having their will executed by the Members of this body. They want to put it in the hands of one man to raise those taxes, to increase their profits when Congress is not in session. I do not wonder at the Senator from Idaho [Mr. BORAH], who is a big, brave, and able American, for saying to his colleagues and to the country that if that provision goes in the bill he will not support it.

Mr. President, this is one of the most dangerous propositions that has ever been submitted to Congress since I have been a Member. Senators, what would your constituents do if you should stand before them and say to them, "If you elect me to the Senate I am going to vote to confer the taxing power upon one man. Instead of leaving it in the hands of 435 Members of the House and 96 Senators, two from each sovereign State, I am going to vote to concentrate this power in the hands of one man, that he may use it as he pleases when your Congress is not in session."

Why, you would not get enough votes to count. The tariff barons can flock about the White House if this amendment is adopted, annoy the President, and persistently insist that this rate and that rate be increased, and you are going to confer upon the President the power to tax the American people by use of the Executive order, and you do it in violation of the Constitution of the United States. What are we coming to in this great legislative body? One hundred millions of Americans with their Senate sitting in the Capitol, betraying the people, surrendering their rights, conferring upon the Chief Executive the right to tax the American people, the right to increase the profits of the tariff barons who contribute money to the campaign fund of the Republican Party.

Mr. President, I did not want this provision to be adopted without entering my humble protest against this further betrayal of the American people.

Mr. LENROOT. Mr. President, the pending section does not, in my judgment, delegate to the President power to tax the American people. The section makes a declaration that the rate of duty shall cover the difference in the cost of production at home and abroad. Then it merely delegates to the President the ascertainment of the fact as to what is the difference in the cost of production and that thereby becomes the rate, not fixed by the President, but fixed by the Congress itself.

I am very frank to say that I wish it might have been a little differently worded. I hope when it goes to conference it will be differently worded, so that there shall be a flat legislative declaration that Congress itself fixes the rate within the limits prescribed as determined by the difference in the cost of production at home and abroad. Then, in my judgment, it would come clearly within the doctrine of Field against Clark that there is no delegation of legislative power

but merely a proper delegation of the ascertainment of facts. When those facts shall have been ascertained, the legislative will applies, not in the discretion of the President, but when those facts are determined, then Congress says the President must proclaim the rate of duty fixed by Congress, namely, a rate to measure that difference.

Mr. President, just one other word in connection with this paragraph. To my mind, this is one of the most saving provisions of the pending bill. The Senator from Idaho [Mr. BORAH] has stated that with this provision in the bill he can not vote for the bill. I occupy just the contrary position. If it were not for this paragraph, it would be difficult for me to vote for the bill.

Mr. BORAH. May I ask the Senator a question?

Mr. LENROOT. Yes.

Mr. BORAH. I only wish to say that the Senator assumes that the power will be exercised in behalf of a better bill, but suppose it should be exercised in behalf of a worse bill?

Mr. LENROOT. Mr. President, I am not going to assume, as the bill is now framed, that the Tariff Commission will do otherwise than act judicially in the ascertainment of the facts, and I am going to assume that the President will accept the facts as found by the Tariff Commission.

Mr. President, I am going to vote for this bill, although I think there are many excessive rates in it. There will, however, be an opportunity in conference to frame a bill that will be in accord with Republican principles, eliminating from the bill excessive rates and substituting therefor rates that will meet with the approval of the American people. With that hope, I shall vote for the bill, but if this paragraph should finally be eliminated, if the excessive rates which are now in the bill are not reduced in conference, when the conference report comes before the Senate, if the bill does not then conform to what I believe is in accord with the Republican doctrine of protection, I shall exercise the liberty and the right and perform the duty of voting against it.

Mr. UNDERWOOD. Mr. President, I discussed this feature of the bill some days ago, and I did not intend to say anything further this morning; but I am not going to allow the vote to come after the statement which has just been made by the Senator from Wisconsin without challenging it from my viewpoint.

The Senator from Wisconsin has stated that this bill does not confer the power of taxation on the President, for, he says, the Tariff Commission is to ascertain the cost of production here and abroad, and the President must fix the rate to measure the difference in the cost of production. Theoretically that may be a statement of the case, but, practically speaking, it leaves the President without any great limitations on his power, with the absolute power to fix the rates of taxation within his own discretion within the limitation, of course, that he can not increase or decrease rates more than 50 per cent of those which are contained in the bill.

In the first place, the Tariff Commission is authorized to investigate and report the facts to the President, but there is nothing in the proposed legislation that confines the President of the United States, in determining what shall be done, to the facts reported by the commission; in fact, it has been stated on the floor—and I think possibly it was the Senator from Wisconsin who made the statement—that the President not only could consult the Tariff Commission but he could consult many other boards of the Government. Indeed, he may consult anybody he desires. When this question comes within the chambers of the Executive office, he may consult the men who are interested in the business; he may consult the manufacturers, or he may consult the importers who desire the rates reduced. On their conclusions, he may fix the tax. However, it is idle to say, when so great a range of difference in the cost of production here and abroad exists, that the discretion of fixing the tax does not rest in the mind of the Executive.

Mr. President, I sat on the Ways and Means Committee of the House of Representatives for many years; and I have heard the best business men in the country discuss these very details; men who were honest; men who, possibly, were prejudiced in favor of their own business but who were absolutely honest; and yet I have heard those same men time and time again vary over 100 per cent in their estimates as to the difference in the cost of production on a particular article. That is necessarily the case.

Take the pig-iron business. I think the cost of production here in the best furnaces and the cost of production abroad in the best furnaces is about equal; but there is no limitation made in this proposed legislation as to what basis the President shall take in determining the difference in the cost. If he is to take the weaker furnaces, the dilapidated furnaces, in the United States, those furnaces which can only run when the prices of the commodity are pyramided and on extraordinary occasions, and then, on the other hand, go to the foreign market and take the best, the newest, and the most efficient furnaces and make the comparison from the standpoint of our weak industrial children with the strongest and most virile industrial children abroad, of course, he would find a great difference in the cost of production. So that in the end the real basis of fixing these taxes without limitation, except that they shall not be raised or decreased more than 50 per cent of the rates provided in the bill, lies in the hands of the President of the United States to exercise as he sees fit.

The PRESIDENT pro tempore. The time of the Senator from Alabama has expired. The question is on concurring in the amendment made as in Committee of the Whole.

Mr. OVERMAN. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Ashurst	Frelinghuysen	McLean	Sheppard
Ball	Gerry	McNary	Shortridge
Borah	Glass	Moses	Simmons
Broussard	Gooding	Myers	Smith
Bursum	Hale	New	Smoot
Calder	Harreld	Newberry	Stanfield
Cameron	Harrison	Nicholson	Stanley
Capper	Heflin	Norbeck	Sterling
Colt	Hitchcock	Oddie	Sutherland
Culberson	Jones, N. Mex.	Overman	Swanson
Cummins	Jones, Wash.	Pepper	Trammell
Curtis	Kellogg	Phipps	Underwood
Dial	Kendrick	Pomerene	Wadsworth
Dillingham	Keyes	Ransdell	Walsh, Mass.
du Pont	Lenroot	Rawson	Walsh, Mont.
Edge	Lodge	Reed, Mo.	Warren
Ernst	McCumber	Reed, Pa.	Watson, Ga.
Fletcher	McKellar	Robinson	Watson, Ind.

The PRESIDENT pro tempore. Seventy-two Senators having answered to their names, there is a quorum present.

Mr. REED of Missouri. Mr. President, not only is it true, as was stated by the Senator from Alabama [Mr. UNDERWOOD], that it is impossible to ascertain differences in cost of production between the mills of our own country, but it is even more difficult to ascertain the difference in cost of production in the mills abroad. It follows that these differences which exist between the plants of the various countries can not be reconciled under any rule laid down in the bill. Are we to take the highest cost of production or the lowest cost, or are we to take the average cost? If we take the highest cost of production here and the lowest cost of production in Europe, we will arrive at one result; if we take the lowest cost of production here and the highest cost of production abroad, we will arrive at an entirely different result. If we take the highest cost of production here as the basis of comparison, then our people will be taxed for the benefit of the poorest mill in the United States, and our efficient mills will be granted protection far beyond their needs. If we take the difference between the average cost of production here and the average cost of production there, then the purposes of the bill as proclaimed by its advocates will fail as to all those American manufactures which are above the average line in production costs.

So that, Mr. President, we have set up an impossible rule, an impossible task. Moreover, the difference between the cost of production in one foreign country and the cost of production in another foreign country multiplies the difficulties I have referred to and creates a labyrinth through which human intelligence can not find its way.

It has been claimed here that Germany produces much more cheaply than England. If that is true, how is the rule of the bill to be applied? Shall we apply it so that it will fix a special duty upon articles made in Germany? If we do that, we violate at once our trade treaties with that country. If we avoid violating our trade obligations under our treaties, then we at once are compelled to take the German standard, and in that case the tariff might be absolutely prohibitive as to the English mill. So that we set up an impossible task, an insoluble task, and we say that when that task is accomplished the President may act.

Mr. President, boiled down, all this bill means is that the President may do whatsoever he thinks he wants to do, or else he can do nothing.

The Senator from Wisconsin [Mr. LENROOT] makes a very remarkable statement. It is that this bill must be changed in the committee of conference or he will not support it. If that is true, then the Senator is now proposing to delegate to the committee of conference the writing of the bill instead of writing it here in the Senate.

The PRESIDENT pro tempore. The time of the Senator from Missouri has expired.

Mr. JONES of Washington. Mr. President, the statement of the Senator from Wisconsin [Mr. LENROOT] expresses very largely my views with reference to this bill, and I take the liberty of adopting, in the main, the statement of his views as a statement of mine on this bill. I want to add just a word or two to it.

I believe the people of the country are becoming much dissatisfied with the methods of Congress in framing tariff bills. They are realizing more and more the impossibility of Congress properly fixing tariff rates upon all the products and affecting all the industries of this country. It is impossible for any committee of Congress or for Congress itself in the space of two, three, four, or six months or longer to acquaint itself with the details of all the businesses in this country, and yet that is what Congress must do if it would act wisely upon tariff rates. Congress can and must determine principles and standards, but it can not fix and should not spend its time in trying to fix the actual rates that shall be put on a pound of potash or a yard of cloth.

Mr. GOODING. Mr. President——

Mr. JONES of Washington. I am sorry, but I can not yield to the Senator.

Mr. President, I hope to see the test made as to whether or not the delegation of power in this bill is constitutional. I believe that it is; and if it is found to be constitutional, then, in my judgment, it is inevitable that Congress, instead of spending its time for months and even years haggling over rates and whether this rate shall be 2 cents or 3, will place permanently within some governmental agency the ascertainment and fixing of these rates upon principles laid down by Congress itself. The people will demand this and insist that Congress spend its time on more important matters. That body, in my judgment, should be the Tariff Commission. The responsibility should not be placed upon the President but it should be placed upon the Tariff Commission, a permanent body that should give all of its time to studying and ascertaining the facts and whose members should make it their life work to make themselves expert in such matters. Congress can not go into as much detail as it deems wise to lay down the principles that shall govern this body in determining the rates. It should be most careful in this, and it can well spend a month or two in determining such rules and standards. In taking this action Congress is abdicating its right, its power, or its duty to levy and fix taxes. If it fixes in detail the principles that shall govern and the standard that shall control, we will get far better results, act with greater wisdom, and far better serve the people's interests and welfare than to continue as we have been doing in the framing of tariff bills and spend our time wrangling over rates about which the great majority of us know nothing——

Mr. WATSON of Georgia. Mr. President——

Mr. JONES of Washington. I can not yield to the Senator. I have only two or three minutes. I should be glad to yield if I had the time.

Mr. President, I shall vote for this bill, as I have said, for practically the same reason that the Senator from Wisconsin [Mr. LENROOT] stated. I think this provision and the foreign-trade zone provisions are the two great, important provisions of this measure. I will go further and say that these provisions alone justify the passage of the bill. The ultimate results that will come from them if they become law far transcend any benefits that may come from other provisions of the bill. Many of the rates in this bill may be too high; some of the rates may be too low; but, taking it on the whole, I believe that it is a better measure to meet the situation that confronts the industries of this country at this time than the existing tariff law.

I sincerely and earnestly hope that the ultimate result will be that we will have a permanent body established to fix rates within the limits of the rules and in accordance with a standard that Congress, after very careful consideration, shall adopt and declare.

Mr. ROBINSON. Mr. President, this bill has been indicted, expressly and by implication, by Senators on the other side of the Chamber, some of whom have announced their purpose to vote for it in the hope that it will be improved in conference. The bill has been under consideration for almost a year and a half. The Senator from Idaho [Mr. BORAH] announces that unless the provisions in the bill authorizing the President to adjust rates fixed by Congress to meet standards prescribed in the bill are eliminated he will vote against the bill. Those provisions will not be eliminated, and therefore it may be expected that the Senator from Idaho [Mr. BORAH] will vote against the bill.

The Senator from Wisconsin [Mr. LENROOT] has announced that unless the bill is reformed in conference he will vote against the conference report. It is a pitiable confession of the failure of the majority to write a satisfactory tariff bill after the most prolonged efforts to accomplish that end that have been put forth by any party in the history of the country.

I have no disposition to impose limitations on the action of the Senator from Wisconsin, but I respectfully suggest to him that the Constitution having reposed in the Congress the obligation to prescribe tariff duties, and the Senate having failed to reform this bill according to the standards that he has fixed in his own mind and conscience, it would be wiser and safer for him to vote against the bill than to rely upon the conference committee to reform it to meet his ideas.

The Senator from Washington [Mr. JONES] has, in substance, declared that after the Senate has had this bill under consideration for many months, the Finance Committee having reported 2,087 amendments in the beginning and a large number subsequently, in his opinion, it is impossible for Congress to write a tariff bill that anyone can justify. He expresses the hope that in the future tariff bills will be written by some other body than the Congress. The Constitution makes it the duty of Congress to prescribe tariff rates. With all due respect to those who, in repudiating in fact this bill, apologize for voting for it, I suggest that the way to secure a tariff bill which is acceptable to the people of this country and to their standards is to vote against bills which do not rise to those standards. This bill ought to be defeated because it increases to unreasonable proportions tariff-tax burdens relating to the necessities of life.

Mr. GOODING. Mr. President, I am of the opinion that the sooner we can come to a show-down on the great principle of protection within the Republican Party the better off the Republican Party is going to be, and the whole country. When Senators can stand upon this floor, as they do, and advocate rates which in the minds of the Finance Committee are excessive, as the Senator from Wisconsin [Mr. LENROOT] did and the Senator from Washington [Mr. JONES] did, and then stand upon this floor and serve notice that unless other schedules are reduced in conference they are going to vote against this bill, I think those Senators are entitled to serve notice upon the Finance Committee of the rates they have in mind, so that this question may be carried to the country. I think we ought to come to a show-down as far as the great principle of protection is concerned. We have had some support on the other side, and perhaps we could do a little trading without any injury to either party. I consider it mighty unfair, Mr. President, for Republican Senators to make such a threat against those who are going to handle this bill in conference—that unless reductions are made they will vote against the bill.

I want to make the statement again that I do not think the manufacturers of this country, under foreign valuation, have any protection at all when they come into competition with Germany and Austria with their depreciated currency. The sooner we come to a show-down and the country knows where we stand and the people of the respective States know where we stand on the great principle of protection the better off we all will be.

I am ready to go to the bat and meet the issue.

Mr. SMOOT. Mr. President, I gave notice that I would move to strike out the provision for 60 days, in section 315, and insert 15 days. That will be found on the fourth page, the fifth line, of the amendment submitted to section 315a by the Senator from North Dakota [Mr. MCCUMBER]. It is simply to strike out 60 days and insert 15 days.

Mr. UNDERWOOD. I do not understand the proposal the Senator has made. I have not the papers before me.

Mr. SMOOT. I thought the Senator was in the Chamber when we discussed it. I will read it. It provides that "such rate or rates of duty shall become effective 15 days after the said proclamation of the President," and so forth. That is, instead of 60 days, I propose 15 days.

Mr. UNDERWOOD. I do not desire to detain the Senate on the question. I suppose it is open to debate.

The PRESIDENT pro tempore. The Senator from Utah offers it as an amendment to this section?

Mr. SMOOT. I do; to strike out "60" and insert "15." This applies only to the rate or rates of duty when the proclamation has been made and it applies only to the coal-tar products. If it were 60 days, the importer could perhaps get sufficient of the goods into this country to furnish America for two years.

Mr. UNDERWOOD. I can see the Senator's standpoint, and there may be a good deal in it from his standpoint. On the other side is the standpoint of general business. When you

change rates of duty, you change competitive values and business conditions, and 60 days is not an unreasonable notice to give business of a change of rates which may go to the very vitals of all the business. There are two sides to it, I recognize.

The PRESIDENT pro tempore. The amendment is not before the Senate, and it ought to be reported by the Secretary. The Secretary will report the amendment to the amendment.

The READING CLERK. In paragraph 315, in the original amendment as presented by the Senator from North Dakota, on page 4, line 5, the Senator from Utah proposes to strike out the word "60" and insert "15," so that it will read:

Such rate or rates of duty shall become effective 15 days after the date of the said proclamation of the President, whereupon the duties—

And so forth.

The PRESIDENT pro tempore. The question is upon the amendment offered by the Senator from Utah to the amendment.

Mr. SMOOT. This applies only to coal-tar products, and nothing else. It is in that section.

Mr. KELLOGG. Mr. President, I have heard the speech of the Senator from Idaho [Mr. GOODING], in which he proposes to read out of the Republican Party every man who votes for lower rates than he thinks should be placed in this bill. I want to say to the Senator from Idaho that I voted for a great many reductions, because I thought the rates were too high, and I am going to vote for some more. Yet I am a protectionist, and I am perfectly willing to be responsible to my people in the State of Minnesota.

I think a Republican can be a protectionist and vote for some rates lower than have been advocated by the Senator from Idaho, and I am going to do it. I shall probably vote for this bill. I think the provision in the bill which allows the President, through the Tariff Commission, to arrive at a real scientific basis of cost of production, is a good provision, and I am inclined to think that if it was not in the bill I would not vote for it at all. But when I believe a rate is too high I am going to vote to reduce it, and I hope I shall get a chance to vote for some more reductions.

Mr. BURSUM. Mr. President, I desire to ask the Senator from Utah what the object of this amendment is, what purpose it will serve?

Mr. SMOOT. After the President makes a proclamation as to a rate affecting coal-tar products that rate shall go into effect 15 days after the proclamation, instead of 60 days. In other words, it is to prevent any coal-tar products coming into the country, after such a proclamation, in such quantities as to destroy the manufacture of any particular items. In 60 days they could get the product in from Germany, and perhaps enough of a special kind to destroy the local market for two or three years.

Mr. BURSUM. What about the investigation? Of course, it can not be made in that time.

Mr. SMOOT. That could not be done, because nobody will know whether the President will increase the rate or decrease the rate.

Mr. BURSUM. The investigation, of course, can not be curtailed.

Mr. SMOOT. There is no curtailment of the investigation.

Mr. BURSUM. I do not think we ought to change it from the way we have it.

Mr. SMOOT. I will say to the Senator that it is changed in conformity with the ideas of his closest friends, who have asked it. The only complaint they had was that if the time is made 60 days, the foreign manufacturers could get goods into this country in sufficient quantity to destroy a particular industry, and if the Senator understood it he would see that it was just exactly what he was trying to do.

Mr. BURSUM. Of course, I take it that the industry is thoroughly protected by the rates we have established.

Mr. SMOOT. All that will be in conference, and this provision will be in conference. But if it is not amended to 15 days, it will not be in conference. The object is to try to fix it so as to conform to the wishes of the people in whom the Senator is interested.

Mr. BURSUM. And it will have no bearing on the investigation?

Mr. SMOOT. None whatever.

Mr. BURSUM. Very well.

Mr. McCUMBER. Mr. President, I shall address myself for a minute to the amendment of the Senator from Utah, and my remarks will be as pertinent to that 15-day proposition as the remarks of other Senators have been to the matter that was just discussed.

I have no objection to any Senator selecting any political party, new or old, as his standard. I do not object to those who, while claiming to be protectionists, are, to my mind, far from protectionists. That is a difference of opinion. They can have their views and I will have mine.

But I do get a little bit tired of those Senators who appear before the committee and insist on and request rates which the committee consider are unconscionable, and attempt to force them down the throats of the committee, coming up and complaining about rates being too high in other schedules, when the rates, measured by the ad valorem, in many instances are nowhere near as high as those which they have advocated.

Mr. GOODING. Will the Senator yield?

Mr. McCUMBER. I would rather not yield. I want to say another word. Of course, we have tariff for revenue only Republicans on this side of the Chamber, and we have protectionist Democrats on the other side of the Chamber. They are all entitled to their own views, and I do not think that any Senator has a right to criticize another for his particular views as to what ought and what ought not to be protected. Each Senator necessarily looks after what he regards as the interests of his own people.

I want to remind those Senators who think that there are high rates in this bill that the average ad valorem rates in this bill will be lower than in any Republican tariff bill that has ever passed. They can, if they see fit, abandon the protection ship, as a great many abandoned it and gave us the Wilson-Gorman tariff bill, but, Mr. President, the country did not need more than four years to come back to its senses, and it did come back with a vigor that might be a lesson to those who think that because some rates in this bill are not according to their views they will abandon the Republican policy of protection.

We need no excuse for this bill. There is not an item in it that any good Republican who is in heart a protectionist can not defend before any person upon the face of the earth who wants to get the truth and who does not desire to govern his course entirely by his prejudices. As it will go to the conference to-day it has been cut almost in two, compared with the rates of duty passed by the House, and the rates are lower, figured on an ad valorem basis, than in any protective tariff bill that has ever passed Congress.

Mr. BORAH. Mr. President, the difficulty which confronted the Finance Committee at the time it undertook the task of framing a tariff bill was perhaps the most pronounced difficulty which ever confronted a committee of the Senate. I do not think that under the conditions as they obtain at the present time it is practically possible to formulate a tariff bill upon the true principles of a protective policy.

There were no facts, in my judgment, upon which a bill could be framed. The best evidence of that is the method and the manner in which this bill has been discussed and treated here in the Senate. From day to day the committee would offer amendments, and offer them upon the supposition and upon the statement that the change of conditions had necessitated the change in proposed duties. The able Senator from Indiana stated very frankly here on the floor that in view of changing conditions it was absolutely necessary for the Finance Committee to suggest amendments from day to day. Under such conditions it seems self-evident that it would be practically impossible to frame a permanent measure upon the true principle of protection.

Therefore, Mr. President, the difficulty which confronted the committee being one which was almost insuperable, I am not disposed to make a personal quarrel with the committee or any member of the committee for having failed to do that which I think is practically impossible at this time, to wit, make a tariff bill based upon the real principle of the Republican theory of protection.

I trust that the amending and the modifying of the rates of the bill will continue until the conference report shall have been made up, and that when the conference report comes back we will have a much better bill than we have now, as it is now conceded that we have a much better bill than we had two months ago.

That will not be by way of disparagement of anybody's ability; it will be by reason of a condition which has confronted us from the beginning, a condition which is here, and which it is not within the power of the human mind to remedy. The relentless march of events must remedy that condition.

But, Mr. President, I am unable to vote for the bill as it goes to conference for the simple reason that I feel that my vote should be in accordance with my earnest desire that the bill be remedied, and if I should vote to indorse it as it now stands I would have no right to complain of the committee if

it brought back here a bill in precise accord with its present terms. I look, therefore, upon my vote against the bill at the present time as it is up for passage the same as I look upon my vote upon certain schedules. I regard it as one step in the process of making the bill. I vote that way because I record my earnest desire that the committee may continue to use its great ability, its industry, and its outlook for the betterment of the bill as it has done for the last two months. If I had voted for these duties as a majority have, of course I would vote for the measure.

Now, it is said that this is a bill based upon Republican principles of protection. It is not, as I understand it. I make no profession of my partisanship or my loyalty to the Republican Party. Others can do that, and especially my own constituency can judge it. That question is to be settled in another form. But I had always supposed that I understood the principles of protection as advocated by the Republican Party. As I understand them, I have voted for them continuously and persistently in the bill in so far as it was possible to acquire the facts upon which to base an opinion at all. When there were no facts I have given the doubt to the more reasonable rule. The theory of protection is based upon the supposition that we shall formulate a duty here which would represent the difference in the cost of production at home and abroad, and that after that is represented we place domestic manufacturers and those abroad upon an even scale and say to them, Now you can compete for the customers. We are not supposed to build a wall around the United States which gives to the producer in the United States a monopoly of the American market, which enables him to charge all which conscience or the lack of conscience will permit. It has always been my understanding of protection that we keep alive competition but that we favor the American manufacturer or producer to the extent of starting him off even, as it were, by giving him a duty respecting which he must pay in the way of increased cost of production. But this bill is prohibitory of all foreign importations as to many duties upon articles which the people of this country must have in order to live.

Mr. HEFLIN. Mr. President, the amendment gets worse. The Senator from Utah [Mr. SMOOT] has offered a proposition that makes the proclamation of the President go into effect in 15 days. What is that done for? It is to protect the tariff barons in the United States. If a tariff tax is to be raised the increase will go into the profits of the tariff barons, and thus the people are to have snap judgment taken upon them. There are only 15 days, two weeks, before the rate goes into effect.

Mr. SMOOT. Mr. President——

Mr. HEFLIN. I yield to the Senator from Utah.

Mr. SMOOT. I merely want the Senator to know that that provision applies to coal-tar products and to nothing else in the bill.

Mr. HEFLIN. Mr. President, that is done in order that when the people who manufacture the product besiege the President and ask him to increase the rate, it may be done so quickly, done overnight, that the consuming mass of the American people will not have the benefit of the competition that would be produced by the bringing in of such material at such a time. It is done to practically place an embargo against such necessities, to build a wall around the American people, to leave the consuming mass of our people at the mercy of those who would have a monopoly in that particular thing. That is the effect of the amendment.

Senators on the other side of the Chamber chide the Senator from Idaho [Mr. BORAH]. Mr. President, it is well for those who still remain in the Republican Party, who still believe in the principles of Lincoln, that there are such men in the party as the Senator from Idaho.

I recall another time when he gave his party timely warning. That was when the Republican convention of 1920 sat in Chicago, and the effort was made to buy the presidential nomination, and he made a speech and told his party and the country that he was reminded by what he saw in the convention of the days when the emperorship of Rome was sold to the highest bidder. It was BORAH who cried out against it. It was BORAH who was trying to keep his party clean. It was BORAH who was denouncing the power of boodle in a convention of his party. I say that he rendered the service of a patriot when he did it. When he stands here to-day and sees his party betraying the people, betraying the trust committed to it, giving over to the President the taxing power of the Republic, he is again rendering signal service to his party and his country. Let them criticize him, those who want to serve their predatory masters, and let him continue to cry out against the betrayal of the American people. The sober, serious senses of the people can be relied upon to stand by a public servant who is able and fearless, and I predict that Senator BORAH will be here serving his people long after some others have gone out of this legislative body. Senators are face to face with the proposition here to-day as to whether or not they will protect and safeguard the constitutional rights of the people or surrender them into the hands of the tariff barons of the country.

Mr. McCORMICK. Mr. President——

Mr. HEFLIN. I yield to the Senator from Illinois.

Mr. McCORMICK. I hope the Senator will continue his apostrophe to the Senator from Idaho so as to include his warning to the country that the people would repudiate anyone who supported the League of Nations.

Mr. HEFLIN. Mr. President, I am glad to be interrupted by the Senator from Illinois, even to hear him say "Listen to my tale of woe." I venture to remind him of the old familiar lines:

If you would have me sing and play as once I played and sung,
Take this time-worn lute or ("loot") away and bring one newly strung.

[Laughter.]

The PRESIDENT pro tempore. The time of the Senator from Alabama has expired.

Mr. WALSH of Montana. Mr. President, in view of the lecture just read by the distinguished chairman of the Finance Committee to his Republican brethren who seem to evince some dissatisfaction with the bill, I read the following from the New York Times of this morning:

From first to last the Republicans have neglected nothing that could bring disaster upon their party. They have deliberately and ostentatiously plundered the mass of the people. The people will return their thanks in November. How cheering it must be to Mr. McCUMBER and his fellow sages to read Republican appreciations of their work such as this testimonial from the Boston Transcript, so long so close to the gracious bosom of HENRY CABOT LODGE:

"It would be hard for Congress to draft a worse tariff than that to be sent to conference by the Senate this week. It ought to be easy to purge the bill of some of its more flagrant schedules in the wake of the rebuke which we hope and believe the party in power will receive at the polls next November."

The PRESIDENT pro tempore. The Chair gives notice that from this time forward he will enforce the rule which requires debate to be confined to the question before the Senate. That provision has been violated frequently. The question is upon agreeing to the amendment proposed by the Senator from Utah [Mr. SMOOT] to the amendment made as in Committee of the Whole.

On a division the amendment to the amendment was agreed to.

Mr. JONES of New Mexico. Mr. President, I have heard some Senators express themselves as being dissatisfied with the bill, but that by reason of this provision of the bill they feel that they can safely support the measure as a whole.

Mr. McCUMBER. Mr. President, I rise to a point of order.

The PRESIDENT pro tempore. The Senator from North Dakota will state the point of order.

Mr. McCUMBER. I inquire what amendment is before the Senate?

The PRESIDENT pro tempore. The amendment made as in Committee of the Whole is pending.

Mr. McCUMBER. What is the question?

The PRESIDENT pro tempore. The question is, Will the Senate concur in the amendment made as in Committee of the Whole as amended in the Senate?

Mr. McCUMBER. I hope the Chair will enforce the rule.

Mr. JONES of New Mexico. Mr. President, the provision now before the Senate is used as the justification for the support of the bill. It confers upon the President the power to change rates. The kind of power conferred upon the President has been very distinctly limited, to change rates equalizing the difference in the cost of production at home and abroad. That is the only basis, and it has been said, even by supporters of the measure, that if it were not so definitely stated in the law it would be unconstitutional and could not be supported.

I ask Senators to consider just what the provision means, the ironclad difference in the cost of production at home and abroad. It has already been called to the attention of the Senate that there are differences in the cost of production among the industries of a country both at home and abroad. There are differences in the cost of production as between the different countries abroad. I want to call attention to the fact, as I have previously done, that as to many industries it is impossible to ascertain the cost of production either at home or abroad. As to many commodities there must be an arbitrary allocation.

I have previously used the illustration of ascertaining the cost of production of wool and the cost of production of mutton. The person does not live who can by any definite method ascertain those costs here or elsewhere. There must be an arbitrary allocation of so much to the cost of production of

wool and so much to the cost of production of the mutton or the meat. So that practically all—I was about to say practically all, but not all; there are some simple industries in the country where they are engaged in making only one item, but that is not the rule; it is not representative of American industry. There are by-products, there are joint products, and wherever that occurs there must be an arbitrary allocation of the cost. That cost can not be ascertained by any scientific or mathematical means. There is no question they are under this rule, and whether the industry is one which should be fostered or not makes no difference.

The PRESIDENT pro tempore. The time of the Senator from New Mexico has expired. The question is, Will the Senate concur in the amendments made in sections 315, 316, 317, and 317a as amended in the Senate?

Mr. OVERMAN. I ask for the yeas and nays, Mr. President.

The PRESIDENT pro tempore. The yeas and nays have been ordered, and the Secretary will call the roll.

The reading clerk proceeded to call the roll.

Mr. JONES of New Mexico (when his name was called). I transfer my general pair with the Senator from Maine [Mr. FERNALD] to the Senator from Nevada [Mr. PITTMAN], and vote "nay." I ask that this announcement of the transfer of my pair may stand for the day.

Mr. CURTIS (when Mr. LA FOLLETTE's name was called). The senior Senator from Wisconsin [Mr. LA FOLLETTE] is paired with the Senator from Michigan [Mr. TOWNSEND]. The Senator from Wisconsin, if present and permitted to vote, would vote "nay," and the Senator from Michigan, if present and permitted to vote, would vote "yea."

Mr. McCUMBER. (when his name was called). I transfer my general pair with the junior Senator from Utah [Mr. KING] to the Senator from Washington [Mr. POINDEXTER] and vote "yea."

Mr. UNDERWOOD (when Mr. PITTMAN's name was called). The senior Senator from Nevada [Mr. PITTMAN] has been detained from the Senate on account of sickness. He has had to undergo a surgical operation. He wired me that he expected to be able to return to the Senate in time to vote on the pending bill, but this morning I am in receipt of a telegram from his surgeon, which I desire to read to the Senate in reference to his absence. The telegram reads:

BATTLE CREEK, MICH., *August 17, 1922.*

Senator OSCAR UNDERWOOD,
United States Senate, Washington, D. C.:

Senator KEY PITTMAN underwent a minor operation here at the sanitarium on the 10th instant. He has not yet fully recovered, and traveling at this time would be hazardous. I have urged him to remain two or three days longer.

W. F. MARTIN.

Mr. WATSON of Georgia (when his name was called). I have a general pair with the senior Senator from California [Mr. JOHNSON]. If he were present and permitted to vote, he would vote "yea," and if permitted to vote I should vote "nay."

Mr. WATSON of Indiana (when his name was called). I have a general pair with the senior Senator from Mississippi [Mr. WILLIAMS], which I transfer to the junior Senator from North Dakota [Mr. LADD] and vote "yea." I wish this notice of this transfer to stand throughout the day.

The roll call was concluded.

Mr. EDGE. I transfer my general pair with the senior Senator from Oklahoma [Mr. OWEN] to the junior Senator from Vermont [Mr. PAGE] and vote "yea."

Mr. POMERENE. I desire to announce that my colleague, the junior Senator from Ohio [Mr. WILLIS], is detained because of serious illness in his family. I ask that that announcement may stand for the day. I have a pair with my colleague, but I am not able to secure a transfer, and I therefore withhold my vote. If permitted to vote, I should vote "nay."

Mr. HARRISON. Mr. President, on this vote I have a pair with the junior Senator from West Virginia [Mr. ELKINS]. That Senator is unavoidably detained from the Chamber, but I understand that if he were present he would vote "yea." I should vote "nay," if permitted to vote.

Mr. ROBINSON. I desire to announce that my colleague, the junior Senator from Arkansas [Mr. CARAWAY], is necessarily absent. On this vote and on all other votes on the bill and amendments thereto he is paired with the junior Senator from Illinois [Mr. MCKINLEY].

Mr. UNDERWOOD. The senior Senator from Georgia [Mr. HARRIS] has gone to Europe with a party to attend an international conference. He asked me when he left here to announce that on this vote he is against the pending amendment and is also against the passage of the bill. He is paired with the junior Senator from Missouri [Mr. SPENCER], who would vote for the proposition. I wish the RECORD to show that.

Mr. CURTIS. I am requested to announce that the junior Senator from Illinois [Mr. MCKINLEY] is paired with the junior Senator from Arkansas [Mr. CARAWAY]. If present and permitted to vote, the Senator from Illinois would vote "yea."

The result was announced—yeas 45, nays 26, as follows:

YEAS—45.

Ball	Edge	McCormick	Rawson
Brandegee	Ernst	McCumber	Reed, Pa.
Broussard	France	McLean	Shortridge
Bursum	Frelinghuysen	Moses	Smoot
Calder	Hale	Nelson	Sterling
Cameron	Harreld	New	Sutherland
Capper	Jones, Wash.	Newberry	Wadsworth
Colt	Kellogg	Nicholson	Warren
Cummins	Kendrick	Norbeck	Watson, Ind.
Curtis	Keyes	Oddie	
Dillingham	Lenroot	Pepper	
du Pont	Lodge	Phipps	

NAYS—26.

Ashurst	Heflin	Reed, Mo.	Swanson
Borah	Hitchcock	Robinson	Trammell
Culberson	Jones, N. Mex.	Sheppard	Underwood
Dial	McKellar	Shields	Walsh, Mass.
Fletcher	Myers	Simmons	Walsh, Mont.
Gerry	Overman	Smith	
Glass	Ransdell	Stanley	

NOT VOTING—25.

Caraway	King	Page	Watson, Ga.
Elkins	Ladd	Pittman	Weller
Fernald	La Follette	Poindexter	Williams
Gooding	McKinley	Pomerene	Willis
Harris	McNary	Spencer	
Harrison	Norris	Stanfield	
Johnson	Owen	Townsend	

So the amendment made as in Committee of the Whole, as amended in the Senate, was concurred in.

The PRESIDENT pro tempore. The Secretary will now state the amendment in section 526.

The READING CLERK. On page 384, after line 14, section 526 was inserted, reading as follows:

SEC. 526. (a) That it shall be unlawful to import into the United States any merchandise if such merchandise, or the label, sign, print, package, wrapper, or receptacle bears a trade-mark registered in the Patent Office by a person domiciled in the United States, under the provisions of the act entitled "An act to authorize the registration of trade-marks used in commerce with foreign nations or among the several States or with Indian tribes, and to protect the same," approved February 20, 1905, as amended, if a copy of the certificate of registration of such trade-mark is filed with the Secretary of the Treasury, in the manner provided in section 27 of such act, and unless written consent of the owner of such trade-mark is produced at the time of making entry.

(b) Any such merchandise imported into the United States in violation of the provisions of this section shall be subject to seizure and forfeiture for violation of the customs laws.

(c) Any person dealing in any such merchandise may be enjoined from dealing therein within the United States or may be required to export or destroy such merchandise or to remove or obliterate such trade-mark and shall be liable for the same damages and profits provided for wrongful use of a trade-mark, under the provisions of such act of February 20, 1905, as amended.

The PRESIDENT pro tempore. The question is on concurring in the amendment made as in Committee of the Whole.

Mr. MOSES. Mr. President, the history of this amendment is interesting. It was written by a lawyer well known in the precincts of the Capitol; it was inserted in the bill originally, without hearing, upon the votes of four Senators; it was removed from the bill by a disagreeing vote on the 6th of June, upon an understanding, as I believed, that if it were to be taken up again it should be taken up as a separate measure on its own merits and before the Committee on Patents, which properly has jurisdiction of the subject matter. It was put back in the bill among the myriad amendments brought in by the committee the other morning after their midnight session, and it may be fairly classified now as one of the midnight amendments, like the "midnight judges" of the John Adams administration.

It has no place, Mr. President, in a tariff bill. It is a matter particularly of international relations, bearing upon our international treaty and trade-mark conventions, and is a proper subject for either the Committee on Foreign Relations or the Committee on Patents to discuss and consider. It contravenes our treaty obligations; it constitutes but another diamond-studded link in the chain with which the Committee on Finance seems bound to adorn the buxom bosom of certain interests in this country. Especially, Mr. President, it runs counter to two pieces of legislation already pending in this body, one introduced by the senior Senator from Kentucky [Mr. STANLEY], and pending before the Committee on Patents, and the other introduced by the senior Senator from Alabama [Mr. UNDERWOOD], and pending before the Committee on the Judiciary. The adoption of this amendment might contravene the effect of

either of those measures, and certainly would conflict with the great and important questions which those measures involve.

In addition, Mr. President, the whole subject matter involved in this amendment is now before the courts of the United States for determination. A case involving its entire principle has been heard in the circuit court of appeals and is now on its way to the Supreme Court of the United States for final determination. I submit to the Senate that if by an obscure amendment in a tariff bill, put in by the votes of four Senators, as I have indicated, we are to interfere in litigation and are to determine causes before the courts, there will be open to Congress new avenues of activity for lawyers, and we shall be besieged constantly for amendments to bills which will affect the causes of clients and the fees of attorneys.

Mr. President, if this measure is to be determined at all, if it is to be taken up by the Senate at all, it should not be taken up under conditions such as now confront the consideration of this amendment, when only a few minutes may be permitted to discuss the great constitutional and legal questions involved and when the subject matter of the whole amendment belongs properly to other committees.

I trust that the Senate will refuse to concur in the amendment as made in the Committee of the Whole, in order that the subject matter may be remitted to the proper hands, those of the Committee on Foreign Relations or the Committee on Patents.

Mr. KELLOGG. Mr. President, candidly, I think if Senators understand this amendment they will not adopt it upon this tariff bill.

The amendment provides, in substance, that it shall be unlawful to import into the United States any merchandise if such merchandise, or the label, sign, print, package, wrapper, or receptacle bears a trade-mark registered in the Patent Office by a person domiciled in the United States.

Mr. President, this is the first time I ever heard of in legislation that the United States proposed to enforce the trade-mark laws by a prohibition and an embargo against shipments. Remember, Mr. President, we have reciprocal treaties on trade-marks with every nation in the world. I wish I had time to recite them; but the substance of those treaties is that trade-marks of the United States may be registered in those countries and their trade-marks registered here as provided by law, and that rights of action are given to foreign citizens in our courts, and rights of action in foreign countries by our citizens to enforce their rights under trade-marks if there is any infringement. I never before heard, however, that because it was claimed that goods were being shipped in here in violation of a local trade-mark there should be an embargo and no chance whatever to test the matter in the courts. Why, there are any number of suits where foreigners have come here and under the treaties have brought suits to enforce their rights against Americans where they claimed there were conflicting trade-marks.

Take the case of France. Here is one clause of the French treaty, and the treaties with all countries are substantially the same:

> Every reproduction in one of the two countries of trade-marks affixed in the other to certain merchandise to prove its origin and quality is forbidden and shall give ground for an action for damages in favor of the injured party, to be prosecuted in the courts of the country in which the counterfeit shall be proven, just as if the plaintiff were a subject or citizen of that country.

Suppose a citizen of France claims the right to ship in a certain class of goods with a certain trade-mark and an American citizen claims that he has a trade-mark. There is a dispute for the courts, and we legislate that the Frenchman can not even ship into this country his goods because the American has a trade-mark registered in the Patent Office. Why, Mr. President, that will violate every treaty we have with every country in the world.

I do not care whether it applies to dyes or not; this amendment applies to everything. I do not know who drew it; I do not know who got it on the bill; but we ought to hesitate, under a five-minute rule, to adopt an embargo against any foreign country shipping goods here where an American claims he has a trade-mark upon them.

Mr. SUTHERLAND. Mr. President, as to the origin of this proposed legislation, I would refer the Senate and the Senator from New Hampshire to the report made by the American Bar Association, the section of it sitting upon this question, in the twenty-ninth paragraph of which, on page 34, are set out all of the provisions of this proposed section of this bill. It is recommended by the American Bar Association, after a careful consideration of the entire question, not only in relation to its effect upon our commerce but in relation to its effect upon our international relations, the Senator from Minnesota to the contrary notwithstanding.

Mr. President, all that this paragraph does is to prevent fraud, and I believe that the Senate is in favor of protecting the property rights of American citizens who have purchased trade-marks from foreigners, and when these foreigners deliberately violate the property rights of those to whom they have sold these trade-marks by shipping over to this country goods under those identical trade-marks.

Mr. CURTIS. Mr. President——

Mr. SUTHERLAND. It prevents, and its only aim is to prevent, a palpable fraud. The treaties which are referred to by the Senator from Minnesota are for the purpose of protecting citizens of all these countries in the enjoyment of trade-mark rights.

A trade-mark does not provide a monopoly. Mr. Justice Pitney, in a celebrated case, delivered himself of this opinion.

In the case of United Drug Co. *v.* Rectanus (248 U. S. 90) Mr. Justice Pitney said:

> A trade-mark in truth * * * confers no monopoly whatever in a proper sense, but is merely a convenient means for facilitating the protection of one's good will in trade by placing a distinguishing mark or symbol—a commercial signature—upon the merchandise or the package in which it is sold.

The prohibition against the shipping over to this country of merchandise under specific trade-marks which have been bartered away to citizens of the United States does not create a monopoly at all, nor does it prevent the shipping over to this country of the identical merchandise, having the same constituent elements as are protected by the trade-mark.

For instance, American citizens have purchased the trade-mark of the Hunyadi Janos water. If this section becomes a law the owners of that water on the other side can not ship over that water under that trade-mark. They can ship over shiploads of the same water, having the same effect upon the human anatomy, without any infringement of this law at all. It does not provide a monopoly. It only protects a property right which has been sold, and in the enjoyment of which every citizen of the United States ought to be willing to see the purchaser protected.

Mr. LENROOT. Mr. President, just a word.

As I understand this language, an American citizen goes to the city of Toronto and purchases some goods of American manufacture, bearing an American trade-mark, that he would prefer to purchase rather than some other goods not made in the United States. He puts the merchandise in his grip and crosses the line with it. Under this section that merchandise must be confiscated. Am I correct?

Mr. SUTHERLAND. And it ought to be.

Mr. LENROOT. And it ought to be? If an American exports merchandise to Canada, having there a trade-mark, and an American citizen buys that merchandise in Canada with that trade-mark, and is willing to pay the duty that may be imposed, if there be any, it is to be confiscated?

Mr. EDGE. Mr. President, may I ask the Senator to go a step further? Suppose the American citizen purchased and brought back to this country a product of foreign manufacture, with a foreign trade-mark, and paid the duty on it in the regular way: Would he be entitled to bring it in?

Mr. LENROOT. No; if that happened to be a trade-mark that was registered by some one domiciled in the United States, he would not be. Take another case along the Canadian border——

Mr. KELLOGG. Mr. President, will the Senator permit an interruption?

Mr. LENROOT. Just a moment. Wonder flour is one of the best products of flour we have. Along the Canadian border an American citizen crosses the line and buys a sack of Wonder flour. Unless he has the written permission of the maker of that flour, that sack of flour is to be confiscated under this paragraph.

Surely the Congress of the United States is not going to enact any such legislation as this.

Mr. McCUMBER. Mr. President, this will be subject to an amendment now, I understand. I can offer an amendment to the proposed amendment?

The PRESIDENT pro tempore. It is open to amendment.

Mr. McCUMBER. I move, after the word "merchandise"—I think it will be in line 2 of the amendment—to insert "of foreign manufacture."

The PRESIDENT pro tempore. The question is upon agreeing to the amendment proposed by the Senator from North Dakota to the amendment made as in Committee of the Whole.

Mr. MOSES. Mr. President, I merely wish to point out that that amendment does not cure the great vice of the whole amendment, which is——

Mr. McCUMBER. I will discuss that, Mr. President, if I can get this amendment agreed to.

Mr. POMERENE. I ask to have the amendment stated.

The PRESIDENT pro tempore. The Secretary will state the amendment.

The PRINCIPAL LEGISLATIVE CLERK. In the second line of the section, after the word "merchandise," it is proposed to insert "of foreign manufacture," so that the section would read:

That it shall be unlawful to import into the United States any merchandise of foreign manufacture if such merchandise—

And so forth.

Mr. MOSES. Mr. President, is the Senator from North Dakota holding the floor?

Mr. McCUMBER. No.

The PRESIDENT pro tempore. Does the Senator from North Dakota yield to the Senator from New Hampshire?

Mr. McCUMBER. I yield the floor. Then I want to discuss the amendment, after the Senator is through.

Mr. MOSES. Mr. President, I merely wish to point out that even the amendment proposed by the Senator from North Dakota does not cure the vice of the general amendment, which is an interference with the proper, orderly proceedings now taking place in the courts of the United States. My chief objection to the amendment as it stands is that its main purpose will be to interfere with litigation now going on; and I protest that the Congress of the United States should not be used for the purpose of advancing the cause of litigants or attorneys.

Mr. McCUMBER. Mr. President, I want to say but one word in reference to the amendment.

I offered the amendment to meet the possible case suggested by the Senator from Wisconsin [Mr. LENROOT]. The question now is whether this amendment is a vicious amendment of itself?

As shown, the courts have held that we can not prevent any product being shipped into the United States if it is in violation of a trade-mark where the foreign maker has sold trade-mark and all, patent and everything, in the United States.

I am going to give but a single illustration. I will take Bayer's aspirin. Suppose not only the patent but the trade-mark, which is "Bayer's Aspirin" with a red cross, is sold to an American concern outright. The patent will defend against any importations so long as the patent lasts; but suppose, now, the patent expires. Then the German firm, notwithstanding that they have sold all rights, including the trade-mark, begin to ship in Bayer's Aspirin with the same kind of a trade-mark that they had before, although the right is owned in the United States. According to the decision that was read by the Senator from West Virginia the American purchasers of these rights are entirely unprotected, and this is to give the opportunity to protect the American purchaser. That is all there is to it, and there is no treaty against it.

Mr. SIMMONS and Mr. WADSWORTH addressed the Chair.

The PRESIDENT pro tempore. Does the Senator from North Dakota yield to the Senator from North Carolina?

Mr. McCUMBER. I simply give this as an illustration. I do not know who or what might have purchased these particular articles. I do not care about going into that.

Mr. WADSWORTH. Mr. President——

Mr. McCUMBER. I yield.

Mr. WADSWORTH. Will the Senator, if he can, state the parties to this suit?

Mr. SIMMONS. Mr. President, a point of order.

The PRESIDENT pro tempore. The Senator will state his point of order.

Mr. SIMMONS. I addressed the Chair, and the Chair asked if the Senator from North Dakota yielded to me. The Senator from New York was directing a question to the Senator from North Dakota without getting the consent of the Chair, according to the rule. He took me off my feet.

I want to ask the Senator from North Dakota, who has just taken his seat, one question with respect to this matter. I am asking it because when the matter came up a few days ago we had a division, and this side of the Chamber voted for this paragraph. I do not know whether we voted under a misapprehension or not. I do not think I did, but some other Senators on this side think probably they did.

As I understand the Senator, this provision does not prohibit the importation into this country of foreign goods at all, unless the particular importation bears a trade-mark which is the property of an American citizen?

Mr. McCUMBER. That is right.

Mr. SIMMONS. It is not a prohibition against the importation?

Mr. McCUMBER. Not at all.

Mr. SIMMONS. The article may be imported ad libitum, but it must not bear the trade-mark?

Mr. McCUMBER. It is a prohibition against the violation of his contract.

Mr. SIMMONS. Have you not all through the bill written provisions to the effect that unless certain things were done with reference to labels, stamps, and things of that sort the articles should not be permitted to enter the American market?

Mr. McCUMBER. In a thousand ways we have guarded against fraud, and this one among the thousand.

Mr. SIMMONS. Mr. President, I voted for the provision upon the rising vote to which I referred, but I understood this was about the situation, which had been represented to me by persons interested in this matter: It was brought to my attention by some West Virginians who were interested in this subject. I give it merely as an illustration of the principle. As I understood from them, the Bayer Co., of Germany, produced aspirin. It had a patent. A New York corporation was organized, financed entirely by German capital, and became the owners of that patent and that trade-mark in the United States. As long as the patent existed, as the Senator said, they were absolutely protected, but when the patent expired they were protected only to the extent of their trade-mark.

The Alien Property Custodian seized the property of that corporation because it was composed of Germans; he sold it at auction, and these West Virginia people bought it, paying $5,000,000 for it, I believe.

Mr. SUTHERLAND. Three million dollars.

Mr. SIMMONS. The thing of large value in the purchase, if not of chief value, was the trade-mark with reference to aspirin. Now it is proposed not to put any prohibition upon the imports of aspirin made by the Bayer Co., of Germany, or aspirin made by any other foreign company, but if the Bayer Co. puts the trade-mark which now belongs to American citizens upon those goods the goods are to be excluded, because it is an invasion of the rights of American citizens. Take the trade-mark off, and though the product is the same as the one produced by the American company it can come in. The importation of the article is not prohibited. You merely prohibit the use of the trade-mark which belongs to American citizens.

Do you not do that with reference to an American citizen duplicating the trade-mark of another American citizen? You protect a citizen against that sort of an invasion of his rights.

The PRESIDENT pro tempore. The time of the Senator has expired.

Mr. POMERENE. Mr. President, it is my purpose, if under my pair I can get a transfer, to vote for this amendment as well as for the amendment offered to the amendment by the Senator from North Dakota.

I have heard a statement of the facts substantially like that made by the Senator from North Carolina. As I understand it, the title to this trade-mark was acquired in a perfectly legitimate way and in accordance with the law as it existed at the time. I understand also that, under the present law, if a patented article is brought to the customs office which infringes an American-owned patent, it can be excluded. I think I am right about that.

It seems to me that perhaps there is a doubt as to whether the same principle would apply to a trade-mark. As I understand it, a valuable part of the asset which was acquired by this company—not the valuable part, but a valuable part—was the trade-mark. It is not proposed under this legislation to prohibit the importation of the article of manufacture in question. It is proposed in this amendment to prevent foreign manufacturers from entering into this market or selling in this market articles when they bear this particular trade-mark.

What is wrong about it? The Senator from New Hampshire refers to some pending litigation. If this amendment is agreed to it will not determine that litigation. That litigation will be determined by the state of the law as it existed at the time the facts arose which were involved in the controversy. This amendment, if it becomes the law of the land, will be a declaration of what the Congress of the United States believed should be the national policy hereafter.

That is all there is in it, and it seems to me, under the circumstances as I understand them, this is simply an exercise of good faith on the part of Congress toward the people who have acquired the rights to this trade-mark under laws heretofore enacted by the Congress of the United States.

Mr. EDGE. Mr. President, I would like to have one point made clear and I will address a question as to the operation of this amendment to the chairman of the Finance Committee, who can answer in my time.

If an American wholesale house, for instance, secured the selling rights of a foreign-produced article with a trade-mark, and imported large supplies of whatever the product might be, not obtaining any copyright for American distribution but simply acting as a selling agent, as it were, if I make myself clear, for some foreign house producing, say, Pears' soap, or whatever the foreign product may be, would this amendment, if adopted, serve in any way to hinder the importation and sale of that article under that foreign trade-mark?

Mr. McCUMBER. Certainly not, because there must be one domiciled in this country who is the owner of the trade-mark, and the trade-mark must be registered in the United States. Therefore it would not affect anything as to which there was not a trade-mark owned here and registered in the Patent Office in the United States.

Mr. EDGE. In other words, when an American purchased foreign goods for sale, the trade-mark is automatically registered in the United States? Is that what the Senator means?

Mr. McCUMBER. No; I mean that there are cases in which not only is there a patent of a foreign country sold to an American or an American firm, and having the patent, of course they can be protected. But the court in a late decision, which I shall not take the time now to discuss because I have not the time, has held that a trade-mark did not protect a party at all against importations of the article from the very firm which sold it, stating that the trade-mark is simply to indicate the character of the goods, or the maker, so that we will know what the goods are; and the courts will not protect the individual.

Mr. EDGE. Then, as I understand, either a selling agent or any wholesale house on this side, not necessarily a selling agent but simply one purchasing a consignment of foreign-made goods with a trade-mark, would in no way be interfered with in selling those goods on this side?

Mr. McCUMBER. Certainly not.

Mr. LENROOT. Mr. President, perhaps I do not understand the facts of this situation. I want to ask the Senator from North Dakota a question. We will assume that Pears' soap, to which he has referred, is not registered in the United States. It is sold in the general markets throughout the world, but the makers of Pears' soap desire a monopoly in the United States. They have American agents who register a trade-mark of Pears' soap here in the United States.

I want to inquire whether any American could purchase Pears' soap abroad and import it without the written consent of their agent here in the United States, and if not, why not? There is no fraud, no deceit. It is the same identical article, with the trade-mark registered here protecting the maker of the article. I yield to the Senator to answer.

Mr. McCUMBER. Mr. President, if there has been no transfer of trade-mark, that presents an entirely different question. But suppose the trade-mark is owned exclusively by an American firm or corporation. The mere fact of a foreigner having a trade-mark and registering that trade-mark in the United States, and selling the goods in the United States through an agency, of course, would not be affected by this provision.

Mr. LENROOT. This is an international trade-mark of Pears' soap, registered here by an American, with American domicile. Under it Pears' soap could not be bought in the markets of the world and sold here without the written consent of the Pears Soap Co., or their agent domiciled here in America.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment offered by the Senator from North Dakota [Mr. McCUMBER] to the amendment made as in Committee of the Whole.

On a division, the amendment to the amendment was agreed to.

The PRESIDENT pro tempore. The question is, Will the Senate concur in the amendment made as in Committee of the Whole?

Mr. MOSES. On that I ask for the yeas and nays.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. GLASS (when his name was called). I transfer my pair with the Senator from Vermont [Mr. DILLINGHAM] to the Senator from Texas [Mr. CULBERSON] and vote "nay."

Mr. HARRISON (when his name was called). On this vote I am unable to obtain a transfer of my pair with the Senator from West Virginia [Mr. ELKINS]. I therefore withhold my vote.

Mr. CURTIS (when Mr. LA FOLLETTE'S name was called). I was requested to announce that on this question the Senator from Wisconsin [Mr. LA FOLLETTE] is paired with the Senator from Michigan [Mr. TOWNSEND]. If present, the Senator from Wisconsin would vote "nay" and the Senator from Michigan would vote "yea."

Mr. McCUMBER (when his name was called). Transferring my general pair with the junior Senator from Utah [Mr. KING] as on the previous vote, I vote "yea."

Mr. POMERENE (when his name was called). Again announcing my pair with my colleague [Mr. WILLIS], I have been advised that if he were present he would vote as I intend to vote. I therefore feel at liberty to vote. I vote "yea."

Mr. TRAMMELL (when his name was called). In the absence of my pair, the senior Senator from Rhode Island [Mr. COLT], being unable to obtain a transfer, I withhold my vote.

Mr. WATSON of Georgia (when his name was called). I have a general pair with the senior Senator from California [Mr. JOHNSON]. He being absent, I withhold my vote.

Mr. WATSON of Indiana (when his name was called). Making the same announcement as before, I vote "yea."

The roll call was concluded.

Mr. LODGE (after having voted in the affirmative). I observe that my pair, the senior Senator from Alabama [Mr. UNDERWOOD], is absent. I transfer that pair to the Senator from Maryland [Mr. WELLER] and allow my vote to stand.

Mr. CURTIS. I was requested to announce that the junior Senator from Illinois [Mr. McKINLEY] is paired with the junior Senator from Arkansas [Mr. CARAWAY], and that the junior Senator from Missouri [Mr. SPENCER] is paired with the senior Senator from Georgia [Mr. HARRIS].

The result was announced—yeas 44, nays 15, as follows:

YEAS—44.

Ball	Fletcher	Myers	Shields
Brandegee	Frelinghuysen	New	Shortridge
Broussard	Gerry	Oddie	Simmons
Bursum	Gooding	Pepper	Stanfield
Calder	Jones, Wash.	Phipps	Sterling
Cameron	Kendrick	Pomerene	Sutherland
Capper	Lodge	Ransdell	Wadsworth
Cummins	McCormick	Rawson	Walsh, Mass.
Curtis	McCumber	Reed, Pa.	Walsh, Mont.

Ernst	McNary	Sheppard	Watson, Ind.

NAYS—15.

Dial	Kellogg	Nelson	Smith
Glass	Keyes	Newberry	Stanley
Hale	Lenroot	Nicholson	Swanson
Hitchcock	Moses	Reed, Mo.	

NOT VOTING—37.

Ashurst	Harreld	McKinley	Townsend
Borah	Harris	Norbeck	Trammell
Caraway	Harrison	Norris	Underwood
Colt	Heflin	Overman	Watson, Ga.
Culberson	Johnson	Owen	Weller
Dillingham	Jones, N. Mex.	Page	Williams
Edge	King	Pittman	Willis
Elkins	Ladd	Poindexter	
Fernald	La Follette	Smoot	
France	McKellar	Spencer	

So the amendment made as in the Committee of the Whole, as amended in the Senate, was concurred in.

The PRESIDENT pro tempore. The Secretary will report the amendment reserved by the Senator from Wisconsin [Mr. LENROOT] in paragraph 1109.

The READING CLERK. On page 146, paragraph 1109, woven fabrics, reserved by the Senator from Wisconsin [Mr. LENROOT].

Mr. LENROOT. Mr. President, this paragraph was adopted in Committee of the Whole by the very narrow margin of 2 votes. I want to say a word with reference to the paragraph in general and the compensatory duties, as well as the protective duties contained therein.

During the debate in Committee of the Whole it was constantly asserted that the duties upon wool—and I am now speaking of the compensatory duties in this paragraph—were lower than the rates of the present emergency tariff law. That was true as to the high-class wools. It is a reduction of about 30 per cent on that class of wools, but it is an increase on the low shrinking wools, shrinking 30 per cent instead of 70 per cent, of 50 per cent under the present emergency tariff law.

Mr. President, I understand that it is necessary to carry the compensatory duties into this paragraph, the Senate having adopted the 33-cent rate upon raw wool. I still think, however, that the compensatory duties are more than necessary to compensate for the raw wool. I am going to reoffer the amendment which I offered in Committee of the Whole upon the subject. The protective duties, outside of the compensatory duties, are very clearly higher than are necessary to protect these cloths; in fact, the present duty is practically prohibitive except for specialties. I send to the desk the same amendment which I offered in Committee of the Whole reducing the protective duties 5 per cent.

The PRESIDENT pro tempore. The amendment offered by the Senator from Wisconsin will be stated.

The READING CLERK. On page 146, in line 25, strike out "40" and insert "35"; on page 147, line 2, strike out "50" and insert "40"; and, on line 5, strike out "55" and insert "45."

Mr. LENROOT. I ask unanimous consent that the amendments be voted upon as one amendment.

The PRESIDING OFFICER (Mr. WADSWORTH in the chair). Without objection, it is so ordered.

Mr. LENROOT. On this question I demand the yeas and nays.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. McCUMBER (when his name was called). Transferring my general pair with the junior Senator from Utah [Mr. KING] as on the previous vote, I vote "nay."

Mr. POMERENE (when his name was called). Again announcing my pair with my colleague the junior Senator from Ohio [Mr. WILLIS], I transfer that pair to the senior Senator from Texas [Mr. CULBERSON] and vote "yea."

Mr. WATSON of Georgia (when his name was called). I have a general pair with the senior Senator from California [Mr. JOHNSON]. If present and permitted to vote, the Senator from California would vote "nay," and if permitted to vote I should vote "yea." I withhold my vote.

The roll call was concluded.

Mr. FRELINGHUYSEN. I transfer my general pair with the Senator from Montana [Mr. WALSH] to the junior Senator from Maryland [Mr. WELLER] and vote "nay."

Mr. HARRISON. On this vote I have a pair with the junior Senator from West Virginia [Mr. ELKINS]. I understand that if he were present and permitted to vote, the junior Senator from West Virginia would vote "nay." If permitted to vote, I should vote "yea." I withhold my vote.

Mr. EDGE. Making the same announcement as before concerning my pair and its transfer, I vote "nay."

Mr. CURTIS. I desire to announce that the Senator from Illinois [Mr. MCKINLEY] is paired with the Senator from Arkansas [Mr. CARAWAY], and that the Senator from Missouri [Mr. SPENCER] is paired with the Senator from Georgia [Mr. HARRIS].

The result was announced—yeas 34, nays 35, as follows:

YEAS—34.

Ashurst	Hitchcock	Newberry	Smith
Borah	Jones, N. Mex.	Overman	Stanley
Capper	Jones, Wash.	Pomerene	Sterling
Cummins	Kellogg	Ransdell	Swanson
Dial	Lenroot	Reed, Mo.	Trammell
Fletcher	McCormick	Robinson	Underwood
Gerry	McKellar	Sheppard	Walsh, Mass.
Glass	Myers	Shields	
Heflin	Nelson	Simmons	

NAYS—35.

Ball	du Pont	McLean	Reed, Pa.
Brandegee	Edge	McNary	Shortridge
Broussard	Ernst	Moses	Smoot
Bursum	Frelinghuysen	New	Stanfield
Calder	Gooding	Nicholson	Sutherland
Cameron	Hale	Oddie	Wadsworth
Colt	Keyes	Pepper	Warren
Curtis	Lodge	Phipps	Watson, Ind.
Dillingham	McCumber	Rawson	

NOT VOTING—27.

Caraway	Harrison	Norbeck	Townsend
Culberson	Johnson	Norris	Walsh, Mont.
Elkins	Kendrick	Owen	Watson, Ga.
Fernald	King	Page	Weller
France	Ladd	Pittman	Williams
Harreld	La Follette	Poindexter	Willis
Harris	McKinley	Spencer	

So Mr. LENROOT's amendment to the amendment made as in Committee of the Whole was rejected.

The PRESIDING OFFICER. The question now is on concurring in the amendment made as in Committee of the Whole.

Mr. LENROOT. I ask for the yeas and nays.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. McCUMBER (when his name was called). I have a general pair with the junior Senator from Utah [Mr. KING], which I transfer to the junior Senator from Washington [Mr. POINDEXTER], and vote "yea." I will allow this announcement of the transfer of my pair to stand upon all votes during the day, unless otherwise stated.

Mr. POMERENE (when his name was called). Again announcing my pair with my colleague [Mr. WILLIS], I transfer that pair to the senior Senator from Texas [Mr. CULBERSON], and vote "nay."

Mr. WATSON of Georgia (when his name was called). I have a general pair with the senior Senator from California [Mr. JOHNSON], who, if present, would vote "yea." If permitted to vote, I should vote "nay." I withhold my vote.

The roll call was concluded.

Mr. FRELINGHUYSEN. Making the same announcement as to my pair and its transfer as before, I vote "yea."

Mr. HARRISON. I transfer my pair with the junior Senator from West Virginia [Mr. ELKINS] to the senior Senator from Nebraska [Mr. HITCHCOCK] and vote "nay."

Mr. EDGE (after having voted in the affirmative). Making the same announcement as before with reference to my pair and its transfer, I will let my vote stand.

Mr. CURTIS. I desire to announce that the Senator from Illinois [Mr. MCKINLEY] is paired with the Senator from Arkansas [Mr. CARAWAY], and that the Senator from Missouri [Mr. SPENCER] is paired with the Senator from Georgia [Mr. HARRIS].

The result was announced—yeas 38, nays 27, as follows:

YEAS—38.

Brandegee	France	McNary	Reed, Pa.
Broussard	Frelinghuysen	Moses	Shortridge
Bursum	Gooding	New	Smoot
Calder	Hale	Nicholson	Sterling
Cameron	Jones, Wash.	Norbeck	Sutherland
Colt	Kendrick	Oddie	Wadsworth
Curtis	Keyes	Pepper	Warren
Dillingham	Lodge	Phipps	Watson, Ind.
Edge	McCumber	Ransdell	
Ernst	McLean	Rawson	

NAYS—27.

Borah	Heflin	Newberry	Simmons
Capper	Jones, N. Mex.	Overman	Smith
Dial	Kellogg	Pomerene	Swanson
Fletcher	Lenroot	Reed, Mo.	Trammell
Gerry	McKellar	Robinson	Underwood
Glass	Myers	Sheppard	Walsh, Mass.
Harrison	Nelson	Shields	

NOT VOTING—31.

Ashurst	Harreld	McKinley	Stanley
Ball	Harris	Norris	Townsend
Caraway	Hitchcock	Owen	Walsh, Mont.
Culberson	Johnson	Page	Watson, Ga.
Cummins	King	Pittman	Weller
du Pont	Ladd	Poindexter	Williams
Elkins	La Follette	Spencer	Willis
Fernald	McCormick	Stanfield	

So the amendment made as in Committee of the Whole was concurred in.

The PRESIDING OFFICER. The Secretary will state the next reserved amendment.

The READING CLERK. On page 156, in paragraph 1205, "woven fabrics in the piece, composed wholly or in chief value of silk," not specifically provided for, 55 per cent.

Mr. ROBINSON. Mr. President, that amendment was reserved for a separate vote in the Senate by the Senator from New Mexico [Mr. JONES]. He is not in the Chamber at this moment. I hope there will be no objection to the amendment being passed over until his return to the Chamber.

Mr. McLEAN. Mr. President——

Mr. ROBINSON. I suggest the absence of a quorum.

The PRESIDING OFFICER. The Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Ball	Gooding	Nelson	Shortridge
Brandegee	Hale	New	Simmons
Broussard	Harrison	Newberry	Smoot
Bursum	Heflin	Nicholson	Stanfield
Calder	Jones, N. Mex.	Norbeck	Sterling
Cameron	Jones, Wash.	Oddie	Sutherland
Capper	Kellogg	Pepper	Swanson
Curtis	Lodge	Phipps	Trammell
Dial	McCormick	Ransdell	Underwood
Dillingham	McCumber	Rawson	Wadsworth
Edge	McKellar	Reed, Pa.	Walsh, Mass.
Fletcher	McLean	Robinson	Watson, Ga.
Gerry	McNary	Sheppard	
Glass	Myers	Shields	

The PRESIDING OFFICER. Fifty-four Senators having answered to their names, a quorum is present. The question is on concurring in the amendment made as in Committee of the Whole to paragraph 1205.

Mr. JONES of New Mexico. Mr. President, I do not believe I am justified in taking up the time of the Senate in the special consideration of that paragraph and also the next two paragraphs, and I withdraw the application for a separate vote.

The PRESIDING OFFICER. On all three?

Mr. JONES of New Mexico. On all three.

The PRESIDING OFFICER. Without objection, the reservations on pages 156, 161, and 163 are withdrawn. The question is on concurring in the amendments made as in Committee of the Whole.

The amendments made as in Committee of the Whole were concurred in.

The READING CLERK. The next paragraph reserved is on page 165, paragraph 1215, artificial silk waste, reserved at the request of the Senator from Pennsylvania [Mr. PEPPER] and the Senator from New York [Mr. CALDER].

Mr. PEPPER. Mr. President, in pursuance of the reservation, I offer an amendment to paragraph 1215.

The PRESIDING OFFICER. The amendment will be stated.

The READING CLERK. In paragraph 1215, after the words "less rate of duty than," it is proposed to strike out the numeral "35" and insert "45."

Mr. PEPPER. Mr. President, under the schedule as drawn, artificial silk yarns and filaments carry certain specific rates of duty, and the paragraph concludes with a safeguarding clause to the effect that none of these items shall carry a duty of less than 35 per cent ad valorem.

Mr. President, the fact is that the items to which this amendment refers are now disclosed as having a foreign selling price such that the specific duties given them in the paragraph are of a less percentage ad valorem than the safeguarding 35 per cent. It is necessary to raise "35" to "45" in order that the safeguarding process intended by the committee shall go into actual operation and effect, regard being had to the prices shown by the latest reports from abroad as being the foreign prices.

I refer specifically to the fact that the average price per pound of all artificial silk yarns, taken from the Monthly Summary of Foreign Commerce of the United States for May, 1922, is $1.90, and for the 11 months ending May 30, 1922, is $1.74. The rate under the Senate bill is, therefore, in effect the same as it is under the Underwood tariff, because the ad valorem equivalent of the specific rate is less than the safeguarding clause.

I therefore press, sir, the amendment which would change "35" to "45," and by so doing I think it is demonstrable that I create no discrimination against the foreign product, but precisely equalize the difference in production costs and enable the home producer to sell on equal terms with the product brought in from abroad.

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from Pennsylvania [Mr. PEPPER] to the amendment made as in Committee of the Whole.

The amendment to the amendment was agreed to.

Mr. CALDER. Mr. President, I reserved the right to offer an amendment to this paragraph. I send it to the desk and ask to have it stated.

The PRESIDING OFFICER. The amendment to the amendment will be stated.

The READING CLERK. On page 165, line 21, it is proposed to strike out "50" and insert "60."

Mr. CALDER. Mr. President, this amendment is made to the last ad valorem in this paragraph. It was the rate that the committee originally recommended. The paragraph, however, was entirely rewritten on the floor, and the Senator from Utah [Mr. SMOOT] had the rate fixed at 50 per cent.

This particular provision refers to what is usually called outerwear—silk and imitation of silk sweaters, and knit fabrics of like character, shawls, and things of that sort. The manufacturers of these commodities insist that they ought to have compensatory duty of 70 cents a pound and 80 per cent ad valorem. That duty seemed to the Finance Committee, of course, to be too high, and the compensatory rate fixed in the bill in the paragraph under consideration is 45 cents a pound. I do not propose to change that, but I recall distinctly that there was doubt in the minds of some of us when the rate I seek to amend was agreed to. I remember at the time that the Tariff Commission expert, in discussing the matter with me here in the Senate Chamber, said that he was inclined to believe that the rate ought to be at least 60 per cent.

I may say that the imports of this commodity are increasing. They were very considerable before the war—very large indeed. About one-half of our consumption was imported at that time, but of course since the war we have not had these big importations. They are, however, beginning to come in again, and I am sure that the rate proposed is not too high.

Mr. SIMMONS. Mr. President, I do not wish to discuss this matter. It relates to knit goods, ribbons, and other fabrics, and articles composed wholly or in chief value of any of the foregoing, chiefly silk products. The rate fixed by the committee was 45 cents per pound, and, first, 40 per cent ad valorem. That was changed to 50 per cent ad valorem. The Senator now asks that that be changed to 60 per cent ad valorem. It seems to me that 45 cents per pound and 50 per cent ad valorem is enough for these knit goods.

Mr. SHEPPARD. Mr. President, this artificial silk industry has grown amazingly in the United States within the last few years. It has multiplied itself about fifteen times over, and the rates really ought to be decreased rather than increased. However, I do not care to enter into a detailed discussion of the matter at this time, inasmuch as I endeavored to present the case in all its aspects a few days ago. I showed that there was no industry in American history that had grown more rapidly than this, that no industry needed the supporting hand of the Government less than this.

Mr. SIMMONS. Mr. President, I want to ask the Senator from Utah [Mr. SMOOT], who has just risen, if he can tell us what is the ad valorem equivalent of the rate proposed by the Senator from New York?

Mr. SMOOT. The 45 cents a pound on the average would be between 9 and 10 per cent ad valorem. That is the equivalent ad valorem; and of course that, added to the 60 per cent, would be about 69 per cent.

Mr. President, there is some question about this matter. The importations, according to the reports that we have gotten so far, would not justify the amendment. I have no objection, however, to allowing the amendment to be agreed to to-day and letting it go into conference, and between now and the time it is finally decided in conference I will undertake to find out just what the importations have been during the last two months. So I think we had better let it go in, and then take it up in conference.

The PRESIDING OFFICER. The question is on the amendment proposed by the Senator from New York [Mr. CALDER] to the amendment made as in Committee of the Whole.

The amendment to the amendment was agreed to.

The PRESIDING OFFICER. The question now is on concurring in the amendment as amended.

The amendment as amended was concurred in.

The next amendment reserved was on page 175, paragraph 1309, Jacquard designs on ruled paper, reserved by the Senator from New York [Mr. CALDER].

Mr. CALDER. I submit an amendment to the amendment, which I send to the desk.

The PRESIDING OFFICER. The Secretary will state the amendment to the amendment.

The PRINCIPAL LEGISLATIVE CLERK. On line 10, strike out "1½" and insert in lieu thereof "2."

Mr. CALDER. Mr. President, the printed bill shows a rate on wall paper of 3 cents per pound and 20 per cent ad valorem. This was changed by a Finance Committee amendment which was agreed to in the Committee of the Whole on the day when debate on amendments had ceased, and a rate of 1½ cents was agreed to by the Senate without debate.

I seek now to strike out 1½ cents a pound and insert 2 cents a pound. This is 1 cent less than the original provision recommended by the committee, but half a cent more than the amendment adopted in the Committee of the Whole.

I have been moved to do this by a careful study of this whole subject of the admission of wall paper into this country. It seems that we are admitting a great deal of cheap oatmeal wall paper from Germany. That paper costs to-day, laid down at the customhouse, about 3 cents a pound. The duty under the present law is 25 per cent. I propose that the rate shall be 2 cents a pound and 20 per cent ad valorem.

This morning I took occasion to purchase a roll of German wall paper, and I would like to have the attention of the Senators present. I regret that there is not a larger attendance.

This roll of wall paper is 3 pounds in weight [exhibiting]. I have the importer's word for it that it cost him 3¼ cents a pound. In other words, this roll, weighing 3 pounds, cost 9¾ cents at the customhouse in New York. The duty is 25 per cent ad valorem, a matter of about 2¼ cents for this whole roll, bringing the cost at the customhouse duty paid to a little less than 12 cents.

I was charged this morning at a wholesale wall-paper establishment in the city of Washington 90 cents for this roll of paper, German wall paper, which cost the importer, including the duty, 12 cents.

But I want to point out that the cheapness in price is not carried to the American consumer. Wall paper of like character made in this country costs 6½ cents a pound. It costs 3¼ cents more a pound to produce the American article than the German can lay it down for at the port of New York.

I have asked an increase in this duty from 1½ cents a pound, the rate fixed in the Committee of the Whole, to 2 cents a pound, and the rate I propose is simply a cent and a half more on this roll of paper, 3 pounds in weight, than the rate fixed by the committee.

It may be argued in discussing the subject that this would mean a very considerable ad valorem duty. This paper cost, laid down in New York City, without the duty paid, less than 10 cents, and the duty upon it under my amendment would be 2 cents a pound and 20 per cent ad valorem; it would be about 8 cents duty. It is true, that would look like 70 per cent, and it seems like a great deal on the ad valorem basis, but as you

go to the higher class of paper, to the fancy English papers, which come over here at a dollar a roll, it means only about 30 per cent. But in papers of this quality it is impossible for the American producer to compete.

Eighty per cent of the paper of this sort consumed in this country in the past six months has been of foreign make. We have been able to get into use only 20 per cent of our own manufacture. In the State of Vermont, where the senior Senator from that State, whom I see in the Senate, resides, they have a great factory, and they have been compelled to close up. In my own State we have three plants engaged in the manufacture of this kind of paper which are working part time.

Mr. SMOOT. Mr. President, this is one of the items to which the committee gave a great deal of consideration. If we had a duty of 2 cents a pound, that would amount to about 80 per cent on the cheapest paper that is put upon the walls in any home.

What the Senator from New York says is true, that on the high-priced paper it would mean only about 20 per cent. Nobody cares whether the duty on that kind of paper is 25 or 28 or 70 or 100 per cent. But this is a class of paper which goes into the homes of all the people of the United States, and it is going too far to put a rate of between 75 and 80 per cent upon this paper, according to the view of the committee. So that all I have to say is that I hope the amendment will not be agreed to.

Mr. FLETCHER. Mr. President, I do not see how by tariff legislation we are going to cure the kind of profiteering mentioned by the Senator from New York. In other words, here is a concern which makes some 900 per cent on the paper. We can not raise the duty to 900 per cent in order to protect against that situation.

Mr. CALDER. Mr. President, I am not trying to do that. I am only seeking to increase this duty one-half cent a pound over the rate fixed in the Committee of the Whole, and if this is done it will give the American manufacturer of this product a bare chance in the market.

Mr. FLETCHER. That only means, as the Senator from Utah has said, a duty of something like 80 per cent on paper that is used by people of moderate means, and I can not see how it is justified.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from New York to the amendment made as in Committee of the Whole.

Mr. CALDER. I ask for a division.

On a division the amendment to the amendment was rejected.

The amendment made as in Committee of the Whole was concurred in.

The next amendment reserved was, on page 181, lines 18 and 19, in paragraph 1406, braids, plaits, laces, etc.

Mr. CALDER. I submit an amendment, which I send to the desk.

The PRESIDING OFFICER. The Secretary will state the amendment.

The READING CLERK. On page 181, line 22, the Senator from New York moves to strike out "50" and insert in lieu thereof "60."

Mr. CALDER. Mr. President, a careful examination of the rates fixed by the Senate in Committee of the Whole will make it clear that the rates in this paragraph have been increased over the House rates; that is, in converting the rates into foreign valuation they have been increased so that the rates now are the same as they would be under the American valuation, except in the case of the finished hat. Senators will observe that on page 181, line 22, we have fixed a rate of 50 per cent on straw hats.

There are very few industries in this country where the manufacturers are harder hit than in the straw-hat industry. If members of the committee will examine the paragraph they will find on line 17 a rate of 50 per cent ad valorem on hats that are not finished, while only 50 per cent is given on this class of hats. [Exhibiting.]

The particular hat I have in my hand is of German make. Its price, laid down at the customhouse, was 43 cents. Under the present rate in the Underwood Act the duty would be 17 cents, so that the cost of that hat, laid down at the customhouse plus the duty, is 60 cents plus.

With the rate I offer, 60 per cent ad valorem, the duty would be increased only 9 cents, and even that would be hardly worth considering when one comes to consider what it costs to manufacture a similar hat here. This hat was sold in New York City for $3 at retail, although, with the duty paid, it cost only 60 cents.

Mr. SIMMONS. On what line is the amendment?

Mr. CALDER. My amendment is offered on line 22, page 181. I point out to the Senator from North Carolina the fact that on line 17 we have provided a rate of 50 per cent for hats which are not finished, and this, of course, is a finished hat.

An examination of the records will show that the importations are increasing very rapidly, and that the very life of the straw-hat industry is threatened. It seems to me, when one comes to consider a hat of that kind being sold for 43 cents, and, with the duty paid, for only 60 cents, the Senate can afford to raise the rate 9 cents.

Mr. SIMMONS. If the Senator will pardon me, on the printed list I have he reserves the amendment on lines 18 and 19, which refers to harvest hats.

Mr. CALDER. I have reserved no amendments on the harvest-hat provision. I am only seeking to increase this duty on the finished straw hats, the more expensive kind.

Mr. SIMMONS. The Senator has not reserved it, then, because it is not on the list. The one he reserves is stated here as being on page 181, lines 18 and 19.

Mr. CALDER. I am not responsible for lines 18 and 19 being written on the list. I did not write the figures on it. I reserved a vote on this paragraph.

Mr. SMOOT. The question has been considered by the committee a number of times. Those interested made a pretty fair case for an increase of duty upon the hats, but after a full consideration of it, it was decided by the majority of the committee not to increase the rate over 50 per cent.

Mr. McLEAN. I hope the acting chairman of the committee will let it go to conference. There are very large importations.

Mr. SMOOT. If the Senator had just waited a moment, he would have found that I was going to state the same thing. As far as I am personally concerned, I recognize the fact that perhaps this industry has sharper competition than any other industry coming under this paragraph.

Another thing we have to take into consideration is the increased duties on about every article used in the manufacture of these hats. I am perfectly willing, as far as I am concerned, to vote for the amendment and let it go to conference. In the meantime I desire to find out what the importations have been in the last two months, and we can do that before we finally decide upon it; and if the importations in the last two months have not increased more than they did during the two months preceding over the two months preceding that, then I want to say frankly to the Senator from New York that as one of the conferees I do not propose to support the 60 per cent.

The PRESIDING OFFICER. The question is upon agreeing to the amendment offered by the Senator from New York to the amendment made as in Committee of the Whole.

The amendment to the amendment was agreed to.

The amendment made as in Committee of the Whole as amended in the Senate was concurred in.

The PRESIDING OFFICER. The Secretary will state the next amendment reserved.

The READING CLERK. On page 193, paragraph 1430, laces and embroideries, reserved on the request of Mr. JONES of New Mexico.

Mr. SMITH. Mr. President, this matter was reserved by the Senator from New Mexico [Mr. JONES] and also by myself. I presume it is useless to call attention to the outrageous duties which have been levied here, not for the sake of protection, but for the sake of guaranteeing an absolute monopoly. There is not any evidence submitted by those whom we have appointed to gather information and furnish it to us, not a scintilla of evidence, that we need any such duty as 90 per cent on the laces covered by this schedule and those embroideries which are in the nature of laces.

When I previously discussed the matter I submitted a table showing that a majority of these articles really need no duty at all. Now I call attention to the information that I have received that even in the Finance Committee some of the leading members of the committee were not in favor of such an outrageous and indefensible duty as 90 per cent on these ordinary things which the women of the country wear. This duty of 90 per cent has been put on practically every form of lace and embroidery that is not a luxury, but a necessity in civilized life among decent people. It is an imposition upon the efforts of the women of the country to make themselves more beautiful. Of course, that is difficult to do. It is like painting the rose, but they have the right to try.

The Tariff Commission and the Department of Commerce have brought the information down to August 1, 1922. On the embroidery and laces which are now comprehended under the 90 per cent rate of duty, they say that the letter of the appraiser of New York of August 1, 1922, indicates gross profits

of 60 per cent and on the basis of the profits applied to the foreign article the duty necessary to equalize would figure 43 per cent.

After figuring on those articles that really show a difference in cost of production at home and abroad, certain forms of laces and embroideries which are covered in the bill and were largely separated from the others, they said 43 per cent was all that was necessary.

They say further that figured on three actual transactions under subdivision (B) as separated by the Tariff Commission on the selling price of the domestic goods, the duty necessary to equalize was 17 per cent. In place of that the Senate Finance Committee has asked for a duty of 90 per cent on the laces and embroideries which approximate laces in their manufacture and use, and 75 per cent on the remainder. This is simply another evidence of an embargo for the purpose of protecting a few manufacturers in the country.

Instead of the amendment which I sent to the desk, I move to amend the paragraph by striking out "90" where it appears and inserting in lieu thereof "75," so that the highest rate of duty on any of these items may at least come within the enormous ad valorem of 75 per cent.

The PRESIDING OFFICER. The Senator's time has expired. The question is on the amendment of the Senator from South Carolina to the amendment, which will be stated.

The READING CLERK. On page 194, paragraph 1430, laces, in line 16, strike out "90" and insert "75."

Mr. McLEAN. Mr. President, I merely wish to say that this paragraph as it is written in the bill was prepared by the Tariff Commission with the advice of the experts, so far as the description of the articles is concerned, the designation of the laces and the embroideries. It is a very dangerous thing at this stage of the proceedings to undertake to differentiate or change the rates, provided we want to protect the industry in this country against destructive competition from abroad.

Mr. President, I simply call attention to the fact that the competition is so fierce that it is three or four times the American production, and yet the Senator from South Carolina has said that there is no danger to the industry. It now has a 60 per cent duty under the Underwood law, and had a 70 per cent duty under the Payne-Aldrich law, and yet he thinks that an additional 15 per cent would operate as an embargo. In 1914 we imported $48,000,000 worth; in 1918, $22,000,000 worth; in 1919, $30,000,000 worth; in 1920, $50,000,000 worth; in 1921, $42,000,000 worth; and the total production in the country this year was about $12,000,000.

Mr. SMITH. Mr. President——

Mr. McLEAN. I decline to yield. Nearly all the plants in this country to-day are practically shut down. There are 50,000 men and women out of employment as the result, and unless we give them reasonable protection it means that American consumers will be at the mercy of the importers.

I favor this rate in the interest of the consumer. Unless we give some protection to the industry in this country and stimulate competition here, those who want to buy these luxuries will pay three times for them what they pay now.

I do not know where the Senator gets his information as to the necessity for the rates he proposes.

Mr. SMITH. I get it from the Tariff Commission and from the Department of Commerce. There is no justification at all for the rates, save to put on an embargo in favor of the domestic manufacturer.

Mr. McLEAN. I want to say again that the very lowest rate reported in the Reynolds investigation is 90 per cent.

Mr. SMITH. Brought down to what date?

Mr. McLEAN. They can manufacture these laces to-day——

Mr. SMITH. The Senator is quoting from the Reynolds report brought down to what date? What is the date of the Reynolds report from which he is quoting? I have that information brought down to August 1, and they state that 43 per cent is sufficient.

Mr. McLEAN. I do not know where the Senator got his information. I do not know where he got the samples which he exhibited the other day; but I do know that wages in the competing countries are lower than they were in August last.

Mr. SMITH. The Senator declined to yield to me to answer a question in his time, but I have the information from the officials——

The PRESIDING OFFICER. The Senator from South Carolina is out of order. The time of the Senator from Connecticut has expired.

Mr. PEPPER. Mr. President, the best that can be said in favor of the amendment offered by the Senator from South Carolina is that it is an arbitrary and unreasoned reduction of a rate arrived at by the application of a scientific calculation. There is no reason at all, except the reason of expediency, as to what may be accomplished by an amendment which leads to the fixing of 75 per cent rather than 70 or 65.

The fact is, Mr. President, that a most careful calculation shows that even a rate of 90 per cent, extravagant as the statement may sound, is wholly inadequate by way of protection as to some of the articles which are covered by the paragraph. The fact is that the 90 per cent rate, large as it seems, is inadequate to cover some of them and barely covers in other cases. I believe it is true that if we were to subdivide the paragraph and assign a separately calculated rate to each item or bracket, in a few instances—perhaps two—a rate lower than 90 per cent could be justified, but that is exceptional and is necessarily incident to the classification in bulk, which is the only feasible way to handle the schedule.

Upon the whole, sir, the 90 per cent rate, I submit, is shown by the facts to be necessary for protection in practically all the cases and inadequate for protection in several of them. To reduce would mean to create the consequences which the Senator from Connecticut has so clearly pointed out. I hope the amendment will not prevail.

Mr. FLETCHER. Mr. President, I have received some telegrams protesting against these very high rates. My information is that the higher classes of goods under the 90 per cent ad valorem rate are not produced in this country at all; that we make only the lower grades, and that those are really the competing articles. I shall not have time to go into the details, but I wish to read the following telegram:

[Western Union telegram.]

The Glenham Embroidery Co., Beacon, N. Y., the largest embroidery factory in the United States, with bleaching facilities equal to the best Swiss standard, is at a complete standstill at present, respectfully requests your consideration on the embroidery tariff schedule. Founded in 1911 with a capital investment of one and one-half millions of dollars, we reached an output of over $2,000,000. The war seriously curtailed the creation of fashions in Europe favoring embroideries; practically eliminating them as a fashionable article for women's wear. A higher duty would act as a boomerang to our domestic industry as it would eliminate the importation of fashionable embroideries. The success of the domestic embroidery industry is reflected by the fashions shown in Europe and imported into the United States. A higher protective tariff would protect our industry to death. We respectfully suggest to uphold present rates of duty on the basis of which we can successfully compete in the United States.

THE GLENHAM EMBROIDERY CO.

This company ought to know what they are talking about. It seems that the rates ought not to be increased as provided in the committee amendment.

Mr. McLEAN. Mr. President, in reply to my statement the Senator from North Carolina asked what the tariff information report shows as to profits. It shows that they are making anywhere from one to two hundred per cent on these laces at the present rate.

Mr. SMITH. Mr. President, on my amendment I ask for the yeas and nays.

The yeas and nays were ordered and the reading clerk proceeded to call the roll.

Mr. HARRISON (when his name was called). I have a pair with the junior Senator from West Virginia [Mr. ELKINS]. I am unable to obtain a transfer. If permitted to vote, I should vote "yea."

Mr. POMERENE (when his name was called). Again announcing my pair with my colleague, the junior Senator from Ohio [Mr. WILLIS], I transfer that pair to the senior Senator from Texas [Mr. CULBERSON] and vote "yea."

Mr. CURTIS (when Mr. TOWNSEND's name was called). The Senator from Michigan [Mr. TOWNSEND] is paired on this question with the Senator from Wisconsin [Mr. LA FOLLETTE]. If the Senator from Michigan were present and permitted to vote he would vote "nay," and if the Senator from Wisconsin were present and were permitted to vote he would vote "yea."

The roll call having been concluded, the result was announced—yeas 27, nays 39, as follows:

YEAS—27.

Ashurst	Hitchcock	Ransdell	Stanley
Borah	Jones, N. Mex.	Reed, Mo.	Swanson
Capper	Kellogg	Robinson	Trammell
Fletcher	McKellar	Sheppard	Underwood
Gerry	Myers	Shields	Walsh, Mass.
Glass	Overman	Simmons	Walsh, Mont.
Heflin	Pomerene	Smith	

NAYS—39.

Ball	Ernst	McLean	Reed, Pa.
Brandegee	Frelinghuysen	McNary	Shortridge
Broussard	Gooding	Moses	Smoot
Bursum	Hale	Nelson	Stanfield
Calder	Jones, Wash.	New	Sterling
Cameron	Kendrick	Newberry	Sutherland
Colt	Keyes	Nicholson	Wadsworth
Curtis	Lodge	Oddie	Warren
Dillingham	McCormick	Pepper	Watson, Ind.
Edge	McCumber	Rawson	

NOT VOTING—30.

Caraway	Harreld	McKinley	Spencer
Culberson	Harris	Norbeck	Townsend
Cummins	Harrison	Norris	Watson, Ga.
Dial	Johnson	Owen	Weller
du Pont	King	Page	Williams
Elkins	Ladd	Phipps	Willis
Fernald	La Follette	Pittman	
France	Lenroot	Poindexter	

So Mr. SMITH'S amendment to the amendment made as in Committee of the Whole was rejected.

The PRESIDING OFFICER. The question recurrs on concurring in the amendment made as in Committee of the Whole.

The amendment was concurred in.

The PRESIDING OFFICER. The Chair understands that the request that the amendment relating to leather be reserved has been withdrawn.

Mr. CALDER. I have withdrawn my request for that reservation.

The PRESIDING OFFICER. Without objection, the amendment made as in Committee of the Whole will be concurred in.

The next reserved amendment was on page 198, paragraph 1435a, harness and saddlery, which had been reserved by Mr. MCLEAN.

Mr. MCLEAN. I offer an amendment to the amendment made as in Committee of the Whole.

The PRESIDING OFFICER. The amendment proposed by the Senator from Connecticut to the amendment made as in Committee of the Whole will be stated.

The ASSISTANT SECRETARY. On page 198, in line 2, paragraph 1435a, it is proposed to strike out the words "valued at more than $40 each."

Mr. MCLEAN. Mr. President, the amendment which I desire to amend applies to saddlery, saddles, and parts thereof. Originally the recommendation of the Committee on Finance was that a duty of 35 per cent ad valorem be imposed on these articles. However, when the Senate put hides on the free list it also, in a spirit of resentment, I think, put a great many things which are composed of leather upon the free list which ought to have reasonable protection. Among those articles are saddles and saddlery. We give traveling bags, suit cases, and trunks an ad valorem duty of 35 per cent. Those articles are made of leather, and the labor cost in making the saddle is probably about the same as it is in making these other articles.

More than that, Mr. President, the hardware which goes into a saddle pays an ad valorem duty of 35 per cent, and the pigskin which goes into the seat of the saddle pays a duty of 20 per cent.

The Senator from Florida last night called the attention of the Senate to a discrimination in the tariff upon grapefruit. The rate on grapefruit was originally fixed, I think, at the request of some very commendable American citizens who make their homes in the Isles of Pines. I do not think that the committee considered the injustice that would result to the producers of grapefruit in Florida by that discrimination in the first instance, and we were quite willing to remedy that clear discrimination. I want to say to the Senator from Florida and the other Senators on his side of the Chamber who want to be just in these matters that the ad valorem rate provided for grapefruit is, I am told by the experts, in excess of 35 per cent ad valorem. In the case of saddles and saddlery, we have a manufactured article which is produced in this country, the labor cost of which is high and on which Canada imposes a duty of 35 per cent.

I appeal to the sense of justice of the Senate to let this amendment go to conference, because unless the producers of saddles and saddlery secure this protection they will be obliged to pay a high rate upon their hardware; they will be obliged to pay a high rate upon their pigskin; and yet they will get no protection whatever. Furthermore, Canada may sell like articles in this country free of all duty, while if we want to sell a similar article in Canada we will have to pay a duty of 35 per cent ad valorem.

I am sure Senators from the great States of the West who regretted the vote which put hides on the free list will realize that it is not fair to carry that rule to these highly manufactured articles. Certainly, if we leave a rate of 35 per cent upon suit cases and trunks, we ought to give the same protection to the manufacturers of saddles and saddlery.

Mr. MCCUMBER. Mr. President, the rates originally proposed upon hides, raw or uncured, or green or pickled, was 2 cents per pound, and on dried hides 4 cents per pound. Those rates were recommended in the interest of the producers of hides. When the Senate voted upon that question, rejected the amendment, and placed hides upon the free list, it was contended that there should be no duties levied upon leather or upon the products of leather made from the hides. The tanner said, "If you will give us free hides, we will not ask for any duty upon leather." The manufacturer of shoes said, "If you will give us free hides, we will not ask for any duty upon shoes." So we gave them free hides.

We did modify the rule in the committee to a certain extent. We said, "Inasmuch as the farmer now gets no protection for his hides, the leather goods which he ordinarily buys, such as harness, he shall also have free." The farmer, however, does not buy $100 harness sets; he does not buy $70 harness sets. The fancy-priced harness sets are purchased only by those in the cities who can afford to keep horses and who can afford the expense of maintaining them in the city. We ascertained that there are coming over from Great Britain harnesses for which such people would pay any price, and so we said, "If the harnesses are worth more than $70, a duty upon them must be paid." I am willing to leave it in that shape; but I am not willing to agree to the position of the Senator from Connecticut that all harnesses, no matter how cheap, shall take a rate of duty of 35 per cent.

Mr. MCLEAN. Mr. President——

Mr. MCCUMBER. I yield to the Senator.

Mr. MCLEAN. We are not talking about harness now; we are talking about saddles, and I want to say to the Senator that a good saddle can be bought at retail for $20.

Mr. MCCUMBER. I understood that the Senator had two amendments, the first relating to harness.

Mr. MCLEAN. I called up the saddle amendment first, and we are now discussing that.

Mr. MCCUMBER. Then the Senator is discussing the second one. I will only say, in reference to that, that I have no objection to having a compensatory duty upon the saddles that are made out of pigskin and other skin that is dutiable, and I am willing to vote for an amendment that might be suggested by the Senator which will bring about that result; but I am unalterably opposed to giving a duty upon that which is made of cowhide, where no duty is placed upon the raw material.

The PRESIDING OFFICER. The Secretary will state the amendment.

The READING CLERK. On line 2 it is proposed to strike out the words "valued at more than $40 each."

Mr. MCLEAN. Mr. President, I will say that that will leave the duty on saddles at 35 per cent ad valorem.

Mr. JONES of New Mexico. Mr. President, I do not know of any saddles in my country that are made out of pigskin. If the Senator from Connecticut will change his amendment, and make it relate only to pigskin saddles, I do not know that we would have very much objection to it.

Mr. MCLEAN. I will say to the Senator from New Mexico that the experts inform me that the seats of all saddles are made of pigskin.

Mr. JONES of New Mexico. That demonstrates that the experts do not know it all. If there is a cowboy saddle in the country that is made out of pigskin, I do not know where you will find it. It simply is not the fact. You can not find a saddle in New Mexico or the West anywhere, used on the ranges, that is made out of pigskin; and it is going to be a sorry story to take back to the cattlemen of the West that you put their hides on the free list and taxed the saddles which they ride in taking care of their cattle.

Mr. MCLEAN. Mr. President, at 9 o'clock last night the Senator voted for a tariff of 80 per cent ad valorem on sugar, which the cowboy uses at times.

Mr. JONES of New Mexico. That is another story, Mr. President.

Mr. MCLEAN. Yes; of course.

Mr. JONES of New Mexico. It has no connection with this. We are talking about these saddles that are made out of leather. I think the Senators who come from the western section of the country, where they ride leather saddles, will meet with some embarrassment in attempting to explain why they declined to put a tariff upon hides and then put it upon leather saddles.

Mr. MCLEAN. If you destroy this industry in this country, and they are dependent upon foreign countries for their saddles, they will realize what it means.

Mr. JONES of New Mexico. I have heard that argument before, and I take no stock whatever in it. If the Senator will change his amendment so as to put a tariff upon pigskin saddles, I shall not have a word further to say; but when it includes leather saddles I protest.

Mr. MCLEAN. I ask for the yeas and nays on my amendment.

Mr. UNDERWOOD. Mr. President, just a word.

This leather schedule and hides are on the free list now Nobody has been "broke" under the present condition. For months the leather and the shoe people were standing in the

corridors of this Capitol saying that if they could get free hides they were willing to put everything else on the free list. The manufacturers said that. We gave them free hides, and I think we gave them to them properly; but if, after giving them free hides, they are going to take the back track we might as well find it out now. I hope the roll will be called so that we can find out who are in favor of taking the back track on this schedule after we have put hides on the free list.

Mr. LODGE. Mr. President, I took some part in securing free hides; and I stated here what I was informed by all the boot and shoe manufacturers and all the tanners, that they were willing that all their products should be placed on the free list if they had free hides. The Senate has given them free hides; and articles made out of cattle hides—bovine hides, as the bill calls them—ought to remain on the free list, in my judgment. Personally, I should be acting in bad faith if I were to attempt to put a duty on manufactures of hides, which have been put on the free list.

Mr. HEFLIN. Mr. President, I do not hear from my good friend from Idaho [Mr. GOODING], who is generally alert and looking out for the interests of the western farmer and cattleman. When his friend the Senator from Connecticut is seeking——

Mr. GOODING. Mr. President, I will state to the Senator from Alabama——

The PRESIDING OFFICER. Does the Senator from Alabama yield to the Senator from Idaho?

Mr. HEFLIN. In just a moment. In the closing hours of this tariff debate the Senator from Connecticut [Mr. MCLEAN] seeks to levy a tax upon articles made of leather. I think the people ought to know who their friends are, and I think they are entitled to hear from their friends, and I yield to the Senator from Idaho just for a brief interruption, because my time is limited.

Mr. GOODING. I want to say to the Senator that I have been voting for protection in the interest of the laboring man. I believe that the manufacturers of harness and saddles in the East employ a great deal of labor, and I am going to vote for protection to that industry.

Mr. HEFLIN. Mr. President, I wanted to smoke out the Senator from Idaho.

Mr. GOODING. The Senator did not have any trouble about it.

Mr. HEFLIN. I see that I did not. The Senator has become very bold, and he has now come squarely up to the side of his friend, the Senator from Connecticut, and votes for rates that are sky-high on the things that are protected in his State, while the Senator from Idaho has been content with practically nothing for the people of his State. This proposition provides for free hides, free leather, and high protection upon the leather goods that the farmers of his State must buy and that all the people in Idaho must buy.

The Senator from Idaho boasts in the closing hours of this debate that he is with the Senator from Connecticut in taxing leather goods, harness, and saddles. The Senator from Connecticut would not know a pigskin saddle from a leather suitcase. He is advocating a tariff of this sort to tax every cowboy's saddle in the West, and every other person who buys saddles.

The Senator from Connecticut reminds me of the city chap from one of the cities in his State who went out into the country and while taking a meal with a farmer became jubilant over the rich yellow butter served and inquired: "Where do you get this butter?" The farmer's wife said: "We keep a cow." Then they passed him the honey, and when he tasted it he exclaimed with interest: "Do you keep a bee?" [Laughter.] So the Senator from Connecticut, Mr. President, has shown fully as much knowledge of the subject of pigskin saddles as this constituent of his did about honey.

Mr. MCLEAN. Mr. President——

Mr. HEFLIN. I yield to the Senator.

Mr. MCLEAN. I think the rate we are asking for on saddles is just about equal to the rate on graphite. [Laughter.]

Mr. HEFLIN. Mr. President, I want to say to the Senator, in reply to that, that the graphite industry in the United States under Republican rule is already prone upon its back, but saddle-producing pigs that the Senator is seeking to protect are still able to root around. [Laughter.]

Mr. President, let the country know that the people have been deceived; that although the Republican leaders indicated to them that they were to have free hides, free leather, free boots, and free shoes, in the closing hours of the debate they are seeking in the New England States to slip in leather goods and tax the whole American people. Let the record at least show what they are doing here.

Mr. GOODING. Mr. President, I have stood upon this floor and defended the great principle of protection in the interest of the laboring man. Now, because the cattle growers of the country are not given protection on hides, I am not going, just merely for what I should consider spite work, to destroy the harness industry and the saddle industry in the East.

I do not think we have been treated fairly. I think it was an outrage on the part of New England when they voted to put hides upon the free list. I am a protectionist upon principle, not because I want to see the cow men of the West get protection on hides or the woolgrowers get protection on wool. If there is anything in protection at all, there is a principle involved that goes all the way through. There is only one man interested in it, in my judgment, and that is the laboring man. If he is willing to work in this country just as cheaply as they do in England and other foreign countries making saddles, we would not need any protection; but who would have him do that? No friend of the laboring man would ask him to do that.

So I am going to vote for protection on saddles and on harness if it comes up, so that the American laboring man, whose employment I am interested in, will not have to work as cheaply as they do in foreign countries and, above everything else, will have a job and an income to keep the wolf from the door.

Mr. HEFLIN. Mr. President, will the Senator yield?

Mr. GOODING. Yes; I yield.

Mr. HEFLIN. Will not the Senator give some consideration to the man who buys the harness made out of this leather, and the saddles made out of this leather? Does the Senator consider how he is to keep the wolf from the door——

Mr. GOODING. Yes; I have considered that.

Mr. HEFLIN. When he has to pay high prices for everything he has to buy?

Mr. GOODING. I do not yield any further, Mr. President. I know this—that the farmers of this country can not be prosperous unless the manufacturers are prosperous. The farmer can not sell his products unless the wheels of industry in the East are moving and the labor is employed, nor can the manufacturers of this country be prosperous unless the farmers are prosperous. That is why I am for protection all the way through. It does not make any difference where the article is produced. When it came to grapefruit in Florida, I voted for it. Wherever the product is grown or produced or manufactured, I have stood upon this floor and voted for protection on it, and I am going to vote that way to the end. I can defend my principle before an intelligent audience anywhere in America. If the Senator does not think so, let him come on and see.

Mr. BURSUM. Mr. President, when the Senate adopted free hides it was generally understood—at least I so understood—that we would have free leather goods produced from hides. It seems to me that to take any other course at this time would not be keeping the faith. If there is any hardware which is necessary in the manufacture of saddles, it seems to me that that portion of it should be taken care of in the shape of a compensatory duty, and if it is not already taken care of I should be very glad to support that part of it. They would be entitled to a compensatory duty so far as the hardware is concerned which is included in the manufacture of saddles, which is given an extra duty.

Mr. MCLEAN. I will say to the Senator from New Mexico that the hardware that goes into harness and saddles bears a rate of 35 per cent ad valorem.

Mr. BURSUM. That is on the hardware?

Mr. MCLEAN. Yes; if they import that hardware in the saddle or in the harness, it comes in free.

Mr. BURSUM. I understand that thoroughly, and it would not be unjust to allow a compensatory duty on the hardware which is used in the saddle if that can be figured out. But to place any duty or any protection on the manufactured articles, so far as the leather is concerned, would not be keeping faith.

Mr. MCLEAN. I make this suggestion to the chairman of the committee, as he proposed this rate. He will be chairman of the conference committee——

The PRESIDENT pro tempore. The Senator from Connecticut has already spoken once upon this subject and he is not now in order.

Mr. MCLEAN. I merely desired to say that if we let it go to conference it will be entirely within the control of the Senator from North Dakota.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment proposed by the Senator from Connecticut to the amendment made as in Committee of the Whole.

Mr. UNDERWOOD. I ask for the yeas and nays.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. WATSON of Georgia (when his name was called). I have a pair with the Senator from California [Mr. JOHNSON]. If present he would vote "yea," and if free to vote I would vote "nay."

The roll call was concluded.

Mr. POMERENE. I am paired with my colleague [Mr. WILLIS], but I have been advised that if he were present he would vote as I shall vote. I therefore vote. I vote "nay."

Mr. HARRISON. I have a pair on this vote with the junior Senator from West Virginia [Mr. ELKINS]. I understand that if he were present he would vote as I intend to vote, so I vote. I vote "nay."

The result was announced—yeas 12, nays 57, as follows:

YEAS—12.

Brandegee	Dillingham	Gooding	Nicholson
Calder	Ernst	Keyes	Pepper
Cameron	Frelinghuysen	McLean	Shortridge

NAYS—57.

Ashurst	Heflin	Newberry	Stanfield
Ball	Hitchcock	Oddie	Stanley
Broussard	Jones, N. Mex.	Overman	Sterling
Bursum	Jones, Wash.	Phipps	Sutherland
Capper	Kellogg	Pomerene	Swanson
Colt	Kendrick	Ransdell	Trammell
Culberson	Lenroot	Rawson	Underwood
Cummins	Lodge	Reed, Mo.	Wadsworth
Curtis	McCumber	Reed, Pa.	Walsh, Mass.
Dial	McKellar	Robinson	Walsh, Mont.
Fletcher	McNary	Sheppard	Warren
Gerry	Moses	Shields	Watson, Ind.
Hale	Myers	Simmons	
Harreld	Nelson	Smith	
Harrison	New	Smoot	

NOT VOTING—27.

Borah	Glass	McKinley	Spencer
Caraway	Harris	Norbeck	Townsend
du Pont	Johnson	Norris	Watson, Ga.
Edge	King	Owen	Weller
Elkins	Ladd	Page	Williams
Fernald	La Follette	Pittman	Willis
France	McCormick	Poindexter	

So Mr. MCLEAN'S amendment to the amendment made as in the Committee of the Whole was rejected.

Mr. MCLEAN. I withdraw the second amendment.

The PRESIDENT pro tempore. The Senator from Connecticut withdraws the second amendment to paragraph 1435a. The question now is, Will the Senate concur in the amendment made as in Committee of the Whole?

The amendment was concurred in.

The READING CLERK. The next reserved amendment is on page 199, line 15, paragraph 1428, "ivory tusks," reserved by the Senator from New York [Mr. CALDER].

Mr. CALDER. I reserved an amendment in that paragraph, but I shall not press my amendment to it.

The PRESIDENT pro tempore. The question is, Will the Senate concur in the amendment made as in Committee of the Whole?

The amendment made as in Committee of the Whole was concurred in.

The READING CLERK. The next reserved amendment is on page 201, paragraph 1444, "rosaries, chaplets," and so forth, reserved by the Senator from Missouri [Mr. REED].

The PRESIDENT pro tempore. The question is, Will the Senate concur in the amendment made in this paragraph as in Committee of the Whole?

The amendment was concurred in.

The READING CLERK. The next reserved amendment is, on page 228, paragraph 1624, "fish," reserved by the Senator from Massachusetts [Mr. LODGE].

Mr. LODGE. Mr. President, that which I desire to speak about is an amendment which was adopted as in Committee of the Whole, but which does not appear in the print of the bill. This is an amendment to follow the fish paragraph, paragraph 1624. The committee adopted this amendment:

No fish packed or frozen in a foreign country shall be exempt from duty under this paragraph.

That does not appear in the print of the bill, but it is what was adopted. The amendment was offered by the junior Senator from Washington [Mr. POINDEXTER] in a very different form, first, relating only to northwestern fisheries. There was a good deal of running debate upon it, and the amendment was withdrawn and changed a good deal on the floor and finally reached the form which I have read.

Since then I have given the matter some attention, and I think that this is an amendment, as it stands, which would be very harmful, certainly to the fisheries on the eastern coast, I think to the Lake fisheries, and perhaps to others, for it entirely takes away the privilege of transporting fish, the product of American fisheries, in bond anywhere into this country. It puts a duty on all fish the product of American fisheries coming into this country in bond.

Take the case of the fisheries with which I am most familiar, the eastern fisheries, the bank fisheries. The "bankers," as they are known, go to the Great Banks and fish. At a certain time they have to get additional ice. They may have a small fare or a large fare, but they have to return to get ice and supplies. If they are obliged to go to Gloucester or to Boston, of course it takes nearly double the time which would be occupied in going to Halifax, shipping their fish in bond to the United States, getting their ice and provisions, and going back to the banks. It would put a very great burden upon those fishermen. It would also put a great burden on consumers generally.

Of course, the privilege of transporting fish in bond is a mutual privilege with Canada, and I should be very sorry to see this country and our fishing interests deprived of that privilege. Of course, it is not here limited to Canada. It would affect every part of the country, and for that reason I hope this amendment, in the form in which I have read it and in which it was adopted, will not be accepted by the Senate.

Mr. MCCUMBER. Mr. President, I think a word ought to be said as to the genesis of this provision. The Senator from Washington first introduced that amendment, the purpose of which was to require that all fish caught around Puget Sound should be brought into American ports before they could be received in the United States at all without paying the duties.

I objected to it at the time on the ground, mainly, that it was an attempt to compel fishermen to take their products into an American port, although they might do better by bringing them into a Canadian port, and under the provision as it was drawn if they brought them into a Canadian port and shipped them over the Canadian Pacific they could not come into the United States at all; the catch would not be admissible in our markets. The whole purpose of that was to divert the fish from a Canadian port into Ketchikan. I think that is the name of the American port. The Senator from Washington then modified his amendment and I agreed that it might go in in the form in which we now have it and go to conference. As now contained in the bill, it reads:

No fish packed or frozen in a foreign country shall be exempt from duty under this paragraph.

Upon second consideration I am even yet doubtful of the propriety of it in that form, but I think the Senator from Washington [Mr. JONES], who is now in the Chamber, possibly can explain it.

Mr. JONES of Washington. I did not know the matter had been reserved.

Mr. LODGE. It was printed in the list and I gave due notice of it.

Mr. JONES of Washington. I did not understand that the notice covered paragraph 1624.

Mr. LODGE. That is where it was in the bill.

Mr. JONES of Washington. The situation is this. The matter was discussed very extensively. The embargo proposition which I presented to the Senate was discussed very fully. While the Senate concluded not to put that in, I think as the result of the discussion the Senate, practically with unanimity, inserted the amendment in question.

It was deemed necessary to have some provision and I hope that the proposition will be allowed to go to conference. Of course, I have not the time to discuss it again in five minutes, but the situation is very serious in our section, and that is what we were trying to take care of with the provision I offered and which was discussed for a full day. As a result of that discussion, we adopted the proposition which was accepted, I believe, by everyone.

I think that at this time at any rate it ought not to be disturbed, but the matter ought to go to conference and we ought to allow the conferees to work it out so as to take care of the situation in our section and other sections if it is necessary to do so. I did not have in mind, of course, any situation in the other sections of the country and supposed that Senators from those sections were satisfied; in fact, I never had any intimation to the contrary. I did not know as a matter of fact that the amendment had been reserved and I overlooked the fact that the bill as printed did not show the amendment that was put on.

Mr. LODGE. That is the difficulty. We have not had the bill reprinted. I wish we had.

Mr. JONES of Washington. The bill was printed as originally reported from the committee.

Mr. LODGE. If it were only a local matter I would not desire to interfere with it, but it is a nation-wide proposition.

Mr. JONES of Washington. I would not object if the proposition came out of conference in that shape. It would suit me entirely.

Mr. NELSON. Mr. President, in the form in which the amendment is now worded, it is really a tax on exports and violates in principle that provision of the Constitution which says there shall be no tax on exports from the United States. As I understand the amendment, it requires the tax to be paid before the fish can be sold in this country.

Mr. LODGE. Yes; they have to pay the duty.

Mr. NELSON. It may be that as to Alaska, being in the unfortunate position of not being a State, it would be held that the provision did not apply, but it does apply to the States.

Mr. LODGE. It applies to everything.

Mr. NELSON. I think it violates the provision of the Constitution which prohibits an export tax.

Mr. LODGE. It applies to Alaska. It reads:

> No fish packed or frozen in a foreign country shall be exempt from duty under this paragraph.

It covers Alaska and everywhere else. I confess I can not assent to concurring in the language as it stands. If it is modified I would have no objection to it.

Mr. JONES of Washington. If the Senator suggests a modification I would have no objection to it including the words "northern waters of the Pacific."

Mr. NELSON. I do not know why the poor fishermen of Alaska should be discriminated against.

The PRESIDENT pro tempore. The Chair desires to understand the situation. Does the Senator from Massachusetts offer an amendment?

Mr. LODGE. No; my position is that the Senate should not concur in the amendment.

The PRESIDENT pro tempore. The Senator has spoken once upon the subject. The question is, Will the Senate concur in the amendment made as in Committee of the Whole?

Mr. JONES of Washington. I ask for the yeas and nays on the question.

The yeas and nays were ordered.

Mr. HITCHCOCK. I ask to have the issue stated.

The PRESIDENT pro tempore. The Secretary will state the amendment upon which the vote is to be taken.

The READING CLERK. On page 228, after line 15, in paragraph 1624, which reads:

> Oils, animal: Spermaceti, whale, and other fish oils of American fisheries, and all fish and other products of such fisheries; and all cod and cod-liver oil.

There was added the following:

> No fish packed or frozen in a foreign country shall be exempt from duty under this paragraph.

The PRESIDENT pro tempore. The Secretary will call the roll on concurring in the amendment.

The reading clerk proceeded to call the roll.

Mr. HARRISON (when his name was called). I am paired with the Senator from West Virginia [Mr. ELKINS]. Being unable to obtain a transfer, I withhold my vote. If permitted to vote, I would vote "nay."

Mr. POMERENE (when his name was called). Again announcing my pair with my colleague [Mr. WILLIS], I find that I am unable to obtain a transfer. If I were able to vote, I would vote "nay." I withhold my vote.

Mr. WATSON of Georgia (when his name was called). I am paired with the Senator from California [Mr. JOHNSON], who, if present, would vote "yea." If at liberty to vote, I would vote "nay."

The roll having been concluded, the result was announced—yeas 12, nays 55, as follows:

YEAS—12.

Brandegee	Curtis	Jones, Wash.	Oddie
Bursum	Ernst	McNary	Stanfield
Capper	Gooding	Nicholson	Sutherland

NAYS—55.

Ball	Glass	Myers	Simmons
Borah	Hale	Nelson	Smith
Calder	Harreld	New	Smoot
Cameron	Heflin	Newberry	Stanley
Colt	Hitchcock	Overman	Sterling
Culberson	Kellogg	Pepper	Swanson
Cummins	Kendrick	Phipps	Trammell
Dial	Keyes	Ransdell	Underwood
Dillingham	Lenroot	Reed, Mo.	Wadsworth
Edge	Lodge	Reed, Pa.	Walsh, Mass.
Fletcher	McCumber	Robinson	Walsh, Mont.
France	McKellar	Sheppard	Warren
Frelinghuysen	McLean	Shields	Watson, Ind.
Gerry	Moses	Shortridge	

NOT VOTING—29.

Ashurst	Johnson	Norris	Townsend
Broussard	Jones, N. Mex.	Owen	Watson, Ga.
Caraway	King	Page	Weller
du Pont	Ladd	Pittman	Williams
Elkins	La Follette	Poindexter	Willis
Fernald	McCormick	Pomerene	
Harris	McKinley	Rawson	
Harrison	Norbeck	Spencer	

So the amendment was nonconcurred in.

The PRESIDENT pro tempore. The Secretary will report the next amendment reserved.

Mr. SMOOT. Mr. President, there is one more amendment to the administrative provisions which was not noted until last night. I ask unanimous consent to offer the amendment at this time to correct the item on page 437. I send to the desk the amendment to which I refer.

The PRESIDENT pro tempore. Is there objection to the request of the Senator from Utah?

Mr. TRAMMELL. Mr. President, I shall object for the present.

Mr. SMOOT. It would take only a moment.

Mr. TRAMMELL. That is what I wanted to inquire.

Mr. SMOOT. It is simply to correct an administrative feature, something that we have to do.

The PRESIDENT pro tempore. Is there objection to the request of the Senator from Utah?

Mr. UNDERWOOD. In order to protect the rights of Senators who have amendments which they have reserved, I ask the Senator to withdraw his request for just a few moments.

Mr. SMOOT. I will withdraw it.

Mr. UNDERWOOD. I shall have no objetcion to the request when the proper time comes, but I think this list of reserved amendments should first be disposed of.

The PRESIDENT pro tempore. The Secretary will state the next reserved amendment.

The READING CLERK. Page 236, paragraph 1671a, relative to tomatoes, was reserved by Mr. TRAMMELL.

Mr. TRAMMELL. Mr. President, under the provisions of the House bill, and also under the provisions of the bill as reported from the Senate Committee on Finance, a duty of 1 cent per pound is fixed upon tomatoes coming into this country in their natural state from foreign countries. The Senator from Arizona [Mr. ASHURST] proposed an amendment to place tomatoes upon the free list during the months of December, January, February, March, and to April 15, the contention being made in support of that amendment that to allow the importation of tomatoes into this country free of duty during that particular period would not bring about any competition with the American product. That was the basis upon which the amendment, by a vote of 26 to 25, was adopted by the Senate a few days ago.

That idea, however, is erroneous when we consider the facts relative to the time of the harvesting and of the marketing of the tomato crop which is produced in certain parts of our own country, more particularly in the State of Florida. In Florida the tomatoes are harvested to begin with in December and January. In February the shipments become rather extensive; and during March and April we find there is the most extensive marketing of our crop of tomatoes. So if the amendment shall be adopted to this bill it will place tomatoes on the free list during the months of December, January, February, March, and for half of April. It will work the height of discrimination against the State of Florida; in fact, we might just as well strike from the bill the provision which fixes a duty upon tomatoes if we are going to except those particular months, because those are the months in which the American product has competition, and they have it not at any other time.

I have here telegrams from growers' associations, from extensive individual growers, and from the Board of Trade of Bradentown, Fla., supporting my statement that the Florida crop is marketed more or less in January; the market is extended quite largely during February; and that March and April are among the heaviest months of production and marketing in that State.

The only object and purpose of adopting this amendment are to allow some Americans living near Nogales, Ariz., who have gone over on the Mexican side to engage in the production of tomatoes, to bring those tomatoes in free, to allow brokers and others who are located in Nogales and who handle the marketing of the Mexican crop to have the benefit of bringing them in free during the months designated in the proposed amendment.

I feel, Mr. President, that it would be a great injustice to the State of Florida to select these particular months and allow importations of tomatoes free of duty at the time when they particularly come in competition with the Florida product.

During the months in question there are extensive importations from the West Indies, Bahamas, and Nassau. The products from these countries come directly in competition with our Florida tomatoes.

While you are writing a protective tariff law, if we are not going to extend its provisions to the Florida product, how can protection be justified upon the products of any other State in the Union by the advocates of the protective-tariff policy? Why should we say that we will fix this duty so that it will protect California during the time it is producing tomatoes and Texas during the time it is producing tomatoes, and probably Maryland and other States? If we throw down the bars and admit tomatoes free of duty during the months specified, it will encourage the production in Mexico, the West Indies, Nassau, and other countries as against this country. All the States that produce tomatoes will be interested because tomatoes will be imported for canning purposes, and canneries will be established along the Mexican and Arizona border, and the first thing we know in every State in the Union where the canning of tomatoes is being carried on we shall have competition with the Mexican tomato that is being canned in Arizona. I hope the amendment will not be adopted.

Mr. President, I ask the privilege of having certain telegrams with regard to this subject inserted in the RECORD in connection with my remarks.

There being no objection, the telegrams were ordered to be printed in the RECORD, as follows:

BRADENTOWN, FLA., *August 18, 1922.*

Hon. PARK TRAMMELL,
United States Senate, Washington, D. C.:

East coast shipment tomatoes heaviest during January, February, and March. West coast heaviest March, April, and May.

W. A. MANNING,
Secretary Bradentown Board of Trade.

—

GOULDS, FLA., *August 18, 1922.*

Hon. PARK TRAMMELL,
Washington, D. C.:

Answering your wire to Mr. Fletcher, marketing of tomatoes is begun and extends through months of December, January, February, March, April, and May. Tomatoes imported from points mentioned, months November, December, January, February, and March.

GOULDS FRUIT AND VEGETABLE GROWERS' ASSOCIATION.

—

PLANT CITY, FLA., *August 18, 1922.*

Hon. PARK TRAMMELL,
United States Senate, Washington:

Answering, Florida tomatoes marketed from January 1 to August 1. We should be protected over this period. West Indies and Nassau tomatoes imported from January to March, inclusive. We should have protection during first seven months of the year.

W. E. LEE.

—

JACKSONVILLE, FLA., *August 17, 1922.*

Hon. PARK TRAMMELL,
United States Senate, Washington, D. C.:

Shipments from West Indies, Nassau, and other countries south are heavy December and January. Shipments from Florida light in December and January; heavy February, March, April.

L. M. RHODES.

Mr. FLETCHER. Mr. President, I wish to point out with emphasis the effect of this amendment. If the Senate shall concur in this amendment, then practically all tomatoes produced in foreign countries will come into the United States free of duty, because there are no importations from foreign countries worth mentioning after the date fixed in this amendment. In other words, the effect of the amendment will be to put tomatoes on the free list, because there are no importations into this country after the 15th of April.

The amendment provides that for the months of December, January, February, March, and to the 15th of April there shall be no duty on tomatoes. All the importations from Cuba, from the Bahamas, from the West Indies, and from Mexico come to this country before the 15th of April, and none of them after that time. So we might just as well write off all duty on tomatoes as to concur in this amendment.

This matter came up suddenly the other day, and I had to rely upon my recollection and the best information I had at the time as to dates and figures, but the matter is much more serious than I even then supposed. In the first place, the absurd proposition is presented to the Senate for the first time, so far as I know, of having as to a particular commodity free trade during certain months of the year and protection during certain other months of the year. Outside of that, however, last season there were shipped into this country 20,000,000 pounds of tomatoes; so that a duty of 1 cent a pound means $200,000 revenue to the Government. If we adopt this amendment, we will destroy absolutely all prospect of deriving any revenue at all under the tariff, and we will admit all foreign-grown tomatoes into this country free of duty.

I made some inquiry as to that matter after the discussion the other day, and I have in my hand here a telegram from Mr. Thomas J. Peters, of Miami, Fla., who is one of the largest tomato growers in the State, and who is a gentleman of unimpeachable integrity. In reply to my inquiry he states that in Cuba, the Bahama Islands, and the West Indies they begin shipping in November and they finish in April. So the statement is absolutely correct that practically all importations from those countries, including Mexico, come into the United States prior to the 15th of April.

I ask at this point, Mr. President, that my telegram to Mr. Peters and his reply may be inserted in the RECORD.

There being no objection, the telegrams were ordered printed in the RECORD, as follows:

WASHINGTON, D. C., *August 16, 1922.*

THOMAS J. PETERS, *Miami, Fla.:*

Advise quick when Cuba and Bahamas usually begin and end shipping tomatoes. When growers lower east coast Florida usually begin shipping tomatoes. To what extent, if any, do such shipments from Cuba and Bahamas compete with lower east coast Florida?

DUNCAN U. FLETCHER.

—

MIAMI, FLA., *August 16, 1922.*

DUNCAN U. FLETCHER,
United States Senate, Washington, D. C.:

Replying, Cuba and Bahamas begin shipping tomatoes November; finish April; heaviest shipping January, February, and early March. East coast Florida begins small way December; finish June; heaviest shipping March, April, May. Cuba and Bahamas produce with cheap labor and with practically no fertilizer cost. Hard for us to compete because our labor is high and fertilizer cost alone here is more per acre that their entire cost of production. Their soil rich quality influenced by rain or irrigation, moisture releases excessive ammonia and nitrogen causing large vine growth with poor fruit which is detrimental to our markets. Dry seasons their quality is good. Shipments from lower Florida east coast November to June; last season more than 6,000 cars of tomatoes.

THOS. J. PETERS.

Mr. FLETCHER. I submit, Mr. President, that this amendment ought not to be concurred in. We will derive absolutely no revenue from the duty on tomatoes if the amendment is concurred in, and the shipments from foreign countries will find their place in the markets of this country at the very time when Florida is shipping her crop. Shipments from Florida begin in December and continue to June, the heaviest movement being in February, March, and April. They produced on the east coast of Florida last season 6,000 cars and quite as many more on the west coast and other portions of the State. I hope this amendment will not be concurred in.

The PRESIDENT pro tempore. The time of the Senator from Florida has expired.

Mr. ASHURST. Mr. President, I am sandwiched between two of the most perspicacious Senators, the senior Senator from Florida [Mr. FLETCHER] in front of me, and the junior Senator from Florida [Mr. TRAMMELL] behind me.

Neither of them has said, however, because it can not be said, what quantity of their tomatoes reach the Southwest. Tomatoes from Florida can not go the long distance of 2,000 miles and reach the market in western Texas, in New Mexico, and in Arizona. Mr. President, the truth is that only 4 per cent of the tomatoes from Mexico reach any market except that of the Southwest.

I need not pause at this hour, when every moment is precious, to tell the Senate that tomatoes are wholesome and nutritious and that they have abundant laxative and antiscorbutic properties. Cuba might produce and ship millions of pounds of tomatoes into Florida, but Cuban tomatoes would not reach the Pacific coast in the wintertime. The long distance of 2,000 miles would prevent it; the high freight rates would preclude the possibility of the people of the West getting tomatoes from Cuba.

It is true, fairness requires me to say, that the enterprising people of Florida are now attempting to develop a tomato market in California, and they have, indeed, in an experimental way—and if I am wrong I will yield time enough for the Senator from Florida to correct me—attempted to capture the California market, but they can not send their tomatoes 2,600 miles to the California market.

The PRESIDENT pro tempore. The question is, Will the Senate concur in the amendment made as in Committee of the Whole?

The amendment was nonconcurred in.

Mr. CAMERON. Mr. President, I should like to offer an amendment.

The PRESIDENT pro tempore. The Senator is not in order at this time. The Secretary will state the next amendment reserved.

The READING CLERK. On page 267, section 312, bonded smelting warehouses.

Mr. JONES of New Mexico. Mr. President, this morning when we voted upon the section on page 272—the presidential powers—I did not know that section 317a was coupled with the other. I ask unanimous consent to reconsider the vote by which section 317a was adopted this morning so that I may

get a vote upon my substitute for it, which has been explained before and which I will not discuss at any length.

Mr. McCUMBER. That is satisfactory.

Mr. JONES of New Mexico. Mr. President, the Senate will understand that this is an amendment proposed by me and heretofore discussed, enlarging the powers of the Tariff Commission. I will not take any time in discussing it, but I will ask that it be substituted for section 317a. It includes all of the powers already granted in section 317a and some others.

The PRESIDENT pro tempore. The Chair suggests that the amendment that has been reserved should be concurred in before the request for reconsideration is considered. The question is upon concurring in the amendment made as in Committee of the Whole.

Mr. JONES of New Mexico. If we have not already concurred in the amendment, I take it I have a right to offer this amendment now.

The PRESIDENT pro tempore. Section 312 has not been concurred in.

Mr. JONES of New Mexico. I do not object to that.

The PRESIDENT pro tempore. The question is on concurring in the amendment made as in Committee of the Whole to section 312.

The amendment was concurred in.

The PRESIDENT pro tempore. This completes the list of reserved amendments. The Senator from New Mexico [Mr. JONES] asks unanimous consent to reconsider the vote by which section 317a was concurred in, for the purpose of offering an amendment to that section. Is there objection?

Mr. UNDERWOOD. As I understand, under the agreement that was made, it is not necessary to move to reconsider. It is understood that reconsideration is already ordered in the case of amendments being offered.

The PRESIDENT pro tempore. As the Chair recollects, that agreement was applicable only to the action of the Senate on reserved amendments, and is not in force at this time. Is there objection?

Mr. FRELINGHUYSEN. Mr. President, what is the motion?

The PRESIDENT pro tempore. Does the Senator object?

Mr. FRELINGHUYSEN. I should like to know what the proposition is.

The PRESIDENT pro tempore. To reconsider the vote by which section 317a was concurred in in the Senate.

Mr. FRELINGHUYSEN. Mr. President, I understand that the object of this request is to propose a substitute for this section. The Senate has already voted upon that question. The substitute provides that the commission shall recommend to Congress rates of duty according to their findings laid down in specific rules under this substitute. I want the Senate to know what the substitute relates to. I will withhold any objection.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and the vote by which the amendment was concurred in is reconsidered. The Senator from New Mexico offers a substitute, which has already been read, and which will now be submitted to the Senate.

Mr. JONES of New Mexico. On the adoption of the substitute I ask for the yeas and nays.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. POMERENE (when his name was called). Again announcing my pair with my colleague [Mr. WILLIS], I find that I am not able to get a transfer, and I therefore withhold my vote. If at liberty to vote, I should vote "yea."

The roll call was concluded.

Mr. HARRISON. I have a pair with the junior Senator from West Virginia [Mr. ELKINS], who is unavoidably detained, and therefore withhold my vote. If at liberty to vote, I should vote "yea."

Mr. CURTIS. I have been requested to announce the following general pairs:

The Senator from Illinois [Mr. MCKINLEY] with the Senator from Arkansas [Mr. CARAWAY];

The Senator from Missouri [Mr. SPENCER] with the Senator from Georgia [Mr. HARRIS]; and

The Senator from Michigan [Mr. TOWNSEND] with the Senator from Wisconsin [Mr. LA FOLLETTE].

The result was announced—yeas 34, nays 36, as follows:

YEAS—34.

Ashurst	Culberson	Frelinghuysen	Hitchcock
Borah	Dial	Gerry	Jones, N. Mex.
Bursum	Edge	Glass	Jones, Wash.
Capper	Fletcher	Heflin	Kendrick
McKellar	Reed, Mo.	Simmons	Underwood
Myers	Reed, Pa.	Smith	Walsh, Mass.
Nicholson	Robinson	Stanley	Walsh, Mont.
Overman	Sheppard	Swanson	
Ransdell	Shields	Trammell	

NAYS—36.

Ball	France	McLean	Rawson
Brandegee	Gooding	McNary	Shortridge
Calder	Hale	Moses	Smoot
Cameron	Kellogg	Nelson	Stanfield
Colt	Keyes	New	Sterling
Cummins	Lenroot	Newberry	Sutherland
Curtis	Lodge	Oddie	Wadsworth
Dillingham	McCormick	Pepper	Warren
Ernst	McCumber	Phipps	Watson, Ind.

NOT VOTING—26.

Broussard	Harrison	Norris	Townsend
Caraway	Johnson	Owen	Watson, Ga.
du Pont	King	Page	Weller
Elkins	Ladd	Pittman	Williams
Fernald	La Follette	Poindexter	Willis
Harreld	McKinley	Pomerene	
Harris	Norbeck	Spencer	

So the amendment of Mr. JONES of New Mexico, in the nature of a substitute, to the amendment made as in Committee of the Whole, was rejected.

The PRESIDENT pro tempore. The question now is, Will the Senate concur in the amendment made as in Committee of the Whole?

The amendment was concurred in.

The PRESIDENT pro tempore. The amendments made as in Committee of the Whole, and reserved for separate votes, having now been disposed of, the bill is in the Senate and open to amendment.

Mr. SMOOT. Mr. President, I offer the amendment which I send to the desk and ask to have stated.

The PRESIDENT pro tempore. The amendment will be stated.

The READING CLERK. On page 437, line 14, it is proposed to strike out "and III," and insert in lieu thereof "III and V."

Mr. SMOOT. Mr. President, this becomes necessary on account of the action of the Senate in striking out section 321 of the bill, on page 286. It is simply a repealing clause of Title V of the existing emergency tariff law.

The PRESIDENT pro tempore. The question is on the amendment proposed by the Senator from Utah.

The amendment was agreed to.

Mr. FRELINGHUYSEN. Mr. President, I offer the amendment which I send to the desk.

The PRESIDENT pro tempore. The amendment will be stated.

The READING CLERK. In paragraph 213, on page 37, line 8, it is proposed to strike out the period and insert in lieu thereof a semicolon and the following:

Any of the foregoing articles containing 25 per cent or more of calcined bone, not painted, colored, tinted, stained, enameled, gilded, printed, or ornamented or decorated in any manner, 50 per cent ad valorem; painted, colored, tinted, stained, enameled, gilded, printed, or ornamented or decorated in any manner, 55 per cent ad valorem.

Mr. FRELINGHUYSEN. Mr. President, this amendment can not be objected to. It takes the bone china out of the paragraph and reduces the rate from 60 to 50 per cent on the undecorated and from 70 to 55 per cent on the decorated. It has been agreed to under a resurvey by the Tariff Commission and is a reduction in the present paragraph.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment.

The amendment was agreed to.

Mr. FRELINGHUYSEN. I offer the following amendment.

The PRESIDENT pro tempore. The Secretary will state the amendment.

The READING CLERK. On page 231 after line 14, the Senator from New Jersey moves to insert a new paragraph, as follows:

Par. 1639a. Radio vacuum tubes.

Mr. FRELINGHUYSEN. Those are the radio tubes used by amateurs. They now pay 40 per cent under the metal schedule. I ask that they be put on the free list, owing to the fact that they are largely used by amateurs and are much needed for research and experimentation.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment.

On a division, the amendment was agreed to.

Mr. CAMERON. I offer the amendment which I send to the desk.

The PRESIDENT pro tempore. The Secretary will state the amendment.

The READING CLERK. In paragraph 770, tomatoes, on page 113, line 16, strike out "1" and insert "one-half of 1," so that it will read:

Tomatoes, one-half of 1 cent per pound.

Mr. CAMERON. The rate I have proposed will make the duty one-eighth of a cent higher than the present rate, and there is no reason why it should not be adopted. I ask for the adoption of the amendment.

Mr. TRAMMELL. Mr. President, the whole basis of the effort to have this rate changed is to accommodate one little town down in Arizona. The secretary of the chamber of commerce of that town came here and said that seemed to be the center of the importation of Mexican tomatoes, and that while they consumed only about one carload a year the brokers handling the Mexican crops lived there; that about 77 per cent of the people operating the tomato industry in Mexico are Americans, and they wanted the rate reduced for the purpose of encouraging the Mexican industry to the detriment of the American industry.

There is no more reason why this should be reduced one-half cent a pound than there is that you should go a bracket or two above and reduce the rate on peas which are produced in other parts of the country, which is fixed at 1½ cents a pound. There are other items bearing a rate of 1 or 2 cents a pound. There is no more reason why you should reduce this than that you should reduce the 45 per cent ad valorem on tomato paste. The idea of giving them protection of 45 per cent ad valorem upon tomato paste and then proposing to reduce the rate upon the tomatoes themselves to one-half cent per pound. This is another piece of discrimination against the American farmer and in favor of the manufacturer.

One-half cent per pound, considering the rates carried in this bill, on everything else from a box of hairpins to a diamond ring, considering the demands upon the people of my section of the country and other sections of the country who are compelled to buy their goods in a protected market, is too low, and the rate should be allowed to remain at 1 cent per pound.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment proposed by the Senator from Arizona [Mr. CAMERON].

On a division the amendment was agreed to.

Mr. JONES of Washington. I offer the following amendment.

The PRESIDENT pro tempore. The Secretary will state the amendment.

The READING CLERK. On page 87, after line 14, insert:

And on the metallic nickel contained in ores of nickel and nickel matte.

Mr. JONES of Washington. There are two amendments, the other relating to the free list, and they ought to be acted upon together.

The READING CLERK. On page 229, in lines 10 and 11, after the word "gold," insert the word "or," and after the word "silver" strike out the words "nickel, and nickel matte."

The PRESIDENT pro tempore. By unanimous consent, these amendments will be considered together and voted upon at the same time.

Mr. JONES of Washington. The effect of this amendment will be to make the metallic contents of the nickel ore and nickel matte dutiable at the same rate as the manufactured nickel. I read now from a statement of the Chamber of Commerce of Seattle. It says:

There are no nickel mines in operation in the United States, but some nickel is produced as by-products from other ores mined in the United States. Several large deposits of nickel ores have been discovered in Alaska, and these are now under development.

They express the view that they need some protection. I am not going to take further time. I should like very much to have this amendment go to conference.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment offered by the Senator from Washington.

The amendment was rejected.

Mr. GOODING. I offer the following amendment.

The PRESIDENT pro tempore. The Secretary will state the amendment.

The READING CLERK. On page 111, line 14, after the words "soya beans," strike out "four-tenths of 1 cent per pound" and insert "1 cent per pound."

Mr. GOODING. Mr. President, I want to say that we do not grow any soya beans in Idaho. Four-tenths of 1 cent is not a protective duty. The raising of soya beans is becoming a great industry in the South, where the boll weevil is destroying the cotton, and in Indiana and other States, where the fertility of the soil is lost and where the farmers are leaving because of the poor soil.

The PRESIDENT pro tempore. The Chair is compelled to state that unless the vote heretofore had is reconsidered the amendment proposed by the Senator from Idaho can not be considered.

Mr. GOODING. I ask for a reconsideration.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and the vote is reconsidered. The question now is upon the amendment offered by the Senator from Idaho to the amendment made as in Committee of the Whole.

The amendment to the amendment was rejected.

The PRESIDENT pro tempore. Without objection, the amendment made as in Committee of the Whole is concurred in in the Senate.

Mr. BURSUM. Mr. President, I offer an amendment at the request of the Delegate from Porto Rico to restore the one-half cent per pound on coconuts, as provided by the House, and 3 cents on the manufactured article in this country. Porto Rico is dependent upon the protection which may be extended to her by the Congress. She is just as much entitled to this protection as any State in the Union would be. Porto Rico can not get along without it.

The PRESIDENT pro tempore. The amendment offered by the Senator from New Mexico can not be considered until the former action of the Senate is reconsidered.

Mr. BURSUM. I ask unanimous consent that it may be reconsidered.

The PRESIDENT pro tempore. The Senator from New Mexico asks unanimous consent that the vote by which the amendment made as in Committee of the Whole was concurred in in the Senate shall be reconsidered. Is there objection? The Chair hears none, and the vote is reconsidered. The question now is on agreeing to the amendment offered by the Senator from New Mexico to the amendment.

The amendment to the amendment was rejected.

The PRESIDENT pro tempore. Without objection, the amendment made as in Committee of the Whole is concurred in in the Senate.

Mr. SHORTRIDGE. I offer the following amendment.

The PRESIDENT pro tempore. The Secretary will state the amendment.

The READING CLERK. The Senator from California moves to strike out all of paragraph 1604, lines 6, 7, and 8, reading as follows:

PAR. 1604. Lemon juice, lime juice, and sour orange juice, all the foregoing containing not more than 2 per cent of alcohol.

Mr. SHORTRIDGE. Mr. President, just one sentence. In view of what the Senate has voted in respect to citric acid and citrate of lime, the adoption of this amendment will automatically carry those items into the section already adopted by the Senate, and if there is anything wrong in it the conferees can adjust it. I wish that the amendment may be adopted.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment proposed by the Senator from California.

The amendment was rejected.

Mr. CALDER. Mr. President, I submit an amendment on page 438, after line 15, adding a new section to the bill entitled "Officers of the customs and their duties." This section simply reorganizes the customs branch of the Government, and is recommended by the Treasury Department.

The PRESIDENT pro tempore. The Senator from New York offers an amendment, which, by unanimous consent, will be read——

Mr. ROBINSON. I inquire of the Senator from New York whether the amendment was presented to the committee.

Mr. CALDER. No; it was not.

Mr. ROBINSON. It has not been considered at all by the Committee on Finance; yet the Senator proposes to ask the Senate to adopt it within four minutes of the time when we must vote on the bill.

Mr. CALDER. It was submitted to the Secretary of the Treasury for his approval, and the recommendation came too late for the section to be incorporated in the bill.

Mr. SIMMONS. Let us vote on it.

Mr. JONES of New Mexico. I hope the amendment will be adopted.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment.

Mr. McCUMBER. I am willing that it may go in and receive consideration in conference, but that is all I can say for it.

Mr. REED of Missouri. I call for the reading of the amendment.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment. The Chair is of the opinion that the amendment is of such length that it could not be read before 4 o'clock.

Mr. CALDER. I ask unanimous consent that the question be put without having the amendment read.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment.

The amendment was rejected.

Mr. McCUMBER. I offer the following amendment.

The PRESIDENT pro tempore. The Secretary will report the amendment offered by the Senator from North Dakota.

The READING CLERK. On page 103 strike out lines 7 to 12, both inclusive, and insert in lieu thereof the following:

Par. 720. Herring and mackerel, pickled, salted, kippered, and otherwise prepared, preserved, 10 per cent ad valorem.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment.

The amendment was rejected.

Mr. PEPPER. I offer the following amendment, which I ask to have read by the Secretary.

The PRESIDENT pro tempore. The Secretary will state the amendment.

The READING CLERK. Insert on page 129, after line 22, a new paragraph to be numbered paragraph 915a, as follows:

PAR. 915a. Infants' and children's hose, selvaged, fashioned, seamless or mock-seamed, finished or unfinished, composed of cotton or other vegetable fiber, made wholly or in part on knitting machines, or knit by hand, of yarns of more than one color, valued at not more than $1 per dozen pairs, 45 cents per dozen pairs; valued at more than $1 and not more than $2 per dozen pairs, 50 cents per dozen pairs; valued at more than $2 per dozen pairs, 55 cents per dozen pairs; and in addition thereto, on all the foregoing, 35 per cent ad valorem.

Mr. PEPPER. Mr. President, the Senate has developed considerable facility in shouting a chorus of noes. This proposed amendment gives them an opportunity to vote unanimously in favor of an amendment which merely supplements the provisions of paragraph 915 by applying to the cheaper grades of children's hosiery a rate which is absolutely essential to give them protection against an increasing and destructive foreign competition. I press the amendment.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment proposed by the Senator from Pennsylvania.

The amendment was rejected.

Mr. SIMMONS. Mr. President, I ask unanimous consent to have printed in the RECORD, without reading, certain tables and data, a part of it furnished me by official experts assigned to the minority of the Committee on Finance in collaboration with the expert of the Fair Tariff League.

The PRESIDENT pro tempore. Without objection, it is so ordered.

The matter referred to is as follows:

Memorandum on sugar furnished by the expert of the Committee on Finance.

Fiscal years.	United States imports.	Domestic production.
	Pounds.	*Pounds.*
1921	6,700,000,000	.....
1922	7,900,000,000	.....
1923 (estimated)	8,500,000,000	4,000,000,000

Total	pounds	12,500,000,000
Estimated exports, 1923	do	2,000,000,000
United States consumption	do	10,500,000,000
Increase per pound to consumer		$0.015
Total increased cost to consumer		$157,500,000
1913 tariff rate, per pound		$1.00
Pending rate, per pound		$1.84
Increase, per pound		$0.84
Added spread from refiner to retailer, at 50 per cent, per pound		$0.42
Total, per pound		$1.26
Nearest one-half cent, per pound		$1.50
Increased revenue to Government:		
Net imports	pounds	6,500,000,000
Increased duty	do	$0.0084
Increased revenue to the Government		$54,600,000
Increased cost to consumer		$157,500,000

Wool schedule, calendar year 1921.

Articles.	Paragraph.	Difference in rate.	Underwood rate.	Senate rate.	Unit.	Imports, 1921.	Exports, 1921.	Production.	Consumption.	Increased cost.
Wool, raw, unmanufactured.	1101-04	33 cents pound	Free [4]	33 cents pound on cl. cont.	Pound	$308,996,851	$1,927,174	$224,564,000	[1] $572,499,000	$94,462,005
Wool wastes, including wool rags.	1105	.....	Free	23 cents pound	do	10,269,410	1,863,073	[2] 259,584,000	267,990,000	.....
Wool and hair—further advanced than scoured but not further advanced than roving (tops).	1106	.....	8 per cent equals 5 cents pound.	36 cents pound plus 25 per cent equals 52.5 cents pound.	do	15,370,000	.....	[2] 203,424,000	218,794,000	.....
Wool yarns	1107	.....	18 per cent equals 22.5 cents pound.	32 cents pound plus 40 per cent equals 82.5 cents pound.	do	5,135,000	.....	[2] 370,418,000	375,553,000	.....
Wool, cloths, dress goods, and flannels.	1108-09	10 cents pound [5]	35 per cent equals 69 cents pound.	40 cents pound plus 50 per cent equals 138.5 cents pound.	do	8,522,466	2,206,227	[2] 298,190,000	304,506,000	[6] 30,450,600
Wool carpets and carpeting.	1117-18	28 cents square yard.	50 per cent equals 2.78 cents.	55 per cent equals 3.06 cents.	Square yard.	1,600,000	.....	50,873,000	52,473,000	14,692,440
Total										139,605,045

[1] Consumption figures from Department of Agriculture.
[2] Production figures for 1919.
[3] Average production 1915-16-17.
[4] Consumption of wool on basis of 50 per cent shrinkage would be 286,248,500 pounds.
[5] Estimated.
[6] In view of small percentage of imports it is assumed that only one-third of protection rate will be effective.

Assuming that the pyramided profits will be at least 40 per cent, the total increased cost to the consumers would be $195,447,083.

Increases in rates on wool wastes, wool partially manufactured, and wool yarns have been purposely omitted because of the small ratio of imports to consumption, and moreover to include those duties on articles for further manufacture would be incorrect since the duty is reflected in the duty on fabrics

Cotton schedule, calendar year 1921.

Articles.	Difference in rate.	Underwood rate.	Senate rate.	Unit.	Imports, 1921.	Exports, 1921.	Production.	Consumption.	Increased cost.
Cotton having a staple of 1⅛ inches or more in length.	7 cents pound	Free	7 cents pound	Pound	$8,065,537	.....	.....	$16,451,000	$1,151,572
Countable cotton cloth	1 cent square yard [1]	7½ to 27½ per cent=23 per cent=6.9 cents.	15½ to 40 per cent=46 per cent=13.8 cents.	Square yard.	112,340,000	$551,512,942	$5,628,858,000	5,189,685,000	[2] 51,896,850
Tapestries and Jacquard woven upholstery goods.	Seven-tenth cents square yard.	35 per cent=1.66 cents.	50 per cent=2.31 cents.	Yard	[3] 67,548,000	.....	21,656,000	89,204,000	624,428
Cotton hosiery	40 cents dozen pair	40 per cent=0.80 cents.	60 per cent=$1.20	Dozen pair.	703,874	2,508,258	60,613,000	58,808,000	23,523,200
Total									77,196,050

[1] Estimated. [2] Imports for 7 months only. [3] Approximate.

The pyramided profits, which would be at least 40 per cent, would make the total increased cost to the consumers $108,074,470.
Increase estimated to be 1 cent square yard because of excess of exports and production over small imports.

[Furnished by expert of the Finance Committee, in collaboration with the expert of the Fair Tariff League.]

THE STEEL AND IRON INDUSTRY AND THE PENDING TARIFF BILL.

The United States has the largest, richest, and most conveniently located deposits of iron ore, copper, lead, and zinc in the world, and coal for their reduction, being the five principal minerals.

In the Alabama district iron ore and coal are in close proximity, virtually eliminating transportation costs in their assemblage.

In the North the world's greatest iron-ore deposits are on the shores of Lake Superior, whence they are carried by water at marvelously little expense to meet coal in the reduction furnaces near Chicago (the freight cost per ton is 17 cents from Superior to Chicago) and in Pittsburgh and elsewhere.

MARVELOUS EFFICIENCY.

Said Henry W. Oliver in a letter to Mr. Frick, July 27, 1897, when they were acquiring some 50 per cent of the known deposits of the Lake Superior region: "We are mining it at present for less than 5 cents per ton for labor." Eight men in 10 hours with one steam shovel mined and loaded into cars 5,800 tons of ore in 10 hours and 164,000 tons in one month. Three steam shovels mined "from its natural bed 915,000 tons of ore during the season of 1900, working day shift only. Five tons of ore are lifted by the steam shovel (like sand or gravel) at each stroke, and five full-weight lifts will fill a car. A 25-ton car can be filled in 2½ minutes, which is at the rate of 600 tons an hour."

The most efficient and cheapest rail transportation on earth is that of the Pittsburgh, Bessemer & Lake Erie, owned by the United States Steel Co., whose vice president, Mr. J. T. Odell, said of it in 1897, "The lowest rate per ton mile, the highest average length of revenue haul in proportion to its track mileage, the greatest density of tonnage in proportion to its freight-train mileage, the greatest average paying load, and the lowest 'ton-mile cost' of any road on the American Continent reporting to the Interstate Commerce Commission." Nine ships can be docked at the same time. Twenty-five thousand tons of all classes of freight can be handled every 10 hours. * * * A 6,000-ton ship can be cleared in 14 hours and in the same time from the moment the hatches are opened the ore can be at the furnaces at Pittsburgh. A new steam shovel was completed last winter by which a train of 35 to 40 cars will be loaded with ore in two hours. A 40-ton car of coal can be unloaded and partly trimmed in the ship in 36 seconds."

These feats were in the infancy of the industry. To-day, says J. G. Butler, a veteran of the industry, the great car dumpers will lift a car containing 110 tons of coal, dump its load and repeat at the rate of 30 cars per hour, with no manual labor beyond pressing a button.

"Now we have vessels loading as high as 12,000 tons at the upper ports in one or two hours with one or two men on the dock, and unloading their cargo directly into 50-ton cars in about the same time, with practically no manual labor.

"Now we handle this vast tonnage entirely by machinery. Steam shovels mine the ore; it flows by gravity into great vessels; huge unloaders transfer it to railroad cars, and car dumpers empty it under ore bridges, all the work being done by power and at a speed little short of miraculous."

THE COST OF THE PROPERTIES.

And what did these properties cost? Said Mr. Oliver, in 1897, "I propose at a risk of using our credit to the extent of $500,000, or possibly $1,000,000, to secure these properties." Says an authority associated with the United States Steel Corporation, in 1903, "On the organization of the United States Steel Co. the Carnegie, Oliver Co. owned two-thirds of the known northwestern supply of Bessemer ore—roughly 500,000,000 tons—which Mr. Schwab has since valued at $500,000,000." Says this authority, supposedly with Mr. Frick's approval, concerning the railroad just mentioned, "It cost nothing beyond initial bonds, which the volume of traffic furnished by the Carnegie Steel Co. itself made good."

These statements show that special congressional grants or taxing powers need not be given this or any other steel company because of the cost to them of their properties.

The State of Minnesota retained its own mineral lands in the Superior region for its educational institutions instead of selling them for a song. Consequently, the University of Minnesota is estimated to own $100,000,000 of ore properties at a valuation far below Mr. Schwab's estimate above.

THE COST OF PRODUCTION.

With these facilities "by 1897 the cost of steel rails on cars at the Braddock Mill was only $12 a gross ton"—2,240 pounds. Said Mr. Schwab, May 15, 1899, in a letter to Mr. Frick. "I know positively that England can not produce pig iron at actual cost for less than $11.50 per ton, even allowing no profit on raw materials, and can not put pig iron into a rail with their most efficient works for less than $7.50 (additional) per ton. This would make rails at net cost to them of $19. We can sell at this price and ship abroad so as to net us $16 at works for foreign business, nearly as good as home business has been. What is true of rails is equally true of other steel products. As a result of this we are going to control the steel business of the world.

"You know we can make rails for less than $12 per ton, leaving a nice margin on foreign business. Besides this the foreign costs are going to increase year by year because they have not the raw materials, while ours is going to decrease."

WE HAVE THE TRADE OF THE WORLD.

Said Mr. Carnegie in 1919: "We have to supply the world—note last week's British advices * * * coke near $3.75 per ton and scarce. Impossible to increase supply of either coke or ore."

"Since we reach Atlantic ports at $1 per ton, we have the trade of the world."

These predictions came true. For some 20 years England has made no attempt to get American business. Her costs will not permit. Only Belgium sends an occasional driblet to us, usually as ballast to the Pacific coast. In 1920 our imports of pig iron were 1.6 per cent of 1919 (census) production and three-fourths of 1 per cent in 1921, with pig iron on the free list; of cast-iron pipe, imports were four one-thousandths of 1 per cent in 1921 against exports of 14.3 per cent; likewise on wrought-iron pipe, with imports averaging $217,000 of structural iron in 1920 and 1921 against exports averaging $32,500,000 under the present duty of 10 per cent, which it is now proposed to increase to 25 per cent.

PRICE FIXING AND WATERED STOCKS.

It is commonly known that the half dozen great steel corporations of this country are a family group in essential respects. Usually they have fixed their prices to a penny and as high as the traffic would bear.

Properties valued at $400,000,000 were capitalized in 1901 in the United States Steel Co. for about $400,000,000 in bonds and funded debt and $1,000,000,000 of common and preferred stock, all water, selling a little later at $8 a share.

Bar iron that had commonly sold a few months before this and other consolidations for 80 cents per 100 pounds, was held by these price-fixing organizations for years at $1.60 per 100 pounds, and a further enormous sum added to profits by the exaction of the Pittsburgh rate of freight in all cases. A buyer, for instance, at whose door the steel competitors delivered their product for $6 per carload freight, was charged by the corporation $37 per carload, unlawfully as the courts are likely to decide in pending cases.

By these price and other exactions the Steel Corporation quickly secured from the public profits that have given its preferred stock intrinsic value and accumulated against its common stock $1,318,864,413 after paying hundreds of millions in dividends.

While some of the smaller companies produce less advantageously than the great corporation, they are superior to foreign competitors.

PRICE FIXING AND THE TARIFF.

Said Andrew Carnegie in the American Manufacturers, July 25, 1884: "We are creatures of the tariff, and if ever the steel manufacturers here attempt to control or have any general understanding among them the tariff would not exist one session of Congress. The theory of protection is that home competition will soon reduce the price of the product so it will yield only the usual profit. Any understanding among us would simply attempt to defeat this. There has never been nor never will be such an understanding."

Said Mr. Phipps, in 1899, to Mr. Carnegie, "I am gratified that we are not to go out of business and especially to make room for a trust, which is by no means a creditable thing. As you say, the tariff would be repealed on rails and rightly so."

This was sound philosophy; the books of the Carnegie Steel Co. for 1889, however, show price agreements and pool settlements in large amounts with protection running merrily on and Congress indifferent. For years following the consolidation American prices were European prices plus the duty and sometimes plus also freight to New York. In these same years the American producers were exporting freely at European prices, as they have done in recent years in enormous and unprecedented volume.

Justice Day, of the Supreme Court, in his dissenting opinion of March 1, 1920, held that the United States Steel Corporation "for many years after its formation had exerted its power to control and maintain prices by pools, associations, trade meetings, and dinners, and that in combination with its competitors it had an ability to fix prices and restrain the free flow of commerce upon a scale heretofore unapproached in the history of corporate organizations in this country."

It is the imperative duty of Congress, guardian of the public interest, to give no penny of duty not required upon definite proof.

The Senate, however, proposes duties upon all kinds of iron and steel products for which no slightest excuse can be found in the theory of protection as our costs are the lowest in the world, as steel producers commonly allow.

PROFITS.

No protection is needed on account of the financial condition of these steel companies because they are the richest and most powerful of all the business organizations upon earth.

Organized with $400,000,000 of tangible property, covered by bonds, and about $1,000,000,000 of watered stock the net tangible assets of the United States Steel Corporation on December 31, 1921, amounted to $1,318,864,513 applicable to common stock. The aggregate net profits available for dividends in the 10 years 1912–1921 were $1,097,177,135.

Other steel companies have prospered correspondingly. The Bethlehem Steel Co.'s pre-war profits were approximately $4,250,000 annually. The average annual profits of 1916–1918 were approximately $29,000,000. The pre-war profits of the Cambria Steel Co. were approximately $3,800,000. In the two years 1916 and 1917 Cambria Steel made more than $50,000,000 of profit on a capital stock of $45,000,000. Crucible Steel and Republic Steel followed similar methods of capitalization, production, and sales prices as the other corporations and to similar advantage.

United States Steel in 1916 earned net $271,531,730. In 1917 it made $349,651,016 after allowing $233,465,435 for Federal war taxes, etc. In 1918 it made $229,201,511 after paying for Federal taxes $274,277,835.

Eighteen steel companies in the pre-war years 1912–1914 averaged a net income of $74,750,000 per annum.

These 18 companies and the Midvale Co., which was organized during the war, averaged in 1916–1918 profits of $337,000,000, on four and one-half times their pre-war profit. Their profits for these three war years totaled over $1,000,000,000.

To subsidize the steel industry, organized in half a dozen companies and virtually controlled by two or three financiers who think alike, is to legislate the money of the private citizen into such other private pockets as have least need of it.

To lay with one hand the power of the Government on the property of the citizen, and with the other to bestow it upon favored individuals to aid private enterprise and build up private fortunes is none the less robbery, because it is done under the forms of law and is called taxation. (Supreme Court of the United States. Marshall case.)

PIG IRON.

(Now free; proposed duty, 5 per cent to 41 per cent; wages, 9.3 per cent.)

We produced in 1914, $313,000,000 of pig iron at a wage cost at the furnace of 7.2 per cent of the selling price of the product, and yet the Payne tariff gave a protection of 7.6 per cent, or more than the total wage cost of production. Wages plus salaries and superintendence was only 9.1 per cent. In 1911 wages were 9.3 per cent of furnace selling price of product.

In 1919, with pig iron on the free list, the product was valued at $794,000,000 with a wage cost of 7.6 per cent. We exported in 1919 $12,313,000 and imported $6,565,000, because our producers invited imports by charging all the traffic would bear. They were making enormous profits. These imports, however, were only eight-tenths of 1 per cent of domestic production. In 1920 we exported $10,000,000 and

imported $12,802,000, being one-sixth of 1 per cent of 1919 production. In 1921, still on the free list, we imported only $2,015,000, or three-tenths of 1 per cent.

COST OF PROPOSED DUTIES.

It is now proposed to give 5 per cent "protection" to pig iron, with 34 per cent on pig that carries manganese and 41 per cent carrying silicon, which alloys are necessary to us for high quality of steel.

The entire wage cost of conversion is only 7.6 per cent of the selling price. These duties, if used by the producers, will add $159,000,000 to their prices, which sum will be, at least, doubled to consumers in so far as they enter into the production of highly finished products like machinery and cutlery and by amortization charges on heavier materials.

Says Senator UNDERWOOD: "I am in the business myself. I represent a great iron and steel district. I would not willingly harm a people that I represented, but neither would I willingly betray a people I represented by taxing them unjustly for special interests. I know this iron and steel schedule and I know that it is a fraud and a shame upon the people of this country. I know that it is not even in the interest of the industry in the end. * * * It can compete anywhere in the world. We are the master iron makers of the world."

Regarding the farmer, he says: "Where the fallacy of this argument comes is that under the guise of doing something to help the farmers in some particular item their support is asked for a bill, of which, as a whole, it seems that for every dollar the farmers may derive from the bill they will pay $100 in taxes for the benefit of somebody else."

Senator UNDERWOOD thinks the pig-iron producers are competing to such an extent that they can not add this $159,000,000 to their prices. This, however, does not excuse Congress from offering them the opportunity.

Moreover, in every period of prosperity the comeptition has been from the other side. Consumers of pig iron, manufacturers of farm implements, stoves, and all other steel products, have played into the hands of the producers by outbidding one another for supplies and themselves raised prices. Manufacturers with large contracts for their steel supplies have been compelled to buy in the open market at 20 to 30 per cent advance, while their own contracted supplies were going to others at similar emergency advances in prices.

Will Congress do what it reasonably can to protect consumers, or will it invite a repetition of these experiences?

BAR STEEL.

(Present duty, 13 per cent; proposed duty, 27 per cent; wage cost, 22.2 per cent.)

We are the world's greatest producers. We exported in 1914, pre-war, 10.4 per cent of our domestic production. In 1919 we exported 16.1 per cent, or $57,000,000 worth. Under the present duty, which averages 13 per cent on bars and billets, the wage cost of converting ore into bars is only 22.2 per cent of the mill selling price, and yet 27 per cent protection is proposed. Our wage cost is the lowest in the world because of our large scale of production, the energy and skill of our workers, and our unsurpassed mechanical devices. With the present duty of 13 per cent we imported in 1919 only one-half of 1 per cent. With such marvelous judgment do our steel producers lift their prices to the top of the tariff wall and hold them there with just enough imports trickling in to show that they can't make prices any higher.

COST OF PROPOSED DUTY.

The proposed duty of 27 per cent would add $67,000,000 to manufacturers' prices, which would be doubled in amount in the agricultural implements, automobiles, household utensils, and like articles, and amortized in coarser products, a final cost of $134,000,000. Twenty years' experience shows that the duty would be added to domestic prices.

STEEL RAILS, STRUCTURAL STEEL AND BARS.

(Now free; proposed, 10 per cent; wage cost, 21.4 per cent.)

The situation here duplicates bar steel, except that exports are still greater, being $10,000,000, or 19 per cent on a production of $54,009,918 in 1914 and 42 per cent, or $39,000,000 of domestic production of $92,849,481 in 1919, 39 per cent of that production in 1920, and 19.8 per cent in 1921, with importations running a fraction of 1 per cent. And yet these commodities are on the free list. Imports are virtually embargoed now, not by tariff but by our lower costs of production. The wage cost is 21.4 per cent only. The proposed duty of 10 per cent makes a present to this industry of $8,000,000 to be doubled in amount against the consuming public, totaling $16,000,000.

STRUCTURAL IRONWORK.

(Present duty, 10 per cent; proposed, 25 per cent fabricated and 4 per cent unfabricated; wages, 20.3 per cent.)

If one iniquity exceeds another, here is a climax. The producers themselves say they beat the world. Exports in 1920, $38,000,000. Imports under the present 10 per cent duty, $284,000, or six one-hundredths of 1 per cent. Exports in 1921, $26,824,000, with imports $149,000, or three one-hundredths of 1 per cent of domestic production. It was not in vain that a representative of the steel industry haunted the room of the Finance Committee. Think of it! Congress proposes to increase the existing 10 per cent duty under which imports are impossible to 25 per cent on the fabricated materials—as definite a tender of the people's money to a special and selfish interest as was ever made by a medieval despot, except that in this case the collection is to be made in such ways as may be by the grantee. The wage cost is only 20.3 per cent.

COST OF PROPOSED DUTY.

If collected the grantee secures $18,000,000 and the public pays $36,000,000 in amortization charges, freights, etc., and rents upon its bridges and skyscrapers. The dwellers in hovels pay rent on skyscrapers, for in them is conducted to-day the principal enterprises of the world. "To him that hath shall be given, and to him that hath not shall be taken even that he hath."

All through this bill some low rates are named apparently to deceive the public, being conditioned upon impossibilities. Here, for instance, unfabricated structural steel would be admitted at 4 per cent instead of 25 per cent for fabricated. With a price difference of $20 per ton it has been found in the past impossible to import mill lengths unfabricated, because on arrival they would have to go for fabrication to an American mill with great wastage in cutting up and handling and an additional freight charge to point of erection.

The entire wage cost of converting ore into structural iron was in 1914, pre-war, 21 per cent of the mill price of product. The wage cost plus salaries was 28.6 per cent. In 1919 the wage cost was 20.3 per cent. The duty now proposed on fabricated is 125 per cent of the entire wage of conversion.

CAST-IRON PIPE—INDICTED FOR CONSPIRACY.

(Duty now, 10 per cent; proposed, 20 per cent; wages, 29.3 per cent.)

This is one of many industries recently indicted by Federal grand juries. But Congress doesn't mind a little thing like this.

The indictment (Dec. 28, 1921, U. S. Court of So. N. Y.) says they manufacture a universal necessity, "cast-iron soil pipe and fittings extensively used in the construction of apartment houses, hotels, dwellings and office buildings, manufacturing plants, and structures of similar character."

They "have fixed and maintained arbitrary, uniform, and excessive prices."

"Each of said corporate defendants has had full information as to amount of tonnage * * * in the stock of each" of the others, "and as to the amount of tonnage" "due on orders placed with all corporate defendants."

In 1921 this Cast Iron Pipe Trust, if so it is, exported 3,575 times more than was imported of cast-iron pipe. This in the face of alleged "arbitrary, uniform, and excessive prices" in the American market that would have made imports great in volume if possible.

In 1920 it exported $9,753,000, or 19.3 per cent, of (census) production. Imports were $41,074, or eight one-hundredths of 1 per cent of production.

Seven months' notice of this, and to-day Congress is trying to shut off debate and by a tariff of 20 per cent rush a gift of $8,000,000 to this trust, as the indictment defines it. This $8,000,000 would become $16,000,000 to consumers at retail.

The duty isn't wanted for revenue, for only $8,000 of duties would be collected.

WROUGHT PIPE.

(Duty now, 20 per cent; proposed, 27 per cent; wages, 18.2 per cent.)

Forty-three million dollars, or 13.4 per cent, of 1919 production was exported in 1920, and $49,000,000,000, or 15 per cent, exported in 1921. Only two one-hundredths of 1 per cent, or $53,862, imported in 1921, and $66,816 in 1921, under the present duty of 20 per cent, which should be eliminated. Honest protection has put agricultural implements, shoes, sewing machines, and cash registers on the free list, because they are produced cheaper here than elsewhere. The Senate bill offers 27 per cent, or $70,000,000, to the makers of wrought pipe, if they can collect it. The wage cost is 18.2 per cent of mill price of product. The Senate would require the Government to prevent importations except on this basis of a duty of 150 per cent above the entire mill's wage cost of production. Is this in the wage earner's behalf?

TIN PLATE AND TERNEPLATE.

(Present, 15 per cent; proposed, 8 per cent; wages, 5.9 per cent.)

Production in 1914, $68,000,000. The wage cost of converting billets into these plates was only 5.8 per cent, yet the Payne duty was 35.1 per cent. Thus was the wage earner "protected." He got one-sixth of the duty supposedly given for his especial benefit. The manufacturer got the rest. Wages plus superintendence were only 6.9 per cent. Wages in 1919, 5.9 per cent. Exports were 5.5 per cent of domestic production and prices kept so high that 2.2 per cent came over the tariff wall, though we are exporting freely at the foreign price.

In 1920 we exported $40,545,000, or 41.6 per cent of our entire domestic production, while importing $127,168, or one-tenth of 1 per cent of domestic production. In 1921 we exported $17,425,000 domestic production, while importing $127,168, or one-tenth of 1 per cent of domestic production. In 1921 we exported $17,425,000, or 17.9 per cent, of 1919 production, and imported $126,000, or one-tenth of 1 per cent. This under the present tariff of 15 per cent, which the Senate proposes to reduce to 8 per cent, or 1 cent per pound. The proposed rate is 135 per cent of the wage cost.

COST OF PROPOSED DUTY.

It gives $7,000,000 to the manufacturers at a cost of much more than twice this to consumers, because the products must go through so many hands, including the tin-plate men, the stamping works, wholesaler, and retailer. Cost to consumers, $15,000,000.

HARDWARE.

(Present duty, 20 per cent; proposed duty, 40 per cent; wages on locks, 31.1 per cent; builders, 32.1 per cent; others, 27.2 per cent.)

Locks, builders' hardware, and all others, except saddlery. Production, 1914, $73,000,000, with exports $6,000,000. Production in 1919, $154,525,000, and exports $11,691,000, or 4.9 per cent of production. Exports in 1920, $17,000,000, or 11.3 per cent of production. Exports in 1921, $7,969,000, or 5.2 per cent of production; 1921 exports would be approximately 40 per cent more in price than here indicated, except for price reductions in 1921. Imports not of enough importance to be separately listed by the Government agencies.

Wages in 1914 were 30.8 per cent of the factory selling price. Wages plus superintendence averaged 40.8 per cent, yet the Payne duty was 45 per cent. In 1919 wages on locks were 31.1 per cent; builders', 32.1 per cent; all others, 27.2 per cent. The proposed duty is 40 per cent, although the industry has prospered and exported freely under the present duty of 20 per cent. The duty proposed gives $44,000,000 to manufacturers, to be doubled against consumers—$88,000,000.

ELECTRICAL MACHINERY, APPARATUS, AND SUPPLIES.

(Present duty, 26.8 per cent; proposed, 41 per cent; wages, 23.9 per cent.)

Production, pre-war, 1914, $355,170,194, with exports $23,060,844. The wages were only 22 per cent of the selling price of the product. With this 22 per cent of labor in 1914 being the principal difference in cost here and abroad, the Payne tariff averaged 37.3 per cent, and virtually embargoed imports, which, so far as classified, were four-tenths of 1 per cent. Our workers and our methods are so much speedier than abroad that any difference in wage cost per unit is questionable.

The industry is in few hands and completely dominated by the world-powerful General Electric and Westinghouse companies. It must be manifest that any tariff on these products will be added substantially in full by the manufacturers. It would be difficult to conceive any business reason that would prevent these great corporations

from using any permit from the Congress of the United States to maintain or to raise prices. In the manufacture of electric bulbs the domination of two companies is so great that the Census Bureau can not divulge cost figures without violating the law against publishing private information. Indictments for price fixing are now demanded against bulb manufacturers by the Lockwood committee of New York.

PRODUCTION, EXPORTS, AND IMPORTS.

In 1919 the total domestic production was $997,968,119—a round billion dollars. Exports were $89,089,711, or 9 per cent, while imports, under the present tariff, which averages 26.8 per cent, were, so far as classified, four one-hundredths of 1 per cent. We had then a virtual embargo, fostering price maintenance, by act of Congress under the present duty of 26.6 per cent. This situation holds to-day, for exports in 1920 were $102,000,000, or 20 per cent of 1919 production, while classified imports were eight one-hundredths of 1 per cent. In 1921 exports were $95,817,885 and imports $732,357, or seven one-hundredths of 1 per cent of production. Can there be clearer proof that the present duty should be decreased or eliminated, as now on agricultural machinery, shoes, and sewing machines, which are on the free list because made as cheaply in the United States as anywhere?

COST OF PROPOSED DUTY.

The Senate proposes, however, to nearly double the duty by making it 41 per cent average, against a wage cost of 23.9 per cent. This invites the industry to charge domestic customers $290,000,000 above the prices of their foreign competitors, which prices these producers meet throughout the world on their exports of $100,000,000 per annum. This $290,000,000 would reach consumers as $580,000,000.

WIRE, WIREWORK, INCLUDING WIRE ROPE, ETC.

(Present: Wire, 15 per cent; wirework, 19 per cent. Proposed: Wire, 28 per cent; wirework, 39 per cent. Wages, 18.6 per cent on wire; 17.1 per cent on wire products.)

Production in 1914, $190,747,732, of which we exported $15,233,000, or 8 per cent. Production in 1919, $444,697,689, of which we exported $51,210,000 of wire and $10,403,000 of wirework; total, $61,600,000, or 13.9 per cent, under the present duty of 15 per cent on wire and 19 per cent on wirework. These duties virtually embargoed imports, which were one-tenth of 1 per cent. With what nicety did our manufacturers hold their prices at the top of the tariff wall, as indicated by this driblet of imports. With what masterly strength did they meet world prices in all quarters with $61,613,000 of exports. In 1920 exports were virtually the same as in 1919, totaling $61,834,000, with imports four one-hundredths of 1 per cent of production, or $1,509,000.

In 1921, with foreign markets depressed, exports totaled $19,000,000, with imports $1,433,000, or three-tenths of 1 per cent.

Wages in wire mills in 1914 were 13.5 per cent of the mill price of the product and 16.1 per cent on wire products. In 1919 they were 18.6 per cent on wire and 17.1 per cent on wire products.

Instead of lowering the present duties of 15 per cent on wire and 19 per cent on wirework and thereby assuring to the American public approximately the international price of these products, the Senate bill proposes to almost double the duty on wire, making it 28 per cent, and to more than double it on wirework, making it 39 per cent, the proposed duties being twice the wage per cents, and absolutely unjustifiable on grounds of protection.

COST OF PROPOSED DUTY.

The proposed rates are a congressional permit to the manufacturers to add $108,000,000 to their prices at the mills, which sum would be greatly increased to consumers, making the total cost $216,000,000.

STAMPED AND ENAMELED WARE, N. E. S.

(Present duty, 25 per cent; proposed, 51 per cent; wages, 25.7 per cent.)

The enameled-ware industry was relatively small in 1914, pre-war, with small exports and imports. It has become great under the present duty of 25 per cent, exporting freely, with imports virtually embargoed.

Production in 1919, $37,636,584, with exports $4,073,455, or 10.8 per cent, and imports only $65,828, or two-tenths of 1 per cent. Exports in 1920, $5,054,000, or 13 per cent, against imports of $366,328, or 1 per cent of 1919 production. In 1921 exports fell, in dollars, to $1,835,233. Careful estimates of price decline indicate that if the prices of former years had held, the 1921 exports would have brought $2,735,000. Imports in 1921, $368,467, or 1 per cent of production. These imports would have brought $460,000 at the prices current in 1919.

The foregoing international trade was under the present tariff of 25 per cent, which Congress proposes to double, making it 51 per cent. A great manufacturer is reported as saying recently that he had nothing to fear from competition under any tariff. The total wages in manufacture in 1914 were 26.2 per cent of the factory selling price. Wages, plus superintendence, were 30 per cent. In 1919 wages were 25.7 per cent, or almost precisely the present tariff rate.

The proposed rate, namely, 51 per cent, will permit the industry to charge distributers $13,000,000, which would be easily doubled against consumers, $26,000,000.

STAMPED WARE.

(Present duty, 20 per cent; proposed, 50 per cent; wages 23.4 per cent.)

The statistics on stamped ware are meager. It is virtually the same product as enameled ware minus the enamel. Production in 1914, $49,000,000. In 1919 the product brought at the factory $101,094,000. The total wage cost of production in 1914 was 22.1 per cent of the factory selling price. Wages, plus salaries, were about 31 per cent. In 1919 wages were 23.4 per cent of factory selling price. The tariff is now 20 per cent.

COST OF PROTECTION.

The Senate bill will increase the tariff 250 per cent, making it 50 per cent, and over twice the wage cost of production, permitting the industry to charge $34,000,000 above foreign prices, to become easily twice that, or $68,000,000, against consumers.

BATHTUBS, LAVATORIES, AND SINKS.

(Present duty, 20 per cent; proposed, 40 per cent; wages, 30.5 per cent.)

We lead the world in these products. Production in 1919, $4,923,000, with exports 19.9 per cent of production; 39.6 per cent in 1920 and 31.6 per cent in 1921. Volume of imports not given. The present duty is 20 per cent. The Senate proposes 40 per cent.

Why not reduce the present duty to an industry that sells one-third of its products at international prices? Its entire wage cost is 30.5 per cent of its selling price. In pre-war, 1914, it was 31.9 per cent.

It is generally believed that price understandings rule in this industry. Buyers have been refused merchandise for cash in the usual way and required to buy through accredited dealers at the latters' "standard" prices.

NAILS, WIRE.

(Now free; proposed, 16 per cent; wages, 14.8 per cent.)

We have led the world in this product since its invention. Thirty years ago we were supplying a great part of the demands of free-trade England at prices so much below domestic prices that the American product was bought in England and reimported into this country at a great saving as against domestic prices. Production in 1914, $24,703,633. The pre-war Payne duty was 10 per cent, yet we exported 6.9 per cent, with imports only six one-hundredths of 1 per cent.

In 1919 production was $44,426,860, of which we exported 19.4 per cent. Although nails were then, as now, on the free list, we imported only six-tenths of 1 per cent. In 1920 exports increased to $11,880,398, or 21.4 per cent of 1919 production, with imports 3 per cent of production. In 1921 exports fell to $3,172,054, partly accounted for by a decline of 32 per cent in prices, with imports $44,038, or eight one-hundredths of 1 per cent. Thus is our market controlled, with nails, like agricultural machinery and shoes, on the free list. The Senate, however, proposes a duty of 16 per cent, being 60 per cent more than the Payne rate and, allowing for the difference in prices, more than double, in dollars, the Payne rate.

COST OF PROPOSED DUTY.

The proposed duty offers $8,000,000 to an industry that dominates all markets, to be doubled to consumers at retail, making $16,000,000.

The wage cost in the mills in 1914 was 9.1 per cent of the mill selling price, and in 1919 14.8 per cent. The proposed duty exceeds the total wage per cent of production.

SCREWS, WOOD.

(Present duty, 25 per cent; proposed duty, 25 per cent; wages, 31.5 per cent.)

Production in 1914, $6,216,940, rising in 1919 to $15,459,582, with exports $2,738,000, or 17.7 per cent, and imports $507, or three one-hundredths of 1 per cent. In 1920 imports were two one-hundredths of 1 per cent, and in 1921 one one-hundredth of 1 per cent. Wages in 1914 and 1919 were 31.5 per cent of mill selling price. Wages, plus superintendence, were 40.1 per cent.

Imports, fiscal year 1914, were $590, or nine one-thousandths of 1 per cent of domestic production. Some returning traveler must have brought in a pocket full. The duty then averaged 66.1 per cent. Exports then and for long years before were made at one-half the domestic price. By act of Congress the American dollar in the purchase of screws was made to go no further than the Englishman's 2-shilling piece, worth 50 cents at the same New England factory. Said a screw manufacturer: "I don't like this; but so long as Congress invites it, how could we help it?" Prices were "rigged to a nicety." In 1920 exports were $1,968,496, or 12.7 per cent of 1919 production, with imports $2,595, or two one-hundredths of 1 per cent. Wages were 31.5 per cent. Last year, 1921, exports 26.9 per cent, or $1,068,995, and imports $2,595, or one one-hundredth of 1 per cent.

It is interesting to note that these postwar imports are under the present tariff of 25 per cent, and that to-day we may reasonably believe that exports are lower than domestic prices, not only by the old 50 per cent but by the present duty of 25 per cent, which the Senate bill proposes to continue to the advantage of the screw manufacturers in the amount of $3,000,000, which would be doubled at retail to consumers, $6,000,000.

FILES.

(Present duty, 25 per cent; proposed duty, 44 per cent; wages, 38 per cent.)

Ordinary sizes and kinds are made in the United States so cheaply that substantially none are imported. The present duty is 25 per cent, which is just the increase to-day in the prices of our file makers to domestic users above their lower prices to foreign users.

Wages, 1914, 38 per cent of factory price of product. Wages plus superintendence, 46.4 per cent. Wages in 1919, 35.2 per cent.

Congress is in the file business to the extent of this 25 per cent as definitely and precisely as the man at the lunch counter is chargeable with his meal ticket. The transaction is definite to a penny. Congress is subsidizing the file business to-day to the extent of $4,000,000 annually, at a retail cost to consumers of $8,000,000. The Senate bill proposes to nearly double the subsidy by making the rate 44 per cent instead of 25 per cent.

Production in 1919, $17,616,563, of which 29.4 per cent was exported, against imports of three-tenths of 1 per cent, these imports being different in kind from domestic production, mostly extra fine, for use of jewelers, manicuring, and the like. Exports in 1920, $5,550,619, or 31.5 per cent, and in 1921, $2,542,153, or 14.4 per cent, which in volume would be much greater than these figures of money value indicate, because of price reductions in 1921. Imports for each of these years, six-tenths of 1 per cent. A recent investigation indicated a single ownership of most of the file companies of the United States and a tendency to identical prices in all quarters.

A representative of the File Trust taking an order for Spain this month was asked, "How can you sell abroad?" "We can undersell the world." "Then why do you want protection?" "To maintain domestic prices."

CASH REGISTERS.

(On free list; proposed duty, 25 per cent; wages, 29.1 per cent.)

Duty 30 per cent under the Payne law. On the free list since 1914, with less percentage of imports under the free list than previously; with no imports of any account under either law. Wages, 29.17 per cent. Proposed duty, 25 per cent. Production in 1919, $31,000,000, of which 14.1 per cent was exported and two one-thousandths of 1 per cent imported. Somebody brought in a cash register. Exports in 1920, $5,942,000, or 19.2 per cent, with imports $324, or one one-thousandth of 1 per cent of production. Imports were $4,045, or one one-hundredth of 1 per cent in 1921, with exports $2,849,303, or 9.2 per cent. All this under the free list. The Senate bill proposes 25 per cent, against a wage cost of 29.1 per cent. If added to prices, this duty will give this industry, which is under a single control, $6,000,000.

It may be said that this duty is put on for revenue purposes. If so, the Government takes a chance on increasing the consumers' price $6,000,000 that the Government may itself collect 25 per cent on imports, which totaled $597 in 1919, $324 in 1920, and $4,045 in 1921.

Such a "revenue" argument was made in support of the proposed duties of 5 per cent on ordinary pig iron, rising to 40 per cent on

silicon pig. In 1921 these duties on pig iron would have netted the Government about $500,000, with the risk, which would be a certainty in good times, of profiting domestic manufacturers to the extent of $159,000,000, with twice that expense to the general public, or $318,000,000.

ADDING AND CALCULATING MACHINES.

(Present duty, 15 per cent; proposed duty, 30 per cent; wages, 25.7 per cent.)

Production in 1914, including cash registers, was $30,519,537. In the fiscal year 1914, under the Payne tariff rate of 30 per cent, which was 150 per cent of the total wages, we exported, including cash registers, 21.3 per cent at international prices. Production in 1919, $52,606,142, and exports, $3,863,217, or 6.7 per cent of production. In 1920 exports were about doubled, being 12.9 per cent of 1919 production. Imports not segregated. These postwar years were under the present duty of 15 per cent, which it is now proposed to double, 30 per cent, thereby inviting the industry, which is a necessity now in our business life, to add $12,000,000 to its factory prices, which would be doubled against consumers. It is submitted that a well-established industry that exports freely at international prices a product made mostly by semiautomatic machinery should be required to submit absolute proof, including factory and other costs, before getting an increase in duty.

COST OF PROPOSED DUTY.

Several domestic producers have recently consolidated. What they can do is evident. The proposed duty invites them to add $12,000,000 to their foreign prices, costing consumers approximately $24,000,000.

The per cent of wages to factory selling price was 20 per cent in 1914 and 25.7 per cent in 1919, or 4 per cent less than the proposed rate of duty. In 1914 wages plus superintendence were 38 per cent of the factory selling price.

SEWING MACHINES AND PARTS OF.

(Now on free list; proposed duty, under $75 value, 25 per cent, over $75 value, 40 per cent; wages, 44.2 per cent.)

It should be a source of national pride that with the highest wages in the world we make sewing machines as cheaply as anywhere on earth. In this fact is the justification and fruition of protection—high wages and low costs. It is said that one American company makes 80 per cent of all the sewing machines made in the world. It fills its orders from the Orient, which are great in volume, from its factory in New Jersey, because it is a little cheaper to do so than from its great and equally well-equipped factory in free-trade England. It is for these reasons that sewing machines are on the free list to-day with agricultural implements, shoes, steel rails, and some other highly finished products. It is for this reason, and this only, that certain other highly finished products, like the majority of cotton goods, table cutlery, and cheap hosiery, should be on the free list.

Protection was never meant to be a perpetual burden upon the American people. It is an economic falsehood to say that in many cases our rate of wages requires this, because the per cent of the product going to wages is often as little here as anywhere in the world, and duties, therefore, benefit the employer only. This is the judgment of many leaders who are posted in the premises.

The per cent of labor in the production of sewing machines was 41.4 per cent in 1914, pre-war. Labor plus superintendence was 50.1 per cent. In 1919 labor got 44.2 per cent of the factory selling price.

In 1914 exports of sewing machines were $11,494,081, or 53.7 per cent of the entire American production. This proved our ability to meet world prices. It was a public scandal that in pre-war years under the Payne duty of 30 per cent domestic prices were much higher than export prices, the entire duty being apparently used against the American consumer. The Senate now proposes to restore this duty, making the rate 25 per cent on sewing machines valued at $75 or less and 40 per cent on more expensive machines, which rates, on the basis of recent imports, will average just 30 per cent.

Although exporting 53.7 per cent of production in 1914, imports were only 2.7 per cent, consisting mostly, if not entirely, of special designs not produced here.

In 1919 production was $43,649,919, of which amount there was exported $12,774,124, or 25.5 per cent of production. Although on the free list in 1919, imports were only $225,541, or one-half of 1 per cent. This low per cent of imports has continued to date, showing our unrivaled supremacy and the increased cost and relative inferiority of European production consequent upon Europe's permanent hurt from the war.

Still under free trade, in 1920 exports were $15,581,843, or 35.7 per cent of 1919 production, against imports of $346,519, or seven-tenths of 1 per cent. In 1921 exports were $7,306,074, or 16.7 per cent, this shrinkage being presumably largely in prices only. Imports in 1921 were nine-tenths of 1 per cent.

COST OF PROTECTION.

The proposed duties invite our sewing-machine companies to add $10,000,000 to domestic factory prices above the prices at which they sell a large proportion of their product abroad. It taxes especially the poor. To say that the proposed tax is for revenue purposes is to admit that Congress seeks a revenue of $120,000 at the risk of increasing factory prices $10,000,000, which would be trebled to consumers under current methods of retailing sewing machines.

PROFITS.

Whether the American manufacturer needs the financial assistance of the Senate of the United States, and what will be done with the money, is indicated in part by the following statement of the earnings of the company which makes substantially all of our sewing machines, having a few competitors, also prosperous.

The capital stock of this company in 1912 was $60,000,000. It had no bonded debt. The following dividends are recorded:

1912, 13 per cent on $60,000,000	$7,800,000
1913, 16 per cent on $60,000,000	9,600,000
1914, 12 per cent on $60,000,000	7,200,000
1915, 8 per cent on $60,000,000	4,800,000
1916, 9 per cent on $60,000,000	5,400,000
1917, 11 per cent on $60,000,000	6,600,000
1918, 10 per cent on $60,000,000	6,000,000
1919, 7 per cent on $60,000,000	4,200,000
1920, stock dividend, 50 per cent	30,000,000

In fact, for the first time in history the principle of protection has been publicly and definitely dishonored by its sponsors in the Senate. Honest protection keeps prices low by making duties equal only "the difference" in the cost of production here and abroad. Sewing machines cost no more, therefore they should be on the free list, as they are.

Chairman MCCUMBER, however, declared (CONGRESSIONAL RECORD, June 10, 1922), "The duty should measure the difference between the landing cost of the foreign article in the American market and the selling price of the manufactured article by the manufacturer in the American market." For clarity he repeated the statement, "The difference between the importing price and the selling price of the comparable American article by the American manufacturer."

Every line in the Senate bill shows this purpose of the maintenance of prices, and whatever prices manufacturers dare demand hereafter.

It should be a matter of pride that American wages in the production of sewing machines, as in many other industries, are the highest in the world, because of American efficiency. This coupling of high wages with low wage cost was the purpose and hope of Washington and Hamilton in establishing the protective policy 150 years ago. Think of debauching the principle of protection now, upon the fruition of its accomplishment.

BOLTS, NUTS, WASHERS, AND RIVETS.

(Present duty, 10.5 per cent. Proposed duty, 11 per cent. Wages, 23.4 per cent.)

Made by automatic machines. A single operator, as in the case of screws, simply feeds long rods into as many machines as he can tend. The bolts drop out at the other end cut to length, threaded, headed, with the nut on, and so fast as to blur the vision. Total wages in the industry in 1914, 25.5 per cent. Wages plus superintendence, 32.9 per cent. Wages in 1919, 23.4 per cent. The Payne rate of duty was 21.4 per cent. Under this rate we exported in the fiscal year 1914 4.9 per cent of 1914 production, which was $33,085,790, against imports of $45,724, or one-tenth of 1 per cent, presumably Swedish steel or special-purpose bolts.

Production in 1919 under the present tariff of 10.5 per cent, $109,333,177, of which we exported $7,769,893, or 7.1 per cent, against imports of $42,305, or four one-hundredths of 1 per cent. Exports were seventy-one times greater than imports. In 1920 exports were 6.7 per cent of 1919 production, and in 1921, 4.5 per cent, against imports of seven one-hundredths of 1 per cent in 1920 and five one-hundredths of 1 per cent in 1921. In other words, exports in 1920 were ninety-five times greater than imports, and in 1921 ninety times. Our bolt makers are good friends, as they should be. Why invite them by nods and winks to "fix" materially higher prices on domestic business than export?

COST OF PROPOSED DUTY.

The proposed duty, averaging 11 per cent, offers the industry $11,000,000, which would be at least doubled against consumers, and sometimes trebled, because bolts frequently go through more hands from production to consumption than the average article.

SADDLERY HARDWARE.

(Present duty, 20 per cent; proposed duty, 35 per cent; wages, 28.6 per cent).

Production in 1919, $14,136,556. Exports and imports not enumerated separately in Government statistics. Wages in 1914 were 30.9 per cent, and in 1919 28.6 per cent. Wages plus superintendence in 1914, 39.7 per cent. The proposed duty, 35 per cent, offers the industry $4,000,000, to be doubled against consumers.

STEAM LOCOMOTIVES.

(Present duty, 15 per cent; proposed duty, 20 per cent; wages, 24.8 per cent).

We lead the world. A recent German report tells of our getting foreign business at both lower prices and better deliveries than Germany can make. Under the Payne law, 30 per cent duty, we exported 8.5 per cent of our domestic production with substantially no imports. Under the present duty of 15 per cent production in 1919 was $156,269,730, of which we exported $30,275,728, or 19.4 per cent. Imports were entirely negligible, being two one-hundredths of 1 per cent or about $40,000. Somebody brought in a few parts.

In 1920 exports rose to $63,629,847, or 34.3 per cent, with imports four one-hundredths of 1 per cent. Exports were eight hundred and fifty-seven times greater than imports. In 1921, presumably at lower prices, we exported $33,696,331, or 21.6 per cent of 1919 production, with imports still further decreasing to $20,050, being less than half the price of one ordinary railway locomotive, and one one-hundredth of 1 per cent of our 1919 (census) production.

Does not honest protection, which safeguards consumers as carefully as producers, call for free trade in locomotives instead of a 33 per cent increase in the present duty or 20 per cent as proposed by the Senate? He who would put a duty on everything without regard to relative cost of production, reads himself out of the ranks of protectionists by its every definition.

No nation compares with us in skill and mechanical ingenuity in the production of locomotives. In 1914 the wage cost in the factories was 25.6 per cent of the selling price of the product, or less than the Payne duty of 30 per cent. Wages plus superintendence was only 32 per cent. In 1919 wages were 24.8 per cent as against the proposed duty of 20 per cent.

COST OF PROPOSED DUTY.

The proposed duty invites our locomotive builders to add about $31,000,000 to domestic prices above their export prices, at which a fourth to a third of their product is sold. There are few makers and nothing so easy as a price understanding.

STEAM ENGINES OTHER THAN LOCOMOTIVES.

(Present duty, 15 per cent; proposed duty, 30 per cent; wages, 22.7 per cent).

In the pre-war year 1914 (fiscal) we exported 5 per cent of our domestic production against one-tenth of 1 per cent imports. We are shipping to all parts of the world. An Imperial German commission reported long ago in the heyday of German production that the city of Berlin could buy the huge engines for her city water works in Milwaukee, Wis., with all charges of transportation and installation, to better advantage than from any German producer.

Production in 1919, $101,952,710, of which we exported 3.5 per cent against imports of three-tenths of 1 per cent. In 1920 we ex-

ported $4,009,225, or 3.9 per cent of 1919 production, with imports $148,878, or one-tenth of 1 per cent of our production. In the poor year 1921 we exported $1,944,155, or 1.9 per cent, with imports $5,733, or five one-thousandths of 1 per cent. In this bad year exports were forty times greater than imports. The factory wage cost of production in 1919 was 22.7 per cent of the factory selling price. The Senate proposes a duty of 30 per cent, or nearly 150 per cent of the wage cost of production.

WATER WHEELS, TURBINES, TRACTOR ENGINES, ETC.

These are made under the same conditions as steam engines. Many of the census enumerations cover all these things in a single group. Production in 1919, $188,444,153. Factory wage cost, 22.7 per cent of the selling price of product. Present duty, 15 per cent; proposed duty, 30 per cent.

INTERNAL-COMBUSTION GAS ENGINES.

(Present duty, 15 per cent; proposed duty, 30 per cent; wages, 22.7 per cent).

Production in 1919, $174,377,872. We exported 12.4 per cent of the product of 1914, which was $72,121,112. Post-war exports and imports are not separately shown. Conditions are substantially the same as in steam engines described above. The Senate proposes to double the present duty of 15 per cent, making it 30 per cent, against a wage cost of 22.7 per cent. Whatever part of this is unnecessary it militates against every farmer, automobile user, many small manufacturers, and all other citizens indirectly.

PUMPS, STEAM AND OTHER.

Production in 1919 of power pumps, $55,745,502, and all other pumps $31,656,438. Exports in 1919, $9,067,458, or 10.6 per cent of production. This increased in 1920 to $13,684,468, or 16 per cent. In 1921, exports $11,966,469, or 14 per cent of 1919 production. Allowing for price reductions, 1921 exports were not less than 1920. Imports not available.

Labor got 23.3 per cent of the factory selling price of the product in 1914 on power pumps, and 21.9 per cent on other pumps, yet the Payne rate was 30 per cent. In 1919 the wage per cent was 25.6 on power pumps, and 18.9 per cent on other pumps. The present duty is 15 per cent on both kinds, which the Senate bill would double, 30 per cent, against a wage cost in 1919 of 15.9 per cent.

WASHING MACHINES AND WRINGERS.

(Present duty, 15 per cent; proposed duty, 50 per cent; wages, 15.9 per cent).

Production in 1914, $7,599,802, rising in 1919 to $40,771,285. Under the Payne duty of 30 per cent in the fiscal year 1914 we exported 14.8 per cent of production. In the postwar years, under the present duty of 15 per cent, exports were, in 1919, 2.9 per cent; in 1920, 5 per cent; in 1921, 3.2 per cent.

The Senate bill gives 30 per cent, or twice the present duty of 15 per cent and twice the wage cost, which was 15.9 per cent in 1919. Exports are not enumerated in the official figures.

WINDMILLS.

(Present duty, 15 per cent; proposed duty, 30 per cent; wages, 21.6 per cent).

The modern windmill is an American invention. Our supremacy is unrivaled. Production in 1919, $9,952,585. Exports in 1919, 11 per cent of production; in 1920, 22.7 per cent; in 1921, 17.7 per cent. Imports not known. Has anyone ever seen in the United States an imported windmill of modern design in operation? Our exports dot all the earth's semiarid regions. Factory wage costs in 1914, 22.8 per cent of its selling price; wages plus superintendence, 32 per cent. Wages in 1919, 21.6 per cent. Present duty, 15 per cent; proposed duty 30 per cent. The proposed duty, if used, would make domestic prices at the factory about 30 per cent more than export prices, being an additional $3,000,000, doubled to consumers at retail, $6,000,000.

PROPOSED DUTIES AND HIGH PRICES.

"The only good reason for allowing products to come into this country to compete with our own is to hold down and prevent any extortionate charges being made by the producers in our own country. We want foreign competition to prevent combination."—Chairman MCCUMBER, CONGRESSIONAL RECORD, July 26, 1922.

Some of the duties in the Senate bill are so high that only insanity could prompt the manufacturers to whom they are granted to add them to their prices. This does not excuse Congress, the trustee of the public interest, which violates its trust if it either invites or makes possible any increase in prices whatsoever not required by an accurate and just disclosure of facts, and particularly of the cost of production in this country, and when possible of foreign costs. No considerable attempt has been made by Congress to get any costs of production whatsoever.

A manufacturer's cost book is his business Bible. He lives by it. If the committees of Congress wanted domestic costs they would get them with absolute ease by simply signifying the fact and requiring authentic costs as a part of every hearing or claim for protection from a would-be beneficiary. Those who don't use facts as a basis of action don't want the facts.

Says Chairman FORDNEY, of the Ways and Means Committee: "Whatever duty you put on is for the purpose of bringing the foreign value (price) up to our value." The United States Tariff Commission, after years of experience and investigation, says: "The tendency on any article that is continuously imported in any considerable quantity and is made both here and abroad is to make the domestic price at least equal the foreign price, plus the duty and more." No one will import unless assured of a price in the United States equal to his foreign price plus freights and handling charges, plus also a profit above his costs of doing business. An analysis of over 100 articles in the (Reynolds) report of the 71 tariff experts employed by the Senate Finance Committee to report on foreign and domestic prices shows that importers invariably sell for all they can reasonably get in the American market, and that in every case the price of the domestic article determines the price of the foreign. The importer often gets higher than domestic prices because his goods are preferred.

To make our prices higher than necessary by such a bill as proposed is to tax our consumers $100 to $1,000,000 for each $1 that it will be possible to collect at the customhouse.

In fact, ordinary articles of general consumption sold in our stores and "made both here and abroad," as the Tariff Commission says, cost American consumers about double the price they cost foreign consumers, and ordinary fancy articles like handbags, beads, and even eyeglasses, that carry 50 per cent and higher duties, retail here at about five times the foreign manufacturers' prices, so rapidly do percentages pyramid through many successive sellers to the consumer.

It is not unusual for a customs appraiser handling innumerable petty imports, and knowing, for instance, that an article of this sort retails for $5, to clear it offhand, at $1 as a fair foreign manufacturer's price. This is on the basis of a foreign factory price of, say $1, to which would be added 10 per cent landing charges, plus duty of, say, 60 per cent, making the cost to the importer, landed, $1.70. To this he would be entitled to 50 per cent additional for costs of doing business in such articles, making $2.35 to the retailer and $5 to the consumer. This is for modest luxuries, so called. Margins would be greater on some things, and much less on articles of general service. In any case the importer rightly figures his margins on his landed costs, duty paid. The duty is as much a part of the cost as the foreign price. What part of his final cost goes to a foreign manufacturer and what part to ocean freight and to duties is immaterial to him. It is, however, for Congress to heed the fact that duties are pyramided, and each duty is doubled and often trebled in the ordinary course of normal business against the consumer. Duties, like prices, should be as low as circumstances warrant in every case.

This fivefold increase in prices of fancy articles is regarded as legitimate by impartial public servants who have figured percentages carefully. The increase, however, is a burden upon American life. It is not chargeable to retailers or others, for at this rate no one gets an excessive profit. These things can be bought, however, at retail in Europe usually for one-half the American price. A 50 per cent tariff alone often adds from 100 per cent to 200 per cent to the foreign factory price by the time the article reaches the consumer. When these facts are known protectionists will make certain that carelessness and partiality in tariff making does not aggravate this burden of high prices.

A CONGRESSIONAL GIFT—$445,000,000 TO MAKERS OF HEAVY STEEL PRODUCTS.

The duties proposed in the Senate bill embargo importations. They carelessly offer to the makers of heavy steel products, pig iron, cast and wrought iron pipe, structural iron, tin plate and terneplate, bar steel, steel rails, wire and wirework, $445,000,000, which sum will be doubled to consumers, making about $900,000,000 to be paid partly in the direct cost of highly finished products like automobiles and machinery, and the balance in amortization charges.

IMPORTS EMBARGOED—REVENUES NEGLIGIBLE.

Imports would be negligible on these basic steel products with no revenue accruing worth collecting. If, however, the quantities imported in 1921 can be imagined as coming in under these high duties, and consequently as selling here, as would be necessary, at foreign prices plus duty and landing charges, this would be conclusive proof that the entire $900,000,000 tariff benefit had been added to domestic prices. On this basis the revenue from imports of heavy steel products here considered would total $1,287,043. The Government would get this; the people would lose $900,000,000 per year so long as these conditions prevailed. The Government would collect $1 for each $770 it made the public liable for.

TO MAKERS OF LIGHT STEEL PRODUCTS, $1,500,000,000.

To the above $900,000,000 of protection on heavy steel products would be added a possible $1,500,000,000 on only 21 of the many highly finished steel products upon which the Government would collect only $1 against each $268 it made the public liable for.

Cost of protection and revenue derived under proposed rates—basis 1919 production.

Article.	Tariff allowance to manufacturers.	Cost to consumer.	Revenue to Government.
Bolts, nuts, washers, and rivets	$11,000,000	$22,000,000	$5,975

[1] Not shown.

Cost of protection and revenue derived under proposed rates—basis 1919 production.—Continued.

Article.	Tariff allowance to manufacturers.	Cost to consumer.	Revenue to Government.
Heavy steel products—Continued.			
Structural iron	$18,000,000	$36,000,000	$5,964
Tin plate and terneplate	7,000,000	14,000,000	10,068
Bar steel	67,000,000	134,000,000	206,239
Steel rails and structural bars	8,000,000	16,000,000	84,121
Wire and wirework	108,000,000	216,000,000	458,449
Total 7 heavy steel products	445,000,000	990,000,000	1,287,043
Grand total 7 heavy and 21 light products	1,197,000,000	2,504,000,000	6,890,950

The Government would get $1 of revenue (column 4) for each $270 it made the public liable for.

A round billion two hundred million of dollars ($1,197,000,000—col. 1), mostly unwarranted, to steel men, and a burden of two and a half billions of dollars upon consumers (col. 2), or as much of this amount as manufacturers can exact.

Here is a potential, and mostly unnecessary, addition to the American cost of living on heavy steel products plus only 20 of the great number of highly finished steel products, of two and a half billion dollars ($2,504,000,000—col. 3).

We invite the criticism that these figures are preposterous. The Senate bill is preposterous. Consequently, its effect upon American life can only be preposterous. Its evil proposals can never be fully availed of by its beneficiaries. It gives these beneficiaries, however, the supporting arm of the Government for price rigging and price maintenance, with the consumer's recourse only to the Department of Justice against unlawful practices to which the bill incites its beneficiaries.

It prohibits importation in prosperous times when manufacturers can charge what they want because of the excessive consumption demand. It starts protection, like the swine of old, "Down a steep place into the sea"—a sea of disrespect and corruption.

STEEL PRODUCTS—RELATION OF PROPOSED RATES TO WAGES, EXPORTS, AND IMPORTS.

Tariff rates often (cols. 2 and 3 below) exceed our total wage cost of production, instead of the difference in cost here and abroad. It enormously favors industries that freely sell abroad at international prices—for instance, wrought-iron pipe, of which we export (col. 3) 3,575 times more than we import.

	Per cent of wages to factory selling price.	Senate tariff rate.	1921 exports exceed imports by "indicated number of times."
	Per cent.	*Per cent.*	*Times.*

A DIFFERENCE OF OPINION.

[Extracts from the Senate debate on wool, from CONGRESSIONAL RECORD, July 26, 1922.]

Senator LENROOT. The Payne-Aldrich bill was crooked, yet if it had not hurt the American people * * * there would have been no such political revolution as followed * * *.

There is very little difference between the Payne-Aldrich bill and the duties as reported in this bill.

Senator MCCUMBER. We died for principle. That is the real thing that was back of the defeat of the Republican Party in 1912.

The Senators who will vote on this matter have their minds made up, enough of them. They will come in at the ring of the bell.

BASIC IRON AND STEEL PRODUCTS.

The adequacy of present tariff rates to protect basic steel products, and indeed, their ability to do without any protection whatever is indicated by the following table:

Iron and steel.

Product.	Calendar year.	Domestic exports.	Imports for consumption.
Pig iron	1919	$12,313,183	$6,565,106
	1920	10,074,377	12,891,834
	1921	933,093	2,614,926
Total, 3 years		23,320,653	21,381,866
Cast and wrought iron pipe	1919	40,407,502	93,821
	1920	53,527,742	94,936
	1921	56,218,936	68,962
Total, 3 years		150,154,180	257,719
Structural iron	1919	28,956,816	131,669
	1920	38,384,690	284,167
	1921	26,824,258	149,097
Total, 3 years		94,165,764	564,923
Tin and terneplate	1919	36,997,634	66,944
	1920	40,545,291	127,168
	1921	17,415,152	125,856
Total, 3 years		94,958,077	319,968
Bar steel	1919	56,672,314	1,666,900
	1920	62,726,372	2,823,930
	1921	15,156,074	763,848
Total, 3 years		134,554,760	5,254,678
Steel rails	1919	38,986,855	651,830
	1920	36,193,689	1,894,226
	1921	18,395,580	841,214
Total, 3 years		93,576,124	3,387,270
Wire and wirework	1919	61,613,546	577,930
	1920	61,834,718	1,609,884
	1921	19,609,463	1,432,652
Total, 3 years		143,057,727	3,620,466
Total of products, 3 years		733,787,285	34,786,900
		34,786,900	
Excess of exports		699,000,385	
Per cent of exports to imports		2,109.4	

Exports are 20 times imports.

Exclusive of pig iron exports were $675,680,000 against imports of $13,405,034. Exports were 50 times greater than imports.

As Judge Gary is reported to have said, our steel industry is the greatest exporting industry in the world.

Costs differ between domestic factories (lines a–e above). They likewise differ between foreign factories.

There is, however, an average and "fair cost" abroad, and there is a "fair cost" in the United States that deserves protection.

A "fair tariff wall" (see chart) protects fair costs and the fair prices naturally flowing from fair costs. It does not protect stupid or careless manufacturers like domestic "e" above, who can live off the public under excessive protection, but under fair protection must reform or quit.

BY PRICE-FIXERS FOR PRICE-FIXERS.

An "excessive tariff wall" is made by price-fixers for price-fixers. It prevents importations in any volume under any circumstances. It enslaves the American people to the highest prices her manufacturers dare charge, and often far higher than these same manufacturers charge foreigners on their own sales abroad.

The Senate tariff bill is the worst ever offered in these reports.

The Fair Tariff League consists of representatives of 2,500,000 farmers, manufacturers, officers of 500,000 wage-earners, merchants, and others, who believe in ample protection for American standards of living and wages.

It opposes the misuse of protection at the behest of great and selfish interests. It desires the cooperation of all who so believe.

Metal products—Relation of customs tariff rates

[1] 1919 production.
[2] 1921 valuation.
[3] Free.
[4] Dutiable.
[5] Estimated.

The PRESIDENT pro tempore. The hour of 4 o'clock has arrived, and the question is, Shall the amendments made as in Committee of the Whole be engrossed and the bill be read a third time?

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time.

The PRESIDENT pro tempore. The question is, Shall the bill pass?

Mr. ASHURST. On that question I ask for the yeas and nays.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. ROBINSON (when Mr. CARAWAY's name was called). My colleague, the junior Senator from Arkansas [Mr. CARAWAY], is necessarily absent. He is paired with the junior Senator from Illinois [Mr. MCKINLEY]. If my colleague were present and not paired, he would vote "nay."

Mr. EDGE (when his name was called). I have a general pair with the senior Senator from Oklahoma [Mr. OWEN]. I transfer that pair to the junior Senator from Vermont [Mr. PAGE] and vote "yea."

Mr. LODGE (when Mr. FERNALD's name was called). I desire to announce that the Senator from Maine [Mr. FERNALD] is paired with the Senator from New Mexico [Mr. JONES]. If present, the Senator from Maine would vote "yea."

Mr. UNDERWOOD (when Mr. HARRIS's name was called). I wish to announce that the senior Senator from Georgia [Mr. HARRIS] is absent from the country. He is paired with the junior Senator from Missouri [Mr. SPENCER]. If present, the Senator from Georgia would vote "nay."

Mr. CURTIS (when Mr. LA FOLLETTE's name was called). I was requested to announce that the Senator from Wisconsin [Mr. LA FOLLETTE] is paired with the Senator from Michigan [Mr. TOWNSEND]. If present, the Senator from Wisconsin would vote "nay" and the Senator from Michigan would vote "yea."

I also desire to announce that the junior Senator from Missouri [Mr. SPENCER], if present, would vote "yea."

Mr. MCCORMICK (when Mr. MCKINLEY's name was called). I was requested by my colleague [Mr. MCKINLEY] to announce that if he were present he would vote "yea." He is paired with the Senator from Arkansas [Mr. CARAWAY]. Both Senators are absent from the country.

Mr. MCCUMBER (when his name was called). I have a general pair with the junior Senator from Utah [Mr. KING]. I transfer that pair to the junior Senator from Washington [Mr. POINDEXTER] and vote "yea." I wish to announce that if present the Senator from Washington [Mr. POINDEXTER] would vote "yea" and the Senator from Utah [Mr. KING] would vote "nay."

Mr. GERRY (when Mr. PITTMAN's name was called). I wish to announce that the Senator from Nevada [Mr. PITTMAN] is absent on account of illness.

Mr. POMERENE (when his name was called). I again announce my pair with my colleague [Mr. WILLIS], who is detained by serious illness in his family. Being unable to obtain a transfer, I am obliged to withhold my vote. If permitted to vote I should vote "nay."

Mr. WATSON of Indiana (when his name was called). I have a standing pair with the senior Senator from Mississippi [Mr. WILLIAMS]. I transfer that pair to the junior Senator from North Dakota [Mr. LADD], and vote "yea." I am informed that if the Senator from Mississippi [Mr. WILLIAMS] were present, he would vote "nay," and that if the Senator from North Dakota [Mr. LADD] were present, he would vote "yea."

The roll call was concluded.

Mr. BORAH. I desire to state that the Senator from Nebraska [Mr. NORRIS] is necessarily absent from the city. I am authorized to say that if he were present he would vote "nay."

Mr. CURTIS. I was requested to announce the necessary absence of the junior Senator from Maryland [Mr. WELLER], and that if present he would vote "yea."

Mr. LODGE. I desire to announce that the senior Senator from California [Mr. JOHNSON] is paired with the junior Senator from Georgia [Mr. WATSON]. If the Senator from California were present, he would vote "yea."

Mr. JONES of New Mexico. I desire to announce the transfer of my general pair with the Senator from Maine [Mr. FERNALD] to the Senator from Nevada [Mr. PITTMAN]. The Senator from Nevada [Mr. PITTMAN] is absent on account of illness. If he were present he would vote "nay."

Mr. HARRISON (after having voted in the negative). I have a general pair with the junior Senator from West Virginia [Mr. ELKINS] who is unavoidably absent. Being unable to obtain a transfer, I withdraw my vote. If permitted to vote I would vote "nay" and the Senator from West Virginia would vote "yea."

I also desire to announce that the junior Senator from Georgia [Mr. WATSON] is paired with the senior Senator from California [Mr. JOHNSON]. If the junior Senator from Georgia were present, he would vote "nay."

Mr. HALE. I desire to announce that my colleague [Mr. FERNALD] is necessarily absent. If he were present he would vote "yea."

Mr. BALL. I wish to announce the necessary absence of my colleague [Mr. DU PONT]. If present he would vote "yea."

Mr. SHORTRIDGE. I wish to announce that my colleague [Mr. JOHNSON] is necessarily absent, and that if present he would vote "yea."

So the bill was passed.

Mr. McCUMBER. Mr. President, I move that the Senate insist on its amendments, ask for a conference with the House on the disagreeing votes of the two Houses, and that conferees be appointed by the Chair on behalf of the Senate.

The motion was agreed to; and the President pro tempore appointed Mr. McCUMBER, Mr. SMOOT, Mr. McLEAN, Mr. SIMMONS, and Mr. JONES of New Mexico conferees on the part of the Senate.

On motion of Mr. SMOOT it was—

Ordered, That the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes, be printed with the amendments of the Senate numbered.

AMERICAN VALUATION PLAN.

Mr. JONES of New Mexico. Mr. President, I do not know how much attention may be required in conference on the tariff bill with respect to the American valuation plan, but I have a copy of a brief which I believe is the best statement of the subject I have seen. It is prepared by the National Council of American Importers and Traders, and anyone who desires to study the question, I am sure, will receive great assistance from this brief. I ask, therefore, that it may be printed in the RECORD in 8-point type.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and it is so ordered.

The brief referred to is as follows:

[National Council of American Importers and Traders, New York City.]

TARIFF UNCERTAINTY PARALYZES TRADE.

"We can not hope to sell where we are not willing to buy."—President Harding.

AMERICAN VALUATION PLAN.

Section 402 of the Fordney bill provides:

"Domestic value: The domestic value of the imported merchandise shall be the price at the time of exportation of the imported merchandise at which similar domestic merchandise, packed ready for delivery in the principal markets of the United States, is sold or freely offered for sale to all purchasers in such markets in the ordinary course of trade and in the usual wholesale quantities.

"Import value: The import value of imported merchandise shall be the price at the time of exportation of such merchandise to the United States at which such or similar imported merchandise is freely offered for sale, packed ready for delivery, to all purchasers in the principal markets of the United States in the ordinary course of trade and in usual wholesale quantities.

"Export value: The export value of the imported merchandise shall be the price at the time of exportation of such merchandise to the United States at which such or similar merchandise is freely offered for sale to all purchasers in the principal markets of the country from which exported in the usual wholesale quantities and in the ordinary course of trade for exportation to the United States, plus, when not included in such price, the cost of all containers and coverings and all other costs, charges, and expenses incident to placing the merchandise in condition, packed ready for shipment to the United States, less the amount, if any, included in such price, attributable to any additional costs, charges, and expenses and the United States import duties incident to bringing the merchandise from the place of shipment in the country of exportation to the place of delivery in the United States, and plus, if not included in such price, the amount of any export tax imposed by the country of exportation on merchandise exported to the United States.

"Cost of production: The cost of production of imported merchandise shall be the sum of (a) the cost of materials and of fabrication, manipulation, or other process employed in manufacturing or producing identical or substantially identical merchandise at a time preceding the date of shipment of the particular merchandise under consideration which would ordinarily permit the manufacture or production of the particular merchandise under consideration in the usual course of business; (b) the usual general expenses (not less than 10 per cent of such cost) in the case of identical or substantially identical merchandise; (c) the cost of all containers and coverings and

all other costs, charges, and expenses incident to placing the particular merchandise under consideration in condition, packed ready for shipment to the United States; and (d) and an addition for profit, not less than 8 per cent of the sum of the amounts found under paragraphs (a) and (b), equal to the profit which is ordinarily added in the case of merchandise of the same general character as the particular merchandise under consideration by manufacturers or producers in the country of manufacture or production who are engaged in the same general trade as the manufacturer or producer of the particular merchandise under consideration.

"Value: The value of imported merchandise shall be (1) the domestic value; (2) when the domestic value can not be ascertained to the satisfaction of the appraising officer, then the import value; (3) if neither the domestic value nor the import value can be ascertained to the satisfaction of the appraising officer, then the export value, plus, if not included in such price, duty, cost of transportation, insurance, and other necessary expenses from the place of shipment to the port of arrival in the United States and a reasonable addition for profits and general expenses, not less than 16 per cent; and (4) if neither the domestic value, the import value, nor the export value can be ascertained to the satisfaction of the appraising officer, then the cost of production, plus duty, cost of transportation, insurance, and other necessary expenses from the place of shipment to the port of arrival in the United States and a reasonable addition for profits and general expenses, not less than 16 per cent."

REASONS FOR REJECTING SECTION 402, THE SO-CALLED "AMERICAN VALUATION" PLAN.

As Senator Penrose has announced that the Senate Finance Committee has decided to adopt the so-called "American valuation" plan and does not care to hear further arguments on the subject, the only remaining appeal is to public opinion and to individual Members of the Congress. Since any tariff policy now adopted must influence every phase of the great reconstruction problems facing the United States and the world in a far-reaching way, a restatement of the case becomes a duty.

Secretary Hoover has recently said:

"Our whole standard of living greatly depends upon our imports, and our exports are the great balance wheel for our production. Exports are vital to the stabilization of our industries, of price levels, of wages, and of employment. While our exports do cover but a small per cent of our total production, on the other hand they comprise a large percentage of the production of certain industries. For instance, we generally export 20 per cent of our wheat, 60 per cent of our cotton, 75 per cent of our copper, not to mention others. Unless we find a market for the surplus production of our great industries we shall continue to keep some 25,000,000 of our people in reduced buying power. We might even drive them into poverty during the many years that would be required to shift the whole basis of our internal production."

The problem could not have been better stated, and its solution has a direct relation to the "American valuation" plan, because in its application that plan must materially advance prices and seriously reduce both imports and exports.
